# GEN. DAVID D. COLTON.

The idea of perpetuating the history of the active men of our new and peculiar society, of seizing upon and fixing in ink the marked individuality that is being developed around us from day to day, and photographing from nature the character of men worth knowing, before the grim tyrant pushes them without the focus of our moral lens, is one in which the proprietor of the Mail Bag takes to himself no little pride.

The strong men who braved the perils of a wild life, of savage Indians, and, if possible, of still more savage companionship with white men in the early days of California, are rapidly passing away. In a few years they will be no more. We are resolved they shall not be forgotten.

It has been said that history cannot be written under a century, while biography must be composed from day to day. But the biography of our pioneers is the history of our State. Believing this to be true, it is part of our plan to continue these sketches, not more for the satisfaction of the men of our own period, than because of the abiding faith we possess that this periodical will prove a mine of biographical and historical knowledge, in which the future historian of our coast will delve, and without which generations to come would have but a dim and imperfect idea of the founders of the great, free Empire of the Pacific.

This purpose we shall steadily keep in view, and shall insure the historical value of our sketches by treating the subject with a free and just hand, dealing strongly with faults, and pointing them out without fear and without favor.

The subject of our present biographical notice, DAVID DOUTY COLTON, at present a citizen of San Francisco, is perhaps as well known in California and Oregon as any gentleman in either State; son of Isaac W. Colton and Abigail Douty, of Monson, in the State of Maine, and born 17th July, 1831. This is all we know of his origin, and indeed is all that is worth knowing of any man's origin. Five years after, in 1836, the family broke loose from its moorings, and drifted to the westward, floating slowly along the tide of emigration, and grounding at last at Galesburg, in Illinois.

Galesburg was then a wilderness. Black Hawk had just been driven west of the Mississippi in a short and decisive campaign, in which Winfield Scott was a General, and Abraham Lincoln a private soldier. But the country was rough and new, and the normal condition of the inhabitants that of wretched poverty in all things save that of mere food. Of that they had enough. How poor were the people of the Northwest from 1837 to 1859, no one but an eye witness can conceive. The present prosperity of that country is especially calculated to give a false impression of its former condition.

It was in the days of almost unrestricted free trade, when the corn had to be carried to Liverpool, and manufactured goods brought from Manchester, and all at the farmer's expense. Corn they had plenty of, and they could eat it; therefore they were not hungry. They could also burn it for fuel, and so kept themselves warm enough in winter, but there its use practically ended. To export, it was worth five cents the bushel, and all the bushels any farmer could raise would fetch but a small quantity of goods from Manchester.

So the boy Colton grew up. Schools were not plenty, nor regular, but such as were to be found he went to. The New England breeding of his father insured that. At last an academy, or college, was founded at Galesburg; Knox College it was called, and still flourishes. How much aggregate learning it possessed we do not know, nor is it material to our purpose, as it is not understood that he swallowed, much less digested, all the mental pabulum served out, even at that primitive establishment.

He was too restless ever to be a scholar, and too self-willed to submit to the drill of a student. His attendance at college must have been quite irregular, for at sixteen he was himself teaching a country school in a neighborhood still more primitive than his own, and with pupils certainly quite as old, if not as crudite as himself.

His first experiment in this vocation was at Berlin, Illinois, and there is now a gentleman in this State who was a pupil therein, and who relates the result of an attempt of his own made upon the opening day as leader of the big boys to rebel against the new schoolmaster, who was actually younger than himself. The discussion was lively, and in character roughand-tumble. It lasted near half an hour, and much furniture was smashed, greatly to the terror and amazement of the small children; but the authority of the youthful pedagogue was established upon a firm and enduring basis, and was never again questioned.

About this time he became enamoured of Miss Ellen M. White, daughter of Dr. Chauncey White, a physician and old resident of the town of Chicago. The Doctor, a prudent and thoughtful man, opposed his suit, calculating, with very reasonable judgment, that the chances were altogether too strongly arrayed against the young man ever coming to any good to justify him as a father in letting his daughter be Mrs. Colton.

And according to all ordinary rules the Doctor was right. But Miss Ellen was not following ordinary rules; she was in love, and love is itself. a rule, and of all rules the strongest. She engaged herself in marriage. But an engagement was not marriage, and it turned out that there was enough prudence between the two to defer this important step to a more propitious day, and in the meantime Colton resolved to seek his fortune in California. The Doctor consented to this, with a strong faith that an accidental shot, or a malaria, or perhaps a providential rope, would get him out of the scrape.

This was 1850, and in July of that year David Colton emerged from the Sierras and entered the town of Sacramento. He had crossed the plains to seek his fortune. Like most of the young men of that day, he had for a time most chequered and varying luck.

First he worked for wages at mining. Ten dollars a day was sufficiently tempting to hold him for a fortnight or so. This he received for work on Feather River, but luckily, or unluckily—for who can tell what is best for us?—he fell sick of typhoid fever, and lay under a tree for six weeks, without so much as a tent, and so was pushed out of employment, and came to San Francisco, then, as now, the usual resort of invalid miners.

At San Francisco he managed to get money enough to engage and pay for a steerage passage on a schooner bound for Oregon.

What Oregon was in the year of grace 1850, it would take a volume to relate. It was held by the scattered occupation of ten thousand frontiersmen, who had been forced out of Western Missouri by what they considered over population; by ten thousand men, who had each taken alarm at the circumstance of finding a neighbor within ten miles of their cabins, and had fied. Strange cattle had been seen cropping the grass, strange pigs had munched pecans in competition with theirs, and a famine was threatened, so they departed, nor paused until they had placed a continent between themselves and the terrible danger.

Here, upon the banks of the Willamette, they had pitched their tents, taking care to be good ten miles apart, and so, mingling with the savage tribes of the Pacific, ate scalded maize fried with bacon, and chattered Chinook jargon, in the well-grounded faith that their cattle and pigs were safe from rival encroachments, and that themselves would not soon be reached by telegraphs, railroads or school houses.

And but for the gold discoveries, no doubt Oregon could have gone on in its rudeness until the few arts of civil life known to its people were lost, and until the English language had given place to the Hudson Bay Company's jargon. But such was not to be the result. Gold was discovered, and gold-hunters poured into the valley of the Willamette.

Colton reached Portland in September, 1850, in improved health, and resumed the struggle for existence. During the Winter his occupation might have been classified as various. He was ready to do anything not

dishonest. In fact he did teach school, and he tried to practice law. We hope his clients were satisfied with him, and possibly they were. Remember, this was in Oregon, and the time 1850 or 1851. We have never heard of any complaints, but that circumstance is not absolutely inconsistent with the theory that they may have all been convicted and hanged.

In the early Spring, General Joe Lane came in from the Siskiyou Mountains. The General was a back-woodsman of the old school, and never got beyond the point of commencing his christian name with a small j. Yet he afterwards served a term in the U.S. Senate, and came near being Vice President—indeed, would have been, only Hannibal Hamlin got more votes than he did! But the General did not come home to teach the proper use of capital letters. He came to say that he had discovered rich gold mines at Shasta Butte. The Oregonians did not stop to inquire how the place was spelled, but set forth to find it.

Colton went with them, and was among the first on the ground. At that time the country now known as Siskiyou County, was infested by savage Indians, and was even more dangerous than Arizona is at this day. Mining was a dangerous occupation, and that most necessary auxiliary to successful mining known to us as prospecting, was even more so. Young Colton soon became known as one of the boldest of the leaders of prospecting parties. With rifle and revolver, and equipped with pick and pan, a half dezen men would penetrate to the very center of the Indian country. Of course many were slaughtered by the savages.

It was an affair of this kind that first brought the subject of this biography into public notice. Two miners, Converse and Haines, formerly from Illinois, were prospecting on the Klamath. An Indian, known to the whites as "Chinook Chief," head of all the Klamath bands, contrived to entice them across the river to his rancheric, addressing them in Oregon jargou, and telling them of rich diggings, and then murdered them both.

During the afternoon of the same day, Colton, with one companion, ignorant of what had occurred, entered the Rancheric of "Chinook Chief," and found him dressed in the clothes and bearing the arms of the murdered men. The two got away in safety, and a few hours after learned of the massacre of Converse and Haines; they immediately collected a band of whites and marched against the Rancheric. A battle ensued, in which, though several Indians were killed, the chief escaped. But not permanently, for Colton, with two miners who volunteered to go with him, pursued the murderer through the mountains for six weeks, and at last captured him on the Shasta River. Having captured "Chinook Chief," they were still in no little danger, for it was necessary to take him to Scott River—the nearest white settlement—for trial. There was no road, and the country was beset with hostile tribes.

Colton and his friends tied their prisoner upon a horse, and set off

with him across the mountains. They got on well enough the first day, but at night they came upon a ranch of "squawmen," as they were called—white men cohabiting with Indian women.

One of these, a man named Vail, who afterwards served a term in the California State Prison, threatened to rescue the "Chief" from his captors. The case looked desperate for a time, but Colton was equal to the emergency. He resumed his march, although it was then after dark, and by traveling all night reached a place of safety and delivered up his prisoner, who was afterwards, by the sentence of a jury of miners, hanged.

This may be called rude justice, but this was at Scott River, and there were no constituted authorities nearer than Shasta, the county seat, and over the mountains at that early period there was no road. Indeed, this circumstance, with others, led to the creation of the county of Siskiyou, with the town of Yreka for its county seat. The miners declared that they would have a county of their own, and that young Colton, for his gallant exploit, should be Sheriff.

It was done, but when the new county was formed, and the election came on, the intended Sheriff was found to be ineligible. He was under twenty-one years of age. This difficulty was, however, partially reconciled by the election of Charles McDermott as Sheriff, while Colton was appointed Under Sheriff. At the end of McDermott's term he retired, and the Under Sheriff was by the people promoted to his place.

About this time he returned to Galesburg to claim the lady he had left behind. The Doctor forgot his former misgivings, his fears for his daughter, his hope and trust in accidental bullets and unpremeditated ropes, and gushed forth in blessings on the match. They were soon married, and set off for the Pacific Coast.

Colton held the office of Sheriff of Siskiyou county four years, and this during the wildest period of border life upon the Pacific. The Indians had not yet been pushed back upon the plains or exterminated as they have since been. The consequence was that riding about the country, a duty often performed by the Sheriff, was not unattended with danger. Sheriff Colton exchanged shots more than once with parties of savages lying in ambuscade, and escaped by good fortune and the speed of his horse.

At one time in the year 1853, while riding in the mountains, he learned from a friendly Indian that the family of a mountaineer named Johnson was to be attacked and murdered. He at once rode towards the settlements in quest of aid, but found a narrow pass along which his road lay guarded by Ind.ans, expressly to prevent assistance reaching the family. He dashed through the gorge, however, taking their are as he passed; one ball going through his hat within an inch of his head, and another in the "machears" forward the horn of his saddle. In two hours he

was back among them at the head of twenty-five mounted settlers, and in time to save the Johnson family from massacre.

But if the Indians were wild, the white men at times were nearly as bad. The miners were restless fellows, and seldom satisfied with anything. Among other peculiarities they could never be content to await the action of the regular courts for the punishment of crime. If a criminal was lodged in jail it would often occur that the first Sunday after his arrest the collected crowd of miners would open the doors, hold lynch court, and either release or hang him, as they believed to be just, and in accordance with rude frontier law. In such cases no jailer ever dared to dispute the majesty of the mob, but surrendered the keys at the first demand.

A case of this kind had occurred while Colton was Under Sheriff. A Frenchman had committed a crime, homicide we believe, perhaps in a brawl over cards. The poor fellow was unknown and friendless, and besides, could not speak a word of English. There is no doubt that in such communities cases do occur where summary justice administered by the populace proves beneticial and even necessary. But this was clearly not such a case. There was, indeed, every reason why this Frenchman should have been left to the ordinary tribunals. But the crowd collected as usual, and his destruction was resolved upon. They proceeded to the the jail in a body, according to custom, and demanded that the doors be opened. The demand was speedily complied with, indeed, we believe at that time the sovereign authority of a mob in such matters had never in California been questioned. The Frenchman was taken out and hanged.

Colton, the Under Sheriff, was absent at San Francisco at the time, and only learned upon his return what had occurred. He took strong ground against the action of Judge Lynch, and then and there promised the orderly portion of the community, for such there were, and who had seen most reluctantly the late execution, that should he be elected Sheriff, the jail doors should not be opened except by lawful authority. He soon afterwards had an opportunity of showing how sincerely the pledge was made.

A ditch company had commenced operations near Yreka, and was sell ing water to the miners. There was a dispute in some way about the right, followed by injunctions and restraining orders. The miners—and it happened they were the same crowd who hanged the Frenchman—were arrayed against the water company. The ditch was cut, and a miner imprisoned for contempt of court in cutting it, contrary to a restraining order. The miners felt that their authority was superior to that of the courts. Their friend was incarcerated, and must be released. They had always been in the habit of breaking into the jail to execute

popular justice, and now they would do the same to relieve their friend from an imprisonment which they considered unlawful.

To resolve was almost to execute. They assembled in the evening, two hundred in number, and marched up to the jail. They demanded that the doors be opened, as usual, to the majesty of the people. The jail-keeper referred them to the Sheriff, and asked for time. It was granted, no one dreaming of resistance. The Sheriff was sent for. He came, but to the surprise of all, declined to open the doors or surrender the prisoner. He was Sheriff, so he said, "and sworn to preserve the law." The mob laughed derisively at first. It was a joke. He must yield to irresistible power, so they declared, and if wise, would yield gracefully. But the Sheriff was in dead earnest. He said, "You can't come in unless you kill me first."

This speech put an end to the laughter at least, for the matter looked serious. The miners had not come to kill a sheriff, nor with the expectation of being obliged to do it. But they had come to get their man, and him they would not go away without. So a parley ensued, and in the meantime his under Sheriff, Major White, slipped a pistol into the Sheriff's hand. Up to that moment he had been unarmed. There was more talk and more threats. The crowd said, "Go about your business and don't make a d—d fool of yourself;" and the Sheriff reiterated the statement that he "stood upon the law and his duty, and that the door should not be entered save across his dead body."

Here was a dead lock; neither would yield. At last it was brought to an end, by an angry miner, who could stand it no longer, saying: "Then die, you d—d fool, if you insist on it," cocking and presenting a revolver. Colton did not wait for him to fire, but banged away at the speakes knocking him over, and kept it up till his pistol was empty, the crowd scampering off the ground as fast as they could run, leaving the Sheriff for the moment in possession of the building.

But they did not run far. They had been taken by surprise, and now, for the first time, were angry. They rallied when out of range of the pistol, and soon formed to march back, vowing vengcance. This time they would do more than release a prisoner—they would hang a Sheriff. And so they would have done, but for the fact that the law-abiding citizens of Yreka had now come to the defense of the jail and the Sheriff was in force sufficient to beat off the attack. Hugh Slicer, now of this city, aided most gallantly in the defence, and received a serious gun-shot wound. The County Judge of Siskiyou County, Judge Westbrook, also the County Clerk, H. G. Ferris, Col. Templeton and many other citizens, took part in defending the majesty of the law. The result was that the mob was beaten off, leaving several on the ground dead, and carrying away with them still more wounded. The front of the jail, where Col-

ton stood when he first opened fire, was marked with near a hundred balls, yet by what appeared almost a miracle, he received only two, and those only trifling wounds.

It is almost needless to add that no prisoners were ever afterwards taken out of Siskiyou County jail, either to be hanged or liberated, and it is probable that the mob spirit throughout the whole coast received a most decided check from the prompt and determined action of Sherift Colton, backed up by his fellow citizens of Yreka.

Upon the reception of the news of this action, Governor John Bigler at once appointed Sheriff Colton to be Brigadier General of Militia for the northern portion of the State, which trust he held as long as he resided in that part of California, and which as a title of courtesy he still holds among his friends.

Upon the expiration of General Colton's second term of office as Sheriff of Siskiyou, he was put forward by the Democratic party of the District as its candidate for State Senator.

General Colton had always acted with the northern wing of the party, and was consequently supported by David C. Broderick. The Whig party had ceased to exist, and the Republican party, at least in the northern counties, was not yet organized.

His opponent was a Know-Nothing, and at the election of 1857 the Know Nothings were still strong. The contest was close, and it was thought that Colton was elected. Indeed, the certificate was issued to him, and many of his friends, including Senator Broderick, urged him to hold on to the seat, and rely upon the Senate, then strongly Democratic, to retain him in the place.

There is no reason to doubt that in those partisan times, had he held on, the Senate would have given him the seat, and thrown out his opponent. But he adopted the better course. Believing that the majority of votes was with his opponent, General Colton yielded to him, and gave up without controversy.

This matter settled, General Colton left Siskiyou county for the purpose of perfecting himself in the legal profession, towards which he had always had a strong bias. The year 1858 he spent at Albany, in the State of New York, in attendance at the law school of that place. In the spring of 1859 he graduated, and received his certificate of practice. He then purchased an elegant law library, and accompanied by Ralph C. Harrison, Esq., a young graduate of the same institution, the two settled at San Francisco, and opened a law office in Merchant street. But it soon became apparent to General Colton, as well as to his partner, Mr. Harrison, that the day for the General to ever become a successful practitioner of the law had passed.

His former career had unfitted him for the monotony of such a career. He had seen too much of frontier life, had passed through too much

of adventure, too much strife of another sort, too much politics, too much speculation. He could not stay in his office and wait for a client to come and give him fifty dollars, when he could could go on the street, and in half the time, by a trade or speculation, make a thousand.

His name remained for years in the firm of Colton & Harrison as a nominal partner, but the General was understood to be in more active life, and more lucrative than conducting the suits of others. When he had law suits they were his own.

Poverty—at least in the commencement—appears to be an absolute condition of success at the bar. And whatever merits General Colton may possess, poverty is not likely to be one of them. He is too energetic and too practical to be poor.

General Colton entered warmly into the views of Douglas on the Anti-Lecompton question. In this he was no doubt largely influenced by his friendship for David C. Broderick. That gentleman had been elected Senator in 1857 by a very decided triumph over the chivalry wing of the Democratic party. So decidedly had he carried the State that he was able to not only insure his own election, but to name his colleague, it happening that for the moment both Senatorial seats were vacant. In an evil hour—it is difficult to know at this day why—Mr. Broderick determined to aid the election of Wm. M. Gwin.

But before doing so he exacted from Gwin a letter, to be held in terrorem, pledging all the official patronage of the coast to Broderick. This letter Broderick retained possession of in order to ensure the fulfillment of the contract. One of the parties to that transaction is dead, and the other, shelved less by age than the rising of a civilization with which he is incapable of sympathizing, perhaps even of understanding, but both were able and talented men in those times. Yet, in looking back with the calm and retrospective eye of history, it is hard to conceive how such a trade could have been entered into. That it was entered into, and its faithful performance demanded and expected, is a fact discreditable to the State, and as for the parties, it can only be said that it is difficult to determine whether it was the more disgraceful to write such a letter or to accept it. For the wrong of the thing, Broderick paid dearly enough. To begin with, it availed him nothing; and second, it contributed as much as any other fact to the quarrel out of which grew the duel that caused his death. Gwin, perhaps counting upon the very iniquity of the affair for its concealment, repudiated his part as soon as his election was secured, and Broderick, with an effrontery that showed his estimate of such public opinion as then existed, published the letter directly that he learned of Gwin's intention.

So they left for Washington, where in a few weeks Gwin was in the bosom of the administration, rewarding his followers from the fountain of. office, while Broderick, disappointed and chagrined, was in violent and vindictive opposition.

The political campaign of 1859 was an exciting one. Broderick, still smarting with the recollection of his wrongs, led a "bolt" from the regular party, and tried to carry the State against the Administration.

General Colton entered ardently into the views of his friend, and accompanied him in the canvass through his old home, the northern counties.

Early in the contest rumors gained ground of a conspiracy to force the Senator into a duel, and so to kill him. For our own part we are strongly disposed to doubt the existence of any such conspiracy at any time. Duels are always of doubtful result. Bullets are not respectors of persons, and Southern fire-caters are in the main as strongly attached to life as other people. But true or false, certain it is that pending the struggle, Broderick, while at the breakfast-table in his hotel, made some slighting remarks about Judge D. S. Terry, and allowed himself to be drawn into bandying of words with one Pericy, and what was more he was weak enough to announce himself as ready to fight a duel with Judge Terry, or, indeed, anybody seeking such an affair, provided only that he would wait till after the election.

Almost immediately after election day, Terry resigned from his seat on the Supreme Bench, and challenged Mr. Broderick to mortal combat. That gentleman had, by his own folly, rendered it very difficult to refuse a meeting. In fact he had, by his reckless conversation with Perley, placed it almost out of his power to do so. Yet, we wish that we could truthfully record that General Colton, when called in as Broderick's friend, had counseled that course, but we cannot.

It is a sad confession to make, that among all the surrounding advisers of the doomed Senator, there was not one who had the moral courage to stand firmly up for the right and to repudiate the barbarous and disgusting, indeed, we may almost say, cowardly custom of the duello. To say that General Colton did not, is merely to say that he was not in advance of the age and civilization in which he lived. That he has changed his views upon the subject now, we have no doubt, but no credit can be claimed for a change that was not made till all the community worth speaking of, or taking into account, had changed likewise.

Of the fight it is enough to say that the belligerents met and that, save in the final result, fortune seemed to favor Broderick, and to look frowningly upon his adversary. There is a tradition of the field that Terry had the advantage in the preliminary arrangements, but if he had any advantage whatever, it was an advantage given him by nature and by long practice, in coolness and presence of mind under danger, and of such advantage he could not, according to the code, be deprived. In all the matters left in such affairs to chance—in the word and position, all of

which General Colton won for his principal—Broderick had the best of it. Indeed, in the opinion of men who have made such things the subject of calculation, he had twenty-five per cent. the advantage. But when a man accustomed to handling pistols from boyhood, and to being in peril as a natural and usual situation, meets one of more peaceful habits, there cannot be much equality. But of all that inequality, Mr. Broderick took cognizance, and to it consented to submit himself when he announced that he was willing to be bound by the bloody rules of the code. And at last, when the men stood face to face, all advantages and disadvantages sank into insignificance and disappeared, for Terry, at the word, and with no sort of hesitation, banged away as if shooting at a squirrel, plumping Broderick through the breast and inflicting a mortal wound—so bringing all questions of chances of word, of weapons and position, to an abrupt and final end.

The whole affair was a misfortune in which, probably, Broderick was the smallest loser of all concerned. Indeed, of all who were out on that day, it is probable that not one failed to regret, or will ever cease to regret, his connection with the unhappy affair, and while General Colton possessed energy and vitality enough to rise superior to a single mistake, yet we feel sure that he must look back with sorrow to think that youth and vicious or mistaken public opinion should have committed him to act a part in such a disaster.

As we have intimated before, his conduct can only be excused in view of the associations and surroundings of a youth and early manhood spent upon the wildest of frontiers. If he did not refuse to take part in the duel, and urge his friend Broderick to do likewise, it is certainly true that such a course would have been utterly unavailing, and it is equally true that Gen. Colton acted towards Mr. Broderick as he would had their positions been reversed have wanted and expected that gentleman to act towards himself.

The duellists at that time were the masters of a certain society, and that society arrogated to itself the position of being the best. Mr. Broderick either believed in the code, or if he did not, was too weak to rise above and stand superior to the sneers of those who, by his own submission to their tyranny, were by him thus confessed to be his betters. We can all see it plain enough now, but who could have or would have acted differently in 1859?

On the breaking out of hostilities between the North and the South, Gen. Colton, without hesitation, declared himself strongly in favor of the war to preserve the Union. It will be remembered that California was called upon to furnish a quota of troops, five regiments in number. The Secretary of War telegraphed to Governor Downey to appoint Gen. Colton to be Colonel of the regiment of cavalry, which would have given him the seniority. This the Governor consented to do, but de-

termined at the same time to appoint Mr. Columbus Sims to be second in command. Colton objected, and protested that Sims was not a fit man for the place, but his objection was not heeded. Sims was appointed, and Colton, though he had already made considerable pecuniary sacrifices to enable him to enter the service, declined to accept the place of Colonel. That he was correct with respect to the character of Sims, we believe subsequent events established conclusively. His resolution not to enter the army was soon confirmed and made final by his learning that the regiment was not to be sent to the seat of war, but would operate in guarding this coast and the Indian country; and of that sort of military life he had had enough.

It will be remembered that early in 1862 there was a coalition formed between the Republicans and the Douglas Democracy. It originated in a Legislative caucus, and was brought about chiefly by the management of John Conness, with the consent of many, though not all of the Republican leaders. Governor Stanford, especially, was opposed to the fusion, and came out with a written manifesto against it. He saw plainly enough that the Republicans must triumph anyhow, and feared the accession to his ranks of so much political talent as the Douglas Democracy was known to contain. And in the end his fears proved but too well-founded, for, in the vulgar parlance of the period, Conness got away with him. Colton was invited to join this movement by an authorized letter over the signature of Walter Vandyk; but he occupied at the time the prominent position of Chairman of the State Central Committee.

It was this position more than anything else, we have no doubt, that kept the General from doing as the great mass of Douglas Democrats did, and entering the Union Republican party.

He had no sympathy with Secession, and sincerely believed that war—and war vigorously prosecuted—could alone preserve the nation in its entirety; yet, as Chairman of the State Central Committee, he was the head of the organization, and for him to go over to another party, appeared like an act of treason to those who had elected him. Whatever others might do—and the most of them sooner or later turned Republicans—he felt like the captain of a foundering ship, and that so long as there was a soul on board he must remain at his post.

If he ever desired to change his party, this was the only really favorable opportunity that offered during the war. And it turned out, in fact, that the Union men in the Democratic party, who declined that offer, found no other, and have been obliged to this day to consort with secessionists, whose principles they must have detested, and whose very companionship could not have been very agreeable. Among such we may name J. P. Hoge, Esq., Frank McCoppin, Esq., J. C. L. Wadsworth, S. M. Wilson, Peter Donahue, George L. Bradley and others, all as bitterly opposed

to secession as any Republicans in the State, and all of whom were delegates to the Convention of the Colton Democracy of 1862.

Like Cortez, they burnt theirships, but, unlike him, they failed to conquer. Finding that his own party, by which he had stood so faithfully, was irrevocably committed to disloyalty, as how could it be otherwise with a majority of avowed secessionists in its ranks, and feeling that he was not needed by the now triumphant Republicans, General Colton quietly withdrew from participation in politics, save alone the citizen's duty of voting, which we believe he never fails to perform. Even this duty-he no longer discharges as a strict party man, but votes as often the Republican ticket as any other.

In 1865, General Colton went to Europe with his family and spent two years in travel, visiting all the various countries upon that continent, as well as the Holy Land, Egypt and Turkey; and in Europe penetrated far enough north to see the midnight sun and to stand upon the north Cape. Since his return he has been engaged largely in legitimate mining in this State, in Nevada and in Wyoming Territory. He is a large owner and President of the Amador mine, and also the Rocky Mountain Coal Company.

With respect to the capacity of General Colton as a business man, it is perhaps enough to say that the care and management of either of these immense properties would tax the energy and power of most men. The Amador mine alone turns out its half million dollars of gold bars annually, and has, we believe, under Gen. Colton's management, kept up fully its reputation for being among the best mines, if not the very best, upon the Pacific coast. The Rocky Mountain Coal Company produces 500 tons of coal per day, and supplies the Trans-continental Railroad with fuel.

The habits of General Colton, as a strict and careful business man, are so strongly in contrast with the wild life in which he was bred, that we deem them worthy of remark, as exemplifying how a strong will may overcome the influences of any mere habit.

He is a man of strictly temperate and regular life. Nine o'clock in the morning always finds him at his office, prepared for the duties of the day. By this plan he is able to master the affairs of the various mining properties under his control, as well as his own real estate, of which he possesses a large quantity. Indeed, Gen. Colton is altogether too prudent a man to embark his entire fortune in mining operations, though he sees in them the great and chief source of wealth in our State, but holds real property always sufficient to ensure himself against those sudden reverses which are so often met with in the business of mining.

We do not speak of his wealth as a special merit, for so we do not consider it in any sense, but to show to the rising youth of our country what may be accomplished by energy, perseverance and prudence, even though great difficulties are in the way.

We have dealt with Gen. Colton as we promised to do in the beginning, and as we intend to do with all the gentlemen whom we deem worthy of a place in our pages, with a free hand. We have not concealed his faults, and if any injustice has been done, it is rather in omitting mention of the nobler traits of them than in suppressing subjects of just criticism. The faults of Gen. Colton's character are the faults of his surroundings and associations, the rough and rude vices of a new and wild society—his virtues are all his own. He is an earnest, strong willed, and thoroughly self-reliant man—one of those who move the world, and do about all there is done, whether good or bad. His vitality is great, his power to work almost inexhaustible.

Our readers at a distance, will perceive at once that they have before them the likeness of the representative man of a period—a man who is the natural growth of a peculiar condition and time, and that when that time shall have passed away, while there may be many better and worse and wiser and weaker, there will be no more of precisely the same kind.

We have dwelt somewhat at length upon the subject; we have done so in the fullness of conviction that we shall not again have to deal with a person of more perfect individuality, of more sharp and distinct characteristics, than are to be found in DAVID D. COLTON.

#### Hotel Expenses and Cost of Living in San Francisco.

Now that a portion of the current of travel from China and Australasia to the United States and Europe has been diverted into a new chartee, by the establishment of reconlar steam communication, it would not rest many to know the very moderate expenses incurred either in possing the lighter in sojourning a while in the city of San Francisco. We give, therefore, a brief statement of them, leaving the traveler to compare them with that of other places. In no city in the world is hotel accommodation of the same excelence to be obtained at so moderate a price. At the Occidenta' and Grand Hot - and at the Lick Horse unsurpassed board with comfortable quarters can be obtained for three dol ars per diem. At the Cosmopolitan, one of the finest hotels in the United States, and at the Russ House, the expense is somewhat lower; while at the American Eye and International Hotel board and lo laine, with excellent table, can be had for from one dollar and a half to two dollars a day. If the traveler desires to conomize, he can obtain a good bed-room for from three to four dodars per week, and can get meas at restaurants for from fifteen to fifty conts onch, according to the dishes he selects. He can thus measure his wants by the length of his purse, and yet always obtain clean, well-cooked meals at a less cost than any city we have ever visited, either in the Unit d States or Great Britain. To those who prefer a more lengthened stay and purpose going into housekeeping, we would say that provisions are very moderate in price; Beef, from 12 to 1s cents per pound, according to the joint, mutton, 10 to 12 cents; lamb. 12 to 15 cents, yeal, 12 to 15 cents; pork, 12 to 15 cents; bucon, 20 cents; butter, 40 to 50 cents; flour, \$1.50 to \$2 per sack of 50 pounds, petato s, 15, to 3 cents per pound. Al' vegetables are cheap; when not in season there is, of course, an advance. Milk is 10 cents a quart: eggs, 40 cents per dozen. Dairy produce and poultry are the only things which rate higher than in the East rn States. Of the fruits, they are at times in such abundance as hardly to pay the expense of bringing them to mark t. A six roomed house in a respectable locality may be rented for from \$20 to \$25 per month and apward, one with eight or ten rooms, from \$40; ten to two we rooms, from \$60. Traveling to and from a shurban residences is not very expensive, however, car tickets being from 3 to 61, cents each, and terriage across the bay, to the most be untiful environs in the world, from 10 cents to 25. This, we think, concludes our list of necessaries for a life in San Francisco. It is a city in which a man or a family may live as extravagantly as they may please, but where they can practice economy if they choose.

## CALIFORNIA MAIL BAG.

#### Lord Mayo.

The telegraph brings us the sad and startling news that the Governor-General of British India has met his death at the hands of the assassin. Any details of this brins 1 india has met his death at the hands of the assassin. Any details of this fearful event is denied as in consequence of the interruption of the postal service with Europe. We are only led to believe that the murder was prompted by private revence and not the result of conspiracy. From the time when in 1850 the Duke of Wellington said to Lord Napier, upon this latter pleading his age and long service in that part of the world, "If you won't go out to India I must," public attention has been much more attracted in England to the government of her immense Easthas been much more attracted in England to the government of ner immense Eastern possessions. After the hard-fought battles and glorious victories in the northwest, followed by the annexation of the Panjaub and pensioning of Dhulcep Singh,
the discipline of the army, both native and European, noder Lord Gough as Commander-in-Chief, had become exceedingly lax. This remisences of duty extended
even to the civil servants of the East India Company, and many were the complaints sent home of the conduct, and mode of life of the British officers and the irregularities and extortions of the heads of departments. The effects of Lord Dalhousie's splendid administration had not begun to be felt, and only the military Danions is spendic administration and not begin to be text. So Lord Napier sailed again; a little, old, shabbily-dressed man, with a large pair of horn spectacles on a hooked nose, looking for all the world like a Jew peddier; but behind those spectacles was an eye as keen as a hawk's, and that shrunken frame contained an iron will that admitted of no opposition and allowed no error or irregularity. He stayed rather more than a year in India, returning in May, 1851, and during that time had completely reorganized the discipline of the army, reforming, remodeltime and completely reorganized the discipline of the army, redoming, relationing, rebuiking, and even going so far as eashiering officers derelict of their duty. Naturally he was most unpopular, especially with those who the most deserved censure. As we said, Lord Dalhousie was then Governor-General; he had previously been President of the Board of Trade at home, and devoted himself to the development of the vast resources of the Empire. In 1853 he commenced a net work of electric of the vast resources of the Empire. In 1853 he commenced a net work of electric telegraphs all over ludit, at the same time urging the construction of railroads as a means of opening up the interior as well as of speedily massing troops at any given point. It was during his administration that ground was broken for the Northwestern Railroad to Delhi. In 1854, Lord Dalhousie sailed home, and was succeeded by Lord Canning, whose five years tenure of office was most difficult and disastrous, for in 1857 the great mutiny took place, and the following four years were spent in restoring the shaken prestige of British arms. Through a strange concurrence tranquility was hastened by the fact of the transfer of the Government of India from the East India Company to the Crown. The native superstiment of India from the East India Company to the Clown. The harve supersti-tion was, that the Government founded by Clive was to last a hundred years. That century expired in 1857, hence the rising. When it was proclaimed that the Gov-ernment of India had been taken from the Company and vested in the Queen, the century expired in 1857, hence the rising. When it was proclaimed that the Government of India had been taken from the Company and vested in the Queen, the population saw the fulfillment of the tradition and submitted to the new ruler. The Indian mutiny had one good effect, in bringing out men like Havelock, Sir J. Lawrence and Sir Coin Campbell. In 1862, Lord Elgin was ordered from China to join Sir John Lawrence as Viceroys of India. The former remained but one year, and the labor and administrative ability were mainly the lot of the latter. Few men were more fit to govern the country than Sir John Lawrence. With a thorough knowledge of the language, even to the dialect, he could converse with Kings. Princes and Rajahs in their own tongue. His talents as a diplomatist were equal to his ability as a soldier, and his schemes of internal communication and improvements surpassed those of Lord Dalhousie. During his administration thousands of miles of navigable and irrigating canals, which had been tardily progressing, were pushed on towards completion. Of railroads, we may note the opening of the Northwestern to Delhi; of the Great Indian Peninsular, which, although formed in 1845, was only resuscitated by large Government grants of land; of the Scinder of the Great Madras Railroads, together with other smaller tributary lines; so that last year there were in India 4,000 miles of trunk lines already opened, 1,000 in course of construction, and 9,000 miles to be immediately commenced. In addition to which there are now more than 15,000 miles of electric telegraph lines communicating from all parts of the country. The Earl of Mayo, better known in English political life as Lord Naas, succeeded Lawrence as Governor-General of India in September, 1868. He was then only forty-six years of age; he had previously been chief Secretary for Ireland in D'Israeli's Ministry, and receiving his new appointment under that administration was confirmed in office by the new Premier, Gladstone. The Massach and the produced the Stone. This was a rare compliment to the young statesman, but it proved the sagacity of the Prime Minister. Lord Mayo had a difficult task to perform. He

had to suffer comparison with his illustrious predecessor; he had to carry out or vary his great public works; he had to continue that system of friendly intercourse with the native Princes so happly begun by Lawrence; he had to provide for an extraordinary expenditure, as well as to meet an immense deficit, and he undertook the task. The enormous outlay of the past years began to bear truit, and the revenue returns became enormous. As we have before remarked in the York Letter, the detlet in 1867–688 was one million sterling; in '68-99 it was more than three millions; '69-70 there was a surplus of a hundred and twenty thousand bounds, and the estimated surplus for '70-71 exceeds one million sterling, and that in the face of an annual payment of one million eight hundred thousand sterling, interest on railroad capital. India has never been more prosperous, mere peaceful, and exhibited more signs of enduring tranquility, and consequently increasing wealth, than under the rule of Lord Mayo, and all right-minded men will grieve with Great Britain at the irreparable loss the blow of the assassin has caused. There are those who, jealous of the power and imperial sway of England in the East, look upon these calamities as the natural consequences of oppression, as the results of provinces wrested from their ancient rulers, who point to Onde, Scinde, the Punjaub, as England's recent acts of spoliation; but let such persons consider that the worst tyramy of a debauched British superintendent of a district, draink with brandy pawnee, and maddened with loss ab brag, is a paternal government in comparison to that of the best of native Princes; and the greatest curse that could befall india would be the naractly and confusion which would ensue upon a separation from the mother country. It was Lord Mayo's grateful task to receive Prance Alfred, of England, at the end of 1863. She son of the Queen of England held a court which revealed the most brilliant gatherings at the time when Tippoo Saib ruled supreme. Independent Kings

We are not much of a literary critic—have read a little in our time, but never read anything we liked very well. It will not, therefore, be expected of us that we shall enter upon any very extended and minute analysis of a story by Mr. Smintheus, in the February and March numbers of the Overland Monthly, entitled "Scth Dene's Revelation." Nevertheless, we should fail of our duty it we did not say that it is a very good tale, most excellently told, and ending very weakly. To one thing in it we vigorously object: the hero is a reader and admirer of Wordsworth, and is, therefore, a young man in whom we cannot be expected to take a very deep interest. Mr. Wordsworth comes very near proving the death of him, of which we are very glad; and does not quite kill him, of which we are correspondingly sorry. For we hold that any man who can love the un-ulferable weakness and unmeaning drivel of that prince of idiots has no moral right to existence. If we could work out our own sweet will, his entire school as Byron would say, they are called a "school" because they have not finished their education, they should be field up, like other blind pupples, in a sack, and drowned in their favorite lakes. And while we are upon the subject, let us respectfully ask if the publisher of the Overland has no means of obtaining a few commas to stick into his sentences. The best modern usage prescribes a comman at the end of each word, and in the Overland their is commonly only one to each two words, by which the sentences is entirely lost. In the matter of separating the halves of such words as "anybody," "everybody," "ynaything," "wery thing," ever yenting, everybody, "ynaything," "wery thing," ever yenting, everybody in a new story and the over of humanity, and these cheering qualities are what chiefly distinguish man from other brutes.

<sup>—</sup> The Assembly has killed the bill for the relief of the Labor Exchange, for the reason that the Secretary is accused of tampering with the honor of a young woman who applied for assistance in obtaining a situation. The Assembly might have found an additional reason in the fact that a remote ancestor of one of the trustees was once suspected of being a witch. But we are surprised and delibed to discern in the Assembly a tendency toward the discouragement of immorality, and only wish that Satan might find a better method of rebuking sin than by withholding aid from the Church.

<sup>—</sup> We learn from Hongkong that Mrs. Yelverton's first "Readings" were given to a crowded house, and were very much appreciated.

#### The Charge of the Mail Brigade.

"Two hundred tons!" the Postmaster said.

"Two hundred tons by to-day's train contributed;

Two hundred tons to be forthwith distributed.

Is there a man afraid?
Is there a man dismayed?"
Said Postmaster Stone.

"Two hundred tons of mail matter delayed! Two hundred tons of papers and letters! Plain daily papers and papers pictorial; Some papers with news, and some that

are story all; Letters that scold and letters that flatter; Letters of love and letters professional; Letters of business and speeches Con-

gressional;
Two hundred tons of all sorts of mail.
Is there a man afraid?
Is there a man dismayed?"

Quoth Postmuster Stone. Then up spoke his Deputy, (Holland Smith hight was he) Out spoke the Deputy: "No, Chief not one!"

Mail bags to right of them, Mail bags to left of them, Mail bags in front of them,

Toppled and towered; Shasta; Mountains of mail bags as tall as Mt. But not a man shrinks or lags as the Chief

cast a
Glance of his eagle eye
Where that pile huge and high
Horribly lowered.

Half a rod, half a rod, Half a rod onward, All in the Post Office Charged the One Hundred. "Forward the Mail Brigade! Charge for the bags!" he said. Right on the pile of bags Rushed the One Hundred. "Forward the Mail Brigade!" Was there a clerk dismayed? Not though each man knew Tom Scott had biundered. Theirs not to make reply,

Theirs not to make reply,
Theirs not to reason why,
Theirs not to faint and sigh
At the labor before them;
Theirs on that mass to fly

Towering o'er them.
Mail bags to right of them,
Mail bags to left of them,
Mail bags in front of them,

Fearfully lowered.
Then the Clerks, one and all,
On that huge heap and tall
Solemnly glowered.

"Forward the Mail Brigade!" Then one wild charge they made; Coatless, their arms all barc, And sleeveless, gleamed high in air Sorting the letters there, Charging the mail bags, while All the town wondered.

Charging the mail bags, while All the town wondered. Plunged in the cloud of dust, Right through the pile they rushed, Crowded and jammed and crushed, Chief and subaltern! Down melts that pile so high,

Down mets that pile so high,
As snow melts 'neath April's sky;
Lord! how the letters fly,
While to the work they ply
Deputy and all turn.

When can their glory fade? O the wild charge they made! All the town wondered: Honor the charge they made; Honor the Mail Brigade— Col. Stone's Mail Brigade— Noble One Hundred!

— A snow-bound passenger train is a little world—a world in which sintul games are played, as in the bigger world outside. Upon one train, during the recent blockade on the Union Pacific, there were the following incidents: A lecture, divine service, a case of larceny and another of small-pox, a death, a fre, a collision, two burths, a vigorous wife-beating, and numberless other occurrences of the kind inseparable from, and essential to, the existence of man in quantity. What a hateful beast is conglomerate man! It is impossible for one to look at him without a lively disgust, similar to that inspired by the spectacle of a tangled wad of rattlesnakes, thawing and stinking in the Spring similaht. A single individual of the species is tolerable, but put a score of them into close contact, and straightway they shall begin to enact you so varied and multifold unpleasantness—so distracting and displeasing pranks—a myriad of so fathonless abominations, that one would tain be a dog, if that dogs only were any better or worse—which they are not. We never look upon a man without thinking of that horrid—perhaps fabled—animal that is clean-limbled, and sweet, and gracious, and comely, but which no sooner touches one of its kind but it begins to exade a grimy sweat and expire a noxious odor. This beast the reader will find fully described in Dr. Langstrothe's Fauna Numidies, a most entertaining work. Immortal, are you, Yahoo' God-like! In the image of your Maker? And yet you thieve, you beat wives, and you collisious, and fires, and divine service, and the small-pox! Talk not to us, monster, of your Godlike attributes; we know you for a most pestilent and forbidding beast, requiring the constant purification of water, and of-renewed annointings with pertunes. N. B.—The Town Crier has the honor to announce that he will address his estimable fellow-citizens to-morrow evening, at Dashaway Hall. Subject: "Self-Revelation—A Vindication of Man's Divine Origin and Nature." He hopes to see the house packed and jammed. No collectio

<sup>—</sup> The Woman Suffrage Society says it "loathes and abominates" Dr. Holland's social-evil bill. For a precisely similar reason the butchers loathe and abominate the law providing for an official inspection of their wares.

#### The "Eccentricities" of a Genius.

Genius has its prescriptive privileges, its conceded eccentricities. It has a free charter to be odd, unconventional, even uncouth. It enjoys an exemption, as to the style of its apparel, from the domination of fashion and the tyrampy of tailors. In the matter of shirt collars and neck-ties it is lawless, or a law unto itself. Like Olympian Jove, it may arrange its ambrosial curls without deference to the reigning style, and part its hair, if so it chooses, in the middle. It may wear its trowsers tucked inside its boots. When it gets drunk, we draw a delicate line between inebriated genius and vulgar intoxication. If glorous Byron drugged his muse with gin, it is nobody's business. If Poc died in a protracted debauch we drop a pitying tear over his grave, and think of him rather as an unfortunately constituted being with an organization morbidly sensitive, than as a beastly dunkard. To the low-browed bigot, who selects such cases as texts for his dull moralizing, we say

"Judge not; the workings of his brain And of his heart thou canst not see."

The unconventional genius, the uncouth genius, the dissipated genius -we know them all, and can tolerate them, though it is often more agreeable to know them by their writings than to have personal relations with them. But what shall be said of the genius whose eccentricities crop out in the ugiy shape of ingratitude, treachery, and meanness inefable: Of a genius who, on leaving the scene of his earlier triumphs, who, for a wider field—after bidding farewell with protestations of undying friendship to those who had encouraged him by their appreciation long before he had won a general recognition, and to others who had lent him aid of a more substantial kind, neelects and ignores them utterly -who never deigns so much as a niggard line in reply to letters of friendship or of business—who, having, at his own suggestion and request, been permitted to take with him to his new sphere and "wider field" the manuscript poems of a lady for whom he had always professed the sincerest regard, with a promise to find a publisher for them, allows month after month to roll away, until they may be counted by the year, without communicating with her—who makes no respionse to her inquiries in regard to the service he had voluntarily assumed to perform, and who, when requeeted to return the manuscript, still maintains a dogged or contemptaous silence. What shall we say of a zenius of this peculiar type, if any such exist? In our judgment it would require at least a score of volumes of poetry, equal in eloquence to the famous "Heathen Chince," to atone for such unlovely "eccentricties of genius" as these.

#### English Synonyms.

The copiousness of the English tongue, as well as the difficulty of acquiring the ability to use its immense vocabulary correctly, is well exhibited in the following array of synonymous words; which, if not new, is yet a capital illustration of the nice illustrations which characterize so many of our vocabularies. It is no wonder that we slip occasionally, even the warriest of us. A little garl was looking at the picture of a number of ships, when she exclaimed, "See, what a flock of ships!" We corrected her by saying that a flock of ships is called a flock. And here we may add for the benefit of the foreigner who is mastering the intricacles of our language in respect to nouns of multitudes, that a flock of girls is called a bovy, that a bevy of wolves is called a pack, and that a pack of theves is called a gang, and a gang of angels is called a host, and a host of porpoises is called a shoal, and a shoal of buffaloes is called a covey, and a covey of children is called a troop, and a troop of partidges is called a covey, and a covey of backguards is called a heap, and a heap of oxen is called a force, and a force of backguards is called a mob, and a smool of whates is called a shood, and a school of worshipers is called a congregation, and a corps of robbers is called a covey of a swarm, and a corps of robbers is called a covey of scalled the clite, and the niscellaneous crowd of the city in thieves and rascais are called the roughs, and the miscellaneous crowd of the city folks are called the community, or the public, according as they are spoken of by a religious community or the secular public.

— The German Savings and Loan Society, of No. 511 California street, has recently purchased the three-story brick bailding on the north side of California street, next door west of the Western Union Telegraph Company's office, with lot thirty-one feet front by one hundred and twenty feet deep, which formed a part of the Fuller estate. The price paid was \$65,000, or nearly \$2.100 per front foot. The main story is now being overhauled and fitted up in the most substantial manner for a first-class banking office, and when in shape will be occupied by the institution which has just purchased it. It will be one of the most commodious banking houses in the city.

<sup>—</sup> A religious contemporary says he can tell the state of any man's heart by knowing what that man considers ridiculous. We consider our contemporary ridiculous; what is the state of our heart? Whateverlite, it is a very peaceful one.

- We compile the following agricultural intelligence from the columns of our We compile the following agricultural intelligence from the columns or our city exchanges, for the instruction and benefit of our country readers: The wheat crop of '72 will be very light, owing to the heavy rains; some of the vines being entirely washed out, and others having been taken into the house and put under the stove to dry. Warmth and the society of cats are very distasteful to wheat vines... Beans—not beens as the Bulletin maliciously spells them, nor biens, according to the contemptible insinuations of the Alta—are coming forward finely, cording to the contemptible insinuations of the Alla—are coming forward finely, and are nearly ready for digging. Some varieties, sown too early for the late rains, look rather sick, but they will probably perk up when the sun comes out. The bags exhibit a more healthy growth than last year, and if they are not cut with the hoes in digging we shall have more than the crop will fill... There will be no silk this year, except what comes from China. Our farmers have not yet learned to take it off the ears before it dries up into useless little wads... Owing to the richness our soil the cotton crop will be a failure: nothing but careful top-dressing can prevent its turning into wool, and in top-dressing most people cut the the tops entirely off.... Corn will be splendid. The injurious system of covering it up with dirt before planting has been entirely abandoned. It is now inserted into the colo without son fooding and the vield will be limited only by the sevent supply of color on band: any fooling, and the yield will be limited only by the scant supply of cobs on hand; the snow blockade having left us with but a small stock. We are confident that any fooling, and the yield will be limited only by the scant supply of cobs on hand; the snow blockade having left us with but a small stock. We are confident that cobs could be as cheaply manufactured here as in the East... The cabbage is of a better quality this year than last, owing to the fact that the vinegar is put on earlier and is better rubbed in.... There will be no salt. Some farmers were seen sowing a large quantity, but the cows were following along behind, licking up the seed before it could sprout... A new seculent has been introduced from the East. It is said to be superior to pickles, and does not require hoeing. The Atta, which believes in nothing that is not of native growth, sneers at it, just as it did at barrel-staves when the slips were first imported from Japan; but look at barrel-staves. staves when the slips were first imported from Japan; but look at barrel-staves now! We believe that champerty is destined to be one of our staple productions, and are confident that it will make sugar of just as good quality as rice does... Speaking of rice—there won't be much of a crop: all the fields were flooded by the heavy storm. Our farmers were extremely lucky in not selling the last year's crop, else they wouldn't have anything to go with their curry, the yield of which will this year exceed fifty millions of tons. The whole San Joaquin valley is yellow with curry, some of it as tall as a horse... A farmer drove into town last Tuesday with a wagon-load of real Frish potatoes. If Congress would relieve this excellent vegetable from duty Ireland could send over a shipful every year. Very few captains, however, like to take them as cargo: they are so hot that they warp the masts—especially the bake variety... Now is the time, to set out fresh milk. In the city we harvest it every morning; but in the country, where there are no dogs, once a week will be often enough... Beware of new-fangled sowing-machines: the old broadcast Grover & Baker is best. The Singer is very pretty, but is difficult to keep in tune, and muele isn't agriculture, anyhow... Peanuts should be planted in Keep broadcast Grover a Daker is over. The Singer is very frethy, but is with the control of the in tune, and music isn't agriculture, anyhow... Peanuts should be planted in fire clay, and pulled out as soon as they are nicely roasted.... Currant jelly should be gathered as soon as the cans are well bronzed on the outside... If the chickens lay fried eggs there must be something the matter with them.

— From an interesting paper upon the New York Lunatic Asylum we make the following extract, not because it is very important in fact, or readable in style, but because it sounds very much like our own composition, and must have been written by one of the inmates: "The delusion of patients that they are God or the Savior, is very common. Not long ago Dr. Gray had all three persons of the Trinity under his care, and then came another God. However, as the new-comer was a very small man and the other contestant for divine supremacy a very big one, the little one contented himself with being the Attorney-General of the United States." This is pretty tall assertion, but the facts related are no whit more singular than some we witnessed at the Stockton Asylum. There we found an aged and feeble Holy Ghost playing some inscrutable game of cards with a lusty and muscular young Salan for the soul of a parson. The contest was long and apparently hopeless, until we approached and handed the H. Q. a newspaper slip reading as follows: "Since the passage of the bill for the relief of a parson, it has been discovered that the warrants he claimed to have lost had previously been presented and paid." The H. G. read this, laid down his cards with a sigh, looked over to his antagonist and plaintively inquired: "Is this dam thing true." "No!" promptly and emphatically ejaculated the impatient Satan. "I might a-knowed it was without askin," returned the aged lunatic. "The stake is your"n, and I shedder to think that I was a-tryin' to win it without riskin an equivalent. I'll put up this 'eve ag'inst it, and deal over." And the conscientious Holy Ghost skinned a dirty stocking off his bony foot and laid it solemnly upon the table. Just then the Virgin Mary, who was dining off a bed-blanket near by, pretended to have got something in her stomach that all the other lunatics crowded about to worship heth, and that broke up the game.

People ought not to pack cocked pistols about in the hip pockets of their pantaloons; the custom is wholly indefensible. Such is the opinion of the last man who leaned up against the counter in a Marysville saloon for a quiet chat with the barkeeper. The odd boot will be given to the poor.

#### Lines to the Memory of the Late James Fisk. Jr.

Jim Fisk is dead, that nice young man, No more he'll lead the gallant "Ninth" Jim Fisk is dead, that frice young man, "No more use in the base we much deplore; To bloody deeds of glory, His mustache once, when oiled and waxed, Or spin a yarn, or crack a joke, Stuck out a feet, or more: Or tell a little story;

Stuck out a feet, or more:
On Broadway we shall daily miss
The flash of his big pen,
And when on "Eric" we are out Who now will "take us in !"

And when we drink his memory In bumpers of the 'rosey,'
We can but think, if "Stokes" is hung,
How high is that for "Josey!"

#### Leaves from a Lady's Diary.

Leaves from a Lady's Diary.

Feb. 18.—Lent is upon us, and the weather is as lenten as the season. The clouds are shrouded in a grey misery, and the chill air only pipes in sad, dtful tones round street corners, or in hollow nooks like cells. Had an invasion of young-men-visits all day, for them the first Sunday in Lent, their penitence for past bails, being the necessity of making coremonious calls and their main object how to shirk or make their penance as light as possible. B——has sailed away to Australia or New Zealand with his young wife. He went round among all his friends and acquaintances, before marriage, asking their opinion of the match, and only got his answer afterwards, when everybody fought say of him. That's the way of the world, and a man or woman seldom finds a friend steadfast enough to tell the truth. Went to hear Dr. C——, in the evening. He is one of those non-committal preachers: impossible to find fault with his destrine or delivery; his very text was conciliatory to the Almighty, being of the Tehenn luminums quality. Feb. 20.—Went to spend the day with poor old Mrs. F——, whose grands on has broken his arm. She seemed to be glad to be relieved from watching so as to attend to the household, for she planted me directly, and I heard her at once putting things to rights and scolding the servant for remissness. She returned to receive every visit of condelence, whereof she had many, and it was amusing to listen to the good creatures, each and every one of whom had their story of a little boy who had broken his arm or had been watted mirraculously to the ground from

boy who had broken his arm or had been waited miraculously to the ground from a third story window. They were all very kind, and brought candy enough to have sweetened the boy's existence for the rest of his days.

FEE. 21. Read two articles in the Reven des deep Mondes, one on the world's creation, and the other on its early inhabitants, very learned, and if one is to be five the author's premises, incontestibly true. The only pity is that a month here one dataors promises, incontestably care. The only pay is that a monutable to takes up nother book which tears this theory to tatters, and one is as much in the dark as ever. I begin to think that Moses knew as much as the moderns, certainly his chronological order of creation has never been upset. Went down the rail to dinner to meet some Eastern capitalists. Was delighted with one who had a 'arge white waistcoat covering a prosperous stomach. He enjoyed everything, sniffed the country air with a relish; evidently money-making was an enjoyment with him; there were no lines of suspicious care in his face like those of our French money-lending L -. Capital to him is like his dinner, something that

brings health and flow of spirits and amiability.

Feb. 22.—Little T—— came and played for me all the morning. What a pity she Fig. 22.—Here I —— came and played for me at the moranic. What a pity sile is so shrinking and nervous, one of the best piano players here and hardly known. Artists are generally too much occupied with themselves to find time to discover merit in others, and in many cases would stifle it through jealousy. Henry came to fetch me to the laying of the foundation stone of the New City Hall. He had been promised tickets, but they never came, and says that he was told they were selling at twenty-five dollars a piece so he supposes that or pidity overcame nature. However, I saw all I wanted to see, and was more interested in looking at the mass of people than the ceremony—the surrounding sandhilis covered with thousands of spectators, all preserving the most perfect order. In no part of the world where I have been, does a mob behave so well as in San Francisco. Here and there there may be a brawl or a pickpocket, but there is none of the uproar and vulgarity of an English mob, nor the screaming and selfish stringgling for a good place that marks the Frenchman, nor the stolid boorishness of the German. The San Franciscans dearly love a procession or ceremony, whether it be function for foundation stone, and this of to-day was grand and imposing enough to satisfy the most blaze taste.

#### The California Labor Exchange.

Charges of a serious and grave character against the California Labor Exchange, and the officers thereof, have been placed before the Legislature. The action of that body in the matter has been very positive, and detrimental, as we believe, to the reputation of good citizens and the public good. The officers of the Labor Exchange assert that they can and will prove the entire faisity of the charges. Meetings have been held for this purpose, and one is called for this evening, when proof positive will be adduced that this important public institution is conducted in the most honorable manner. There should be a fair and impartful hearing on both sides. The judgment, we are confident, will be a thorough refutation of every and all charges made. We shall have something personal on this subject next week.

#### Special Brevities.

—Shakspeare has been for a long time adored by the Germans, but at times a vein of mysticism has entered into their worship. Otto Ludwig (the author of a masterly criticism and study of Shakspeare's works, entitled "Shakspeare. Stadien), however, keeps a cool head even in his greatest enthusiasm, and his admirable criticism of Schiller and other German idols is all the more precious for coming from one of their own countrymen. As an example of the simplicity and condensation of his book, we quote the following; it is called "The Cosmos of the Plays of Shakspeare": "What we find in Shakspeare is the world, but freed from the contradictions which we find in the actual world; one of which the most secret motives lie before our eyes; we see through the people as if they were spirits; we see, too, their right, their wrong, their whole nature, and their fate in its necessary sequence; we see nothing that could make us doubt of the wisdom of the order of the world. His world is a school for the actual one; it teaches us how every sort of excess and perversion, every discord in the harmony of our powers brings its own punishment; it shows how the wicked man, in his apparent triumph, bears hell in his heart, etc. He is his own organism, not a mechanism, like Lessing in his Emilia Galotte, or like the French classic tragedians, with whom one fact demands another, as in a game of cards or chess which goes on piece by piece, move by move, until we have at last only a frosty symmetry, hardly more than superficial. He is without over-subtlety; he works from one or two primitive and self-evident motives; if they are two, they are approved to one another. He does not suppose any further belief than what our senses and understanding can find or prove."—

The Revue Universelle says that the German Confederation, in acquiring an extended frontier from France, has traced it, not upon a topographical plan, but, all probability, on a geological map edited at Berlin. In fact, it is to be observed that the new boundaries between France and Germany absorb, for the benefit of the confederation, all the rich deposits of the mines of colitic iron in the basins of the Moselle and the Meurthe, with the exception of the Longwy group. Save this, which has been reserved, Germany has made herself mistress of the major portion of the best part of the most important mineral-beds in France, and which comprise a full quarter of the mineral riches of France. The new determination of frontier will have the effect of introducing into the productive industry of Germany, according to the statistics of 1867, "twenty-three blast furnaces, producing 205,000 tons of ore; four country, yielding 50,000 tons of ore; fourteen works manufacturing 127,000 tons of ore; and 22,000 hectares of coal-field concessions, yielding 180,000 tons of oosl."

— The bridge now in process of erection across the Mississippi at St. Louis is one of the wonders of the age. It is to be a tubular, cast steel, arch bridge, supported by the abutment and two piers; the latter are 515 feet apart, and 499 feet each from its nearest abutment, making those spans of about 590 feet each. Its greatest span is the same as that of the Kullenberg bridge over the Leck, an arm of the Rhine, in Holland. Telford's suspension bridge across the Menai Straits has a span of 570 feet. The Victoria tubular iron bridge of Montreal exceeds this greatly in length, being 5,600 feet (1½ miles), but it rests upon twenty-four piers, and its spans are mainly only 273 feet. The suspension bridge at Niagara spans 821 feet, and is 245 feet above the water. The East River bridge will span 1,600 feet, at a high midway of 130 feet.

— During President Grant's stay at Pittsburg, the ladies paid their respects to him at the Monongahela House. A gentleman introduced a very pretty girl, but added, playfully, "She is a Democrat, General." The old gentleman kissed her on both cheeks, adding, with great glee, "I always kiss the Democrat ladies twice, there are so few of them. Why, had it not been for ladies I should not have been where I am. I owe my success to them." "General," said a gentleman standing by, "I wish you would appoint me Chairman of the Kissing Committee." "Colonel," replied he, "don't you know the old saying, if we want a thing done we send our man to do it; but if we want it well done, we do it ourselves."

— Inimitable paper money is claimed to have been discovered, after years of study, by a Berlin lithographer. The color of the paper is the only secret on which the invention rests. The inventor says the colors cannot be chemically analyzed; on applying the magnifying glass they can be distinguished from all other colors, and in their quality as colors they cannot be imitated by photography nor in any other way. The inventor says that he will enable each individual state to have its own composition, and that this process is not a more expensive one than the present paper preparations for securities or treasury notes.

— Bangor, Maine, sends up word of a new rotary steam engine, working as silently as fate, and doing the work of an old-fashioned 20-horse power engine that carried seventy-five pounds of steam and consumed \$4 worth of fuel a day, while the new engine does its work under twenty-five pounds of steam, at half the cost for fuel. The large cylinder and motions of the old-fashioned engine give way in this to a wheel within a wheel, and all of it makes less noise than a sewing machine or a spinning jenny.

The honor of being the richest man in the United States lies between Wm. B. Astor, Corneius Vanderbilt, and A. T. Stewart. Probably neither of these gentlemen can tell within ten millions of what he is worth, and there is not supposed to be much difference between them.

- Am American writer says: "The whole population of the continent of North America does not probably exceed sixty million human beings; that is, about one fifth the population of Europe. This is but a small alottment of mankind to such a vast acreage of land and water. In fact, man still feels rather lonesome in this quarter of the world. He feels dwarfed in the presence of so much untamed and unoccupied nature. The Old World is still the seat of humanity. In Europe there is that variety of races, institutions and nationalities, which gives spice to existence, while with us there are only two or three governments and nations. It is because of our isolation and lonesomeness, we suppose, that we welcome illustrious visitors like the Grand Duke Alexis with such offusion of regard and demonstrativeness, so that in the small inland cities and towns everyhody and his wife and children gather at the railway stations just to cheer and get a dissolving view of a real live Prince. These renowned foreign visitors seem to link us with the unporty of the race beyond the water. In fact, we are as yet a sort of extreme westernout-post of Europe. It is true that New York is the the third city in the civilized world in wealth and population, but New York is the growth of immigration rather than an American growth. In order to get over our feeling of lonesomeness and provincialism, we want about two hundred thousand million people in our borders.
- By the completion, on February 22d, of the Union Pacific Railroad Bridge over the Missouri, connecting Council Bluffs with Omaha, there is now an unbroken line of railroad across the continent. Although it has been customary to speak of the railroad as extending from San Francisco to New York. Boston, etc., passengers and freight have hitherto been transported across the Missouri by stemmer. This necessarily involved inconvenience and some delay, which will in future be obviated. It will now be possible to start a train of cars at the wharf at Oakland, and run it direct through to Boston, a distance of 3,539 miles.
- The doctrine of chance has been fully borne out by the Rothschilds of Paris. The firm possesses 144 houses in different quarters of the city, and yet, strange to say, not one of them was touched by the Prussian shells or the Communist peroleum. In gratitude for this extraordinary exemption, the Brothers Rothschild have resolved to remit to all their tenants who may have been injured by the siege, the whole of the year's rent of 1870.
- An act of female heroism is reported to the Levant Times: During a recent southerly gale, a child passing along the quay of Narli-Cappu, on its way to school, was caucht by the wind and was carried into the sea, which was beating furiously against the quay. A young Armenian lady, Miss Agavit Surkissian, who was sitting at her window, saw the accident and at once bravely plunged into the sea and brought the child to shore.
- In sinking a well in Sangamon county, Illinois, lately, the workmen came to a body of water, the remarkable feature of which is, although ice-cold, it is stirred by some hidden force, and boils and bubbles up to the hight of several feet above the level when at rest, and this commotion of the water occurs at regular intervals—an hour of rest succeeded by an hour of bubbling, and so on alternating from calm to troubled waters.
- The Economist (London) gives the following impartial comparison of the market values of certain foreign State obligations with our own: Brazilian bonds, six per cent., 95 to 97; Chilian, six per cent., 100 to 102; Honduras, ten per cent., 79 to 81; Japan, nine per cent., 109 to 107; Moorish Imperial, five per cent., 96 to 99; Mexican, six per cent., 23; New Granada, six per cent., 72 to 75; United States, five per cent., 90.
- The Pope has found means to give a new explanation of the sense in which be understands the word captivity. At the reception of the delegates of three Roman parishes, he said: "I am not a prisoner in the ordinary sense of the word. I have neither a warder in my prison nor guards at my gates; but I am morally imprisoned, for it would be impossible for me to go out without my person and dignity being offended."
- By resolution passed February 21st, the Stock Board permanently fixed the salaries of its officers and employees from the first day of the present mouth as follows: B. H. Coit, Caller, \$1,000 per mouth; Franklin Lawton, Secretary, \$600 per month; B. F. Hillard, Assistant Secretary, \$200 per month; T. M. Blair, Janitor, \$200 per month.
- Mr. Grau, the American manager, will bring, next year, to the United States, Anton Rubinstein, the first of European pianists, together with Wienawski, the Russian violinist, and Patti, who is now considered the best of the living violoncellists.
- The Hagne, the political capital of Holland, is reported to be the wealthies; town for its population in the world. At least one-third of its citizens are said to be rich enough to live entirely on their incomes.
- More miles of railroad were constructed in this country last year than in any previous year, being a total of 6,983. The number of miles of railroads now in operation in the United States is 60,882.
- The population of Brazil is about twelve millions. Of these, about one million four hundred thousand are slaves, to be liberated under the provisions of the act of emancipation.
- The national cemeteries now contain 317,850 graves, and cover 1,800 acres of land.

#### Court Chat.

The Court Journal says: "What fear can there be of Democrats when loyalty is melodious in the streets? It is many a year since any one recollects the street ballad-singers warbling anything beyond discontent, and to see a crowd listening to a song that breathes (albeit in rough language) the spirit of prayer, and is loyal in every word, is a wonder to commence 1872 with. The following is a portion of a string of verses now heard in most of the busy streets of the West-End, and seem to find ready purchasers and admiring listeners:

Rejoice, rejoice, each loyal heart,
Rejoice with heart and voice, Rejoice at the recovery

Of England's hope and choice. For he who would not share the joys Must be a churlish knave, And deserves not to be classed among

Old England's true and brave. To all countries let the news be borne,

O'er mountain, hill, and dale,

And let the password be, Thank God! He has saved the Prince of Wales.

His noble father, Albert, Good precepts did lay down, Possessed of manly principles, That's rarely to be found. And Edward strove to copy The good his father done, And of a noble sire

He has proved a noble son."

— An exhibition is preparing at St. Petersburg which will throw all the known collections of gems into the shade. It is that of the jewels of the Russian crown. First in beauty comes the great Orloff diamond, which surmounts the sceptre. Like the koh-i-noor, it is one of the Royal jewels of the East, but the error of making it a brilliant has been avoided by the Russian lapidaries, and its weight is thus preserved, while the English jewel has lost more than half its original value. After this we are to see the Polar star, a diamond of exquisite beauty, bought by the Emperor Paul for one hundred thousand roubles, and the jewel once belonged to the Shah of Persia, with a mystic inscription engraven on its side. The Imperial crown may be called a dome of diamonds, the dazzling whiteness of which is relieved by an enormous ruby on the summit; the globe is surmounted with a sapphire, which has become traditional in Russia as emblematic of any object which is to be regarded as beyond all price. The coronot of the Empress is of expenses to the contract of the Empress of the contract of the Empress is of expenses. quisite form, composed entirely of diamonds of equal size and lustre, a marvel of quisite form, composed entirely of diamonds of equal size and lustre, a marvel of beauty and skillful workmanship. Besides these priceless objects, the rich and costly jewels to be worn on State occasions are innumerable. Russia has been drawing for centuries upon Persia, India, and Turkey, and adding to this heard kept from profane sight at the Winter Palace, watched by sentries day and night. The present Emperor, however, is said to prefer the crystals of his own Siberian mines, so delicately tinted blue, green, and violet, and has been for a long time past a purchaser of the finest diamonds to form their appropriate setting.

past a purchaser of the finest diamonds to form their appropriate setting.

— A gentleman writes to a London paper: "We were present at the serenade tendered the Grand Duke at the Clarendon, in New York, and witnessed many ludicrous scenes thereabouts, all of which fully illustrated what a free and easy going people we are. When the Ninth Regiment band came to a halt in front of the hotel and played an air, only one person emerged from the Grand Duke's room to the balcony. He was evidently an attaché of the Duke's suite. He was attired in a heavy overcoat which was buttoned up to his ears, and on his head he wore a white hat. The crowd took him in at a glance, and as the Duke did not appear, the balcony stranger was saluted with, 'Say, young felter, are you the Duke's and then, 'Hey! old man, they've called in white hats a month ago.' These salustions soon caused him of the white hat to retreat into obscurity. Then the band played again when the Duke appeared. He was of course vociferously cheered, but no sooner had the uproarious welcome subsided, than a Bowery boy shouted, 'Halloa, Alex!' and another boy shouted, 'Hey, Dukey, old sport, how d'ye like New York?' Considerable laughter followed, when the band played again, after which Colonel James Fisk and staff, who were standing on the sidewalk, were invited into the Clarendon. As they ascended the steps some one shouted, 'Fisky, old boy, can't you invite us all in?' All of the above, though out of place entirely, occasioned much merriment among the immense throng." occasioned much merriment among the immense throng.

— A remarkable historical ceremony was performed at the Emperor of Germany's recent battnes at Gohrde. Ever since the elevation of that place to a royal hunting seat it has been the custom to conclude the banquet in the palace by an "after chase," which the Hohenzollerns appear unwilling to discontinue as its present masters. After the removal of the plates and dishes some plain deal tables are brought into the banqueting-hall with tin spoons of various sizes apport these are obtained into the campacing and with its spoons of various sizes apportioned to the members of the company according to their respective dignity. Around these tables the company take their seats. The chief anuscement of the sport consists in beating and rubbling the spoons on the table so as to produce all varieties of noises imaginable by the contact of wood and fin, the human voice being allowed a proper share in the performance. To add to the uproar, the hunting band play on their French horns to the accompaniment of lond cracking of whips by servants retained for the purpose. The latter two noises lend the performance a sportsmanlike character. The angust personages assembled this autumn at Gohrde are said to have proved themselves great proficients in the use of their spoons.

- The Duke de Montpensier, Louis Philippe's youngest son, is said to be the wealthiest of the Orleans princes. In the retreat of the royal family from the Tulleries, in February, 1848, he contrived to carry off a sword, once the property of Napoleon I., the jewels on which were worth three hundred thousand pounds.

- An accident that might have been attended with very serious results has befallen Captain Glyn, brother of the Hon. 6. Glyn. M. P., whilst hunting with the East Dorset hounds near Sutton. Captain Glyn attempted to clear a fence with a deep ditch on the other side, in which there was already, unknown to him, a dismounted huntsman and his horse. The captain's hunter, however, did not clear the fence, and fell back upon its rider, both being "puried" into the ditch upon the other unfortunate rider and his horse. Assistance was quickly at hand, and Captain Glyn being rescued was immediately conveyed to Ranston House, where, upon medical examination, he was found to have sustained some severe injuries, although, luckily, no bones were broken.—Court Journal.
- A Versailles correspondent reports the following conversation between Count de Beust and M. Thiers in reference to the Count de Paris. Count Beust said: "I was astonished at his far-sightedness and depth of pointical mind. He is, with you, Prince Bismarck, and me, if I may count myself among the number, the man who knows best the chess-board of European politics." M. Thiers replied: "You are right, dear Count. With his large, immovable, cold, German face, he is an intellect of the first order. Unfortunately, he does not possess a single quality of a constitutional monarch. He is like his grandfather—he will govern. Be sure that he will leave a great trace in history. He is a William of Orange."
- The investiture of the Mayor of Limerick was the occasion of an extraordinary scene of seditions disorder. On the Mayor referring to the recent illness of the Prince of Wales, he was met with a perfect storm of yells, shouts, and hisses, and when attempting to proceed he was met with cries of "Three cheers for the political business." This call was responded to by thunders of applause. Cries of "Home rule for Erin" and "Down with Gladstone" were then raised, and the Council broke up amid a scene of unparalleled contusion.—(court Journal.
- A lady at St. Petersburg recently asked Field-Marshal Moitke how he had succeeded in winning the battle of Gravelotte. "Madame," replied the old general, "allow me to answer your question in the words of the Duke of Wellington, when he was asked to give an account of the battle of Waterloo: 'We punnicled them, they pummeled us, and I suppose we pummeled hardest; so we gained the day.'"
- The illustrious exile at Chislehurst, it is said, has received the following message from the King of Italy: "To His Majesty the Emperor Napoleon.—I avail myself with pleasure of this opportunity to renew the expression of my friendly feelings and firm wishes for the happiness of your Majesty and your family."

#### Congratulations All Around.

The opening of the Union Pacific Railroad has tickled the public cranium. We congratulate the U.P. R. R. and the P. C. upon their delivery from the memorable snow blockade. Even the Growler family and the whole head of Growlers are mellow with exclamation points over this long looked-for triumph. The "man about town" is ecstatic, the merchant jubiliant, the editor joyone, and so it zoos through the entire ranges of society. The snow-bound passengers regale themselves on our delicious climate, and saunter about as if they had lived a life-time in the Arctic world, and were suddenly transported to an elysium. Every face is beaming with joy. There is not an elongated and vine-zir visage to be seen anywhere. Heavens: how little disasters disconrace us and little triumphs gladden us. In this paradisical jubiliation which thrills the public pulse, we must right here specially congratulate the Union Pacific for its heroic efforts and its complete success in the matter of muscle overcoming the wild elements of nature; and the Central Pacific for its active and unwearied co-operation in the work. Can we do roget finally, that our praise and thanks should go out to Postmaster Stone and his energetic assistants, from the greatest to the least, for their rapid distribution of the mail and its quick delivery. Verily, about this time Mr. Public is a big Indian, brandishing the tomahawk of hope, and strutting about gally in his immaculate toggery of war paint and feathers!

— The Cincinnati Enquirer's Dentsch poet is shocked at the nude small boy on the Davidson fountain:

"Der Shmall Poy stands on der fountain,
Und he don't got on any close,
Und der young giris dey all plush and say,
'Vot he means by such conduct as dose?'"

— A Virginia chicken has a foot shaped like a human hand.—Ex. [Why should it not have? The nails upon a human hand discharge the same function as those upon the foot of a chicken: they are used for scratching dirt.

Why is it that a thoroughfare always provokes an editor, or other drunkard, into mendacity? These persons are always lying about the streets.

## New Year's Eve.

Hush! while with shrouded face,
'Mid sorrowing hearts
The consecrated year
To Heaven departs.

Hugh !

Hail! to the infant Year,
All ye true-hearted,
Heir to the joys and fame
Of the departed.

Hail!

Weep!

Weep for the Infant Year, Ye with guilt mated, The heir to sin and shame Unexpiated.

Pray, for the Infant Year,
Fresh hours from Heaven,
In which to live again,
And be forgiven.

Pray!

Hope in the new-born Year, The gracious token Of happiness renewed Of Love unspoken.

Hopet

Trust in the glad New Year, Trust and rejoice, Greet it with sound of chimes, With heart and voice.

Trust?
—Graphic.

# Chiccory in the San Joaquin Valley.

Mesers. Meine & Raab are preparing to establish a chiecory manufactory in this city. Mr. Meine is a practical manufacturer of the article, and has had much experience in the business in some of the most extensive manufacturing establishments in Prussia. The experiment has been tried by these gentlemen at a point on the San Jonquin river a few miles from this city, but, unfortunately, just about the time the machinery was put in successful operation, and all the necessary apparatus in working order, the factory was destroyed by fire. They propose to manufacture chiccory on quite an extensive scale the coming Summer, and with that end in view have entered into contract with several farmers to supply the green chiccory. It is expected that not less than two hundred and fifty acres of land bordering on the San Joaquin and Calaveras rivers will be cropped with chiccory the present year, and it is estimated that the yield will range from fifteen to thirty tons per acre. The yield last year on some land near the San Joaquin river averaged the latter amount. Fifteen dollars per ton is, we understand, the price paid by the manufacturers for the green article. Samples of the quality manufactured by the gentlemen named have been sent to merchants in New York. Chicago, St. Louis and other large cities in the East, for inspection, and the uniform verdict of dealers is that it is far superior in quality to that imported from Prussia, Holland, and other Eastern courters. The quantity of chiecory consumed annually in the United State is conromous, and the uniform verdict of dealers is that it is far superior in quality to that imported from Prussia, Holland, and other Eastern courters. The quantity of chiecory consumed annually in the United State is conromous, and the advance of the property of the propert

#### Medical Administration of Alcohol.

That two hundred and fifty medical men, including the most distinguished names in the profession, should have agreed to a manifesto against the excessive and incautious administration of alcohol, has taken the world rather by surprise, as revealing a certain unsuspected background of actual knowledge and unanimity. We cannot expect that the use of alcohol will cease. It has taken root in our social habits and personal tastes, at least as deeply as the use of tea, sugar, tobacco. The practical means of carrying out the declaration would, probably, be by encouraging the use of light wines instead of the more fiery and fortified sorts; by diminishing the facilities and temptations of the poor to drinking in tap-rooms and gin-palaces, and affording them increased opportunities for reasonable out-dour recreation, and encouraging them to carry whatever alcoholic drink they choose to their homes, where the inducements to temperance and restraint abound, rather than to "drink on the premises" of the publicans, where they are surrounded by temptations to excess. Total abstinence does not accord with the customs or instincts of any class; but medical men have unquestionably a large field of usefulness open to them by taking a more active part than hitherto in enjoining moderation, and by removing the impression, which the recent tendency of medical practice has done much to encourage, that the habitual use of stimulants in any degree is essential to health or strength.—Pall Mall Gazette.

— At the last session of the Academy of Sciolism, Dr. Killhog, of the Committee of Questions for Discussion, submitted the following: "Are there any aereolites loading about the North Pole; and if so, why don't they go to the South Pole where it is warm and nice!" "Have the remains of Dr. Franklin any scientific value; and if they have, why don't they walk up to the Academy for identification and register!" "Is there any necessary relation between Science and an empty stomach?" "Is there any danger that much learning will make the members of \(\mathref{E}\) is Academy mad; and if insanity cannot be achieved, what is the best method of making idiocy respectable?" "How shall we exterminate the Town Crier by chopping off his ridiculer with a meat-axe?" "Who will steal the meat-axe!"

## Sunbeams.

Fun's Shorthand Notes.—General rejoicing at the improvement in the Prince of Wales' health. Rejoicing is not exclusively confined to the general—the private shares it.—Medical discussion as to the progress of the typhoid fever. It appears to be "slow but sewer."—Orleans princes declare that to be refused their seats in the Assembly is more than they can stand. M. Thiers won't have them chaired.—"Smith of London" committed for trial at Cork for a sham loan-offee business. Does it come to that, there are so many "Smiths of London"—Arrest of Communists in Russia. Shouldn't go their; they want reforms, and in Russia commust take things as things (Zar I"—Parson deceased leaves in his will direction that his bearers are to be eight laborers "not given todrink," We trust that, on that very account, drink was given to them on the sad occasion.—Man killed on the railway, the "life-preserver" of the engine impaled him. The term seems fronical. The implement is probably irony.

Why Nor? A contemporary seems surprised at this: "A Tennessee girl broke an arm on the eve of her wedding day, but went through the ceremony with her arm in a sling at the appointed hour." What daughter of Eve especially the eve of her marriage would suppose for an instant that the fracture of an arm implies the breaking of an engagement! Why should not her affianced become "bone of her bone," though it was splintered?

— A Young Postruist.—Parson—"What's a miracle?" Boy—"Dunno," Parson—"Well, if the sun were to shine in the middle of the night, what should you say it was?" Boy—"The moon." Parson—"But if you were told it was the sun, what should you say it was?" Boy—"A lie." Parson—"I don't tell lies; suppose I told you it was the sun; what would you say then?" Boy—"That yer wasn't sober!"—Punch.

— A school teacher asked a new boy, "Who made the glorious universe?" but the boy could not tell. So the teacher got the birch, and told the boy if he didn't tell he would whip him. The boy looked at the whip, and sniveled out, "Please, sir, I did; but I won't do it again!"—A New York lady says the latest thing out is—her husband.

Dobbs thinks that, instead of giving credit to whom credit is due, the cash had better be paid. A man who was asked what sort of wine he preferred, replied, "Other people's." "Come, sheer off," as the sheep said to the man who was cutting off her wheel. Caution—When you pick your teeth be sure you pick good ones.

COME TO HAND.—A lady of our acquaintunce, who has a pretty hand, is anxions to learn whether people are more liable than common to "burn their fingers" if they happen to be taper ones. We cannot say; but we have advised her not to let a spark get at them.

A school committee "Down East" are reported to have summed up their opinion of an examination which they had attended by making to the pupils this address: "You have spelled well, and you have ciphered good, but you hain't sot still."

HOUT TO A T.—A temperance lecturer the other day began his oration with the words: "My tectotal friends!" "Nothing "kin!" said an inebriate listener, "we're total strangers." He was immediately put out. So was the lecturer.

— The way to make a hot bed—Set the mattress on fire. Evergreens—People who don't take the papers. A dentist's office is usually his drawing-room. What Eve said to Adam when she wanted him to assist her at foller. 'Releave me.'

A poser for an oculist—A window-blind. Net Profits—A fisherman's. A litch in time saves nine; those who have one in the side, be thankful. When a kettle just begins to boll, is its music that of a dull simmer?

— Jerroid said one day he would make a pun upon any thing his friends would put to him. A friend asked whether he could pun upon the signs of the zodiac, to which he promptly replied "By Gemini, I Can-cer."

A country editor's sole editorial in one week's issue was that "If anything will make a man feel juley about the heart, it is to talk velvet to a pair of sky-colored eyes, by moonlight, in a clover-field."

— A correspondent wants to know if Noah was his own Ark-itee! Not having been with him when he built the ark, our Noah-ledge on the subject is too limited to give a satisfactory answer.

It was very sad that Victor Emmanuel could not congratulate the Pope on New Year's. "I will do Vatican," said the ambassador; but Pio said, "No-no."

GAIT ALONG WITH YE. -One never sees in the slave to the gin-bottle the elastic step of health: on the contrary he walks as an Old-Tom-auton.

"Massa Christopher Columbus was a queer man," said a negro orator. "A notion crossed him one day, and den he crossed an ocean."

PERT BUT PERTINENT. - Uncle John is a bad hand at guessing Bessie's riddles, charades, etc.; she calls him Enigmaramus.

— All the difference—The ancients urned their dead, the moderns earn their living.—Judy.

## Little by Little.

One step and then another, And the longest walk is ended; One stimen another, And the largest rent is mended; One brick and then another, And the highest wall is made; One flake upon another, And the deepest snow is laid.

So the little coral workers,
By their slow but constant motion,
Have built those pretry islands
In the distant dark blue ocean;
And the noblest undertakings
Man's wisdom hath conceived,
By off-repeated efforts
Have been patiently achieved.

Then do not look disheartened
O'er the work you have to do,
And say that such a mighty task
You never can get through;
But just endeavor day by day
Another point to gain,
And soon the mountain which you teared
Will prove to be a plain.

"Rome was not builded in a day,"
The ancient proverb teaches;
And Nature, by her fruits and flowers,
The same true sermon preaches.
Think not of far-off dutles,
But of duties which are near;
And having once begun to work,
Resolve to persevere.

# Custom House "Pie."

A statement just published from the treasury department shows that the expenses of the custom house amount to some \$14,469,737. That is the sum admitted. Nearly five-and-a-half millions of this is comprised under the head of "salaries," and is thought to be a question whether this should not be reduced by the reduction of the number of employes. It seems beyond all reason that the custom house in this city, for example, should need as many as 1,235 officers, costing nearly two million dollars. But an item which yet more needs examination is one called "expenses of collection," against which vague description stands a charge of more than six-and-a-half million dollars. How this is made up, or what becomes of all the money, is by no means clearly apparent. When, however, it is remembered that this is exclusive of salaries, custom houses, revenue cutters and large sundries, the country may fairly ask to be allowed to know how the "cost of collection" amounts to so much. Do those six and a half millions represent official peculations? If not what do they represent? If a merchant pays a clerk \$1,000 for collecting money, he does not expect that clerk to make a further charge of \$1,200. Yet this is about the parallel position. The fact is, the whole system is bad; the customs duties need to be diminished. If that were done, the people would be very large gainers.—Wev York Financker.

The nasty women of the suffrage convention, last week, passed a resolutirn of which the following is as nearly intelligible a copy as can be made: "Resolved, That the present prevailing custom, which proscribes, degrades and socially ostracises women for unchaste conduct which is practically winked at and overlooked when practiced by men, subjecting his victims to a condition which renders their restoration to a modest and virtuous life not only difficult but practically impossible, is an indignity to womanhood, and will be continued till the same social penalties shall be imposed upon men for immoral conduct as are now visited upon women." We pause for breath and for divine grace to remark that we cordially concur in the belief that this custom will, as set forth, be continued until it shall be changed. We concur, also, in the opinion that it is an indignity to womanhood. But if these women wish to be unchaste, it is cowardly in them to refrain for a trifle like that. Now, high and mighty Dirtinesses, "screw up your courage to the sticking point," or vice versa. Don't stand there shivering on the brink, but take to the sums like a duck to the water. Strip your griny souls of their chafing and ill-fitting reputations, and take a cleansing plunge into this angel-troubled Pool! We will guard your sweat ydimity, mesdames, while your limbs are poisoning the polluted waters by a brief bath. Now, Lemons, go in !

——From London we have intelligence of the stabbing to death of a man by mistake. His assassin mistook him for a person related to himself, whose loss would be his own financial gain. Fancy the utter dejection of this stabber when he discovered the absurd blunder he had committed! We believe a thing like that would justify a man in throwing down the knife and discarding nurder forever; while two such errors would be ample excuse for him to go into some kind of business.

— The Grass Valley Union is unduly elated because the President of the Woman Suffrage Convention in this city belongs in Nevada County. We should be elated if they would keep her there. There are several other residents of that county stopping in San Francisco. They lodge principally in the jail. These are guests whom it affords us pleasure to entertain, for they are our kind of people.

Heretics, Sceptics, and Thinkers.

The extreme Negationist denies the evidence of "things unseen." He is prone The extreme Negationist denies the evidence of "things unseen." He is prone to treat everything that is called supernatural as a dream. Another school of thought admits the genuineness of miracles, but accounts for them, as the Spiritualists do, by what they call natural causes. A third school admits spirit cachue Germans do, not miracles. But all these are hereties; so the Church says. The Church allows no truth except its own. The true Churchman or Catholic, Papist or Ritualist, utterly denies and repudiates philosophy and science. The Broad Church is a little more liberal, for it is advancing to the "Deep Church" of spirit. That "Deep Church" is pantheistic. The Pantheism of Germany is inevitably destroying all Churches. The spirit of Benedict Spinoza is undermining every seet. I only record a fact. Not being a vulgar Pantheist, I perceive, perfectly undismayed, the inroads of philosophy especially of the Hergelian philosophy. Mr. Voysey is intering the protest of Rationalism. He is only an ultra-Protestant, or Unitarian. Mr. Conway is teaching a pure Theism, in advance, perhaps, of Theodore Parker and W. J. Fox, Mr. Martineau, an Arian, is the most advanced of the old school—indeed, his theology is a bridge othering facilities for both parties; and Mr. Page. W. J. Fox, Mr. Martineau, an Arian, is the most advanced of the old school—inced, his theology is a bridge, othering facilities for both parties; and Mr. Page Hoppe is leaving Unitarianism in the rear. As for the Atheists, I have nothing just now to say of them. I regard Atheism as a logical absurdity; and, as for Antibecism, it simply cuts its own throat. The position of the sceptic, whether of the type of Renan, Lowes, or will, is obviously not atheistic, even in the sense of ignoring God. Perhaps all those clever writers would agree with the giant Goethe, "Who can deny Him." So far, they are Pantheists rather than sceptics. But it is the poots, the true Prophets, who represent the "Higher Pantheism." I must assert that Mr. Revawing the only manalies perhaps, fa he amond with Goether benchms can deny Him." So far, they are Pantheists rather than scepties. But it is the poets, the true Prophets, who represent the "Higher Pantheism." I must assert that Mr. Browning the only man alive, perhaps, to be named with Goothe teaches a Pantheism so sublime that it is unassailable. The pantheistic tendency of Mr. Browning is magnificent poetry is mystical and unintelligible to the outside word. This remarkable genius is "caviare to the zeneral." His prophetic utterances are diagnised in a transcendentalism that "caps the climax" of the Gernanic idealism. We all know the story of "Yerrold and Sordello." But Mr. Browning is a tar greater man now than in those days. So, perhaps, is the Laureate. Mr. Tennyson lives "in a wonderful flower-garden," It has been said. That he is a "heretic." I have no doubt. That he is a believer in God and Immortality, I should also assert. Possibly he is not far from Emerson, who, by the way, is largely indebted to the great German, Fiehte. Carlyle is another heretic, as pronounced as any I know. He is a mourrful, pessimist thinker. When Leigh Hunt, the optimist, pointed to the stars in confirmation of his hopes, the saturnine Scotchman answered they were a "sad sight." Carlyle is a sceptic. He wants to see Providence, but can't, he could not make up his mind as to His divinity. I once said to J. E. Smith a noble theological teacher, "Do you believe in the deity of Christ " His answer was," If you ask me whether I becieve in the deity of the man who was executed on Calvary, I do not: but the Christ of the Universe is God. We are the parts: He is the whole." Pantheism still. The Transcendentalists—heretics to a man—are almost all agreed as to a Trinity, though not to the wretched muddle of a theological trainity. Thomas Wiegman wrote a book to prove the Truity, founded not Kaut's philosophy, sufficiently bold to make theological hairs stand creet. The Irinity is true. But so is the Cinity of God. The Creator has chosen to manifest Himself irist as Father, then as Son, finally as Holy -Freelight.

Cope District, Nevada.

The Excelsior and Eldorado Mining Claims and the Norton Mill have recently been The Excelsion and Endoration Mining Chaims and the Norton min have reconsylved consolidated, number of shares, 12,000. These mines are located 30 miles north of Elko, in Cope District. The mill commenced crushing on the 1st inst, and shipped up to the 1st inst, 2,320 in bullion. It is proposed to purchase another mill situated within a quarter of a mile of the mines, in which event superintendent Riley is confident he can easily pay a dividend of \$5\$ per share per month. The company is out of debt. Our heaviest and most successful capitalists are engaged in this entering the confidence of the control of the company is out of debt. of neavises and most successful capitalists are engaged mouscut-terprise, and it is claimed that the vein is as large as the Raymond & Ely, the ore equal in richness, and developed by exploration to the extent of two years' supply. It is expected that dividends will begin on the 1st of April. The foregoing indicated result of over \$1,000 per diem is the product of the Norton Mill, which, owing to the want of sufficient pan capacity, has reduced not more than eleven tons per day. Not more than forty-five per cent, of the pulp assay has been saved by that milt, although with proper reduction works the precious metals in the ores might easily be saved. The tailings are carefully preserved.

<sup>-</sup> Many influential signatures have been obtained to the authors' memorial to Lord Granville in favor of an international copywright with the United States.

#### The Terrestrial Ball.

The music of the spheres,
Was playing a rigadoon;
And the moon was melting to tears
At the sound of the soft baseoon,
When Time came up to the World,
As she stood begommed and becurled—
"Another round?"
And away with a bound
For another year they twirled.

The World began to pant,
For Time keeps double-quick time;
Her head it swam, and her breath grew
scant,
As they spun to the spheric chime.
But when the pair at last
All round the year had past,
"Another round?"—
Then her voice she found,

" But please not to go so fast."

# What Are California's Requirements?

The majority of thinking men say cheap capital and population of a desirable character; on the other hand, a majority of the newspapers of the State say that character; on the other hand, a majority of the newspapers of the State say that California has already been advertised more than enough, and appear anxious that no enterprise, no public spirit, and no co-operative movement should be fostered and supported by the State. An irrigation project to secure the rich lands of the San Joaquin against such terrible droughts as those of 1869-71, and thus to enable those lands to be settled upon by a permanent class of agriculturists is denounced, because it is fostered by men who have large landed interests in that valley, and who are auxious to introduce population. It is everywhere acknowledged that without irrigation the farmers cannot safely cultivate those plains, and every one knows that the present agricultural population is not able to construct even the smaller ditches. Irrigation is the beginning of the settlement of such a country as California, and it will grow with the population. The works have a present as well as a future object; they are like the river that originates in a tiny stream, growing gradually in size and usefulness. The child is father of the man. There must be a beginning in everything that perfains to the world and to life therein. The would-be wisdom of certain newspapers of the State is foolishness, because The would-be wisdom of certain newspapers of the State is foolishness, because of its absurdity in assuming that what is designed for a present and future purpose, must necessarily have only a present aspect. No practical man ever spoke of carrying out at once irrigation on the scale that in years to come it will require. It has ever been the object to design the projects so that they might expand with the ever been the object to design the projects so that they might expand with the growth of population. Lines on a map showing the extent and connections of the irrigation system as it will be in its future completeness, are no authority for assuming that the designs are beyond the present requirements of the country. The intention is simply to illustrate the future of the present ditches, which are now designed so small, because there is no necessity for making them larger. It would be bad engineering and a stupid want of foresight if the proposed canal system did not admit of an extension commensurate with the ultimate maximum requirements of the valley. Because this complete and perfected system of irrigation may cost fifty or more millions of dollars, it is imagined that this expenditure must be incurred within the course of a very few years, whereas it may and probably will not be required within the nineteenth century. If California is to be the home of not be required within the nincteenth century. If California is to be the home of the poor man, and the great cattle lords only, then one can understand the attitude of the press and the Legislature of the country in this wild outery against reasonable subsidies by which each county is benefited to the extent of its requirements. The present efforts of the press and of the Legislature will tend to create communistic principles, and discourage capitalists from attempting any public enterprise. So long as irrigation and reclamation are withheld from the enterprise of the capitalists so long will California remain backward in population, and ignorant and talists so long will California remain backward in population, and ignorant and selfish men will control the State. By all means compel parties holding large tracts of land to improve the same, and contribute a fair proportion of the taxation of the county; but do not discourage immigration by the refusal of an equitable and reasonable fence law. Surely assistance in the way of subsidies to useful public works by each county may be rendered, provided the State enforces reasonable restrictions and secures a quid pro quo. One thing is certain: without enterprising men and money no great public or private works can be inaugurated to benefit the laboring classes, and advance the general welfare and prosperity of the State.

The following are venial offenses, readily pardoned: Inattention in a scrvant who has the small-pox. Unsocial taciturnity in a fool. Loquacity in a flatterer. A "dead cut" from a creditor. Shabby clothes on a debtor. Meaningless talk from a large man whom you have insulted. Slander of an acquaintance. Lies of the right kind about your ability. Nothing in a rival. Everything in yourself.

<sup>—</sup> The other evening a man at the Olympic Lodging Honse spun a leaden slug into his breast, and we think he died; if not, we hope he will. He left a note to a friend reading thus: "DEAR JOHN:—When you receive this note I will know the mysteries of another world." He might have gratified his curriosity without the use of a pistol by simply sitting down upon a pile of blazing straw.

### The Song of Birds.

The purpose which the song of birds answers in the economy of nature is one of those mysteries which, like the differences of tint in their plumage, human ingentity has not as yet been able to explain. It is not, however, a mere pairing cry, because it is continued until the birds break the shell, and in some instances until they are able to fly. We may be sure, however, that it has its uses; and as we can observe that the femals of all birds which have that cry, whether it be what we call song or not, are excited when it is uttered by the male, it may be that it produces in the females that heat which is necessary for hatching the eggs. In ourselves there are many sounds which make the heart beat, the blood dance, and the whole body glow, we know not why; and thus we have no ground for denying without proof that other animals may be affected in a similar manner. Perhaps the more philosophical way of considering it is to suppose that it produces general excitement and a power of more energetic performance in all the labor which the birds can undertake.

The connection between the song and the plumage, and the silence and the molt, is also a curious matter, and shows that the whole bird is subject to some general law, which, though it lies deep beyond "the power of our divention, governs even the minutest circumstance, the production of a new spot or goss in a teather, the reddening of a comb or a wattle, or the inspiration of courage into birds naturally

timid."

#### Death of the King of Cats.

A melancholy death is reported in the Scotch papers. An immense cat, the property of a hairdresser in Princes street, Edinburgh, breathed his last a short time ago. This animal was, it is stated, one of the sights of Edinburgh, was a model of beauty, and was the king of cats. So highly was he esteemed by his fellow-citizens that he was not permitted to take part in the late cat show in London, it being considered that, in consequence of his extreme obesity, the journey would prove too fatigning for him. About a month ago he began to show signs of failing health, and was removed from the shop to the private residence of his owner, in the hope that change of air might prove beneficial. These hopes, unfortunately, were not realized. His liness increased daily, and it was found necessary to call in the add of three veterinary surgeons, who, for the last few days of his life, prescribed a tespoonful of port wine to be taken every quarter of an hour. All that skill and accience could do for him was done, but it was of no avail; he died at the age of fifteen and a half years. A post-mortem examination revealed the fact that too much fat was the actual cause of his death. Far be it from us to say one word that could add to the pain of the bereaved hairdresser, but we cannot help recretting that the case

# Vine-Growing in France and California.

A vineyard seven years old in France is estimated to cost \$556 an acre: in California, same age, \$12 per acre. In California, the practice is to set 1,000 to 18,000 vines to the acre. The latter number will average five pounds of grapes per vine, 9,000 pounds of grapes to the acre, which will yield 400 or 500 gallons of wine. Pruning vines costs \$1 a thousand, heeng and suckering about as much more; picking grapes, \$1 25 per ton, and hauling them another? dohar, while the price of grapes in California is one dollar per hundred pounds; from all which figures a net profit of \$40 to \$60 per acre is figured from the business.

— On Sunday last the Rev. Mr. Hemphill delivered a lecture at Calvary Church upon "The Young Mun who Went Away from Christ Sorrowful." The young man was probably disappointed. He should see Hemphill!

— A contemporary tersely explains that a cizar stump on the sikewalk caused the death of a Pitt-burg lady. Other Pittsburg ladies will probably take warning, and refrain from eating everything they find lying about.

— Speaking of sanitary regulations, the Alta has the hardihood to assert that during Ben Butler's residence at New Orleans he cleaned up the city. We had supposed that Mr. Butler cleaned it out.

A good many women are demanding that the word "obey" shall be stricken out of the marriage service. Muscular men with a talent for wielding small trees are meekly and dutifully acquiescent.

#### The Alabama Claims.

Any one who has observed the drift of popular opinion for the last ten years in The United States in reference to England, must have been convinced that there has been great irritation. It is apparent that, at times, had the popular will been consulted, there would have been war between the two great English-speaking nations; and this sentiment was in full force during the American war. For the purpose of this article, we style the North the nation, and Northen sentiment national public public, warries had long suffered from England the tauth of inconsistency in opinion. America had long suffered from England the tauth of inconsistency in claiming to be a republic and holding slaves, claiming to be democratic and having an aristocracy founded upon the ownership of human beings. Slavery declared a war and threatened the national existence, and every Northern man thought the country had a right to the sympathy of England in a war the result of which should be the emancipation of negroes, and that England should have given the country because of the country had a right to the sympathy of England should have given the country. moral and material aid to crush out the rebellion. This sympathy was not only withheld, but from a large and intelligent class of Englishman was openly and ostentatiously manifested for the South. The proclamation of the Queen recognizing tentationsly manifested for the South. The proclamation of the Queen recognizing the existence of a state of war was regarded as precipitate, and as indicating an intention to give aid and comfort to the enemy. The organization of flects of block-ade-runners, it was thought, might have been prevented. The negotiation of cotton bonds and the loaning of individual credit to the South was, to the Northern Mind, an evidence of something more than individual enterprise. The firm demand for the rendition of Southern Ambassadors taken from an English ship was considered as arrogant, and believed to have been more imperious and peremptory than as though the nation had not been engaged in a desperate and at that time dangerous war. The fitting out of armed vessels in English ports for Confederate service was deemed not the act of a neutral, but the act of an enemy. And, finally, the was deemed, not the act of a neutral, but he act of an enemy. And, hinally, the building of the Alabama at an English yard, her arming at sea with English gran, and her being manned with English seamen, to vex our commerce and destroy our merchant marine, was regarded as more than vexatious; popular opinion looked upon it as a cause of war. When the rebellion ended, a war with Great Britain would have been popular; a declaration of hostilities against England would have been hailed with enthusiasm. The toning down of this excitement, and the bringing about of an agreement of arbitration for the settlement of all questions at issue between the countries was a great achievement for the Grant Administration. The between the countries was a great achievement for the trant Administration. The sober second thought of the cool and conservative men of the nation favored an amicable adjustment of national differences. The Geneva Convention was regarded by Americans as a triumph of right. They saw in it the recognition of the fact that England had been wrong in her treatment of us, and hailed it as a great victory—the greater because obtained by diplomacy and not by force. It satisfied the nation, and we remember no recent occurrence that so fully and sompletely satisfied the American people as this "victory over England" in getting sompietely satisfied the American people as this "victory over Lagrand in getting her to arbitrate the quarrel. It was something more than pounds, shillings and pence; it was a recognition of American power. It was success. It was the ending of a controversy honorable to the country, and that was all that was wanted. The extravagant demand by lawyers for the payment of swelling millions in excess of actual damages will never be upheld by the American people, and all the agitaof actini damages will never be updeted by the American people, and all the American people and the subdued tone of the American people and the subdued to regard the whole international talliculus as adjusted. The whole hat the for arbitrament. The American lawyers will, lawyer-like, chain as large damages as under the pleadings they may be entitled to offer evidence in support of, but not to get it will not disturb the client. Our victory is won, and although the verdiet should be small it will satisfy the nation if it carry costs against our adversary and settle this great principle of international law in our favor. There is not the remotest possibility of a war between England and America, and the two countries remotest possibility of a war between England and America, and the two countries were never more firmly fixed in friendship and amity than now, when with the instincts of two great trading nations they are quarreling over the settlement of their accounts. Local politics may find it for their interest to stir up the matter. It may help to turn out a Cabinet or put in a President, but that fleets shall be manned and armies marshaled between England and America upon a simple question of pounds and dollars is impossible. Because we speak the same language we are always going to keep up a row with England, because they speak and write the same tongue they are always going to scold us. The American press is read in England. The American surmour orater and politician may have to be beared express. the same tongue they are always going to scold us. The American press is read in England. The American stump orator and politician may hope to be heard across the ocean. We never write much or often against Germany, France or Spain, simply because we only write English. We can't swear with any degree of satisfaction or comfort in any tongue but our own. We recognize the right of John Bull to bully us and read us long moral homilies, and to complain of us as upstarts and braggarts, but so long as we can bluff back we are never going to war. and fraggarts, but so long as we can blue back we are never going to war. White we do not admit that any extortionate demands have been made, there is nothing in the terms of the treaty that forbid us from asking just what we please. If we do not get all we demand we shall be content. We certainly shall not get anything allowed us that we do not ask for. When we get our judgment, be it large o rsmall, we shall not go to war to enforce the payment on execution.

<sup>—</sup> Do not cry over spilled milk. If you are a man, you won't. If you are a cat, there is no occasion: you will lick it up, and thank heaven for the opportunity. If you are a dog—as is most probable—you will act precisely as if you were a cat.

Estranged.

We meet no longer—you and I,

As crst we two were wont to meet;
In wooded nooks and meadows sweet,
Hushed is the music of your feet;
The very winds pipe mounfully,
"We meet no longer—you and I."

Since silence fell between us twain,
Our summers—are not half so fair;
The rose bisosoming out there,
Are not like those you used to wear;
Discordant seems the sweetest strain,
Since silence fell between us twain,
Our summers—are not half so fair;
The rose bisosoming out there,
Are not like those you used to wear;
Discordant seems the sweetest strain,

The birds forget to trill the lays
We heard in mornings that are fled;
The accaic droops its slender head,
And hides among the asters dead;
My heart forgets to sing the lays
We sang in those dear vanished days.

#### The Undiscovered Bourne.

The marvelous, anseen world beyond the North Pole may be likened unto the Kingdom of Death that mysterious bourne from which no traveler ever returns. Heroic sonls have attempted to discover the new and solemn continents believed to exist over the fabled regions of eternal snow and ice, but the introjectry, daring and genius of those heroic souls yielded to the monsters of Hunger, Postdence and and goints of those fariors souls yielded to the mainsters of Hunger, Pestifician Cunate, which like the three-headed Cerbeaus guarding the gates of hell, each care grapple with and devour the bold spirits that would invide their averal mysteries. The minoratal mengodis, Kane and Frankin, perished at the gates that lead to the undiscovered world. Houry Neptune, god of the sea, buried one of them; the increids, mynephs of the sea, chunch his funeral hyan, I sit not an impressive and awful thing to be down at those gates expansively in body and sick in such, without the sympathy of man or the love of woman, while the spirit flees from its emaciated prison to meet that universal soul called God . What a sublime faith has man in prison to meet that universal soul called God 'What a sublime faith has man in the vast resources locked up within hemself' Those who go before him in perilous adventure, meeting with defeat, disaster, death, are but as it were immortal shadows, who embazon on their banners the magic, laseimating watchwords. "On-ward - Eureka." And onward the successors of those immortal shadows zo, ever longing, ever hoping to ery out to admiring mankind, "Eureka." I have found 3.1. The memorable expeditions of Sir John Ross and of Sir Edward Parry, To the desired result. In 1861 Dr. Kane fine-hed his explorations, but anneed and his companion, Dr. Hays, left the mystery unexplored. Dr. Peterman was sent out companion, it. mays, ict. the mystery mexplored. Dr Friefman was sent out by the German Government, making his way by Spatzbergen, which the adventurous explorer believed to be the surest route: but this, like other expeditions, dd not solve the problem. Last year the American Government fitted out the Powers, with instructions for her commander to proceed towards the Pole via Greenland, with institutions for her commander to proceed towards the Pole via dree (Find). At last accounts this exp dition was somewhere along the cast of Mexicle Bull. Herefolore all explorers have sought to discover the new continents beyond the Ar-tie world from the Atlantic, never once dreaming that the Pacific mount be the only assume through which access could be had to those regions of mystery. But finally, and in confirmation of the theory of man's sublime faith in his own recovery. Mexicle process Mexicle process the process of the process sources, comes M. Octave Pavy, who has unbounded confidence in the behef that this grand problem will be solved by the Pacific route. M. Pavy is now in this city, having reached here a few days ago, for the purpose of equipy has and fitting out an expedition for the North Pole via Bebring's Sea and Wrangel's Island. This gentleman makes the exploration principally on his own account and at his own expense, but he is warm's supported by all scientific societies, and the Russian, English, French, and American Governments. He will depart from here about the first of May, accompanied by one keep the whole man has fewer yet touched. The party sails in a chartered vessel, and arriving at the point of find in attitude of the control of the party sails in a chartered vessel, and arriving at the point of find in attitude of the control of the party sails in a chartered vessel, and arriving at the point of find in attitude after the style of the famous Mongareit, the tiny vessel which crossed the Atlanta sources, comes M. Octave Pavy, who has unbounded confidence in the behef that after the style of the famous Nonpareil, the tiny vessel which crossed the Atlantic during heavy weather in forty-three days. The raft is composed of four keelshaped evlinders, with all the necessary masts and rigging. In addition to the shaped exhibiters, with all the necessary masts and rigging. In addition to the crew, this menature rubber ship will carry ten thousand pounds weight of provision and necessary equipments. It senrecly occupies more room that an ordinary bedistend. We have this to say in conclusion: Having had the honor of meeting M. Pravy, we comess that he looks like a man of genius, and has about him that air which inspires confidence and bespeaks the accomplished gentium. He is an women uspines confidence and bespeaks the accomplished gentleman. He is only 2s years of age, and looks even younger, but has the mice and bearing of a resolute spart. Although born in New Oreans, he is a French cityen, and fis-cessful in his discoveries, will plant the French flag on the new world's soil. Like all men of genius, he is fascinated with the New Letter, and being a journalist pronument in his profession, as well as a distinguished scientist, he has a married to the contraction of the new force of the new forces. conscided to contribute to its columns the earliest intelligence from the world now beyond the realms of mystery

In chronicing the death of Major-General Halleck, some of the papers have omnited to mention his most important contribution to literature, a work on international law.

# Statement of the Trustees of the California Labor and Employment Exchange.

San Francisco, Feb. 24th, 1872.

The undersigned, Trustees of the California Labor and Employment Exchange, feel themselves justified by recent proceedings in the State Legislature, in making a ned themserves passing by recent protectings in the State Registrators, in financing a public statement in regard to the institution under their charge. The Exchange was established in the year 1868, to meet what was conceived to be a great public want. Immigrants were arriving in large numbers from the Atlantic States and want. Immigrans were arriving in sarge numbers from the Ananthe States and Europe, landing on our shores with no money in their pockets, or only enough to pay their expenses for a few days; willing to work, but ignorant of the country and of the means of obtaining employment. They were often made the dupes of designing men, and sent in fruitless search of employment, at the cost of what little money they had. It was felt by the founders of the Exchange that such an organization would save many worthy people from extortion—would prevent panperism and crime by furnishing paying employment to those who were willing to work— and would aid in developing the industries and resources of the State, by increas-ing the aggregate of productive labor. For some months the expenses of the Exchange were met by individual contributions made at the outset; then for a considerable period by monthly subscriptions, mostly of one dollar, made by a large number of individuals, supplemented by an appropriation of eighteen monts, by the Board of Supervisors, of the city of San Francisco, of \$250 per month. It was the Board of Supervisors, of the city of San Francisco, of \$250 per month. It was found, however, two years ago, that some different mode of obtaining the necessary funds would be required, and as the institution was so eminently useful, not only to individuals but to the State at large, an application was made to the Legislature of 1899 70 for an appropriation in aid of its support, which was granted to the extent of \$900 per month. This appropriation has been the principal means of meeting the expressed for the Verdanger for the author transport. tent of \$500 per month. This appropriation has been the principal means of meeting the expenses of the Exchange for the past two years. During the year 1871, 5,786 persons have been furnished with employment gratuitously; of these 2,966 were males and 2,760 females. During the three and a half years since the commencement of the institution, more than 33,000 persons have beenfurnished with employment. Success so complete, and usefulness so manifest, did not permit the Trustees to doubt that the present Legislature would continue the appropriations made by their predecessors. A bill was introduced in the Senate and passed that body, but was defeated in the Assembly on a second hearing, on the 16th instant, under givenustances, which demand from as a unblic statement. If on a one-stant, under circumstances which demand from us a public statement. If on a question of utility or necessity, or without any reason at all, the Legislature has seen lit to refuse the appropriation, we should have nothing to say; but when it is refused. rense in capproparation, we should have nothing to say; but when it is refused, ostensibly at least, for the reasons given in the debate in the Assembly on the fifth inst., we cannot be silent. Mr. Pardee, of Alameda, who led in opposition to the bill, assumed the charges contained in the letters and depositions introduced by him as proceen and conclusive of the "rettenness of the Institution." He did not intimate that he was acquainted with, or had ever met either one of the parties making the complaint, and he therefore could not know that they were entitled to any conidence. He retused, though requested to do so in advance of the debate, to show the papers either to the President of the Exchange, or to a member of our delegation, indicating thus his greater anxiety to create a sensation by introducing them, that to go at the truth and do justice. We do not hesitate to denounce every one of those statements as false in general and false in all essential particulars. Had there been an honest desire to know the truth, their origin, and the relations of the authors of them to the Exchange, would at once have raised suspicion as to their credibility. The testimony introduced by Mr. Pardee consisted of two letters and three depositions. One of the letters is from one H. C. Bemett. This individual was for a few months Secretary of the Exchange. Complaints were repeatedly made by visitors of his coarse and overbearing manners, leading us to doubt his fitness for the place, and seriously to consider the expediency of removing him. He was finally discharged, for an act of insubordination so gross that at a meeting of the Board of Trustees, at which eigen members were present, ten yould with fidence. He refused, though requested to do so in advance of the debate, to show of the Board of Trustees, at which eleven members were present, ten voted, without a moment's hesitation, to declare his office vacant, and the eleventh at once changed his vote on hearing the insolent language of Bennett after the vote was taken. We cannot follow this man through all the falsehoods contained in his lettaken. We cannot follow this man through all the falsehoods contained in his letter. They are almost as numerous as the sentences. It is not true that no elections of Trustees have been held; on the contrary, they have been held every year, have been advertised two weeks in advance, and the utmost pains taken to secure and the unmost pains taken to seether a full attendance. It is not true that we have ever had a title of proof that Mr. Zeehandelaar, either as Clerk or Secretary, has received money for furnishing places or information to applicants, or that the President authorized Remuet to descharge him for such cause. It is not true, but atterly false, that the Exchange has been or is worked in the interest of I. Friedlander, Esq., in any manner whatsoever. He has been a liberal contributor to its funds, as he is to every worthy public object. But havend are not transplication in the section of the property of the section. ever. He has been a liberal contributor to its funds, as he is to every worlly public object; but beyond one or two applications due each case for one man for house-hold service), he has made no attempt to avail himself of the convenience of the institution, open to every citizen. He has not even attended a meeting of the Board of Trustees for more than two years past. The mallignity of Bonnett toward Mr. Friedlander may be due to the fact that while Secretary of the Exchange, the former, being at the same time correspondent of an interior paper, save fit to charge the latter, as the head of a wheat or grain "ring" with a systematic attempt to cheat the farmers of the State by falsifying market reports, etc., so as to buy their crops under their true value, and strongly arging them to hold their grain for higher prices, which many did to their ruln. Bennett chose to connect his dismissal as Secretary with some supposed ill-feeling and influence on the part of Mr. Friedas secretary with some supposed il-lecting and influence on the part of Mr. Fried-lander. In this he was entirely mistaken. But the most atractions charge of all contained in Bennett's letter, is that which charges that the female department is used for inflamons purposes. That bad men or women may not in individual in-stances have conferenced to make use of the facilities of the Exchange for improper purposes, and may have succeeded, it would be usedess for us to deny, because we cannot disprove it; but the same may be equally true of any, even the most respectable private intelligence office in the city. But that the small elapatria shape the public reputation he accribes to it we utterly deny. That if has been as d in the public reputation he ascribes to it we utterly deny. That it has been as did in the manner indicated, with the knowledge or comivance of the employe's of the Exchange, we do not believe. That for the reason stated by Benmit respectable families do not send there for servants, we know to be farse, as we could give the names of large numbers of the most respectable families in the city, who daily visit the office for the purpose. That the Trustees have known of such use of the Exchange as Bennett charges, or that they have ever heard that such charges were made, and yet failed to investigate them, self-respect will not permit us even to deny. In the only case in which a charge has been brought against the Secretary (in 1868, when Clerks touching his moral conduct, an investigation was made by a Committee of the Board, and the facts were found to be so far from the trash that, on ful consideration of the subject, no action was deemed necessary. Other charges of less importance are equally false. Another piece of testimony accorded as traces on not consideration of the subject, he action was desingthee-sarry. Other charges of less importance are equally false. Another piece of the stimony accepted as true is an affidavit of James Johnson. It is sufficient to say that this was a turbulent fellow, frequenting the Exchange, who was long stime denied certain positions for misconduct. Another is a deposition of P. Taggart. This man was at one time a porter in the office, who, after being repeatedly warned, was finally discharged for a pointed, and has been vowing and studying revenge ever since. Another is a deposition of Thomas II. West. This man, like many others who come to the Exchange, was not so anxions for work in the abstract as for some pure work, and so was hard to please; but at the very time his deposition was being read in the Assembly he was in a situation furnished him by the Secretary. As to his complaint that all nationalities except Irish and American can obtain employhis complaint that all nationalities except Irish and American can obtain employment, it is sufficient to reply, that from the commencement of the institution nearly one-shaff of the men furnished with employment are of Irish birth, and taking men and women together, a large majority are of that nationality. The letter of one Daniels is made up only of general abuse of the Secretary, of such a character as neither to require or admit of refutation. It is on such testimony as this, without any inquiry as to anincos, without any opportunity given for refutation or counter-proof, that a majority of the Assembly have virtually declared the management of an institution which is friends have thought a great public convenience and benefit, to be infamous. That branch of the Legislature, by such hasty and passionate action, did not greater ministic to us thin the morest introduced, the chief farget for abuse seems to have been Mr. Zeolahor to the more introduced, the chief farget for abuse seems to have been Mr. Zeolahor. in the papers introduced, the chief target for abuse seems to have been Mr. Zechan-delaar, our Secretary, we feel bound to say, in justice to that gentaeman, that he has proved himself a very faithful, competent and assidnous officer, filling a dufficult and most embarassing position, we think, as acceptably, and with as little just ground of offence, as any man we could have obtained. For ourselves, we hope in this community no further defence is necessary than the foregoing simple statement of facts. Most of us have been connected with the Exchange from the first, giving our time and our money when requered, without the slightest personal adgaving our time and our money when required, window the signess personal advantage to ourselves, simply because we thought the work we have been doing was a public necessity, in the interest especially of the poor. If the Exchange must, in consequence of the action of the Logislature, suspend its operations, we can only be thankful for the good it has done during its brief existence, and for the part only be finankiu for the good it has done during its order existence, and for the part we have been permitted to take in it; while we may be allowed to regret that antagonistic interests and personal malignity have been able to prevent the continuance of so worthy and useful an enterprise.

IRAP, RANKIN,

C. CHRISTIANSEN,

JAS. B. ROBERTS, CHAS. E. MCLANE, JAMES R. KELLY.

For about one year I have been Trustee of the Labor Exchange, and acquainted with the inner working of the institution, and I think that during that time it has been properly managed in every respect.

WILLIAM ALVORD.

<sup>—</sup> A foolish young gentleman wishes to know of a literary weekly what he shall do if a lady takes advantage of leap year and proposes to him. It depends very much upon the nature of the proposal: if it is an honorable one, knock her down. It is a mistake to suppose that a gentleman has no right to refuse a lady, though it is not always advisable to do so. The best thing ever done under such though it is not any avys acrisione to up so. The next thing ever done inder such circumstances was what our friend Frielunch did; he accepted the woman and married her. Next day, the fact that he had another wife was urged against him, and rather than seem a scoundrel he went off and joined her.

One editor in Georgia asks another "whether he can bite the bottom of a frying-pan out without smutting his nose."

The Excitement in Savage.

Says Parks there's nothing in the mine, Now, through the interest in the game, So I'll go short at once; Brave Bill goes in a blind, The ore I'm sure thev'll never find-

You bet, this child's no dunce.

But news came down they'd struck it rich, But Bivington had filled his hand—
John Bivington went "long."

He went in on three aces. The bears took in their "short" right He drew the other like a man quick,

The bulls they went it strong.

The Directors had not heard a word About this famous strike. They sent forthwith for a report— The news came back by "Mike."

The stock went up just like a kite,

Three ten the highest figure. The bulls were crazy with delight, The bears looked sad and meagre.

'Twas like a cosy little game-A little game of poker; The players were not yet red hot, They make a little double pot

And pass the little joker. The cards are squarely dealt around, The dealing it is done by "Mack ; But when 'tis seen no pair is found, They pass them in the deck.

And bold Parks straddling the same, They're in on what they find.

And then went to the races. But Parks, he went in on a flush,

And Robinson stood Pat : Bill bet his money with a rush-They lost, but what of that?

But now the bears have caught a turn— The stock begins to tumble: The shares the owners fingers' burn,

The bulls look somewhat humble. When lo! another Richmond comes,

Napoleon's in the field— Bulls, blow your trumpets, roll your drums,
The bears will have to yield.

And Madam Rumor now preclaimed— Proclaimed it with a shout,

"Be careful, bears, before you're maimed Fill in your 'shorts,'-look out!'

New City Hall.

In our last week's issue, several items of interest connected with the laying of the corner-stone of the new City Hall were omitted; and these we now supply, giving a perfect history of the whole proceedings. The copper box which was de-posited in the cavity in the corner-stode was a very substantial and well-finished piece of workmanship, by Messrs. McNally & Hawkins; its dimensions were one foot nine inches long, one foot three inches wide, and one foot three inches deep. On one side was engraved the crest of the city arms, a phenix, encircled by a On one side was engraved the crest of the city arms, a phenix, encircled by a riband bearing the city motto, "Ore on paz, on guerra fierro." The lid of the box was securely soldered down after the various articles had been placed in the box. The silver memorial plate which was placed in the box was very appropriately designed and beautifully executed. On it was inscribed, within a circle, the names of the Mayor, the City Hall Commissioners, the Architect, and the principal offices of the Board and the contractors for the building; outside the circle an equinters of the Board seed, bearing at its three sides the words; "Stability," "Fitness," and "Beauty," In the spaces between the circle and the points of the triangle were engraved emblems of Architecture, Sculpture, and Painting. Outside the triangle were, on one side, a view of the Golden Gate, on another a view of the new City were, on one suce, a view of the Golden Gate, on another a view of the new City Hall, and on the third the city arms. The whole was enclosed by a circular riband bearing the inscription: "This corner-stone of the City Hall and Law Courts was laid on the 22d February, 1872, by the M. W. the Grand Lodge of Free and Accepted Massons of the State of California, Leonidas E. Pratt, G. M., assisted by the Hon. William Alvord, Mayor, and the Hon. the Commissioners." This plate, together with the very elegant trowel used for laying the stone, and a handsome majeter gavel, and set of Masonic working tools, were specially designed by the Architect; the plate, trowel, and square (which was of silver) were made by Messer. J. W. Tucker & Co. The trowel was of silver, with an ivory handle, on which was crived the city arms; and on the blade was a very beautifully engraved view of the City Hall, surrounded by a border of grapes and vinc leaves. The gavel, level, and plumb rule were the work of Messes, Goodwin & Co. They were made of California laurel and black walnut, and all very handsomely carved and ernamented, rema laurel and black wainut, and all very handsomely carved and crnamented, reflecting great credit on that firm, who are noted for their artistic skill and taste in the higher branches of their business. The site of the new City Hall was formerly a public cemetery, and from it the remains of about three thousand bodies have been exhumed and removed, under contract, to the new cemetery. Some of these had been pioneers of the very early days of San Francisco; many of them were bodies of victims to the cholera and small-pox, when they raged so terriby' in the city in the year 1852. Amongst them were number of Chinese, plainly recognizable by their queues, as well as by the Mongolian type of their skulls. The ground consists of sand for a depth of at least one hundred feet. The level fixed upon by the Architect for laying the concrete foundation was the lowest part of the natural level of the ground, as nothing was to be gained by exavastine below that; and Architect for laying the concrete foundation was the lowest part of the natural level of the ground, as nothing was to be gained by excavating below that: and that level was preserved for the whole of the concrete bed, except for the Record Hall, which is a detached and very heavy building, and on the site of which the ground was of a somewhat different character from the remainder, the sand being nixed with vegetable matter; the foundation here was, therefore, taken down somewhat deeper, and a thicker bed of concrete put in. Under this monoiith or concrete some of the interred still remain. An artesian well was sank on the ground, and pipes put down, from which the water now constantly flows and is available for use on the works. available for use on the works.

# Humors of the American Press.

The amenities of the American press are not particularly noted for extreme gentleness, and the following may be considered somewhat tame. But it is highly spiced nevertheless. The San Francisco News Letter says: "The Pacific Zhorche spixed nevertheless. The San Francisco News Letter says: "The Pacific—Internant tells a story, which, for obvious reasons, is unsaided to our columns, the is in a remodeled form: 'I'll take what tather takes,' said a ad, who had accompanied his father to a public dinner, when the waiter asked him what held drink. The answer reached the fond parent's ear, and in the twinkling of an over the full responsibility of his terrible position stood before him in awtor colors. We had determined to have a good time, but now, as he gazed on those bloated forms and rubicand no-ses around the table, and cast a fond gaze on the cleans-skin ned, fair-haired che-yild at his side, he trembled with emotion. Thoughts of the blighted lives principle hopes good blasted agrees of forms become anymapion, lashed 9, made and some fair-haired hopes good blasted agrees of forms become anymapion, lashed 9, made and some fair-haired constants. here maries chespin at missing me trembed with emotion. Thoughts of the birefold lives, rained hopes and blasted careers of former boon companions dashed through the wool in his head, and he faintly gasped, 'Waiter, I'll take water." It was for the first time. We need hardly say that after a burst of hoisterous laughter the sixyear old was sent to bed, and his excellent father remained, to be carried home year old was sent to bed, and his excellent father remained, to be carried home-some hours later, in a state of absolute worthlessness as regards powers of lecona-tion. 'From that day to this, strong drink has been banshed from that man's home.' It is perhaps needless to say that the father is never at home now, and that the child, now full grown, has water on the brain. He is the editor of the Pacific Theochum.' Our next quotation is shorter, but pretty much to the point: "Bottle-nosed ele-azimons frand-named Noah, gone from our gaze; gone fast. We pite the liss!." The "Noah" referred to was possibly the same individual who clisd the val-journal, the Much: "Correspondent writes to know it the editor of the Much is a foot. Correspondent inequalities behave, bis men mental condition.

fool. Correspondent menationally betrays his own mental condition.

Compared with the above what follows is almost complimentary: "Really the Mayor of New York is not necessarily and a officionan ununtitizated scoundred."

"The Decident, a religious back, say the treetand Monthly has an article calculated to make the people of this coast feel humber. If the people of

an interest care maker to make the people of this const feet burntes. If the possible of this const can contemplate the weekly publical on of the *Oriented*, and yet test any excitation of spirit, we do not think that anything the *Oriented* may say will be likely to hamiliate them. In truth, we regard the Devil as the only person who can take them down, and owing to a radical defect in our system of divine justice, he can't do it until after their death."

\*\*Rem Publishes are divined as the orientation of the orientatio

"Ben Butler has written a letter in relation to the interminable M'Garrahan claim, from which it would appear that neither M Garrahan not the New Idria Mining Company has any claim to the property in dispute, but that it all belongs to the United States. This is about as sensible as it would be to chain that if the spoons Benjamin stole at New Orleans do not be one to him, neither are they the property of their owners. Mr. Butler's sudden solicitude regarding the rights of the United States is quite touching in its child-like symphosity. The Beast in

Ben Butler has been so often accused of stending spoons that the News Letter's attack can hardly be considered libelous. Neither perhaps is its withering description of Brother Smith's baddiness: "Possibly Brother Smith is inimised withering daying which some similar masady, and has begun to decay at the top, like any other blasted fungus. We beg leave to prescribe a nightly head bath of warm butter mik," Atter this, prudence suggests the property of seaving the san Francisco News Letter alone in its glory. Irish Daily Times, 3th Jan. 1872.

Mr. H. C. Bennett may as well stop flinging his heels against the Labor Exchange; he won't get anything to eat by it. It will have to be confessed that he is a trifle ahead on this last move of his, but he should remember that the battle he is a tritle ahead on this last move of his, but he should remember that the battle is not aways to the strong; many a powerful skunk has been worded into an early grave by a scentless bull-pup, and we shall miss the guess of us it has one is not made to "squawk it" before Jupiter gets another moon. The short and snaple annels of this gentleman are tolorably well understood; his nistory, the the symbol of pleternity, begins where it ends. His biography is condensed into the appellation by which he is universally known "the man who was kicked out of the Labor Exchange." But he can soothe his itch for notoriety by the reflection that even his great master made no great figure in history until he was expelled from good society. We do not believe that Mr. Bennett is wholly bad; we think that one time in a million he will do a decent and honorable action, if it is protecible or even cheap; but this stab at the back of the Labor Exchange is one of his 999,099 one of his 999 one of his 990 one of his he is not as thack as his enemies have conspired to paint him. Did any one ever know a rogue to be so very jenious of his good repute before? It appears to us that a man who cares what people think of him cannot be the worst man in the world. But we think he can be the second worst.

<sup>-</sup> The receipts of Russia for the past year exceed her expenditures by just \$ 300,000.

## The Buddhist Htee.

A Rangoon correspondent thus describes the arrival in that city of the great Budhist "umbrella." As an Indian picture it is interesting: The Hitce has arrived at Rangoon at last. It is accompanied by a Minister of State, a Minister of Public Works, a Treasurer, and a Commissariat officer, and somewhat fewer than a hundred followers. At every station on the river Irrawaddy, at which it halted on its way from Mandalay to-Rungoon, the people came in crowds to prostrate themselves before it and perform the act of worship known as shekho. In Ava territory they also brought presents of flowers, gold and jewels; but these demonstrations were chiefly confined to the dominions of his Majesty the King of Ava. True piety, according to Buddhist ideas, is dying out in British Burmah, much to the regret of the old Woondouk or Minister of State; and while the people are willing to offer flowers they are not so generally moved to give money. Here literally means "umbrella," and according to Oriental ideas, the umbrella is the emblem of royalty. In Burmah it is placed on the summit of every yagoda; but in that case it is shaped more like a bell than an umbrella. Why the King has sent the present Hitce to Rangoon, and why it has caused some excitement, should be explained. Some four and twenty centuries ago there lived a great rajah, who reigned in Hindustan over a rich territory between Onde and Bengal, then known as Migadha. This rajah had a son named Sakya. The young price was bred in everylusury. He was married to a buautiful young princess, by whom he had a fair son; but the loveliest daughters of the nobles were proud to dance and sing before him. On one memorable night he was alarmed at the sight of a corpse, an old man and a leper. In the evening he had failen asleep at the banquet, while the damaels of the Court were dancing before him. He awoke amid all the disorders of a drunken feast, and gazed around him in disgust. In a moment he became conscious of the worth-lessness of such pleasures; and leaving his palace, his

——If, by its decision in the Laura Fair case, the State Supreme Court smutted its hide with discrace—and by our "if" we do not mean to imply a doubt—the Supreme Court of the United States has inhumed itself bodily in adhesive infamy. Early in 1870 this Court rendered a decision, declaring that the national currency is not a legal tender for debts contracted previously to its issue. That is, it simply declined to give a law of Congress an expost facto character. It was understood at the time, that this sensible decision was distasteful to the Administration, and the President soon after filled the two existing vacancies upon the Bench with obscure men who were known only as having publicly committed themselves to an opinion opposite to that of the Court. In common with most other independent journalists, we then predicted a speedy reversal of the decision; and in common with them we prophesied falsely; for it was nearly two years before they dared to do it. But when they did it, it was with an openness that left little to the imagination. Of the two late appointees, Bradley and Strong, the opinion was written by one and separately concurred in by the other. It seemed as if they desired to make it as conspicuous as possible that they had fairly carried their wages—which, pray heaven they may enjoy! It may be objected that all this is none of our business. True, it is the Devil's own business; but it has been se disgracefully transacted that it is the duty of some one to protest; and we think Mr. Satan will be as likely to see the protest in this paper as in any.

<sup>—</sup> You shall pick up the first newspaper that comes to hand, and you will find in it somewhere about a column of short, pithy paragraphs. None of these are original; all-are cut from other publications. What we are coming at is this. All the really bright, elever or witly ones are waifs, parentless and unacknowledged, while every thoroughly senseless and stupid pun is carefully and conscientiously credited to the newspaper in which it first appeared. If experience had not taught that this is done in good faith, the inference would be irresistible that these things are credited to their authors as a piece of severe justice; as who should say, "falser your own idiot offspring; lest they be imputed to me!" It may be asked why we object to this. We don't.

## Leaves.

If this were all—
The cradle-couch, the coffin pall,
And then the end—as leaves to fall,
The gain were small.

But dropping leaves

Reveal the bud that's newly formed, That, by the autumn sunshine warmed, New strength receives.

The covering
Drops off our soul, as the leaf doth,
And shows the fruit-bud in its growth,
Walting for spring.

The autumn is
The sister of spring, and clasps
Her hand 'cross winter's charm; grasps
The coming bliss.

And so we lie,
With souls that meditate upon
The year to come, the year that's gone,
And wait reply.

And wait reply.

And, powerless,
We lie throughout the winter's cold,

And hide our feelings manifold In lowliness, Yet all is right;—

The tree that last year blossomed well, And bore of fruitage branches full, This year bears light.

And souls, as trees,
Must have their rest, their winter-time,
Hidden beneath its snows and rime
As snow hides these.

When warm days come,
The buds stir 'neath their covering;
Our thoughts awake; we dream of spring,
And press for room.

#### Silk in California.

A few days since, Senator Maclay introduced in the Senate a bill to encourage the culture and manufacture of silk in Galifornia. By thus bill, premiums are offered for marketable cocoons and manufactured silk. This is a wise measure, and the Senator from Santa Clara could not have presented a more important matter to the Legislature. Producing silk has been a matter of experiment on the American continent since the time of King James I, who, having fached to introduce its culture into Empland successfully, attempted to establish it in the colonies. Since that time, the experiment has been tried in some of the middle States and a number of the southern. In Virginia, it was supersected by tookaco, and in some of the context. In Virginia, it was supersected by tookaco, and in some of the context. In Virginia, it was supersected by footaco, and in some of the other States by cotton. In 1840, there were raised 306, 300 pounds, worth \$4,300,000. In 1870, six years after. there were raised only 14,739 pounds. The most of the states did in America is said to have been superior to that of European growth, and not exceeded by the Chierse. The causes of the decline in the product of silk from 1844 to 1850. There is no such obstacle in Castorna. More in the product of silk from 1844 to 1850. There is no such obstacle in Castorna. We have a climate admirably adapted to the cultivation of either variety of the mulberry tree, the leaves of which turnish food for the worms and there is little danger of disease attacking them because of the equableness of our temperature in the Winter, and the warmth of the Spring and Sammer months. It is said that one-half of the worms in Europe die from disease, whose in California they can be raised in the open air a large portion of the year. During last year facre were successful to the United States of Columbia, 120,341 pounds, worth \$380,352, Japan 51,201 pounds, worth \$482,552,540 pounds, worth \$480,552,540 pounds, worth \$480,552,540 pounds, worth \$480,552,540 pounds, worth \$480,552,540

#### The Prince of Wales.

The recovery of the Prince of Waies has called forth ceremonies of an extraordinary character in every part of the British Empire and its Continental Cobness. The hearts of Britishers throughout the wide world have been moved by a deep and reverent loyalty. In our columns elsewhere will be found a graphic telegraphic report of the great procession of four millions in London, with other medients of a marked character. In this connection, we remember the occasion, while in Boulogue some therty years ago, when Louis Philippe, from a public beload, addressed the citizens of that city in these memorable words: "Believe me, my dear citizens, the best and most grateful of Republics is a finited monarchy."

#### The Alabama War.

The Lion sat and wagged his tail,
On haughty Abion's eliffs of chalk;
The Eagle, perched on a Yankee rail,
Opened his beak and emitted a squawk.
The Cock turned white

The Cock turned white,
And the Bear in a fright
Growled out, "Good Lord! there's to be a fight."
While the Prussian bird with a double head,
As black as an Ethiop cat at night,

As black as an Ethiop cat at night,
In tones as deep as a bassoon's, said:
"Hist up the rag!
This game of brag

Is ended, let's see how the beggars will fight."

To make our story both fair and plain,
Please understand that, shine or rain,
The Lion had roared and the Eagle screeched,
With all the ardor of G. F. Train,
To prove he'd splendidly over-reached
The other chap, at a little game
Just introduced, by the novel name
Of Alabama Indemnity Claim,
Though neither old John no Uncle Sam

Cared a single continental dam.
Concerning the legal rights of the same.

In years gone by there had been a feud Twixt the Lion's whelps and the Eagle's brood, And twice it rose

To a pitch of blows,
Which they gave and took like redonbtable foes;
And when beast and bird were tired and blown,
Each claimed the victory as his own.

And now that another dispute arose, Instead of falling at once to blows, Loud shricked the Eagle, besked and bald, As if ten thousand barnyards equalled, Ruffling his plunes as he screamed and soared, While the Lion lashed his sides and roared—Roared like a bull of Bashan stalled, Or a three months' calf with a ring in his nose—Till exhausted quite, each mighty nation Agreed to abide by an arbitration.

The agreement was that the two should leave a Final hearing of mooted points,
To a periwigged Court at old Geneva,
Of higher rank than the great High Joints,

And now the newspapers fore and swore,
The Eagle snoozed on his fence-rail perch,
The Lion snored with a mighty snore,
As loud as the bells of St. Alban's Church,
For each of the twain was a firm believer
In the arbitrators at Old Geneva.

But after awhile the Eagle awoke, And across the broad Atlantic spoke; The Lion lifted his sleepy head, And listened to what the Eagle said: "The Court that this arbitration manages Must by no means forget that I have laid A claim for consequential damages."

Loud roared the Lion and shook his mane, And swore by St. George he'd ne'er again Confide in the bird with the crooked beak, And such an infernal exhibit of cheek. And the Eagle swore That by Jingo before

That by Jingo before He'd give up his claim he'd go to war.

Then it was that all the nations round Gleefully cried that the two were bound Without further din

To strip and go in And fight till the one or the other should win.

But, bless us! there'll be no dreadful war, Save a war of words, as there was before, For the men who manage the Manchester shops, And the men who harvest the Yankee crops,

Have too much sense
And too many pence
At stake, to take any grave offence
At the Eagle's shrick or at Leo's roar,
Or to ever permit the two to war.
For it can't be long ere the day will come,
When, common in speech tho' fore, in in lands,
The one to the other shall say, "Old chum,
Let us stoy this row and again shake hands."
Then hurrah for the king of the beasts of the wood!
The only two nations so brave that they dare
To put by the Sword and abide by the Rood.

## Death of Harry Byrne.

Who is there in California who has not heard of "Harry Byrne". Who is there in San Francisco who does not mourn his loss, almost as though he were a familiar friend "Alas' there are thousands who will miss his familiar form and have in their daily promenade on our thoroughfares, and in the circe of his more infinial effects and associates, his place can never be made good. He died wasterday, a few minutes after moon, passing peacefully and painlessly away. Seldom, indeed, have such splendid abilities been united with a spirit so friendly and so entile. As a jury lawer, he never had a superior in Cautornia. His forense efforts were encloded by the fruits of a generous culture and a catholic range of reaching. It was a rare treat to hear him address a jury in a great case, to the discussion of which had brought all the varied steres of his web-furnished mind, and all the powers of his entitivated intellect. Those who remember the lawoons Cora trial, still speak with wondering admiration of that masterly effort in which he won a hard-contested victory over the brane and eloquent Baker. But his greatness as a lawyer ashead as a man. How charming he was in the private intercourse of friends; how frenk and kindy; how tresh and impulsive; how prempt and generous in response to every appeal to his benevolence, to every call of friendship, let those testity who know him best. No heart more from and tender than his ever beat in a mortal breast, and at once entered upon a brilliant and successful career. For more than twolveyears he filled with distinguished ability the other of Destrict Attorney of the City and County of San Francisco. He has been engaged on one side or the other of an immense number of the most famous criminal cases in the city since his arrival in California. But great and splendid as were his prolessional talents, it is as a good and noble man, rather than as an eloquent and able liwyer, that his memory will be lovinely cherished until the last survivor of this generation in California shall have pass

A candidate for the Hawaiian Legislature, Congress, Parliament, or whatever it may be, announces hims. If distinctly in tayor of the repeal of the kanawai hookamakama. This announcement has the ring of true particular, it is inflamous ether this last grasp of an effete tyranny upon the threat of popular liberty—this standing discrates to written hav and civilized jurisprudence—this prepental insult to Christianity and memace to decency this kanawai bookamakama—ongalt to be sunk so deeply into oblivion that a thousand historians could not revive so much as a faint reminiscence of it! Its corrupting inflamor below the moral and the social atmosphere, chilled the warm impuses of humanity, and blasted the sweetest and most precions blossoms upon the tender outgrowth of the human heart. It has gnawed and withered every green and beathly sentiment in the breast of society, and thrown its desolating blight over native and foreigner alike. The candidate has declared that if he be elected he will labor for its repeal or submit to a sound beating. Now, Heaven be passed, there is one honest man in thawaii! A bas kanawai! A way with hookamakama. Or, if they cannot both be expanged, left us wipe out kanawai and try to worry along with hookamakama. But if there is life in the old doz yet! if there is a God in Israel!—bet these magnitus cries from the ground for an intelligible translation. What is kanawai? what hookamakama?

<sup>—</sup> Mrs. Mary Gates died recently in a Massachusetts almshouse, aged one hundred years. Her father fought at Bunker Hill.—Exchange. [We do not perceive the relevance of the latter statement, though a very interesting one in itself. We should suppose, however, that if the author of the paragraph meant to cast any discredit upon the State of Massachusetts, he must feel very much ashamed of himself. Certainly, the daughter of a man who fought at Bunker Hill is entitled to the benefit of the almshouse, if anybody is.

#### Women and the Art of Beauty.

To a man who has a quick eye for the picturesque, or, let us say, the appropriate—and there are such men—the sights in modern drawing-rooms are more than disagreeable—they are ghastly. I am saying nothing about indecency. That is hardly a potition of my present subject. But why, if a woman has a neck like a skeleton, must she tell the world so? Why, if fate has made her grow stouter than it is permitted to be, must she squeeze and fold her fat into a fight low dress because it is the fashion? Why must she draw a hard line around her shoulders, that seems to cut her in two, and wear sleeves which are mere straps to keep her gown on, without caring, without knowing whether her arms are models? Why must she wear trimmings of great O's and X's and vandykes on her skirt, so that at a little distance the first thing about her that strikes the eye is the trimming? Why, with red hair, is her dress pink? Why, when in a very pale dress, does she lean against the wall which the barbarity of English ignorance has papered with white? Why, with black hair, does she carry a heavy burden of jet flowers, combs, and impossibly thick plaits that make her head look like an elephant's on an antelope's body? Why will she trust to the very moderate gifts nature has endowed her with to fight against the most abnormal disadvantages? Why—why—but enough. These are only some of the insone mistakes that nearly all girls commit, many of them girls with artistic tastes and capacities, in every direction except dress, whose eyes you may see shine with pleasure at a sunset or a beam-flower which nevertheless they steadily retuse to take a linit from. Very few women know what style of dress suits them best, or what colors; even those who study the art study it wrongly. One may often see awoman who has the makings of a dignified goddess see pose en cognette, or a little creature aftempt to be stately who can only be simple. The best grace is perfect naturalness. Our manners form themselves, but we must form our setting of them. Nature can do muc

For pure bosh, Dr. Alexander, of the University Coilege, bath an eye like a hawk and maw like a sea-bird. In his lecture the other evening, he described a student as "a mind in a body; a soul incarnate, constituting one living, sentenent, thinking, reasoning, accountable being; a man linked by his body to the dust, yet instinct with immortality; kindred to angels in intellect, and with a moral sense that holds him in a solemn relation to his God." He omitted to state, however, that this God is usually the student's belly, and the solemn relation is that of provider and consumer. He might also have added that this sentient, thinking, reasoning and accountable being is very much addicted to gluttony and drunkenness. The learned Doctor could with great profit have alluded to the fact that this divine creature who is akin to the angels enters upon life in a manner that is not commonly mentioned, and leaves it succeeded by an offensive smell. And immediately thereafter this magnificent being, instinct with immortality, is parceled out amongst a swarm of maggots. Further on, the learned Doctor regned that religion ongst to be taught in the public schools. May we inquire which of the one thousand religions be would wish to have inculcated? Probably the one in which he was accidentally born: the only one of the thousand that he has ever had fine, or ever can have time, to examine and has not examined it. If the reader will kindly overlook the length of these remarks we will kindly overlook Dr. Alexander.

— Honolulu is excited over a species of "flotsam," consisting mainly of a white pig, a bunch of awa root, and sundry other articles such as are used in Hawaiian sorcery. These charms floated ashore tied up in a sack, and the supposition is that some one possessed of a mailgnant devil designs putting a spell upon the town. There is some ground for apprehension, inasmuch as the pig had already succumbed to the charm, being quite dead and much swollen. They'd better be getting that King out of the way, if they love him.

— We are pleased to record the over-timely death of the ultimate hero of Commodore Perry's naval riot on Lake Erie. "Thou art gone to the grave, but we do not deplore thee," for we shall have another "sole survivor" in less than a week ij the press is faithful to its traditions, and it is. We have never known one of these only living heroes to be put into his hole whose place was not instantly supplied by another, in all respects like the first. The pension roll is a monster with more heads than that modern hydra, an orthodox sermon.

#### My Coat.

My poor dear old coat, do not fail me, I pray;

Together our youth we've outrun, years have I brushed you myself every day: Not Socrates more could have done.

Fresh trials should Fate have in store for your cloth,
Though threadbare resist to the end;
Like me with philosophy buffle her wrath,

O, let us not part, my old friend!

The first time I wore you how well I recall, And round me of comrades the throng;

My birthday it was, and, so gay were we all,
They made you the theme of a song.
Our poverty telling of honor unsold
Could never their vision offend;

Though you have grown shabby they've never grown cold, O, let us not part, my old friend !

I care not who points to the darn on your skirt,
To me 'tis a sweet souvenir;
Pretending one evening Lisette to desert,
I failed from her arms to get clear.

She tore you, and then, as she vow'd was but fair,
I stay'd that the rent she might mend;
You took, I remember, two days to repair.

O, let us not part, my old friend !

Of amber or musk or such perfumes unclean, Say when had you cause to complain?

In a Minister's ante-room when were you seen Exposed to his lackeys' disdain!

While others for ribbons were cringing to power, With me they had ne'er to contend;

Your button-hole's boast is a simple wild-flower. O, let us not part, my old friend!

More tranquil the days that await us will be Than those that we formerly knew, When pleasures and trials were mingled for me,

And sunshine and showers for you It may not be long ere I cease to require

The comfort your presence can lend; Then wait; from the stage we'll together retire. O, let us not part, my old friend !

-Beranger.

Edward Powers, a civil engineer of Chicago, has petitioned Congress for aid to enable him to test his method for the artificial production of rain. He wants to be furnished with 300 cannon of not less than 24-pounds enibre each, and 20,000 pounds of powder to fire in them, together with an electrical battery and other vilinness, to enable him to discharge all the pieces simultaneously. In support of pointes of powder to fresh them, together with an electrical batchy and one-rep pliances, to enable him to discharge all the pieces simultaneously. In support his theory that rain can be produced by the firing of artillary, he gives a long list of battes, including nearly every important engagement during the rebellion, each of which was followed, he alleges, by a heavy rain storm. He also cites instances in the Mexican war, and in wars in Europe, when battles have been toleswed by min, and urges that it is a matter of such scientific importance to determine if heavy cannonading will cause showers, that the Government ought to provide the means for conducting the experiments necessary to determine the question

 The fourth centennial of the birth of Copernicus has revived the ancient dis-ion whether he was a German or a Pole. The Germans insist that Thorn, the cussion whether he was a German or a Pole. place of his birth, was a German town when Copernicus was born, while the Poles pace of me bring, was a terman rown when coperincus was norm, while the foles say it was not annexed to Germany until seven years alterwards; and they prove that his parents were Poles, and that he entered his name as a Pole at the University of Padua, and that all his life he never ceased to desplay an attachment to bristic of Padua, and that all his life he never ceased to desplay an attachment of mative Poland, its customs and its laws. The Poles have always honored Copernicus as one of their grandest names. It is not many years since they raised a state to his memory in Warsaw by public subscription, and two others have been erected in Cracow. The anniversary will be celebrated on the 19th of February, 1859, at Posen, and creat preparations are making for the integrating event. Posen, and great preparations are making for the interesting event.

- Four sharpers, having treated themselves to a sumptuous dinner at an hotel, Four snarpers, having frequently the second of the state of the waiter and asked for the bill. One thrust his hand into his pocket, as if to take out his purse; the second presented him, decaring he would pay; the third did not same. The fourth forbade the waiter taking any money from either of them, but all three persisted. As none would yield, one said, "The best way to decade is blindfold the waiter and the man that he first carehes shall be the one who shall settle the bill," This proposition was accepted, and while the waiter was gropping his way round the room they slipped out of the house one after another. his way round the room they slipped out of the house one after another.

- The coinage of gold pieces of the German Empire, according to the new law, will be apportioned to the various minting establishments in the following manner: Berlin to turn out a million pieces per month, Hanover 200,000, and Frankfort 350,000, the Bavarian mint 200,000, the Saxon 180,000, the Wurtemberg 100,000, the Badenese 50,000, and the Hessian 40,000 pieces; the total amount 2,220,000 pieces per month.— The Week.
- For the twenty-four hours ending at 8 a. m., Feb. 22d, we received 1.05 inches of rain. It is noteworthy that for the same period one year ago 1.30 inches was received. Thus far for February we have had 4.74 inches, against 3.76 inches for the whole of that month last year. The total rainfall in this city for the season to date is 29.56 inches. The quantity for the whole of last season was 14.10 inches,
- —The anchors of ships moored in the vicinity of the Chincha Islands frequently bring up guano from the bottom of the ocean, which is rather contrary to the doctrine that these marvelous deposits are the exercta of birds. The recent researches of Dr. Habel go far to corroborate Professor Edward's view that guano is really a stratified deposit.
- Here is a neat sample of a personal item from a local journal in India: "We are very glad to learn that the marriage of Mr. Rughoonathdas Madhowdas, a Kupolo Bunia merchant of Bombay, with Dhuncoorbul, the daughter of Shet Godhurdas Moonudas, and the widow of Luchmichand Dhurumsey, was celebrated at Chinchpoogly."
- —Fourteen young Chinese, belonging to the noblest families of the Celestial Empire, have just arrived in Paris from Canton, sent by the Emperor to be instructed at the expense of the State. They are to be distributed between the colleges Saint Louis and Louis le Grand. Every year four teen young men are to be sent to France.
- A new House of Parliament is to be erected at Berlin, Prussia, and the architects of all nations have been invited to compete in the presentation of designs. The plans must be sent to Berlin before April 15th. A prize of \$4,220 will be given for the best design, and prizes of \$844 for each of the four next best designs.
- The Turkish Ordnance Department is about to make trial experiments with an enormous Rodman gun, weighing upwards of twenty-five tons, which has recently arrived from America, and has been successfully landed within the last few days at the artillery wharf at Tophaneh.
- A correspondent asserts that Brigham Young's twenty-second wife died a raving maniac because her faithless husband was about to marry again. It is interesting to observe that when adequately provoked the Mormoness can be as jealous as a white woman.
- The aggregate of the populations of Mexico, Guatemala, Colombia, La Plata, and Brazil, amounts to 16,046,100, comprising whites, negroes, Indians, and mulattoes, of all descriptions. The number of the latter is 3,333,000, being one-fifth of the population.
- The ceiling of the new opera house, Paris, will be made of copper, consisting of a multitude of plates, screwed together and capable of being at any time disjointed. This roofing will be movable, so that the hight of the theater may be regulated at pleasure.
- The richest people in the world are the Cherokee Indians. They number 16,000; own in fee simple 4,000,000 acres of the best land on this continent, and have in the hands of the United States Government, on which they receive annually the interest, \$3,000,000.
- Adelina Patti, now the Marquise De Caux, used to run about barefoot in New York. Rubini, the tenor, was a journeyman tailor. Wachtel drove a cab in Homburg, and many a tenor he took to the opera house before he got into it himself.
- The receipts for the New York Herald advertising range from \$2,500 to \$5,000 per day, according to the changes in the busy season of the year. Bennett's income from his real estate and newspaper is \$225,000 per year, and that of his son \$45,000.
- A French woman, calling herself Madame Brigham Young, has been arrested in Paris for indulging in what she called the Utah can-can—a performance compared to which the Paris article is but a hundrum affair.
- Glashier, the aëronaut, reports that a woman's voice is audible in a balloon at the hight of two miles, while that of a man has never reached higher than a mile.
- The extensive iron-works of Krupp, at Essen, in Rhenish Prussia, cover an area of nearly eight square miles, of which one and a half square miles are roofed.
- A country editor thinks that Richelieu, who declared that "the pen is mightier than the sword," ought to have spoken a good word for the scissors.
- The arms taken from the Communists by the French government amounted to 403,691 guns, 1,007 cannon and mitrailleuses and 1,610 artillery carriages.

# Leaves from a Gentleman's Diary.

FEB. 26.—Lord! how I pity the female sinners when women "get their rights."
How much more pitiless they are than men toward their own sex: poor Laura
Fair would not be simply hanged if she were to be tried by a female judge and
jury: no. banging would be too merciful a sentence: she would be hanged, drawn
and quartered; she would be boiled in oil; she would be forn assauder by wild and quateries, an whole the collect of the same whole for assignment by wild horses. How diabolically cruel your little prudish feminine spitchine can be occasions. Last evening I called on one of them, and the gentle creature would fain have had the scalps of each and every member of the Supreme Court for granting the woman in jail a new trial.

FEB. 27.—I find it hard to decide which is the most disagreeable type of woman-Figs. 27.—I find it hard to decide which is the most disagreeable type of woman-kind, your strong-minded female with her "signs," or your venoemous anti-woman's, rights female who rails at the sisterhood of innovators and reformers. Authory is angular and shrewish; Cady stanton is drearily didactic. But after all they are inspired with a genuine spirit of philanthropy notwithstanding their crotelets. Their theories may be wild and impracticable, but there is something noble in ther rneit theories had be wan and impracticable. Out the fe's solutioning mone in the pains; whereas the little vixens who pelt them with bad names are thoroughly petty and trivoious, as well as malicious. The lord deliver me from your gad-fly female who knows no higher pleasure than to retail small gossip and scandalize

her betters.

FER. 28. I was interested last night, at Mrs. C—'s, in watching the edilying contest between mascaline beauty and mascaline eleverness. There are thosewho call D—the "handsomest man in San Francisco." H—is certainly one of the best talkers among our society men; and his manners are acceeding y a greatile. Each seemed bent on monopolizing Mrs. C—, who is not, I taney, attogether insensible to 2004 looks in the "lords." Still, the bright and clever manners are acceeding y a great product of the production of the production of the control of the model. However, the transfer of the control of the model is the model of the control of the model of the control of the model. soon had the field to himself. How neatly he turns a compliment, how eloquently

soon had the field to himself. How neatly he turns a compliment, how deops andly he listens, as if the brisk feminine prattle which he must are space had for lanead the charm of the song of the Siriens. I think he is the most accomplish d hypocrite I ever met. But then, without a strong spice of well-bread hypocrity, how could be be the ornament he is to our best society?

Fig. 29. The priests still assert their mild r i.m. and not altozether unsuccess. fully. Their declarace has not yet been anthorizatively proclamed. The women-meek souls still head like plant but pushes to the pions domination. My wile may just returned from a lunch party and women, of course at Mrs. T — S. She as just returned from a lunch party and women, of course at Mrs. T — S. She list is the first process of the list head of the mild about the new minister at scandler's Conventible. It seems that the sisters are adready reconcined to the loss of the unitnoss Scandder. The sense of becausement vanished upon the advent of the new pastor. It is a majorize how readily the trailer degree and for an expension of the flock transfer their after (one. bereatvement varieties upon the advent of the new pactor. It is among how readily the tender vigins and because matrons of the flock transfer their affect ons. It is on ya few short months since sendler was a god. Without him, the wood was desolate. Then came the swart-voiced Thompson, who led the hymn in such seraphic accents, and made such pretty tittle addresses to the Sanday school chriden. raping accents, and made a pastor as tals mellithrous man. He, too, shook the dist of California from his shoes and migrated. Now comes Curpenter, mighty of prayer meetings, and the black waves of oblivion roll above the fading memories of his predecessors. Of the inconstancy of the pions woman-heart to its cherished dols. Of the fickle sensitiveness of the meek woman-heart to the attractions of the newest clerical charmer!

- The multitudinous Asian has not only monopolized the lucrative industry of The multi-additions Asian has not only monopolized the hierartive inclusive of upon the plates of the state, but he is now swarming innumerable upon the plates of the state in the heriness of hingure himself with a vim and connectness that promises to drive everybody clse out. There is no competine, in suicide with a man who pays no rent and can live upon mires. For the first time, we begin to depresent Clime se immigration. We would prefer to see the gallows adorned with American corpses, if any.

The notorious—no, the Reverend Dr. Chency writes to a contemporary: "How I should like once more to see the brethren in San Francisco." Thanks: we are not a ! here, brother. We grieve to state that some of the fathital are sojournwe are not a more, or others, are trimming and pounting in the mora vineyard at San-ing at Stockton, and others are trimming and pounting in the mora vineyard at San-Quentin. We are not as "one body of Christians having love," but we shall ad be designed to behold the face of our old pastor, if he won't ask us to contribute to some Eastern church fund.

One of the "petroleum princes" of Penn-ylvania is freshly dead and gone to—well, both places. The pious and learned Father Noradl informs us that when one of these oil kings dies, his soul will not do to put upon the coals, for its consumer at once, it is taken up to heaven and put into a powerful screw press. This expels a portion of the oil, which is sent to the other place to be used as fire! but the scrap, or crackling, is kept as toll.

## Recovery of the Prince of Wales.

THE BOILED-DOWN JUICE OF BRITISH LOYALTY—A LONDON PROCESSION OF FOUR MILLIONS!

## [By Telegraph.]

London, Feb. 27.—The celebration in honor of the recovery of the Prince of Wales was of the grandest character. The streets were througed, the houses and public places decorated, and the spectators were numbered by millions. Fabulous prices were paid for available seats to witness the procession. Twelve thousand soldiers and almost the entire police force of the metropolis guarded the lines. When the procession moved there was a general ringing of the bells of the metropolis, and a chorus of 30,000 children joined in a hymn at one of the points. The great bodies of the kingdom were represented, and several regiments of the army farnished detachments. The Prince looked stronger than was expected, and immense cheering greeted the Queen. The day was observed as a legal holiday throughout the kingdom.

#### THE ARRIVAL OF THE QUEEN.

The Queen arrived at St. Paul's cathedral between one and two o'clock, and the entire assemblage rose as her majesty entered and remained standing until she took her seat on the throne. The Te Decim was sung by a monster chorus of picked voices, after which the Archbishop of Canterbury sermonized. At the conclusion of the services at St. Paul's, the procession returned to Buckingham Palace. The Prince rode in the same carriage with the Queen. The weather was fine and the procession a complete success.

## THE PROCESSION FOUR MILLIONS OF SPECTATORS.

The royal procession commenced to move from Buckingham Palace at \$11.20 a., x. As the Queen left the court-yard of the palace the voices of thirty thousand children sang the national anthem, "God Save the Queen," The services at \$1. Paul's consisted of singing a grand chorus or Te Beam written for the occasion, from Psaint 115, the reading of prayers, and a sermon by the Archbishop of Canterbury. Fifty seats in the cathedral were set apart for workingmen, free of expense, at the special request of the Queen. The choir was composed of picked singers from the various royal chapels. At the conclusion of the religious services the procession formed again and moved westward. The whole ronte to and from the enthedral was seven miles in length, and the procession was four hours in motion. The best estimates place the number of spectators who witnessed its passage at \$400,000. The extension of the religious services the procession. Even the might be no interruptions or accidents, along the entire ronte strong fances were erected, and beside these were double lines of policyto keep the cager crowd from overthrowing the barriers and obstructing the passage of the procession. Every shop and house along the route brought a fabulous rental. Officinary four-story buildings were let for £100 for the day. One vacant space brought \$400.

#### THE DECORATIONS-INCIDENTS OF THE DAY.

The decerations are said to have surpassed anything ever before known. Miles of distance were given out on contract to be ornamented at the expense of the city of London. At the crossing at Farringdon street was a splendid triumplad arch, the erection of which cost £4,000. Another, hardly less splendid, spanned Oxford street. Flags, festoons, tapestry and wreaths of every conceivable character were displayed from house to house, and from the windows across the streets there was a perfect wilderness of scarlet, gold and bue cioth, gold fringe, and other corgous displays. Several serious accidents happened here to-day, owing to the pressure of the great mass of spectators on the line of procession. One man was crushed to death in Trailagar square, and a number of people were more or less injured. Two stands, each containing one hundred and fifty persons, fell, and many were badly bruised.

#### THE EX-EMPEROR NAPOLEON AT THE SCENE.

The ex-Emperor Napoleon and party had a house in Oxford street, though they had been invited to share the facilities of the Army and Navy Club, of which the ex-Emperor is a member. It is reported, too, that Napoleon declined an invitation from the Queen to be present at Buckingham Palace.

#### THANKSGIVING CEREMONIES IN IRELAND.

Dispatches from Dublin state that the celebration there was a splendid success: there was a procession to St. Patrick's cathedral, where a Te Deam was saug in the presence of the Lord Lieutenant and all the principal officers of the government. In the evening the city was illuminated. Thanksgiving services are reported in the principal cities in Ireland, and special prayers were offered by order of the Bishops of the Irish Church.

#### REJOICINGS THROUGHOUT INDIA.

A special dispatch from Bombay states that the Governor and officials attended the cathedral in state, and the Parsees in their fire temples, the Jews in their synagogues, Hindoos in their temples, and Mohammedans and other religions sects in their several places of worship, and offered thanks for the recovery of the English prince.

#### Life's Brightest Hour.

Not long since I met a gentleman who is assessed for more than a million. Silver was in his hair, care upon his brow, and he stooped beneath his burden of wealth. We were speaking of that period of life when we had realized the most perfect en-We were speaking of that period of life when we had realized the most perfect enjoyment, or, rather, when we had found the happiness nearest to be unablyed. "Fill tell you," said the millionaire, "when was the happiness hour of my life. At the age of one-and-twenty I had saved up eight hundred dollars. I was carning five hundred dollars a year, and my father did not take it from me, only requiring that I should pay for my board. At the age of twenty-two I had secured a pretty cottage, just outside of the cety. I was abuse to pay two-thirds of the value down, and also to furnish it respectably. I was married on Sunday—a Sunday in June—at my father's house. My write had come to ne poor in purse, but rich in the wealth of her womanhood. The Sabbath and the Sabbath night we passed beneath my father's noof, and on Moulday morning I wentto my work, leaving my mother and sister to help in preparing my home. On Moulday werening, when the labors of the day were done. I went not to the paternal shelter, as in the past, but to my out the paternal shelter, as in the past, but to my out. sister to help in preparing my home. On Monday evening, when the labors of the day were done, I went not to the paternal shelter, as in the past, but to my own house—my own home. The holy atmosphere of that hour seems to surround me even now in the memory. I opened the door of my cottage and entered. I land my hat upon the little stand in the hall, and passed on to the ketchen—our kitchen and dining room were all one then. I pushed open the kitchen door and was—in heaven! The table was set against the wal—the evening meal was ready—prepared by the hands of her who had come to be my helpineet in doed as well as in pared by the hands of her who had come to be my be pineet in deed as well as in name—and by the table, with a throbbing expectant look upon her lovely and loving face, stood my wife. I tried to speak, and could not I could only class the waiting angel to my bosom, thus showing to her the cestatic burden of my heart. The years have passed—long, long years—and worldig wealth has howed in upon me, and I am honored and envied: but as true as heaven—I would give it all—every dollar—for the joy of the hour of that June evening in the long, long ago: -New York Ledger.

## Notes from a Clergyman's Cuffs.

[BY HIS WASHERWOMAN.]

FEB. 25.—Preached this day on the sin of stock-gambling. To be popular, one must treat popular topics. Mem.—Must cell Burling to sell my "Meadow Valley;" it is going down. Wonder what scrip the Apostics were ordered to take with them. Must consult Col. Barnes' Notes.

them. Must consult Col. Barnes' Notes.

Fig. 36.—I must come more before the public. The Alta has that correspondence asking a lecture always set up. I can add a name or two. As for a subject, "Lot's Wrife, or Pacific Salt Manufacture," "The Hoodburn the Missing Link of the Darwinian Sausage-string," "The Prophets of Sailor Boarding-house Runners Considered Paregorically," "The Port Charges of Heaven."

Fig. 27.—How vexistions tribes are "My note to Mrs. P. Laddressed "Fac Ville," The P. O. Clerk sent it to "Burlectrown. We do need Civil Sorvice Reform, Found a starving family on Jessic street, Prayed with them, and gave the youngest.

round a surving runny on dossus street. Prayed with them, and gave the youngest girl a lozenge. Learn that in my parish there are one hundred and eighty destitute homes. The Lord help them! I must ask a collection for a new Chunese Mission. Is their religion thousands of years older than ours!

Is their religion thousands of years older than ours.

Feb. 8. —Mrs. 6. says I am too severe on dress. Must water my views; they have a high-prized pew. A solicitor shower me a spiritualistic Map of Heaven. Is it possible there can be a "What Che r House" there? Another pair of slippers presented to me to-day. The ewes of my dock take good care of soles. Levity is my besetting sin, Cheanse me, O Lord, as with the senna-odor from the drug stores, Feb. 29. —An extra day this year. A day to lay the corner-stone of good resolutions, with a barbecue of the sins of the flesh.

Prince of Wales a man was crushed to death by the crowd in Tradagar Square. That party's soul is prohably not so grateful for the Prince's recovery now as it was when wedded to his meat. We have always observed that upon occasions of this kind the Devil sustains no loss without some small gain.

A correspondent asks us if we can give him a brief biographical account of Mr. Gavly, alluded to in the line "Gayly, the trabulous, touched his guilar." He concludes by threatening to write us a joke if we will tell, him what to write about. We should advise him to write about one more letter, and then stop. That needs not necessarily be written to us.

A circus performer is astonishing London audiences by catching cannon-balls fired at him from a real cannon. The feat is a common enough one: during the late war we saw it performed hundreds of times. But none of the performer succeeded in retaining the fleeting globes after having caught them.

## Parnassus in Pillory.

Affectionately inscribed to the author of " The Charge of the Mail Brigade."

O thou, whose "ready pen" the Muse abhors, Whose fancy-flights Prose turneth from her doors; For Genine' sake, rhyme-weaver, spin no more—Of B\*\*\*\*\* dogg'rel we have had galore: Yet, if we must endure his dull refrains, Teach him, O Nine! regard for others' brains!

SELAH.

## Explanatory.

Six months ago we were all intelligent as to the railroad future, but to-day no-body but ourselves can disentangle the skein. The bridge has fallen of its own weight. The California Pacific has been largely swept away, but the Western operates and boats float on the river. The snow has revolutionized both now and hereafter. What a mine of wealth exists in a name! The Central Pacific Railroad Company. \$6,080,000 of 6 per cent. bonds negotiated at a premium on the credit of that name to build a part of the great Southern road. Great Casar! "The Central Pacific San Joaquin Extension!" Don't laugh. Well, they are driving ahead down the San Joaquin Extension!" Don't laugh. Well, they are driving ahead down the San Joaquin Extension!" Don't laugh. Well, they are driving scance to either the \$5th or \$3d parallel road, which threatens also. Huntington at the East, with Stewart and Gorham, is crouching to spring victoriously upon Goat Island, that he may establish a throne upon the sea. A ruler of commerce, a destroyer of great cities, exercising an incorable and a luminous power, forgetting blister, steel and Swedes iron and Soz. tacks. But they won't get it. Receipts have been cut off, and expenses have been and will be very large. Nothing therefore can be done North until the coming prosperous season is at its full; then at the first—in June perhaps—they will rebuild the California Pacific, drawing it down from the Summit past the Napa, Donahue and Tomales roads to Saucelito, If Goat Island is had they will come across Main Prairie for thirty miles on stills, if necessary, to draw everything to that great commercial fortification. That is the plan—even the Antioch detour will drag on slowly yet a while, because "expenditures," as old Mark has it, "are limited by receipts." The Mission Bay grant is being improved, and adjoining land has been purchased and more is being hogged, which as a land operation is quite correct. To-day, however, neither Leland now Mark intend to build a shorter line to penctate the peninsula;

## A Needed Civil Service Reform,

Californians have hitherto been prone to boast of the wonderful natural productions of their State, such, for example, as the Big Trees, Yosemite Falls, mammoth pumpkins, etc.; and now they may fairly claim to have developed the Champion Liar of the World in the person of H. C. Bennett, at present United States Pension Agent, and whilom of the Labor Exchange. It is, however, due to truth to say that he is not a California production, for though nature puls forth some of her most wonderful efforts here, she has never yet, and we think her for it, produced anything to this fellow Bennett. He is a tropical plant, sprung from some dungheap in the beautiful West India Islands and blown hither by an evil wind. Though not an object of interest, he certainly has been an object of curiosity among Californians, for we understand he was examined microscopically some years ago in one of our Courts, before that relic of barbarism. Slavery, was abolished. As the Sacramento correspondent of the defunct paper, American Flag, he got his principal, D. O. McCarthy, into trouble and finally into jail, by calling the Senate a gang of "subsidized seoundrels," because they would not pass an act to repeal the Specific Contract Law. Afterward, as the San Francisco commercial correspondent of the Sacramento (nion, by repeated fulsification he duped the farmers into holding their warsat for a higher market which never came. As Secretary of the Labor Exchange, he behaved in so ruffienly a way that the trustees by a unanimous vote disminsed him. This bird of ill omen has been ever-ready with tongue and pen to do what injury he could to san Francisco and her people, but such as he is—slanderer and liar—may all those who hate her be. Vide our "Report of the Manager of the Labor Exchange," in another column.

3

A girl in Indiana, who was jilted by her lover, got even on him by chewing away his thumb. Nice girl! But if we were the Pope, we should not like to trust her to kiss our toe. But we are not the Pope, and have a sore toe, anyhow. However, the girl has more practical sense than the Montagues and Capulets,

#### One Jade Winces.

The people of Chicago are clamoring for a remission of duties upon building materials for a period of fwelve months, and Congress is playing them fast and loose with admirable skill. We sincerely trust that they will not get the reset they are after: we want a pointed, practical bustration of the beauties and advantages of a protective tariff—an illustration that will stand out as a slining example; as conspicuous as a city set upon a hill one which, affecting the pocket of an entire business commany, will bred that kind of united action that is evoked from a direct distress. You may preach yourself red in the eyes about the smart of a burn, but it is only the actual cantery that will bring it home to the senses. Chicago, showly growing by the addition of here and there a house, was, like all other American cities, insensible of the evils of a tariff that left in ochoice of a market for its purchases of material and drove it to the dearest; but Chicago rebuil angin a bump, it all awake to the hardships of protection. We had from the first accident to this, and rejoiced in the probable conversion of one populous American city by the gospel of goage to the truth of trade; tout we observe that conviction has not expected on half score of shopkeepers asking that a bundred and fifty thousand of their fellow-citizens shed be made to pay then tribute is very human. We have never more clearly seen the truth of that principles of President Grant's, that the way to secure that reason we wish that Chicago may be compelled to endure, without hope of relief, the loss of the whole the tribute is a very human. We have never more clearly seen the truth of that principles of President Grant's, that the way to secure that can be understood by the protectors' of "home industry" one adapted to the meanest capacity.

#### Theological Clowns.

For massive cheek, unlimited inpertinence, tainted breath and soiled linen, commend us to that class of religious lunatics who preach about "the second coming of christ in a cloud of glory." Whatever may be our own opinions on this subject, we have a deep respect for the belief and faith of the very large number of our respected Christian citizens who conscientiously believe in the divinity of Christ and do homage to the memory of "the Savier of Markind." At the same time, we think that this very large number of our respected Christian citizens share with us, in a modest degree, the contempt we have for those religious ranters, whose howlings are a blasphenous libel upon Christian Christianity. The San Francisco public is at present afflected with two self-styled braisers of the Gospel, the one being the notions Second Adventist, filter Miles Grant; the other, Elder M. E. Cornel, about whom and the bowle we know use to public distance to the mental calibration as a perpetute relationships, saturated with self-concel, blind with furious enthusiasm, using with the froth of pious folly, have been holding a discussion of empty were about nothing. The subject is singularly appropriate to the mental calibra of these occasions. We would like to hear and patronize a preacher having the barrang and overpowering coquence of a White-time to give and matchess constorned powerer of a Bossast, the mellow richness and universality of a Theodore Parker. But in the name of High Heaven, Low Earth, the Intermediate Works, and all that is the real contraction of the properties of the set of the religious counts.

## Mr. Boutwell as an Incapable.

We believe that Mr. Bontwell is the worst man that President Grant has ever had about him, and the worst enemy of Mr. Boutwell could not very well say more. In an adounistration distinguished above all previous ones for the weakness and anorance of its advisers, Mr. Bontwell is preciminently the weakness and anorance not advisers, Mr. Bontwell is preciminently the weaknest and most tignorant. He is not only weak and emorant, he is not law-abiding. In negotiating the last bon he deliberately violated a law of Congress which provided that no more than one-half of one percent, should be expended in funding. By awrethed subterfuge, Mr. Bontwell's contrived to permit the banks taking the loan to defer payment upon them for a period of three months, so that the interest which belonged to the United States went to them. The fact that Congress, while showing precisely how and while he violated the law, declares that he did not do it, is not a fact of any further importance than that it illustrates the method of a fool in shielding aregine. But the worst of all Mr. Boutwell's schemes is that for the revival of our commerce, the one he first broached in his annual report. This pain, which the Commerce Commettee in the House has agreed to report favorably, is simply hiring men at a certain specified rate per ten and of men but of ship's register; to build ships and energe in the carrying trade? Meantime the tarsif upon slep-building materials is to remain maltered, and foreign-built ships are to be excluded from registry. This is very much as if one should try to revive the heat of dead einders by burning paper dollars under them, while some one keeps them well saturated with a Babeock extinguisher. We are mortally weary of Mr. Boutwell, and wish he would die.

#### The San Francisco Mining Bureau.

We would like to know why Colonel Berton, Vice-Consul of France at Sacramento, takes so much trouble to quard the interests of foreign investors in mines of the Pacific Slope. Colonel Berton has long been at work to establish the Mining Bureau of the Pacific Coast, the object being to develop Pacific Slope mines with the aid of foreign capital; to protect such capital and to encourage its investment in California mining enterprises by making known in Europe those mines that are really valuable. M. Breuil endouses Colonel Berton's enterprise, considering it calculated to end that organized system of swindling carried on against investors in Europe, from which, too, he has not a formidable opposition, for the operators in "wild-cat" concerns felt themselves seriously menaced in their nefacious business. Now, we would like to know whether Colonel Berton is a philanthropist, who is sacrificing himself for the suke of greedy investors, for, It may be implied from all this that such is the case. He is said to have met with brilliant success, and let us cast adance at the position he holds, if this assertion be true. A mine endorsed by him will at once be taken up in Europe, and a Californian mine not endorsed by him will at once be taken up in Europe, and a Californian mine not endorsed by him can scarcely hope for a sale on this side of the Alamtic. Hence, through his office only can the mine-owner go who is on his way to dispose of his property in Europe. Now, if Colonel Berton aspired to a position from which he could wring the utmost out of a property-holder, he could not get into a better one, and we cam well understand his using all the influence he could bring to bear on the press, and on his official colleagues, to further his design. Linless the edutor of the San Francisco News Letter does him a gross injustice, indeed does worse, Col. Berton wrote to that paper an editorial on himself and his Mining Bureau, speaking of both in the highest terms, which the editor not only declined to insert, but exposed with

But is Colonel Berton this Admirable Crichton, and do his motives so wholly exclude self? If not, we assert that the English public are in greater danger from the bites of the wild-cats and red-dogs than ever. We would heartily approve of the Mining Bureau if it were established and maintained by European investors in the mines of the Pacific Slope, but we have no faith in any individual working

himself into so responsible a post,

This great industry has for too long been allowed to drift at hazard, and to be discredited by swindling operations. When General Schenck's name appeared on the direction of the "Emma," the main outery arose from the fact that the concern he thus ondorsed was a Pacific Slope Mine. That name appears to be equivalent to Fancy Stock—Highly Speculative—Gambling. This is unjust to a great and profitable industry; but it is the result of bad management on the part of investors, as well as of dishonesty on the part of the inhubitants of the Pacific Slope. And here we can state a fact which may surprise many in England: that most of the swindles have been perpetrated by Englishmen, and that many Englishmen are now in California, Nexada and the Territories, picking up mines, with the object of distributing them among their countrymen as pleasant little nuts hereafter to crack. Of course, they are all laid at the door of the Yankee. Mining on the Pacific Slope is one of the most legitimate as well us one of the most profitable enterprises of the day. In a territory extending over more country than Western Europe is ranks in importance far beyond that of any other industry. Acticulture and manufactures on the Pacific Slope are but the handmaids of mining. The precious metals thence flowing eastward the producing, and are hereafter destined to produce, a mighty effect on the circulation of the world. The Times has given expression to some crude ideas on this subject, which confounded in an amusing way Quantity and Value. But it matters not what may be the effect, the fact is now certain that the export of silver and gold from Colorado, Utah, Nevada and California has reached something stupendous, is rapidly on the increase, and, whether for good or evil, is lowering the standard whereby all values are measured. One would think that an industry so extensive, and an interest so vast, would have a better representative for the protection of the harterests of forefigers than the self-constituted Mining Bureau of Secramento.—An

<sup>—</sup> John Devine, the assassin of August Kamp, has been sentenced to undergo a stretching of the neck on the 26th of next mouth. As the man is absolutely penniless, there will probably be no foolishness in his case: he will drop from his beam at the advertised time. Lanra Fair is to have another trial: but it would be idle to claim that her case has anything to do with his, or his with hers. In fact, if we were bliuded with a bandage and asked why in speaking of him we mentioned her, we don't believe we could tell. Could you!

## Still Another Disposition of the Soul.

Some cynic has remarked, and with show of reason, that Frenchmen never get drunk because they are naturally intoxicated. And the field of metaphysics, be it known, is to the intellectual Frenchman the fruitful source whence in perennial known, is to the intellectual Frenchman the fruitful source whence in perennial plenty he draws the inspiration of his methodical madness. Metaphysics, in a word, is to the cultivated Gaul what we may suppose an unrippled stream to be to a discriminating duck. The powerful originality developed by the now removined Anguste Conte in his metaphysical researches, startled and arrested the protoundest intellects and the brightest brains of the word. The theory that Humanity was God, boldly enunciated and logically maintained, brushed away at one swoop the tangled web with which theology has invested religious faith. There have been other as profound thinkers as Comte, men as gifted with utterance as he, but he differs from them in that he is no iconoclast, but for the patchwork theology which his logic brushes away, he gives us in exchange a purer and sweeter substitute, and one more in harmony alike with the teachings of plain sense and the yearnings of

the human heart.

the numan heart.

Not so M. Lonis Figuier, the latest delver in the metaphysical mine, and the author of a startling volume bearing the gloomy and significant title of "The Tomorrow of Death." Like his prototype, the great positivist, this more recent writer treads not in "the primrose paths of dalliance, but following his bent of his saturnine inclination, plunges recklessly into the pange of metaphysical conception, and with that dan of intedectual intoxication peculiar to the Gaul, at which we have hinted, plants himself before an annaged world—the father of a theory. But let us inspect this theory, at whose amazing composition we have launched our adjectives, though from want of space or whatever else we deny ourselves more than the briefest glimpse at a skeleton of its outlines. To begin with M. Flyuier believes that the zerm from which a human soul is sevolved is contained first by a plant and a zoophyte, and afterwards by one of the melecior animals; that finally it enters the body of an infant and, if the infant leves, attains full growth as a human soul. Proceeding upon this basis, he maintains teat if the child die before reaching the age of twelve, the soni does citaer of two things: or ascends to the ether of space beyond the atmosphere of our eacht, and becomes what M. Figuier terms a "Super-human," or enters the body of an embryo and begins life anew. This alternative and here lurks the dainty theological discrimination. ination—is decided by the measure of the integrity or wickedness of the autis-career on earth. At the first death, 200d men become Super-humans, while wacked men, by the process indicated, are obliged to live over their lives on earth an indefimen, by the process indicated, are origined to the over their absection carm in the distribution of times, a cording as they may have been only bad or superlatively wicked in their existence in the flesh, until their spirits are sufficiently purified for ethereal bliss. The theory, it will be observed, though assimilating in some details with theories that are older, jet maintains its claim to originality by the striking peculiarity of the whole. Proceeding, M. Figurer proclaims that the planets, which we have been accustomed to regard only with reference to their importance in the economy of astronomical science, are not only inhabited, but inhabited by in the economy of astronomical science, are not only inflamical, but inflamical by beings analogous to man in their physical conditions, and who pass through the same career after death. This being the premises of M. Figuier's theory, the logical consequence is that the ether of space is tenanted by Super-humans—which is about what the modern Spiritualists hold—who remain there until their spiritual cleansing is perfected, and, being invested with purer spiritual garments, they rise to higher phases of existence. We had almost been gut by of the unparaonable oversight of concluding with M. Figurer himsel, that the purited Supershaman finally reach the san, where they remain to all eternity, and whence they fructify the earth and all the other planets with their radiant emanations.

We have this given this new theory at such length, merely to show the direction of modern thought as it treads into religious investigation and, added by pittless Science, best down theological hedges with which Custom and Fault, those twin hand-maidens of the Church, have so long surrounded the unhappy sinner.

- The Senate has adopted a resolution appropriating fifty thousand dollars to enable the President to carry out the new civil-service rules. In the stupid old days that happily are passed and gone, it was the custom for each political party to days that happily are passed and gone, it was the custom for each polytecia party to hear its own electioneering expenses; our lines have fallen in piezasanter pages. You have all heard the roar of old ocean crushing his edges against the beach. That is the people's demand for reform. Now list ye to the answering marmur of this shell. How beautiful! Here you have the tide-grow; and the song of the breaker—bottled! The clamor of a thorsaud seas put up for use, and ready to the landlubber's car. O handy shell! O pank-and-pearl, convoxed and portable! Stuffed with concentered howling of the main, attuned to sweetest music—and only fifty thousa; d dollars a ticket! Perhaps there is nothing in it.

<sup>-</sup> A policeman of this city has been fined seven hundred and fifty dollars for knocking down a woman, hauling her about the streets, pounding her with his club, and executing an endless variety of similar pleasantries upon her. We look upon his verdet as a wanton outrage, and a blow at law and order. Why do we so regard it? Geutlemen, you need not think to detain us all day upon this gruessome subject, replying to ille questions. We have other fish to fry, and this one smells.

#### Proverbs and Portraits, or Life on the Alaska.

In eighteen hundred and seventy two
There sailed together a bishop and Jew.
The bishop was long, and good-looking withal,
The Jew was mean-looking, and ugly, and small—
His English was bad, his manners were worse,
But he hinted his strength was a lengthy purse.
He believed but little of holy writ,
And never was known to lavish a bit;
His nose had the orthodox Jewish hook,
And his whole get-up had a Hebrew look.
One night his wife with a loving nip
Cried out, "Oh law, Joe, how like you're to Kip."
(Now Kip was the worthy bishop's name,
And she might have prefixed R-E-V. to the same.)
The Jew felt flattered, as well he might,
And complacently stroking his aquiline nose,
And fogging himself in his Passover clothes,
He went on the deek much larger than life,
And told the Lord Bishop that his loving wife
Had said that had he a shaven lip
He'd be the image of Bishop Kip.
The Bishop smiled, and gaily said,
"My friend, go tell you'r wife in bed,
That I feel much flattered, but hardly knew
That I had the honor to be like you;
My father's a Gentile, my mother too,
And I haven't a trace in my blood of a Jew;
But tell your wife when next she would toady us,
With my very best thanks, the comparison's odious."

#### At Last.

Our small horizon at last begins to expand. We note within its increased circle various manly purposes, fit to contemplate as things creditable to the heads and hearts of our people. Long ago capital should have aided the genius and nerve of our correct thinkers and made for itself a mine of riches thereby. But it has hitherto failed to do aught else than strangle the beautiful children that should have grown into giant forces. Money has in no respectable degree given its use to propagate and embellish some stately industry, creditable to itself and politic as a basis for its further applicaton. Suicide, insanity and theft are the recognizable scandals against our unhealthy and wicked employment of money; that has known no graceful our inhealthy and weeker empowhere of money, that has been cruel, as hell only is cruel, to warm hearts and overwrought minds, whose creations have been so beautiful that it seemed like a descenation to strike them to death. Let there be an end to a mean it seemed like a desceration to strike them to usual. Det uter a desceration to strike them beltifogging in shares, victors use of capital; let it seek some nobler exercise than pettifogging in shares, victors used the strike the purpose of their. Where the field for its application is so large and various, money should immigrate to us—as some wretch would do to break away from the unhealthy shadows that overhang him in countries governed by restrictive laws—and sound its call of invitation millions that are begging in rags for a bare sustenance of 3 per cent. or 4 per cent. a year, to come for play in a field full of flowers, resplendent in the sunshine, filling the lungs with wholesome air and regaining the senses with Tragrance and beauting. Capital would be clastic then and would respond generously, as it always should, and encouragingly, to the action of ambitions minds whose energies would be re-awakened, fortified and compensated. Some of the best men in our community have been unutterably ruined by the tyranny and murderous rapacity of money. A new era is discernable. We are to have a more clevated stand-point and a larger overlook. Somebody in our own city has agreed as follows: "To take all of the bonds of the ninety-three mile road from Saucelito to Tomales, via San Rafae', at Tiper cent. He advances money as it is wanted upon the road bed and appurtanances, taking as security therefor a lieu thereon and an assignment of the county subsidy of \$466,000. Whenever the road is sufficiently built, upon his own motion, subsidy of \$460,000. Whenever the road is sufficiently built, upon his own motion, to offer an attractive showing, he will demand the issuance of the road bonds at 71 and pockets the difference between that amount and the amount at which he may succeed in negotiating them. Twenty-year 7 per cent, bonds would bring par, and his profit would amount to over 40 per cent, in addition to the interest on his advances. The railroad company, therefore, accept this shave, in consideration of the furnishment of money which enables them to complete the road with expedition and without hardship to themselves. We contend that that is a proposition, creditable to both parties, satisfactory to capital, and encouraging to the ambitions man. Let us have more of it. Tell it to all the people. Come out of your corner, timid money. Let Sovereigns and Thalers see our Eagles fly among the fields and on the hill-sides, high-mided, happy and healthy. All then, they will sligh to be dwellers with us. At last we have caught faint glimpses of greatness. Let us not tarry.

#### Court Chat.

- The Allormeira Zeitung publishes the following letter of the Crown Princess of Germany to Klaus Groth, the author. "I have received with great texture second volume of the Pointkorn, which you are had the goodness to set do me. I love the beautiful language, into the power and gracoficiness, which you contained with such compote makery, and which, the almost no other represents the brigging and working, the thinking and leveling of our people in their full truthfulness and naturalness. With the many-colored change of grave and gay netures with which you attract and delight the reader, you know everywher, how to preserve the paramoral feeling which lives deeply in the consciousness of the terman people, and which the post above all cannot wound with impurity. The apolesses which you have found far by your described become a source or it resumes at an control for every mind and every heart. If your poems induces themselves easily on the memory through their depth of sentiment and trapportly tenching samplests of form, so have the homely short expressions of the platt deat site and a considering controlled. As the freshness and the wholesome humor of your poetry carry even on freesting to the heart, and evokes many a term. Victorial, Crown Pracess.
- Prince Otto of Bavaria has been suffering for some time frees a solve complaint, which has lately assumed a danger as character. As the King's summand.

  Prince Otto is the heir presumptive to the threne, and, as far as any manded, a projects of his royal bretter are concerned, is likely to remain so. Persons who are well acquainted with King Ludwey's bases and antipathes are of opinion to be the does not marry on account of his areat impatience of anothing also consistent. Time King is still young, but if the above view is correct there is reason to lear ne will become a continued by below: and then, should his sick brother not carrive him, the succession will pass to the fan. Y of Prince Luthpool. As this banded is strongly Ultramontaine, the mere possibility of such a confinement is regarded with anything but a feeling of satisfaction by all the other parties in Baveria.
- One day, at the parade of his guard, the Empe or Paul I, of Russia was excessively indicinant with one of his officers, who was not a good horsehold "Cashier him, and send him to his estate," said he to the commanding general "Paulon na, sire," answered the laster, "he is a poor man and his no estate." "Then give him one! "exc aimed the emperor, as he rode away. This answer was not only original, but imperial, for having been once attered, the Emperor must keep his promise. The officer, therefore, was made pessessor of an estate, in order to live in banishment upon it.
- In reply to the flattering toast which the Czar, at the recent feat of St. George, proposed in honor of Germany and the German armies, the Emperor William has presented hes imperied nephow with the one that plan of the great Prussian compaint, as it was written in Count Von Medike's own isoniwrither imperience after the declaration of war by France. The Czur, ne knowledge in the precious document, said that the considered the present the most valuable contribution that could have been made to the imperie othering of celebrated antice rather than the could be contributed in the countribution that could have been made to the imperie collection of celebrated antice rather.
- A pumphlet basecently been published at Napies, the author of which asserts that Ferdinan I II., better known as "King Bondon," was assissingted by some officers of the Roya, Guard, and that his son and successor, the idented Frances II, know that his lather's murder was in contemplation. It is said that the second son of King Bondon, the Count de Girzent, who recar by committed survide, was likewise in the secret, and that remorse caused him to take his own life.
- The Emperor of Brazil made hamse if very popular with the authors and artists of Panes, with whom he associates on a footing of perfect equality. He personally called on-all the ecclobrities of the French capatal, and even made a tep to Nomart, in Bray, in order to pay his respects to George Sand. The Emperor is himself the author of several novels, which have been published anonymously.
- Simultaneously with Talleyrand's "Memoirs," will be published the "Memoirs of the Duches de Dino," the place of the great statesman, who, during the last twenty years of Talleyrand's life, did the honors of his house.
- It is the custom with Prinsian princes to learn a handleraft. Some days ago the second son of the trown Prince Prince Henry, took his first lessons of the bookbinding trade in the presence of his parents.
- Among the laterary remains of Frederick Halm, the most entuent dramatist Austria ever produced, is a tragedy of which Major André and George Washington are the most prominent characters.
- The value of the French crown jewels, which the Minister of Finance had been authorized to sel, by the National Assembly at Versailles, is between fourteen and afteen million francs.
- Sir Richard Wallace, who showed such a constant liberality during the long siege of Paris, has just given a sum of 5,000 francs to the charity called." Le Son des Chaumières."
- It is gratifying to learn that when the Gaekwar of Baroda, of India, heard that the Prince of Wales had got over his dangerous i liness, he distributed £5,000 in charity.
- Norodom I., King of Cambedia, was expected in Paris on the 5th inst. His Majesty is accompanied by his minesters and private secretary.

## Improvement in Gas Manufacture.

We find in the English papers a great deal about the Eveleigh patent for improvement in manufacture of illuminating gas. It is thus described in the Scientific Journal, printed in London: \* \* \* "A ton of ordinary gas coal, treated in the usual way, produces about 9,500 cubic feet of 14-candle gas. By the patent process usual way, produces about 9,500 cubic feet of 14-candic gas. By the patent process the same quantity of coal, of the same description, produces 11,500 cubic feet of gas having an illuminating power of 20 candles. Burning the gas at the rate of the Parliamentary standard, handly, five cubic feet per hour, the ordinary process gives 1,900 hours of 14 candles, the product therefore being 1,900x14, or 26,500. By the patent process we get 2,300 hours of 20 candles, the product being 2,300x20, or 45,000 hours of 15 candles, the product being 2,300x20, or 46,000, showing, therefore, a difference of 19,400 candles, or more than 72 per cent. 30,000, snowing, uncreaser, a uncrease of increase and experience of more than is per cent. In flavor of the new process. The sulphur compounds are only three or four grains in 100 cubic feet of gas, as against from 20 to 40 grains in gas of the ordinary kind. The patent gas is also entirely free from ammonia. The quality of ecke produced by The patent gas is also entirely received authors. The quarry of cose produced by the new process is greater than by the old, and the quality is better, while the coke fequired for fuel is less. Thus the patent process produces 14 cwt. 3 qrs. of coke, as against 13 cwt. by the usual method. In lieu of tar, amounting to ten gallons per ton of coal, the patent process yields 70 pounds of pitch. Upon the whole, the residual products of the Patent Gas manufacture are worth more than those of the ordinary process to the extent of about sixteen pence per ton of coal. The cost of blom, and the charges incidental to the manufacture are ustated to be rather less by the new process than by the old, though this remains yet to be tested on a large scale. The estimates at present show, that after allowing for the value of the residual products, a ton of coal will be converted into gas at a somewhat less cost by the new method than by the old, while the quantity of gas will be so much

greater, the illuminating power so much higher, and the purity dicidedly superior.

The gain of 72 per cent, in lighting power, if obtained, as alleged, without increase of cost in production, is an immense consideration. The estimate includes wear and tear and renewal of works, as well as labor, materials, supervision, etc.

It may be right to state that one of the largest of the London gas companies have been giving sevious attention to the merits of this invention, and would in all probability have given the processes existing the results. ability have given the process a trial, but for the fact that the Patent Gas Company are just bringing the process to a practical test by an arrangement which they have made with the Directors of the Barnet Gas works. Dr. Letheby, at the request of Dr. Eyeleigh, has reported on the merits of the process. Dr. Letheby found the lighting power to be within a fraction of twenty candles. The gas was entirely free from ammonia and sulphuretted hydrogen, while sulphur in other forms was less than four grains per 106 cubic feet. Bearing in mind the enormous consumption of gas going on in London alone, saying nothing as to the provinces or forcign countries, the value of such an invention as this is really astonishing, presuming that it will work out satisfactorily on an extended scale. The economy of coal is itself a matwors our satisfactority on an extended scale. The economy of coal is itself a matter of vital consequence. Getting a lighting power of 46,000 instead of 26,600 candles out of a ton of coal, represents a real economy of the national resources, as well as a corresponding profit for the company that performs the feat. There is also the pleasant prospect of purer and better light for the benefit of the consumer. The patent for the United States was issued January 30th last to Joseph G. Eastland of San Francisco assignment Comma Pachetic.

land, of San Francisco, assignee of George Eveleigh.

The Alta publishes a private note from one "Olive Harper," asking the editor's opinion as to whether she... Olive," not the editor has "ability enough to olive," and the control of the editor has the ability enough to olive, the she has not asked our opinion, but she is quite welcome to it, and will probably be grateful for it, imsmuch as the Alta person has given none. We think "Olive" may safely resign the plox, for the pen. It is notorious that the Alta's 'Swallow' and its "Lignous Magnus' dressed themselves very warmly, if not very decently, upon the profits of their "peas", and if they could she can, or anybody. It is time the "Swallow" had to finally give it up when his suit began to wear out, and he went to a warmer climate, where he can afford to write begans he won't need any clothes. It is for also where he can afford to write because he won't need any clothes. It is true, also, that "Ignorus Magnus," when his suit wore out, went to San Rafael, where we have frequently seen him hanging about the Tamalpais Hotel, very seedy and apparently in want of something to do-or rather, in want of the wages. At last accounts he was preparing a translation of Sempronius Asellio for the Saucelita Herald. But the fault with these gentlemen is not their lack of sense, but their opulence of laziness. If "Olive Harper" knows as much as they—and she can not very well know less, and know it thoroughly—she ought to make a living at literature, if she do not fall into their error of regarding hunger as preferable to futigue—which, as a rule, it is not. "Olive" confesses that she is a neire of "Marian Har-land," the novelist. That is bad, but instead of discouraging her, it should be a spur to such high endeavor as will overcome it. Our advice to "Olive Harper" is to harp upon the literary harp.

<sup>-</sup> Harper's Weekly proves the great talent of the Rev. Theodore L. Cuyler by the fact that he has contributed over fifteen hundred articles to various publications. What extraordinary genius! Fifteen hundred articles, and not one of them can be specified by title by anybody but the author! Mr. Cuyler is evidently a rising literary light, but he is a long time getting above the horizon.

#### Will General Grant be the Next President?

Some two months since we prophesied, with certain qualifications, the nomination of Julian, of Indiana, by the Columbus Convention, and that he would be indorsed by the Democracy, and might defeat Grant for the Presidency. Our prophecy was marred in its fulfillment by the declination of Julian, by reason of ill health. The nomination of Juliae Davis by the Convention is not an important calling a personal because their new symmetry with the convention is not an important calling the convent because the state of the symmetry with the convention is not an imporill health. The nomination of Judge Davis by the Convention is not an important political movement, because he is not in sympathy with the labor element of the country. In the meantime, the opposition to Grant is apparently more pronounced and open. Greeley declines to unite in the call for a National Convention, that he may be free to oppose the nomination and election (if nominated) of General Grant. Summer, Schurz, Trumbull, Ferry, Tipton, West, Gratz Brown, George Wilkes, Governor Palmer, Governor Geary, Sam. Bowles, and many other important politicians throughout the country, are organizing an effective and determined opposition to his nomination. Roscoe Coukling, Morton, and Butler, together with the great body of office-holders, are desperately fighting for his success, and everything that office mousey place promise and party disconline can do will be everything that office, money, place, promise and party discipline can do will be brought to the accomplishment of his renomination. The ascending of a Convention of Liberal Republicans at Cincinnati, inmediately after the National Republican Convention at Philadelphia, is significant of a determination on the part of a large and very respectable Republican element to defeat him at all hazards. The co-operation of the Democratic party with the malcontent Republicans and the laco-operation of the Democratic party with the malcontent Republicans and the habor element, uniting upon a conservative Republican candidate, there being only one ticket in opposition to General Grant, may result in his defeat. The war feeling cannot be successfully invoked the second time for a military leader. The "one term" idea involves a principle. The tendency to abuse of power by the Administration—the great corruption existing among office-holders, as evinced by the unprecedented deflactations—the exposition of Custom-house and Department frauds, all point to the necessity of a change or purilication of the Administration. Some people assert that in the event of there being but two Presidential candidates in the field, both being Republican and Grant being one, California may give a majority of 25,000 over him.

- In last week's issue of this paper appeared a foolish epigram directed against In last week's issue of this paper appeared a foolish epigram directed against the author of some verses in the issue next preceding; whom the writer of the epigram assumes to obscurely name as "B\*\*\*\*". Now, this must be intended either for Barnes, Bowman or Bierce; the number of asteriesks being equally adapted to all. Of the two former gentlemen, we do not know if either wrote the verses in question; concerning the latter, we know that he neither wrote, nor has read them. Having shown clearly who is not hit, perhaps we shall not be taxed with a spirit of revenge if we accord to the temerity of the "opigrammer" a recognition which we should certainly deny to his merit, and "just for this once" make "fault" in our page to correct a greater one in a young man who is in danger of growing out of his two feet a fool. That gentleman will kindly understand this as coming from whichever "B\*\* \*\*\* \*\* "he designed for crucifixion:

O rash young epigrammatist!

By means of that surname supprest,

Thy riddle backward we untwist:

Lo: thine identity's confest—
We see thy "sign" and guess the rest!
Thy barmless Bray and empty Brain
In boastful "B" find symbol fit;

And all thy "stars"—a meagre train— Reveal thy "milky way" of wit.

Young man, when next you wag your pen, Discretion should assist it:

When next you hint uncertain words, Your "B" should stand for Biscuit; When next you have an asterisk, Think twice before you risk it.

- A correspondent who has been on a visit to Chiselburst says that in the arrangements of the Imperial household everything is very simple, and presents a striking contrast to the sumptuousness of the immates' former days. The Emperor surking contrast to the sumptionishess of the inmates former days. The Emperor no longer indulges in expensive wines; the table is humbly served, and les tribettes decottatées absolutely banished. His ex-Majesty keeps only one carriage, and had-a-dozen horses, and the Empress goes out generally on foot. Napoleon the younger engages in study and visiting till three o'clock. Returning at four he mounts on horseback, or joins his mother in a walk. After dinner he bids his parents good night about ten o'clock—always kiasing their bands—and retires to his room. From the table his parents good night about ten o'clock—always kiasing their bands—and retires to his room. From the table the prince pains the present and the property of time to time the Prince visits the monuments, the museums, and the military and industrial establishments of London and its vicinity. An excellent example to persons of less pretentious position in the way of bringing up their children.

A youth of this city brought an action for twenty thousand dollars damages against his aged mother for chiding him with a stick of stove-wood, but was persuaded to withdraw the suit. This was very ill-advised: the limits of materninght in this matter of reproof need defining. We believe that a decision specifying how far a mother may legally go in pounding her offspring with foreign bodies would make Christian civilization advance an inch. As it is, custom is our only guide, and custom, as we remember it, is extremely painful.

#### The Lifeboat.

The lifeboat! the lifeboat! when tempests are dark She's the beacon of hope to the foundering bark ! When, midst the wild roar of the hurricane's sweep, The minute-guns boom like a knell on the deep. The lifeboat! the lifeboat! the whirlwind and rain, The white-crested breakers, oppose her in vain; Her crew are resolved, and her timbers are staunch, She's the vessel of mercy-God speed to her launch! The lifeboat! the lifeboat! how fearless and free She wins her bold course o'er the wide-rolling sea! She bounds o'er the surges with gallant disdain; She has stemm'd them before and she'll stem them again. The lifeboat: the lifeboat! she's manned by the brave, In the noblest of causes commissioned to save: What heart but has thrilled in the seaman's distress, At the lifeboat's endeavors, the lifeboat's success! The lifeboat! the lifeboat! no vessel that sails Has stemm'd such rough billows and weather'd such gales; Not e'en Nelson's proud ship, when his death-strife was won, Such true glory achieved as the lifeboat has done!

## At Saratoga Springs.

panyed me. The fust thing that i did was to call for a tavern; i got one immegiately, and took a room, from choice, in the Seventh story, all the rooms above wer tuk.

The tavern whar i stop is called the Union one, and inseparable. The bar is attacked with the choicest lickers. There must be 3 or 4 hundred black serviants here, they all ware white aporns, and hev their hair curled clos. The tavern keeper rings a gong with a klub when the vittles is reddy, and then the borders march in; 'tis a moste affecting site! I havent et enny thing yet but briled chickens.

I gess evry body here knows me, tha looks at me so. I kreated a sensashon yesterday after dinner, on the frunt steps ov the tavern, by calling a cultard serviant tu pick mi teeth. I herd one ov the ladys sa, "i was an English lord, she had saw me at Nuport laste season," I shall sta here as long as i can injuce mi females tu

remain. This is the place where the congriss water cums from; that dip it up out ov a hole In the ground, with a roof over it, you can drink 4 or 5 timblers ov it tu onst, without swallering; it tastes a good deal like sumbling: I never useted before, and it operates on the inwards for all the world just like pills. It dus look so funny to see

or 9 hundred mails and femails, all taking fisick to once; tis a pensiv sight!

The town kontains about six thousand folks, and about as menny more individuals; the individuals spend their time going up and down the back stairs and

taking fisick.

The natur ov the sile around here is sandy, and pine trees, about half and half. Thare is a rase course here, built in a sircle, where tha make hosses go round and round; it is delitesum tu behold!

Three miles out east of the village tha hav built a fashionable pond; everybody

Three mines out east of the vinage that have built a hashionanle point; everybody goes there to spend thate munny; tha ask 8 cents a glass for their whiska!

The sosietah here is permiskuss, blaklegs and deakons, divines and pugerlistics, judges and jockeys, congressmen and harlots, devils and Quakers, so judiciously mixed up, 'tis food for the filosopick mind.

A grate menny young wimmin are brought here annually tu git married; the kourting is all did by the mothers, in fac the wimmin du it all here except pay the

bills.

A man at Saratoger don't hav enny more to say, or du, than an old gander does when a goose is there.

I kant rite enny more just now, i hav got tu go down stairs. - Ain.

The Chronicle says: "The following witty paragraph is from the Baltimore Sunday Bulletin," etc. This witty paragraph," like all the others that have made the Baltimore Sunday Bulletin famous among newspapers, was stolen bodily for these columns by that eniment literary pickpocket, W. Mackay Laffan, editor of the paper in question. This gentleman's discriminating piracies from the Town Crier continuity him column such as the Restorn Peace and the continuity of the paper. are winning him golden opinions from the Eastern Press, and from some of our local journals, and we confidently expect him to clinch and complete his fame by giving his literary treasures to the world in permanent book form. We are not giving his interary treasures to the world in permanent gook form. We are not sure but he merits the praise lately given him by the New York Herald (a propos of a half dozen of our paragraphs) of "the keenest humorist of the Atlantic seabaard." We like to see an industrious, painstaking young man rise in his profession; and our only regret in the case of Mr. Laffan is that his profession should be that of a literary thief.

## Complimentary Resolutions.

It gives us much pleasure to record the following resolutions passed on the 5th instant at a Convention of California Insurance Companies, and autressed to Mr. George W. Mowe, Insurance Commissioner, and Mr. A. D. Smith, Deputy Commis-

WHEREAS, The Hon, George W. Mowe has during the four years last past held the office of Insurance Commissioner of the State of California, and now declines a reappointment on account of ill-heath

Be it Respiced, By the Executive Officers of the several California Insurance Companies on convention assembled:

First That the thanks of the insurance fraternity of this State are due to the Hon. George W. Mowe for the uniform courtesy and urbanity shown by him to all engaged in the business during his term of office.

Second That he has discourzed the delicate and responsible duties of his office with fairness, impartualty and justice toward all, and to the entire satisfaction of the fraternity, as well as of the public at large.

Third That we offer to han our sincere sympathy in view of the failing health which renders has retirement a necessity, and our hopes that, favored with renewed health and vizor, he may long live to enjoy as heretofore the respect and esteem of all who know him.

Whereas, Andrew D. Smith, Esq., has been the Acting Deputy of the Hon. George W. Mowe, Insurance Compaissioner of the State of California during the four years last past, and, in that capacity has been constantly in charge of the other

Be it Resolved, By the Executive Officers of the several California Insurance Companies in Convention assembled, that the thanks of the Insurance frateristy are due to Andrew D. Smith. Esq., for the zeal, fidelity, premptuses and courtes; with which he has discharged the duties of his office, and that in whitever position in his life his sot may be cast hereafter, he will carry with him our cast his receilections of pleasant past relations, and our best wishes for his fature happiness

# Our Sunday Enjoyments.

When Mr. Yost of the California Legislature has attained the celebrity and intelligence of Darwin's Menkey, we shall seriously discuss his Bell on the Sunday Law Question. With all other good edizers, we are in favor of probabiling mass, and barbarous aumsements on the Christian Sabbath, such as but, bear, cock or prize fighting, and cambling; but in conjunction with an other good cinzens, we can see no danger to the Constitution of the United States or the constitution of individual lovers of the American Tagle, in the unster of giving test al, thent-rical or operatic performances on the Christian Subbath - Public opinion is divided on the question as to whether a thirsty pedestrian ought to recare his palate with a mont julip or Sunta Cruz punch at a public bar-room on the Curistian Schbath, but there is no division of suntament about 8h those ye low and denors 2nd me occous op n on the "Lord's Day". The bul introduced by Mr Yost is sulstantially the hil carried through by Senator Betze in the last Logic alore and incorporated in the Penal Code passed by the Legisl tive body now in session the provisions of the Betge bill are enforced by the Police as thorstos, there will be no necessity of making a further crusade upon rational enjoyments for the people. Man is an inimal that lowes recreation, and being in the harness six days in the wook, toiling for his bread and butter, he on slit to be allowed the greatest possible liberty of enjoyment on the seventh. After centuries of war and besood, man, through the nero'c efforts of liberal and daring spirits, has achieved some individual rights and liberties, grasped from the iron hands of theologica and Legis above tyrants, and it is our duty to see that our fellow citizens enjoy these rights and liberties.

#### A Clerical White Blackbird.

It must be acknowledged that preaching talent does not conspicuously abound on this Pacific Coast. We have great railroadists, great bankers, great merebants, great lawyers, but no great preacher. When, as sometimes happens, a theologian great lawyers, but no great preacher. When, as sometimes happens, a theorogram of learning and genus shoots advant our sphere like a comet carcering through the solar system, his advant is the signal of as much alarm, and construction as was produced by Pope Calixtus' comet, against which the "Head of the Church' fullminated his memorable Bull. Your average medicore Californian preacher is jeatous of superior ability. And we tear we must add that the average Galtornian controlled the superior ability. churchman does not appreciate preëminent talent and distinctive originality in the pulpit. These reflections have been suggested by the fact that the Res. Mr. Garrett, one of the brightest and most scintillating lights of the Episcopia parpit that has ever illuminated our horizon, is about to leave us for the Last, because that congregation to which he has been ministering cannot afford him an adequate support. Mr. Garrett is a man of splendid native abilities, which have been custivated to the highest patch. It was but natural that his superiority should have aroused the jealousy of the pulpit dromes of his denomination. But it seems to us mexplicable that the intelligent and wealthy latty of the Episcopal Church of California should be so deficient in liberanty and enterprise as to permit such a man to leave ns for an Eastern field for lack of adequate encouragement here.

## Parnassus in Pillory.

Affectionately inscribed to the author of "The Charge of the Mail Brigade."

O thou, whose "ready pen" the Muse abhors, Whose fancy-flights Prose turneth from her doors; For Genius' sake, rhyme-weaver, spin no more—Of B\*\*\*\*\* dogg'rel we have had galore: Yet, if we must endure his dull refrains, Teach him, O Nine! regard for others' brains!

SELAH.

# B \* \* \* \* n's Apology.

Inscribed with languid indifference to any anonymous nobody whom these presents may concern.

Seidom I deign to beed the envious squeak,
And shard dyspeptic of the ambushed sneak,
Or lift my lance of proof to deal a blow
Against a nameless and ignoble foe;
But when some unclean insect strives to sting,
What law forbids to crush the crawling thing?
What privatune stirs your bile I know full well;
Your dogg rel is a drug, while mine will sell.
Long have you hawked your rhymes with beggar whine,
To all the pupers at a cent a line:
But, snubbed by all, your currish spirit longs
On luckier scribblers to avenge your wrongs.
Thou ball-propelling bug with beetle wing!
Mighty to stink, but impotent to sting,
With hand on nose I deprecate thy wrath,
And pray thy odorous orb may spare my path.
But, if thus cantioned, you shall dare again
Manure me with the compost of your brain,
In cockroach poison I'll invest a dime,
And slaughter you with that, instead of rhyme;
Or, should the vermin-quelling Powder fail,
Crack your crisp armor 'twixt a double nail.

В.

## Whispers from the Rails--(Rail Confessions.)

My Dear Sammy:—By the first of July next the San Joaquin road will be at Visalia—don't tell anybody—and when the Legislature adjourns, Mr. Stanford will go down to San Diego. You know the road will run to that point, to get at the Texas Pacific. Then Mr. Stanford is going East, with all of his folks, to see old friends and Mr. Huntington, and they will have a nice talk with Mr. Scott about railroads and "sich," and they will agree on a point on the thirty-second parallel and the Rio Grande, or on the New Mexico and Texas line, as a point to which each shall work until they have met. All this is sacred, for it will never do for it to get out. You see, if the Central, with its Government interest overdue and bonded until you can't rest, is to be sold to anybody, they must not suspect that it is intended to force rates with them on through business. The street rumors that the Central are relying upon receipts for freight coming in from the snow-fields, is very vicious, but have the people will say "sich" crued things. You see, they don't reach out any more. They are cutting, and shrinking, and shirking, and don't want anything—of course not—the shell is already big enough to be awful tender; it won't stand any more swelling, and can't much longer be used roughly. Now, this is all confidential; if you should ever dare to repeat any of these things, I will never speak to you again. Some ladies as knows the railroad officials and me is very intimate, and you can always rely upon my facts.

#### The Attack on the Sheriff.

There never was a broader farce than the attack which has been made upon Sheriff Adams in relation to the management of his office. Those who know any thing in regard to the subject are well aware that the crusade against Sheriff Adams was inangurated by interested parties. We suspect (possibly we are in error, that our old friend Sam. Harding and others, who were unsuccessful applicants for positions under the new Sheriff, are really at the bottom of the existing difficulty. Every old citizen of San Francisco knows perfectly well that the practices charged against Sheriff Adams as unlawful, were inaugurated as a part of the traditions of the Sheriff softice more than ten years ago. The fact is, Sheriff Adams has, in many respects, reformed the office. Under Doane, Ellis, and their predecessors, the abuses in the office were not made the subject of criticism by the Press. But they were known to the legal profession. Many of these abuses have been reformed under the present regime, and in the next issue of the News Letter we shall present to our readers a few facts and figures, which will clearly show how much Sheriff Adams has improved upon the usage of his predecessors.

#### Gallia Redemptus.

The lamp of Sacrifice burns brightly in the French nation at this present moment, and the meeting last Thursday evening at Pacific Hall was an expression of the feeling that pervades every true French heart at the present time, whether at beats in its own country or in foreign lands. France was burdened with the heavy yoke of five mililard of francs after the late war. Two millards are already paid, and the hard conqueror holds the fair provinces of the vanquished country as security for the remaining three millilards. The resources of the nation are safficient, under a good government, to pay off this impost by taxation, but that process is too slow for the people, and they have determined to sacrifice their wenth, their savings, and the produce of their labor to the noble end of freeing their country from the hated foe and paying the ransom exacted in the hour of their humiliation. Mr. Touchard, the President of the National Subscription Fund Society, opened the proceedings of the meeting with a feeling appeal to the multitude that threnged the proceedings of the meeting with a feeling appeal to the multitude that threnged the hall. He pictured France fettered, calling on her children to break her bonds, and he described the cry that came from those children to break her bonds, and he described the cry that came from those children of promised help and deliverance. His appeal was not in vain—ten thousand eight hundred tollars were subscribed ere the meeting broke up, and more than elecen thousand additional in monthly payments. We have not space to give the list of the subscriber but refer to the columns of the Courier de Stan Francisco for full details. The best feelings were called into play in this exigency, and the memory of the loved ones dead was evoked in the offerings on the altar of the country. Donatons were given in the name of the pate phantons by those of their kin who still mount heir loss, and they who remained acted as the dead would have done had they been living. The spectators applauded on

# Our Worthy County Clerk.

There has been some insinuation thrown out by some of the newspapers in regard to our county officers receiving certain perquisites outside of their fees. Our Mayor, County Judge, and Auditor, at the request of Major Harney. County Clerk, visited his office, for the purpose of ascertaining how that Department of our Major Harney. County Clerk posterior is a careful investigation, they found that no office could be managed better. They found that the County Clerk kept seven books, one checking upon the other, and giving the title of cases, anount received, by whom paid, etc., and that the County Clerk kept one private book checking upon the other hands to be a considered as a construction of the paid to the Judges for Court taxes, which amount is deducted from their salaries; also, what is paid to the Treasurer of the Law Library, as the law requires to be paid to the Judges for Court taxes, which amount is deducted from their salaries; also, what is paid to the Treasurer of the Law Library, as the law requires. The County Clerk receives no perquisites whatever; he has but a small salary, and his office is the most important and responsible in the City Government. He is made by has a vast army of clerks, nearly twenty-cight, all of whom he has to look after and be responsible for, as, also, for everything pertaining to the office and Courts generally; and for all this he is the least paid of any county officer. It is generally admitted, since Mr. Harney's taking charge of the office, that the whole office has been put in a perfect state of discipline and well managed, and that he is undoubtedly one of the best officers the city has ever had. The Mayor and other officers dhat they should, because some insinuation was made by a morning paper coupling the County Clerk's office with others. The result of the investigation has indeed been highly commendable to Mr. Harney, and our other city officers might have similar examinations instituted.

#### The Bohemian Club.

The new Constitution, as revised by the Committee appointed at the last meeting of the Bohemian Club, was adopted last Monday, to take effect on the 30th day of the present month. Writers, artists, actors, musicians and patrons of belle sketics are now made eligible to active membership. The former plan that was proposed, of keeping the control of the organization in the hands of active journalists, has been abandoned, and a broader basis has been thought best for its success. The election of officers has been postponed, under the new Constitution, to the first Monday in April.

Leaves from a Lady's Diary.

MARCH 1 .- How easy it is to find fault; how easy to think that one's lot in life is harder than that of others. I could not help thinking this as I came back from a visit to the  $\mathbf{H}$  -'s. I have spent three days there, and during the whole time she a visit to the H -'s. I have spent three days there, and during the whole time she has never said a single good word of her neighbors, and was constantly dwelling on her ailments and her husband's losses last year, whilst that poor, faded-looking lady that lives in the little cottage close by them is a struggling uncomplaining woman, whose husband has descred her and her two boys. Henry came home furious that an an attempt is made to change the City Hall Commissioners. He says that they have borne the burden, brunt, obloquy and heat of the day, that thousands cheered them on the laying of the foundation-stone, and that having smoothed the way, they are to give place to men who have to begin all over again. It's the old tale—hosanna to-day, to-morrow crucify!

March 2.—Was obliged to send for Dr. H—to-day for I really was ill. \* \*

Instead of attending to my case he could talk of nothing else but his new patient, the great banker: of the dinners and the plate and the wine, and when I asked him

the great banker; of the dinners and the plate and the wine, and when I asked him what was the matter with the millionaire, he said, "Only want of exercise." Mrs. B— has lost her baby, and almost scolds her husband for mourning after it. Little Alice L- came to me almost in tears: she had made a really pretty dress, poor girl, the only one she has, one purpose to go out in, especially to the good dinners and gay society at Mrs. D.—'s, and now that ill-natured woman told her sister that she wonders how Alice can have the bad taste to wear anything so unbecoming. That's the way the parvenue makes the poor girl feel her poverty, but she is as proud as she is superior in education and good breeding to the other. Fat old Mrs. E.—rolled in; she objects to a fire, even with the thermometer below zero, and always breaks into a perspiration of rage when she finds one in the room; she

and anways breaks into a perspiration of rage when she must some in the room; she ought to go with Mr. Pavy in his intended expedition to the North Pole.

Manen 6.—Poor Harry Byrne! what a hidden waste of dust and ashes must his affection have been, and how that impetions, sharp intellect had its quiet, secret, wasting sorrow! I can fancy his shrinking from the small, playful coquetry of women, and, if it were the case, could understand his studying and drinking. A heart-blow to an organization like his creates a disgust at the same time that it engenders a craving for excitement. Henry went to his funeral, and said that the women were more predominant and more curious to get the last look than he ever where them. There is something noble and touching in the sentiment in his will which respects the house in which his brother died, so that no mortgage should ever attach upon it. The raising of the snow blockade has flooded our house with new books and magazines. I was amused by reading a blundering account in the Revue des Deux Mondes, by a French naval officer, of a trip to the Geysers, the principal part of the narrative being taken up by the fear and dread that affected him by the driving of Captain Foss.

Leaves from a Gentleman's Diary.

MARCH 4.-I think it is Dr. Maginn who says that if a man could combine the sentiments and ardor of twenty with the enterprise and experience of thirty-five, the most virtuous woman would not be safe. But what man would be safe even were he a saint, if the snare were spread for him by a girl of eighteen with the experience of a woman of the world of forty! It is to my mind a strong proof of the wisdom and goodness of Providence that these things cannot in the nature of things be united. As matters stand at present I have no fears on account of the apparent peril of my rich bachelor friend. The widow's perfect art is neutralized by her avoirdupois and worldliness (my friend is sentimental, yet not without perspicacity), and as for the young lady, she will never take the initiative. I think he is Bafe

Marcu 5.—At our little supper at C—'s, last night, after the theater, there was some mention of the Bohemian Club. "Mr. — declares he will not join," said Miss R—, with an air which seemed to convey that without Mr. — the Club must go to the devil. "I don't see why he should," said Mrs. C—; he isn't the least bit of a Bohemian." "No," returned Miss R— with naivele, "he doesn't drink and is quite regular in his habits." "Ah! what I meant," rejoined our hostess, with an air of innocence, was, "that isn't in the least clever," Then came half a dozen definitions of the much controverted name. Mrs. C—'s was, "ta man who lives unconventionally and is bright enough to write for the Name," at the same was the lives unconventionally and is bright enough to write for the Name, "the Name," at the Name, "the Name, "the Name," at the Name, "the Name, "the Name, "the Name, "the Name, "the Name," the Name, "the Nam

man who lives unconventionally and is bright enough to write for the News Letter.

MARCH S.—Poor Harry! he would burst his cerements could be read the papers this morning, or hear the current talk on the streets. N— assured me, on the day. this morning, or hear the current talk on the streets. N.—assured me, on the dialo of the funeral, that all the papers had agreed to make no allusion to the Matilda Heron episode. I told him that De Y.— night have promised, but that he wouldn't be able to resist the temptation to "get ahead of the other papers." And I was right. Probably he made an effort, but the itch was too strong for him. Then the Call caught it and broke out a day later in the same place. Poor, poor Harry! What a nobe spirit was there, my countrymen, that never found its sphere! What brilliant talent! what varied acquirement! what idiosyncratic genius! All wasted, all lost! Truly here was a life that was in the saddest sense a failure. The papers announce that Matilda Heron is on her way to San Francisco for the number of contesting the will. How she can come before a legal tithunula state. purpose of contesting the will. How she can come before a legal tribunal as a claimant to the estate, it is not easy to anderstand. If she was divorced, as is commonly understood, how can she present a claim? If she married Stoepel, without being divorced, how can she defend herself against an indictment for bigamy?

## "Hark! 'Tis the Pibroch."

Come to the mountains, where grows the brown heather,
Come to the brackens, where lie the red deer,
Come to the valleys, where stalwart men gather,
And whose bonnie daughters we aye will revere.
Ours is the land famed in song and in story,
Where hearts strong and true aye unconquered will stand,
Whose pride is to tell of their forefathers' glory,
Who longht for their chiefatins and bonnie Scotland.

"Hark, tis the pibroch, played down in you lonely
"Strains that, have strong of the days and own."

"Hark, tis the pibroch, placed down in you lonely gade, Strains that have stirred oft bold hearts underneath, And while the heather waves over their honored graves, Scotsmen as dauntless will tread o'er the heath."

- Will o' the Wisn.

Come to the land that has buffled invasion.

Each mountain and glen has famed story to tell,
How tartan-elad heroes, the pride of their nation,
With broadsword and targe the strong foe cid repel.
We have no craven heart rearreston our heather.
But mused 'mid the cold mists with no gentle hand,
Our mountain-bred valor with us ne'er will wither,
And deeds done before we can do for Scotland,
"Hark! 'its the pibrook,' etc.

Our forefathers' battles with pleasure recounting,
Unstructed shall shine on the long scroll of fame,
And long as the tortan our breasts is surmounting,
So long shall their spirits dwell in us the same,
Ours is the land of brave men never vanquished,
Who dare, do, or die at their chieftain's command;
We all love the country whose name is untarnished;

Hurrah for the mountains of bonnie Scotland.
"Hark 'tis the pibroch, etc.

SUNDERLAND, December, 1871.

# Special Brevities.

A sale is announced as about to be made in Paris of the puppets or marionettes which the late M. Ponson da Terrail, the well known romance writer, made use of whose employed in composing the voluminous resiliblems for which he was so celebrated. These puppets, which represent the various characters of the another's different novels, are small dolls about one foot high; their faces were cared expressly for M. du Terrail's use by M. Dollégus, a Swiss artist. These marionettes are divided into groups, each group bearing the name of the story in which the personages composing it played a part. For his great—in length at least—work of Rocamboli the author had no fewer than 282 puppets. It should perhaps be mensioned that this last work fills nearly a score of cosely-printed volumes. M. Ponson du Terrail at one time contributed simultaneously live distinct nevels to the was driven to the use of mechanical contributeds in order to avoid confusing his

A very serious schism has occurred among the Paris clergy, which, it is estated, will shake the Citholic Church in France to its very centre: It seems that M. Michaud, the vicar of the Madeleine, recently asked whether the Archbishop of Paris would allow the priests of his diocese to 2ive absolution to commissionants who do not believe in the degrams promulgated by the Vatient Council, and whether priests who did not in their hearts believe in those dograms would be allowed to celebrate mass. The answer was a decided negative. Thereupon M. Michaud resolved to resign his office in the church rather than submit to the tyranus seegah to be imposed upon him. He will, however, remains a priest, he says, and bagdize, marry, confess, bury, and give absolution whenever called upon, and wait for better times until the can preach again. Meanwhile he will numbes the Uttramontance

The Pompeian dinners usually comprised three courses. The first consisted of eggs, olives, oysters, saind, pickles, etc.; the second of made dishes, fish, and roasts: the bird of pastry, confectionery, and truits. From a painting descovered at Pompeii we have the representation of a large feast in those days. An assumence dish containing four peacocks stood in the center of the table, surrounded by lobsters, one holding a blue egg in its claws, another a stuffed rat, another an oyster, ynd the fourth a basketful of grasshoppers. At the bottom of the table were four dishes of fish, and above them partridges, harcs, and squirrels, each holding its head between its paws. This was all encircled by a sort of German sausage apparently; and then came a row of yolks of eggs; a row of peaches, meions, and cherries; and lastly, a row of vegetables of different sorts.

— Some pions Britons have been publicly praying that war between Great Britain and the United States may be providentially averied. This seems to us the greatest folly; if we could not leave this matter to the Arbitrators, without any assistance from outside parties, what was the use of the treaty! We do not believe that Providence will interfere in any way with a matter that is not before Him.

- At a meeting held at the Royal Albert Hall, which was attended by a large number of musical professors and amateurs, as well as manufacturers of musical instruments, to take into consideration the propriety of insisting on the instruments sent into future exhibitions being of the same pitch; and, this being agreed upon, to settle what that pitch should be; it was all but unanimously resolved that the pitch recommended some years since by the committee of the Society of Arts—of 528 vibrations per second for C—should be adopted. If is to be hoped that this resolution may prove the first step towards the correction of the absurd and incovenient varieties of musical pitch at present obtaining; and serve to check the upward tendency that pitch has manifested for now nearly a century past.
- Hans Andersen gives, in one of his books, an amusing account of a young man, newly appointed to some official position in the Court of Copenhagen, ordering his court dress in great haste, that he might be present at a ball where he meant to declare his attachment to a beautiful girl whom he had long loved. All went on smoothly, and he was on the point of proposing—nay, had spoken a few preliminary words—when a button gave way on the hastily-made court dress. The lover rushed abruptly away, and the lady, hurt at his unlooked-for departure, made an engagement for a riding-party, where she received and accepted the offer of another lover. Thus love as well as life often hangs upon a thread.
- The Dyaks of Tartary ascend trees by driving strong pegs of bamboo into the trunk, which they connect with an upright bamboo, and thus form a good ladder. The people of Timor litterally walk up trees by means of a long piece of creeper put round them and the extremities held in the hand. It is a wonderful sight to see a man thus ascend a vertical trunk, one hundred feet high, and then creep out upon a horizontal branch and couly brush away the myrinds of bees from a comb a yard in diameter, and become immediately enveloped in a crowd of angry insects, while he cuts of the comb and lets it down to his companions below by a slender cord. In this munner many tons of wax are annually collected.
- The influence of temper upon tone deserves much consideration. Habits of querulousness or ill-nature will communicate a cat-like quality to the singing, as infallibly as they give a quality to the speaking voice. That there really exists amiable tones is not an unfounded opinion. In the voice there is no deception: it is, to many, the index of the mind, denoting moral qualities; and it may be remarked that the low, soft tones of gentle and amiable beings, whatever their nusical endowments may be, seldom fail to please; besides which, the singing of ladies indicates the cultivation of their taste generally, and the embelishment of the mind.
- It has only recently been discovered that in the district of the river Amoor, Russia possesses a gold field which explorers of those parts are inclined to consider the richest in the world. Gold-washing and gold-digging is going on in the tributaries of the Russo-Chinese frontier stream and their valleys, and repay the persons engaged in it so abundantly that laborers earn from fifty to one hundred and fifty robbles in silver per day. To make these treasures available for western industry, a company has been started at St. Petersburg, working partly with English capital, to navigate the Amoor by a regular steamer service.
- Some idea of the growth and importance of our trade relations with Japan appears from the following figures: In 1860, the trade carried on in American vessels amounted to but \$\frac{1}{2}\sigma\_0\
- The number of mercantile failures in the United States during 1871 is reported at 2,915, the aggregate amount of liabilities being \$85,252,000. In 1870 there were 3,551 failures, aggregating \$88,242,000 liabilities, and in 1869 there were 2,739 failures, with \$75,054,000 liabilities. In 1867, the aggregate liabilities of failures during the year were over \$97,000,000; in 1861, over \$367,000,000; in 1858, \$50,000,000, and in 1857 over \$291,000,000; considering the great growth of the country, the showing for 1870 and 1871 is not so bad.—The Week.
- The official exports of treasure from January 1st to March 1st have been as follows: Overland to New York, \$274,014.61; to China, \$483,744.17; to Japan, \$100,281.13; to Manila, \$170,000; to Central America, \$90,235.22; to England, \$383,365.89. Total since Feb. 1st, \$1,503,641.02. Previously this year there was exported \$1,883,890.01, making a total since Jan. 1, 1872, of \$3,187,021.03, an increase of \$526,928.55 over the corresponding period in 1871.
- France appears to be going to work in earnest with her patriotic gift, and one hears of workmen giving up a day's pay per month. Towns, corporations, etc., are subscribing in a most laudable manner, and rumor speaks of no lady at a ball consenting to dance under half-a-franc east into the national strong box. The effect of this tax will probably be severely felt by elderly gentlemen who will be unable to refuse a patriotic quadrille,
- The Committee on Commerce in the Honse of Representatives, February 28th, agreed to report a bill for the encouragement of American commerce, to the extent of subsidizing the building of from and wooden lines of ships at from \$10 to \$8 per ton, according to the size of the ships, and to the aggregate of 500,000 tons of such vesse's; but they must be of American construction.

## Our Mineral Wealth.

In Amador county all the mining claims are yielding remarkably well; the average rock from the State of Maine mine pays \$33 to the ton. In Butte county a party of prospectors lately met with good lack at "diggings" about 25 miles from Chico, the pay dirt panning out at the rate of from ten to twenty cents per pan. In Calaveras county a very rich quartz lode has been discovered near West Point, the top rock paying \$30 per cargo of 300 bs.; mining operations are carried on in this county with great vigor and success. The Visalia (Tulare county) Delta says: "A Spaniard recently made the discovery of a rich silver lode at the head of King's He informed his friends, and about twenty-five members took up claims, which they are at present engaged in opening. It is believed the ore will pay \$400 per ton." The North American mine, Sterra county, has been sold for \$5,000. The Keystone Quartz mine, of Amador, yielded \$60,000 for January. Cerro Gordo mine back of Los Angeles, has turned out 350 tons of base bullion in the last sixty days,

Dack of LOS Algeles, has utried out 350 tons of mass million in the mass says days.

A New York telegram of February 16th to the Yreka (Siskiyon) Journal says.

"That the capital has been secured to proceed with the proposed enterprise of opening Yreka Creek. The sum of \$60,000 will be immediately forwarded to partial to the proposed of the process opening French (1982). The sum of spaces with a beyond the property on the line, which has been bonded for that amount, and in a few months we may anticipate a large force of men to commence work on the building of the tunnel. This tunnel will be the means of affording drainage of the vast basin in which Yreku is located, known to be rich with the precious metal, prospects having been obtained in every direction from twenty-five cents to \$1 to the pan. In Bildorado county, prospecting has been extensively engaged in during the last seven or eight months; the Bila quartz lode in Hoggs' Diggings is giving rock averaging \$50 per ton, and all prospectors have met with uniform success throughout the \$50 per ton, and all prospectors have met with uniform success throughout the county. In instancing the extraordinary richness of the Alida Valley mines, Inyo county, a correspondent of the Independent says: "The Gold Mountain Mindag Company have more than one well developed lode that yields large quantities of ore that will work above \$2,000 per ton. Mines of this class are not limited to one or two localities, but are tound throughout a vast expanse of that desert region, which, ere long, will make a big noise in the mining world."

In Mariposa county, the Washington and Quartz Mountain mines at Hornitos are getting out splendid ore. The Mariposa Gazette says: "The new Pool vein is the richest thing in the way of quartz that has ever been struck in this vicinity. Will-lams & Martinez have taken out several thousand dellars in the asst month.

liams & Martinez have taken out several thousand dollars in the past month. Far-rias & Co. the same, Martinez & Valencia (from the same lode) took out between rias & Co. the same, Martinez & Valencia (from the same lode) took out between 87,000 and \$8,000 last week, and more in sight. Jack Mossman took out 40 ounces last Friday, and more in sight." Webster & Co., of Squirrel creek, Plumas county, it is reported, are taking out as high as \$18 per hand. Some miners on Hogges old diggings, Placer county, on March 2d, washed out \$1,800 in gold nuggets, one of which weighed 90 ounces. A recent strike at Randolph Flat, Nevada county, is causing much interest, the decomposed quartz vein paying from \$2.50 and \$3.00 to the pan. The following favorable news we take from the San Diego Union: "Never since the discovery of the mines in this county have the prospects appeared so flatsince the discovery of the mines in this county have the prospects appeared so flatering as they do at present. In the different districts nearly all the leads are being worked, and the mills are all running except one or two, and their idleness is explained satisfactorily." The san Diego Bulletin furnishes the following interesting facts: "The total amount of bullion shipped from San Diego during the year 1871 through Wells, Fargo & Co.'s Express is \$116,000, nearly all of which was from the Julian mines. Frank Lawrence, agent of the Company, to whom we are indebted for the above information, estimates that \$25,000 has been shipped through other channels, making the total \$111,600. At the rate the mines are being developed we calculate that the yield for 1872 will be half a million dollars from the Julian mines. All reports from the mining districts of Nevada are of the most flattering kind, and give highly favorable accounts of the development, working and product of the

and give highly favorable accounts of the development, working and product of the mines. In Colorado and Montana, large shipments of bullion evidence very profitable mining operations and the rich quality of ores obtained. To illustrate the latter we will quote one instance from the Colorado Union: "The average ore taken from the Eagle Bird mine yields 206 oz. per top, and the highest assay obtained from ore in this mine is 3,700 oz. per ton, or \$4,900 in coin value." Judging from the continued repetition of most encouraging news from all our mining fields we are assured, the gold product of the Pacific slope for 1873 will even exceed the estimated large yield of statisticians.

# Wages and Morals.

We used to pay a woman four dollars a month to do the general work of a family. For that sum she was willing to cook, wash, iron, serub floors, pump water, carry full pails to every part of the house, keep the lamps clean, full and trimmed, with et ceteras almost infinite. But we had to keep our stores under lock and key. Do mestic theft gave much to do to the police. Now, an Irish lady condescends, in meant their gave inden to do to the poince. Now, an irish hay condescends, in consideration of thirty dollars a month, to prepare our meals and wash and iron our clothes, provided we supply her with a table and an apartment equal to our own, provided the Spring Valley Water Company and the Gas Works attend upon her as faithful servants at our expense, and provided our range, washing and wringing machines are of the latest and most approved patterns. But now we need not lock up our cupboard. Axiom: The dignity of labor results from high wages. Other axiom: Now it is the employer who has to steal, in order to support his servants.

## Henry Ward Beecher on the Darwinian Theory.

Henry Ward Beecher, in a recent sermon, said: "There has been so much light and darkness thrown by recent research as to the origin of man on earth that men need to be taught as to what are facts and what are fancies. That speculative deductions from scientific facts have worked and are working mischief is undeniable. Obcomes from seeman case have a more amount of the seeman and seem their ears, and will have the race, it may certainly be said that the old chronologists were incorrect and imperiod. Man began after back than the six thousand yet is they fixed for his beginning. The Scripture do not undertake to meddle with this they fixed for his beginning. The Scriptures do not undertake to meddle with this question, and in removing the date of man's appearance we do not unsettle them. All present organizations have probably developed from previous forms. The divine method of creation was through a long series of gradually-occurring developments, so it is only the method of operation which need be doubted: the operation itself remains the same. Concerning mankind there are three views : First, that the race descended from one pair in Eden, who were originally perfect, but who degenerated through some moral delinquency, and whose descendants, inheriting their badness, have been plunged into ad sorts of moral confusion. The second view is that, according to the Bible, there were several distinct origins, and that this is true of only one line of the race; and the third view regards man as but the extension of the animal kingdom. This view gives great offence to common people on moral ground, and also for scientific reasons it offends many. Logicians say: 'It is a reasoning that, like the kanzaroo, proceeds by mighty jumps. It is an instance of philosophical imagination rather than of philosophica research and deuction.' It is not to be denied that there are multitudes doubting—ay, and unbelieving-because of these speculations; they have also tended to enhance the power which makes the strong domineer over the weak. These serve to make the negro not a human being in the same sense that a Caucasian was. The plane of the Ethiopian seemed that of service. A new theory of rights has thus come into vogue, that right is only a question marking certain degrees of position and power. "There are now two points presenting themselves for consideration. First, the present of the pr whatever theory prevails as to the origin of man cannot after the fact that man came into the world by divine method; and, secondly, as far as our duty is concerned we are more interested in knowing what he is than how he came to be here. Man may be studied; it is for us to know of what he is susceptible; and this is of more importance than what road he took to get where he is now. myself, I am a patient waiter for light. I neither accept nor reject, but I am bound to say that my faith is not afraid to take light from whatever source it may come. The truth is better for us than anything else. As to the present condition of the human family I am very clear and confident. The race of man is, in every respect, so much one that we are all heirs alike of moral benefits, however we came here.

God made all mankind of one blood.
"I reach out hands to Science. I believe it to be God's elect, not yet knowing its own mission. It is a means God has used to reveal Himself more clearly. All hail to the men who think and search! I bid them speed; but I cannot afford to say to any deductor, 'Take my faith.' That is too precious to be abandoned. My greatest desire is to see a higher spirit of sympathy for every good and progressive

work on the carth."

The leaders of the Bohemian Club movement have been obliged to abandon the original design of having it an association of journalists. As we are not a member of the Club, it is a matter that does not personally concern as whether it is composed of journalists or jackasses; if we now a member, we should prefer that he latter should predominate, a We pause to foregive the inevitable rejoinder that our presence would materially further that prodominance. We are proud to confess that we have more in common with the average San Francisco journalist. You have never seen him wear his owner's collar, knowing it to be a budge of disgrace. These things a jackass has never done; and these many a San Francisco journalist has done, and does. This it is that renders acidle of journalists in this city undesirable, and would make one a stench mits own nostril. Better a thousand times that it should open its cosmogelitan doors to the Knijch of St. Crispin, the Ancient and Frish-like Drand, the Young Christian, the Scavenger, and the Hoodlum. Better that it should comprise the lift of Barbary Coast and the hand ton of Dupont street. Better -0, bother comparisons between people of incomparable ampleasantness. Sam Williams, we are going away; to thee we delegate the duty of upholding the independence of the profession. The unspeakable extipation of the noxious brood of sycophants and tondies, we beg thou wilt set thy avenging hand. Smite hard, O valuant We shream, and let we want to the drops upon thy shoulders! Wear it, Sam, and see thou soil it not, or, by the red right arm of Ahrimanes, St. David shall not save thy pelt from an intricate system of intersected welts!

Levy, the cornet player, goes to Russia, under engagement to Prince Galitzin, at a yearly salary of over \$10,000.

## Little Chinchilla.

A SKATING SONG.

She wears the shortest skirts, And shows the whitest frilling; She looks, as Queen of Flirts, Miraculously killing! She'll skim the thinnest ice, As light as Queen Camilla; She looks supremely nice-My little pet Chinchilla. Oh, should the gracious fates, But deign to be propitious, I strap her fairy skates On furry boots delicious. Her willing hand I take,
In spite of Aunt Priscilla;
Then speed I o'er the lake, With little love Chinchilla ! The daintiest of doves, With roses on her real-skin. With tiny hands in gloves
Made of the softest seal-skin; A gossamer white "cloud," She wears like a mantilla; I'm soon lost in the crowd, With little sweet Chinchilla!

The warmth of her regard I take as sort of token : Although 'tis freezing hard, Our social ice is broken ! Coquettish in her furs, She minds not my manilla: Ah! what a glance is hers, My little dear Chinchilla! She'll figure, glide and twiri, And worry the officials; She'll cut out every girl As easy as initials! Oh, I could skate for miles, Or dance a seguidilla, Cheered by the sunny smiles Of little smart Chinchilla? Had I enough a year To find my sweet in sable, To wrap my dainty dear In ermine were I able; Had I a longer purse,
A neat suburban villa, For better or for worse. I'd take my pet Chinchilla !

-The Dark Blue.

## Eastern and European Dottings.

London had her thanksgiving celebration February 27th in honor of the recovery of the Prince of Wales. The spectators were numbered by millions. Celebrations were also held in India, Berlin and elsewhere on the continents of Europe and Asia. — The Firth and river Tay, in Scotland, overflowed on the night of the 24th instant and devastated the adjacent plain. Part of the city of Daudee is rendered uninhabitable. - Cluseret is at Geneva, Switzerland, and is said to be attempting to loment a rising in the south of France.—Antwerp was imminently threatened with a riot on account of the meeting of the Legislature there.—Chambord is with a riot on account of the meeting of the Legislature here.— Chambord is being backed by the Pope, operating on the French bishops, for ruler of France.

— Five distinct shocks of an earthquake were felt at Leghorn, Italy, on the 24th instant.—A meeting of citizens of Antwerp, held Feb. 24th, adopted resolutions protesting against the further stay of the Count de Chamford in that city.—Russin is proffering friendly overtures to the Polish dominions, in order to conciliate the Poles of Galicia, whomshe wishes to seduce from their Austrian allegiance. —The Radicals of Spain are seeking to form a coalition against the new Ministry.
—The Japanese Embassy arrived in Chicago, and were received with all the honors by the city officials.—The report of the death of the Mexican revolutionary General Portlan Diaz is confirmed.—The revolutionist General Gomez Portugal has occupied the Mexican city of Aquas Calientos. The State of Chinahua is sending troops to the revolutionist General Trevina, whose army is increasing rapidly.—Many ladies are making applications to the Japanese Charge increasing rapidly.—Many ladies are making applications to the Japanese Charge d'Affairs at Washington for situations as clerks in the Internal Revenue Bureau of Japan.—Small-pox is in Washington, D. C.—Balfimore is in a high state of excitement over the discovery that one of its most accomplished clergymen has seduced several young lady members of his church, and then decamped, Jeaving an interesting family behind him.—The revoliting tribes of India have surrendered to the English forces, and all their country is subdued.—Before leaving Chicago last Tuesday evening, the Japanese Embassy presented to the Chicago relief fund \$5,000.—The total rainfall of this season at Nevada City, according to the South Yuba rain gauge, corrected, is 67:23.—The survey of the North Pacine Railroad Company is helig propagal above a variefly as the year with well were in the latest and the control of the North Pacine Railroad Company is helig propagal early and the variety will nearly the propagal to the control of the North Pacine Railroad Company is helig propagal early and the propagal early will nearly the propagal early the propagal early the propagal early will nearly the propagal early Yuda rain gauge, corrected, is 64:23.—Ine survey of the North Pacine Rainbad Company is being pushed shead as rapidly as the weather will permit.—The Los Angeles Near says that twelve hundred bars of base bullion, weighing about fifty-four tons, and valued at \$15 per bar, were delivered at the depot in that city for shipment to San Francisco on the 19th.—General Sherman and party had a picnic among the ruins of Pompeii, last Saturday.—Judge Davis' acceptance of the Labor Reform Presidential nomination will incite the "Passivists" to renewed. efforts to press their policy upon the Democratic National Convention,—Washington advices say the Administration has determined to make certain changes in the Federal offices in California, in order to divide the patronage more equally between Messrs. Cole and Sargent.—Judge David Davis (Republican, and appointed to the Supreme bench by Presidentia Lincoln) is hinted at by the Chicago Temes, a leading Democratic paper, as the probable Presidential nominee of the Democratic party.—All mails from Australia, China and Japan to Europe will be carried by the way of San Francisco, Chicago and New York as cannot the tries. Democratic party.—All mails from Australia, China and Japan to Europe will be carried by the way of San Francisco, Chicago and New York as soon as the trips of steamers are doubled by the aid of fuller subsidy from Congress.—Washington gossip says the acceptance of the nomination for President by Justice Davis, on the Labor ticket, will probably induce the Democrats to indorse him. It is also thought he will be indorsed by the Liberal Republican National Convention to

meet in Cincinnati, and that the State of Illinois will be carried for the Davis ficket.—The bribery investigation committee of the Kansas Legislature report that in 1867 much money was used to influence and corrupt members by Pomeroy, that in 1867 much money was used to influence and corrupt members by Pomeroy, Carry and Fuller, Chited States Senatorial candidates; also, that Senator Caldwell and ex-Congressman Clarke were guilty of bribery and corruption. Caldwell stated that his election cost him over \$180 000, and that ten per cent of this was paid to Governor Curry.—It is now setted that Horace F. Clark of the Vanderbil: party is to be elected President of the Union Pacific Railway on the still follow the Control of March. Torn Scott of the Pennaylynnia Central now promises to push forward the Southern Pacific as rapidly as possible.—A French naval force is guarding the British Channel against an expected invasion of Bonaparties from Fargiand.—A Direction trained against an expected invested in publications and in additionable two decembers, Italy and Australia stalked of, and it is said that is the mission of Prince Frederick Characs at Rome.—The queen has presented her groom, John Brown, with a good meetal, and granted him an annual of £200, for his promptness in arresting O Connor when he assaulted her Majesty .- The marnts profit in a directory of the Marquis of Bute takes place on the 16th of April. — In the debate on the bill imposing penalties for connexion with the International Society. Louis Blanc declared the passage of such a measure would throw France back three centers. Daine average or passage of siten a measure white their range oas Spanish Ambussador at Washington has been decided.—The donations granted by the German Emperor, on the anniversary of the entry into Paris, have given rise to much man Emperor, on the anniversary of the entry into Paris, have given rise to much comment on account of the bargeness of the sums disposed of. It is said that Prince Charles, Generals Von Morlike, Von Roon, Von Tweitel, and the Duke of Bavaria, received each 30,000 thalers. — Pere Hyacinthe spoke in a Protestant meeting at Rome, on the 4th inst. — At Kingston, Engand, a party of royalists broke up a Republican meeting. Ogden, M.P., one of the speakers, barely escaped with bis life. It is said that the Pope will soon depart from Rome. — A ministerial breaken is expected in France upon questions touching the church and the rights of the press. — The operatives in the Leeds flax muls have struck for nine hours as a day work. — Garibaldi has been elected an honorary member of the Society of Interparanche of New York. — It is believed in Refus the Empary William and work.— Garbaldi has been elected an honorary member of the Society of Internationals at New York.— It is believed in Berlin that the Emperor William will decide the San Juan boundary case in favor of the United States.—Gov. Palmer, of Illinois, declines to stand as the Presidential candidate of the Reform Republican Convention, to assemble at Cucimiant next May.—Merchants in New York who testified before the Senate Custom-honse Investigation Committee are now being subjected to base and rigorous persecution by the Custom-house officials who were exposed and criminated by such testimony. - The Japanese were received with all due and customary honors by the President. - The celebrated Tichborne case is closed, so far as evidence is concerned. -Bismarck, having been attacked by the Polish members of the German Parliament on the 8th ult , replied by threatching to establish the German language in their country. - A Prince of Servia is about to marry a Russian Princess, and it is predicted that this marriage will have an important influence in driving the Turks from Europe.

#### Insurance Commissioners.

The appointment of Insurance Commissioner by the Governor, again illustrates the judgment and independence of Newton Booth. The new appointee, Mr. J. W. Ford, is acknowledged on all sides to be competent and to possess all the requisites necessary for the faithful discharge of the duties of his position. The point where our admiration of the Governor comes in, is just here: The law antheorizes the insurance companies to nominate, and the Governor to appoint. The insurance companies did nominate, and His Excenery did not appoint Mr. A. G. Stiles, late President of the defanct Occidental Insurance Company, and a highly meritorious candidate. The nomination of Mr. Stiles was, under the circumstances, indeficate, and the appointment of Mr. Ford ilastrates the fact that the Governor is assensible and resolute toward insurance combinations as he is toward Rugs, etc. While it is our pleasure and our interest to encourage all moneyed insultations and to promote all enterprises employing capital, we admire a man as Governor who is sei-rehant and independent in discharge of the duties of his office. We have great pleasure in referring our readers to the companies of California, to be found in another column.

— We observe that Mr. Bernhard Marka, in the only sensible, pointed, grammatical and witty letter he ever wrote, has "catawampously chewn up" Mr. Bungletoe" of the leall, who had incautiously displayed his gross ignorance of matematics, in criticising a definition in one of Mr. Marks school books. For the first time we suspect who Mr. "Bungactoe" is: the tull working power of our gigantic intellect never having been previously centered upon that absorbing problem. We wish that the pestilent fellow were not a personal friend of ours. Blast him! wed expose him. Query: Can a man who does not know the meaning of "perpendicular" property claim the protection of a tender personal regard! We have never been sorely tried till now. Mite, Atom, Mathematical Point, you owe us a bottle of hock!

London, with a population of 4,600,000, has only nine daily newspapers-five morning and four evening-while Paris has twenty, and New York twenty-four.

## Taxation of Church Property.

The student of history is well aware of the bitter war that has existed between the political and the ecclesiastical principle held that the industries of the people should be taxed for the support of religious teachers, and the freedom from taxation of all buildings and property owned by religious bodies. The defenders and advocates of the political principle held that equal and just taxation of all property was the only true and enlightened system of taxation. The success of the American Colonies was the first marked step in defense of the political principle. The contagion fled to Europe, and the free morary triumph of the French Revolution was the next step in the vindication of this principle. The Napoleonic invasion of Spain sowed the seeds of equal and just taxation in that country, but the triumphs of Wellington on land and Neisson on sea destroyed the germs of the political idea in that country. Thus, by one of those strange and inexplicable historical combinations, the arms of England, ever wielded in defense of civil and religious liberty, overthrew both in Spain. But even in the most enlightened political governments, thinkers and statesmen have been slow in enforcing the political principle of taxation; not because it was not just, but because the masses were deeply attached to their religious teachers, and consequently too great a violence done to the property of pricests and the church would have produced revolutions dissertons alike to political and religious towards an ideal manhood, free, noble, and liberal; but the masses advance with a painfully slow growth from ignorance and superstitions to complice dissenthruliment from their chains. Even in England and the United States the principle to tax church property has in this age fanatic and able opponents. We observe that a bill is now before the California Legislature for the taxation of church property. There can be no doubt that this bill will meet with a bitter and strong opposition, but we hope there will be enough of vitality, power and m

There is fire in the stars, and in the grass and glow-worms; yet our hair is not singed, nor does walking in a meadow scratch our feet. The sun takes up more water from the sea than is needed for drink and vegetation, and nobody knows why it does it. Men go to war, and rubbits run over ledges; and it is fear that inspires alike the man and the rabbit. A diamond repels the lightning, and charcoal invites it; yet charcoal and diamond are one carbon. A sunbeam striking upon the plumage of a bird is converted into song, but remnus a sunbeam. These, friends, he mysteries of exceeding mysteriousness, but a creater than they is this; By the printed programme of the exercises attendant upon laying the corner stone of the New City Hall, it appears that the Town Crier of the San Francisco News Letter was inclosed in the copper cusket, along with other trumpery and curios, and deposited in that caverned monolith. Yet list and ye shall hear him; behold he is with ye still; to vex and to plague -to censure the things wherein ye differ from himself, and to camp upon your trail! This is passing strange, and subducth the soul as a blanket overcometh a woman affame, or an inverted tub trimpheth above a howling pig. There are doubtless those of ye who would have it otherwise—who would fair believe that the programme spake truly in this matter; but it didn't. No future antiquary shall unbox the bonework of the T. C. from the moldering ruins of that edifice, remarking, "There were giants in those days!" but the post-willenial photographer shall consume with ency at the work days!" but the post-willenial photographer shall consume with ency at the work days!" but the post-willenial photographer shall consume with ency at the work days!" but the skins of wild beasts indifferently versed in art, but the horrid!"

### "La America Ilustrada"

Is the title of an illustrated Spanish journal published in New York. The first number is before us, and we must confess that for richness and variety of ear reases, typographical neatness and general appearance, it surpasses any of the illustrated Eastern weeklies published in English. The tropical and Oriental artistic externs have great warmth and life-like power. As a literary journal, La America Rustrada takes high rank. Among its special contributors are such eminent Spanish American writers as Sedona Juana Manso, member of the Committee of Public Instruction of Buenos Ayres—a noble woman, whose labors have been incessant in the cause of popular coluention; Hon. Automio Flores, Minister of Ecuador in Washington; Professor Mantilla, of the New York University; Don José Autorio Calcado, a Member of the Spanish Academy, and the most distinguished of South American poets. Other writers of no less distinction contribute to its columnatus, and the state of the special object the diffusion among Latin-Americans of "those political and social principles which have raised the United States to its actual splendor." Not only Spanish-Americans, but every person speaking the rich, beautiful and vigorous Spanish language, will find £a America Rustradag, fountain of intellectual wealth and artistic beauty. Published by J. C. Rodrigues & Co., New York.

### Attempt to Assassinate Queen Victoria.

In strange contrast with the extraordinary exhibition of a nation's localty, as exhibited in London on Tuesday hast, when occurred the grand ceremonies over the recovery of the Prince of Wales, is that cowardy act on the Thursday following, by which a would-be assassin attempted to take the life of the universally beloved Queen of England, Victoria. London dispatches of the 29th instant contain the following in reference to this extraordinary affair: "A miscreant this afternoon leveled a pistolat Queen Victoria while she was riding on Constitution Hiit. He was arrested. An official statement of the facts was promptly made in Parlament this evening, which, when it became known outside, greatly relieved public anxiety. Which the House of Lords was in Committee discussing the Ecclesiastical bill, Lord Granville entered and stated that at hall-past five this evening, the Queen, in returning from a drive, had reached Buckinghum Palace, and as her carriage stopped at the gate, a young man run to its side and presented a pistol within a foot of the Queen's head. The Queen bent her head down to avoid the shot, but the pistol did not explode. The fellow in one hand held papers granting releases to Fenian prisoners, which he shouted to the Queen to sign, threatening her at the same time with the pistol. He was instantly seized by aftendants and prevented from doing lurther harm. It was then found that the pistol was unloaded, and that it was of she has often before exhibited. She directed that a statement of the circumstances be immediately made in both Houses of Parliament to prevent exaggerated reports. The Duke of Buckingham expressed the thankfulness of the House at the escape of her Majesty. Was very calm, and showed the courage which she has often before exhibited. She directed that a statement of the circumstances be immediately made in both Houses of Parliament to prevent exaggerated reports. The Duke of Buckingham expressed the thankfulness of the House at the escape of her Majesty. Gladstone made a statement in

### Presidio.

There are several reasons why Mr. Cole should withdraw his bill for leasing the Presidio Reservation to this city for a public park. One is, that we have already secured a public park which, though not the best that can be imagined, is as good as we can get. Under the management of the Commissioners, it is already blossoming like the rose, and in a few months the whole eastern end of it nearly three hundred acres—will be as delightful a spot as one may descerate with his presence. Without a doubt some future Legislature will provide for the improvement of the whole tract, to the sea shore; and then what will be the need of another park? We cannot affort to improve two parks, and as we have already made a vigorous beginning upon one, let us finish that before making another issue of bonds for a second. Another reason is, that since the repeat of the Montgomery Avenne bill there will be no way to reach the Presidio Park if it is granted to us. As it is now, you must either clamber a chain of high hills, or go a mile round. Unless there is satert in it some landgrabbing swindle, we hope the bill will not pass. If it is a swindle, we withhold our judgment until we shall learn who are the interested parties.

#### Vine, Wine, and Brandy.

The California Vine-Growers and Wine and Brandy Manufacturers' Association, through its Secretary, addressed a letter, on the 6th ut., to Gen. Naglee, of San José, inviting that gentieman to attend a meeting of the Association held in Sacramento on the 21st of Fébruary, and accept the position of Chairman of the Committee on the Manufacture of Brandy from the Grupe Gen. Naglee in his reply regrets that owing to previous engagements it was impossible for him to attend the Convention or accept the position of Chairman. He, however, heartily assures the gentlemen comprising the Association that he is with them "in all that may be done to encourage the growth of the grape, to ascertain and encourage the selection of the best varieties of the same, and to facilitate the diffusion of all kinds of Knowledge that may improve the quality of the wine and brandy produced." Want of space compels us to omit the publication of the letter of General Naglee in tull, since it is very interesting. The author gives a graphic sketch of the cultivation of the vine and the distillation of brandy from wine, both in France and the United States. His own personal experiments in this important trade have been crowned with success.

We are glad to welcome back to our State the Right Reverend Bishop Kips and his excellent lady, who have been spending some months in the Eastern State. They returned upon she stemmer Atroka, and thus fortunately escaped the long and tedious snow blockade in the Rocky Mountains. We do very sincerely regret that the Bishop sreception of our ticineted and Reverend friend, A. C. Garrett, was of so frigid a character as to determine Mr. G. on the acceptance of a call some "ten thousand miles" away from the benighted flocks of our local hatep-folds.

## The Wheat Crop for 1871-2.

The Sacramento Union tells us: It is estimated that there is or will be planted in wheat this year all over the State an area one-fourth greater than that of any prewheat any year. In the San Joaquin valley there will be as much land of any necessary of the counties of Merced and Freeno as there was last year and in 1869 in the county of Stanislaus. In 1869-70 Stanislaus had nearly 200,000 acres in wheat, and the yield of Stanislaus. In 1809-70 Stanislaus had nearly 200,000 acres in wheat, and the yield was 3,060,000 bushels. In 1870-71 the acreage was 300,100, but owing to the drouth the yield was but four bushels per acre. That year, according to the Stanislaus News, there were but 12,000 acres planted on the west side of the San Joaquin river. This year the acreage in that division of Stanislaus County will be from 30,000 to 40,000. In 1869-70 the yield was 15½ bushels per acre. If the same average is maintained this year upon the acreage planted and yet to be planted in that county, say 330,000 acres, the yield will aggregate 5,000,000 bushels. The News estimates six millions and a half, but this would give an average of nearly twenty bushels per acre, which we think can hardly be maintained. At the lower estimate of 15th bushels are acre if Mercad and Freno what only as much as Stanislaus. offshie per acre, if Merced and Fresno plant only as much as Stanislaus, and San Joaquin as much as in 1869-70 (120,000 acres), the aggregate wheat yield of the San Joaquin as much as in 1869-70 (120,000 acres), the aggregate wheat yield of the San Joaquin, Calaveras and Mokelumne valleys will not fall short of 13,000 acres. bushels. The yield of the entire State in 1869-70 is stated in the report of the Surveyor-General at 17,041,190 bushels; the following year at 17,288,534. The sea of the greatest yield (1869-70) the counties of San Joaquin produced as follows:

	Bushels.		Bushels.
Stanislaus	3,060,000	Tulare	62,000
San Joaquin			
Merced	450,000	Total	5,145,000
Fresno	52,000		

That left 13.886,190 bushels for all the other counties. Should these other counties this year yield only as much as they did in 1869-70, and the five counties above quoted as much as the estimates of local residents (13,000,000 bushels), the total field of the State will be over 26,000,000 bushels, whereof we shall be able to spare 18,000,000 for export.

#### Presentation.

Mr. N. J. Hyman, for a long time manager of the jewelry business of Mr. Robert Mayers, and now about to go into business for himself, has been presented by his late employer with a very handsome gold badge, or medal, as a token of esteem. We are pleased to subjoin a copy of the letter accompanying the presentation:

SAN FRANCISCO, February, 1872.—Friend Hyman: As you are about leaving me, and I hope sincerely, to do better for yourself, and have expressed a desire to receive from me a small token for a New Year's gift, inclosed you will find such token; its intrinsic value is trifling, as you desired it should be, and I hope that hereafter, whatever our relations may be, we shall live and die friends. I am only sorry that the memento is of such an insignificant nature, but can assure you that you will always find in me a friend in consideration of the faithful manner in which you have studied my interest during the many years you have been with me.

Respectfully yours,

ROBERT MA

ROBERT MAYERS.

This token of esteem is a very handsome solid gold medallion of California workmanship, magnificently engraved, quite novel in dest<sub>2</sub>n, and is one of the finest specimens of work in gold that has been made in San Francisco for many years. On its front the following is engraved and enameled in old English letters: "From R. Magers to N. J. Hyman, 1872." On the other side the following is handsomely engraved: "As a Mark of Esteem and a Shiph Recognition of his Fidelity."

A paragraph in a recent number of the London Standard states that the King of Italy has conferred the decoration of the ancient Order of St. Maurice et lazare, on Edward Whymper, Vice President of the Alpine Club, etc., in recognition of the value of his recent work on the Alps. The book was the result of some tion of the value of his recent work on the Alps. The book was the result of some fourteen years climbing, sketching and studying the mountains. Mr. Whymper is one of a family of artist litterateurs, and brother to the author of "Travels in Alaska," long a resident of this coast, and constant contributor to these columns.

- A very valuable collection of American literary works existed at the Hotel de Ville of Paris. It comprised 12,000 volumes on scientific and literary matters, and a mass of official documents relative to the legislation of the various states of the Union. Placed in order, catalogued, and classified in one of the rooms of the school in the Rue Descamps, until they can be transferred to the new maire, this valuable library escaped the general disaster of the Hotel de Ville.

<sup>-</sup> In the United States Senate, February 28th, Senator Schurz presented a petition with 10,000 and more signers, protesting against the recognition of God or Jesus Christ, as an innovation upon the freedom of religious opinion.

#### " Biz."

The most prominent feature of the week in business circles was the public trade sale of Teas and Spices by S. L. Jones & Co., comprising the entire stock and imports of Macondray & Co., consisting of about 5,000 pkgs. Tea. Black and Green, chiefly of Standard brands of webl-known chops from Chira and Japan. The terms were liberal: ninety days, or, for each, a discount of three per cent, allowed on purchases. In case of a reduction in duties, as now proposed by Congress, the buyer is to have the tall benefit, the bulk of the offering being in bond. The blidding for M. & Co. 8 Japans in papers was brisk: 1,360 hd. chests sold at the uniform price of 62c. The black inequered "Shreid" howes, 3,350, each 3 lbs., sold at 63c: 1,122 boxes, 15, lbs., sold at 61c: 320 do. 5lb. lacquered, "Obversion of 3 lbs., sold at 5 lbs., cold at 61c: 320 do. 5lb. lacquered, "Obversion of My lbs., 643c; 200 do. Frog. each 4g lbs., 55c: 24 do. do. "Swalow," each 4g lbs., 643c; 270 do. frog. each 4g lbs., 55c: 24 do. do. "Swalow," each 4g lbs., 643c; 270 do. frog. each 4g lbs., 55c: 24 lbs. jast costs of 676-68c; Shield, 92 hf. chests Japans, each 30 lbs., in 1 and g. lb. papers, sold at 8c: Fan, 5 lbf. do., papers, 42gc; 50 lbf. chests Dusk, in 1 and g. lb. papers, sold at 8c: Fan, 5 lbf. do. papers, 42gc; 50 lbf. chests Dusk, 41 gc; 440 pain boxes, each 1 g. lbs., Shield and Horse, sold at 8c: 65c. The competition for Green Teas was slight, not warranting their sale, with the exception of a tew sample lots, say 7 chests, Comet Young Hyson, Sc: 18 bys. Gunpowder, 8ke 6c 41: 19 bys. Young Hyson, each 2 lbs., 85c: 24 bys. 6lb. do. do., 92c c: 44 Byb. Ryd. do., 87c c: 22 bys. Imperial, 6 lbs. each, 37gc, 80 lbies Basket Teas, 54c: 10 lbf. chasts Conact "Southons," for Thess Teas, though in bond, were all sold at the "ing price." In addition to the above, on same credit, were sold sample lots of Spices, as follows: Coves, 10 bales, 17c: 100 terms were liberal: ninety days, or, for cash, a discount of three per cent, allowed same credit, were sold sample lots of Spices, as follows: Coves, 10 bales, 17c.; 100 boxes Tapioca, 7c.; 48 cases Sago, 6%c.; 10 cases Cassia, 32c.; 10 bales Black Pepper, 19% c.

The next most important transactions of the week to be noticed, is the large ar-

rivals overland of detained merchandise, several hundred car loads of long expect ed goods from the East having reached us, but no sooner than the goods shipped via Cape Horn, per Sea Serpent and David Crockett; in fact, these two clippers won the race and landed goods before those seat by rail reached their destination, and why? Because the cars were snow-bound on the mountains of the Union and why? Because the cars were show-bound on the mountains of the Chion Pacific Raifroad. Among other arrivals overland, we note severa hundred barrels of S. T. Smit's old Bourbon Whisky to Booth & Co. and W. W. Irodze & Co.; at the same time we learn that our old friend A. P. Hotaang has an order from New York to ship via Cape Horn 50 barrels old J. H. Cutter's Whisky. The object of this is to give the benefit of a double distilled long voyage.

Bags. Important contract purchases of Burlap Grain Sacks standard size have been made at 17c, say 100,000. Gampy Bags. An invoice of 1,000 bits adouble seved Calcutta, ex Memion, soid to arrive, leaving 400 bales yet unsoit, the price asked for latter, 20c.—Coffee The steamship Abska brought up as than 4,000 bag. for latter, 20c. — Coffee—The steamship Alaska brought up ess than 4,000 bag—not half what was expected—thus adding frumers to holders; basers banging back, waiting for the proposed change of duties.—In the anterum, the Spring trade will set in and all will go kiting, — Coal. For a wonder, the market is bare of Berlingham Bay, Coos Bay and Seattle, driving consumers to use Australian and English; Coast Coals named seil by the earge at §10, the Foreign at §150.14.—Dry Goods. Woolen, have all advanced ten per cent. Cottons are also higher. — Malt Liquots are held with more firmness, looking to a short supply from the Old Country. — Metals are all "on the jump," not excepting Pg Iron worth from \$50x50.—Naval Stores are scarce and high.—Oths are plentiful and cheap, particularly Petroleum.—Provisions, over and, are in free supply. Bucon, Ham, Cheese and Lard self readily at 2 good prices. Butter alone is on the descending Cheese and Lard sell readily at 200d prices. Butter alone is on the descending scale. Rice is a drug upon the market. Sugar moves off rapid y at the late decime of two cents per pound. Spices are inclined to advance. Spirits are unchanged in value. Wines are steady, excepting Landsberger's Private ( uvce and Spark-Francisch und Spirits and Spark-Francisch und Spar in value. Where are steady, excepting Landsberger's Private Cucce and Sparing, which is very lively and sells readily at good prices.—Woods attract attention everywhere. Short production the word over, and with an increased consumptive demand tog Woolen Goods. Manufacturers cannot get supplies sufficient to keep their mills running half-time. Bixby & Co., of Los Anaeles, have sold their 15,000 decees to be delivered at Winnington, for 30c., just 5c. more than last year. Hagan & Tevis sold their fine they at 15c, deliverable in Sacrumento; big prices these, and yet speculators are ran-sicking the State, paying as high as 45c for Wool on the beauty hough they extract the for it before she tring. big prices these, and yet speculators are ransacking the State, paying as man as 45c, for Wool on the sheeps' backs, thus contracting for it before shearing. It will be April before the Spring clip comes forward freely. In the meantime, we have received 300 tens Colonial Wools, worth 60c, and more is yet to come. California Wool chy in 1872 promises a money value of \$10,000,000.— The Wheat crop is now exceedingly promising and the export trade in Breadstuffs for a year to come will be all year capsideable importance giving employment to a large fleet. will be of very considerable importance, giving employment to a large fleet of ships and at good freights. Our atest Liverpool quotations for Wheat is 118, 80., which must put a stop to any further export trade this season, even at \$2,00 cents.

The New Zealand Herdit of Jan. 24th baving a correspondent in Samoa witing from Apia, says: "Our usual supply of vessels guano and Sydney traders and among otheritams, the mail steamer, from San Francisco, has been been cere, and intends to form a depot here for coals. An American agent is also here, in connection with a company and the Bank of California, buying up land for settlers. They have already established a depot for trading, and have also purchased over 49,000 to 100,000 acres, intending to buy up 80,000 to 100,000 acres. It is their intention to bring out from the States and England men to settle on it, to cultivate cotton, coffee and other things.

Here American energy will push ahead and take all the trade. They offer to take Here American energy will push ahead and take all the trade. They offer to take cotton to Liverpool for five cents on the pound direct from here. "—The Pacific Mail steamer Alaska, twenty-two days from way ports, brought up a large cargo of 2,000 tons from New York, etc., besides 3,710 bags Coffee and 2,589 bags Central American Sugar. The Dashing Wave, 51 days from Hongkong, to W. N. Olmstead, brought 28,665 bags Rices, 3,210 bales Sugar, 600 packages Tea, 213 boxes Pepper, and lots of Chow-Chow to John Chinanan. The Sea Serpent, 108 days from New

and lots of Chow-Chow to John Chinaman. The Sea Serpent, 108 days from New York, brought a full cargo of general Merchandise to Geo, Howe & Co., and distanced the Overland route, in delivering goods shipped same date.

The New York Times, of February 16th, has a long detailed account of wholesale samegrling in Dundee Goods, wherein W. J. Pollock, who has a business sign upon California street is made to figure quite extensively, and who, by the way, made not long since a large sale of 500,000 Grain Sacks to a prominent dealer in this city. From this account, it appears that: "The leading linen importers of New York experienced a sensible depression in trade for several months. Not that the demand for goods in certain lines had failen off, but because the market segment to be centralled by some particular persons, who offered inducements seemed to be controlled, by some particular persons, who offered inducements in prices that could not be competed with successfully by those who received importations in the regular way. This was specially true of Dundee goods. Finally a solution of the difficulty was sought in a systematic and determined investigation of the subject, and W. J. Pollock, importer, was arrested, and held to bail in the sum of \$20,000. It appears from evidence, that large shipments of linen goods have been of \$20,000. It appears from evidence, that large supments of linen goods have been regularly received per the various Liverpool steamers since the early part of has Summer, and entered at the Custom House under invoices undervalued to the extent of 50 and 100 per cent." Pollock, resident partner here, slipped away very quietly on the last Panama steamer. It is said that princely fortunes have been made by those engaged in these fraudulent operations.

#### The Queen's Letter of Thanks.

The Secretary of State for the Home Department has received Her Majesty the Queen's commands to make public the following letter: "Winnson Castle, Dec. 26, 1871. The Queen is very auxious to express her deep sense of the touching sympathy of the whole nation on the occasion of the alarming illness of her dear sor, the Prince of Wales. The universal feeling shown by her people during those existent sense. so: the Prince of Wales. The universal feeling shown by her people during those painful, terrible days, and the sympathy evinced by them with herself and her beloved daughter, the Princess of Wales, as well as the general joy at the improvement in the Prince of Wales's state, have made a deep and lasting impression on her heart which can never be effaced. It was, indeed, nothing new to her, for the Queen had met with the same sympathy when, just ten years ago, a similar illness removed from her side the mainstay of her life, the best, wisest, and kindest of husbands. The Queen wishes to express at the same time, on the part of the Princess of Wales, her feelings of heartieft gratifude, for she has been as deeply touched as the Queen by the great and universal manifestation of loyalty and sympathy. The Queen capute couched without expressing her hone that her faither the results are the contents of the part of the part of the course of the c pathy. The Queen cannot conclude without expressing her hope that her faithful subjects will continue their prayers to God for the complete recovery of her dear son to health and strength."

Orient Mining Company... The rich and valuable mine owned by this company is located in Ely District, Newada. The parties in possession are reliable men, and several of the prominent owners of the Raymond and Ely are among the original discoverers. The mine is on the main ledge, prospected by a shaft sixty-seven feet in depth, showing a vein of good ore, assaying \$170 per ton. A few shares of the stock are for sale, the proceeds to be used for working capital. The entire number of shares are 10,000. The company has an office in San Francisco.

When a man is raging with disappointment, he is said to beat his breast. We have never seen any person in this condition of mind beating his breast, but it is very natural for a man to wallop the cause of his misery, and inflict pain upon the meanest object within reach.

— It is a great thing for the poets, says an observant contemporary, that "ever" rhymes with "never." But it is a most unfortunate circumstance that "onee" rhymes with "dunce," and always suggests it; thus bringing the poet's personality too clearly into his work.

A professional aeronaut says the voice of a man can be heard at the hight of a mile; that of a woman at the hight of two miles. This is a point gained in our knowledge of the location of heaven: we know that it can not be less than two miles from the earth,

## Laying the Foundation Stone of the New City Hall.

#### INCIDENTS OF THE DAY.

The one hundred and fortieth anniversary of Washington's Birthday was celebrated in this city on Thursday, Feb. 22, in a manner that will long be remembered by our citizens. Never hetore in the history of our State has the occasion been so generally observed by all classes of our people. All stars as the oceasio and real, banks and other places of business were closed, and the streets were crowded with men, women and children in heliday attre.

Early in the morning the city began to stir with the preparations for the exercises of the day. Squads of soldiers were passing in all directions to and from their reof unity squares of some sweet passing in an direction, to and from their respective armories, and private citizens were on the qui rine to see what would happen. The great attraction was toward the City Hail Park, where the corner stone of the new editice was to be laid, with Masonic riles. The streets on which the procession was to pass were lined with the expectant multitude, and they were not disappointed. The day in every respect was successfully celebrated, and it is to be hoped that this occasion will not be forgotten, but that each year we may join in the commemoration of the memory of our beloved George Washington.

#### PREPARATIONS AT THE PARK

The vast area of the concrete foundation, a few feet below the general level of the street and the surrounding lands, afforded ample space for the congregating multi-tude. The arrangements made for the reception of the Masonic fraternity, the militia, civic societies and invited guests, were admirably conducted. The entire northern extremity of the foundation walls, on which is to be built the Hall of Re-cords, was covered with a platform, being circular, and two hundred and sixty feet in diameter. Account this state was a description of the proposed and sixty feet comes, was covered with a paraorin, near circular, and two limited and said retrieved in diameter. Around this space were cleveled seats, capable of accommodating four thousand persons. A temporary board fence was created behind these seats to prevent the outside crowds from breaking in before the procession had arrived and the guests seated.

At the northern end, the corner stone was suspended by strong blocks and At the normer cut, the corner stone was expended by strong blocks and ackles to three heavy pieces of timber a mechanical contrivance technically called shears. The foundation for the stone was several feet above the main platform, and around it was erected a stand for the accommodation of the Master of Ceremonies, Orator, the principal participators in the celebration and the representatives of the press. The stone to be laid was taken from Griffith's granite quarry, in Placer County, and measured five feet three and three-quarter inches long, by three feet eight inches wide, and three feet seven inches deep. The cavity for the recention of the laid of the contribution of the press.

reception of the box containing papers, coins, etc., was two feet long, seventeen inches wide and seventeen inches deep.

At the opposite side of the amphitheater was the main entrance, and a little beyond a triumphal arch, on which were inscribed the words: "Honor and Justice." Above the stand, over the entrance, were raised the American national flag, and those bearing the city and State seals. The inscription on the city arms: Oro in paz: in quarra farm \_gold in peace: in war, iron—was likewise inscribed on the box to be inserted under the corner stone.

Around the patform, and in many other localities, were flaunting proudly the native many of the patform, and in many other localities, were flaunting proudly the Interviously of the patform of all countries. The scene was exceedingly lively and beautiful. In the vicinity, and in neighboring blocks, a fine display of butting was made, and

every available elevated point was early prepared for occupation.

#### THE MILITARY

Companies turned out with full ranks, every company in the three infantty regiments being represented. In their neat and showy uniforms, with bright bayonates, our citizen soldiery made a creditable appearance, and received many encomiums as they marched through the streets. The military came in the following order as they passed the Cuty Hail, shortly after noon: Brigadier-General John Hewston and Staff, Commanding, Second Brigarde N. G. C. Drum Corps, First Regiment, Colonel W. H. L. Barnes and Staff commanding. Veterans Mexican war. Hewston Guarde, and Petaluma Ellsworth Ritles. City Guard. Summer Light Guard. Oakland Guard. Franklin Light Intantry, Hewston Ritles. National Guards, Band. Second Regiment Infantry, Colonel J. W. McKenzie and Staff commanding. San Francisco Cadets. National Cadets. San Francisco Cadets. Sustional Cadets. San Francisco Cadets. San Granting Cadets. San Granti Companies turned out with full ranks, every company in the three infantry regi-Warren Guard. Frisbie Guards, of Vallejo.

There were in all about 10,000 persons on the seats and in the area of the amphitheater; 40,000 spectators on the ground; the streets in the vicinity were lined with from 30,000 to 40,000 more, many coming long distances to see the ceremonies. Never has such a parade been witnessed in San Francisco. With the 3,000 Mysons, and the Commandery, in their magnificent costume, mounted on black chargers. Altogether the sight of the procession was a most imposing one.

#### AWAITING THE PROCESSION.

Those who were provided with tickets of admission were early conducted to Those who were provided with ackets in against of were 'any continuous to seal's within the enclosed area. Others were obliged to wait the coming of the procession. At twelve o'clock the zerounds were filled with a dense multiladed the same on the northwest side of the platform presented the speciace. of a mass of hats, bonnets and faces. Above them, on the crest of the hill, was stationed Bluxome's California Light Guard Battery, with mounted officers. The Second Artillery Band was placed in the center of the scene, and continued to discourse sweet strains for the entertainment of those present. The line of the procession was delayed until after one o'clock before reaching the park, and the exercises did not commence until twenty minutes part two in the afternoon

Meanwhile the people assembled in vast numbers, and it was with great difficulty Meanwhile the people assembled in vast numbers, and it was with great difficulty that the police force kept the seats reserved for those who were to come, from being occupied in advance. To their exertions, in a great measure, is due the credit of the success of the day. Order was preserved in an admirable manner, and, although the seeme was to some extent shut out from the spectators, every one had as good

an opportunity as possible for witnessing the ceremonies.

The rousting oxen were not, as had been reported, converted into soup by the rain of the preceding night, and those who were unable to obtain admission to the principal scene of attraction found amusement in the vicinity of the barbecue and feast preparing for the workmen.

#### ARRIVAL OF THE PROCESSION.

When the procession appeared in sight on Market street the scene was most enlivening. Thousands of people were gathered together and blackened every avenue of approach. It was a grand muster day for San Francisco, and everybody had turned out to honor the occasion.

The first to enter and advance to seats within the amphitheater were Major-General H. A. Cobb and Staff. After an interval of some time, they were followed by the President of the Board of City Hall Commissioners, Hon. P. H. Canavan, to gether with the Orator of the Day, Hon. J. W. Dwinelle, and the Mayor of the city, Hon. William Alvord. Then came the Consular corps, Lieut.-Governor Pacheco, the Board of Supervisors, Board of Education, District Judges, District Attorney,

the Board of Supervisors, Board of Education, District Judges, District Attorney, and officers of the California Pioneers in full regalia.

After another brief interval came the Grand Lodge of Masons, headed by Grand Master Leonidus E. Pratt. They were followed by the Knights Templar, Select Masters and other high members of the Order of Free and Accepted Masons. The stand and the seats immediately behind were quickly filled, and in a short time the gateways were thrown open to the public, who poured in and soon occupied the entire area prepared for the reception.

#### THE SCENE

at this time was very grand and imposing. The temporary fences behind the seats were removed, and there appeared one vast, undulating sea of heads. At least ten thousand persons were closely packed in sight of the stand, and as many more were gathered around outside of the enclosure and elevated spots. Some time was occupied in clearing the way for the principal officers, and in compelling those in front to take seats or retire, when

#### THE CEREMONIES OF THE DAY

began. The band played "The Prayer," from Moses in Egypt, which was followed by an invocation to the Divine Being by the Grand Chaplain, Rev. W. H. Hill, of Sacramento. An anthem was next given by the Handel Hadyn Society, sixty voices joining in the singing. After which

#### P. H. CANAVAN,

Chairman of the Board of City Hall Commissioners, stepped to the front, and addressing the assemblage, said :

FELLOW-CITIZENS: -On the 4th day of April, 1870, the Legislature of California empowered the people of this city to erect a City Hall adequate to the necessities

and commensurate with the growth and greatness of San Francisco.
On the 27th day of April following, by authority conferred upon him, the Governor of the State appointed Commissioners to execute the undertaking

The site selected was the Yerba Buena Cemetery, once the lonely burying ground of those pioneers who died before the long line of noble buildings, which now form the streets around us, were erected.

The first step of the Commissioners, after taking possession of the property, was to consult the heads of all the Municipal Departments, and the Judges of the sev-

eral Courts, on the accommodations to be provided in the new edifice

The result of these inquiries was embodied in a printed pamphlet of instructions and suggestions to architects. The Commissioners found they were asked to proand suggestions to architects. The Commissioners found they were asked to provide thirteen Court rooms, with Judges', clerks', and witnesses' apartments, and jury rooms, Grand and Petit, for each of the principal Courts, suites of rooms for the Boards of Supervisors, Education and Industrial School, the Police, Health, Street and Fire Departments: offices for the Mayor, Sheriff, Assessor, Tax Collector, Surveyor, Recorder, Auditor, Treasurer, County Clerk, Public Administrator, Collector of Licenses, District and City Attorneys, Coroner, Law Library, Fire Alarm and Police Telegraph, the Prison, and many other departments, all requiring transpared acknowledges. more or less accommodations.

On the 23d day of June the advertisement to architects, offering premiums for the five best designs, was published in San Francisco and New York.

On the 25th day of July the removal of the mound of sand which encumbered

the ground was commenced.

On the 15th day of November the competitive plans, seventeen in number, were received and exhibited for public inspection and criticism.

On the 12th day of February, 1871, the premiums were awarded, and the design of Messrs. Fuller & Laver, of New York, bearing the motto Ne cile tono, was unanimously chosen as the best representation of the advanced tasts of the age, inflammonsy chosen as the best representation of the advanced tast: of the age, the nearest fulfillment of the wants of the community, and the most skinful adaptation to the angular form of the ground. This blan had the additional recommendation of admitting of modifications which will permit the general design to be carried out within the limit of expenditure allowed by law.

On the 28th day of August, that port on of the property ordered by the Legislature to be sold was disposed of at auction.

On the 13th day of September, the work on the broad stratum of concrete, which forms the bed on which the future edifice will stand, was commenced. This monolithic hed is from three feet to six feet in thickness, and covers a superficial area of 17,000 yards

On the 10th day of December, the foundation walls, of immense strength, were commenced, and to-day are well advanced, and will, when completed, have an av-

erage hight of cleven feet three inches above the concrete.

On the 16th of January, 1872, the Supreme Court fluxily affirmed the Commissioners' interpretation of the statute under which they are actors, and the last legal

impediment sought to be thrown in their path was swept away

And now we are about to consecrate the enterprise by laying the corner-stone of this vast and magnificent structure with solemnities belitting the memorable occaston. Much has already been accomplished, and the years will not be many before yonder Old City Hall, with its narrow corridors, its close unventilated rooms, and yonder Old City Hall, with its harrow correlors, its close inventibled rooms, and scant and insufficient accommodations, will be abundoned for a New City Hall worthy of San Francisco, and which will stand for ages, the symbol of the resources, the grendeur, and the taste of the Metropolis of the Pacific Mr. Canavan then presented the Master of Massons of the State of California with a silver trowel, and invited him to lay the corner-stone of the New Citf Hall. [The trowel thus presented was a handsome piece of workmanship. The blade

(The trowel thus presented was a handsome piece of workmarship. The blade was of massive silver, the handle of ivery. Upon the former, encircled by a rich border, was an engaving of the front elevation of the New City Hall, as it will be when completed. On the handle were the arms of California.]

The Grand Master, Leonidas E. Pratt, reserved the tool, and in his turn addressed the audience. He referred to the importance of the enterprise which was about to be consecrated, and to the invitation extended to the Masons, to lay the foundation stone. He remarded his heavers of the antiquity of Masonry, and of the practice of the Order to lay the foundation of such handless as were to be devoted to the Central well-being of society. He showed how proper it was that Masons should be consecrated and the showed how proper it was that Masons should be consecrated. general well-being of society. He showed how proper it was that Masons should do this work, bound as they were by their obligations to the prosecution and performunee of such ends and duties as were subserved by the charfable and public in-stitutions of a ration. The concluded by picturing in glossing terms the future of California and San Francisco, and formully accepted the task of laying the stone.

#### THE GRAND MASTER,

Hon, Leonidas E. Pratt, receiving this, the proper and appropriate working-tool of his office and craft, responded as follows:

### GRAND MASTER PRATT'S ADDRESS.

In accepting the invitation the Grand Master spoke as follows:

Mr. Chairman and Fellow (Citizons: The Freemasons of to-day are the heirs and representatives of the practical builders of the olden time. They were operative—we are speculative. Venerable with age and enriched by the ciust ring memories of their labors and achievements, their fame and their art alike have come down to us through the unbroken continuity of many centuries. From a period anterior to the erection of the grand old edifices which still survive to mark both the Orders and the progress of architecture, from the time when Masonry was an operative science purely, we have been accustomed to lay the foundation stones of public edifices; not, however, without discrimination, but such omy as were to be devoted to those purposes calculated to advance the general welfare of society.

We have laid the foundation stones of your governmental buildings; and it was fit and proper that we should perform that service, not only because we are the representatives of the earliest architects and builders, but because Masonry inculentes loyalty to government, obedience to the laws, and devotion to the peace and good

order of society

We have laid the foundation stones of your educational institutions. It was right

We have bid the foundation stones of your educational institutions. It was right and proper that we should render that service also, for it is one of the great purposes of Freemasonry to impart knowledge and understanding. She teaches her children to be lovers of the arts and sciences, and "more light" is the constant demand and aspiration at every stage of Masonic progress.

We have laid the foundation stones of your public asylums—those edifices which spring from the heart-throbs of common humanity; the homes where the unhappy and afflicted wards of society, the mute, the deaf, the insane, the aged, the weary and the indigent, repose in peace and comfort on the charities of the Commonwealth or of individuals. It was appropriate, indeed, that we should do thus, for Masonru teaches with special envalues the years because of charity begrevalue. Masonry teaches with special emphasis the great lessons of charity, benevolence and brotherly love.

But to-day, in the grand and comprehensive purposes to which this edifice is to be devoted, are combined all the reasons which conspire to render it more fitting and appropriate that we should lay this corner stone with all the ancient rates and

ceremonies of our venerable Order.

On this spot shall stand an ediffice devoted to Justice, Order and good Government; and within its walls and beneath its lofty dome, through ages let us trust, shall be administered the vast and complicated interests of the queenly city, where Orient and Occident, under the inspiration of a nobler and progressive civilization, and reaching out to each other over continents and across sens, clasp hands to-day in fraternal grasp. This building is not for a year, a decade, or an age even, but it is for all the marshaled centuries which are coming forward to meet us from the

bosom of the vast and illimitable future.

How great the magnitude of the interests to be here considered and adjusted when the developments of time shall have converted the infancy of to-day into the manhood of a century hence, human foresight may not essay to comprehend. your noble State and thriving city, the future is filled and overflowing with marvel-ous promises. The land listelf is nature's masterpiece recred to bethe last and fairest empire of all time. If we were as faithful in its development as nature has Bartest capping of all tule. In We were a specific production of a not distant future will surpass the wildest visions of the present. Here shall gather people of every land, clime and condition; the young, the active, the vigorous shall come in pursuit of new enterprises and new industries, in search of fortune or adventure, or for the gratification of personal ambition. Here the wealthy shall come in search of health and enjoyment, and here the tourists from every land and the disciples of all learning shall linger to impart their rich stores of thought and knowledge. Here schools and colleges shall be multiplied and richly endowed, and philosophy and religion shall revive and flourish in unwonted splendor. Here political economy and the science of government shall attain perfection; here poesy and eloquence shall find their home; here the arts shall cluster and the sciences shall flourish.

And when the cultivated, happy and contented millions of another age shall stand where thousands only find their homes to-day, may the splendid structure whose corner-stone we lay to-day remain unshaken, to mock the ravages of time. Then, as in our day, within its walls shall be assembled the Municipal authorities, to administer the affairs of a mighty city, to frame and mold its internal policy, to guide and direct its expansion and adornment, to control its educational interests and disburse its charities; and here in solemn judgment the Courts of the land shall

still sit, to do exact and equal justice unto all.

These, Mr. Chairman, in addition to a custom older than civilization itself, are the considerations which render it peculiarly fit that we should lay this corner-stone with all our ancient rites and ceremonies; and in behalf of the Grand Lodge, and in the name of Freemasons wherever dispersed, with pride and pleasure I accept your invitation

Hon, John W. Dwinelle, by invitation of the City Hall Commissioners, then de-

livered the Oration of the Day.

#### ORATION.

Mr. President and Fellow-Citizens :- We are drawn together here to-day to mark

an era, and to give a notable event to history

Our modern civilization is a three-fold product. From Rome we get our concrete Our modern crimination is a infection product. From Rome we get our concrete logic, and the theory and practice of our legislation. From Athens our modes of thought, and the taste for the beautiful and true. From Judea our morals, and that idea of the equality of men in the sight of God, which has resulted in that political equality which we call Democracy

Rome had her capitol. Here were her archives; her Sybilline oracles; her treas-

Rome had her capitol. Here were her arenives, her Syolinhe oracles; her treasury; her mint; the spoils she had taken in war; the Sabine wolf, the symbol of her origin; the temples of the Capitoline Jove, of Juno, and of Minerva.

Athens had her Acropolis. There were deposited her laws; her revennes; the busts of her founders; the portraits of her heroes; the images of her gods; the wonderful statue of her protectrees, Minerva.

Jerusalem had her double hill, where were her temples; the altar of the unseen

God; the Holy of Holies; the City of the King; the treasury; the citadel and the

Courts of Justice.

It may therefore be regarded as an instinct of civilization that every calightened people should select some favored spot and stamp it as the center of its power by the erection of monuments which symbolize at once its advancement, its institu-tions, its culture, its taste and its hopes for the future. And such an event is a

great one.

In such a presence I cannot turn back to the past and recount what we and our comrades have done. I seem rather to be rapt into the presence of the great future. I am not unmindful of that great immigration, unprecedented in all history, which set down at once three hundred thousand adult men, with all the training, wants and aspirations of the highest civilization, in the desert wastes of California. We found ourselves a mere military colony, outside of the guarantees of the Federal Constitution, and our very laws written in a foreign tongue. We were in the midst of chaos, but we knew that the whirling forces were the elements of empire. We felt the spirit moving on the face of the waters, and were sure that the dry land of the continent would soon appear.
On this occasion we east behind us all that we have achieved, all that we have

suffered during the past twenty-five years. The fires and floods, the paralysis of panie, the intestine struggles, in which the higher law of self-preservation was vindicated by the temporary suspension of the law of routine. These are sufferings which live only in memory and no longer in feeling, and whose recollections produce even a said pleasure. Not sor be thought that so many of our comrades have perished by the way. The very soil upon thick we stand is sown with the bones of some of the noblest pioneers that ever cast their lives in the balance to win the destiny of Empire.

> Our comrades' bones are scattered wide, In desert bleak and rushing river; On wintry shore, and on ocean floor, Here shall they rest forever :

while we, not braver nor more worthy than they, stand this day in the presence of that future in which they, too, believed, and to which we, standing over their graves, now give a new date, and of which we thus make ourselves a part. So looked the great leader of Israel from his mountain hight upon the Premised Land. So looked Coimbus, with earnest, straning gaze upon the New World which he gave to civilization. So looked out Cortez and Pizarro pon the great Southern Sea. But we have accomplished more than these men did. We are in possession of the Promised Land. We have found the way to India, which Columbus thought he had discovered, but never reached. We have made conquests in the Pacific Ocean, of which Cortez and Pizarro never dreamed. which Cortez and Pizarro never dreamed.

#### COMMERCE IS THE QUEEN OF NATIONS;

hers is the Universal Empire. It knows neither geographical nor political limits. To her, both civilization and barbarism bring their tributes. Throned upon the

land, she wields her sceptre over the most distant sea.

Twenty-two years ago we looked at the future of San Francisco with the same assured hope which we cherish to-day. And yet at that time we believed that the assured hope when we cheast to any. And yet at that time we denoted that the placers would be exhausted, as they have been; we had no hint of the precious veins in the rocky ribs of the Sierras; nor did we hope that ours could ever be an agricultural State. But we looked at our glorious Bay, mighty enough to receive the fleets of all nations; at the vast Pacific Coast, as yet virgin to systematic commerce; and to the great islands and continents of the Southern Sea; and bothly wrested from the oracles of destiny a prediction of the future greatness of San Francisco.

And here she stands to-day, her population advanced in twenty-five years from 500 to 150,000 inhabitants; among the youngest of the creat cities of our Union, but the third in the tables of the Custom House; the tenth in population, and the fif-

teenth in manufactures.

Not unto us be the glory, "The Lord hath built the house; the Lord hath kept e city." He hath given commerce as her sustenance and her strength. She is not great and powerful, nor will she be enduring in her strength, because she is the metropolis of California, but because she is the metropolis of the whole Pacific Coast and of the great Southern Sea.

Coast and of the great Southern Sea.

And, because she is so great in this element of strength, she is, in this, greater than the State itself. She is more necessary to the State than the State itself. She is more necessary to the State than the State is to her. She is the great entrept of the Pacific Ocean, the great point of reception and distribution, and such she would still be, though she were built, like Venice, on a few sandy islands; like Petre, in a desert, or like Tyre, upon a rock.

"Oh, people of California," I would say, if my words could touch the heart of every citizen of the State; "Oh, people of California, cherish San Francisco.' She is not merely one of your jewels, but she is the very crown of your glory, all gold and lewels. You cannot control her destiny, although you may impede her march. You may make of the State a cattle pasture, and give it a mock Legis ature, which shall represent beasts and not men; you may tax her commerce, and retard bedevelopment; but you cannot defeat her destiny. Or, you may cherish her as your first and noblest born; you may ecople her outlying valless with a hanoy and crifted and problest born; you may ecople her outlying valless with a hanoy and crifted ments and search outling valless with a hanoy and crifted and objects born; you may ecople her outlying valless with a hanoy and crifted and search of the State and not men you may the probless born. first and noblest born; you may people her outlying valleys with a happy and cul-tivated human population, and plant with dwellings, schoolhouses and churches the wastes which now resound only with the tread of cattle and the bellowing of brutes; you may give her a free port, and, above all, you may LET HER ALONE, with

bridges, has now the limbs and unaded strength to work much re-high desting.

So shall she be, for untold ages, the queen city of the vars Southern sea. Into
her lap Commerce shall pour the treasures of the Pacific, while her heart responds

ner in Commerce shall pour the treasures of the Facilic, while her heart responds to the electric pulsations of the great conthents and empires which are washed by the boundless ocean of the West. And here, to-day, we have marked and consecrated the center of her legislation, of her executive and financial administration, of her educational institutions, and of the administration of justice.

The day is auspicious. It is the anniversary of the birth of Washington, the only one who has given to history the patriot's name, without tarnish and without repreach. The screenesky spreads above us, mild and beneficent, a symbol of hope with more, the otternic halls, in their registed heavet.

reproach. The screne sky spreads above us, mild and beneficent, a symbol of hope and peace; the eternal hills, in their varied beauty, seem to promise endurance to our work; the ever-roaring sea presents an emblem of the unrest, the ceaseless activity, and the ultimate success of our commercial empire.

Most Worshipful Grand Master, yours has been the grateful task, with rites that date back to the foundation of the Temple, to lay the corner-stone of that monument which fixes the center of this great empire of commerce. A monument of beauty, which we proudly commit to future ages as a symbol of our taste, our achievements, and of our trust in our destiny. And, in answer to your invocation, methinks I hear from the ocean and the land, from the mountains and the plains, the response: "Here shall be my seat; may it endure forever!"

### MINOR INCIDENTS.

The barbecue was the feature of the day most enjoyed by those who were anable to witness the laying of the corner stone. One of the oxen was seized by the rav-

enous spectators and soon demolished. We presume that they are hones and all, as we could find the remains of but one carcass at the close of the feast. The other was gnarded for the workmen, who feasted to their heart's content, and washed down the juicy beef with potations of wine and beer.

down the juicy ocet with potations of vime and ocer.

This interesting feature in the day's proceedings was prepared by the Contractors, Mesars, Cochran & Middlemiss, Mr. Dennis Jordan, Mr. H. W. Scale and Mr. P. Cadue. The whole was elegantly fitted up, and all the appointments perfect, the motto, "Friendship and Good Cheer," being conspicuously displayed.

The various bands, and the singing by the Handel and Haydn Society, contributed largely to the enjoyment at this very important civic event. The kind services of the Society were obtained by the indefatigable Secretary to the Board, Mr. R. George, who is an active and enthusiastic member of it.

Photographic views of the proceedings, at suitable periods, were taken by Mr. Muybridge, the celebrated landscape photographic artist, from stands erected for the purpose at the most advantageous points.

#### A COLLATION

was given by the Architect, Mr. Laver, in the rooms of the City Hall Commissioners, to invited guests, immediately after the close of the ceremonies. This entertainment was enjoyed greatly by all present. The lunch consisted of a liberal supply of edibles and choice wines. The champagne was of the finest Napoleon Cabinet of Bouché Fils & Cie. This liberality of the Architect was greatly appreciated, and came in just at the proper time, when refreshments had become almost necessary to relieve the tired and weary guests, who had taken active part in the ceremonies.

ceremonies.

Prominent among those present on Mr. Laver's right, were the Hon. W. Alvord, Mayor, the Hon. J. W. Dwinelle, Orator of the Day, his brother, Hon. S. H. Dwinelle, Judge of the Fifteenth District Court, Colonel Von Schmidt, President of the Pioneers, Senator Wand, Mr. Duffy, and many other Senators and Assemblymen, the Hon. P. H. Canavan, Chairman of the City Hall Commissioners, the Supervisors and the members of the Press; and on the left, were Wm. Lane Booker, Her Britannie Majesty's Consul, E. Breuil, Consul of France, G. O'llrart Taaffe, Consul of Denmark, M. Klinkofsohm, Consul of Russia, C. A. Duisenberg, Consul of the North German Empire, F. Berton, Consul of Switzerland, G. Muccke, Austro-Hungarian Consul, Isaac Rivas, Consul of Mexice, the Hon. S. Merritt, General Ellis, General Hewston and Staff, the City Officials, and many other guests. many other guests.

The principal toast of the day, "The illustrious memory of George Washing-

ton," was proposed by Mr. Laver.

The arrangements for the luncheon were very complete, and nothing necessary

The arrangements for the function were very complete, and nothing necessary for the comfort of the guests was wanting on the occasion; the cuisien and general management reflect great credit on the well known enterer, Mr. Swain.

The perfect arrangements for the day are due to the Chairman of the Board, assisted by the indefatigable Architect, who, seconded by such men as his Clerk of Works, Mr. J. W. Duncan, and his Chief Clerk, Mr. E. A. Hatherton, could scarcely fail to achieve a success.

#### EVENING.

In the evening, quite a number of balls and parties were given by different associations, the theaters were well filled, and not a few took a moonlight drive to the Cliff. The day will long be noted as one of the most eventful in the annals of the city's history.

- Charles Mathews the younger, puts on record a laughable specimen of abbreviation. Going into an eating house for lunch, he heard, as he entered and sat down, seven orders given in quick succession by a throng of as many customers, down, seven orders given in quiek succession by a throng or as many customers, one calling for a basin of ox-tail soup, two for mock-turtle soup, three for peasonp, and one for bouilli. The waiter, dashing to the speaking-tube that communicated with the cook, bawled out with marvelous rapidity, "One ox, two mocks. three peas, and a bully."

- Bridget Stoddard is one of the latest who have been caught, branded, and sent off to the Lunatic Corral at Stockton. Her type of nonsense is of this com-plexion: She declares that she is about to be crucified. She must he a great fool to think we will take the trouble to crucity the like of her. We are patiently awaiting the Second Advent.

- A man in Pennsylvania has three well developed arms and hands. Now it is very evident that this gentleman is able to enact one-third more sin—of the man-ual sort—than his fellow creatures. Justice requires that he should receive one-third more punishment. Is his soul one-third larger? or only one-third more sen

— "If we judge men by what they have done, Voltaire is incontestibly the most powerful writer of modern Europe." Such is the verdict pronounced by Lamartine, and few will be inclined to appeal from it.

## The Return of Bishop Kip.

On Wednesday, March 6th, Rt. Rev. Wm. Ingrahm Kip, Bishop of the Protestant Episcopal Diocese of California, arrived in this city on the steamship. Alaska from Paniama. The Bishop has been absent for some six months, the trip having been recommended by his physicians. He returns much improved in hea th, to enter with recuperated energies upon his duties as Diocesan. He and his lady, who accompanied him, are staying at the Grand Hotel, where the Clergy and numerous friends have called to welcome them back, and congratulate the distinguished Prelate upon his safe acturn and restored health. The trip from Paniama is spoken by the presence of a gentleman so eminent for all the higher social qualities, and with a mind so enriched by the best fruits of generous culture and extensive travel

The Emma Mine Again.

We have been shown a private letter which says: "Williams, Vice President of the London Emma Mining Company, is one of the London party. They visat Camp Floyd and East Cathon Districts before leaving for your city." The allision here is to a party soft out by the London Emma Co. to report upon the minesand the liftgation. Of course, every effort will be made to keep these gentlemen out of the reach of any one in San Francisco who can tell them the truth about the tire to the mine. We hope, however, they will have enough segacity and independence to seek information in the right quarter, and in some degree to cut loose from the leading-strings by which they are now held.

Orient Mining Company, Ely District, Nev.—Trustees: Jas. A. Pritchard, Samuel A. Raymond. Wm. Hazehhurzt, James Dods and Andrew Kohler. Phis Company's property at Pioche, is a portion of the well known Meadow Vatley lock. Number of shares in the incorporation, 19,000, at a par varie of \$100 cach. The Company, through their President, James A. Pritchard, offers to the public a limited number of shares, at a fixed and uniform price: the proceeds to be used in developing the property. Application for shares may be made to the President, at room 2, Express Building, San Francisco.

The Paris American Register says: "The subscription to the Washington City loan of \$4,000,000 cosed in Paris lately. The result is most gratitying. The loan was subscribed more than four times over, and the alcoments will probably not be more than ten per cent. The Messrs, Seligman process who control the loan deserve credit for their skillin management of the allar. This being the first loan ever made by the City of Washington was placed through Messrs, J. & W. Seligman by their different houses in London, Paris and Frankfort.

The City Index and Purchaser's Guide will appear on the 20th instant. The advance-sheets of this attractive and useful work have received such favor at the hands of our inst uncertaints and business-men, that the leading dry goods house in this city has ordered 2000 copies for its own especial use. At the first-class merchants and business firms pronounce The City Index and Parchaser's Guide the most valuable book of practical information they have ever seen.

Rapid Traveling.—A carrespondent of the Sacramento Union, in a letter dated Poughkeepsie, N. Y., Jan. 19th, relates the fact of the ice boat Whiz (of the New Hamburg lee Boat Cube accomplishing the extraordinary high speed of sixty-seven and a half miles an hour.

Somebody has been at the trouble of describing the personal appearance of Mrs. Southworth, the novelist. Gentlemen, it seems to the *Town Crier* that this business has gone about as far as it can well go in that direction. Let us return to our Grand Duke.

A Paris street scene: "Dear lady," said a child exposing a toy for sale, "buy this." "What is its price!" "Judge yourself, madame; I have eaten nothing to-day." This is dramatic enough to make the fortune of three English dramas of the present day.

An Eastern paper prays that during the coming summer "the spirit of intellectual and emotional piety may settle in the hearts of the people, and the grace of the gospel brood above the land." That is what it asks for; what it will get is Asiatic cholera.

[From the San Francisco News Letter of March 16th.]

#### A Californian in the Old World.

DEAR News LETTER:—Since my school boy days I had not, until the present occasion, visited this great busy world of London. Long had I cherished the idea that I should some day once more tread the old paths and visit the dear old scenes. When at last I was enabled to give effect to this fancy, that clung to me in my youth and did not forsake me through long journeyings in many lands during my matured manhood, with what an eestacy of delight did I turn my ionateps towards Albion's shores! Whilst, since my arrival here some months ago, I have fully gratified the fancies of my boyhood by reviving early associations. I have at the same time largely engaged myself in examining into and forming a judgment in relation to matters of commercial and public policy that were more interesting and important to me as a man of the world. In reference to these latter, I propose to send you two or three weekly communications which I know, according to the News Letter's wise rule, must be brief. If I was quite sure of your being able, in justice to other demands upon your columns, to afford me space, I should like to tell you quite a number of things that could hardly fail to be interesting to Californians. It has LONDON, Feb. 18, 1872. a number of things that could hardly fail to be interesting to Californians. It has been my good fortune to learn something of the operations of that marvelous cenbeen my good fortune to learn something of the operations of that marvelous center of wealth—the London Stock Exchange. At that emporium of money, much interest is taken in the mines of the Pacific Slope. Great confidence is feit in their richness, but there is lively suspicion attached to every statement that emanates from your mining operators. Millions sterling would be readily invested in Californian mines but for this suspicion. These millions rightly used would bring San Francisco a prosperity which no man to-day could set limits to. Who is there that doubts the truth of this? There are those, of whom I am one, who believe that the mines of the Pacific are hardly yet in their Infancy, and that they require only capital in order to develop untold wealth. If this he so, surely it behooves all interested in our State to insure into the cause of the suspicion which I have allunded. ested in our State to inquire into the cause of the suspicion which I have alluded to each in our state or inquire morbic cable of the suspensive which i have amment or with a view to its removal. On this subject I reserve some hints that may prove useful for another communication. In this connection can you tell me how it is your dully contemporaries fail to possess any authority whatever in the London your daily contemporaries fail to possess any authority whatever in the London money market in relation to mining matters and industrial pursuits generally? The Californian daily press is either altogether unknown, or, if known, is totally ignored. Much is said in San Francisco of "live papers," "journalistic enterprise," etc., etc., but I can bear testimony to the fact, which any traveler may easily verify, that the News Letter, not only in London, but in Europe, is the only known and recognized Californian authority. Moreover, it is perhaps better known throughout England than any other American publication whatever. This wide-spread knowledge comes about no doubt in this way: it is looked upon as reliable in its allusions to the better kind of enterprises of the State, and it is peeuliarly relished as being truly representative of local humor. Thus it comes that several of the very highest class of journals regularly quote from it, and so give it a widely extended reputation. Take up Public Opinion any week and you will find numerous extracts accredited to the San Francisco News Letter. The Standard, a London daily of large circulation and of Immense influence, being the recognized organ don daily of large circulation and of immense influence, being the recognized organ of Mr. Disracli and the Conservative party, regularly, every Saturday, gives about half a column acknowledged as from your pages, and headed "Californian Humor." This again gets copied by scores of other papers, and so I soon discovered that my old friend, the News Letter, is about as well talked of in influential circles in London as in San Francisco. I find it on file at the Stock and Lombard Exchanges, don as in San Francisco. I find it on file at the Stock and Lombard Exchanges, at Mark Lane, at the Jerusalem Coffee House, and, in short, at wherever merchants and business men most do congregate. Go to the Grand Hotel, Paris, and there you will find it regularly filed. At Hamburg, Berlin, and Vienna, also, I was delighted to find the News Letter, and from it to learn the latest home news. I happened to be, a few weeks ago, in the shop of Messrs. George Street & Co., the great news agents of Cornhill, when a jolly country representative of John Bull came in and asked for a copy of the San Francisco News Letter. Feeling interested in hearing that manner safed for a many miles away from home. I accepted the george and asked for a copy of the Sah Francisco News Letter. Exceing interested in hearing that paper asked for, so many miles away from home, I accosted the gentleman and said: "The News Letter is a remarkable paper, sir." "Yes," said John Buil, "it is a remarkable paper—avery remarkable paper. Its jokes, though, but are sometimes just a leetle too broad for England. I read it overy week myself, but I keep it out of the way of the girls." I may mention another fact: A friend of mine, in Lombard street, believing in the bona fides of the Emma mine, as I did my self, in consequence of General Schenck's name being connected with it, purchased fifty shares at par. In a few days they were selling at a premium. Just at this time Inty states at par. In a tew days they were sening at a premium. Just at this time the News Letter came to hand with an exceedingly precise, but terribly damaging article, in reference to the title of the mine. I immediately proceeded to my friend and showed him the News Letter. The result was, he sold out the same day at a small profit. Next day the shares were below par, and have declined ever since. The News Letter article got copied into London papers, and it was no doubt in answer to it that Gen. Schenck was led to publish, in his letter of resignation, the somewhat grainitous advertisement that "he still had the same confidence in the wine search". I am thus indebted to have News Letter for results and the same confidence in the mine as ever." I am thus indebted to the News Letter for enabling me to do a valued friend a kindness. But enough for this time—more next mail.

— The Prince and Princess of Wales are sojourning in the south of France.

FRONT STREET.

Yours,

### The Trans-Continental Railroad.

Less than ten years ago, five individuals incorporated to build the Trans-Conti-Less than cell years ago, the more interchant; two were jobbers in hardware; one, a retailer of dry goods, and one an attorney of limited practice. Their combined wealth would not have graded one mile of road in the Sterns; a war existed, and the Government felt the necessity of a railroad; California was isolated from the nation, and carnestly desired the road. The Government gave immense subsidies in land and money; the counties through which the road passed gave aid; San Francisco, the terminus, gave a million in money, acres of water front for depote, right of way through streets—making every necessary concession to the company. The road is now built, is still owned by five gentlemen, and their private wealth, beyond the ownership of the road, is estimated at from five to twenty millions each. Such being the history of this national enterprise, it seems very hard indeed that these persons should use the gifts so made them to menace the prosperity of the only great commercial city upon the Pacific, and threaten her three hundred millions of fixed wealth with a rival, to be erected within four miles of her water front, and for that purpose to ask from the General Government the donation of the only site provided by nature for the military protection of the harbor of San Francisco. The possession of this railroad franchise is a great power. It can be Francisco. I ne possession of this rutinosa traincrise is a great power. It can be wielded selfishly to the benefit of a few, or generously to the promotion of the interests of all. It can be so administered as to create angry and jealous feelings; it ought to be so conducted as to make the people of California and San Francisco feel that their interests are safe and run parallel with the owners of the road. San Francisco is the natural terminus. The business of the State should concentrate here; this should be the distributing point; here the commerce of the Pacific should meet the roads for transfer across the continent, and such must necessarily be the ultimate result. The merchants of San Francisco are the direct agents of this trade and commerce, and it cannot possibly result otherwise than that San Francisco will finally, as now, control it. The estimated wealth of our city is not Francisco will finally, as now, control it. The estimated wealth of our citbetween San Frandeisco and the rairond would be bitter and calleger in injury to both parties. Concessions must be made on either side; the fact must be looked squarely in the face, and the difference must be adjusted. The Legislature looked squarely in the face, and the difference must be adjusted. The Legislature must leave unrepealed the Five-per-cent law; and if Governor Stanford demands lands, roads, bridges, or other concessions, amounting to-say, \$3,000,000, and in return shall squarely promise and bind his company to make our city the terminus and central point of the railroad system, the money should be given him. Let some of our prominent business men take hold of the question, discuss it without passion or excitement, arrange terms upon a business basis, and we believe the people and property owners will respond, in voting the means needed to carry out the arrangement. San Francisco is rich, prosperous, and has an assured future; \$3,000,000 s only about two per cent, upon the assessed value of our city, and an increase of its debt to that extent would not be felt as a burden. If it is to be done, it were well to do it quickly: to allay the excitement and quiet the uneasy anxiety of its people is of the utmost importance. Let peace be declared in this railroad war at once. Its proclamation will bring an instantuneous increase of real estate. values largely exceeding the millions required to purchase it. We sincerely believe there is no one who will use his power with greater moderation than Governor Stanford; we believe him sincere when he asserts his friendly disposicion toward our city, and his declaration that he does not intend to make the interests of his company run counter to this commercial city.

mir, a smile and eyes. "A-I bug your pardon, madam." "A chee a nice one. You can let me see it, and if I like it you may send it up." The little salesman looked unutterable perplexity, turned his eyes upon his groceries and appeared to be looking for something. "I think, madam, they are all out. Perhaps you will call again!" The lady was too smart: "Sir." she said, "I don't think you know your business very much. What I want is something three-cornered—to eat. A chee, you understand." The little clerk felt hurt: "Madam," he replied, with slow sorrow, "I know the name of everything triangular, and everything that any Christian cats. But I don't know what a chee is, and I think you do better go to the shop across the way. Excuse the liberty, but I believe you are insane." The lady merely bowed, and went meekly to the door. Then she pansed, laid a jeweled forchinger alongside her nose, suddenly brightened up, and turning round, eaid, hastily but hesitatingly: "Now, I'm sure I can make you understand. It's what the moon is made of!" A revelation fell upon that clerk. It struck him upon the lower jaw, and that jaw dropped like a shot steer. Then he spake: "Madam, is it cheese you mean!" "Geod G—I but, madam, for the love of heaven! a cheese is not three-cornered!" Then he saw that, too, and so did we, who were standing by. But we went away and left the poor wretch to explain to the lady that a whole cheese is not three-cornered. As we happen to know the News Letter goes into that hady's family, and is read by her husband, we have a tolerably well grounded hope of seeing that gentleman, or hearing from him, before many hours have been added to our masturing youth.

### Our Hebrew Brethren.

It has always been a puzzle to us how it was that God Almighty chose the Jews for his peculiar people; there were several races existing about that time that we should have preferred, if called upon to make a selection. The Jews are a peculiar people, and there are some peculiarities that in our opinion might be safely imitated by Christians. Who ever saw a Jew begging bread, or found one in an almshouse? How rarely do Jews intermarry with outsiders? How proud are Jewish women to have children? How infrequent are divorces? What a very unusual thing it is to see a Jewish prostitute? Who knows of a Jew farmer, or a Jew farmer laborer? Who ever heard of an Israelite living in the country? Jews deal in clothes, but are rarely manufacturing tailors; they sell jewelry, but do not make it; they are merchants, but seldom own ships. They are scattered throughout the world, but are seldom pioneers, and never explorers. They deal in coin, but are never miners. They are industrions, but are seldom found at a vocation requiring road labor; look through the foundries, machine shops—no Jews; no Jew sailors, soldiers, or day laborers at hard work. Ever since the allotment of Christ's vostments they have dealt in clothing, old and new. As bankers, they rank first in the world; as artists, in music, painting, sculpture, and all the imitative arts, they are superior. Poor in real estate, they are rich in personal property; a diamond is to the Hebrew the embodiment of real wealth. Without nationality, their ties of race are stronger than those of any other people. Speaking all the languages of the world, they have nearly lost their own; scattered throughout the world Jerusalem is a ruin and a desolation. Intermarrying only with each other, their race has not degenerated. Half the Jewish firms in America are brothers; business continues in a family and descends from generation to generation; careful and prudent as are the Jews, they are great speculators and gamblers. In the family, the father is king and the mother is queen; the g

The triple-headed Harpics of the California Woman Suffrage Association have been discharging wind from the mouth at the California Legislature. Sutject: "Human Rights, or the Fundamental Principles of Republican Government." If the Assembly Chamber does not smell rank before high Heaven, if the Senators and Assemblymen are not odorous with the musk of female sweat, these Harpics must have been luxuriating in a Russian bath since last we were to the windward of them. We confess that we would not like to see the Legislature individually in the agonies of black vomit, nor would it be pleasant to see that body individually revolving upon the points of Damascus swords—the apex of the instrument being inserted in the unmentionable part of the anatomy; yet either of these sights would be more agreeable to us than that the Legislature should be talked to death by illiereate, ignorant, and brazen-laced Amazons. To us, personally, all women-shrickes are pinks of perfection; at a respectable distance we like them amazingly; but we do ask, as a special favor of Divine Providence, that our Solons of the California Legislature be preserved from coming in contact with those ranting female free-lovers who have vicious designs upon the virtue and chastity of our immaculate legislators. In a political and philosophical sense, what au exquisite and contemptible burlesque is wrapped up in this tirade of idiotic jawing entitled "Human Rights, or the Fundamental Principles of Republican Government!" If these charming women (God forgive us for this conteous and complimentary lie) say any thing having pith, force and originality, the Town (vier will swear on a stack of twenty-dollar gold pieces that the Harpics have been plundering his intellectual bank. We warn the Legislature against crediting them with anything but unlimited impudence, voracious vanity, and jaw as unintelligible as the clatter of parrots and monkeys. If these amiable women (another courteous and complimentary lie) must find congenial work to do, why will they not g

<sup>—</sup> We observe with pleasure that Tom Fitch and two other "Latter Day Saints of the Church of Jesus Christ," have gone to Washington to secure the admission of Utah into the sisterhood of States. That they may be successful, is our carnest prayer; because we should like to have our friend Fitch in the United States Senate as a representative of the system of plurality of wives. Thomas as a Patriarch, with wives and concubines, would be an immense success.

### New Books from Bancroft's.

The blockaded trains have at last reached us, and the holiday books that should have been here months ago, are only now to be found on the shelves of our bookstores. First among them, for little children, we must place "Sing-Song," a nursery rhyme-book, by Christina G. Rossettl. The verses are quaint and original, and the illustrations are most graceful. We select the following:

What does the bee do?
Bring home honey.
And what does father do?
Bring home money.
And what does mother do?
Lay out the money.
And what does baby do?
Eat up the honey.

Baby lies so fast asleep
That we cannot wake her:
Will the angele, clad in white,
Fly from heaven to take her?
Baby lies so fast asleep
That no pain can prieve her;
Put a snow-drop in her hand,
Kiss her once and leave her.

Seldom "can't," Seldom "don't" Never "shan't," Never "won't."

What are heavy? Sca-sand and sorrow; What are brief? To-day and to-morrow; What are frail? Spring blossoms and youth; What are deep? The ocean and truth.

To our young folks no book will be so welcome as the last work by the anthoress of "Little Women" and "Aunt Jole Scrap Bag." Miss Alcott holds the highest place in the learts of the "rising generation," and is the literary ido! of the American fireside. In her first story, "My Boys," she says, "I like boys and oysters raw," and then goes on to give an account of her first love: "My Augustus! oh, my Augustus! oh

<sup>—</sup> The adroitness with which the Demosthenic Literary Society has managed to closel its excessive talent under a bushel, thus robbing the general public of rare intellectual marrow, is only equaled by its immense stupidity in not recognizing the fact that we exist. Now, by our savage soul, we shall flagellate the Individual members, and so worry then with perplexities that they will rue the day they ever gave us the "cold shoulder." As a first infliction, Joaquin Miller shall lecture unto them on Tuesday evening next, and if they survive this, we shall take our flute and play them such doletal ditties as mortal ear never endured with the remotest degree of comfort. O, but we dearly love to perforate the hides of those literary abortions who persistently and viciously ignore our transcendent genius.

### The Flower Plucked.

[BY THE AUTHOR OF "HAYDEN."]

"You say 'you leave for ever?
Our talks and walks have had their day?' Forgive me! Spare the flower! Alas ('You say 'this flower must fade away, So friendship that you sever?' Alas, to think this little flower Should wait so long its blooming hour, Through all the stormy weather, Through March and April, May and June, And now must bloom to fade so soon! It shall not fade! "The better so It die farewelless, with a blow." She spake, and smote the fragile stem, And far the flower that bloomed for them Against his heart, and, from that hour, Flew soniming o'er the heather.

## Eastern and European Dottings.

A violent scene occurred in the French National Assembly, last Tuesday, on a motion to censure and prosecute two Deputies for libel on the Assembly. The motion to censure and prosecute two Deputies for libel on the Assembly. The motion was finally hid on the table.—Prominent Russians are in negotiation with exiled Poles to return to their native country and become reconciled to the Czar.

B.) foundered at sea off the Bernudas; Captain and crew were rescued. — A great excitement in Yankton over the recent gold discoveries among the Black Hills, in Dakotah Territory. — The Government of Prince Edward's Island defeated, and House dissolved, March 12th. — Italian revolutionists causing airm. — A tel

— Were we called upon to assume the spiritual directory of an average congregation of good, healthy, pions Christans; to filter out to them in meacer measure a weekly dole of spiritual nutriment; to refresh their thirsting souls with the scant and protesting drops which trickled from our lean spiritual goblet, thus called upon, we say, our first thought would be, not for the solvation of that poor, weak soul which in humble obscurity pours forth the fullness of its allegiance in gennine worship of the Great Creator; not for that hung emp publican, who craves even bread and yet finds heart to bless the God who furnisheth him none; not for the stricken, nor the hopeless, nor the penitent who crya could for timely counsel in the means whereby they may be saved no; not for any of these, but our first impulse would be to count the noses of our opinient flock, to register in the pages of our purpose of the count of the pages of our purpose of the sexton, and, all this done, to cryb trom whatever theological stock might be handlest a spick-span, rose-water, bran-new discourse, and then deal it out sparingly besides. And, this done, to cryb trom whatever theological stock might be the additional and the deal it out sparingly besides. And, this done, to cryb trom whatever theological stock might be the additional the flattering unction that therein had we emulated, albeit exceedingly feebly, the teachings and the preachings and the examples of the brightest luminaries who dispense God's Word from all the pulpits in the land.

— The degradation of the intellect of that animal made a little lower than the angels, was exhibited in all its hideous deformity, a few days ago, in the Police Court. A fair and blooming young widow was accused of stealing a little goose from a Dutchman, which amended, might mean to say that the Dutchman was accused of stealing a little goose from the blooming widow. Be this as it may, two eminent Attorneys at Law beat the air with their gibt tongues for over thrity minutes, and all for the sake of filebing filtry lucre from their clients. Ah, for those cloquest old Woman lawyers who would wrangle over a little goose for forty-eight hours, and do it for just the fun of the thing.

— The Russian-Asiatic Fur Company filed its certificate of incorporation vesterday. Objects: seal catching and dealing in furs and other merchandise in Kamschutka, Eastern Siberia and adjacent islands, and for carrying on mercantile and shipping business generally. Capital stock, \$1,000,000, divided into 10,000 shares. Trustees—John F. Miller, A. Wasserman, Gustav Niebaum, Lewis Gerstle and Wm. Kohl.

<sup>—</sup> John Brady has been sent to jail for disturbing a funeral procession. This may be an instance of legal intolerance and prejudice; perhaps Mr. Brady is opposed to funerals.

# To "B."

O imitatores, servum pecus!-Horace.

O shade of Pope divine, who wrote for Fame; Who "lisp'd in numbers, for the numbers came:" Whose genius, great Minerva, at thy birth, Enstamp'd thee POET 'mongst the first of earth: Thou, whose deep draughts from the PIERIAN SPRING. Shame shallow bardlings who aspire to sing!

Shall I, great Shade, withhold my honest rage, Whilst vensi B\*\*\*\*\* rapes thy virgin page—With "snarl dyspeptic," and with "beggar whine," Steals from thy Dunctan "at a cent a line?" No:—I'll protest, though Are's self should cope, And convert the seriful arbo wallute these Deeps And scourge the reptile who pollutes thee, POPE.

And thou, proud PEER, of Albion's classic isle, O'er whose inspir'd page Apollo delgn'd to smile;
Who chas'd the grov'ling scribblers to their lair,
Till Grub Street hirelings blanch'd in mute despair:—

And GIFFORD! who drove PINDAB, for his bread, "In hated crowds to hide his hated head:" Assist me, thou, such wretches to disperse, And drive them headlong from the realms of VERSE!

SELAH.

### There be Two Richmonds in the Field.

Mr. S. T. Suit, of Louisville, Kentucky, the great whisky operator, whose daring feat of "buying up all the reliable OI: Kentucky Whiskies in the world," we last week chronicled, is doubtless a modest man. Modesty is the unwrying characteristic of genius. Having compassed the largest whisky transaction ever before known "in this or any other country," he, Napoleon-like, seizes the large weeth, places it on his own brow, and awaits the adulation of a nation. Possibly, however, we may err in this suspteion. He may be willing to let another bold whisky operation share the honor and responsibility of such an enterprise. Our California Richmond, A. P. Hotaling, denies the soft impeachment that Mr. Suit, "or any other man," has gobbled up all the reliable Old Kentucky Whisky in the country, and roundly asserts that "through the sagacity and foresight of his friends, C. Moorman & Co., of Louisville, the stocks of very reliable old J. H. Cutter, in Louisville, New York and California, consisting of from ten to twelve thousand barrels, have been saved from the famous corner of S. T. Suit & Co. to meet the increasing demand. The stock of J. H. Cutter Old Bourbon Whisky, at the California Agency, 431 Jackson street, comprises, we believe, parcels ranging from two to eight years old, the flavor and bouquet of all of which would almost cause a comoisseur of the true clixir of life to die of aromatic pain. For a rejuvenator of the corporal and intellectual man, commend us to a serial dram of 5° O. K. J. H. Co. will apportion a large share of their immense stock of fine whiskies for the commendius to of California, and thereby aid in correcting the vitiated taste of cosumption of California, and thereby aid in correcting the vitiated taste of cosumption of California, and thereby aid in correcting the vitiated taste of cosumption of California, and thereby aid in correcting the vitiated taste of cosumption of California, and thereby aid in correcting the vitiated taste of cosumption of california, and thereby aid in correcting the vitiated taste of cosumption of california, and thereby aid in correcting the vitiated taste of cosumption of california, and thereby aid in correcting the vitiated taste of cosumption of california, and thereby aid in correcting the vitiated taste of cosumption of california, and thereby aid in correcting the vitiated taste of cosumption of california, and thereby aid in correcting the vitiated taste of cosumption of california and control cannot compare the calle ever, we may err in this suspicion. He may be willing to let another bold whisky

will apportion a large share of their immense stock of fine whiskies for the consumption of California, and thereby aid in correcting the vitiated taste of consumers of flavored spirits, letc., under whatever cognomen or trade-mark these vile compounds may be known in the market. In relation to the foregoing we copy the following article, entitled "All About a "Corner' in Whisky," from the Louisville "Kry,), Bulletin, March 2d:
"An article appeared in a morning paper of this city, on the 29th inst. (and recenced throughout the land by the Associated Press), proclaiming the astounding news that a certain liquor firm of the city had become purchaser, at one sweep, of all the fine old whiskies in the world. This announcement amused and at the same time startled us; for we at once concluded that the Old Whisky Dealers, Walker & Go., Cunningham & Co., and Moorman & Co.—the latter manufacturers of the noted 'Cutter Whisky'—and many others, had been ruled out of the market. Upon inquiry, however, we learned that these firms alone held more than ten times as noted 'Cutter Whisky'—and many others, had been ruled out of the market. Upon inquiry, however, we learned that these firms alone held more than ten times as much fine old Bourbon Whisky as was reported to have been 'gobbled' in this 'corner' maneuver. To 'corner' these immense lots of fine brands of Whiskies would require the combined purses of sundry ordinary firms. We have sufficient knowledge of the business of the houses abone referred to, to assert, without fear knowledge of the business of the houses abone referred to, to assert, without fear of contradiction, that for years past it has been a common occurrence for at least two of them to constantly have on hand, and now have, fine times the quantity of Old Bourbon said to be affected by this recently announced 'corner.' 'Corners,' generally speaking, are pretty good things for somebody; but we are of the opinion that a combination does not exist and cannot be effected that would be able to secure one-fifth the stock of old Bourbon controlled at this time by the firms above spoken of. Advertising great achievements, as a rule, pays well; but we think this 'corner' in Old Bourbon is purely mythical; We have heard of corn in connection with whisky, but when it comes to 'corners'—especially in this renowned whisky market—we are a little credulous."

<sup>-</sup> The young ladies of Waterville, Maine, having recently organized an antitobacco society, the young men of that town have organized an anti-corset society.

### The Real Estate Market.

[Reported by William Stuart, Real Estate Agent, 418 California Street.]

The real estate market showed some signs of reviving about a month ago. But, alas! the reaction was short-lived. Without being quite so dull as it was before the revival, the market has nevertheless subsided into a condition of thungy which is very discouraging so far as its prospects for the coming spring and summer are concerned. It can scarcely be expected that any decided change for the better can now occur until after harvest. But then our real estate interests will undoubtedly show a permanent improvement, for with the restoration of prosperity and pienty which is now almost secured to the country at large from the winter's bounteous rains, there can exercely fail to be a renewed demand for landed property which the all our other mediums of investment, must eventually prove the most profitable, as it is the most reliable. It seems very absurd after the bitter experience which, in It is the most reliable. It seems very about after the other experience our community, ninety-nine men in a hundred have had of mining stocks, that there should be such a strong spirit of speculation again existing in these hap-hazardous securities. The money which is now invested in this way and it is hazardous securities. The money which is now invested in this way—and it is enormous might doubtless have partially found its way into real estate in the part three months, had it not been for this spirit of gambling which is now having one

three months, had it not been for this spirit of gambing which is now having one of its periodical revels, and runs away with common sense and hard cash at one and the same time. But its day will be short, and in due season the hard cash, or what remains of it, will return to the legitimate fields of operation.

Is it the exorbitance of power which the Central and Southern Pacific Railroads seem to possess, or is it a characteristic want of energy on the part of our merchants and our independent self and ever so much per centume capitalists, that likely to allow of the cession of Goat Island to an arbitrary monopoly. Surely, the injury that the location of the railroad terminus, anywhere but on our side of the Bay, must mestably be to our city, can no longer be questioned! Yet, in all probability, it will be perpetrated. And if it be, farewell at least for years to come to any increase in the value of our outside lands,—and larewell forever to the possibilly of our own city being as nowhere else should be the grand terminus of the railroad system of California. It is carnestly to be hoped that our people will make one final, immediate and carnes effort to prevent the consummation of the property of the consummation of the consummation of the property of the consummation of the property of the consummation of the property of the consummation of the consummation of the property of the consummation of the property of the consummation of the property of the consummation of the con one final, immediate and carnest effort to prevent the consummation of the proposed cession, which, in every point of view, and in none more than in real estate values, is disastrous and dangerous to our city and its best interests. The city requires that the Bay be bridged from Alameda to Hunter's Point Ravenswood won't do; nor Saucelito; nor any other point which such antiquated authorities as the Alia may be pleased to suggest. That errate journal has said in this connection that it confeases "to come respect for science and the concinsions of scientific mon," which, although a guarded confession, is nevertheless one which we would hardly expect from such a source as it is decidedly self-committal. The most scientific of the greeners are the self-scientific of the greeners and he so that of the properties of the committal. scientific of the engineers who have thus far discussed or reported on the matter have scienting of the engineers who have thus lar discussed or reported on the matter have determined that a bridge from Alameda to South Sau Francisco is not only quite practicable, but by far the most feasible that has as yet been proposed. Why should their conclusions not be approved, and some definite action taken in this most important matter? Merely because, in our community, private use foreer conflicting with public interests, and while the former are fighting for purely selfab purposes, the latter are immolated to their insatiate greed and rapacity

The most important sales recorded, for the week ending the 14th instant, inclu-

N. W. Corner van Ness Avenue and washington, w. 123312; 83-12, \$20,000 South line Bush, 137 & feet east, from Leavenworth east 45 10-123132, 11,000 S. W. corner Sacramento and Frankiin, W. 137 & 137 & 83-12, 17,000 S. W. corner Pine and Van Ness Avenue, 1303137 & feet . 25,000 West line Howard street, commencing 95 feet north, from Twenty-first N. 752245, aubject to mortizages amounting to \$10,000. . . . . . . . . 8,000 The total expressed consideration values of deeds recorded for the week ending

the 14th instant, inclusive, is \$343,443, of which, however, \$138,425 applies to conveyances in trust or otherwise than as sales. The mortgages for the same period aggregate \$125,050.

- We like a good lie. There is something manly in the unblushing assertion of that which is impossible to he true. There is a daring, amounting to the heroic when a man fearlessy confronts an assembly with an annitigated falsehood. That bold deed was performed before the New York Chamber of Commerce, by Col. F. A. Bee, who stated that "iron vessels had been condemned for the Pacific trade, on account of their sudden decay, caused by peculiar marine influences incident to that occan," Hud the gallant Colonel said "slow decay" our admiration would not have been so great, but "sudden decay" is charming.

- We do not treasure up even a limited quantity of furious hate against the buxon and fleshy Susan B. Anthony, but we confess that we have always had a special spite against her pet bantling-the dead Recolution. And now our spite is to be intensified by some crack-brained lady-angels, who are to resurrect it under to be interesting by some crack trained have agrees, who are to resurrect indeed the name of the New Times. If this Exerclusing Skrieker should invade our sacred precincts, the women-women engineering it will bring down upon themselves a trade of gentle admonition more unpulatable than doses of distilled adders.

### Wayside Gushings.

BY MRS. HARRIS.

DEAR OLD NEWS LETTER: Your paper comes as reg'lar to hand As them blockheaded males as is sent overland, Likeways billy-doos as was posted on Walentine's day, But through having no stamp was detained on the way. I knew your 'andwritin' when I looked at the kiver, But couldn't write before bein most dead with my liver. But "Time writes no wrinkle on thine azure brow," Such as '49 saw thee '72 sees thee now. You ask me for pottery, as in 'applier times,
When 'Arris, like Tennyson, was famous for rhymes,
But 'tis long since I took down my 'arp from the willow, So upset have I been by life's tempest and billow. I've retired from the world since I wrote you before, And the places that knew me now knows me no more. I'd 'ave interred a nunnery, but Alemany told me My views was so broad that no convent could hold me: I know that I am a good deal run to waist, Being just five feet circ lar, and the bony old praist Insisted that previous to taking the wail, I should swear off the heresies of spirits and ale. Says I, " By St. Bacchus, there's as much chance of that As for him to be wearing a Cardinal's hat; I'll stand to my colors—they're red on my nose—And not refuse villead's best balm when it flows. So I'll nun of the wale while my spirits is 'igh, And you won't catch me giving up of Bourbon and Rye!" So bein' thus 'umbugged and left in the lurch, I thought as I'd try the Episcopal Church, And I put an adwertisement into the paper And I play an adwertishment the war paper.

A voman who's a light, although she's no taper,

Whose life has been spent as a hinfant's dry nursey,

Is desirous of bein' made a sister of mercy." The Standing Committee replied in a trice: " The bishop's away, but we act as his wice So, dear sister, please say if of riches you've much, As the church at this moment is a-looking for such." Says I, "Reverend gents, I had once quite a store Of dollars, but fear I shall see them no more. That 'Igh Joint Commission my fortune's undone-I'm inwested in American skewerties in London: That there Allybammy question 'll never be settled The 'Igh Joints was fools, and both nations is nettled; Of these "conskential damages" the consekens is My shares is at zero when I 'oped they'd 'ave riz. When they 'eard this the white-choker'd wipers looked black,
And werry soon sent me this cold answer back:

"The Standing Committee decline Mrs. 'Arris,
And delying her to try the 'compiles of Paris.'' And adwise her to try the 'ospitals of Paris. So drinking their 'ealth in a bowl o' Tom and Jerry, I packed up my duds and set off to the Ferry; And it's snug in Mongolian apartments I am, Let cheap by a pigtail whose name is Ah Sam. O blessed retirement! They wash all night long, And the wapors of the washtub is awfully strong, But one can't enjoy privacy without inconvenience, So I looks on the pigtail's profession with lenience. I like this 'ere place a deal better than 'Frisco, It's much more genteel, altho' not quite so brisk, oh !

It's much more genteel, altho' not quite so brisk, oh! Here wirtnes and wicces is equally rare, Wegetation's luxurious and so is false hair. The climate's so 'ealthy that 'alf the men you see Rejoice in the life-giving letters, "M.D." Eddycation's the go, and the school-girls is pretty, 'Churches is noomerous and professors is gritty. Butthough science is abroad, superstition is strong, And has seized on a bird, whose legs are so long, That he steps out of politics into the realm, Where tables is the deck and Old Nick's at the helm. Billy Gagan, a pagan, Pardee an M.D., And Crane, who's insane, like Macbeth's witches three, Have been turning the tables and leaving their posts. And Crane, who's insane, like Macbeth's witches three, Have been turning the tables and leaving their posts. Says Crane to the table, "May it please your mahogany To answer a question in local cosmogony If I mentally ask it?" The table legs beat

Permission, and Crane asked, "Shall our County Seat Be removed, as proposed by Senator Tompkins?" Here the table perceptibly shook on its strong pins—The furniture creaked and quite got up its dander, oh! As it answered "The Seat must be still San Leandro." So the bird of ill-omen, this credulous Crane, Who had lifted the legs, let them slip down again, For though this Crane's equal to moving a table. To remove County Seats he do not feel able. Then he set off to 'Frisco and called on a witch, Who by telling men's fortunes has made hereelf rich, And as soon as she saw his long legs and his bill. She cried out, "You're a Crane," while, amazed at her skill, He confessed the impeachment, and said, "When I go To the nest of ill birds"—cried she, "Sacramento!" Here Crane's legs quite failed, and his bill quavered, "Oh! Gentle prophetess, say on which side shall I vote, Shall I paddle my cance beside Tompkins' boat? Oh, tell your poor votary, the Crane of Alameda, Which side I'm to choose 'ere I follow my leader!" Said the Sybil, "Now mark, if this table don't rap at all, "Tis a sign you're to do as I say at the Capitol, For of late the political thoughts in my head Are inspired by an Assemblyman recently dead. I'll now call him' "Crane's craniological bump Of fear here protuced, his legs gave a jump—" Sweet spirit, piease eay who the devil are you?" "May it please you, fair witch, I am Janues B. Larue." Here Crane trembling said, "Deceased chum, how d'ye do?" "Mar Arai," said the ghost, "I've just come from the tropics To give you advice on municipal topics. This bill must not pass, although it's engrossed, I'm determined to use all my weight as a chost To get it throw on!." Says Crane, "What shall I do? I'd vote both ways to please a dead colleagne like you." "By next train, my dear Crane, you must go back again To that den of choice es pirits, he Senate. Remain At the door till you meet the first man who meets you. Him greet, when you meet, if he don't first greet you. Could a ghost drink a toast, I would pledge y

A very good story, illustrating the desirableness of money, is told of the Hon, the Chief Justice of the Supreme Court of the United States, Salmon P. Chase. When, some years since, the Union Telegraph Company were organizing and consolidating the various telegraph companies, end extending their business by the construction of new lines, it was anxious to secure the name of some distinguished citizen to act as Secretary of the Company, in order to give character and importance to the organization. Mr. Chase had been Governor of Ohn, United States Senator, and Member of the Cabinet as Secretary of the Treasury, and the position, at a large salary, was tendered him, which he declined. Subsequently he became Chief Justice of the Supreme Court. One of the fortunate members of the Union Telegraph Company, who had accumulated some millions of wealth by a successful manipulation of his stock, was recently discussing the incident, and after reciting the fact, said: "Chase might have been Secretary of the Company, and might have become wealthy in the ownership of its shares, but he declined, and now see where the damn fool is!"

It is Henry Ward Beecher who said he could never understand why it was that the devil always had the best music. Now, it is certainly true, not only that he has the best music, but the best of everything. When we were a boy, and under the discipline of a pious aunt, who had the delegated authority from our parents to spank vital religion into our unwilling understanding, we used to listen to the good, old-fashioned singing of Watts' hymns in resentful indignation. The first negro melody was to our soul a revelation of divine harmony; "Coal Black Lubly Rose" and "Jump Jim Crow," as sung: in a village barn, by a band of wandering mistrels, gave us a more realizing sense of melody than any kind of heavenly music on golden lyres, touched by angel ingers, or demonstrated to our intelligence through the nose of Deacon Thompson and the squeaking pipes of Aunt Eliza. In our boyhood nobody played the fiddle but darkes, dancing was wicked, and a revolution came into the village church with a base-viol. Now, the organ plays jems from operas, and we think we observe that just in proportion as music improves the people grow wicked.

— Treasure shipments for the past week have been as follows: Per China, hence March 5th: To England, \$169,382 78; to San José de Guatemais, \$19,145 00; to Panama, \$5,000; to Punta Arenas, \$934 56; total, \$185,452 28.

## Leaves from a Lady's Diary.

MARCH 13.—Went to see Barnes' new play, Stocks. In the same way that all the rogues and criminals of a great city flock to see one of their number banged, so was the theater filled with the stock-jobbing fraternity. They didn't like it, because the action of the piece was too near home, and that home is not large enough cause the action of the piece was too near home, and that home is not large enough to allow of personalities. In New York, or London, or Paris, people would fock to see "how the thing is managed;" but when the managers are the audience, they murmur. When the fox painted for the lion, it was the beast who was killing the man. Talked to B. about it, and he did nothing but shake his head; he wanted to see what the papers would say next day. There is nothing so abominable than people who shake to take their cue from the world, and nothing more detestable than people who shake their heads. The majority of them, when they do so, don't open their cars; it is only a very few who, whilst gravely nodding, have both eyes and ears open, and these are the most dangerous—the others are only weak impostors

March 14. - I was quite saddened this morning. I was going along the southern part of the city, when I met a huge frame on wheels, which was slowly bringing along a large tree from the mountains, to be placed somewhere in the city. Six horses were dragging it like a condemned felon to its place of banishment. I thought of the clear, it risk, life-giving mountain breeze that it had left forever—

that wind whereof Heber said :

"I know thee from a thousand winds bred upon sea or shore, For none, with privilege like thine, rifles the wild thyme's store, And none with such a power of voice maketh the tall pines rosr."

And the rich, virgin soil, bred of its own leaves, into which its roots had struck deeply and spread widely, those very roots, all hacked and sawn and rent, from their very tenacity to their old home, this has to be changed for the mixture of sand, clay and alkali which forms our gardens. Civilization has brought this child of the forest to adom to evivilization and live in a sickly atmosphere composed of smooth gasee from the sewers, the exhalitons of Selby's lead works and the thousand and

one abominations of a great city. Dust will dry up the pores of its leaves, the sea-charged fog will wither its exposed side until at length ugly, unfruitful and unre-garded, it is cut up for firewood to make room for another victim.

Marcu 15.—S. called, and our conversation turned upon Mr. Garrett's lecture on Darwin. He said, with some truth, that the majority of those who applauded the on barwin. He sain, with some trust, in at the halp rive of the works. I watched at the library and noticed that his books were all taken out since, so that perhaps Mr. Garrett, by drawing attention to the writer, has caused the very evil at would prevent. To lecture on such a subject to such an audience is to have it all your own way. It is "to raise the giants first and then to kill them." In this way your own way. It is "to raise the giants first and then to kill them." In this way Archbishop Whately proved logically that no such person as Juhus Cæsar ever existed. We questioned also the good taste of the reverend gentleman descending to caricature to illustrate his argument. Went to Mancusi's benefit; house full; to caricature to inistrate his argument. Went to mancial is benefit; house for the kind way in which he has given two or three young ladies a chance to have their abilities criticised by the public, and if that unfortunate stick of alabaster from Italy was a failure it doesn't matter much. Went out to the cemetery yesterday; met W. coming back with the air of a man conscious of having performed a duty. He had been to his wife's grave and left a bonquet there exactly in the same way that a man leaves his visiting card at a house, saying mentally, "Well, that's doesn" done."

### San Francisco.

There is one drawback to our city; it is either too large or too small. It is not big enough for a city, and it is just a title overgrown for a country village. It is just large enough for everybody to know every other body's business, and to interfere and meddle with it. If the right hand does some kind and charitable act, the left hand is sure to find it out, and send the item to the newspapers. One cannot even do some little wicked thing on the sly but it surely leaks out and is scandalously promulgated. Even small stealing is observed and commented on to that degree that holding office is rendered unpleasant. Buy a pretty girl a new bonnet, or shawl, and the chances are your wife has admired the same thing in a shop-win charity. Gamble your money in stocks and your creditors are offended that you did not pay your debts. If one dines with Jack Gamble or Charley Burroughs, the chances are even that you are subpensed to appear in an action against somebody for playing with Pharaoh and his daughter. If you go into bankruptcy, Hope, McKillop & Co, sends everybody a confidential notice of the circumstance. If no makes a deed of gift to his wife, of all his real estate, the News Letter records the fact, and credit is impaired. One cannot even be thrown out of a buggy of a Sunfact, and credit is impaired. One cannot even be thrown out of a buggy of a Sunday, on the Cliff House Road, but the newspapers publish the item. Provide for your housekeeper in your will, it is printed, and generosity is misinterpreted. One cannot have even a baby left on his door-step with impunity. No one dares purchase a ticket in the Havana lottery for fear he will win a prize and be found out. Dress and deportment are discussed at social parties, by Jenkins, for his Sunday readers. If our city does not grow faster, we shall be compelled to move to Oakland or San Andreas.

#### Cambria.

At the celebration of St. David's Day by the Cambrian Society, in Platt's Hall, March 1st, the following poem (in English) was read by its talented author, Mr. Gomer Evans:

I hail thee, Cambria! cherished childhood's home, Of grateful Britons, here in exile seen; I hail thee, Snowdon! thou exalted dome,

That from thy gloom behold st her valleys green.

Would that there were upon thy hoary brow,

A temple sacred to historic fame; Emblazoned there, in bold relief, I trow

Would glitter many an ancient British name.

Caractacus, who valiantly withstood The furious legions of Imperial Rome; Nor yielded e'er, till saturate with blood,

A single fragment of his island home.

A heroine, whose sword laid legions low,

Boadicea, princess flerce, tho' fair, Whom Romans deemed a worthy Roman foe,

With great Caradoc, should have record there.

Ambrotius, too, and Vortimer, and throngs
Of other chiefs, who no less flercely fought The barbarous authors of their race's wrongs,

And with their blood their country's freedom bought.

No less deserving of immortal fam

Tho' not like George renowned for warlike deed; Our Patron Saint, St. David, honored name! A man of God—for Wales to intercede.

We'll not forget the ancient British bard,

Who served his country with his magic lyre; Next nature's gift, to him we must award

A meed of praise, for Gwalia's martial fire. Then here's to Cambria-absent tho' awhile

Let no untriendly knave her name revile! Her hills and valleys more benignly smile.

Than any other spot of dear old Britain's Isle.

# Special Brevities.

- Stokes, the murderer of Fisk, is, it appears, an attentive reader of the journals. Considering his position, and considering the sort of reading to which he must be treated, how would be like this rittle extract from the Nation: "There is must be treated, now would be like this fittle extract from the Nation: "There is only one thing wanting to make the disgrace which Fisks slife and death have inflicted on the community complete, and that is, that Stokes, the murderer, should escape justice. That the Courts and newspapers should have been occupied for months with the quarrels of the two seoundrels about a common strumpet, and that the helpless stockholders whom Fisk had swindled should, after vain appeals that the heapers seek miners whom I is a manage among the heaper from Mansfield's production of Fisk's 'love letters' to her, was humiliating enough and all conscience; but the lowest depth would be reached if Fisk's read of the same tribe as himself, should be allowed to end their quarrel by ambushing and murdering him in broad daylight, in a great city, on the staircase of a crowded hotel, and escape punishment, either through legal quibbles or jurymen's stupidity."

An ingenious mechanic in New Orleans constructed a safe which he de-clared to be absolutely burghar-proof. To convince the incredulous of the fact, he placed a one-thousand dollar bill in his pocket, had hunsel locked in the safe, with a liberal supply of provisions, and the key east into the river, declaring that he would give the money to the man who unfastened the door. All the black amiths, and carpenters, and burglars in the State of Louisana have been boring, and blasting, and septembers, and officials in the state of blassaria line of tool and explosive mixture known to science, and the man is in there yet? He has whispered through the key-toole that he will make the reward ten thousand dollars, if somebody will only let him out. He has convinced everybody that it is the safest safe ever invented.

- The catalogue of the rare and valuable library of books relating to Mexico and Central America, collected by the Abbé Brasseur de Bourbourg during a residence of twenty-five years in those countries, has just been issued in Paris. It includes the titles of eighty manuscript volumes on the language of Mexico and Central America, together with sixty grammars and vocabularies and eighty other historical documents. There are twenty works on the Maqua language of Yucatan, twenty-five on the Nahuatl of Mexico, fourteen on the Quichi, and many others. The grammars, which were prepared by the early Spanish missionaries, are said to be among the rarest works in philological literature.

- The New York Tribune thus criticises a play: "The configuration scene was shabby, and a great deal of irreverent laughter was excited by the behavior of a corps of supernumeraries, who ran three times into a burning building, and ou again by the back way, coming up fresh from the opposite side, with a faint pretence of being three different gangs. They carried into the midst of the flames a step-ladder, a coll of rope, a number of tomahawke, and a barrel, apparently containing gunpowder; and at last stood patiently and roasted to death in full sight of the audience."
- The Norwegians have determined to creet a buge granite monument on the wild coast of the Scandinavian peninsula, to celebrate the one thousandth anniversary of the establishment of their kingdom by the mighty warrior, Haruld Haarjager. This is a long period of national existence, filled with an interesting, almost fabulous history. In the early part of it Norwegian navigators excelled all others in boldness and skill, and it is pretty certain that they made discoveries on our coast centuries before the voyages of Columbus and the Cabota.
- Through tickets around the world are now issued in New York, the price being \$1,145 in gold, and the running time eighty-one days. The line of route, going westward, is from New York to San Francisco, say 3,000 miles; San Francisco to Yokohama, 4,700 miles; thence to Hongkong, 1,600 miles; thence to Calcutta, 3,500 miles; thence to Bombay, 1,400 miles; Bombay to Suez, 3,000 miles; from Suez, by the way of Alexandria and Brindisi, to London, say 2,300 miles; and from London to New York, 3,200 miles.
- A London letter notes the fact that numbers of ladies are now applying for situations as lady-nurses at salaries varying from two hundred dollars per annum downward; and the only difference, so far as I can discover, between the lady-nurse and the nurse ordinary, is that the lady-nurse dines with the children at mamma's luncheon-table, and need not associate with the servants in any way. The advantage to the children in having a lady constantly with them is incalculable, and to lovers of children the life must be by no means unhappy.
- The number of applications for patents last year was 19,742; patents issued, 13,033; caveats filed, 3,366; patents expired, 2,654. Of patents issued, all but 522 went to citizens of the United States. Connecticut leads the other States in the number of patents issued, in proportion to population. Next in order is the District of Columbia, and next Massachusetts. The whole number last year is in excess that of 1870. The Patent Office paid, in 1871, a surplus over all expenditures of \$\frac{116.624.82}{116.624.82}.
- At a masquerade ball lately held in Glasgow, Scotland, the costumes of the past century were freely indulged in. A local officer of inland revenue, managing by some means to get admission to the ball-room, took down the names of all who appeared in powdered wigs, and has since come down upon them for double duty, for using hair powder without a license.
- One of those quaint old English costumes which the pen of Dickens has immortalized by clothing his Dolly Varden with in "Barnaby Rudge," has been growing in favor for several seasons past; but now it has received the approbation of both Parisian and American taste, and will in various forms be made the marked novelty in early Spring fashions.
- Among the literary curiosities in a library at Southampton, England, is an old Bible, known as the "Bug Bible," printed by John Daye, 1551, with the prologue by Tyndale. It derives its name from the peculiar rendering of the fifth verse in Psalm xci., which reads thus: "So that thou shalt not be afraid of any bugs by night."
- The postal card system has been in operation for several months in Canada, and has proved as popular there as in Great Britain, where it originated. They are freely used for purposes of correspondence where privacy is unnecessary, and letter writing in the Dominion has been greatly stimulated by their introduction.
- The local editor of the Paducah Kentuckian lately attended a party, and, according to his own word, saw nothing toward the close of the evening but "a billowy ocean of foaming skirts, which, in their virgin and uncontaminated purity, rolled, and puffed, and surged in the gas!it air."
- Paper car-wheels are proving far more durable than those made of iron. A set on a New Jersey road has run 160,000 miles, worn out one set of steel tires, and is still in good condition, with a new set. The ordinary iron wheels only run about 75,000 miles.
- A learned and entertaining book upon blondes has appeared in Paris. It traces the origin and history of the passion for light hair, which is shown to be away back in the mediaval times and among the women of italy.
- Clams, alive and heathy, have been dug out of the prairie one or two miles from Houston, Texas. They were found at a depth of several feet, and the Houston people wonder how they got there.
- The Bank of France has lowered its rate of interest one per cent., and the Government is about to pay 400,000,000 francs to Germany, as part of the war indemnity due that country.
- The average speed of the fast trains on English railways is said to be about forty-five miles an hour, and on American railways about thirty miles an hour.

### Court Chat.

Edward Adolphus, Duke of Somerset, whose little work on "Christian Theology and Modern Skepticism" has made a sensation in England, and is circulating ology and Modern Skepticism" has made a sensation in England, and is circulating fast in this country since its republication by the Appietons, is the head of the old-set but one of the English ducal houses. He is descended from an illustrious Norman family whose name, St. Maur, was corrupted by the English into Seymours have generally played an important part in English history. The greatest of the name was the first duke, the famous Lord Protector Somerset, of the reign of Edward VI, whose uncle he was. The present is the twelfth duke, and was born in 1804, and is consequently now sixty-eight years of age. He was educated at Oxford, was many year in the House of Commons, and as First Lord of the Admiralty was a member of the cabinet from 1859 to 1896. He has besides held many important offices, and it is not merely as the work of a great nobleman, the head of a great historie family, that his remarkable book has attracted so much attention in England. The and the standard proved shells man his remarkable took has attracted so much attention in England. that his remarkable book has attracted so much attention in England. The author's mature age, his proved ability as a public man, and his reputation for wt abense, have also greatly conduced to give it currency. Its chief value, however, is, that it says boldly and clearly what a great many men are privately thinking, but have hitherto refrained from saying openly, because they hardly dared to. To use a very homely Yankee phrase, the duke has "spoken right out in meeting." He declares that the educated, the cultivated classes of the community no longer believe the established doctrines of the Church; that philosophy and science stand aloof from religion in unfriendly attitudes, while literature gives currency to a thousand speculative opinions unfavorable to the old beliefs. The whole system of meeting education lends toward, the same result. The large and seasons. a thousand speculative opinions unfavorable to the old beliefs. The whole system of modern education tends toward the same result. Theological and secular instruction run in two opposite currents of thought. "Hence skepticism has been naturalized in modern society, and will not be repressed by denunciations against infidelity or by the lamentations of sentimental piety." The Duke devotes the greater part of his book to an exhibition of what he terms the inaccuracies and inconsistencies of the Gospels and of the Acts of the Apostles and the Epistles of Paul. The stories of evil spirits and their miraculous casting out of the bodies of Paul. The stories of exil spirits and their miraculous casting out of the bodies of those whom they were supposed to possess, are declared to be supersitions fables. The star which is said to have guided the wise men of the East to the cracle of the infant Jesus is explained as a mere figure of speech. The supermutural conception of the Saviour is rejected as impossible. Miracles in general are set aside as incredible, and their worthlessness as a basis of faith is urged on the ground, among those who witnessed them. The contradictions between the assertions concerning the Apostle Paul contained in the Acts of the Apostles and those made by Paul himself in his Epistles are discussed at length, and the general conclusion is drawn that the historical partitions of the New Testament are nothing more than inner. that the historical portions of the New Testament are nothing more than imper-fectly remembered traditions, and that the claim for them of verbal inspiration cannot be maintained. It is but justice to the noble writer to say that his language cannot be mantained. It is our justice to the noble writer to say that his language is always courteous and decorous, and that he fully recognize the immortality of the soul and the existence of a personal God, and also admits the merits of Christianity, while criticising the Christian documents. The teachings of Jesus Christ and his Apostles, he concedes, changed the whole fabric of section, supplying a new basis for civilization, a new framework for human thought, and a new motive fee human setting. Design the adaptive practical of Expression histographs. new passes for civilization, a new framework for human thought, and a new indive for human action. During the darkest period of European history, the Church, be says, was the preserver of civilization, holding men together when all other bonds were loosened. Had the Christian religion never been bestowed upon mankind, it is impossible to conceive how greatly the condition of nations would differ from what it is. Myths have been weven around its origin, but some divine and indefeasible truths must be contained within its doctrines. These could not have lived through so many centuries and spread through such various forms of civilization, if they had not their undying roots in the heart of man. While we by no means If they had not their undying roots in the hearf of man. While we by no means accept the Duke's reasonings as satisfactory, we cannot deny that he states fairly and in an inoffensive manner the conclusions which prevail among the social class to which he belongs. At the same time, we are struck with his singular ignorance of the mental and spiritual condition of other classes. He seems to imagine that, because the aristocracy of England is skeptical, there is no helief anywhere worth noticing. He gives, for example, a vivid picture of the old belief in the existence of evil spirits, and, after citing Barrows' declaration that their influence could not reasonably be doubted because it had been vouched for by historians, law-givers, and a vast number of witnesses the Duke assay. "Ved now the workly historians." and a vast number of witnesses, the Duke says: "Yet now the worthy historians, and a vast number of witnesses, the Duke says. "Yet now the worthy insteriant, the wise law-givers, the vast concourse of witnesses, are all equally unavailing; the spell is broken, the evil spirits have vanished, and these phantoms of discredited tradition will not again revisit a more experienced and incredulous world. It is evident from this dogmatic passage that the noble writer is wholly unaware that he is surrounded, even in his own country, by millions of people who believe as firmly in the existence of spirits as they do in their own existence, and are constantly witnessing, or at least believe they are witnessing, an amount of spiritsure and the property of the propert interference in human affairs as great as was ever witnessed or imagined in any former age. We think he is mistaken, also, in assuming that skepticism is greater in the present than in any former age. In the last century unbelief in Christianity was almost universal among the upper classes in Europe, and the Christian religion was attacked with virulence by the most eminent authors of France and England. To-day, on the contrary, the strength of the religious feeling that prevails is shown by the fact that open opposition to Christianity scarcely shows itself, except in the most obscure quarters .- Appleton's Journal.

- In a letter dated at Rome, February 5th, the correspondent of the Court Circular says: "There is no doubt that the King of Italy, as soon as he has 'put his house in order' in the new capital, will possess a Court the glories of which will attract all Europe, not to mention the other three quarters of the globe. It requires very little foresight to predict that Rome, so soon as the proposed improvements are made in its streets and houses, will become the focus to which health and pleasure seekers will converge in Winter; the first on account of its warm and baimy climate, the second for its unlimited wonders and attractions. The comparatively easy distance from the cold of Paris to the Summer of Rome will, I venture to think, leave the city of La Belle France merely as 'a place in which to spend a happy day' or two en passant to the Eternal City of wonder, pleasure, and sunshing.'
- The King of Sweden is the greatest poet, the Emperor of Germany the greatest soldier, the Emperor of Austria the greatest linguist, the King of Bavaria the greatest musician, the King of Faxony the greatest scholar, the King of Italy the greatest hunter, the King of Belgium the best dancer, and the Czar of Russia the greatest smoker, among the sovereigns of Europe. The time is past, however, when Napoleon III. was proclaimed the greatest of European state-men.
- We learn on excellent authority that Professor Esmarch, of Hiel, the son-inlaw of Professor Stromeyer, and well known amongst us by his work on the "Use of Ice in Military Surgery," is about to be married to the Princess Henrietta of Schleswig-Holstein, sister of Prince Christian, who married our Princess Helena.—Medical Times and Gazette.
- Prince Henry, son of the Crown Prince of the German Empire, has just been apprenticed to a bookbinder in Berlin.
- Don Michael Angelo Caetoni, the blind Duke of Sermonte, can repeat the poems of Dante from beginning to end.
- The Grand Duke Alexis is announced to sail for Rio Janeiro, from Havana, and thence direct to China.
- Guiseppe Mazzini, one of Italy's greatest republican patriots, died March 11th, at the age of 68.
- The appointment of Alexis as Viceroy of Poland is being considered by the Czar.
- We have no profound respect for the managing editor of a daily paper who babbles none other than the language upon which he was suckled. Cats and coyotes revel in the same inheritance. This is laid down without intended disrespect to Sam Williams et al. What we wish to say, with special admiration for these gentlemen, is, that we would like to put a Spanish head on them, for our eyes and ears are sorely afflicted with their rendition of the proper names and places in the country of Montezums. A late dispatch from the city of Mexico, as published in our village dailies, tells us something about one "General Pataccious," one "General Donalm Guerrera," and one "General Melaus," etc. Read, for these, General Palacio, General Donato Guerra, and "General Dontexist," and the linguistic blunders are corrected. If the managing editors were lately imported Fijilians or baby-devouring African cannibals, we could forgive this mutilation; but may San Pedro burl us from the heavenly portal, if we are not in a right good mood to d—n them, as it is.
- The Athens of Alameda County is in a state of financial bliss. This has resulted from the importation of a Cosmopolitan institution to that burgh. Verify, the Oaklanders grow merry over the idea of being able to support a theater. The journals of public abuse in that delightful retreat are in ecstacies because on one special occasion over \$500 was taken at the door. But little is said about the actors or the acting. The burden of the song consists in harping a refrain over the manificant generosity of the Oaklanders. Our semi-civilized neighbors across the bay remind us of little boys who invest their first two bits at a country circus and never cease talking about it. If the Athens of Alameda County does not keep very quiet about this financial expenditure, we shall be compelled to chastise those literary comsumptives there who are the head and front of the offending. Oh! immortal Oaklanders, why will be come down from the "high intellectual plane," and delight yourselves with the gross pleasure of having spent over \$500 for theatrical claptrap?
- The records of the lowest Temple of Justice has been lately defiled by proceedings wherein a burly policeman, under the cover of night and his official authority, followed and insulted married women. Had a like shameful thing occurred in some village nestling at the feet of the mountains of the moon, we should not sigh over the low state of African morals, but taking place in this saintly city, we are shocked at such evidence of immorality on the part of our imported and Christianized policemen.
- A Parisian journalist has compared France to a bottle of champagne, of which M. Thiers is the cork. One Bismarck is the wire.

#### Ballad. Subsidy: A Goat Island

TUNE - A Fine Old English Gentleman.

There is a corporation within this Golden State,
Which owns a line of railroad for conveying men and freight
To the Mormon town of Ogden, at an elevated rate,
And which began in a very small way ris the Dutch Flat swindle, but by
perseverance and bonds, including subsidies, became both strong and great,

For this Railroad Corporation is the deuce in subsidies.

Now this mighty Corporation had placed its terminus At Sacramento City, after no small bit of fuss, Whereat the San Franciscans raved and Oaklanders did cuss,

And tried their best to have a change, so that we of the Bay might have

all the benefits, profits, and advantages come flowing into us, Of this Railroad Corporation and its heaps of subsidies.

First, San Francisco said 'twould give all down on Mission Bay, If the Corporation would but make its terminus that way,

Some sixty acres more or less of finest kind of clay,
Which could be brought to the surface by a dredge with a ten-foot stroke,
or covered over with nice long piles if they wished to build a quay
For this Railroad Corporation from its many subsidies.

The Railroad took the handsome gift, but said twentd wait a while Before it filled the marsh-land in or drove a single pile,

And then it went to Oakland, and with clever word and smile, Agreed to make the terminus at that place if the city would donate all its water front and never-expect the cars to stop within a mile, For this Railroad Corporation is the dence on subsidies.

Next, the Corporation bought the old Vallejo route, And then, before the people could mistrust what 'twas about,

It gobbled all the other roads, and then expressed a doubt Concerning the permanent location of this remarkable terminus, which was as unreliable as a Spanish land title or an old black cat with a bad rheumatic gout,

For this Railroad Corporation wanted other subsidies.

And then this city rose from sleep, and in a hearty way,

And then this city rose from sieep, and in a hearty way, Exclaimed." If you'll come here we'll build a bridge across the Bay, We'll raise the funds, you'll have a bridge and not a cent to pay!" But the Corporation wrote a letter half a yard long, which, being inter-preted, implied that the Corporation was on another lay; For this Railroad Corporation had its eye on subsidies.

Then the People grew excited, and raised a hue and cry of "Anti-Subsidy," and vowed they never more would try To help the Corporation, but would break its power by A lot of uncorruptible and undefiled Legislators, who had been elected for

the express purpose of bestowing a black eye
On this Railroad Corporation which is fond of subsidies.

But when the Legislature met the simple People found

That the Corporation's agents had been slyly prowling round, Till the Legislators one and all had changed their stamping ground,

And voted as the rai road wished on every question, and sent Sargent to the Senate with the understanding that he should help Jim Nye and his confreres to expound

How this Railroad Corporation should have other subsidies.

And now that Stanford owns the railroads and the boats, One half the State and more than half the Legislative votes,

For Frisco or for Oakland he doesn't care two groats,
And has decided to retire to a secluded liste of the sea sometimes called Yerba Buena, but more familiarly known as the Island of the Goats,
With his terminus, his radroad, and his lots of subsidies.

Which little rhyming narrative just shows us that, Whereas,
The Corporation's clever and the Public is an ass—
Resolved, the first must always win, the other go to grass;
Which happy consummation every one who has noted the brilliant efforts of a San Francisco community to make a commercial idiot of itself

hopes soon may come to pass.

As also hopes the Railroad with its wealth of subsidies.

<sup>-</sup> The Speaker of the British House of Commons has a magnificent residence furnished and kept in repair at the public expense, and containing one hundred rooms. He receives a salary of \$25,000, and on retirement is always created a viscount and has a pension of \$20,000, which on his death passes to his eldest son. Oddly appear by the later than the public expenses to his eldest son. Oddly enough, neither the late nor the present Speaker, although both married men, has any son to inherit these good things.

## The Julian Gold Mining Company.

[Incorporated under the Laws of California, March 15th, 1872.]

Capital Stock, \$1,000,000, in 10,000 Shares, of \$100 cach, placed to Subscribers at 10 per cent. on par value. \$40,000 to remain in the treasury to develop the Mine and defray the cost of erecting a new Twenty-stamp Mill and Steam Hoisting Works. Paymenns—On application, \$1.00 per share; on allottment, \$1.50 per share; within 60 days, \$2.50 per share; on purpose the returned in full in event of no allottment. Directors for the First third months—J. W. Mather, Geo. D. Rodorts, M. Mayblum, Geo. W. Beaver, Thos. 1, Poulterer. Treasurer—Alexander Forbes. Sechetary—T. F. Cronise. Offices of the Company 400 California treet. Sec. Procession. of the Company, 409 California street, San Francisco.

This Company is formed for the purchase and working of the Julian Gold Mine, situated near Newcastle, on the Central Pacific Railroad. The vendors, instead of giving voluminous reports from professional experts, prefer that parties proposing to subscribe should make a personal examination of the property, which can readily be done. Leaving the city in the morning and returning next day, will afford ample time for a thorough examination, and every facility will be extended those destring to do so. The following facts are respectfully submitted: LENGTH OF VEIN—2500 feet. ALTITUDE—970 feet above the level of the sea. LOCATION—One mile from the C.P. R.R. Station at Newcastle, and 113 miles from San Francisco, via Vallejo, in the semi-foot hills, and on the main gold bearing belt extending in a southerly direction from Nevada to Mariposa county. Geological Fointy-Atron of the Bell-Homblendic, feldspathic and micaceous granite; porphyratron of the Bell-Homblendic, feldspathic and micaceous granite; porphyratron of the semi-foot hills. cisco, via Vallejo, in the semi-foot hills, and on the main gold bearing belt extending in a southerly direction from Nevada to Mariposa county. Grological Formation of the Belt-Hornblendic, feldspathic and micaecous granite; porphyry; trap (diorite); and metamorphic slates. Course of Lode-Northerly and Southerly; dip, Easterly Södegrees: traceable for 5,000 feet. Pay Chutz-Continuous for 1,384 feet, as proved by workings (mill tests). Strength of Lode-From 3 to 5 feet; average thickness, 3 feet fo inches. Gangue-Laminated Quartz. Metals.—Galena Blende, Iron Pyrites, Gold and Silver. Title-Perfect; Government Patent applied for. Water-Ample for steam and milling purposes, or for motive power, if desired, at 10 cents per inch, miners' measurement. There of the control of the c safe to predict, will amount to at least ten per cent. per month upon the valuation at which the mine is placed to subscribers. This, in connection with the certain rapid appreciation in the value of shares, makes the investment a peculiarly and exceptionally desirable one. Estimate of Oar Reserves—We find in the 150 foot level, estimating 13 cubic feet in place per ton (see map):

South from Main Shait	5.169 tons
Between South and Main Shaft	861 tons
Between Main and North Air Shaft.	8.722 tons
Between North Air and North Shaft.	7.080 tons
Between North Shaft and Mexican	3.980 tons
On the 230 foot Level	19,600 tons
	,

estimate of values:

# Telegram from Governor Stanford.

In connection with the ceding by Congress of the half of Goat Island to the Central Pacific Railroad, the following telegram from Governor Leland Stanford to the Board of Supervisors of this city will be read with interest:

SACRAMUNTO, March 11th, 1872. To the Clerk of the Board of Supervisors of the City and County of San Francisco; To the Hon. Wm. Alvord, Mayor, and the Hon. Board of Supervisors of San Francisco: I am informed there will come up for consideration at the meeting of your Board this evening a resolution in regard to Goat Island being used as an of your Board this exeming a resolution in regard to Goat island being used as an accommodation to Commerce, in connection with the Central Parelle Railroad. The Railroad Company has now, and always has had, in reterence to their business accommodations upon the Bay of San Francisco, particular regard to the wants of the City of San Francisco; have been, and are determined to avoid, if possible, doing anything to its prejudice; but on the contrary, to subserve as are as practicable its interests. The occupancy of Goat Island simply means the transfer of the business of the Oakland wharves to the Island, and nearer and better facilities for the business of San Francisco, and of all others doing business with the rail-

road, as well as for the railroad itself.

As to the injury to the barbor of San Francisco in consequence of the occupancy As to the impury to the factor of San Francisco in consequence of the occupancy of the Island by the Railroad Company. I cannot concerve there is any cause for apprehension. If there were, the Railroad Company would not consider the project for a moment—its interests in that respect being identical with every other interest of the State and country. The question of affecting the bar at the Golden Gaie is determined by ascertaining whether the quantity of water passing by the tides over determined by assertanting whether the quantity of water pressing by the times over the bar would be lessened, and that is, determined at once by the amount that the reservoirs of the Bay would be decreased. Certainly this would not be appreciable, and therefore the scouring process of the fides upon the bar would not be doning ished. The possession of the island by the Rainroad Company wou d not affect their terminus in San Francisco any more than would continue ment to the Osksand wharves with their necessary enlargement, if the island is not to be had. Perhaps it is proper to add that the possession of the island would not interfere with the intention of Company to concentrate to the extent practically at Mission Bay, in case the necessary legislation can be had to make that point available, and, further, it is the decided opinion of the Company that the best interest of San Francisco require that the roads from the North should reach the is and, even though eventually they shall enter San Francisco by a bridge across the Bay. It is possible that the Chamber of Commerce of your city do not understand that the Southern Pacific Railroad will, in order to avoid the heavy grades necessary, consequent upon passing from Tulare Valley into the Santa Cara Valley, send its business by the way of and the Finale value, and thus reach San Francisco in company with the railroad system of the North, by the Livermore Pass and the Straits of Carquinez and Oakland, until the bridge across the Bay is constructed.

LELAND STANFORD. Respectfully.

# Sheriff Adams and His Defamers.

We believe that the character of the common scold has not been popularly considered the embodiment of the feminine virtues. As a general thing, the individual who distinguishes himself by his readmess to bring rading accusations against his neighbors, and to discover rascality and corruption wherever he turns his gaze, exneighbors, and to discover ascality and corruption wherever he turns his jazze, except at home, is not regarded as the highest type of the patriot and christian. Your foul-mouthed, reckless definer is not tolerated in good society; why should a newspaper be tolerated that seeks to gain a reputation as a "retorner of pointial abunses" by promiseous vilification of every gentieman who chances to hold a responsible office under the city government. Why should the promiseous public linr who circulates his foolish calumnies in print, for the sake of making a sensation and gaining notoriety for his raiscally sheet, he held less infamous than the private shanderer? Here is a problem in casuitety which we would, then to refer to ne mr wat creames as roomstreammines in print, for the sake of marking a sensation and gaining notoriety for his rascally sheet, he held less inflamous than the private slanderer? Here is a problem in casuistry which we would like to refer to the Professor of Ethics in St. Ignatius' College. We would concatable Serie to the Professor of Ethics in St. Ignatius' College. We would concatable Serie to the Verolessor of Ethics in St. Ignatius' College. We would concatable Series to the Verolessor of Ethics in St. Ignatius' College. We would concatable to snarling at his heels these three weeks past, were it not for the fact that there are victoring at his heels these three weeks past, were it not for the fact that there are victoring to around bragging of the exploit as if he had bagged a 2000. Some years ago a "live paper" in this city set out in the career of a "reformer of maintipal abuses." Aspiring to the high position of the public's cur, it sought to establish its claim to an occasional hone and the reputation of an hone-t watch-dog by veiferous barking against imaginary depredators. If there were no suspicious persons prowling around its master's premises, it showed to gums and made noisy demonstrations against any innocent passer-b. As big flees have little fleas to bite 'em, and these still less ad infinitions, so this little "live paper" has within the last few months had a still more insignificant imitator. Another crew of journalistic adventures have set up in the "municipal-abuse reforming" business and commenced howing. Thus far, we are glad to be able to say, they have not met with such success as to encourage further enterprises in the same line. The "municipal-abuse reforming" business has been overdone, and the community is very nicipal-abuse reforming" business has been overdone, and the community is very sick of it.

#### Female School Teachers' Successful Protest.

We have a profound contempt for the "somebody" who "told Senator Wheaton that the female teachers of San Francisco dressed extravagantly and were fond of parading up and down Montgomery street—silly young zirls with bows and jewels innumerable." Our contempt is no less profound for the man who drew up "the Bill to reduce the salaries of the Female Teachers in the Primary Schools of San Francisco," and ditto for the man who approved said Bill. The document—the contemptible offspring of a sterile brain and poverty-stricken heart—was introduced by the aforesaid Senator Wheaton, but the "country members" (all honor to them for the act), killed the mental abortion. Fortunately or unfortunately, when it comes to saying bitter things we are plethoric with bitterness and pour it out upon the heads of sinners like a swollen river overhowing its banks; but when it comes to saying sweet things, the fragrance of our heart is saturated with so much gall-that our words at best are "bitter sweet." Still, we shall attempt to say a kind and cheerful word for Miss Sallie Hart, a school teacher of this city, who was delegated to proceed to Sacramento and protest against the Bill introduced by Senator Wheaton. This noble-hearted young woman accomplished her work well, and through her efforts the unjust bill was defeated. As to the miserable and insulting "somebody," who traduced the female teachers of this city to Senator Wheaton, we have in store for the 'lunatic such sarcastic medicine as will make him wish he was born a Fijian—a status of humanity for which he is, no doubt, best fitted. When this Puritanical ass brays about school women who, after a hard day's work, take a passea up and down Montgomery street, it is time that his huge ears should be lapped across his eyes by special act of the Legislature. If a woman cannot dress neatly and richly, without a libelous wretch growing envious and jealous, shall we resort to the Furkish custom of having her veiled? But the pritance now given as salaries to the female teachers in Pr

#### A French Financial Idea.

We are not usually prone to analysis, because analysis is of our pet aversions, and produces upon our brain much the same effect as do green peaches upon our stomach. But even were we of the analytical turn—which we do not admit that we are—it would be infinitely more profitable, we are convinced, to analyze the peculiar inpulse which prompts a dog to bark at a shadow, than to follow the winding mystery of motive which impels a Frenchman to do everything that he does. We have fallen into this strikingly original channel of reflection after reading a recent dispatch from Paris, wherein it is stated that the Syndicates of the various watering places in France have petitioned the Assembly for the restoration of licenses for gambling. Almost any people in the world, other than the French, would, in a strait like unto theirs, set them about the reparation of their broken fortunes in a chastened spirit, wherein contrition for their past errors should be a shining and conspicuous element. But the idea that profit may be judiciously blended with vengeance has taken possession of the French mind, and its fruit is this inspired petition, which of course contemplates the easy absorption of the votive thalers which the German is expected to bring over and ofter up at the Spas of France. The success of this pleasant scheme of poetic justice would enable Frenchmen to cull from the profits of cards the sweets of revenge in amplest measure. It is wanting, however, in an element of success which to the unturord mind would seem of the last importance, to-wit: the willingness of the German to permit this garnering of this double harvest at his particular expense.

<sup>—</sup> When a Sacramento paper attempts to be funny we are led to believe that its editor enjoys an agony akin to that of an elephant trying to dole out Yankee Doodle from a wooden jewsharp. An editorial sharp, who resides where such journals are published, has startled the matrimonial world by discovering that the sixtieth section of the Civil Code reads as follows: "All marriages of white persons and negroes or mulatioes are illegal and void." We do not see why an editor should grow facetious over this net-work of words which so thoroughly invalidates the marriage contract where the parties thereto are white, colored or mulatio. Rather, is it a matter of sorrowful contemplation. But as there is nothing in it to prevent a full-blooded white American male from marrying a full-blooded Digger Indian female, should we not find balm and consolation in the thought that one avenue is left open by which the homogeneousness of the native races can be prosecuted with profit and pleasure."

#### Absurdity.

The tendency to an exaggeration of all the good qualities of the dead, although arising from a kindly impulse, is hugely absurd. A man dies—his death silences all the unkind criticis—ms of his enemies and brings into full barking chocus all the yelping eulogies of his friends. It is Washington Irving who writes "Who can look down upon the grave of an enemy and not feel a compunctions throb that he should ever have warred with the poor hundful of earth that lies beyond the tomb, but is it necessary to make show of fulsom adulation over every poor mortal who shuffles off the coil? The church-yard epitaph indicates that only good men die: the pulpit address delivered to weeping relations sends every-body to glory: the press embalms the memory in sweet scented herbs and flings flowers over the urn that contains the last remains; the preacher preaches held-flings flowers over the urn that contains the last remains; the preacher preaches held-flings hold the pressure of the pressur

#### The Cession of Goat Island.

Some months ago we warned the public that a war for the cession of Goat Island was inevitable, but the public failed to arouse itself to action until the eleventh hour. At the time of writing the war is being wazed in earnest. Upon this important subject we have received a large number of communications from leading merchants, warehouse-men, real estate owners, and others having weight and power in the community. Some of the communications will be found in to-day's Kiese Lekter, as we are desirous that the sentiments and opinions of our most influential citizens, on important public subjects, should have full and free-scope in these columns. In the present excited state of public opinion, a few calm and dispassionate words are not out of place. The people of San Francisco, as represented by our commercial, real estate, and financial representatives, have been dilatory in their action in this matter, while the Central Pacific Rainoral Company, representing the public at large, European and American, has been active and aggressive. This aggressiveness has virtually brought them victory. We cannot now enter into details, but we will freely confess our firm belief that the Central Pacific does not intend nor wish to injure San Francisco, for in so doing its own interests would suffer serious loss.

— A popular writer occupies an entire page of a magazine in describing his own vulgarity and insolence to a gentleman whose sole offence was parting his hair in the middle. A few years ago, when it was the universal custom to wear the hair in this natural and becoming manner, we make no doubt but this man would have been equally vulgar and insolent to any person who should have parted his hair upon the side of his head and he would have had a shade more warrant for it. A man who now parts his hair in the middle has the justification of nature and former custom; but the first who dressed their heads the other way could have been honorable, inasmuch as it was evidence of strong individuality; at present it is proof of a lavish conservation of intellect.

<sup>—</sup> An old gentleman, traveling on a Western railroad, had two ladies, sisters, as companions. The younger, an invalid, soon fell asteep, and the old gentleman expressed his regret to see so charming a young lady in ill health. "Ah, yes, indeed," sighed the clder sister, "a disease of the heart." "Dear me," was the sympathetic response, "at her age! Ossification, perhaps?" "Oh, yes, sir—an ossifer—a lieutenant!"

#### Hash-Houses.

A city of one hundred and seventy thousand inhabitants, and not a single hotel? That is accurately a description of San Francisco, to-day. We do not mean to imply anything to the discredit of our many excellent, and even luxurious, boarding houses; they have their functions and their advantages, but among these latter we must not rashly enumerate pecuniary profit to their owners. They don't pay, and they can't be made to pay. The truth is, a slow progress is observable in the hotel-keeping—a progress that marks rather tardily our advance in civilization. The "European plan" is coming into favor, and such establishments as the "Hoffman," the "St. James" and the "Brandreth" of New York, and the "Parker" of Boston, are crowding the old-style houses out. That is, they are making all the money; though, of course, it will take some centuries of steady loss to make people understand it. All our hotels are constantly full of regular boarders taken at low rates, and with people who mean to remain over night only. The man who is toot-loose—who designs remaining in town a week, two weeks, or a month, sometimes goes to one of these places. But he is insanc. As a rule, he gets "furnished rooms" and feeds at the rotisseries. "No deduction for absence from meals" is not a cheerful sound in his ears, and—in short, he won't stand it. What is needed by our present, and will be demanded by our future, social condition, is a place where you get all you pay for, and get the best; where at any hour of the day or night, you can sit down to any dish that is eaten by civilized Man; where you can find a servant who speaks your language, be the same however outlandish a speech; where you meet everybody and learn everything; a radiating centre of local and general intelligence; where you go to meet Smith, and mechanically to hear from Brown—in short, a hote!! The houses we have are good in their day; but we are outgrowing mere cobperative housekeeping. We have a more active movement, a more discriminating and a keener taste, a sharper and

## Snubbing Autograph Collectors.

We are told a good anecdote of the ingenious expedient recently adopted by a distinguished American wit for the purpose of baffling a bore. An autograph collector of New York, well aware that Oliver Wendel' Holmes had a lively antipathy to creatures of his class, but most anxious to capture a specimen of his hand-writing, fell upon the device of addressing to Holmes the following question by letter. "Which do you think the best dictionary—Webster's or Worcester's?" He, of course, believed that common courtesy would compel Mr. Holmes to send him a reply, and that in this way he would get the autograph which he was so very anxious to add to his collection. But Mr. Holmes was too many for him. By return of post he received a sheet of note paper, on which was neatly pasted the one word, clipped from the writer's own letter, "Webster's." There is another good joke of a kindred nature related of Mr. Frederick Perkins, whom his uncle, the celebrated Henry Ward Beecher, had, during a temporary absence from home, left in charge of his correspondence. One day there came a request for Mr. Beecher's autograph, to which Mr. Perkins responded in a letter of graceful acquiescence, subscribing it "H. W. Beecher, per T. B. Perkins." Some Yankees have evidently a neat way of snubbling certain bores.

#### In Memoriam.

ABNER H. BARKER is yet another name that 1872—so young, so merciless—has added to its solemn death roll of prominent Californians. One of our Pioneers, he came to this country in 1849. He engaged at once in mercantile pursuits, and was one of the founders of the California and Oregon Steam Navigation Companies. Later on, his wealth helped to develop the Washoe mines, and he was one of the first mill in Nevada. He was President of the Crown Point Mine for many years, and always held a prominent position in San Francisco. As we knew him, so we speak. Strictly honest and upright in his dealings with the world—of keen foresight and remarkable business talents—his heart ever open to the sorrows of others and his hand ever ready to relieve; his charity unbounded and yet unknown; his friendships rare but ever-during. A friend on whose strong arm we could lean; in whose true heart we could trust. And when the last sad parting comes to others as it has come to us, may it be tempered with the thought that he whom we loved is beyond the cares and sorrows of this world; beyond its temptations and its regrets; beyond its trials and its woos.

J. H. J.

## Our Mineral Wealth.

The Gwin and Hudson mines, Calaverus county, are yielding a large quantity of rich ore; the mins are running at their full capacity, and large returns will soon be made. The Calaverus Hydraulic Company have nearly countied the laying of the mining purposes. The rich ore: the mass are running at their full capacity, and large returns will soon be made. The Calaveras Hydraulic Company have nearly completed the laying of mineteen hundred feet of iron pape for conveying water for mining purposes. The Grass Vailey Union, of March 9th, says: "The prespects of the North Star Mine were never better. The mine has shipped for the four weeks ending yest-relay, gold to the value of \$19,000. The result is very good when it is considered that water in the mine has been very free during the month and that there were four "break downs," during the time, in the machinery." The Red Jacket Company Nevelan, have struck splendid gravel, and an English company are treating for its purchase, have struck splendid gravel, and an English company are treating for its purchase, have struck splendid gravel, and an English company for the sum of \$1,55,000. The Black Hawk Company, same county, are running on "top dirt" with very good results. Gold, silver, copper and a valuable copper fedge have been discovated in Fitzar Quantities of fine ore. Some assays made of a tair quality of shipping or evaluations of the over-sixt feet of main tunnel, was made by three men. Aleassay of the gallet over-sixt feet of main tunnel, was made by three men. Aleassay of the gallet over-sixt feet of main tunnel, was made by three men. Aleassay of the gallet over-sixt feet of main tunnel, was made by three men. Aleassay of the gallet shave sold their mens on trayerent's Hill. Sierra county, in the Mowey & Jones have sold their mens on trayerent's Hill. Sierra county, in the sum of \$15,000.

An expeciation in scarch of the tich silver looses discovered in Death Valky as been nitted out in San Bernard no. The Sheba naire, Nevada, is produced. The shipment, assays from which relate the pape graves on the health of the tich silver looses discovered in Death Valky and here shipment set full for the sum of \$15,000.

In Montana, the Union Company have struck ruch pay graves on the health Creek, the dirt washing out at the ra

amount, showing the mines in that Territory to be in a floor skin, condition. In Montana, the Union Company have struck rich pay greened on hedian Crock, the dirt washing out at the rate of \$5 to the pan. The reports from this Territory record great activity and energy in mining operations. In I tak, the production of builtion is unabated, notwithstanding severe weather. The Sail Lake Tribinary February 20th, says: "Weds, Fargo & Co, have received, since the 16th instant, two lots of builtion, valued at \$125,008 90."

Our mining exchanges are bare of actual results, but give accounts of the most extensive and thorough development of all classes of mines on the Pacific Slope.

# Protestantism and the Social Evil.

Protestantism and the Social Evil.

"For over six months," says the Unitedic Telegraph, of February Sth—a journal published in Cincannat.—"Dr. S. Edward McKaney, A. M., M. D. has labored at the procuring of accurate statistical information regarding the social evil in Chicago. Some items of the result of his labors are here appended. Total number of women of the denil mends in Chicago, 921. We sha not worry ourselves to find out why Chicannati takes this special interest in Chicago swickedness to find out why Chicannati takes this special interest in Chicago swickedness to find out why Chicannati takes this special interest in Chicago swickedness, neither shall we question the Doctor how he went to work to get his internation, Doubtless it was a labor of love. Neither shall we shring our shoulders doubt nucly, So to the comparatives, speal malber of exprising him give various we had Only No. Doubliess it was a abor of love. Nother stand we string our similarist modelly, as to the comparatively small number of exprisins in a city which we had fully be leved to have been the wicked st yet. Our business is with the results of the Doctor's labors as recorded in the Telegraph, which show, among a variety things, that out of the 937 laties of the Chergo Jenni monde, \$93 were Protestants! In fact, in the mind of the distance which medics, it would seen that Protestants must be the protection of the cherging product of the cherging product of the protection of the cherging product of the product of the protection of the pro in fact in the mini of the cashin, assing more as a many and a big. P. and Prostantion with a big. P. wire almost synonomous, he seems quite oblivious of the fact that Popery also commences with a P of like dimensions. The above argument is the strongest we have yet heard in layor of Roman cathol-frient. It is a staggerer. We are a Heathen coarselves, and don't care a rap for iciem. It is a staggerer. icism. It is a staggerer. We are a Heathen ourselves, and don't care a rap for any of them, and are happy to state that our exet is apparently unexpresented by any of them, and are happy to state that our exet is apparently unexpresented for social cytis" attogether in Chaegos, but had we have been Protestent it the period of reading the Doctor's article, we should have immediately secreted and thown into reading the Doctor's article, we should have immediately secreted and thown into the arms of what Protestant terms the "Seariet about". Lady of Babylon, "i.e. the Romash Charlet. And by the by, is this the solution of the mysistry" is father that "Mother of Intiguity" (we quote from Protestant divines has no need of the wickedness of her children, being too utterly dambad herself."

The dust of funnishes a variety of agusticing information of like purpose in recogni-

The doctor furnishes a variety of statistical information of like nature in regard to other cities, which is too vontainous for our columns. In regard to Paris, he says that there are 25,000 needsed "evils," of whom 2,000 are catholic and 19,000 Protestant: We had a kind of idea that Protestantism was not very rampant Paris, but if the above statement is correct, one of two inferences must be natural. ratis, man the above sharmeness correct, one of two interesters must be materially drawn; either that Paris is a Protestant cuty, or that all its Protestant who have fallen from grace. Doctor, if you had left out your Parisian investigations, we might perforce have believed you; but their record has, with us, at least, just

about let you out. Go and lie no more.

— Not a single Havana journal knew who James Fisk, Jr., was. The Voz, in mentioning his death, says, "He was probably one of those persons who lately figured in the scandalous abuses of the municipality of the State of New York," and calls him, also, a certain Mr. Fisk.

## Wayside Gushings.

BY MRS. HARRIS.

MY DEAR MAIL BAG: I pause while a-sipping my beer, To obsarve that retirement ain't possible 'ere, In a world as is allus a-gaddin' about, And drivin' folks mad with its riot and rout. In my last, which I wrote you a veek from to-day, In the country, where, lodgin' up two pair o' stairs, I composes my feelin's and drown life's dull cares In the Chinaman's washtub, as wrings 'em out dry And charges by the dozen, which the same is not 'igh. Last Monday the fust rays of Phebus Apolly Associated the control of the same and the s I fust thought 'twas th' oudacious Mongolian, Ah Sam, And bein' in my nightcap, I 'ollered out "dam,"
Ven, hopenin' my hoptics, whom should I be 'old
But my little maid Sayrah, impetaous and bold?
Says I, "What d'ye want?" "La, missus," says Sally,
"Thier's a 'andsome young man vatin' down in the alley!"
"Then show 'i'm up hinstant!" and whom should I see But the prince of Bohemians and poets, O'C? Says he, "Mrs. 'Arris, this hauspicious morn Upon which our distinguished friend, Patrick, was born, 'Ar independent as a little was been, 'Av indoosed me to call thus permiscous to see
If with a feller poet you'll come on a spree?'
"Vait a bit," says I, "Dan'l, till I gets on my bonnet And fixes my waterfall, for to-day I feel on it While I'm 'ooking my stays take a drop o' poteen And drink to Saint Patrick and Erin so green! So off to the boat arm-in-arm we both started, But the crowd was so great that I felt quite famt-arted; Says he, "You've a chapperong, don't be feared, Mrs. H," So I clung to his arm a most ready to scraitch. Yen we got to the corner o' Kearny and Jackson,
Says O'C., "Mrs. H., you stay 'ere, I'll be back soon,"
And there, unpurfected, I stood, be the powers,
As lonely as one of old Ireland's Round Towers. An' I nivar set eyes on the young man again, For the crowd, rushing on, wouldn't let me remain. I got a most 'orrible bruise on the stern From a Finnikin's 'oofs, and, not able to turn, I was borne by a hawful consekctive push. Till, quite 'eated, I stood at the corner of Bush.

There I viewed the purcesshan -my eye! weren't it grand,
What with wearin' of the green and 'earin of the band! That there triumphal Car, with that bootiful creetur, So graceful in form and so lovely in fectur? The band played "Rich and rare was the Jims she bore," From a poem as was written by Tummus O'Moore. From a poem as was written by Tummus O'Moore.

Some small boys be'ind me was up to some joily tricks,
A-pickin' of pockets while the men all talked polities:
Says one, "Top o' the mornin' to ye, Misther O'Toole,
D'ye think as the 'epe of old Ireinad's 'Ome Rule !"
Says he, "But' is our buttress," while another—I don' know who—
Cried "Three cheers for Butt and three grouns for th' O'Donohue!"
Another says, "Ome Rule be dammed, "says he, "dammy,
Out' ope's in a war 'tween John Bull and Uncle Sammy,
In conselience of the dammer as was drove by th' Allybermy. In conselens of the damage as was done by th' Allybammy— Ven it comes, may perdition be the fortin' o' that Mick As don't fight agin England with the 'elp of St. Patrick!" Says a feller, with sich himperence as never was seen, "Old 'oman, why ain't you a-wearin of green! So bein' alarmed, I concealed my hopinions, And raade my way through that 'ere party of Finnyuns, And valleing through the street I tried every store on it, For a bit o' green ribbon to stick on my bonnet; For since Queen Wictoria was stopped by O'Connor To a wartness termale it's incumbent upon her To be werry cautions when Finnikins is near For fear as they'd pop hempty pistols at her ear. But not a bit o' green could I buy at no price Though prepared for to purchase at a 'larmin' sacrifice;

The 'Ibernians had bought every bit of it out To make veskits and handidges for their turn-out.

So trustin' intirely to the green in my eye I took a helevated seat on some baskets and by The Market as did to a fish shop belong, Which their smell, I confess, were unkimmunly strong. At this moment Father Gallagher, best priest that thur is, Popped 'is 'ed out o' winder... 'Ow de do, Mrs. 'Arris?' Says he, quite familiar, an' I gave 'im a vink And drank 'is good 'ealth in a werry long drunk. Other priests follered arter with werry red noses, Their batton 'oles adorned with young cabbidge an' roses; Their lats was all shiney, their chins was all shaved, So I gave 'em a cheer and my 'ankercher I waved. Some on 'em was asleep while others was beguiling, The te dearm with coughin' an 'takkin' an' 'emilin', But the most of 'em seemed upon grim thoughts intent, 'Cos it's wicked for a priest to be caught a smilin' in Lent. Antiquarian raptur my buzzum did fill Ven I saw the man 'ose father at Winegar 'Ill 'Etped to wallop the Br tish—he were quite a corosity, And brandished 'is tinfoil with hawful ferocity. Them there Galapots\* too of old Erin's best days, I looked on their harmor with a hammerous gaze 'Ere the bottom of the basket gave way with a crack And some hoyster shells hinjured the small o' my back, So I picked myself up and before it grew later Began makin' my way to the Californy Theatre: But it took me two 'ours, and when I got there
'Twere impossible to find a sittin' or chair.
When the Grand Marshal saw me he 'o lered out, ''Thar is When the Grand Marshal saw me be overed out, "Inaris" That weenerplie female, the good Mrs. 'Arris's Let's give 'er a chair, 'and they gave three times three, Tho' I told 'em one chair were sufficient for me. Says I, "Who's a speakin'?' 'Says they, "Brother Justin," And 'is riverence came werry nearly a bustin' When he 'eard me, and says he to the band and the drum "Sound the loud timbrel, for 'Arris is come!" 'Ere my memory do not remember what follers, Except that Judge Londerback fined me five dollars !

"Mrs. Harris is here confused, probably by the "werry long drink" she mentions above. The old lady evidently refers to the ancient Gallowglasses, but Pors and Glasses are allone to her.

The American people are the most politic to ladies of all the nations of the centh. There is no other land where to woman is accorded the privateges, immunities and attentions bestowed here. John Bull is a besit to every thing but becauty; did anybody ever see an Englishman get up in a car or combos to a found, miless she was young and pretty! Did a German or Holland Dutchman ever get out of his comfortable position to make anybody else comfortable. Does history record an instance of Austrian or Richam being posite to a common female — we have poetry and romance. Everybody is posite to a Dutchess or a prima decaya. Politicness to woman is a sentiment that a Frenchman has no dec. of the has deportment, he will how, cry "merci" and "pardon;" but for gomene and kindly attentions to women, he is as callous as a callapages turtle. No woman who is not ugly, ill dressed or decrepid can go through the most fashionable bonlevard of Paris in the daytime even, mattended, without being insuited by rade looks and dishounciable proposals. The same remark is true of Madrid, Vienna and Berlin. A well behaved temale may travel alone from New York to San Francisco with scarce the possibility of insult, and in such an event will had a resolute and fighting defender in the first man to whom she may appeal. There is rot a community in our mining towns so rade as not to respect a virtuous woman. America is the land of genine chivalry and true politicness to the sex.

We sent our heathen to church. He says he went, and we must believe him. His notes are heconic but suggestive. Opening chorus by four voices: "Hair Oil, ye People!" generally responded to, judging from the Macassar atmosphere of the sunctuary. Don't inderstand the illustrated rebuses on the painted windows; answers probably on the walls, but he can't read. When the man in the raffled night-garment read the resolutions, they were adopted manimously. But when the collection was taken, he was sorry to see that Deacon G.'s hat-dollar had an elastic on it and went back into his sleeve. Not being a life member, he did not wait for the collation. Poor heathen! He says he prefers a day on the road.

<sup>—</sup> A man had his leg injured by a train on the C. P. R. R. Strange that any one should get mad and try to stop the cars in that way. It could not have burt the call seriously, us he probably will recover.

Special Brevities.

- The ruins of the world-renowned temple of Diana at Ephesus are being brought to light through the archæological enterprise of Mr. Wood. During the last twelve months a considerable area of the temple has been freed from the alluvial deposit which, following on the ravages of the Goths and the Byzantines, had closed over the remains of the giant building and obliterated its very site. In the course of this process of disentombment, many architectural marbles, more or less multilated, have been discovered, and colossal columns with a diameter of six feet have been uncarthed, proving this Temple of Diana to have exceeded in magnitude all other known examples of Greek architecture. Mr. Wood's labors were first carried on at his private expense, but subsequently the Trustees of the British Museum took the matter in hand, and the more recent investigations have been conducted under their anspices. Her Majesty's ironclad Caledonia has been engaged during the past month in shipping architectural specimens for conveyance to this country. These specimens have been selected so as to give an idea of the architecture as a whole; they include an example of the calatae columnae, and will be placed in the British Museum.
- Mr. Spriign Ausseum.

   Mr. Spriign recently spoke in his characteristic way of the burden of his pastoral duties to an audience in the Tabernacle, London. He referred to his illness, and advised every congregation to give their ministers a rest. They need not send them to Jerieho, but let them have a little leisure, so that their brains might be refreshed. As for himself, he had been six years without taking rost, and he found that his physical strength had been seriously weakened. No one living knew the toil and care he had to bear. He preaded for no sympathy, but taked indugence if he sometimes forgot something. He had to look after the Orphanage, had charge of a church with four thousand members; sometimes there were marriages and burials to be performed, there was the weekly sermon to be revised, the Sword and Trowel to be revised, and beside all this there was a weekly average of five hundred letters to be answered. This, however, was only half his duties, for there were innumerable churches established by friends, with the affairs of which he was closely connected, to say nothing of those cases of difficulty which were constantly being referred to him.
- is public readings, he dreamed that he was in a room where every one was dressed in scarlet. (The probable origin of this was the mass of scarlet opera-cloaks worn by the ladies among the audience having left a sort of afterglow on his retina.) He stumbled against a lady standing with her back towards him. As he apologized, she turned her head and said, quite unprovoked, 'My name is Napier.' The face was one perfectly unknown to him, nor did he know any one named Napier. Two days after he had another reading in the same town, and before it began a lady friend came into the waiting-room accompanied by an unknown lady in a scarlet opera-cloak, 'who,' said his friend, 'is very desirous of being introduced.' 'Not Miss Napier.' he lokingly inquired. 'Yes, Miss Napier.' Although the face of his dream-lady was not the face of this Miss Napier, the coincidence of the scarlet cloak and the name was striking."
- The Elliptical Map of the World is a new projection designed by Mr. G. T. Edkins, London, 3½ by 5 feet in size, and to be had on cloth, rollers and varnished, or on cloth to fold in case, for one sovereign. The map shows at one view the entire surface of the globe, and combines the advantages of the Mercator and globular projections, the different continents and countries being shown proportionately to extent of area. Among its special features may be noted the following; the dominant languages or races are shown by coloring; all the ocean currents and trade winds are shown, also the tracks of steam and sailing vessels, with distances and the submarine telegraphs; the periodical action and influence of solar light and heat, as also magnetic variations, are illustrated by notes, lines and a reference table. It will be seen that this map supplies a vast amount of special information. We have instructed our agent in London to forward one of the above maps.—Ed.
- The Spectator, ridiculing the shower of prophecies with which continental journals received the news of the success of the Sucz Canal, to the effect that Great Britain was to lose, first her commerce, then her commercial navy, then her supremacy at sea, and finally her Indian possessions; that the Mediterranean States were to recover their long-lost Oriental trade, and M. Lesseps was to be the average of an hundred seaboard cities ruined by the avarice of England, quotes the official return of the tonnage and nationality of the ships passing through the Canal in 1871: British, 546,621; French, 91,841; Austrian, 43,113; Italian, 29,400; Turkish, 16,959; Egyptian, 13,394; Dutch, 6,711; Russian, 4,820; Belgian, 4,400; American, 4,170; German, 3,250; Spanish, 3,157; Norwegian, 1,316; Portuguese, 919; Danish, 660; Burmanian, 408. Total, 771,409.
- —It is curious to observe that some of the simplest institutions make slow progress. The journals of a large and intelligent community, the citizens of Santiago, in Chili, are describing in strong terms the new plan of a Valparaiso bookseller to let out books for reading. His terms are to be 4s, per mouth, and books may be kept out for two months. It may, however, be noted that for some time public libraries have been encouraged by the State, and these are now becoming common in the great towns of Chili.
- The ponderous turret iron-clad ship Thunderer will be launched from Pembroke Dockyard, England, on March 25th. She is one of the largest ships in the world, her dead weight alone being 4,700 tons.

- The Walter printing machine, which has been kept a great secret, is now doing work for a Scotch paper. A continuous roll of paper four miles long is damped, printed, and cut into sheets at the rate of 12,000 copies per hour. Thirty-six miles of paper are printed each morning in two hours. It pumps up its own ink, and requires no skilled labor, supplying its own skill and brains.
- A student in the Edinburgh University, who was fined a guinea for disturbing his class, paid the greater part of it in haifpence, about a quarter of an hour being occupied in conting over the amount. This singular mode of "serving out" the professor who indicted the fine was carried out amidst the laughter of the class, by whom the amount had been subscribed.
- At a sale of autographs just taken place at Leipzig, letters of Goethe ranged from 49f, to 85f; Byron, 88f; Casanova, 27f; Linaeus, 31f; J. J. Rousseau, 60f; Schiller, 43f; Walter Scott, 26f; Voltaire, 75f; Young, 77f; Sebastan Bach, 83f; and Garrick, 75f. The original score of the *Invitation a la Valse*, by Weber, was sold for 37f.
- It is estimated that from January to June of 1871 no fewer than 393 panthers and leopards, 2-1 wolves, 263 bears, 188 hyonas and 183 tigers and cubs were killed in the Central Provinces of India. This destruction was effected for the Government at a cost of about 9,000 rupees.
- We learn that negotiations are being carried on between the Italian Government and the English for the transfer to Italy of the island of Socotara, and are fast approaching a termination. This island, it appears, has been my possession of the English since 1835. A penal colony is shortly to be established there by the Italians.
- At Baron Krupp's works, Essen, they have east another "infant" weighing thirty-six tons, and throwing a projectile of 600 pounds, with a charge of 114 pounds prismatic powder. The "infant" is to form part of the port armament of Kiel.
- —Mr. Winwood Reade is engaged upon a work called "The Dark Continent," in which he makes an attempt to apply Mr. Darwin's principles in their full extent to history and religion.
- Rumor has it that the story of Charles Dickens' life will be told again in the pages of All the Year Round, the relatives being by no means satisfied with Mr. John Forster's version.
- Direct steam communication is at length about to be established between Cardiff and the United States.

#### Court Chat.

- A paper tells us that the Prèfet of Naples went to the King and requested him to honor the ball at the Club del? Unione with his presence. His Majesty replied in the following words: "Vuol 'ella proprio che mi chiammo il tigho dell diavolo e lo scomunicato:" ("Do you really wish them to call me the son of the devil and the excommunicated?") The Prèfet then told His Majesty that it was customary in Naples to dance on the first Sunday in Lent, upon which the King waived his scruples and promised to attend.
- A bickering couple were overheard in high controversy, and the repentant Benedict exclaimed, "I am determined to have one quiet week with thee." "But how wilt thou get it?" said his taunting spouse, with that "reiteration" which married ladles so provokingly practice. "I'll keep thee a week after thou'rt dead!" was the tender rejoinder.
- The Khedive of Egypt never does things by halves. The success of Verdi's opera L'Aida, at the Cairo Opera House, has encouraged him so greatly that he proposes to hold in September next, at his capital, a great musical festival, to which the leading composers, singers and musicians of Europe are to be invited.
- The Emperor William of Germany has ninety-two orders and decorations. If he should wear them all at one time, their weight would be fifteen pounds. The Emperor Francis Joseph of Austria comes next. He has seventy-nine orders, weighing in the aggregate thirteen pounds and a half.
- A negro in the employment of the Grand Duke of Saxe-Weimer, said to have been formerly in Her Majesty Queen Victoria's service, and who acted there as a groom, is about to marry the daughter of a clergyman, who has been captivated by the merry, unconcerned ways of "blackey."
- The Western Mail is authorized to state that a marriage has been arranged between the Manquis of Bute and the Hon. Miss Howard, clust daughter of Lord Howard of Glossop, and first cousin of the Duke of Norfolk.
- The names that have been most freely mentioned as those of probable Vicerovs to succeed the lamented Earl Mayo are the Duke of Argyll, Lord Kimberley, and Lord Dufferin.
- The Spectator says it appears to be understood that Lady Mayo will be created a Pecress in her own right, the late Viceroy not having a seat in the House of Lords.
- The Sultan has received a large gift of birds and beasts from the Khedive, among them some Cuban bloodhounds, with keen noses for a negro.

The snuff-boxes of her Imperial Majesty the Empress Eugènie form a valuable collection of works of art, and are now to be seen at the establishment of Mr. F. Davis, No. 51, Pall Mall. These splendid boxes are far too good for use, either as receptacles for snuff, or as ministering to any other sense lower than that whereby the most delicate forms of beauty may be enjoyed. Carved out of fine gold or cut out solidly from precious stones, and adorned by rich yet chase work-manship in gems and enamel, the "Empress's snuff-boxes" are masterpieces of a style of art which, with the changed fashion of the age, long ago became antique. The collection dates chiefly from Louis XIV. and the Louis XVI. periods, though there are one or two specimens of an earlier date, notably a large deep Louis IV. box, oval in shape, and cut out of a single sardonyx, wonderfully curved in wattens subjects. The beautiful face of Marie Antoinette adorns the lids of two boxes, one an oval agate, richly mounted in gold, and the other a singularly plain black tortoise-shell. Among the massive productions is a large square gold box enamelled an plein, with six charming paintings, which fix the date as assuredly as if the box had engraved on it a duly attested certificate of birth. Whatever may be thought of "Madame de Montespan as Venus." there can be no doubt that in no other reign than that of "the Grand Monarque" would an artist have ventured to present "Louis XIV. as Mars." Another, gem, specially splendid by reason of its size, is a long and deep oval gold box, richly mounted in brilliants, ship it has not a half a dozen compeers in the world. Amongst the other remarkable units in the collection are an exquisite gold box, by Holbè, richly mounted in brilliants, and reported to have been the property of Marie Antoinette, the Queen herself aguring among the subjects of the curved work; a Louis XVI. gold box, oval in form, richly enamelled in landscape scenery; a small but rare oval gold box of the same period, with an enameled on a charming b

— The preface to the new edition of "Debrett's Illustrated Baronetage, with the Knightage, 1872," states "that Sir Charles Mordaunt, Bart, threatened the editor with legal proceedings, under the circumstances stated by Sir Charles in is letter on page 345, which is copied without prejudice to either party." The Hon, Baronet's letter is as follows: WALTON, WARWICK, November 13, 1871. Sir—I have enclosed the printed form received from you with the words erased again ["And has issue living—Daughter, b. 1869"], which, at my urgent request, you refused to omit in your edition of last year, notwithstanding that they were omitted in all other editions of peerages, etc., by other editors at my request. I have, therefore, only to add that if the words erased are not omitted I shall bring an action against you, which will, at all events, bring out facts which I am desirons should be known, and for that reason I am indifferent as to whether you have the law on your side or not. These facts will then come out in a court of common law, and perhaps you, in conjunction with some others, would rather that such further exposure did not take place, but in this respect you will consult your own interests and those of Lady Mordaunt and her relations. I remain, etc., C. Mordaunt.

— It is understood that Lord Mayo died very poor. His family never possessed any great estate in Ireland. It was one of those which throve in good times upon military and clerical patronage, several of its members having been prelates of the Irish Establishment in its palmy days. The late lamented Viceroy inherited a very limited patrimony, and, with the exception of his wife's fortune, he has left no provision for his younger children. It was a knowledge of this fact which inspired a cheer on the question put by Mr. Osborne regarding the intentions of the Government, as to whether they would advise Her Majesty to confer upon the surviving members of his family some signal mark of Royal favor. It is believed that a pension of £2,000 or £3,000 a year will be granted to Lady Mayo for her life, with the remainder to her eldest son for life.

Her Majesty, in a message transmitted through the Duke of Argyll to the Acting Governor-General of India, tells how deeply she has been affected by the news of the "deplorable calamity" which has "suddenly deprived all classes of her subjects in India of the able, vigilant and impartial rule of one who has so faithfully represented her as Viceroy of her Eastern Empire." The Royal message concludes with the following touching words: "To Lady Mayo the loss must be freparable; and the Queen heartily symathises with her under this terrible blow."

- A German authority hints at a marriage between Prince Arthur and a Prussian Princess.

## Gloaming, Night and Morning,

As the gloaming softly falls Who is this who gently calls To my soul, 'What are you doing-Are you duty's path pursuing. Are you soothing neighbors' sorrow, Are you dreaming of to-morrow, Dawdling, drowsing day by day, Wasting all your time away, Getting older, doing less, Sinking into nothingness.

While the wisdom age should boast Is to thee forever lost?

NIGHT. 'Mid the silent hours of night, Gather round me visions bright: Old and young are deftly blent, In the aerial firmament; Long-lost friends have come again, Bringing memories in their train. Sunbeams of youth's joyous days, Lightening age's thickening haze, Til! I see around, above Myriad traits of genial love; And as night-clouds pass sway Hope and truth burst forth like day.

MORNING 'Mid the morning's brightening rays, Quickly flies the murky haz Sunny skies now sparkle bright, Brds are warbling with delight; Flowers elate are gently springing, Water, air, and earth are singing; Every luxury is here, That can make life sweet and dear, Leading wondering eyes to see What God does for you and me Then let us gaze and wonder still, And muse His praise and wait His will.

-J. Ballantine.

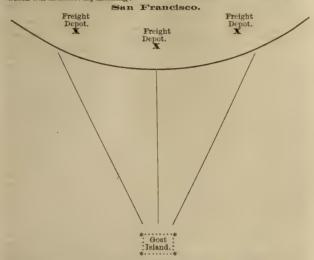

### Governor Stanford's Able Argument on the Cession of Goat Island.

While this very important matter was being discussed by the Assembly Committee on Federal Relations, at Sacramento, March 15th, Leland Stanford, President of the Central Pacific Railroad, was made acquainted by the Chairman with the wishes of the Committee to hear the statement of the President of the Rail-

road, and in response spoke as follows:

Mr. Chairman: With permission of the Committee, I will make a statement of Mr. Chairman: With permission of the Committee, I will make a statement of my views upon this subject. I believe that the resolution is founded upon misapprehension of the facts of the case. In the first place, Goat Island itself has no commercial value, I think, except in connection with a railroad, and for railroad purposes. As to the occupation of that island being an injury to this State, and to the Pacific States, I cannot conceive that possible. It would furnish better accommodation for commerce than is now possessed. The only accommodation at the present time for this great overland railroad on the Bay of San Francisco, where it can run its cars along side the ships, and thus save unnecessary expenses, is at Oakland. The wharves there are wooden structures, and, through decay and the destruction of the "teredo," they, of course, must be short-lived. The desire of the Company is to reach Goat Island, where their structures may be permanent, and where their business and the business of the community may be handled at the least possible expense. As to the injury to the harbor, I cannot think there is any least possible expense. As to the injury to the harbor, I cannot think there is any reason for apprehension. The Rathroad Company would be as reinctant and as unwilling to do anything that would injure the harbor as any other interest in the country. I made a statement the other evening to the Supervisors in San Francisco, in which I stated twith reference to the apprehension that the bar at the Golden Gate might be shouled in consequence of our being on the island, that the scouring process on that bar is determined by the amount of water carried by the amount of water carried. by the tides that flow in and out, and so long as the reservoirs in the Bay of San Francisco are not diminished, the quantity of water they will pass over that bar will not be diminished; and now I desire to reiterate that statement. At the presunit and be deministed. And the state of the Ilmited extent and with many restrictions. We have built the wharf at Second street at a cost to the Company of about \$600,000; yet we cannot land the farmer's street at a cost to the Company of about \$600,000; yet we cannot land the farmer's ton of grain, after ferrying it across the bay, on that wharf, without paying a toll of two bits per ton; nor can we take any kind of merchandise or produce to of from the city, without paying the toll of two bits per ton. Now, at Oakland we handle the grain and other freight without charge for wharfage or dockage. A ship of as large burden as 1,500 or 2,000 tons saves about \$60 per day while taking in or discharging her cargo at Oakland. There is no drayage at Oakland. The freight is moved directly from the cars to the ship, or from the ship to the cars. It is, therefore, a benefit to every body doing business; in fact, I think it saves the farmer who sends his wheat to Oakland at least one dollar on every ton, which he would pay if it were sent across the bay to San Francisco and landed there, and then drayed to the warehouse or ship. I cannot see how possession of the ish ad is to injure the interior, or how it is to injuriously affect the people of San Francisco. My own idea is that Goat Island offers to their business better accommodation that My own idea is that Goat Island offers to their business better accommodation than is possible to be had at any one point in their city. The terminus of the raitroad is where it will receive and deliver its business; and Goat Island being in possession of the Railroad Company, they might and undoubtedly would have several

places in San Francisco in which to receive and deliver goods. The consequence would be less drayage and greater convenience to the people of San Francisco. I know, from our own experience with the iron which has come out here to build our roads, that, when coming to New York, stopped outside of the city of New York, and thence moved on barges to the ships, from the reason that the railroad depots, being in the city of New York, rendered it very difficult and expensive to dray to the ships. It would be the same in San Francisco. I will make a sketch, which will illustrate my meaning:

San Francisco is a city of 150,000 to 175,000 inhabitants, and in fifteen years we may reasonably expect that there will be a population of 500,000. The houses are never built so high as in New York, and it is, therefore, probable that this population of 500,000 would spread over as much ground in San Francisco as 1,000,000 people in New York; so that the city will be very extensive. Now, the Island is opposite San Francisco, and you will see, if we receive goods at what I have called Second-street wharf, and at the two other points I have designated, the longest drayage to be done would be from a distance midway between the points at which we receive goods. We deliver at the wharf nearest to the destination of the goods, so that it is to the convenience of the merchants for us to take the goods at the various wharves for the Island where we make up our trains. It cannot be said that the merchants would be injured because of these better facilities for moving freights. Even now the freight going to San Jose crosses the Bay, the charge by rail on each road being the same. The drayage to Second street being less than to the Market-street depot, the freight goes that way. The railroad company would prefer to have it through market street, because then there is no trouble of ferrying, and they would save the two bits per ton which they are now compelled to pay for the privilege of moving goods over the wharf which they built at a cost of \$500,000. If we had Goat Island, some day or other we would run into San Francisco. The railroad will come in there at their own time, and when it is most to their advantage, and the advantage of the community. To-day what money we have we use in the extension of the various lines of railroad. At present there are seven lines in process of construction. It is better for the people of this State, it is better for the people of San Francisco. It is not the fault of the people of the interior of this State should be compelled to pay a fee of one or two dollars per ton on their goods f

the amount needed for our own consumption, we shall have about 12,000,000 tons for export this season. This is equal to 4,000 tons per day for 300 days. A great portion of this grain must go into storchouses somewhere, and at the present time there are not sufficient accommodation anywhere for the handling of grain. San Francisco may by their action debar us from the Island they may contine us to Oakland, or they may compel the erection of wharves at the Strats of Carquinez, Oakoadd, or they may comper fur erection or analysis at a state of craftines, where ships can come up as readily as to Vallejo, and thus, instead of drawing the business to san Francisco, force it further away. It is not possible for us to go to San Francisco at the present time, the law, as it now stands, not giving to go to Sair Finnesso are present as we would have over at Goat Island. It is true that the State, in the city of San Francisco, gave the road-sixty acres of land in Mission Bay, but through the influence of the Representatives of Structico, the milroad was probabiled by law from coming within three hundred rranersco, the introduction by the result of the water front-jo that we could not get the farmer's strain to those wharves without very great expense. Besides this it is cut up by streets laid out by the Commissioners. A gentleman of san Francisco, at that time President of the Chamber of Commerce, took a very active part in having it laid out in streets, so that it is now no use for depart purposes. The Railroad Company have no idea of exterior, fix the entering into the warehouse business, as that needs personal attention to make it successful, and no railroad company could afford to enter into it. It may be possible, if no one cise wil, build warehouses to hold the grain, that they might do it.
It may be that this season they may be compelled to build temporary warehouses along the line of the various railroads, where the farmers can stow their grain. atoms the time of the various rationars, where the armore and saw in a fall. It is impossible that the grain crop can be moved and partaboral ships from the 1st of September to the middle of Nov gober, the time when it has to be housed, that being the commencement of the rainy season. But we do not build those warehouses unless no one clse will. We offer every one facilities, we put a switch warenouses threes no one case was.

We offer the state of dred warehouses at San Francisco or some other point, with a capacity of seven or eight thousand tons each, to take care of the grain crop this season. warehouses were built they would fill a street nearly a mile long. Some of the grain, of course, would not require warehousing, but with the enormous crop we will have this season, and considering that from the time it begins to move and the beginning of the rainy season is only about two months and a half, it will be seen that even if we handle 10,000 tons per day, which could hardly be expected of us, we only move one-half of it. This is presuming we load ten ships with a capacity of 1,000 tons each per day. The intention of the company is to give the capacity of 1,000 tons each per day. The intention of the company is to give the business of the country accommodation in some way. It it cannot have it in one place it will in another, and it other people will not provide for the crops the Rail-road Company will. They intend to do the carrying business as far as they are able, by furnishing all the facilities possible, and doing it at the cheaptest rate pos-sible. The Railroad Company has no antagonism to San Francisco, and do not intend to have any -on the contrary they intend to rave it the best accommoda-tion in their power; to aid the city to the extent of their ability, consistently with the discharge of their duty to the public. I think these resonations are entirely uncalled for, and the best interests of the people of this State are against them.

What a veritable God's blessing it is that our Legislature convenes only once in two years; how our blessings would multiply if it could assemble only half as often; and how inexpressibly thankful and happy we should be, if they could only meet at the call of the Governor, and we were Governor for life!

Newton Boath is an exceeding exceeding Executive, and we approve all his vetoes. By the way, we understand that Von Schmidt's water bill is squeiched. Magnificent Von Schmidt: Encouraged by having blown off the top of Bossom Rock, decit Von Schmidt: Encouraged by having blown off the top of Bossom Rock, and bring all the waters of the western water-shed of the Rocky Mountains directly to Callian and the waters of the western water-shed of the Rocky Mountains directly to Callifornia, to irrigate our arid plains and make our desert places to biossom like a rose. Its cost would not excel four hundred million dollars, and san Francisco could water of the payment, for the huxury of sprinkled streets, baths and water to flush our sewers. Von Schmidt is one of those "grasping intellects" who conceives the bold idea of carrying out magnificent schemes with somebody else's money, and never loses an opportunity to cultivate the attempt. He talks as familiarly of millions as maids of threen do of puppy dogs. He would invent sauders to extinguish Vesurius. He would pick up Niagara in a dipper, and furnish rau to the globe at night, if he only had money enough. Magnificent Von Schmidt! His next scene will be to condense and concentrate the rains of heaven, saine down the Sierra Nevadas and the Andes, pay all the national debts of the world, checkerboard the earth with golden railreads, and then navigate illimitable space with sevand for the carth with golden railreads, and then navigate illimitable space with sevand of the earth with golden railreads, and then navigate illimitable space with sevand the earth with golden railreads, and then navigate illimitable space with sevand to the form of the seven and the fands of the

# Punch's Bill against Brother Jonathan for Indirect Damages.

Mr. Punch, considering it his duty to step forward at the present moment, and to suggest an easy and honorable arrangement of the American question, has prepared the following schedule of British claims for compensation. It is manifest that they are all absolutely just, and he is sure that the American Government will admit that fact. Therefore, all that remains to be done is this: Let Mr. Hamilton Fish append his signature, and the words "All right," (he may add "old hoss," or not, as he may think the American nation would desire,) and then the two Governments have but to exchange receipts for their respective claims:

For twenty years of violen	Y's GOVERNMENT CLAIM COMPENSA' t abuse poured upon England by the crest of slavery, and up to the date		£	8	d

— We desire most significantly to warn the members of the Star Chamber before which "Professor" Knowton is on trial that Benezer is our protegé, and that we are not going to have him abused. We interpose our ægis between him and his persecutors; let us see what educational clown will dure confront its gorgon terrors! All the schoolmarms of San Francisco shall not prevent us from saying a good word for the Professor. When it is remembered that he has spent all his life in pedagogy—which is more demoralizing to manhood than any other earthly vocation except preaching—is it matter of amazement that his actions are not always heroic! If we admit (as our strict allegiance to the eternal vertiles constrains us to do) that he is an incorrigible gabbler, and that he is dropsical with the vain conceit of superior knowledge, we insist that these traits are the natural result of the long habit of holding forth to classes of small boys who regard him as an oracle and a revelator, and never talk back. If we admit that he is addicted to bullying the female teachers (and the evidence on that point certainly has some weight), that is equally natural. There is a noble instinct inherent in the constitution of our godlike race which makes us all yearn to hector and bully according to our powers and opportunities, and which in parsons and schoolmasters is apt to find its gratification in predominating over meek women and very small children. Surely a man is not to be denounced for yielding to his instincts, or for being what circumstances have made him. We want the Committee on Classification, and particularly the truculeut Plunkett, to understand that the "Professor" is under our puissant protection.

GLADSTONE, PUNCH & Co.

(This is our bill.)

Leaves from a Lady's Diary.

MARCH 18. A lovely Sunday. Henry took me over to Saucellto, n the afternoon. Mrs. M— was shocked at the idea of my going over on Sanday. She said it was vulgar. I can't see how homage to nature can be common, and think that the worship of the Spring in all its freshness and the enjoyment of the lovely the worship of the Spring in all its freshiess and the enjoyment of the lovely seeners and the pure air is much better than dozing over a good book or cheating time with a novel. Came back sun-burnt and tired—hungry and healtiful. W—was at home waiting for us. As usual, in his off-hand way, he announced his intention of dining and sleeping. When he goes to bed he shuts every shutter, closes every blind, and in the morning, when the servant lets in the sun's rays, he reverently salutes that luminary. I asked him what he meant, and he replied: "I can't bear the sun, but yet we are such distant neighbors that it's not worth while

to quarrel with him.

Maken 19.—St. Patrick's day. Took Charlie to see the procession and fancied I
saw in the Gallowglass costumes, the same as those that are used in Trovatore,
Henry has got some land in Sonoma county, and Father C— called upon us to-day
for a subscription to build a church near there. When I was there last Summer, the for a subscription to build a church near there. When I was there last Sammer, the only life I saw was two or three vaqueros and a herd of cattle, but it is necessary that priests make some stir or noise. St. John himself, who ranks high among the Saints, preferred rather to preach in the desert than not to preach at all. Engaged a servant who would not come on a Friday for fear of ill luck. Henry says he knows a man so superstitious that he always collects the interests of his money and his rents on the Thursday, when they full due on the following day.

Maken, 20.—Madame B. came to see me in a state of great excitement; ahe is nominated on a committee of French ladies who are going to pay off the German impost. To hear her talk one would think that Sau Francisco alone was going to do set. However she is an active impulsive cool little women, and I will to the

nominated on a commute of the community of the state of the community of t the thing. Bosides, there will be some spiralina dresses in the private theatricals. An Englishman came with a letter of introduction. He is a strange mixture of good sense and hopeless prejudice, he likes American institutions, but di-likes Americans. He said to me, "I like a republic, but I can't bear republicans." I longed to take a fig out of a dish that was on the table and reply, "I love figs but detect for trees."

Maner, 21.—Mary S. came in great tribulation, she has got into debt with her milliner, who has sent in the bill and asked for the money. She said so truly, "Before I was married and had no money, I could get nothing. Now, that I have a little, the storekeepers insist on my taking too many things."

- If there is any class in the community entitled to our respect, it is the Preach-If there is any class in the community entitled to our respect, it is the Praculers. If there are people who should claim the homage of the inditinde, it should be those devout men who, having cut themselves off from all the pleasures and good things of this life, devote themselves with disinterested fidelity to saving the souls of us careless men of the world. With what sincerity do they go about doing good! How they sell all they have and give to the poor! They take neither serip nor purse, but go torth into the world upon a pligrimage of duty. How they ignore Mammon, to worship God! How resolutely they abstain from all the pleasures of this world, seeking only their reward in the life to come! We cannot sufficiently admire their self-denying charities. How faithfully they work in the vineyard of the Lord! Some of them have nominal salaries; but really they are only todd. the Lord! Some of them have nominal salaries; but really they are only God's stewards. Some live and dress well, ride in coaches, and speculate in stocks and stewards. Some live and dress well, ride in coaches, and speculate in stocks and real estate; but how can they prach about the demoralizing influences of wealth unless they have some? How can they possibly explain the difficulty of a canel going through the eye of a needle unless they own a camel? How rebuke in high places, and sin a little themselves? How demonere the wickedness of mankind unless they practice just enough to know about it? How can they denounce the criminality of coveling a neighbor's wile, or ox, or ass, or anything oblouging to their neighbor unless they go for it and try? it? Oh, for the rarily of human charity: There is a class of wicked people who are always denouncing Preachers, questioning their motives, pretending that there is no hell, and wondering whether, if there is, there be any souls to put in it; even questioning the existence of an Evil Spirit, who outwits God, and steals away the greater part of mankind for eternal torment. They denounce Preachers as mere ordinary mortals, charging them with preaching for a living, with being hypocrites, wolves in sheep's clothing, sounding brass and tinkling cymbals. It makes the heart ache to hear these unkind criticisms, because we know how unjust are all such wicked insinuations. such wicked insinuations.

<sup>-</sup> CHINESE PROVERBS .- Following virtue is like ascending an eminence; pur-CHINESE PROVERDS.—Pollowing virtue is like ascending an eminence; pursuing vice is like rushing down a precipice. When mandarins are pure, the people are happy. Those who respect themselves will be honorable; but he who thinks lightly of himself will be held cheap by the world. In learning, youth and age of for nothing; the best informed take the precedence. Let every man sweep the snow from his own door, and not trouble himself about the frost on his neighbor's titles. A man without money is a reptile; but with money, a dragon.

#### The Coming Comet.

Nervous people, as it is credibly stated, have been put to great anxiety by the announcement, which recently appeared in the papers, that a distinguished astronomer had discovered a monstrous comet rushing straight towards us with amazing rapidity from the remote abyses of space, and yet pursuing its course with as little tendency to deviation as though it were running upon rails. Some friendly planet might by possibility put forth a helping hand, and twist the approaching monster from its course, as the hero of a novel diverts the runaway steed just as it is about to crush the heroine. Good-natured astronomers have taken pains to explain that there is no such comet coming; that, if it were coming, it would be a very welcome visitor; and that we have already passed through a comet, and found it less obnoxious than a London fog. The astronomers mean well, but they are terbily prosaic people. They ought surely to understand that they are robbing us of a lively pleasure. Have they not in their boyhood—for even astronomers with boys—snatched a fearful loy from the ghosts and other supernatural dangers with boys -snatched a fearful joy from the ghosts and other supernatural dangers with boys—snatched a fearful joy from the ghosts and other supernatural dangers with which a childish imagination loves to people the dim borders of its little world? Would anybody willingly give up that delicious feeling of superstitions awe which was at once the charm and terror of his early years, and have all the phantoms suppressed till the world should be no more haunted than a railroad station? Astronomers have aircady taken terrible liberties with the comet of our childhood. The huge fiery monster plungiry through the sky with a death-dealing tail has been weighed and measured, and had, as it were, a mathematical hook put in its jaws, till his impressiveness has departed from him. We know the legend of Cuvier's descent into the infernal regions, and of his declaration that the horns and hoofs which terrified our infancy were numistakable proofs of a campinium and vier's descent into the infernal regions, and of his declaration that the horns and hoofs which terrified our infancy were unmistakable proofs of a graminivorous nature. Even so the comet has been lowered in popular estimation till our skies have become as empty of horrors as Hyde Park of tigers. Let us, however, for a brief period "dally with false surnise," and endeavor to return to the singular faith of a child. Let us imagine that the astronomer has really prophesied our approaching fate, and that the prophecy is correct. Within a few weeks we shall be able, without the help of telescopes, to see the little cloud, no bigger than a man's hand, and fraught with omens more dreadful than have ever before afficielted the human recent it will grow slowly at first hut afferwards with a rate of increase. human race. It will grow, slowly at first, but afterwards with a rate of increase almost perceptible to our naked vision, till at last the whole sky will be lit up with the fiery portent. Night by night we shall watch its terrible growth, and before human race. It will grow, slowly at first, but afterwards with a rate of increase almost perceptible to our naked vision, til at last the whole sky will be lit up with the flery portent. Night by night we shall watch its terrible growth, and before long it will be brilliant enough to outshine the sun itself. The temperature will rise to be invited to the rist tropical, and then hotter than anything that is endured in the hottest room of a Turkish bath. But the time during which we shall be conscious of excessive heat will be brief indeed. The two large bodies, plunging toward each other at a pace compared with which the speed of a cannon-ball is absolute rest, will crash into each other with a hideous collision. If we happen to be placed between two such antagonists, we shall not have time even for an ejaculation. The petty race of insects that crawls amongst the little excrescences on the earth's skin will be instanstaneously dismissed from existence. On the other side of the world we shall, perhaps, have just one flash of sensation. We shall see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, without any metaphor, skipping like rams, and be ourselves see the mountains, since and the see the seath of notice this last condition, for it is highly probable that we should resolutely de-cline to believe anything so unpleasant. There are limits to one's faith even in cline to believe anything so unpleasant. There are limits to one's faith even in mathematics, and we should insist upon our prophets prophesying smooth things, even if they had to twist a few laws of nature for the purpose. But let us imagine that this difficulty is surmounted. If we were all really convinced that at four o'clock P.M., Greenwich time, on the next 12th of August, the whole human race and its dwelling-place would be summarily knocked to atoms, what would be the effect on our minds? The most natural supposition is, perhaps, that the whole course of affairs would be thrown out of gear, and that we should be reduced to the state of a city demoralized by a plague. Persons of strong religious feeling would either go into retirement, or would endeavor to awaken the consciences of the sinners around them; whilst the sinners would become utterly reckless, and would remember that there was no use in keeping a cellar of wine to be consumed by a comed. Some such endemy would, of course, be manifest; but the question remains, how lar it would be overpowed by the opposite tendency to be carried on by simple via inertiae in our old grooves. After a fittle time one would become nore or less accustomed to the prospect. One would feel that, if it was not worthwhile to undertake anything new, neither was it worth while to give up the old employments which have become necessary parts of our existence. There are impleyments which have become necessary parts of our existence. There are intumberable stories, such as that of the man who insisted on taking has accustomed pillan hour before he was hanged, and, if we were all under sentence of execution—as, indeed, sermous are apt to remind us that we are, even without the intervention of a comet—it is, peshaps, reasonable to suppose that we should act in the same spirit. The great buck of munkind would say. "It's all very well, we shall not want anything more after the 12th of August; but that is no reason why we should not have our regular meals and enjoy our newspapers at breakfast."

It is not quite nincteen hundred years since St. Peter set himself up in ecclesiastical housekeeping at Rome. that is, if he was ever there at all and his apost toolic descendants have, with some few interruptions, been running the machine ever since. It seems to us that the establishment has been do he very well. St. Peter's is a first class meeting house; the Vatean is a comfortable and well. St. Peter's is a first class meeting house; the Vatean is a comfortable and well. St. Peter's is a first class meeting house; the Vatean is a comfortable to skeep in a manger, 26 on foot, or ride an ass; they have parten thas always been well supplied. We do not remember of any Pope or Cardinal ever being compebed to skeep in a manger, 26 on foot, or ride an ass; they have fived well in this world, dressed in purple and fine linen; and if at death they have not let themselves into heaven, in purple and fine linen; and if at death they have not let themselves. They present Pope is in a funk because Victor Emanuel has robbed him of his civil prower; nade Rome the capital of Italy; taken the Quarant for his palace; and appropriated a few second class churches for public buildings. The Pope wond appropriated a few second class churches for public buildings. The Pope wond is bad for the business; sight-seers do not flock to Rome as much as usual; the beggars languish for clives; the drivers of flacres, drockys, and virtuees do not find ready sale; times are dull in the imperial city, and real estate is on the decline. The Pope threatens to change the terminus to Malta, Stelly, Switzarland, the Tyrol, France, Morocco or somewhere clse. Our advice to the oad genteemand, the tyrol, France, Morocco or somewhere clse. Our advice to the oad genteemand, the tyrol, France, Morocco or somewhere list was till lines successor is appointed, and then move the whole concern over to America. Come to San Francisco, the Government will give him Goal Island to his exclusive jurisdiction in theurs temporal and spiritual; the cathone world will

At present four mails leave New York weekly for England, and one every fortnight for France. The latter are carried each alternate Saturday by French steamers, while the mails for England leave every Tuesday. Wednesday, Thursday, and Saturday. For the last two years the Wednesday mail has been carried by the Williams & Guion line of steamers, a company in which Americans head three-little of the stock. Before that time it was carried by the Cumard line, which is swaned by an English company. The contract being about to expire, the United States Postmaster General called in the aid of the Committees of commerce and Postess Postmaster General to renew the contract at the old rates with the Williams and Gnoon line. Subsequently the agents of the unsurf Company offered to transport the mails free of any expense to the Government, provided they were delivered at the wharf in Jersey City. This proposition is now under the consideration of the Postmaster General.

"Hium fuit," San Francisco was, "delendo est Carthago." The California Battle of Dorking—time 1972: Goat Island a great magnificent city, covered with gor zoons palaces and splended public edifices; thousands of steamers crowding its grantic piers; the commerce of Indy and the isles of the ocean cumbering its wharves; a hundred lines of rail concentrating there, as the central tocus of the world's busy trade. Alexandria, Palmyra, Babylon, Tyre and San Francesco all passes away and forgotten; London, New York and Goat Island the great centres of wealth and business. Sand drifts once more our whole peninsula, and our shore only occasionally visited by pleasure parties from Goat Island and Oakkand, who come to inspect our ruins and pic-nic among the lupins that cover our sand dunes. a few Italian and Chinese fishermen would live upon our margin of the bay; all the rest a howling wilderness.

#### A Californian in the Old World.

London, February 25th, 1872.

DEAR MAIL BAG:—Last week I told you something of the views held on the London Stock Exchange in reference to California, her mines and mining operators. I was also able to bear a gratifying testimony to the influence possessed here by the News Letter in relation to such matters. I have, I trust, a due appreciation of your local influence; I have a great respect for the manner in which my friend "Town Crier" deals with your San Franciscan Pecksnifts. But yet, with a full knowledge of the good work you are doing at home, I am bound to say in the interests of California, I am not sure but that you are doing a better one abroad. The supply of reliable information in London in reference to Californian mines and industries generally, is not equal to the demand. I showed, last week, how it comes that the Standard, Public Opinion, and other high class journals regularly quote from the News Letter, and so give it a widely extended reputation and cause it to be the only known and recognized Californian authority. If I wanted to float a mining company here and to preserve its stock at a good price after it was floated, I also the stock at a good price after it was floated, I should, as a stee preliminary, spare no trouble in satisfying the News Letter of its bone fibes with a view to gaining your good offices. If the Emma mine people had only succeeded in doing that how many more thousand pounds sterling their property would have been worth to-day! I will guarantee that they, at any rate, know what the influence of the News Letter in London is. This week I propose to tell you, in a very brief way, something about ships and ship-building in this country, especially in relation to their influence upon the present trade and future commercial destring the tradition of their influence upon the present trade and future commercial destring the tradition of their influence upon the present trade and future commercial destring the tradition. cal dest'ny of the Pacific. Much is said in this connection about reviving American commerce. Truly a most desirable result! But how do we seek to accomplish it! By making every thing that enters into the construction of a ship, from pass her by making every fining that caters into the constitution of a saint, from her figure-head to her stern, artificially dear by means of oppressive taxation. We are, at home, eternally making spread-eagle speeches about the "glorious freedom" of our country. But I venture to think it would be better to preach less dom of our country. But I venture to think it would be better to preach less and practice more. An Englishman, a subject of an effect monarchy, may go into any port in the world to buy a ship suitable to his requirements, and may forthwith transfer her to the English ship Registry, with the liberty to use her in any trade as if she were built at home. The free citizen of our glorious Republic is, however, free to do nothing of the kind. He may see an English, French or German-built ship exactly suited to the trade he is concerned in, but he cannot buy her with any hope of her being allowed freely to engage in commerce in American waters. The law will not allow him to buy in the cheapest market and sell in the dearest. That law will not allow him to buy in the cheapest market and sell in the dearest. That which in England is looked upon as a common law right, to be as freely enjoyed as the air we breathe, is in our country stamped with the strongest condemnation of the law. What is the result? Our commerce is destroyed. Do San Franciscans ruly realize what that means? I fear not! The exceptionally favorable location of our city should, with wise legislation, give her the control of nearly the whole trade of the Pacific. Her position, geographically, is infinitely better than that of New York. The latter port has numerous competitors, such as Boston. Philadelphia, Baltimore, New Orleans, etc., etc. San Francisco has no such opposition to dread. She is for all practical nurnoses the one great nort of the Pacific. phia, Baltimore, New Orleans, etc., etc., etc. San Francisco has no such opposition to dread. She is for all practical purposes the one great port of the Pacific. Competition with the old world, too, is largely excluded by the barrier which the American continent affords, from the eternal snows of Greenland in the North, to stormy regions of Cape Horn in the South. Yet, in spite of all this, we cannot maintain so much as a line of steamers to China and Japan without a Congressional subsidy. Why can't we? The reason is in a nut shell: We can't, because we are not allowed to compete upon equal terms.

As a man cannot fight with his arms tied up, so commerce cannot flourish when it is bound down with fetters. I am led into this line of thought by a visit I recently paid to the great ship building yards of the Clyde. Marvelous, indeed, are the paid to the great surp during Saras of the Cryot. Individual, indiced and the achievements there to be witnessed. During the past two or three years wonderful have been the improvements effected in iron steamship building. One improvement alone has worked a complete revolution: I allude of course to the saving of fuel caused by the adoption of compound engines. As this letter is already long for your columns, I pray for space to add in this connection one or two all-important facts. Many of the wooden side-wheel steamers built in America belonging to that energetic corporation, the Pacific Mail Company, have cost over half a million dollars each. In this country I can get two iron steamers of equal tonnage, and with all the latest improvements, built for that money. Then remember how immeasurall the latest improvements, built for that money. Then remember now immeasurably superior the article is which I can purchase at a rate so much lower. The Pacific Mail Company's steamer averages from nine to ten miles per hour on a consumption of seventy tons of coal per day. The English-built steamer will make twelve miles per hour on twenty-five tons of coal per day. Thus on the round voyage between San Francisco and China, the saving effected by the English steamer over the American would be 1,750 tons of coal, and leaving room for that much additional cargo. Nor is this all. The American steamers being for the most real of the most part of wood english an expense for repairs which against their first cost every the part of wood, entail an expense for repairs which equals their first cost every ten years. The English iron-built vessels on the other hand seldom need repairs. Many other points of disparity might be mentioned, but enough has been said to inculcate the true lesson to be learned, namely: that we must either permit John Bull to take our commerce from us on the Pacific, as he has on the Atlantic, or else we have get to allow our ship owners to have the weeth the weith Atlantic, but to take our commerce to may be reached, as he has on the Adultic, of the we have got to allow our ship owners to buy the vessels that suit them best, in the cheapest market. This in my opinion, as well as, I believe, that of all persons conversant with the subject, is the true remedy.

Yours,

FRONT STREET.

# San Francisco and the Terminus.

The people of San Francisco are subject to periodical and unnecessary panics. It is natural to a new enterprise that confidence should not be as prominent as growth is rapid. San Francisco has seen a marvelous growth. Twenty-five years has placed our city third in commercial importance in the Union; half the years of has placed our city third in commercial importance in the Union; half the years of a generation has builded up a city, respectable in numbers, of soad weagh, and of a generation bushrooms grow faster than oaks, but their roots are not as large expectations. Mushrooms grow faster than oaks, but their roots are not as deep, nor their fibre as strong, nor their probability of endurance as great. The deep, nor their fibre as strong, nor their probability of endurance as great. The deep, nor their fibre as a great are not as a strong and the probability of endurance as great. The deep is barries and hills upon the shores of an almost unknown ocean. Hence their confidence in its permanence is ever compiled with a bossible doubt. The discovery of gold gave us, from 1885 to 1859, an immense impulse, from 1855 to 1859, as a large state of the probability of the probability of the probability of the large state. The discovery of gold gave us, from 1818 to 1824, an immense impairse, from 1838 to 1839, we hanguished, and read estate felt the re-action; again confidence foilibred 50me years of prosperity. The discovery of gold at Frazer River gave us a sense; real estate declined far below its real value. Again the fit of confidence overtook our sanguine people, and real estate values were carried to fabrica prices. The cartiquake of October, 1838, shook the confidence out of as-again; the reaction of the war followed close upon it; and our people lost heart, and real estate sunk back from fictitions to real values. The completion of the Pacific Raifroad had not realized our over-sunguine expectations, and two dry Raifroad had not realized our over-sunguine expectations, and two dry seasons depressed the mercury of our hopes to the lowest point. Then came the copious rains of the present season; and the promise et an immense yield of grain, gold, wine and wood, sent up our hopes Now, Goat Island, as the terminus of our raifroad system, within two mins of our water front, afterding miles of docks for shipping and ware-fourses, meanes our commercial interests, and down goes the mercury in the barometer. That this is a real danger, we cannot discusse, because it makes it possible theta fosses, nearest makes it possible theta fosses, nearest makes it possible theta fosses, nearest makes it possible that fosses houses. real danger, we cannot disguise, because it makes it possible that foreign-commerces and internal trade may be accommodated at a point not within our business limits. The railroad interests are concentrated in the hands of three preparators, and upon this Coast managed by one. Governor Stanford represents the power of concentrated millions of wealth. Keeping his own counsel and acting for his own interests, he directs and wields a vast moneyed power; and it his interests are hostile to those of our city, to that extent he is a dangerous ame powerful are hostile to those of our city, to that extent he is a dangerous ame powerful enemy the more dangerous because it is not apparent that the interests of San Francisco are altogether identical with either the interests of general connences or the interests of the State. Our object in writing thus article is not to frighten our people; nor do we believe that any result can be reached that will seriously injure the city of San Francisco. It is not an easy matter to change the channels of commerce, of San Francisco. It is not an easy matter to change the channels of commerce, It is not an easy matter to render inscenre the foundations upon which rests \$100,000,000 of wealth, the interests of 130,000 people and the permanence of spread commercial city. The injury resulting from all this azitation lies in throwing a load over our city, in disturbing the confidence of our prople and rendering uncertain that which should be fixed and settled. The whole matter can be arranged. It is a mere question of business. We want the terminus of the rods within the shore line of our city. Stanford thinks he can do a portion of his business at Goat Island cheaper than here We say to Mr. Stanford, Will you in good taith, under certain concessions and grantly. Stanford, Will you in good taith, under certain concessions and grantly make San Francisco the common center of a system of railroads? He answers that he will. What then are your demands, Mr. Stanford' Let we will see if we can come to terms. Is if water front? Is if free hardor' Is if Central and China Basin? Is it to close certain streets? Is if the construction of a bridge? If so, at what point would you desire to cross the Bay' Do you demand of San Francisco. It is not an easy matter to change the channels of commerce. Centrari and China Basin? Is it to crose certain streets? If there instruction of a bridge? If so, at what point would you desire to cross the Bay 'Do you demand money? If so, show us a draft of the bill that we may consider it. Do you need an ordin ance of our Board of Supervisors? If so, what do you ask? Mr. Stanford does not deny that it is his intention and by doctor to make his tension. his desire to make his terminus here. It is clearly for the interest of the road to do its terminal business at the doors of his best customers, to use lands, docks and wharves aircady constructed. It is the interest of the city to become the focus of all roads. Such being the condition of affairs, the sensible and only course for the city to pursue is to call a meeting of prominent and interested gentlemen and authorize them to act on behalf of the city, and when terms are agreed upon as them be submitted to a mass meeting and a committee authorized to carry them out. The Legislature running in session for two weeks, there is ample time to arrange the dependence whole affair. A little plain, sensible action, less talk and more business will accomplish a solution of the problem to the satisfaction of all partness in interest. The sober, reflecting people of San Francisco are prepared to make any reasonable concession, a million or two of dollars does not frighten us—three millions of dellars and the concession. the concession, a million of two of dofars does not righten us -three millions of dofars is only about two per cent of our assessed wealth, and not one per cent of our real wealth. In conclusion we say to our readers, keep cool and take things our peak we say to you San Francisco will come from this ordeal sately. Per casy, for we say to you San Francisco will come from this ordeal sately. Per casy when the care is over it will be found that San Francisco is rather better off than worse off after all.

<sup>—</sup> The Reverend Stone and the Reverend Stebbins did not attend St. Patrick's banquet at the Occidental Hotel. Consequence was, everything went on lovely—nobody got drunk; nobody was insulted. Moral—don't invite preachers to banquets when there is any liquor around.

#### St. Patrick's Day.

The Irish-Americans of this city and vicinity celebrated the 17th instant in The Frish-Americans of this city was magnificent one. In the evening, balls and parties were included in. The banquite of St. Partick's Society, at the Occidental Hofel, was the grandest affair of the occusion. Characteristic toasts and speeches were among the oral ormanents. In response to "The Day we celebrate—St. Patrick's Day," Hon. John T. Doyle responded in a pithy, pointed and witty Speech. "The United States" was responded to by Hon. Philip A. Roach, of the Examiner, who paid merited and eloquent justice to the greatest Republic of ancient or modern time. "The President of the United States" called forth anciem or mouern time. "The Frestein of the Chica States Carlies of the Frank Pixley, who brought down the house in his own inimitable style. "St. Patrick's Day, responded to by P. H. Canavan Esq., as follows: "Gentlempn:—Stence, rightly interpreted, is more eloquent than words want." Silence, rightly interpreted, is more eloquent than words; and a sometimes think that the man who dare say 'No,' when asked for a speech, possesses as much social virtue as the ready orator who delights to sway his andience with his enchanting rhetoric. But however much I value golden silence, I cannot this englet turn my back on my brother members of the St. Patrick's Society, or decline to thank you for the manner in which you have received this toast. Those who to thank you for the own manner in which you have received this toucky. Those who cavil at these one antional societies, see nother below the surface. The gallant Frenchman does not make a worse citizen because he commemorates the victories. of the Old Guard. The German is not a bad republican because he holds dear the memory of Fatherland. The Scoshman glories in the song of the peasant-poet Burns; and American citizens, born in Ireland, and those descended from Irish ancestors, are not less true, loyal and devoted Americans becauset hey cherish the traditions of their own Emerald Isle. Irishmen came of noble blood; and those who ever remember they are descended from patricts, have set their feet on the road2 to patriotism; and those who proudly claim a band of heroes for their ancestors, are half-way toward heroism themselves. In these social gatherings we bury all distinctions arising from wealth, education and position; all grades are buy an distinctions arising from wearth, education and position; an grades are abolished, and we only recognize our common origin; we harmonize the differences, political and religious, that have been for ages the bane of Ireland, and we set an example of internity and unity which, if followed abroad, must before a distant day lead to glorious results.

The disadvantages which have bound down Irishmen in their own land for centuries fall like broken shackles the moment they set their feet on any part of the United States; and in California we have a striking example of how much the can do when they have a fair field. Look aroud us, and in the ranks of blanker; lawyers, merchants and mechanics we find frishmen eminent for their ability, then success, and for every manly virtue. They do not float passively where the current of progress carries them, but they bear an active, energetic, and even laboritous share in all the onward movements of the age. We keep step with the Americans in their daily march. In rank and file we beat time, to the same music. In the field, in commerce, in manufactures, in all the arts and sciences, we are marching on with them, upholding the glory of the Stars and Stripes, singing the same national songs, and bearing the same motto on our standard—E Phyribus Unum. When by our example we shall teach our brethren of all creeds at home to bury

their dissensions and live and work in harmony and union, we shall have paved the way to their national emancipation and regeneration; and the accomplishment of

this, our highest aspiration, will have sprung from

"That nameless forduess for our native clime. Which triumphs o'er change and all-devouring time."

A number of volunteer toasts, songs and speeches followed, and it was long past midnight when the merry party broke up. The crowd of other incidents of celebration pressing upon our columns, prevents a more extended report of this most successful feature of the day.

most successful feature of the day.

Among the guests were: John T. Doyle, presiding, assisted by Joseph A. Donohoe and Thomas Young; Messrs, P. H. Canavan, Thomas Young and C. F. Smyth, the Reception Committee; and Messrs, F. McCoppin, J. F. Swift, Judge Stanly, E. McKinstry, Lorenzo Sawyer, S. Dwinelle, R. J. Tobin, F. M. Pitkey, Daniel T. Murphy, L. Donnelly, Colonel Wason, Captain Carson, Captain Mullen, Joseph G. Ford, John Hyan, C. D. O'Sullivan, R. Tobin, J. Sullivan, J. J. Corrigan, Joseph G. Eastland, Tyler Curtis, P. H. Canavan, W. C. Burnett, E. P. Murphy, Richard O'Niel, Peter Short, John Sanders, Samnel W. Foreman, Frank Sullivan, J. R. Kelly, General Cazneau, J. Lynch, J. J. Marks, Captain O'Reilly, Henry George, William Hayes, Michael Hayes, C. F. Hamilton, Judge J. C. McCeney, John O'Kane, D. Jordan, W. Bunker, T. J. Bergen, R. P. Ivers, P. A. Roach, Henry Toomey, R. F. Sherwood, Dr. Geary, James O'Neil.

- Take the head of a gorilla, the neck of a tiger, the bony arms of a chimpanze, the body of a shark, the legs of a man-kangaroo, the feet of a distorted hend, and permeate these ghastly anatomical structures with the blood of a rattlesnake, the marrow of a leper, then infuse all with the united spirits of thieves, robber, pirates, assassins and murderers, and you have a man who is an Apollo in form and God-like in his inspirations compared to that most foul and loathsome creature who lives from the proceeds of a poor unfortunate woman compelled to sell her body to the highest bidder.

## Commercial Matters.

Crop prospects continue to brighten. Those best posted in the Grain business place our surplus Wheat for export in 1872 at 12,000,000 centules [not "lens" as place our surplus Wheat for export in 1872 at 12,000,000 centure—Into "mine" as stated by the duity press! this is equal to 500,000 tons of 2,240 [08]. Eastern mail advices say that the German bark Charles Lukeau has been chartered in New York to load Wheat in this port for Cork, and a market at £3.5s. Other vessels have been chartered in this city for a like service to load in midsummer from the next crop at £30, £3.9s. 6d., with £3.5s. for the Havre clause inserted. At date, Grain freights are nominal, say £2.7s. 6d. to a direct port of the United Kingdom, and Profiles are nominal, say £2 %, od, to a direct port of the United Kingdom, and £2 lbs, to Cork, and a market. Since our last weekly summary, histoproof the grams reported Wheat at 11s, 6d., this great decline was unlooked tor, and now 11s, 9d, comes through, it may be the precursor of an important rise within the next sixty days. With us, Wheat has dropped to two cents 2c during the week for best samples; all other grains as well as Flour sympathizes with this decline. Wool of the Spring clip arrives in small quantities, selling in Sacramento at 50 for Recec, and in the southern counties 376 life on the sheep's back. It will be a fortnight or more before prices are established in this city; in the interim Washed

Pul.ed Wool has advanced fue The weather for a week past has been such as to enable agriculturists to plow and sow liberally; several weeks yet remain in which it will be safe to sow wheat and sow liberally; several weeks yet remain in which it will be safe to sow wheat. The breadth of land now planted is far beyond the average of any past year, and many thousand acres of virgin land are yet to be piaced in grain. We look for immense crops this year. The import trade continues quiet, the crocery polithers do not purchase as liberally as was expected. The agitation of the tarif question, at Washington, has a tendency to paralyze business not a little. The proposed deduction of duty on Coffee and Tea will hardly pass to ourses at this session, though many minor articles may be placed on the free ast. The arrival of goods exsented more handlise overland continues to be of considerable importance. Described more bases of the property of the prop merchandise overland continues to no of considerable importance. Deaders in Boots and Shoes, importers of Dry Goods, Clothing and Fancy Goods, all have the stores and warerooms id-del to repletion; assortments now are more than usually full and complete, and traders are now prepared and anytoney waiting for the opening spring trade, which promises to be arge in Apri, and May, Imports of Coffee during the wook from Control Anyonican, park, were use they show show opening spring trate, which promises to be arge in Apri, and May. Imports of Coffee during the week from Central American ports were ass than 2000 seeks spling at 16c, ex-steamer; of Sugar, 739 packages only, received per Coorado—this description selling at 75c0 bc. Hawaian Sugar continues in active request, stock very light for season; 500 kegs extra No. I, Poneer Mile, sold at 10cs t, same price as paid for Vellow "C" refined. The California and other refineries adhere to the reduced tariff of prices, say 125cc, for crushed; orders crowd in upon them gather haster than all three gathers have the same price of the contraction of the property factor than all three gathers are supported to the property factor than all three gathers are supported to the property factor than all three gathers are supported to the contraction of the contract them rather laster than all three estabishments combined are able to fill, and yet "all is lovely," the power behind the throne serene and nappy. There is 'n certain quarters a disposition to purchase white refined upon speculation, but it is no easy matter to scenre round lots. Imports of refined Sugar, from Honekong, seem destrued to have an important place in this market, notwithstairung the opposition. The Rice market shows more activity; more confidence in the luture's to be observed by leading parties in the trade, who have this week been stocking up by

served by leading parties in the trade, who have this week been stocking up by free parchases at anction 4,000 mats were taken at \$5,729. which is thought to be a indicious purchase for A No. 4.0 mm. The Tea sale announced for tims week was not a success. The offering consisted of smail lots, remnants of divers invoices, quality very variable. An invoice of basket Tea was placed at 56c. Provisions from Cheeazo. Canciunati, \$1, Louis, etc., are now arriving freely overland: John Y. Wilson & Co., meat packers, appear to be the heaviest receivers. Meats are brought here Dry Saltely by the can lead and then taken out to their packing house at Black Point, where it is smoked and packed for market; W. K. Dietrich, of Washington Market, does a little in this line, also, and so do other on the street. There are, however, a few leading commission houses on California. on the street. There are, however, a few leading commission houses on California and Front streets, who are large receivers of Bacon, Hams, Lard, Cheese, Butter, etc. and for these they find ready bayers among the deacers. Oregon is not drawing supplies of Butter, Bacon, Cheese, etc., from us, thus reversing the past order of things. Dairy Butter is now very plentful and cheap; choice fresh

grass role is selling in quantities at 25c Since placing the above in type, we are in possession of later cablegrams from London, announcing an exeated Grain market at Liverpool, by reason of violent storms of hall, sleet, etc., doing some damage to growing crops. This lied, was thirst advance, and now we have 12s, for Wheat. This rise, by some, is thought to be temporary, resuting more from fear than any actual damage. The result here is to stiffeen holders of both Flour and Wheat.—Unexpectedly, we are to-day in receipt of ten ear-loads of Corn, overland. This acts as a decided damper to the

recept or ten car-mais of corn, overland. This acts as a decided damper to the market price \$1.50 per cental.

High Wines from Omaha. 500 bbls, to Platt and Newton have reached us this week. This was placed to arrive at a much higher price than it could now be sold week. This was placed to arrive at a much higher price than it could now be sold for. The Whisky market seems to have lost its elasticity, since the heavy purform that the property of the property chases of Doutroon noticed by as a rew weeks since. This is wen for mise who deal in ordinary spirits, but our friend, the Governor, cares not; for Booth & Co. and W. W. Dodge & Co. have all the "sails" they want to supply their customers; neither does A. P. Hotaling & Co., of Jackson street, care whether "school keeps or not," for all lovers of good old Bourbon know that there is none better than J. Coultes for the lower street, which were all the control of the con or not. Tor all lovers or good out nonthon know that there is none better than 5.
If. Catter & Co.'s, be it three or tan years old; price, \$3 5,0 and \$5. 50, according to age. The market for Scotch and English Beer exhibits increasing firmness, with an upward tendency in price for the better brands of Ale and Porter.—Pig From and other brands of Metals are advancing. Scotch No. 1, soft, is now held at \$650,00 per ton.—Chemicals are all marching upwards, by reason of scarcity. The Singer and the Song.

The rapture of a song
Rose over crowded ways
And thrilled the passive days,
And stirred the idle throng.

I sought the singer long, And found—a grass-grown grave, With naught to mark it, save The memory of a song. The happy flowerets, wed To June, were blooming nigh; Infinite hights of sky Were glad above the dead. Low in my heart I said, "What need of lettered stone?

Low in my heart I said,
"What need of lettered stone?
The singer died unknown,
And the song lives instead."

## Local Dottings.

In the Assembly, March 16th, bills were passed relating to certificates of incorporation; to avoid imprisonment of witnesses; moneys of deceased persons left in savings banks; navigation of King's river, and Kent County finances.——In the Senate, March 18th, Mr. Garratt introduced a bill to grant certain lands in San Francisco to the Southern Pacific Railroad Company, and to extend the time in which the company are to make certain improvements at the railroad termini. Maclay withdrew his bills for the removal of the City Hall and Park Commissioners. Neff withdrew his bill for a Sunday law.—In the Senate, March 19th, the Committee on Corporations submitted a volumnious report adverse to the bill la-Committee or Capotations submitted a voluminous report acceptance to the bill introduced early in the session by Larkin to regulate rates of freight and fares on railroads. Tuttle's school bill was passed; also Wilcox's mining corporation bill, and Splivalo's libel bill; Keys' prigation bill was ordered engrossed.—In the Assembly, a dispatch was received from Hon. David Dudley Field, of New York, comsembly, a dispatch was received from Hon. David Dudley Field, of New York, complimenting California upon the result of the labors of the Code Commissioners.—
John F. Swift, of San Francisco, appointed by the Governor, was confirmed as a Regent of the University of California, vice John F. Doyle, whose term has expired.——In the Assembly, March 19th, the following bills were passed: Joint resolution relative to establishing a monthly mail between San Francisco and the island of Tahiti. An Act to amend an Act entitled an Act amendatory to and supplementary to an Act entitled an Act to provide for the construction of canals and for draining and reclaiming certain swamp and overflowed lands in Tulare valley, passed April 1, 1857, approved April 10, 1862.—In the Senate, the Civil Code was introduced by Pendegast and passed.—In the Assembly, the San Francisco dec-gation reported against the passage of the Act to authorize the Board of supervisors of the city and county of San Francisco to supply that city with pure water. The Act supplementary to an Act to provide terminal depot grounds for the Central Pacific Railway Company, approved March 6, 1868, was passed.—In the Senate, March 20th, bills were passed relating to the State University, mineral cabinet for the State Library, translations of the laws, and the protection of fish and game, Mecker's minority representation bill was reconsidered and lost. Hopper's bank-incompany to the Contifiction was exclusive measured. ing amendment to the Constitution was ordered engrossed. The Act was passed to transfer to the Board of Supervisors of the city and county of San Francisco the management, control and direction of the affairs of the Industrial School department. An Act was passed to increase the police force of the city and county of San ment. An Act was passed to increase the police force of the city and county of San Francisco; also, an Act to encourage the production of the Angora or Cashmere goat in this State, offering a premium of \$20,000 for the first forty pieces of fabric manufactured therefrom in this State.—In the Assembly, March 20th, the Act to authorize the Board of Supervisors of the city and county of San Francisco to aid in the construction of water works for the simply and distribution of fresh water was reported with a recommendation that it pass. The Owens Lake and Los Angeles Railroad bill was lost—ayes 22, noes 10.—A fearful conflagration occurred in Petaluma, March 17th, in which a large portion of the business part of that city was destroyed.—Gen. Roscernas, and a party of civil engineers, spiled from San in Petaluina, March 17th, in which a large portion of the ousness part of that city was destroyed.—Gen. Rosecrans and a party of civil engineers saided from San Francisco on Sunday, for Mexico, to survey the line of a railroad from Tupan via the city of Mexico to the Pacific ocean, with branch lines to the Ric Grande and Colorado rivers.—Arrangements have been made for a line of ships between Portland, Oregon, and Liverpool.—There are as many persons confined in the Reno Jail for insanity as for crime.—The San Diego Union says the number of acres put under cultivation in that section this season will be larger in proportion to the population than any other region on the Pacific Coast.—A photographer in Los Angeles was astonished the other day by some parties bringing a corpse wrapt in a Angeles was assonshed the other day by some parties bringing a corpse wrapt in a sheet to his office to be photographed.—A few days ago a large whale was washed ashore at San Buenaventura.—Los Angeles, Anaheim, and San Juan South, had heavy thunder showers and a hall storm March 18th, the first in fourteen years.—Captain Paul Shirley, U. S. N., so long in the naval service upon the Pacific, will leave for the East next week.—The rainful this season in San Francisco foots up 3.52 inches.—The resident of the parties of the state of th foots up 33.53 inches, — The project of constructing a railroad from San José to Alviso, is assuming a definite shape. Two prominent citizens in San Francisco have taken stock in the road, and the work will soon commence. — The Senate Committee on Commerce to agree to an appropriation of fifty thousand dollars to build and operate a dredger on the lower Willamette and Columbia rivers.—Wild build and operate a dredger on the lower Willamette and Columbia rivers. — Wild hogs are the terror of Umpqua Valley farmers, — Recently Pete Bush caught a sturgeon in the Sacramento river, near Colusa, by means of a hook and line, which measured nine feet and seven inches in length and weighs 367 pounds. — The Central Pacific Railroad Company will resume work about the 1st of April on their road from Banta to Oakland, via Antioch. It is said that a large force will be employed, in order to have the road finished in time for grain transportation.—The California Theater to be remodeled—Dr. Behrens had to answer belore Grand Jury, charged with procuring abortion.—Police Court weekly harvest up to average, and choice jots stored for future supply.—A donation of rare and valuable books, by Tiburcio Parrott, to the Mercantile Library.—St. Patrick s Day celebration a sphendia affair; St. Patrick was a gentleman, and so are those who commemorate his matal day.—Prisoner in custody of Sherifi leaps from C. P. R. R. cars, gets masked, and retires for life to the County Hospital.—Divorce cases abundant and natructive.—I. O. O. F. to have a grand pienic April 26th.—The devil's fiddle "tabooed: a condic humane Board of Supervisors.—Dr. Letterman, late Coroner, buried with due military honors.—Exportation of stallions and breeding stock for use of the Emperor of Japan: pagan progressiveness.—Hebrew Ladies' Society give grand cubico ball at Platt's Had this evening; of course; a lashiomable, insincere protestation of conomy in dress and temporary denial of woman nature.—Balky horse persuaded by owner with landent caloric, novel experiment and entire success.—Presentation of \$300 silver pitcher to A. Ralsten, Esq., who takes charge of Branch Bank of California, in Nevada.—McCleery beat Wat badly at billiards.—Golden Gate Sugar Reinery attached by Sheriff; creditor's sweets.

#### The Howard Benefit--Senator Pendegast as Richelieu.

To say that the entertainment, last evening, at the Metropolitan, was a complete success, would be quite within bounds. The auditorium was filled to its utmost capacity with an assemblage, in point of numbers and character, such as rarely is seen in Sacramento. Interest in the benevolent cause, together with the standing and repute of Mr. Pendegast, as well as an appreciation of his zenerosity in appearing upon the boards as "Richelien," prompted a response to the call of the Howard Benevolent Society so liberal that the theater was insufficient to accommodate all who desired to witness the entertriment, and many were disappointed in obtaining seats. The character of "Richelien," as drawn by the dramatist, while it is true to history, is composed of such psecular characteristics as to tax the powers of the most skillful artist in approximating towards a complete personation. Indeed, with the frame of the great hights in the timment of the stage still fresh in our minds, it is an undertaking of no small magnitude for an anateur to invite criticism in so prominent a part as that of the crafty Cardinal. Mr. Pendegast approciated this fact to the fullest extent, and in view of all the embarrassing circumstances connected with such an endeavor, it is just to the star of the evening to say that he accquitted himself in an admirable manner.

He was efter perfect in his reading, and his conception of the part was chaste to a high degree. His action was free from the angularity that often characterizes the performance of an annateur, and if crities an were admissable under the circumstances, we should say that the imperfections in the rendition of this part came from the most natural and excusable of all causes, the lack of practice. We have never witnessed a more finished performance from an amateur, and have witnessed many interior personations of the same part at the hands of professionais. The audience were liberal and enthissastic in appliause in every scene, and at the end of the second act Mr. Pendegast was called before the curtain. At the cases of the play the audience was enthusiastic in a call for the Senator, who came to the fourlights and thanked the audience for their generosity both to himself and the cause

for which he had lent his humble services.

He congratulated the Society upon receiving so liberal an addition to its fund, and announced that it was now out of debt and blessed with a hundsome surplus in the treasury. He also, in a feeding manner, thanked Mr. Proctor are the entire company for the generous assistance they had given him, in rehearsals as well as during the performance. The remarks of the Senator were received with continued

applan-c.

At the close of the fourth act, Mr. Proctor appeared before the andience, and paid a well-merited and graceful compliment to Mr. Pendegast, and announced that, viewing to persuasion, in compliance with numerous requests, he had consented to appear this evening in the same character, when he will be assisted by Mrs. W. R. Whilams, as "Julie de Mortiner." The box office will be open at the usual hour this morning, and there will be no additional charge for reserved scats.—Scarring of Record, March 22d.

There is a terrible war now raging in the ranks of the Republican party. Roseou, conking, Morton and Zack Chandler seen to be the beaders of the Grantwing: Trembul, Schurz and Summer the opposition, Journals are ranging themselves on either side. The Tribuna and Springdeld Republican with Greeley and Bowles are dinging hot shot into the enemy's magazines, while Forney and Russes. Young shand by with ice water to put out the fires and cool the heated brams of the defenders of the administration. The United States Senate is a debating seesity of anxious and excited politicians, flinging strik-pots and beating goings. The oils are determined to get in and the his are resolute not to go out. Not being in politics ourself, and never having had an office, we are of course uterry includerent to the result; but it looks a little as though Ulysses was in the cave of Potyphenus and would have to crawl out under the beily of the ram to save himself from the wrath of the one-eyed giant.

#### The Railroad Side of the Goat Island Controversy.

As supplemental to the evidence given by Gov. Stanford, on Goat Island, recently As applemental to the evidence given by Gov. Stanford, on Goal Island, recently published in the daily newspapers, we give below the remarks of Edward Curtis, Esq., on the same subject. He advances several new ideas, and his remarks, we have no doubt, will be read with great interest by every man in San Francisco at all concerned in the future of our city. Mr. Curtis said—

Before this island could be made suitable and put in proper condition for the

Before this island could be made suitable and put in proper condition for the purposes of a railroad terminus, at least (\$5,000,000) five million dollars would have to be expended thereon for grading and filling in alone. Not less than three million more would be expended in constructing piers, causeways or bridges, building wharves and docks, and in the excavations of basins. Nine-tenths of all this large expenditure of money would go directly into the hands of the laboring men, artisans and mechanics of San Francisco and the surrounding country, thousands of whom would find employment and support for years to come, upon and around this island in case the Railroad Company are permitted to occupy the same for commercial purposes. I am credibly informed that the opposition to the bill before Congress, on the part of San Francisco, comes from the capitalists, the rich men -the cent. per cent. fellows down there; whereas, on the other hand, the me-

men—the cent. per cent. lellows down there; whereas, on the other hand, the mechanics and laboring men nearly all favor it, as it is their positive interest to do so. Should the United States Government allow the railroad the use of this island, the work of leveling and filling in the shouls around it would be immediately commenced. Some idea of such an undertaking can be formed from the statement that 20,000,000 cubic yards of rock and sand and other material would have to be removed before this Island, would become of any value as a railroad have to be removed devote and Islandi would become of any value as raintown terminus. For years to come, it must literally swarm with busy life, requiring a vast outlay of capital, if this spot is to be made a place of countercial importance. What practical difference does it make to San Pancisco whether a certain number What practical difference does it make to San Francisco whether a certain number of men are employed in building docks, wharves and warchouses, or in handling freight at Goat Island or Mission Bay? It will take as many men to do the business in one place as in the other, and will, consequently, give employment to as many. This island is a part of and inside the county lines of San Francisco. Its improvement will add so much more to her taxable property. It is nearer to the present heart of the city than the Mission or South San Francisco. Whatever improves any part of that city, improves and makes valuable, relatively, the whole.

I am sure that the Central Pacific Railroad have not any interests the advance-ment of which would injure the growth or retard the prosperity of San Francisco. Seventy per cent of all its business comes from that metropolis, and anything isc. Seventy per cent of all its business comes from that metropolis, and anything that would diminish it would do as great damage to the railloads terminating on the Bay as could possibly be done to any class of merchants or business men from the same cause. No; the interests of the Pacific Railroad and the interests of San Francisco and of California are mutual. Whatever promotes the prosperity of the one, increases that of the other. With due deference to the resolutions of the Chamber of Commerce, protesting against the proposed leasing of a part of Goat Island for a railroad terminus, permit me to say that they embrace a consequence without a cause; if fears an end which has no beginning; it contemplates a structure which has no foundation and cyll results that can only exist in ture innerture which has no foundation, and evil results that can only exist in pure imagination.

The principal reason given An argument that proves too much proves nothing. by those opposed to the Goat Island lease is, that it would divert business from San by those opposed to the Goat Island lease is, that it would divert business from San Francisco. Now, admitting (for argument sake) this to be true, such logic leads to this irresistible conclusion, viz., that commerce would be better accommodated and facilitated by being transferred from ship to rail at Goat Island than it is by the present system, else it would not go there. Will any man assert that San Francisco would be benefited if her commercial advantages and facilities were much less than would be benefited it not commercial advantages and mentices were much rescaled they are now, requiring, for instance, several transhipments of foreign merchandise instead of one? More drays, and wharfingers, and laborers, would be required, but is it pretended that the more obstacles and difficulties you throw in the way of commercial shipments and transactions, the more benefits and blessings a city derives from them? If the converse of this proposition is true, that the less impediments and the least expense attached to these transactions the better it is for the state of any site through which they was then the fact that Goat Island. the well-being of any city through which they pass, then the fact that Goat Island office superior advantages is an unanswerable argument that San Francisco and the whole commercial world will be benefited by making that spot a railroad terminus.

Up to the year 1851 the New York Central was compelled to pay a percentage of Op to the year 1851 the rew 1 ors central was compened to pay a percentage or its receipts into the State Treasury—on the supposition that the road would injure the Eric Canal—a State institution. More than this, for some years the road at certain seasons was prohibited from carrying freight at all. But it was at last discovered that competition in the carrying trade increased instead of diminishing the revenue and receipts of the canal, and this foolish tax and prohibition was removed by the State Legislature. It is a universal experience that the more facilimoved by the State Legislature. It is a universal experience that the more facilities for commerce the greater it becomes, and competition stimulates and enlarges the business of all who engage in it. Was the city of New York at all injured when miles on miles of water front were built opposite her on the Jersey shore, and when great ships landed there, and when the Eric road terminated there? Has New York been injured because of the magnificent whaves that have been constructed in front of Brooklyn? Has Liverpool declined because Birken Head has been built opposite to ber, and has become a great railroad terminus? On the contrary, these cities have been immensely benefited by the increased commerce

that has flooded in, by the works of public improvement that have grown up around them. San Francisco, the metropolis of the Bacific, has to-day, ness than two c3 miles of improved water front. It is cramped and wholly inadequate to her business. The Radfrad Company propose to increase the frontage by improving and leveling Goat Island, and it does seem strange that may considerable class of merchants or business men should be found to object to so praiseworthy a work. New York has about twenty-five miles of improved water front San Fran-

work. New York has about twenty-five mines of improved water front. San Francisco, as I-said, has but two, and her commerce must, at no very distant time, make her secreely second to New York as an exporting and importing city. A city is not a mere machine to be built up after a model, but, like a tree, it should grow and develop itself on all sides; and san Francisco would, in my opinion, be better off to-day if there were a terminas as Gont Island for the Central Pacific, another on Mission Bay for the Southern Pacific, and still mother at San Prancisco demand that all the railroads of the State should terminate in Mission Bay, to accomplish which would cost millions and nullions of dellars, whose tooks to disher some control of the dellars. which would cost millions upon millions of dollars, when Go at Is and is nearer to the business portion of that city than Mission Bay and when Sauce, to is the most natural transmus of all the roads north and west of the Sacramento river! North Beach wall be impoverished and greatly injured if Saucento is not to become a railroad terminus, in connection with a ferry across the Bay, and Calstor in and a rankoad termines, in connection with a herry across the Bay, and Cartor at and Front streets will have to move further south, if it is insisted that South San Francisco is to have all the depots of the railroads leading to the Bay. It was said of old that "all roads led to Rome;" and all railroads in this state lead necessarily to San Francisco. But it that city would preserve a proper equi bround, she can best do it by advocating one railroad terminus on the north of her, another at the south, and still another cast. Thus, with a Sancelito depot on one side, a Mission Bay depot on morther a Giget Island done, in trent at how send with the Baylice. Sound, and sunfandance east. Thus, with a suffering up of on the side, a grassian Bay depot on another, a Goat Island depot in front of her, and with the Pacific Ocean back of her, what city on the continent would then be better bananced or have more or larger facilities for commerce, or he more accessible for business of

One word more in relation to the warehouse question: If the Central Pacific R. R. Co, choose to monopolize the warchousing business, they could do it as well R. R. Co, choose to monopolize the wareholdshy business, they could do it as Weil on their lands in Mission Bay as it Goat I said; the saxly acres of band owned by the Southern and Central Railroad Companies, in Mission Bay, afford ample room for the building of as many warehouses as could be built on tood Island. But why should not the commerce of the interior, or at least some of it, be adowed to go unmoved and undettered through the Golden Gate without being stopped to pay reliable to any average and the said to apply the could be a superior of the could be about the could be a superior and the said to account the could be a superior of the could be a superi tribute to any warehouses at ask, or be taxyal to enit he few minor sent ask. Prancisco! These middle men are but of very little value to n city; they help swell the population, and that is about all the benefit they are to the community at large. I would, if I could, break every yoke that hangs upon the necks of our storage, lighterage, farmers, by doing away with all the commissions, brokerage.

cite, which now comes in between the producer and constant.

An important consideration is, that the more the larger gets for his produce of the less it costs him to get stor a buyer, the more money he will have to increase of the productions in the future, and to invest in wares of our merchants and manualfacturers to leave with his bankers; and this is what creates business and makes a city prosperous; it is not how many Chinamen or wharlingers are emposed, or Counsission menand agents kept busy, that sustains a city, but it is the activity of her merchants and the extent of her manufactures, both of which depend very much on whether or not the agriculturist has cheap fredities and the greatest convenience in finding a market; and if Goat 1-stand, when it shall become a milrocal tenumas, is going to benefit the former in the way I have proposed it would, I say it will benefit the solid business men, the merchants and manufactures and worker of San Fram useouses. I have conclusively shown, I think. But some say that a bridge to the island is going to run or injure the harbors; such was not the epinion of the late Gen. Thomas: he once, while crossing the water on the Oakland boat, pointed to Goat Island as the natural tenumus of the overland ratirord, and boat, pointed to Goat Island as the natural tenumus of the overland ratirord, and boat pointed to Goat Island as the natural tenumus of the overland ratirord, and boat pointed to Goat Island as the matural tenumus of the overland ratirord, and boat probably to the bay of San Francisco while such a connection with the main land wom make that rocky, barren spot far more valuable for multigry purposes than it is now, city prosperous; it is not how many Chinamen or wharfingers are employed, or make that rocky, barren spot far more valuable for military purposes than it is now, and I believe this opinion is concurred in by General's Scholield and Ord, the chief of the Coast Survey is of the same opinion. I care not what his subordinates of the Coast survey is of the Said opinion, among the hydrographic engineers may say; his single opinion outweighs them all, and he was out here last Summer and examined it in person.

If the great Bay which extends forty miles south of Gord Island, near San Francisco, could have been injured by the hand of man, it surely would have been when the natural curves in the water front of San Francisco had been filled in and when the natural curves in the water front of San Francisco had been filled in and extended till the original crosscent was made to head outward instead of inward, as it does to-day. To say that scattering piles, not a mire in length, between which the waters of the Bay can run freely is going to do a damage which 250 acres of solid carthwork, driving back the sea that much in front of San Francisco has failed on, is to me the highth of nonsense. The Oakland railroad wharf is now more than two mites in length—the longest in the world it has done no harm to the harbor that anybody knows of, and I don't believe, if it was extended three quarters of a mile, that it would hart anything, either. One thing is certain: if it did, when built, work damage to the Bay, the Railroad Company would lose no time destroying it, for any ninury done to the channel connection of the Pacific Ocean. destroying it, for any injury done to the channel company what are the destroying it, for any injury done to the channel connection of the Pacific Ocean with the harbor of San Francisco, would injure railroad transportation and railroad interests more than any other enterprise would receive on this Coast. Bettor for us that no railroad ran within fifty miles of San Francisco, than that its

going there should injure that noble barbor, which no railroad man is suicidal enough to think of doing for a moment.

Chicago made of herself a great city by resolving years ago that every good acre of land in the State of Illinois should be put within ten miles of a railroad; and San Francisco, it she would be great and strong and rich, should resolve to do the same thing. Let her cease fighting railroads, and become a city of real progress for once. I remember how Cressus was once showing his gold to the philosopher Solon, on seeing which, he replied, "Sir, if any other comes that has better iron than you, he wild be master of all this gold; "and so of San Francisco: If any other city comes—be it Vallejo or Oakland that has more iron railroad than her, that city will be master of \$An Francisco's cold. city will be master of San Francisco's gold.

## A Navigable Balloon.

Up to the present time the practical utility of balloons has been greatly lessened by the apparent impossibility of guiding them. Unlike a ship, which has the
advantage of two elements, air and water, they were entirely at the mercy of the
derman siege of Paris, when the northern and eastern departments were
entirely in the hands of the enemy, and when, consequently, a continuance of
westerly and southwesterly winds paralyzed the efforts of the ærial Post Office
and the sea, or into Prussian hands. M. Dupuy de Lome, the eminent engineer,
offered to construct a balloon which should have steering powers of its own, but
he encountered so many delaws from the suniences of the Government, and the offered to construct a balloon which should have steering powers of its own, but he encountered so many delays from the supineness of the Government, and the difficulty of procuring requisite material in a city cut off from the rest of the world, that his machine was only finished four days before the capitulation. Then came the disorganization produced by the second siege of Parls. At last, M. de Lome obtained permission to use some buildings at the Fort of Vincennes, and thence, on the 2nd instant, he started on his trial trip. Half a gale of wind was blowing when he went up, and the screw had been slightly damaged. Neverticless, he was able to land near Noyon (Oise), 70 miles northeast of Parls, and his balloon fully answered his expectations. The screw, when worked by four men, drove the balloon five miles an hour quicker than the rate at which the wind was blowing; while by the use of the rudder, the course of the balloon could be altered 11 deg. either way from the set of the wind, making a total deviation of 22 deg. The balloon, which is 118 feet by 50 feet, is shaped like an egg, the long part being placed horizontals; the car resembles a punt; the screw, which has two blades, is 29 feet long, and drus 21 times in a minute, when the balloon is going five miles an hour faster than the wind. The steering rudder is a plain triangular surface of unvarnished calico; the car is of wicker work and holds comfortably the windlass for the screw and eight men to work it. The balloon is divided into two chambers of unequal size. This serves to keep it stiff and of the required shape. We must be able to be that M. Dupuy de Lome does not profess to be able to beat to windward; but his invention enables him to have the wind free on his quarter. An ordinary but his invention enables him to have the wind free on his quarter. but his invention enables him to have the wind free on his quarter. An ordinary balloon, if the wind blew straight from Paris to Brussels, could only land at some point in that line; whereas M. de Lome's invention would enable the voyager to diverge northwards to London or southwards to Cologne. Further particulars con-cerning this highly interesting discovery will be found in the Gaulois, of February

Certific this lightly News, of February 19.

We should add that M. You is the constructor of this new balloon, and that it was to his kindness and indefatigable energy that we owe in a great measure the was to his kindness and indeatigable energy that we owe in a great measure the regularity of our correspondence by the balloon post during the German siege of Paris. In the course of construction several modifications on M. Dupuy de Lome's original plaus were found necessary; the rudder placed at the beginning on the balloon was ultimately fixed underneath. The car was shortened, and the cap of silk was adopted in the place of the usual netting. At the moment of starting one of the bamboos forming the framework of the car was broken; this accident, alof the bamboos forming the framework of the car was broken; this accident, although speedily repaired, caused a deviation in the shaft of the screw, and 'increased the friction so sensibly that it was necessary to put the eight men at work at once instead of obtaining a continuous motion by relays of four. When the screw was worked an impulsion of 11½ miles per hour was gained in the direction of the wind; it is therefore the opinion of M. Dupuy de Lome and his assistants that supposing a wind of the force of five miles per hour, by keeping the screw constantly at work they would have a resisting force of 6½ miles per hour. A small steam which is being made which will have a for greater force than eight year and he at work they would have a resisting force of 6½ miles per hour. A small stam engine is being made which will have a far greater force than eight men, and be much lighter. The gas was made in the riding-school of the Fort of Vincennes in 80 barrels, each containing about 800 quarts of acid and water acting upon fifty thousand pounds' weight of old iron; the filling occupied a little more than three days, and represented 3,800 yards of 2as; the length of the balloon from point to point is 42 yards; the hight, including the car, is about 30 yards; the silk cost 42,000 fr. M. Yon constructed the Captive Balloon at Ashburnham Park some few years ago.—The Graphic.

Romage, the orator of ussues once works of art of great beauty and value.—Fitteen thousand people attended the St. Patrick's Day celebration at Cork, Ireland. Romage, the orator of the day, made a violent speech against the English Government.—Espartero, the veteran Spanish statesman, declines a nomination to the Cortes, on account of his advanced age.—The assassin of the Farl of Mayo, late Governor-General of India, was executed at Calcutta. He confessed the assassination.—There has been a bloody fight and destruction of buildings in Moravia, because the workmen did not get their pay.—Dr. Howard, an American citizen residing in Hasana, has here convicted of a sublising decimentary. not get their pay.—Dr. Howard, an American citizen resum: In Hasana, mass been convicted of a political offense there, and transported to a penal Spanish settlement in Africa. The House of Representatives, by unanimous vote, ordered an investigation as to the merits of his case.—Surgent presented a polition signed by four thousand persons of California for the enfranch-sement of women in the Territories and the Instrict of Columbia. It was referred to the Judiciary Committee,—Cole's bill to abolish the meome tax was reported upon adversely by Sherman, from the Committee on Finance; also, Summer's bill to reduce unternal taxes and abolish the office of Commissioner of Internal Revenue,—By a bill passed in Congress, the Secretary of the Treesure, is directed to pay the officers and men of the United States ship Kenasary, \$419,000 for siking the rebel United States and Spain upon Cuban affairs. It is said derstanding between the United States and Spain upon Cuban affairs. It is said war may be the result. No Minister is to be sent by this Government to Madrid till explanations are made.—Sagasta anticipates a revolutionary movement in Spain very soon. This is probably the pretext of the King for strengthen up the army and thereby influencing the April elections in his favor.—A treegraphic cable is to be laid between Cuba and Mexico in April.—Governor Ito, of the Japanese Embassy, leaves Washington on Tuesday, to return to Japan on business connected with the negotiation of another treaty with this country.—The Wisconsin Legislature has passed a bill prohibiting the sale of all liquors except home-made wince. mittee. Cole's bill to abolish the income tax was reported upon adversely by lature has passed a bill prohibiting the sale of all liquors except home-made wine.

## Presentation to Mr. A. J. Ralston.

A. J. Raiston, who filled the office of Vice-President of the Pacific Insurance Company so creditably for a number of years, is about to leave this city for Virginia City, there to enage actively in business. Twenty-eight of the employes of the Pacific that has gone out of existence, and who are now engaged in various mercantile houses, on hearing of the departure of Mr. Ralston, determined that he should not leave here without some substantial expression on their part of the high esteem and regard they entertain for him as an officer and a gentleman. Accordingly, they met about 5 o'clock p. M., vesterday, and proceeded in a body to the office of the company, taking possession thereof for the time being. After being there a short time, one of them slipped forward, and, addressing Mr. Raiston, expressed to him, in feeling terms, the high regard they held him in, the many pleas and hours they had been associated together during the bright career of the company prior to the disastrous Chicago lire, and of the uniform courteous and gentlemanily treatment they had received at his hands as one of the executive officers. To show their appreciation, and for his mancy kind acts, they presented to him a appropriate inscription and monogram. Mr. Raiston, who was entirely taken by surprise, could hardly find words in which to express his gratifude on accepting the rich testimonial, particularly after they had been separated in business for several months.

#### Leaves from a Gentleman's Diary.

March 19.—Yesterday I enjoyed the novel experience of attending a seance of the Police Court—not in the capacity of a culprit, but in that of a witness. I wish that every citizen of San Francisco could be compelled to go through with a similar experience. It would tend to impress the public mind with the conviction that a police judge may be a tyrant more odious than a bashaw of seven tails, and that all other forms of despotism are mild and tolerable when compared with the power for oppression wielded by a policeocracy. Before that tribunal, the testimony of one policeman seems to outweigh that of a dozen respectable citizens; and its seems to be an irrefragible maxim with the Rhadamanthus who there represents the majesty of the law, that the waerer of a star can do no wrong.

March 20.—It is both amusing and distressing (notwithstanding the apparent paradox) to note how the quasi-scientific champions of the old theology writhe and squirm under the terrible attacks of their really scientific antagonists. One Noah Porter, a professor in some Yankee college, has girded up his loins and gone out on the war-path against Darwin, Huxley, and the materialists generally. If the merits of the controversy were submitted to a vote in the Young Men's Christian Association, we have no doubt that Professor Porter's drivel would be pronounced annihilative to the samants. The fact is, that with the average poins mind, a very small smattering of science will go a great way. What impresses me most strongly in reading the essays of Huxley, Mill, Darwin, and others of their class, is the tone of candor, modesty, and disinterestedness that pervades them. Their allegiance to truth seems to be sincere and paramount. They are calm, judicial and minipassioned, free from the partisan heat and fervor of the religions mind. Your theological disputant is almost invariably a special pleader. I never saw a volume of potenics that did not contain a style of argument that would not be tolerated in any other field of discussion. The priests are the most reckless and audacious of sophisticators.

MARCH 21.—The latest dispatches are a terrible damper to those sangnine spirits who have been beguling themselves with fond visions of a British Republic. Sir Charles Dilke and his brother conspirators do not seem likely to overthrow the venerable institutions of the "fast anchored isle" during this generation.

Maken 22.—All the Bohemians in town are now engaged in writing plays, and we may look out for pickfora in the dramatic market. Last night, in the course of three-quarters of an hour, I encountered three gentiemen "connected with the press" who were each in travail with a five-act California play. This morning I was waylaid by a fourth, who artfully inveigled me into his room, on the hypocritical presence of offering me a prime Havana and a glass of old sherry; but when I had taken the bait, he locked the door and drew his manuscript on me, and it was two hours before 1 made my escape. John McCullough will be back tomorrow, and then t will be his turn to suffer.

We have heard quite a number of simpletons express surprise at Judge Louderback's decision in the case of Citizen A. J. Plate. These simpletons insisted that the evidence clearly showed that poor Plate was treated in a most ruffianly and brutal manner by the Policeman Kearns; that the charge of vulgar and profane language entered against Plate was a transparent and inpudent "dam;" that it was plain from the testimony in the case that Kearns, after bullying and maltreating a peaceable effize, a rrested him and made a charge against him on the same principle on which a puglistic rough stamps on a man after having knocked him down. Now we admit the substantial truth of these allegations of the simpletons aforesaid; but when they proceed to argue from these premises that Judge Louderback ought to have discharged Plate and had Kearns severely punished for his unofficer-like conduct, we decline to accept the conclusion as logical. On the contrary, we insist that the Judge exhibited his characteristic discretion and fearlessness in this matter. The officer's name is Patrick Kearns, and Plate had descerated St. Patrick's Day by getting himself arrested on that great anniversary, and having his wagon driven through the Hibernian procession. It is true, that the wagon was driven at the time by the Policeman, and not by Plate. But Judge Louderback concurs with us in the opinion that this little circumstance is irrelevant. Whether, in fact, Plate did, or did not, use vulgar and profane language, is equally irrelevant. Policeman Patrick Kearns entered such a charge against him, and it was rather checky on Plate's part to deny it. Judge Louderback scems even more deeply impressed than we are with the conviction that it is better that ninety-nine innocent

A venerable Madagascar Chief has made a wonderful discovery. "What," he has asked his countrymen, "do the Vagah (Europeans) want with our indiarrobber? Why, to make big ships! When they have got plenty they will make great india-rubber ships, and come to Madagascar to take it, and when our soldiers at Tamatave fire guns at them, the balls will strike the rubber ships, and rebound and kill our own men. We are fools to sell them the rubber; and this, I say to you all, don't do."

## The Preservation of Grain in Vacuum.

The following extract from a Paris letter of February 21st, will be read with much interest by our farmers and grain merchants:

The Academy of Sciences expressed approbation, at its last searce, of the system of preserving grain introduced by Dr. Louvel. The report of the Commission, after having a laded to the importance of the question and the principal solutions after having a model to the unjointance of the question and the principal solutions it has already received, writes thus on the process of Dr. Louwei; It's known sust the most perishable substances can be preserved from patrofaction when they are kept from contact with the air. It is this principle which the inventor has endeavored to apply industrially. His apparatus is very simple, and is composed of a cyindrical vessel of sheef iron, closed by two convex covers. This species of portable gramary is placed vertically upon supports, at a convenient hach, so that the operations of filling and emptying can be conveniently carried on. The upper cover is preced with three openings; the first is a man-hole, by which the scena is introduced, and which can be hermetically closed by means of a rubber pucking; the second opening is fitted with an air valve, by which the vacuum is obtained; introduced, and which can be hermonicanly costen by means of a more strength opening is fitted with an air valve, by which the vacuum is obscured; and the third is closed with a gauge. The holtom of the vessel has only each for taking out the grain, and is closed with a soutable stopper. The capacity of the and the third is closed with a gauge. The holtom of the vessel has only eige father for taking out the grain, and is closed with a satiable stopper. The capacity of the apparatus is about 350 cubic feet. The vacuum is effected by means of a pump worked either by hand or power. A vacuum cand to three mehes or four transfer of mercury is subherent to destroy an insect life. M. Louvel estimates that £50 of meterry is sameless to destroy an instet the M. Louvel estimates that the price of a granary to note 350 orbit feet of corn, and 122 the price of the pump, which, with the necessary pipe fittings, etc., would bring the total price to ±66. Of course, one pump would serve to exhaust any tamber of vessels. The advantages M. Louvel caums for his system are, that the wheat is placed beyond chance of all spontaneous changes, and that the prompt evaporation of any excess of moisture which it could contain removes all tendency to bearing. The corn contained in the vacuum is protected basides from exterior causes of deteriorations, from the influence of the atmosphere, from the attacks of insects, in short, from every sort of damage to which it is exposed in ordinary gramatice. the clarity on not only causes to multiply in the closed chambers, but if they, and erries up in the course of a few days. The partial vacuum once made, the apparatus requires no further attention nor care, excepting an occasional glance at the 20 20, quires no further attention nor care, excepting an occasional glance at the gasge, to see if the degree of exhaustion is obtained. Flour, biscurts or day vegetables can be preserved in a smiart apparatus. M. Louvel furmishes, in support of the assertions which precede the result, the account of an experiment made at the experimental farm at Vinceniues, with perfect success. The following is a resume 15th July 1861, the one with what of good quality to which were charged on the 15th July 1861, the one with what of good quality to which were added for additions of riving characteristics; the second contained damaged bissuit, half destroyed by the insects; and the third a quantity of ordinary flour. The vacuum made in the three apparatises corresponded to four inclass of mercury; they were than left exposed to the action of sun, ram and frost, and they were opened on the 18th January, 1888, more than six months after they had been closed. The gasgas not exposed to the action of sun, rain and freel, and they were opened on the 24th January. 1868 more than six months after they had been closed. The garges showed a vacuum of fifteen inches, the great difference being accounted for by the experimenter by the evaporation of the water in the vessers. The corn showed natteration; it was very dry, and still preserved the power of germinoting, the destructions were all dead and very dry. The biscunt was in exactly the same sometion as when it was enclosed; but all the insects were completely destroyed. The flour was perfectly preserved. The Academy considers the process of M. Louvel as applicable with great pulsarious the process of M. Louvel as applicable with great pulsarious the processing and more address reference. plicable with great advantage in the preservation of corn and many other provise us.

Comparative Deadliness.

The Elbarieli Cuzette publishes some curious statistics of the comparative deadliness of the deficient weapons used in the Franco-German war. According to them, of 3,53 Germans wounded before Metz, no fewer than 95-5 per cent, were struck by chassepot buils; 25 per cent, only were wounded by projectibles from heavy gains, and there were only to se per cent, of women from old steel. As to the French wounded, it is calculated that as high a proportion as 25 per cent, were wounded by artitlery projectibes, and about 70 per cent, by the fire of the cardian deliquent. No fewer than 25,000 Frenchmen in all were struck by the projectives of the German articles. This gives an average of one effective shot in every three fired from the German batteries, a result which appears to us to be hardly excelled. The losses in the defected branches of the German army are estimated as fections by the Elbarieli Generals: Of every 100 met path hars do combat, 90 per cent, were in the infantry, 5 per cent, in the cavalry, and only 3 per cent, becomed to the articles. The total number of cartridges fired by the Germans in the late war is statulary. The total number of cartridges fired by the German in the at war is statulary purposes—just say months, this gives only an average of the cartridges per man per month for the whole army. Taking the total number of French k kled and wounded at 100,000, this would give an average of 250 cartridges fired to each man struck.

The N. Y. Bible Society offers an \$100 prize on the subject "What will make Christians realize their own littleness!" We answer, a hot bath. Pass those five twenties, N. Y. B. S.

#### Midnight Thoughts.

When day has vanished and the stilly night
Enshrouds the path unveiled by clowing day;
When night-birds carel and the moon's pale light
Awakes the owl to revel in its ray;
When langhing stars peep out apon the world,
And homage pay in twinklings to the queen
Of night, whose tissued banners, wide unfurled,
Hang o'er tired Nature as a silv'ry screen;
When night's cool breathings whisper loving notes
To list ning trees, where Nature's quiet dreams
Are tanned by nurm'ring breeze that gently floats
In soft'ning tones upon the moon's pale beams;
When wak ning owls outpour their mournful song,
Which wanders 'mid the tissues moonlight weaves;
When 'mongst the trees mild zephyrs creep along,
And startle into music quiv'ring leaves;
When all grows silent as the cold fomb's shade,
When sleeps the world, and sin and virtue sleep,
My sad soul wanders, and the joys that strayed,
On mem'ry's wavelets slowly to me creep.
The pitying moon looks sweetly down on me,
Her pale beams fringed with clouds in silver drest,
In sympathy the stars my sorrow see,
And fain would hush my throbbing heart to rest.
The midnight's silence wraps cach grieving thought,
My heart's wild beatings mark each fleeting hour,
In love's bright garden e'er the fairest flow'r.
Now from its limpid fount a jewel rare.
Steals forth and trembles slowly down my check;
A priceless gem, its beauty ever fair,
A crystal thought recalling her I seek.

Santa Clara College, April 1, 1872.

-.Tosé.

## Iron Ship-building on the Clyde.

During the last four years the number of iron ships built on the Clyde has been rapidly on the increase. In 1868, the aggregate tomage turned out amounted to 167,600 tons: in 1869 it suddenly rose to 188,600; in 1870 it was 190,800; and in 1871 231 iron vessels were built, having an aggregate tomage of 166,200. This gives the average tomage of each vessel at 850 tons, and represents a total value in hulls, machinery, and furnishings of at least £5,000,000. During last year there were launched on the Clyde 6 war vessels of 3,050 tons; 15 paddle steamers of 10,900 tons; 125 serew steamers of 158,000 tons; and 25 sailing vessels of 12,420 tons. The number of sailing vessels show a decline of 38 vessels and 26,150 tons as compared with 1870; of 80 vessels and 35,430 tons as compared with 1869, and of 81 vessels and 66,626 tons as compared with 1868. The increase in screw steamers is proportionately in excess of the absolute increase of tonning. Of the merchant vessels launched, 45 were for the East India and China trade, 40 for the Bultic and German trade, 9 for the North Afmerican trade, 7 for the Mediterranean trade, 6 for the West Indian trade, and the remainder chiefly for the coasting trade.

To appreciate the full importance of the iron shus-building trade in Scotland, it must be remembered that there were launched on the Tay at Dundee, during the past year, probably another 8 or 10 iron vessels with a gross tomage of at least \$600 tone. As not the Clyde Buse have been mainly expert streamers.

To appreciate the full importance of the iron ship-building trade in Scotland, it must be remembered that there were launched on the Tay at Dundee, during the past year, probably another 8 or 10 iron vessels with a gross tonnage of at least 8,000 tons. As on the Clyde, these have been mainly screw steamers. It will be apparent at a glance how much of this increased activity in screw steamers is owing to the opening of the Suez Canal. The fast China clippers have now been drawn out of the field, since it was rendered possible to steam from London to Hongkong in 50 days. The 70 days' voyages of the crack clippers are thus unterly thrown into the shade, and these latter have recently been employed in making trips from China to American ports. There is every probability that the Clyde will continue to maintain its well-deserved pre-eminence in the building of iron steamers for the merchant service of Great Britain.—Scottish American Journal.

In Chickasaw county, Miss., Mr. Lorenzo Day married Miss Martha Week, upon which a local poet comments as follows:

A day is made, a week is lost,
But time should not complain,
There'll soon be little days enough
To make the week again.

Woman's-rights women say that society, as now constituted, inevitably makes wives faithless. We have noticed several short-horns on the streets lately,

#### The Will of Abner H. Barker.

The last will of Abner H. Barker was filed for probate March 19th. He gives to Elijah Fox, of Haverhill, Mass., \$10,000; to Abner B. Fox of the same place, \$10,000; to Humphrey B. Fox, of San Rafael, \$10,000; to Hamah Fox, its nicce, of Haverhill, Mass., \$10,000; to his nicce, Abbey May Barker, of Portland, Maine, \$10,000; to Julia Georget, of San Francisco, \$500. He gives to the Directors of the Protestant Orphan Asylum, of San Francisco, and their successors in office, the stan of \$25,000 in odd coin, upon trust and for the uses following; to invest said money on good mortage or other interest paying securities, and such investments, to change from fame to time with plensure; to pay over yearly in cash and every year, to the Trustees or Directors of the Asylum, the interests, profits and dividends of said investment, so long as said Asylum shall be maintained as said Orphan Asylum. He gives to Louise Léchard his house and premises on the south side of Post street. No. 205, for and during her natural life, and after her death the same to go to his residuary devisees hereafter named. He gives to Joseph H. Jones, of this city, two promissory notes due by said Jones to the testator, one for the sum of \$10,000 and the other for \$15,000, and he is released from all liability on said notes. All the remainder of his estate, of whatever nature, he cives to his beother Neah W. Barker, of Portland, Maine; his sister, Almira J. Fox, of Cornish, Maine; and his herifestier, Sarah Barker, now Sarah Woodbury, of Portland, Maine, share and share able. He nominates and appoints Obdinal Livermore and E. C. Catherwood, of this city, and Humphrey B. Fox, of San Rafael, excenters without bonds, and he authorizes them to sell all or any part of his estate the sold, and after payment of the new nameer and upon such terms as they may see fit. He wills that his executors of check the income of his estate until the real estate be sold, and after payment of the payment thereof. He wills that he real estate he and not personal prepara fo

— Bishop Kip complains that during the eighteen wars that he has presided over the discusse of Casitomia, no one that has dued has thought to leave high money to the church; it is a meanuchely illustration of the solidshness of the sich. We should not be surprised to been that St. Peter had retused to open the Celestial Cases to a single one of these solish souls. It is the same thing with us; we have been printing the Vons Letter for sixteen years; we have been multiply serving the devit all that time, and yet of all his followers in this community, of the hundreds of wealths men who have died and gone home to their Father's fireside, not one has remembered us in his will. We hope the Bishop's hint was be taken, and that the godly well add coducils to their wills for memorial windows to the church, and that the ungodly and wicked rich people will reflect that as they cannot take their money with them when they die, and if they do it will surely meet, that they had better leave ample bequests to the Vours Letters—nothing would be better calculated to concellate his Infernal Majesty than a kind recognition and timely support of this, His organ.

#### Our Local Saints.

We regret exceedingly that we have not had time to sanctify the memories of our local senuts—our Bykers. Brodericks and Kings. We are museusely consoled, however, in learning that the daily papers have inked their commiss with the regular annual tribute to the memory of the illustricas philosophers, statesmen and varriors who sheep the sace that knows no wasking at Lone Montalair. When we reduct with what persistent oblivion the press of Nevada, Oregon, Washington and Arizonia Territories fails to notice that our local sumts ever existed, or having existed that they done anything to arouse yearly lamentations, we cannot be too generous in holding up to our sufful neighbors the fact that we had as its, military political and theorogram. Having thus briefly paid the tax of gratitude to the lamented dead with a judicious reverence, peculiarly our own, we decide publishing inflamatory obituaries.

The washerwoman who sent us lately the "Clergyman's Notes," writes us that since her disclosures the D. D. has taken to dannel shirts, that tell no tales. That's right! Keep a poor woman from an honest livelihood, and preach on charity. Jack, wag that cologne over to me!

At ten r.m. the Pope dismisses his couriers for the night. The number of persons presiding at the Variean, which consists of fifty separate buildings, with fourteen courtyards and 12,000 rooms, is 3,000. It is a town without streets.

## F. L. A. PIOCHE.

EVERY newly settled country has what may be termed its founders. By the term founder, we do not necessarily mean its earliest settlers or discoverers, nor that body which is known by the name of Pioneers, but the far-seeing, enterprising men, whose minds can grasp the future development of a country, and whose courage can grapple with the difficulties to be overcome in achieving such development. Men of such a stamp are generally of an ardent, sanguine temperament, and as such are tempted to anticipate the course of events, and placing themselves in the van of circumstances, bear more of the brunt of the world's battle than is either good or necessary for them. Of such a nature was the subject of our memoir.

Francois Louis Alfred Pioche was born on the 1st of June, 1818, in the town of St. Dizier (Haut Marne), France. His father was a well-to-do man of business-what is called in French un bon bourgeois-and he gave his son an excellent education in the Jesuits' College of the city. Young Pioche was originally intended for the law, and studied for his degree so as to be able to practice in the highest courts of judicature. He had, however, a very rich uncle, a M. Ferrand, who took a fancy to the young man, and by his influence got him an appointment in the office of the Secretary of the Treasury (Ministere de Finance). A brother of the celebrated Marshal Niel was in the same office with him, and contracted a friendship which endured during the whole of his life. In 1841 Mr. Pioche's uncle died, leaving his nephew a hundred thousand francs (\$20,000). It was a dangerous legacy for a young man twenty-three years of age, of cultivated tastes and boundless ambition. It vanished in stock speculations and somewhat extravagant living. When all was nearly gone, Pioche sailed for Chile in an English ship, and was there introduced by an old friend to the French consul, Mr. Le Roux de Chassagne, who appointed the young stranger chancelier of the Consulate. After that he entered the house of Roux & Co., where Mr. J. B. Bayerque was book-keeper, and on the breaking out of the gold fever, Mr. Roux sent the two out to California in charge of a cargo of general merchan-They arrived here in February, 1869, and opened what was then looked upon as a large store in a wooden building on Clay street, between Montgomery and Kearny, and nearly opposite what is now known as Court Block. Business throve with them, and consignments poured in from France, as we know they did in those golden days, when the harbor was choked with ships and our market glutted with goods. Then came the fires of 1850 and 1851, and the house suffered most severely by both of those disasters. At this juncture Mr. Sam Moss was taken into partnership, and in 1852 Mr. Pioche went to France to confer and arrange with his constituents. The consignments of the house mainly consisted of fine qualities of wines and liquors, as well as French dry goods, but on his arrival at Paris, Pioche, convinced as he was of the future greatness of California, and enthusiastic about the fortunes to be made there, so

impressed his countrymen with the enormous profits to be made upon investments in this country, that deposits amounting in the whole to six million of dollars were poured into his hands, and the house of Pioche, Bayerque & Co. was established. At that moment Mr. Pioche was one of the men most sought after in financial circles in all Paris. Bankers like Scelliere and Oppermann were never weary of listening to the details of the wealth of the new el dorado; crowds were invited to meet the narrator at dinner, and all clamored for a share in the golden opportunity. People of every class and rank came forward; the workman with his savings, the landed proprietor with his rents, the millionaire with his capital. and, inter alies, women of the demi monde with their spoils, all swelled the amount that was to be repaid a thousand fold. Mr. Pioche associated himself with Messrs. Oppermann & Co., and that house has always remained their representative in Paris. In the meanwhile the house had lost no time in employing the large funds intrusted to their charge. Fine stores and warehouses were built, the rents of which were almost fabulous. The first wharves projected into the Bay were all constructed with the money remitted from France. The line of buildings on Montgomery street from Sutter to Market street, then the boundary of civilization, rose out of the sand, and almost the entire block bounded by Montgomery, Washington, Sansome and Jackson streets, at that time the best business quarter of the city, was covered with the buildings of Pioche, Bayerque & Co. About this time Mr. Abel Guy, who had previously had a store near Commercial street, became the agent of Messrs. Scelliere & Co., the bankers of Paris.

A mind like that of Mr. Pioche could not fail to discern the future greatness of San Francisco. He overstepped the barrier of sand that hemmed in our city to the south, and bought large tracts of land, such as Haves' Valley, the San Mignel Ranch, Visitacion Valley and other lands adjoining the Mission Dolores. Already his prophetic vision covered the ground with the houses of the swelling population of San Francisco. He saw that the extension of the city must naturally follow the easy grade, and that the level portions would always command the preference. In 1852, real estate in San Francisco was exorbitantly high. Business property was paying from six to ten per cent per month on the investment, and there was a fever of speculation in town lots. In 1853, when prices had reached their apex, Mr. Pioche returned to France. Up to this time all had been rose-colored. Dividends of twenty and twenty-five per cent. per annum had been remitted to the holders of bonds of the firm of Pioche, Bayerque & Co., but now the change came. The inflation in real estate changed to an equally unreasonable depression. Everybody who had money, and everybody who could borrow money had invested it in brick and mortar, for fire was the dreaded element in those days. The consequence was that buildings increased in a greater ratio than the population or the demand; rents fell lower and lower, and those ominous placards, To Let, became wofully numerous. The rate of interest still remained very high, so that borrowers, who had calculated upon high rents. found themselves ruined. Outside lands were entirely out of the market, and the large sums invested in them by the house were for the time being, utterly unproductive. Mr. Pioche, true as to ultimate results, had too much anticipated events. During his absence his partner, Mr. Moss, died of consumption. His death afforded a strong instance of the power of the mind over the body. His brother was expected, and he insisted that he would not die until he had seen him. He bore up under the administration of powerful medicines, chiefly arsenic, until his brother's arrival, and the day after their meeting he was no more. After his death Mr. Mora Moss, conjointly with Messrs. J. B. Bayerque and Caselli, managed the multitudinous affairs of the house. It was at this time that the Sacramento Valley Railroad was commenced under their auspices, Mr. Pioche giving his assent to the enterprise by letter. It was also during his absence that the business managers in San Francisco became so largely interested in the San Francisco Gas Works, as well as in the conception of an extended system of mining ditches in the interior.

In 1856 Mr. Pioche returned to San Francisco, which he found less prosperous than his sanguine temperament had led him to expect. The same belt of sandy desert bounded the city and shut out his unimproved lands lying beyond it. He stayed a short time in California, again returning to France until 1859. In 1856 the name of the firm was changed to Pioche & Bayerque. Since his return in 1859, Mr. Pioche always resided in California, with the exception of a short trip to New York. It was on his return he built the Market Street Railroad. The city would not go to Haves Valley, so he determined to take it there. It was like opening up a new world; he tapped the city at the junction of Montgomery and Market streets, cut through the sand-hills that formed a barrier in that direction, and the city flowed through the opening and flooded the valley. The population had been too long enclosed within the narrow compass of the old town, and when it found that an easy access could be had to pleasant places where lots could be bought at reasonable rates, and where light and air and gardens could bring comfort, health and economy, then the terminus of the railroad began to be covered with pretty houses, and a new and smiling suburb sprang up within an easy reach of business. But it had been a long time to wait. It had been a heavy load to carry. Ten years in San Francisco is a lifetime as regards a fortune, in comparison to Europe, and more than ten years did Mr. Pioche bear this unproductive burden. And not simply unproductive. The taxes had to be paid; the expense of occupation cost an income; the railroad had to be built. But, like those trees which after planting are a long time ere they bear fruit, yet when they do so, produce a thousand fold, so did at length these broad lands begin to yield their golden harvest. That which was bought by the league was sold by the block; that which was bought by the acre was divided into feet. The era of homestead associations arrived. Their operations extended for miles outside the city; street railroads stretched along all the arteries leading south, and Pioche became once more a millionaire.

Let us briefly refer to the operations of Mr. Pioche, as the head of the firm of Pioche & Bayerque, outside of San Francisco. We have already noticed the Sacramento Valley Raiiroad, begun at a time when labor was high, when the population was sparse, but materially tending to open up the resources of the great basin which stretches along the half of California. At that time the Comstock lode lay buried at the foot of Mount Davidson, undisturbed and unknown. Folsom was an agricultural village. Placerville a mining town in the hollow of the Sierra Nevada; but both these places sprang into importance when the rush came to the rich mines of the Washoe District. Folsom was the terminus of the Sacramento Valley Railroad, and Placerville the starting point for the stages to Virginia City. Thus, then, the genius and enterprise of the founder aided in the development of the wealth of the country. Again, the Volcano Ditch, near Mokelumne Hill, taking the water over the mountains

to mines that thitherto remained unworked, although exceedingly rich. Amongst many other operations, the great hydraulic workings of the gravel and blue lead deposits must not be overlooked, nor the great flume from the head waters of the river Yuba. In short, we could till a volume should we enumerate the thousand and one enterprises fostered by the wealth and created by the genius of this one man. The Ely mining district was opened up by him; the capital of the county bears his mane; a population has flocked there from Utah and Nevada, as well as from California, but it was his money and his knowledge that revealed the hidden riches of the country.

If we turn to the southern portion of our State, where the milder industry of agriculture is mainly followed, there we shall find the same helping hand and head actively at work. Many large landowners of Santa Barbara and Montercy Counties have reason to be thankful for the aid which enabled them to increase their herds of cattle and flocks of sheep, and become rich in proportion as the State increased in wealth and population, and here again the product of the country was fostered by the founder. The Temescal tin mines, the Rivot process for treating refractory ores and sulphurets, the Nolf process for the same purpose, all these had his support and encouragement, and, as if not content with helping to make people's fortunes, Mr. Pioche must attend to their hygienic improvement. He discovered the virtues of a mineral spring at New Almaden; he had various tests of the medicinal qualities of the waters; he had them analyzed and compared with those of the wellknown Spas of Europe; he bought the fountain and established ap agency for the sale of the New Almaden Vichy water in San Francisco, under the superintendence of Mr. Chauvin. Many of our readers will remember the pyramid of bottles of Vichy water at the Industrial Fair, all marked with the well-known monogram of the proprietor. Mr. Pioche was a firm believer in the efficacy of this water, and his favorite residence was in the neighborhood of the spring.

From early days Pioche & Bayerque were the agents for the famous Sazerac brandy. In 1852, they had nearly half a million dollars' worth in their cellars, and they have always maintained the reputation of the mark in this market. At the fair for the benefit of the widows, orphans and wounded of France in the late war, Mr. Pioche erected a cantine, which he supplied with the oldest Sazerac, to be sold by three young ladies, whom he selected, and they realized between two and three thousand dollars, which is not very extraordinary, seeing that the price was ten dollars a bottle, or fifty cents for a thimbleful. We way remark en passant, that he was one of the main props of this Fair, and his offerings of money and valuables amounted to a small fortune.

But all this labor and expenditure of capital, all this brain work and unflinching consistency of purpose that conquered fortune, was of no avail. For months past a cruel weight had been upon his brain. Harrassed from abroad, worried at home, a prey to incessant pains in the head, days of torment and nights without relief, in a moment of frenzy he took his own life. His friends and medical attendants knew that the suicidal mania was on him. He was watched, but his manner the night before the fatal morning was so cheerful as to disarm suspicion. He shot himself through the forehead at half-past eight on the morning of the 2d of this month, with a revolver that he had fetched a few days previously from his house at San Matco. Thus ends entimely the life of a man who, whatever his faults may have been, is to be reckoned among the wound not the man he mead soon arms.

the founders of California. All his large capital was sown broadcast over this State; the return may not always have been productive, but many a source of wealth in this country would have remained undeveloped had it not been for the enterprise and liberality of F. L. A. Pioche. That this community appreciated its loss, was evidenced by the crowd of our worthiest citizens which filled the street the day of his funeral. There is but one feeling in the loss of such a man, and that is, that it is a civic calamity.

In person, Mr. Pioche was below the medium hight, with corpulence inclining to obesity, and a strongly developed massive head. His appearance was known to most San Franciscans, yet few who looked upon that heavy and somewhat unwieldy form could imagine what activity and endurance its owner possessed. He was particularly fond of fishing and shooting, and in the pursuit of his favorite pastime distance was forgotten and fatigue unknown. In private life, the subject of this imperfect sketch shone pre-eminently. Of a refined, cultivated mind, joined to a hospitable, generous nature and courteous manner, his interior life was a charm to those whose good fortune it was to be his intimate friends. There was a good-natured irony in his conversation that was very delightful, and he had a kind way with young girls that especially endeared him to them. As for his charity, it was too well known, for the applicants on his bounty became almost a persecution. His fondness for art amounted to a passion, and the walls of his salons bore evidence of the judgment and lavishness with which he indulged his taste. When a young man in the office of the Treasury, he spent a whole year's salary in order that he might buy a service of Sevres porcelain for his breakfast table. As will be seen by his will, he has left his valuable paintings to the University of California, in addition to the mineralogical collection which has been the work of half his lifetime, and is valued at \$50,000.

## Will of the Late F. L. A. Pioche.

This is my testament and the expression of my last wishes: I commend my soul to God, who will make an allowance to me for the trials that I have undergone during the last periods of my existence. They have not allowed me to do as much good as I had intended. On that account I claim the indulgence and the pardon of my enemies and of my friends. Born a Catholic, I wish to be buried in the Catholic graveyard of San Francisco: my place is set aside and marked out, next to J. B. Bayerque, deceased before me. I request my testamentary executors, hereinafter named, to see that my funeral and the laying out of my body be done with simplicity, and without delay. The remembrance of those who have loved and externed me will suffice to perpetuate and embellish my tomb. My testamentary dispositions are as follows:

First—I give and bequeath to my brother. Joseph, Henri Leonald, Picche, living

positions are as follows:

First-I give and bequeath to my brother, Joseph Henri Leopold Pioche, living at present at Avallon, Department of the Youne, in the Empire of France: to Romain Bayerque, at present traveling in Europe, but residing in San Francisco; to John B. Felton, at the present time Mayor of the city of Oakland, in the county of Alameda, State of California, and there residing; and to Judge Levi Parsons, residing in New York, United States of America, all my property and estate, moveable or immovable—such as houses, lots, farms, city lots and town lots, mines, water streams; woods, railroad stocks and bonds, mining stock, gas stock, insurance stock, or any other obligations of industrial corporations, hypothecary titles and claims, leases and all various contracts owned by me, or that I may own or have in my name, in the name of J. B. Bayerque, in the name of Pioche & Bayerque, or in the name of Lester L. Robinson, in San Francisco, State of California, or in

Within the United States or Mexico, with the charge that my heirs above named and designated shall account for and pay over the various legacies and the various domations hereinatter mentioned in this testament, and also settle the obligations I may have contracted during my lifetime, and pay the personal debts that I may leave. Second—It is my wish that, after the payment and settlement of the donations and bequests made by me, and hereinafter specified, and of my debts and personal obligations, my four heirs aboved named, enter upon and take legal possession of all I own in America, without any hindrance, discussion or opposition on the part of the public functionaries or others. They will divide it and distribute it among themselves in four equal portions or of an equal value, one-fourth of which be allotted to and belong to each of them.

BEQUEST TO ALEXANDER CASELL.

Third—I give and bequeath to Alexander Casell, residing in the City and County of San Francisco, State of California, the half of all the assets, property and ming interests which I own equally with him, and which are under his management. being and figuring under his name. I moreover give and bequeath to him, in remembrance of services rendered me, and as a testimonial of my friendship, the sum of \$30,000, to be paid to him in gold coin of the United States.

Fourth—I give and bequeath to Henri Pichoir, residing in the City and County of San Francisco, State of California, in remembrance of services rendered as an employé in my firm, the sum of \$5,000, which will be paid to him in gold coin of the United States, I moreover give him and authorize him to select a gun or the gun which will suit him the best from among my fowling-pieces.

TO OBEDIAH LIVERNORE.

Fifth- I give and bequeath to Obediah Livermore, residing in the City and County of San Francisco, State of California, in reward for his devotedness to me, and for services rendered as an employe in my firm, the sum of \$5,000, which will be paid to him in gold coin of the United States. I also, moreover, give him two of my horses, one of my carriages, the necessary and usual harness, as also my horse and favorite stallion "Pick Dib," if he be still alive.

TO PAUL D'ARTIGUES.

Sixth—I give and bequeath to Paul D'Artigues, residing in Paris, No. 18 Laftte street, the sum of \$2,000, which will be paid to him in Paris, in gold coin of the United States, or its equivalent in gold coin of France.

Seventh—I give and bequeath to my friend Pierre Mezzara, sculptor, residing in the city and county of San Francisco, State of California, the sum of \$10.000, which will be paid to him in gold coin of the United States. I, moreover, give him the bronze clock and candelabra, the bed, the divan, the table and chairs, as also the marble statue, which are in my bed-room. I also, moreover, give him the divan and the Gothic chair which are in my smoking-room, the embroidery of which is the work of Madame Amelia Mezzara. In case of her husband's death before the execution of this will, Madame Amelia Mezzara is alone to have the benefit of the donation hereinhefore mentioned both as rewards the cold top and the memorable. nation hereinbefore mentioned, both as regards the gold coin and the memorables.

Eighth—I give and bequent to J. B. E. Cavallier, residing in the city and county of San Francisco, as a token of my love for him and his family, the sum of \$5,600, which will be paid him in gold coin of the United States, or should be prefer two acres of land chosen by my testamentary executors, in the portion of the San Mignel Rancho reserved by me as my particular property, or the equivalent of the value of these two acres in several lots chosen also by my said testamentary executors, in that portion of the said Rancho San Mignel known by the name of "Horner Addition." In case of her husband's death before the execution of this testament, Madding. Cavallier and her sen Jules now in Paris wete have the boundt of Addition." In case of her husband's death before the execution of this testament, Madame C. Cavallier and her son Jules, now in Paris, are to have the benefit of the donation or bequest made by me to J. B. E. Cavallier and hereinbefore mentioned.

TO SAMUEL L. THELLER.

Ninth—I give and bequeath to Samuel L. Theller, residing in the city and county of San Francisco, State of California, in remembrance and as a token of my exteen and triendship, the sum of \$5,000, which will be paid him in gold coin of the United States. I moreover give him my plano and also the clock and the two gilt bronze candelabra which adorn the mantleplece in my parlor.

To JOSIAH H. APPLEGATE.

Tenth—I give and bequeath to Josiah H. Applegate, residing in San Francisco,
State of California, the sum of \$2.000, which will be paid him in gold coin of the U. S.

TO ONEZEINE CHAUVIN

Eleventh-I give and bequeath to Onezeme Chauvin, at present residing in Oakland, county of Contra Costa, State of California, the sum of \$2,000, which will be paid him in gold coin of the United States, or should be prefer, the equivalent of that sum in lots to be chosen by my testamentary executors from among the lots that I own or may own in the city of Oakland at the time of my death, or of the execution of this testament.

Twelfth - I give and bequeath to Dr. Pigné-Dupuytren, my friend and physician, living at present in San Francisco, State of California, the sum of \$5,000, which will be paid to him in gold com of the United States. It is my wish that this sum should be employed by him in purchasing a small piece of property as a homestead for Mrs. Pigné-Dupuytren, the said homestead to revert to Leonora Pigné-Dupuytren, her daughter.

TO HIS SERVANTS.

Thirteenth - I give and bequeath to each of my servants, or salaried employes, in my house and at my office at the time of my death, a sum equivalent to the amount of their salary for one year. This sum shall be paid to each of them in gold coin of the United States.

SPECIAL BEQUESTS. Fourteenth—I give and bequeath, over and above this year's salary, to Charles Ruedin and to Louis Ruelf, who have more specially taken care of me, a sum of \$1,000, which shall be paid to each of them in gold coin of the United States, if they be still in my employment at the time of my death.

HE WOULD HOL THE HITH HO HAY SOO!

Fifteenth—I give and bequeath to the University of California, known by the name of "Board of Regents of University," an establishment situate and about to be founded in the county of Contra Costa, State of California, all the paintings, sketches, engravings, drawings and objects of art belonging to me, and which at sketches, engravings, drawings and objects of art belonging to me, and which at the time of my death at will be found (at the time of my death) at my house in San Francisco, at New Almaden, or elsewhere in the State of California; I also give and bequeath to said University all the books and various works composing my library at San Francisco and at New Almaden, as also everything that constitutes my mineralogical, geological and conchological collection in San Francisco, State my mineralogical, geological and conchological collection in San Francisco, State of California. These collections are partially classed, and a catalogue is also partially made. I desire that they should be placed in a special portion of the buildings erected, or to be erected, for the said University, and that the room or place reserved for them be open to the public freely, and at fixed and frequent periods, as is the case with the museums in Europe, so that students and patrons of the rates and collections are the related to the rates. and sciences may there instruct themselves and increase the sphere of their studies and sciences may here instruct themselves and increase the sphere of their studies and their knowledge of facts that may be of use to hasten the progress and development of this country. In order the better to facilitate the execution of this wish of mine, I make a DONATION OF FIVE THOUSAND DOLLARS, which will be paid by my testamentary executors to the Treasurer of the said University, in gold coin of the United States, and placed at the disposal of the Regents and Trusteen, to cover the first costs for arranging and preserving them—the objects composing the bequest and present made by me to the University of California. If, in opposition to my wish, and all that I am allowed to suppose, the Regents and Trustees of the University were to refuse to accept and preserve, in whole or in part, the divers objects and principally certain objects of art, books or paintings in my collection, I request my testamentary executors to take them back and send them to France, and to hold them at the disposal of my brother-Leopold Pioche-whose name, surname and residence are already mentioned (Article 1) in this testament.

Sixteenth—L give and bequeath to Henri Mathey, residing in the city and county of San Francisco, State of California, the sum of \$5,000, which will be paid him in gold coin of the United States. I moreover give him, as a token of my friend-ship, all my sheet music and music-books, and one of my Algerian daggers, with silver hilt and sheath.

Seventeenth—I give and bequeath the sum of \$1,000 to each of my friends Moretti and Durstein, both Professors of music, living in the city and county of

San Francisco.

TO MISS BLANCHE RUTTERWORTH.

Eighteenth—I give and bequeath to Miss Blanche Butterworth, as a token of my respectful friendship for her and all her family, the two Chinese screens, highly colored, with trees and birds, which are in my parlor.

Nineteenth—I give and bequeath, as a special and respectful token of remembrance, to Mrs. Kate B. Felton, whose husband is one of my heirs above named, the Venetian mirror made in San Francisco, after a design by Mezzara, and which

is over the mantel-piece in my bedroom.

When the Holdsire that my friends W. Alvord, S. F. Butterworth, Judge Field, Judge Hoffman, Henry Barrolihet, Doctor Deane and each of my testamentary ex-

ecutors should

Cach Choose A Jewel Or a piece of furniture from among the movables belonging to me, and of which I have not disposed by this will. Whatever will remain after this selection of my jewels, silverware, etc., will be sent to my brother—Leopold Pioche—in France, who will distribute them as he will think proper, and in whatever proportion he may deem right, among Faustin Besson and his daughter, my god-daughter, Pierre Hugon and Jules Niel, my old friends, keeping for himself, his wife and his daughter, my niece, whatever may remind them the most of me.

Twenty-first—I give and bequeath to the French Benevolent Society, better Twenty-first—I give and bequeath to the French Benevolent Society, better known in San Francisco by the name of French Hospital, two acres of land situate in the Rancho San Miguel. These two acres will be selected by my testamentary executors in a convenient location, and as near as possible to the Mission Dolores, so that the French Society may be able to erect thereon an hospital or a place of refuge for poor and infirm Frenchmen. The members of the Committee appointed by the Society to direct and administer the affairs of the Society. A sum of \$5,000, payable in gold coin of the United States, will be placed at the disposal of the President and Treasurer of the said Society by my testatory executors. They will see that this sum be employed exclusively for the purpose of creeting buildings or improvements upon the preparety. improvements upon the property.

TESTAMENTARY EXECUTORS.

Twenty-second—I appoint, constitute and select as my testamentary executors, John B. Felton, my friend and attorney-at-law, Mayor of the town of Oakland, county of Contra Costa, already mentioned (Article first) in this will; Sam L. Theller, of San Francisco, already mentioned (Article ninth) in this will; Gustave Dus-Bol, banker, and agent of the arm of Belloc Freres, at San Francisco, State of California, therein residing at present, and Romain Bayerque, now on his way to Europe, and residing also in San Francisco. In case of the failure of Romain Bayerque to return to California, or in case of his death, I appoint, constitute, choose and constitute in his place and stead as one and the fourth of my testamentary executors, Gustave Tonchard, President and Director of an insurance company in San Francisco, and residing in Oakland, county of Contra Costa, State of California. I give to the gentlemen above named and chosen by me as my testamentary execu-tors and the executors of my last wishes, and of this will, written by me and here-inafter signed by me, fully cognizant thereof, and in the full enjoyment of all my faculties-I give them (I say)

To sell and dispose entirely of all my estate in America, and of all that which constitutes, according to the English expression, all my "real and personal estate," and to give thereof a title or tilles without the intervention of any Court, and without any embarassment or centestation on the part of public functionaries or other. After having taken possession of all that belongs to me, or may belong to me in the After having taken possession of all that belongs to me, or may belong to me in the said American States, my executors are also invested by me with tall power to settle, compromise and sell all that concerns me personally, and to settle, wind up, sell and compromise all my personal business, and all the business of the firm of Pioche & Bayerque. They are also authorized by me, and invested with full power to execute and deliver, without the intervention of any Court or any public power to execute and deliver, without the intervention of any Court or any public officer or other person, all deeds, papers and documents necessary for the final settlement, use or final and definitive disposal of all that I own or may own, according to the terms of this will, and all that is indicated as the expression of my last wishes and of my last testament; revoking and annulling by these presents all other anterior wibs; and all other anterior disposition. Having full and complete confidence in my testamentary executors, I declare, ask and require that

NO GUARANTEE, NO BOND AND NO SECURITY Of any kind be required of them, and that no Court shall interfere in this respect Of any kind be required of them, and that he contembrated in faith whereof, I have with my executors of any of my executors afteredly named. In faith whereof, I have hereunto set my hand and seal in the city and county of San Francisco, State of California, this twenty-seventh day of May, one thousand eight hundred and goventy.

F. L. A. PIOCHE.

ATTESTATION.

The above instrument of twelve pages was subscribed by the said Francois Louis Alfriede Pioche, in the presence of each of us, and the same acknowledged by him to each of us, and he, at the time, declared the above instrument, so subscribed by him to be his last will and testament, and we, at his request, in his presence and in the presence of each other, have signed our names, our respective places of residence, this twenty-eighth day of May, in the year of our Lord eighteen hundred and fewenty.

W. W. Srow, Altorneya-th-aw, 1018 Pine street, San Francisco. S. H. MEREDITH, Attorney-at-law, 1006 Clay street, San Francisco.

## C. P. R. R.

Commencing Monday, April 29th, 1872, and until further notice, Trains and Boats will leave San Francisco

7.00 A.M. Overland Express Train for Sacramento, Marysville, Red Bluff, Colfax, Reno, Ogden and Omaha.

3.00 P. M. San Jose Passenger Train, stopping at all Way Stations.

4 ()() P. M. \*Passenger Train for Stockton, Merced and Sacramento.

630 P. M. Overland Emigrant Train-Through Freight and Accommodation.

7.30 A.M. Steamer New World (from Broadway Wharf), connecting at Vallejo with Trains of California Pacific Railroad.

4.00 P. M. \*Sacramento Steamer (from Broadway Wharf), connecting at Vallejo with Trains of California Pacific Railroad.

2.00 P. M. \*Steamer Antelope (from Broadway Wharf), connecting at Donahue with Trains of S. F. & N. Pacific Railroad.

 $8.00^{\rm A.M.}$  Excursion Boat (Sundays only) from Broadway Wharf, connecting with Special Train of S. F. & N. P. R. R. for Cloverdale and intermediate points, returning to San Francisco by 7:00 P.M.

OAKLAND BRANCH—LEAVE SAN FRANCISCO, 7:00, 8:10, 9:20, 10:10 and 11:20 a.m., 12:10, 1:50, 3:00, 4:00, 5:15, 6:30, 8:15, 9:20 and \*11:30 p.m. (9:20, 11:20 and 3:40 to Oakland only. Leave Brooklyn, \*5:30, 6:40, 7:50, 9:00 and 11:00 a.m., 1:30, 2:40, 4:55, 6:10, 7:55 and 10:10 p.m. Leave Oaklands N, \*5:40, 6:50, 8:00, 9:10, 10:00 and 11:10 a.m., 12:00, 1:40, 2:50, 3:50, 5:05, 6:20, 8:05 and 10:20 p.m.

ALAMEDA BRANCII—Leave San Francisco, 7:20, 9:00 and 11:15 a.m., 1:30, 4:00, 5:30 and 7:00 p.m. (7:20, 11:15 and 5:30 to Fruit Vale only.

Leave HAYWARDS, 9:345, 7:00 and 10:45 a.m., and 3:30 p.m.

Leave Freuet Vale, \*4:30, 7:35, 9:00 and 11:20 a.m., 1:30, 1:05 and 5:30 p.m.

\*Except Sundays.

A. N. TOWNE, General Superintendent.

## CALIFORNIA MAIL BAG.

## History of the American Press.

William L. Stone, Esq., delivered recently an interesting lecture on the "History of the Press" to a large and attentive audience in Brooklyn, under the auspices of the Young Men's Association, at the Church of the Mediator, Washington street. After a happy allusion to the historical place given to the Devil and Dr. Faust, hinting that the moral condition of the Press in our day suggested the idea that the hinting that the moral condition of the Press in our day suggested the idea that the former of these personages still continued to occupy an important prominence in that connection, the lecturer observed that the honor of setting up the first printing press in the American Colonies belonged to Massachusetts. Only nine years elapsed from the landing of the Pigrims at Plymouth when a press was in operation at Cambridge, then as populous as Boston. The project was set on foot by Rev. Jesse Glover, a dissenting clergyman in England, who took a great interest in planting the colony, and part of whose family were already on these shores. He embarked for America with his press, types and other equipments for an office in 1628, just about eight years after the Mayhower had arrived off Plymouth Rock. He died, however, before his ship reached the shore. At that time Cambridge was the seat of the civil and ecclesiastical power in Massachusetts; and the Academy which subsequently grew into Cambridge University, had been commenced. The leading men of the colony determined to establish there; and there it remained for sixty years under their control, and forty years before there was a press in any other part of the colony. The first printer was Stephen Day, engaged in London by Mr. Glover, and a descendant of the celebrated John Day, the printer. The second printer in the colonies was Samuel Green, to whom Day relinquished the business in 1649. Green printed the Judian Bibles for those early apostess of the new business in 1449. Green printed the indian Bibles for those early aposttes of the new word who first engaged in the benevoices work to attempting the civilization angle evangelization of the abortginees of this country—a noble race of red men who have melted away before the pale-faces like the hoar frost from before the morning sun

ing sun. The first newspaper published in North America was the Boston News Letter, commenced in April, 1704, by John Campbell. It was printed by the authority of the licensers on a half sheet of what was then known as "pot-paper," a large size of foolscap. It was printed by Bartholomew Green. The second American newspaper was the Boston Guzetle, the first number of which was published in December, 1719, by William Brooker. It was printed on a half sheet of foolscap, by James Franklin, brother of Benjamin Franklin, who served his apprenticeship with him. It was not long before James Franklin was arrested by the Government, and invisional days used to the conduct of his paper. During his prisoned four weeks in the common jail for the conduct of his paper. During his imprisonment his name was taken out of the paper and that of Benjamin Franklin substituted, but the tone of its deliverances does not seem to have been materially changed. The paper expired in 1727.

William Bradford commenced the New York Gazette in 1725. In 1766, Wayman, the editor of the New York Gazette, was arrested and imprisoned for a contempt of the entor of the New Yorkers, as a stress and impresented a consequence of the Assembly, on a charge that two typographical errors were printed in the speech of Sir Henry Moore, the Governor of the Colony. One of these errors consisted in the printing of the word never for ever, reversing the meaning of a sentence. Among instances of remarkable typographical errors, the lecturer told of a lad in Among instances of remarkable typographical errors, the lecturer told of a lad in a printing office, not well posted up in mythology, who came across the line, "She shall reign the Hecate of the deepest hell," exercised his own genius in assuming a correction of the "copy," and set it up, "She shall reign the He Cat of the deepest hell." It was related of Benjamin Franklin that in putting a book of common prayer through the press he accidentally let the c drop out of the form in the word "changed," which made the particular sentence to which it belonged read thus: "We shall all be hanged in the twinkling of an eye." It was charged that Franklin had done that maliciously, but such a charge was without the evidence to justify it.

James Rivington began his paper in 1733 under the tele of Rivington's New York Guzette; or, Connecticut, New Jersey, Hudson's River and Quebec Weekly Advertiser. The imprint was: "Printed at his ever open and uninfluenced press, fronting Hanover Square." In November, 1775, a party of armed men from Connecticut entered the city on horseback, beset Rivington's habitation, broke in to his printing office, destroyed his printing presses, and melted his type into bullets, Rivington then went to England. On his return he established the New York Royal Gazette, which was published twice a week. Four other newspapers were published in New York at the same time, under the sanction of the British officers.

Arrangements were about that time made to publish one of the papers every day. The rapid progress of the press in the United States, and its development into a great moral power, was dwelt upon and characterized as one of the chief glories of our country and age. It was the fitting redex of public opinion, while it was the great teacher and moulder of the popular will. We may add that the last News Letter of any note published on the American continent was the San Francisco News Letter, established sixteen years ago, when California was almost a wildermas. Our News Letter has developed into a great power and infallible oracle; and dwelt upon and characterized as one of the chief glories of our State and Country.

## Ham Fat.

In a multitude of connecllors there is apt to be great confusion. In a multitude of newspapers there arises an execrable jumble. We are of the opinion that there ought to be but one newspaper in San Francisco. That that journal ought to be a week'y one, and that that weekiy ought to be the San Francisco News Letter. The News Letter can do as the business required simply by increasing, not listice, but the number of its pages, and thus concentrate intelligence in an accessible form. Advertising con d be intelligently classified and nade cleap. Editorial opinions would not conflict, public opinion thus following an abse leadership would unite, and when carled into action would concentrate and harmoniously would unite, and when cocied into action would concentrate and harmoniously agree upon all questions concentrate the public good. Durly papers are hastily read during business hears; articles are uneigested and time is just from pressing avocations. A weekly journal would be derivered on Sanday morning, and the whole leizure day would be spent in perusing it. Handreds of people who now go into the country, bounge in saloons, or go to church, or otherwise like their time and spend their money, would remain at home with their famous. The telegraphic news would be compete and reash e. The commercial alticles would never confict in their statements. An inteligent law editor would preside over the department of the counts and trials; and ai matters of legal dispute might be referred the journal for miditation and exthement, decisions to be given efter a fair state. the journal for mbitration and settlement decisions to or given efter a fair state-ment of facts, thus dispensing with court- and lawyers. A harned physician would have charge of the health department, advice, prescriptions, recipes, and general directions in sanitary matters would dispense with doctors. A derayman would directions in samilary matters would dispense with doolors. A clerxynan would be intrivished from each of the different denominations to discourse upon the tent's and dogmas of each particular both, thus muchters might be depensed with, and churches turned into school houses, hospitales, skating rinks, and used for other useful purposes. A single law firm cond is permanently engaged as fighting actions for libel. A first class pugilist could be permanently engaged as fighting actions for libel. A first class pugilist could be permanently engaged as fighting editor. Our printing office one set of chitoral rooms would save expense; one editor. Our printing office one set of chitoral rooms would save expense; one set of reporters for local tens would prevent confusion and missistement. The North Letter will undertake, if properly protected by legislation, and advoced to monopolize the newspaper market, to give a journal, once awek, more valuable than all the durly and weekey journals now printed in San Francisco. To illustrate the annoyance of a marketide of newspapers, let us rake the following: When the Crown Prince of Russia visited America, we were informed by telegraph that "The Crown Prince of Russia of his harr with ban tat." at the morning papers, Attag. Coll, and Chronicle printed if "The crown Prince oils his has a with the first papers came to is with the announcement that "The Grown Prince oils his hair with been fat." Hams went up in the market. Perfamers were anxious to monopolize the learn fat market. The ladies ordered hum int for their toilet. All the young gentamen greased their locks with ham fat. The country papers came to is with the announcement that "The Crown Prince oils his har with bear fat." Hand, and Chronich had the assention fat for his har, but bear's grease. "Man, fath, and fath of his har papers came to is with the announcement that "The Crown Prince does not use ham fat for the hard, but bear's grease." Ham fath as har with ham fat. "The country papers came to be with the announce be turnished from each of the different denominations to discourse upon the tenets the nam lat market would not nave need obtained; deal s grease would have fe-mained firm, and there would be no possibility of disturbing the friendly reading existing between Russia and America, growing out of a misrepresentation of the personal habits of the heir expectant to the Russian throne. It is owing to the inpersonal maters of the near expeciant to the thissian infolic. It is owing in the ill-acurate statements and mash declarations of the press that the nation is embroid in foreign entanglements. We are preparing a bill for the Legislature, and, of course, anticipate the opposition of a mercenary and schilsh press. Let our readers reflect what a relief it would be to be compelled to peruse only one paper.

The United States Senate, March 28th, adopted an amendment to the tax bill, repealing the whole income tax after July 1st, 1872—28 to 11.

## The Origin of Scandal.

Said Mrs. A. To Mrs. J., This lady we Have mentioned, she In quite a confidential way, "It seems to me Gave needlework to Mrs. B., And at such news That Mrs. B. Could scarcely choose Takes too much-something-in her tea." But further needlework refuse. And Mrs. J. To Mrs. K. Then Mrs. B., As you'll agree Quite properly—she said, said she, That she would track The scanda! back That night was overheard to say-She grieved to touch Upon it much,
But "Mrs. B. took such and such!"
Then Mrs. K.
Went straight away To those who made her look so black. Through Mrs. K.
And Mrs. J.
She got at last to Mrs. A., And told a friend, the self-same day, "Twas sad to think"-And asked her why, With cruel lie,
She painted her so deep a dye? Here came a wink-"That Mrs. B. was fond of drink." Said Mrs. A., The friend's disgust

was such, she must
In sore dismay,
Inform a lady, "which she nussed," "I no such thing could ever say;
That Mrs. B.
At half-past three
Was "that far gone, she couldn't see!" On too much sugar—which you do!"

## Japan and Anglo-Saxon Ideas.

The evidence is strong that Japan means business. That distant but progressive Nation shows the vitalizing power of Anglo-Saxon ideas. In every department of the Japanese Government new life and energy, as developed in Western mations, is apparent. The most characteristic feature of the progressive tendency of the Japanese mind, and one in singular harmony with Anglo-Saxon ideas, is the the Japanese muc, and one in singular during the production of the spritted or religious element, and the predominence of the material or industrial. Among all nations the priests of every character, as representing seets, have been the great stambling blocks against not only the perfect unity of individidual nations, but also the stambling blocks by which national ties have been alienated one from another, and kept in a state of bitter antagonism. As the peaceful pursuits of trade and the benign influencies of commerce extend themselves, merchants will prove to be more powerful and peaceful missionaries to bless and benefit their race than the priests, notwithstanding their avowed sectaones and senement that race that the priests, now distanting their avowed sectarian sacretification and so-called delegated powers from the Dvine source. There is no reflection more consoling to the thoughtful man, he whose heart is in sympacthy with his fellow creatures, than that which leads him to believe in the altimate triumph of modern and material ideas over the old or ecclesiastical. The former seeks to assert the individuality and supremacy of the individual over and above a system which means subjugation of the individual to a theory. The whole tendency of Anglo-Saxon civilization in this age is to uproot the ecclesiastical barbarism which was planted centuries ago in the governments of the past, is no nation which has so thoroughly conceived this idea as that of Japan. is no nation which has so thoroughly conceived this idea as that of Japan. The Japanese are progressive materialists. We have on former occasions noted with pleusure every step taken by our Oriental neighbor in the path of Western prosperity. In further illustration of the perseverance and energy manifested by Japan, we refer to the late arrival in this city of A. B. Capron, Esq., with fine blooded stock, improved machinery, and other material resources destined for that country. These were purchased east and west, by direction of General Horace Capron, Japanese Commissioner. The stock consisted of two fine stallions of the Membrino and Black Hawk breed, and three splendid driving horses of Membrino and Messenger stock. There are, in addition also samples of the blood cettle care. and Messenger stock. There are, in addition, six samples of blooded cattle; one Durham bull and three heifers, and one bevon bull and three heifers. Of sheep there are three choice varieties, representing the Lincoln, Merino and South Down, and six Berkshire and Suffolk hogs. The machinery consists of saw mills, steem engines, turning lathes of various descriptions, farming implements, sleighs, carriages, buggies and wagons of latest pattern and ether articles of a practical nature. Complete sets of harness, from the plainest to the most costly, are also in the bill. It is estimated that the cost of all cunnot fall short of a quarter million of dollars. And yet this is but a drop in the bucket of what is to come. This exchange of demand and supply is mutually beneficial. The Japanese, if there is any burgain in this trade, have the advantage. They get value for their cash, and free ideas for their enterprise. Every dumb animal and every piece of machinery represents Anglo-Saxon thought, energy and skill. They are specimens which could only be produced by a careful, practical, civilized people. Our neighbors across the Pacific, in looking upon and admiring them, will enulate us in producing like results. This emulation will continue until the ideas of both people and Messenger stock. There are, in addition, six samples of blooded cattle; one assimilate and Destiny works out its mission in a more extended sense by the harmony and unification of all nations.

#### The Preservation of Grain in Vacuum.

The following extract from a Paris letter of February 21st, will be read with much interest by our farmers and grain merchants:

much interest by our farmers and grain merchants:

The Academy of Sciences expressed approbation, at its last scance, of the system of preserving grain introduced by Dr. Louvel. The report of the Commission, after having a luded to the importance of the question and the principal solutions it has afready received, writes thus on the process of Dr. Louvel: It is known that the most perishable substances can be preserved from patrefaction when they are kept from contact with the sir. It is this principle which the inventor has endeavored to apply industrially. His apparatus is very simple, and is composed of cylindrical vessel of sheet from, closed by two convex covers. The species of portable grainer is indeed vertically union supports at a convenient high, or the cynnarical vesser in succe non-consupports at a convenient hight, so that the convenient of all line and emotying can be conveniently carried on. The upper portable granary is placed vertically upon supports, at a convenient highly, so that the operations of filling and emptying can be conveniently carried on. The upper cover is pieceed with three openings; the first is a man-hole, by which the corn is introduced, and which can be hermetically closed by means of a rubber packing; the second opening is filted with an air valve, by which the vacuum is obtained; and the third is closed with a gauge. The bottom of the vessel has only one hole for taking out the grain, and is closed with a suitable stopper. The capacity of the and the third is closed with a gauge. The bottom of the vessel has only one hole for taking out the grain, and is closed with a suitable stopper. The capacity of the apparatus is about 350 cubic feet. The vacuum is effected by means of a pamp worked either by hand or power. A vacuum equal to three inches or four inches of mercury is sufficient to destroy all insect life. M. Lowel estimates that 250 should be the selling price of a granary to hold 350 cubic feet of corn, and £32 the price of the pump, which, with the necessary pape fittings, etc., would bring the total price to £56. Of course, one pump would serve to exhaust any number of vessels. The advantages M. Louvel chans for his system are, that the wheat is placed beyond change of all seculations and that the inventor is the contraction. placed beyond chance of all spontaneous changes, and that the prompt evaporation of any excess of mosture which it could contain removes all tendency to heating. Of an exercise of most of the vacuum is protected besides from exterior causes of deteriorations, from the influence of the atmosphere, from the attacks of insects, in short, from every sort of damage to which it is exposed in ordinary granaries: the charancom not only ceases to multiply in the closed chambers, but it dies, and dries up in the course of a tew days. The partial vacuum once made, the apparatus requires no further attention nor care, excepting an occasional galance at the gauge, to see if the degree of exhaustion is obtained. Flour, biscaus or dry vegetables can be preserved in a sanjar apparatus. M. Louve barnishes, in support of the assertions which precede the result, the account of an experiment made at the experimental farm at Vincennes, with perfect success. The following is a resume of the experiment: Three apparatuses, of 175 cubic feet each, were charged on the TSh Juy, 1887, the one with wheat of good quality, to which were added four gal-lons of fiving characters, the second contained damaged becaut, hall destroyed by the insect; and the third a quantity of ordinary floor. The sacuum made in the three apparatuses corresponded to four inches of mercury, they were then left exposed to the action of sun, rain and frost, and they were opened on the 24th January, 1868, more than six months after they had been closed. The gauges January, 1898, more than six months after they had been closed. The gauges showed a vacuum of fifteen inches, the great difference being accounted for by the experimenter by the evaporation of the water in the vesses. The corn showed no alteration; it was very dra, and still preserved the power of germinating, the characteristic was chosed; but all the insects were completely discondition as when it was enclosed; but all the insects were completely destroyed. The flour was perfectly preserved. The Academy considers the process of M. Louvel as a plicable with great advantage in the preservation of corn and many other provisions.

Two rival saints have long lived opposite each other in San Francisco. The one, Saint Alban, the first British martyr, keeps a miliniery and music store at Corinthian Hall; the other, Saint James, hangs out in Solomon's Temple, in the same street. The former takes harmless pastime in Gregorian chants and plain song; the latter has been addicted to Attic eloquence in a tearcett. Each has had no connection with the "shop over the way" until sunday evening last, when all the Alban tolks scampered through their service, and rushed across the way to hear the farewel utterances of Garrett. How tenching is Claistian sympathy toward a rival when he's down! St. Alban looked decorously doi:till at the obsequies of St. James. That Church—the Bishop's holby—has proved commercially and ecclesiastically a failure, and the Bishop's son, who was its churchwarden, owes nine months' subscription, and of late has been non-incombast there. St. Alban, long under the episcopal ban, still survives, and is rather salubrious than otherwise, probably because it has so long done without a clergyman, and had no dealings with histops. It is said that Kip is not implacable when besten, and that if the patres Albani will go down on their knees and expreseremes, and mean to persevere in our course, his Lawnship will baptize, confirm, ordam and doxologize every one of them. Heresy trumphant becomes orthodoxy, and schasm, when successful, is no longer schismatical. When the mountain won't come to Mahomet, Mahomet must go to the mountain. Badger will remove his excommunication from the sacerdotal head of Kip, and receive him into St. Alban's exterte on Easter Sunday, on a public confession of his faith that he is an ecclesiastical fiction.

<sup>-</sup> According to Agassiz, man existed upon this earth one hundred and fifty housand years ago.

#### Court Chat.

- Probably a more imposing State pageant was never seen in any country than that which on Tuesday, February 27th, attended the National Thank-giving in St. Paul's Cathedral, London, for the restoration to health of the Prince of Wales. Paul's Cathedral, London, for the restoration to health of the Prince of Wales. The accounts which have come to hand of this most memorable event are replete with interest, if only taken as indicative of the course of popular feeding. So many people came crowding into London that on the day previous the trains were packed with strangers desirons of seeing the display of Tuesday. The preparations were carried on all Monday night by an army of workmen, who were engaged in decorating the streets and otherwise preparing for the pageant of the morrow. The day opened with salutes and the ringing of bells at survise. From an early hour the streets through which the procession was to pass were cleared of vehicies and pedestrians. The line of merch to and from the Cathedral is seven miles in length, and was guarded by 11 000 tenos, and the entire Palice force: the carriage way and was guarded by 11,000 troops and the entire Police force; the carriage way along the whole of this distance was fenced in, while the houses were decorated from cellar to attick. The route was a perfect avenue of flags, streamers, and triumphal arches. Every available place was occupied by spectators, who, it is estimated, numbered four millions, and in some cases houses on the route were let for the day at a year's rent. St. Paul's was superbly decorated for the occasion, for the day at a year's rent. St. Paul's was superby decorated for the occasion, and within its walls about 14,000 people were sented, while counties numbers stood outside, within hearing of the music. The procession escorting the Queen began to move from Buckingham Palace shortly before noon, amid the roar of artillery, the riuging of bells, and the National Anthem sung by thirty thousand children. In the procession the great bodies of the kingdom were represented, and all the crack regiments of the army furnished detachments. The Queen's carriage was preceded by the Royal Household and members of the Royal Family, including the Duke of Edinburgh, Princes Arthur and Leopold, and the Prince and Princes of Wales. The Prince of Wales looked thinner and paler than when last seen in of Wales. The Prince of Wales looked thinner and paler than when last seen in public, but appeared to be much stronger than was expected. As the Prince and Princess came in sight, the immense assemblage of spectators began to cheer, and the cheering increased to a mighty roar as the Queen, whose carriage followed, came in view. The cheering and shouting was taken up as the procession moved on. At Temple Bur the Queen received the keys of the city from the Lord Mayor and the corporation. The rest of the journey to the doors of the Cathedral, where the Queen arrived at between one and two o'clock, was one great and continued ovation. Around the old cathedral, gorgeous with splendid trappings, and its vastnaye filled by tier mon tier of calleries, were scated the dignitaries and the legal can be applied to the promise of calleries, were scated the dignitaries and the legal. ovarion. From the on tend galeries, were scatted the dignitaries and the legislators of the untion, and the chief local officials of every town in the Three Kingdoms. There were foreign princes and diplomatists, primates, peers and Commons -while beauty and rank combined to make the scene resplendent with color and animation. On the entrance of Her Majesty, the entire assemblage rose, and remained standing until she sat down on the throne. The Peers were on the right of the throne, and the members of the House of Common on the left. The We Deam, from the 115th Psalim, was sung by a mouster chorus of picked singers, after which the Archishop of Cantrebury delivered a sermon. At the conclusion of the services, the procession reformed and returned to Buckingham Palace, the Prince of Wales occupying the carriage with the Queen, who was moved to tears by the acclamations of a people whose affection only needed such an opportunity by the acclamations of a people whose affection only needed such an opportunity of being manifested to confound all cavillers at, and malignant enemies of the Throne. The ex-Emperor of France and his son sat at a window in Oxford street and saw the pageant pass. The enthusiastic demonstrations of loyally were reaewed along the route, and did not cease until the carriage of the Royal Family passed through the gates of the palace. The weather was brilliantly fine throughout the day, and the celebration was a complete success. Great preparations were made for an illumination at night of St. Paul's, the Bank of England, and many other public and private buildings. The day was observed as a legal holiday throughout the United Kingdom. Dispatches from the principal cities of England, Scotland and Ireland report Thanksgiving services on a scale commensurate with their wealth and population. In many of them processions and religious exercises, similar to those in the metropolis, took place. In the smaller towns, the villages and hamlets of England, Scotland and Wales, the day was celebrated with appropriate festivities. In Ireland special prayers were offered in all the churches by order of the Bishop of the Irish Church. In Dublin a To Denm was sung at St. Patiek's Cathedral, and the Castle and portions of the city were illuminated at night. To all the world, reflecting over such spectacles, there is in them a great lesson of the moral grandeur of a constitutional throne and of the sublime emphasis of the attachment of a free people.

— On an occasion when Col. Barry brought forward a motion on the British navy, Lord North said to a friend of his who was sitting next him in the House, "We shall have a tedious speech from Barry to-night. I dare say he'll give us our naval history from the beginning, not forgetting Sir Francis Drake and the Armada. All this is nothing to me, so let me sleep on, and wake me when we come near our own times." His friend at length roused him, when Lord North exclaimed, "Where are we!" "At the battle of La Hogue, my lord." "Oh, my dear friend," he replied, "yon have woke me a century too soon!"

— The Japan Herald announces that on the return of the Japanese Embassy, now in this country, his Imperial Highness the Mikado of Japan, will visit the United States. His Majesty is about 21 years of age.

- In tracing the rise and growth of the British Constitution, historians have not made so much as they might have done of the length of many of the reigns. This has admitted of steady if 3 low development, which might not have been the case with more frequent changes in the head of the Government. A change every four years, says the Leisaux Flour, may suit the constitution of the tall American pine, but would not be so favorable for the broad British oak. The reigns of only ten Sovereigns covered more than four centuries, the aggreeate of the following reigns being 400 years: Henry 11, 36; Henry 111, 36; Edward L., 35; Edward III, 50, Henry VI., 39; Henry VIII, 38; Elizabeth, 45; George II., 34, George III., 60, Queen Victoria will have reigned thirty-size vears at the next attaincessary of her accession. Her reign already for exceeds that of the oldest Sovereigns of Europe. The Duke of Mecklenberg-Streley dates from 1842; the Duke of Saxxe-Coberg from 1841, the Pope from 1846; and the Kings of Italy and of Holand from 1849. The reign of Victoria began in 1851; and the Kings of Italy and of Holand from 1849. The reign of Victoria began in 1851.
- It has not been known that George III. went twice in state to St. Paul's; the second time being in 1797, to return thanks for the great mayal victories obtained by Howe, dervis, and Duncan; the procession being diversified on that occasion by three artifery wagons containing the French, spanish, and Dutch flags captured during the various actions, attended by many of the gallant officers and men who had served in those actions.
- When the United States steamer Narraganast! was at Honolulu, recently, the officers were asked to duse with the King. The King had known Paymaster Scheuck's father, and called Schenck himself to take the seat beside him. When the wine was presed, the King reached down under his chair and drew out a "private bottle" for the delectation of himself and his chosen guest!
- It is rumored that one of the beautiful country stats of Norwich, Conn., has been taken by the ex-Emperor and Empress of the French, and will be occupied by them next Summer.
- The Emperor of Germany has decreed a session of the German Parliament, to commence on the 8th of April.
- The Emperor and Empress of Brazil are on their way home to Rio Janeiro, South America.
- It is said that Mr. Disraeli, undaunted by a previous failure, is once more about to try his fate as a dramatist.

## Special Brevities.

- The guano deposits on the Chlucka I-sands, which were in some places apwards of the feet thack, and generally admitted to be the extent of back, are now a special day Dr. Habel and by Prot. Edwards to be an accumulation of the bodies of animals and plants most of them of marine on an. According to a notice in the Mexicos Megazine, it appears that the anchors of ships necess of in the venity of the teamo I-sands frequently bring up guano from the bottom of the sea. Thus is thought to be appeared to the bard origin of the deposit, and to refer it to those infusorial strata which are found in various part of the world.
- Perhaps De Quincy was right in preferring to all others for racy thought and cheesertic English the letters of "weer-squeated women, not too consequenced with nools." Whether because these women have a greater play of liney, are better trained in their own language, are uses selfish than man, so that they try to write that which by natultion they conceive to be most interescent to their correspondents, or because their writings are objective rather than subjective, and are a ways personal in the highest degree, there is nothing like a genuine woman's letter. Pall Mall Gagette.
- The Senat has passed, without amendment, the Assembly bill amending the mining corporation Act. The bill authorizes a majority of the stockholders in a mine to call a meeting at any time, on a policiation to a County Judge for permission, and at such meeting the officers, all or say of them, may be removed by vote of two thirds of the stock. This is meant to break up the dishonest ring management in mining corporations, and as the Governor is friendly to such reform, he will doubtless approve the bill.
- Milmo Adelma Patti's emaggement has ended at 8t. Petersburg. She will sing in Vienna from the 10th of March to the 25th of April: from the 18th of May to the 25th of July at Covent Carden; from the 18th of August to the 24th of September in Hombarch; and on the 23th of October will return to Moscow; and from the 18th of October will return to Moscow; and from the 18th of October will return to Moscow; and from the 2st of March, 1853, she will fulfill a farewell engagement at 8t. Petersburg, prior to her long-promised trip to America, where her Operatic career was first commenced.
- The wife of a prominent merchant in Buffalo played a sharp game on some burglars not long since. Hearing a rattling of window blinds in the night, she crept to the woodshed and profiled an axe. When the hand of the most advanced burglar rested on the window-silt, she chapped off four flagers, and was not melected further. The next day she visited the various doctors with her trophies, and found them to belong to a neighbor, who was supposed to be above such thines.

- There is actually a considerable commerce in toads between France and England. A toad of good size and in fair condition will fetch a shilling (25 cents) in the London market, and a dozen of extra quality are worth £1 (55). You may see these imported toads in all the market gardens where the soil is moist, and the owners of these gardens even prepare shelter for them. They pay their way by catching insects.
- Alphonse Karr, the gardener poet, has offered a bon mot to the world. He was lately present at a banquet given by the disciples of Hahnemann. Toasts were given to the health of every medical celebrity by everybody, when the President remarked, "Monsieur Karr, you have not proposed the health of any one." The poet rose, and modestly replied, "I propose the health of the sick."
- In the Union Midicale, M. Rabuteau refers to the use of bread made with sea-water as increasing the appetite and stimulating direction. He states that it is pleasant to eat, and exercises a beneficial medicinal influence in cases of dyspepsia, phthisis and scrofula. It has also been found conducive to health on board ship during long voyages.
- We hear, on good authority, that five or six poems of Heine, equal to his very best, are kept under lock and key in the secretaire of the friend to whom they were addressed, and who refuses to publish them on account of their personal and intimate tone. Surely, it is a mistake to risk the destruction of these poems by keeping them in in Ms.—Athenaeum.
- At a meeting of the Great Northern China and Japan Extension Telegraph Company, held on the 23d ult. at Copenhagen, it was resolved to amalgamate with the Great Northern Telegraph Company, to lay a telegraph cable to the port of Amoy, and to build a maintaining steamer, provided with diving apparatus, with a station in the China Seas.
- The two most precious things on this side of the grave are our reputation and our life. But it is to be lamented that the most contemptible whisper may deprive us of one, and the weakest weapon of the other. A wise man, therefore, will be more auxious to deserve a fair name than to possess it; and this will teach him so to live as not to be afraid to die.
- The Tague correspondent of the Pall Mall Gazette writes that the new Dutch Minister of War has issued a circular by which soldiers will in future be relieved from compulsory attendance at Divine service on Sundays. Henceforth, church-going will be entirely optional in the Dutch army.
- Treasure shipments overland, by express, for the week ended March 27th, were \$8,146 65, of which \$65,263 40 were in gold bars and \$22,883 25 in silver bars. A shipment of \$23,963 79 was made to Hoilo, Philippine Islands, March 12th, per Sonora, by George Howes & Co.
- Japanese auctions are conducted on a more orderly system than our own. Each bidder at an auction writes his name and bid on a slip of paper which he puts in a box. When the bidding is over, the box is opened, and the goods declared the property of the highest bidder.
- There are no fewer than 232 political journals published in the Swiss Republic. Of these, one only is printed in English, against 173 appearing in German, 9 in Italian, 44 in French, and 5 in the Romance dialect. Besides these there are 170 other periodical publications.
- Our Transatlantic cousins, who never exaggerate, tell us of a steer, weighing 3,980 pounds, being "raised" on General Grant's farm, in Illinois. How was it raised! By steam, or crane, or hydraulics, or the power of imagination, or what! Somebody answer.—Hornet.
- Three-fourths of the difficulties and miseries of men come from the fact that most want wealth without earning it, fame without deserving it, popularity without temperance, respect without virtue, and happiness without holiness.
- The New York Evening Post tell us that "sailors are never so much at sea as when they are on shore." In this they are somewhat like hen-pecked husbands, who are never so nuch at home as when they are abroad.
- An old comedy by Marchese, entitled "A Misunderstanding," was recently produced at Genoa with great success. It is quite a literary curiosity, from the fact that the letter r does not once appear in its text.
- The east side of Hildeshelm Cathedral, England, is nearly covered by a single rose tree, mentioned in documents nearly 1,000 years ago. The stem is a foot in diameter, and it bears countless flowers every Summer.
- The Turkish play promises to become one of the institutions of Pera. Mustapha Effendi has written a new piece entitled "Leila and Medjinoun"—an Arabian love story with a tragic ending.
- A London dressmaker obtained £330 damages in an action for breach of promise of marriage, which she brought against a negro barrister, from Sierra Leone.
- Listz has been placed on the pension list, to the very agreeable amount of six thousand florins a year, by the Hungarian Government. Vive la Musique!
- Minnie Hauck, the American prima donna, has been offered by the Empress of Austria the position of cantatrice to Her Majesty for life.

## He that Will Not When He May.

I had not thought of love and Rose: Rose walked among the woods with me: Of this and that we spoke, who knows How idle words may be?

Rose, as an arrow straight was she. Her fair arms quivered in the light, Plucking a blossom from the tree; I did not see the flower was white. A little stream through velvet moss

I seemed as cold as stone; and still With boyish, listless step I went;

A shining silver channel made; Nature and noontide, amorous, I spoke of trees, flowers-what you will Her sweet eyes wondered what I meant. Were sleeping in the silent shade.

The dew had gifts to give of pearls, The chestnut tree had leafy vails; I listened to the mocking merles, Rose listened to the nightingales.

Sixteen was I, with sullen air, Twenty was she, with shining eyes; The nightingales made songs of her -Of me the merles made mockeries.

Rose took her sandal off, and set-I see her innocent shy air Her fair feet mid the mo-ses wet: I did not mark her foot was fair.

I had no word to say the while I followed through the woods, but I Noted her lips a moment smile, A moment open to a sigh.

Until we left that quiet place, I did not know that she was sweet; "We'll think no more of it," she says— Ah! now I always think of it.

- Victor Hugo.

Everybody will deal in stocks. The clergy may preach against the sin of gambling: the Press may write against the policy of dealing in mones; mathematics may demonstrate the probability of loss; ones own judgment may be convinced of the uncertainty of mining stock ventures; still humanuty is trail and men and woman will gamble. We have tried it and failed mot because our purse was not as long as the Bank of Cailtornia, or our experience as great as Hayward's, or our judgment as good as Shaaron's, or our enterprize equivalent to Gashwiler's we failed for want of luck, and have become demoralized to that extent that we have become timid. When stocks are low, we look confidence; when they are high, we haven the nerve to go in. This being the condition of things, we have invented a process of dealing in stocks, at once safe and satisfactory. We took the hint from a farodening incident we once witnessed. In 1849, we were distributing red checks upon the green cloth when our attention was we were distributing red checks upon the green cloth, when our attention was arrested by a gestleman in Butternut clothing, who stood intently watching the game. Sudden'y he exclaimed: "By thunder, I've lost!" and handed the dealer ten dollars. Dealer - "You had no money on the cards." Pike County - "That's the dollars. Dealer—" You had no money on the cards." Pike County—"That's so, but in my mind, I put ten dollars on the juck, and you've wen. It's all right, Mister; the money's yourn." The dealer took the money. "Darn my luck I veve lost again," said Pike County, and again the dealer took the coin. We all thought it a curious way to gamble, and admired Pike's consectentious and square dealing. The game went on, when Pike, slapping his trowsers with sudden enthusiasm, exclaimed: "Darned II haven't get you at last. I had fifty on the queen. The game patised, the dealer surveyed his customer and paid the money, but barred the game unless the money was in sight in luture. We get ourselves a monorandum book and opened an account with various stocks of our fancy. Debit and credit. We went to dealing in stocks as a man plays solitaire. We charged ourselves with the profit, when we thought them a good "buy," and we sold and credited ourselves with the profit, when we thought them a good "buy," and we sold and credited ourselves with the profit, when we thought them a good "buy," and we sold and credited ourself with dividends. An interest account was opened We went into the business regularly, except we used no coin, and gave no notes: kept ourself posted on the market; went regularly to Bursing's to get the half-hour quonations; made acquamtance with dealers and brokers; looked wise when Savage went up, and felt affluent; we had bought at a low figure: Raymond & Ely axee our ledger a picthoric look; Golden Chariot deceived us; we sold ophir too soon; went massin too late, and Golden Chariot deceived us; we sold Ophir too soon; went in again too late, and Golden Chariot deceived us; we sood Ophir too soon; went in again too late, and went out at a loss. Our fortunes varied; on the dirst of the month, we struck a balance, and was twenty-seven hundred dollars wither. We then staked the whole on "Hugh & Hunt," at \$5, "bed rook price" - were let m as a favor, because we knew Dave Hunt. It was put on the Board at \$5, and one hundred shared actually sold at that figure: then declined to \$2.50, and we went out disgusted. We have not won a cent nor lost a cent. Our memorandom book cost us a quarter of a dollar; we have had the extinent; we have belted our judgment; we have slept nights; we have had the extinents and have not periled any of our creditors' money. We recommend this mode of gambling as safe to anyhold who does not think their luck can beat money bags and brains, and who is not willing to risk the States Playor. the States Prison.

Now may kind Providence preserve us from good-natured acquaintances!

At Springfield, lilinois, two friends got into "a good-natured scuille," says the Alta, and one shot the other dead. Such amiability is unpleasant. Some people are too good natured!

## Wayside Gushings.

BY MRS. HARRIS.

DEAR NEWS LETTER: All this yeek I've bin werry much flustered Through 'aving on my stummick a plaster of mustard,
For the doctor he says: "You've been out on a frolic,
And you're sufferin' from spazzums, likeways windy colic."
That 'ere plaster 'ave purdoosed sich wentral irritation As 'ave made a wictim to narvus prostration, And I've 'ad in my 'ed sich an 'orrible dizziness As 'ave almost purwented my attendin' to business. Howsomdever, I felt that determined to rally That I says to my maid tother mornin, "Now, Sally, As soon as you've give me my chop and 'ot mixtur' You need'nt stand thar like a permanent fixtur', But go to the Post Office an' ask 'em if thar is Any letters addressed to Matildar Jane 'Arris." She were gone jest three 'ours, for gals will get a larkin' Selvar and start of the first of the selvar and the selvar So long as policemen and 'aberdashers keep sparkin' So long as poncemen and "aberdashers keep sparkin" of good-looking hinnocence as they 'appens to meet Ven sent out of errands permiscuous in the street. I 'ad wrote 'er an order, "Please give to the bearer Any letters for me—she's my little maid Sayrah," And ven she come back she "anded me a note I wish. I will need you herealthy what was wrote. In vich I will read you hexackly what was wrote.
Fust come a scriptur 'eddin', then Y. M. C. A.,
And this is what that helegant 'pistol did say:
"The Committee of the Young Men's Christ'ning 'Sociation Desirous of furnishin' to the circumspeck hobserwation Of wisitors to their rooms a chaste series of 'eds Represents their formittive saints in their beds, Likeways martyrs a-dyin' and their families a-cryin' And heminent sinners o'er their wickedness a-sighin' And believin' that sich specimens of Christian 'Igh Art Will be werry hacceptable to the wirtuous in 'art, Likeways may conwert many brands from the burnin' Through infoosin' a godly hambition of earnin'
A place in the gallery of the Christian Young Men—
Especially if the picture is bootiful vimmin Beg to s' licit a phuttygrarf of good Mrs. 'Arris To 'ang 'er by the murdered Archbishop of Paris!'' To 'ang 'cr by the murdered Archbishop of Paris!''

Ven I'd finished the 'pistol I 'ollered out "Sally, go
And fetch from the cupboard my werry best calico:
I'll 'ave my pictur taken this ere blessed day
For them Chris'n young men is quite right in what they say.
'Tis 'lgh time as the public my wisage should see
In the pictur' shop vinders an' be sayin' "that's she—
'That's Arris 'erself with a eye like a Ma's
As can wallup a hinfant ven hanyways pervarse,''
And art-critics a-passin' shall say, "look upon 'er,
'Ow werry much like a middyevil Madonner!
What breudth in 'er phizzyog—what greaseful repose
In the cut of 'er jib and the turn of 'er nose!
'Tis the troo line o' beauty that cut on her chin
As was caused by a bottle—which it 'appened to be gin.
Though 'er' air was once 'oss-'air it looks well in a photo,
A-failin' prolific o'er' cre buzzum and throat, oh!' A-failin' prollific o'er 'er buzzum and throat, oh !''
So in raptur' I stood a-lookin' in the glass
Scrootinizing my feeture, and says I, ''Sal, they'll pass,
And many a hupstart young gal shall diskiver That 'Arris's charms are as powerful as ever, So mix an 'ot toddy, for 'tis rekisite to smile 'Afore 'aving one's pictur in vater colors and ile !" Arter varmin' my in'ards I 'urried to town, And said to the 'oss car, "You'll please put me down At Bradley and Rulofson's, as take picturs on sight," Yich reachin', I was 'auled to an 'orrible 'ight In a Helewater as seemed werry much like a Avitor, And I came a nigh losing my centre of graviter
The jerk were that sudden—they pay a youth a salary
For 'aulin' of stout parties up to the Gallery. But, oh, ven I got up 'twere charmin' to see
The picture as seemed all a-lookin' at me!
There was Jeems Pipes o' Pipesville beside Bishop Kip,
Who was oglin' a ballet girl in tights on the skip; Railroad kings side by side with the queens of Society, All conductin' themselves with the hutmost propriety; There was judges, and parsons a-singin' the Psalter, And hevery other pictur' was Hupton of the Halter.

There was Levi, the cornet, a-tootin' 'is 'orn. And Scudder as nutral as ven he was born; There was Stebbins Horatio and Carpenter Hug, And Stone, werry cold, a-protruden 'is mug; McCullough, and Bowers, and Lingard, and Wivian, And 'underds of others whose name is oblivion. But what pleased me most were the igh Japanese But what pleased me most were the 1gh Japanese A-sittin' in poeturs calc'iated to please; The young men is all 'andsome, and I'm werry sure a More present young gent can't be 'ad than Iwakura; And I'd think it a feather in 'Arris's cap To win the haffections of sich an 'igh Jap. Natur's made o' one mixtur all creeturs as dwell In the land or the sea, in 'Eving or 'Ell,
An' I know that my shoulder's a shoulder o' mutton,
So for Darwin and 'Uxley I don't care a button, And for old Mother Eve not a darn do I care,
For I don't wear false calves if I do wear false 'air,
And them as 'ave said as my buzzum's fictitious Only proves their own nat'ral purpensities is wicious. When I'd seen all the picturs I took my pursishin In a big, heasy chair with a helegant cushin; The hartist were a young man as be aved werry nice Except fixm 'my 'ed m an 'orrib e wice, Which 'is name is Max Bachert, and he says, quite purlite Please turn your propose is a leet'e to the right, An' try to stare vacancy out of continence if you can, An' smile as if tryin' to capt wate a man.' An sime as up it to garden the same and the same as to same as up to make the same as to I 'ear that the Avitor's cettin' up steam. To traverse the 'evvins like Phœbus's team. Remember as 'Arris's passage is paid Fust class to the skies, as is no-ways afraid. Mind the comp'ny's select, don't take in too much freight, 'Cos my fragile carcass is no werry light weight, Though forty-two in re, in modo I'm suaviter, So 'ere's wishin' good 'ealth to you and the Avitor. .

An unhappy married man, Mitten by name, boited his victuals and made a bee-line for the sanctum of his boarding-loose cereal, upon which circumstance the unhappy married fem.le Mitten litt dup the voice of her morring in accents of ravishing delight, and discoursed the first fruits of her wisdom to the bride and groom opposite. Groom mades bride to keep clear of this machinator against domesticity, bride nudges back that there is no danger; that her excetech are cut as to who is who, and that tabeath's beet expected to carry any influence over the borders of eternity. "Now," said Haskins, the groom, to his wife, "if you don't abrevate in your eternology, sontax and procode [7] create within Mrs. Mittenan intense desire to miffle the silver of her voice in eternal silvence; I'll propound unto her that which will disclose unto the world the nakedness of her cheek as to fat; and snagest that which must ever be to her husband, or any man, an utter impossibility." The bride prattled on, and sodid her cisatois. "Mrs. Mitten," boldly blurts the groom, "if your husband should bite your cheek what pet "panlish name would you call him." "Chiquita "cheekenders by holly answered she." "Contentment with a few bitter herbs, or, in other words, the domestic hearth and brains nover did go tozether; the happy mather of sixts in children has never yet succeeded in solving any of my conundrums satisfactorie. (so to the head, unhappy paragon of excellence; we have our hand upon their in heiseng, and will put a sign over the door when the fool-killer cometh." In silence he consumed the provender prepared at one dollar per diem. The bride saw with tears in her eyes the fair influences of her flesh and blood waning before the brain flashes of this desirected woman; and, as in all such cases, let her mind lie failow the while to induce in a pout. The withered bachelor winked his red eve at his own presented the paper matring part, smiling sweetly in each other's eyes, knew that the backs of continued the paper matring part, smiling sw

The aggregate sales in the Stock Board from March 21st to the 27th, inclusive, was \$4,014,679.

## Eastern and Foreign Dottings.

A Committee of the Massachusetts Legislature has reported in favor of amend-A Committee of the Massachusetts Legislature has reported in favor of amending the State Constitution so as to allow women to voic—General Garfield, of Ohio, and Dawes, of Massachusetts, are stated by Senator Tipton to be in full sympathy with the Reform Republican movement and the Cincinnati Convention. Tipton also says the Convention will probably take Judge David Davis as their Presidential candidate.—Twenty-five girls of a cotton factory in Lousville were poisoned with verdigris, by drinking from a pewter pot, last Thursday.—Pere Mouls, the Canon of the Catheiral of Bordeaux, joins Pere Joangue in his protest against infallibility.—The Old Catholic party of Europe is to hold a general Congress at Cologne in September.—Of the \$80,000.000 stock in the Eric Railway, \$54,000,000 is said to be held by foreign stockholders.—London papers say 50,000 persons marched in the St. Patrick's procession in that city on the 18th inst.

The English Cabinet had Secretary Fish's reply to Earl Granville under consideration lieft Saturday, and the conclusion arrived at seemed to be that it afforded a ation last Saturday, and the conclusion arrived at seemed to be that it afforded an auon user saturally, and the conclusion arrived at seemed to be that it afforded an opening for a supplemental treaty which should settle the question of consequential damages.—Father Hyacinthe has received an ally in Father Jangua, of Bordeaux, against the dogma of papal infallibility.—The Archbishop of Colorne has formally excommunicated Professors Hilgers, Kroodt, Teggen and Rush, of the University of Boun, for rejecting the dogma of infallibility.—It is reported that Thiers yesterday gave final notice to England of the renunciation by France of the commercial treaty between the two intions.—Orion, late claimant of the Tich-borne estate in England, is charged with murder in Australia, and a warrant has reached England for his arrest.—Maurice Grau brings Mademoiselle Aimee's French opera troupe to San Francisco.—Some Swiss capitalists are about to construct a railway to the summit of Mount Vesuvius.—Some monks in an Italian monastery at Palermo recently nurdered a nun upon whom a most serious scandal had been fixed. While in the act of strangling the nun, some sailors heard her cries, rushed in, and killed three of the monks engaged in the outrage.—The special committee of the French Assembly to investigate the circumstances of the capitulation of Metz report, with recommendation that Marshal Bazaine be Courtcapitalition of Metz report, with recommendation that Marshal Bazaine be Courtemartialed.—Ole Bull nearly lost his life by the birning of the Clinton House, Iowa City.—In the United States Senate, Sherman, Chairman of the Finance Committee, presented the budget for the year. The conclusion of the report is, that we must pay off \$50,000,000 per year of the debt, and that this can be done for the next year by raising a gross sum of \$939,025,773; and that this sum can be raised after making the very large reduction in the existing tariff and internal taxes of \$50,000,000. He says all the internal taxes, save those on whisky, spirits, beer, and tobarge enought to present the control of the c and tobacco, ought to be repealed.—Cole recommends the removal of Hardenbergh as United States Surveyor-General, and the appointment of W. J. Lewis, of San Mateo. Sargent, Governor Booth, Lieutenant-Governor Pacheco, E. L. Sullivan, and others, oppose the proposed change.—General Sickles tells a friend that he left Spain because, having identified himself with the Spanish Liberals in sympathy, he could do no service to his country there while the Spanish Ministry remains in power.—The Japanese Embassy have been invited to send a delega-tion to attend the centennial celebration of the independence of the United States. —Controller Green states that so far as he can ascertain, the construction and furnishing of the New York Court-house has cost \$13,619,255. — McKean Buchanan has been attacked with paralysis, while visiting Colorado. —It is understood a committee of workingmen, in the interests of the Labor Reform party, derstood a committee of workingmen, in the interests of the Labor Reform party, are preparing an address to Judge Davis, demanding from him a direct answer to the question whether he intends to embody their ideas if elected to the Presidency.—General Butler appeared in the United States Court, New York, March 27th, as counsel for Sadie Wilkinson, in her suit for \$20,000 damages for breach of promise of marriage on the part of Brick Pomeroy.—The Sultan will visit Lyons in May, to attend the Exposition there.—England declines to modify her commercial treaty with Prance.—California vegetables, cauliflower and asparagus, are plenty in the Chicago market.—Since the close of the American civil war, an average of 5,000 cartie have been stolen monthly by Mexicans on the Texan border, the value of which is estimated at \$6,300,000. During that period four Revenue Inspectors have been killed by these maranders.—Matamoras advices represent the several recent defeats of the Mexican revolutionists, as complete and their cause spectors have been killed by these marauters. — Matamoras advices represent the several recent defeats of the Mexican revolutionists as complete and their cause seems to be entirely lost. — The Pacific mail subsidy proposition is to be renewed in the United States Senate on the Post-office bill, and if it passes the Senate it is believed the five majority in the House against it can be overcome. — An attempt was made to assassinate Bacz, of San Domingo, on the 4th instant. His cousin, Adolfo Coen, was assassinated at the same time. — It is announced that Disraeli will attack the Treaty of Washington on the ground that if implies grave concessions on the part of England in regard to the Canadian fisheries, and that Gladstone will push the treaty through both houses of Parliament and then adjourn Parliament by a vote of the House of Commons. — That Carlos Garcia will suc-Parliament by a vote of the House of Commons.—That Carlos Garcia will succeed in effecting a landing in Cuba is regarded as certain in New York.—There was a tremendous excitement in New York, March 26th, over Eric stocks, under the stimulus of unprecedented orders from Europe, and they advanced to sixty. Jay Gould made \$3.240,000 out of the operation.—Political affairs in Spain are in a very critical condition. King Amadeus is determined to strengthen his position, and a coup d' etat has been strongly urged by his advisers, who say that unless he acts quickly there is danger of his being compelled to abdicate the throne and leave Spain.

## Ærial Steam Navigation.

The Ærial Steam Navigation Company have applied to the Legislature to make them an appropriation of \$25,000 to construct an Avitor. The propriety of this concession is found in the history of the exertions of this Company and the efforts of Mr. Marriott, who for twenty years has been engaged in the study and experiment of perfecting a thying machine to navygate the air. Scientific men and mechanics of the very highest engineering reputation have now for many years been experimenting in this direction. Most of the European Governments have encouraged the undertaking with material aid. In England, a company has been organized, the Duke of Bucclough acting as Chairman, for the purpose of encouraging experiments; while in France, the most scientific gentlemen have devoted great attention to the mater, and perhaps have, come nearer to success than any one elege, except Mr. Marriott, of San Francisco. This gentleman, after long and patienty, dispensing altogether with the balloon, succeeded in perfecting an avial vessel, made bonyant with gas and propelled by steam, which, in the presence of a hundragentlemen in San Francisco, arose from its anchorage, sailed through the air, guided by its helm, and in all respects was governed by its mechinery, with and against the wind. The experiment was pronounced a success, and all concurred in declaring that the invention was most wonderful, and that it demonstrated the possibility of mavigating the air and of practically using the air as a highway of commerce. An accidental rice destroyed the model, which had been construced at great expense by the Erial Steam Navigation Company. The inventor had exhausted himself, pecuniarily, in a multitude of models and numberless attempts are acceptanced to the State for money. Legislators might shake their heads and say, all this is the darn to operation its brain work. If it had not already been demonstrated that it is known the only impediment to the mavigation of the State: I have demonstrated the fact; I have demonstrated the fact; I

Was there ever such a pestilent fellow as that A. J. Plate? What on earth would this obstimate, irrepressible malcontent have? To what hights of unbridded presumption will his wicked sprint of insubordination to lawful authority prompt him? He first contradicts a policeman. Next, when let off by Judge Louderback for the mild fine of five doblars, he exhibits his base ingratitude by insidiously asking to have it increased to §21. He does this with the impudent design of taking an appeal from the Judge's decision. His Honor, understanding the impious purpose that inspired this request, very properly refused it. Things have come to a pretty pass, if the Police and their Judge are to be bothered with appeals and investigations at the instance of fractious criminals like this Plate. We are happy to say that Judge Louderback and Policeman Rearns entirely concur with us in the opinion that the growing spirit of insubordination to the Police ought to be crushed by energetic measures. Dark cells are well enough in their way, but we think a few thumbserows and racks ought to be added to the furniture of the Station House, to be brought into requisition in extreme cases like that of Plate. Policeman Rearns probably went as far as the present morbid condition of public opinion would sanction in abusing a person arrested; but we cannot resist the conviction that a little stretching of Plate's joints, after the good old style of the Inquisition, would have had an extremely happy effect.

We have been accustomed to take St. Paul's word for it that he was "the chief of sinners." He has a scrious rival, however, in the Rev. Mr. Huston, who is being trued by his fellow parsons at Baltimore, for the papers say of him that "the charges against him include almost all grades of immorality." He has evidently thought it as well to be hum for a sheep as a ismb. Beginning, it may be, with the vernal peccadillo of deflowering virgins, he has reached the mortal sin of equivocation. At first, perhaps, a mere carefess profligate, he ended by becoming a parson! Who knows where licentiousness will end! A man who starts as a mere inoffensive libertime, may in time become a bishop! Judas, at first an Ebrew shop-lifter, ended by being an apostle.

## The Latest Stage of the Alabama Claims.

The American reply to the British note, taking exception to the admissibility of indirect claims under the Treaty of Washington, has been received, and on Monday night, March 18th, formed the subject of inquiry in both Houses of Parliament. Mr. Gladstone stated that the American note was couched in courteous and friendly terms, but that the views of the British Cabinet had not been adopted. That is to say, the account of the contents of the American note already given here, seems to have been substantially correct. The Government of the United States will not recede from the position that the terms of the Treaty admit the presentation of all possible claims, and that it is advisable that the presumed right to collect damages, both direct and indirect, should be finally adjudicated on at Geneva. The Cabinet of Washington is said to have expressed its willingness to allow the question of whether indirect damages were a proper subject of arbitration, to be submitted as a preliminary question to the Geneva tribunal. To this idea of making a mixed International Commission the judge of its own powers, the British Government decidedly demurs. Hence the statement of Mr. Gladstone, that an answer to the American note is required, "which the Government of the United States appears to invite." Since the first appearance of this latest phase of the "Alabama" controversy, we have steadily pointed out that the terms and an formidable difficulty in the way of its satisfactory adjustment. The United States Government made as imposing a case as they could possibly crowd in under the letter of the Treaty, mainly because they would have been open to partisma takes had they done anything short of this. Had the remonstrances addressed to them on this subject been disposed of without the question becoming a matter of personal prince as between the wo countries. There can be no doubt that President Grant and his advisers are as sincerely anxions as the Gladstone ministry to get rid of this vexations question once and for all. In this

There are times and seasons when we feel sorely tempted to throw off on our Master and go over on the Lord's side. It begins to dawn upon our apprehension that His yoke is easy and His burden light. The parsons do seem to have their lines cast in pleasant places. They toil not, neither do they spin, and yet they are clad in fine raiment and live in palatial residences. They draw fat salaries for preaching two sermons per week, both of which involve a feebler intellectual effort than is required to produce the slenderest paragraph in the Town Crier. The venerable proprietor of the News Letter would not give the shabbiest hair in Jack's abbreviated tail for a million reams of such stuff as is weekly droned to slumberous congregations by our biggest pulpiteers. All the talent-Heaven save the mark 1—that exploits itself in all the religious journals of America during a twelve-month, could not furnish the intellectual pabulum for a single issue of the News Letter. All the preachers of the Western world could not write up the two columns of the Town Urier. And yet they revel in the fat things of the earth, while we are beset by duns, and reduced to the pitfal necessity of occasionally "sparring" for our grub. If the Lord will, by the month of some of his annointed, make us an ofier of a round salary, we shall take the question of deserting our colors into serious consideration. Should we go over to the hostile camp, we expect to make it particularly warm for the sinners.

The Rev. Hardshell Baptist Giles, of Stockton, like many others of the cloth, has been infelicitous in his matrimonial relations. He accused his wife of unfaithfulness; she gave the retort courteous of cruelty; they met, 'twas in a dream; she left him, 'twas with a scream. He turned her out and she walked out willingly; he told his friends that he thought of her and she told her friends what she thought of him. But here was "the head and front of her offending"; she went and sang in the choir of a rival church. This was more than Hardshell's piety could stand. He told that church she was an adulteress and they ought not to let her sing in their choir. Why not? Was it because her offense was rank before high heaven? Was it because immodest women are not the fittest leaders of the hymns of the holy ones? Was it that he might purge God's temple of flaunting immorality that he made his tongue a whip to scourge her character and get her cast out of the synagogue? No, blessed man! he was superior to such secondary motives, and only objected to her singing in the choir "because it was injurious to him as paster of another church." "Be ye wise as serpents," saith the gospel of St. Giles.

<sup>—</sup> The number of business failures in the State of California during the year 1871 was 89, and the aggregate amount of liabilities, \$2,423,000. In 1869 there were but four failures; [labilities, \$593,000.

## There be Two Richmonds in the Field.

Mr. S. T. Suit, of Louisville, Kentucky, the great whisky operator, whose daring feat of "buying up all the reliable Of Kentucky Whiskies in the world," we last week chronicled, is doubtless a modest man. Modesty is the unvarying characteristic of genius. Having compassed the largest whisky transaction ever before known "in this or any other country," he, Napoleon-like, seizes the laurei wreath, places it on his own brow, and awaits the adulation of a nation. Possibly, however, we may err in this suspicion. He may be willing to let another bod winsky operation, share the honor and responsibility of such an enterprise. Our California Ruchmond, A. P. Hotaling, denice the soft imperehment that Mr. Suit, "or any other man," has gobbied up all the reliable Old Kentucky Whisky in the country, and roundly asserts that "through the sagacity and foresight of his triends, C. P. Moorman & Co., of Louisville, the stocks of very reliable od J. H. Cutter, in Louisville, New York and California, consisting of from ten to twelve thousand barrels, have been saved from the famous corner of 8. T. Suit & Co. to meet the increasing dumand. The stock of J. H. Cutter Old Bourbon Whisky, at the California Agency, 313 Jankson affect, comprises, we he ever, parcers ranging from two to eight years old, the flavor and bouquet of all of which would almost cause comoisseur of the true class of the todes of all of which would almost cause comoisseur of the corporal and untellectual min, commend us to a serial dram of "O, K. J. H. Cutter Old Bourbon: such is our neutrable infimity. We keep whesses suit & Co. will apportion a large share of their unueurs stock of the whickes for the consumption of Carifornia, and thereby aid in correcting the villated laste of consumption of Carifornia, and thereby aid in correcting the villated laste of consumption of Carifornia, and the rable in correcting the villated laste of consumption of Carifornia, and the market. In correcting the villated laste of consumption of the correcting we copy the following a

will apportion a large starre of the ruma use stock of fine whiskles for the consumption of Carifornia, and the roly aid in correcting the viliated taste of consumers of flavored spirits, etc., under whatever eigenomen or trads-mark these ville compounds may be known in the market. In relation to the forescoing we cospy the following article, entitled "All About a 'Corner' in Whisky," from the Louisville "Ky., Bulletia, March 21:
"An article appeared in a morning paper of this city, on the 20th inst. and received throughout the land by the Associated Bross., proclausing the astonation news that a certain beator firm of the city had become parchaser, at one sweep, of all the fibre old whiskies in the world. This amount near tames of and at the same starried us: for we at once concluded that the Old Whisky Delear. Warker & Co. Crimingham & Co., and Moornam & Co. the latter in intracturers of the noted Cutter Whisky." and many others, had been relied out of the market, Upon impure, however, we learned that these firms alone held more than two times as much time and hemothers when 20theed in this 'corner' maneuver. To 'corner' these intanense lots of fine brains of Whiskiest knowledge of the business of such creditary certificaty firms. We have sufficient knowledge of the business of the bourses abone referred to, to assert, without fear two of them to constantly have on laind, and now have, first time the quantity of Old Bourbon said to be affected by this recently amount occurrence to at learn two of them to constantly have on laind, and now have, first time by the firms above spoken of. Advertising generately executive, we have heard of couns to two propers in connection with whisky, but when it comes to 'corners'—especially in this renowned whisky market—we are a little credulous."

#### The Desert a Paradise.

When we reflect that a little over twenty-five years ago intelligent and seientific explorers pronounced the territory of Chiffornia desert incapable of supporting animal bits, and that to-day Chiffornia ranks high as one of the greatest producing States in the Republic, we contest to a limitless incredibility in the more assertions and statements of individuals, however entirent they may be no official or scientific attrainments. It has been demonstrated by expectance that we can degold from our billay, raise wheat from our vadeys, produce cofton from our puris, etc. wood from our sheep, bread the very best stock of cattle and horses, and do a thousand other thengs necessary to support a great State. In the smitropacil portions of the State we have all the tropical fritis; along the State we have all the tropical fritis; along the State we have all the tropical fritis; along the State and cool article compounded in icc-cream. To cap the climax, while the cup of solid joys, Casifornia is destined to raise her own ten. Whether only advancement in this positive that we can produce our own tobacco; and now, to fill the cup of solid joys, Casifornia is destined to raise her own ten. Whether other advancement in this poculiar line will add amazinely to the already voluminous lore of "ten table gossip," we do not know; but certain it is that we shall one day be entirely independent of the Celestral world for supplies of the most delicate, fragrant and healthful herb knownato man—the tea paint. The tea plantation of Mr. Sum Bramman, at Calistoga, has been marked with the most gardying results. No doubt, within a few years, others will fake up the culfivation of the rai plant, and ere ong we shall have our great tea agencies at the East, as we have now our wine houses. The small, cold soul will accuse us of Californianism or "brageing" if we predict that this State, within the next half century, will be promounced the

<sup>—</sup> Edgerton Hogg has purchased for himself and some English capitalists the 600,000 acres of land in Oregon belonging to the Dalles Road Company.

### Gerty's Necklace.

As Gerty skipped from babe to girl, So cradled, let it sink and rise, Her necklace lengthened, pearl by pearl And all her graces symbolize; Year after year it slowly grew, But every birthday gave her two; Her neck is lovely, soft and fuir, And now her necklace glimmers there.

Perchance this pearl, without a speck, Once was as warm as Sappho's neck : And where are all the happy pearls That braided Cleopatra's curls?

Is Gerty loved? Is Gerty loth? Or, if she's either, is she both? She's fancy free, but sweeter far Than many plighted maidens are. Will Gerty smile us all away, And still be Gerty? Who can say?

## Molassis Kandy.

There is a grate deal of human natur in a stick of molassis kandy. I judge this, becaus my little grandsun is alwas reddy tew invest his only penny in it. I don't because my natice grandsim is always reddy few investing only permy in it. I don't kno as I want tew bet enny money, and giv odds, on the mran who is always anxions tew pray out loud, every chance he can git. Next to the man who is with a millyum, in point or wealth, is the man who don't care a cuss for it. When yn strike he, stop boring; menny a man has bored clean thru, and let all the lie run out at the bottom. Success don't consist in never making b'unders, but in never making the same one the second time. He who trasts tew luck for his happiness, will be back when he did. If While we are never the agencies of the second time. the same one the second time. He who tracts early mick in sappliness will be lineky when he gits it. While we are poor the necessarys of life and the luxurys; after we git ritch, the luxurys are the necessarys. Death is an arrow, shot into a crowd; the only reason why it bit another, is becaust it missed us. When a man doez a good turn, just for the phun ov the thing, he has got a grate deel more virtew in him than he is aware ov. As a general thing, we envy in uthers, not what we am got, but what we have got less than others. The only thing about a man that sin haznot and cannot pervert is his constitute. Just cleared perpension as sun haz not and cannot pervert is his constituee. Just edizectly in proporshim az a man indertakes tew make a reputashim by biz personal appearence, just in that proporshim he iz a dead beat. Early genius iz like early cabbage; it don't bead well. Menny a mun haz lost a good posishim in this world biletting go tew spit on his hands. The man who is alwas bragging of his wife in public duz it more out over pride over himself than his for her. If a min haz got 89 thousand dollars at interest, and owns the hous he livs in, it sint mutch trouble to be a filosofer. The hardest man in this world two cheat is the nan who is a lawar borned with himself. Life aimt long caulf for early man to kno himself. Virtew don't consist in the absence as our multiput, but in the control as them, an written and man and the man who is a form that are made and a surface as a control of the control as them, a man without any machine. sence ov our pashhuns, but in the control ov them; a men without enny pashuns is simply as virtewous as a graven image. Don't forget one thing, ying man: there is a thousand people in this world that can but yu to one that can help yu. Olare is a consecond pulper in the word marked an one that can not profit-faire is no accomplishment so easy to acquire as politiciness, and nor not profit-able. Thate are a grate memy excuses that are was that offered end-ner, A man yu can trust with a secret yu can trusk with ennything. Common Sense is the favorite dawter of Reason, and altho there are menny other wimmin more attractive for a time, thare is nothing but death can rob common sense ov her buty. Opinyuns should be formed with grate caushun, and changed with grater. Silence iz one ov the hardest arguments to refute. - Josh Billings.

- The ladies of St. Louis have determined to encourage female preachers. We are glad of it, and hope the custom will become universal. We shall go to church ourself, become converted and be gathered to the fold. The only objection we ever had in going to heaven was because we did not want to get into Abraham's bosom; we would be willing to get into the bosom of Ruth, or Esther, or Mary Magdalen, or any other of the pretty women of the Old or New Testament; but among the sharp breast bones of Abraham, never if we can help it. A mee, pretty, sweet-voiced young mother in Israel would suit us much briter for a beloved pas-tor than the long, lank, lantern-jawed he preachers who are now bumming out their lazy lives by pretended soil-snatching. How sweetly they would read the marriage service; how clarmingly would they baptize infants; how consoling their ministrations at the sick bed. Oh, yes! give us a nice little sweet-breathed, low-voiced, meck-eyed, pale-cheeked preacher, and upon our honor we will turn our attention to religion and become just as pious as our wife will let us.

<sup>—</sup> The injunction to the apostles, "take nother purse nor scrip," is simply a monition against highway robbery, as the best commentators are agreed. It does not mean "recrive neither purse nor scrip," although many elergymen are obliged to take this view of it because neither purse nor scrip is offered them. It gives as pleasure to notice that the pastoral staff and scrip wherewith our esteemed friend, Rev. A. C. Garrett, went on his apostolic journey to Omaha rejoicing, consisted of a present in money amounting to \$1,200, besides a gold watch, chain, and pencil case. As the watch keeps good time it will help to regulate its possessor to strike a virtuous eternity. a virtuous eternity.

#### Leaves from a Lady's Diary.

MARCH 25.-Holy Week or Passion Week. Unnoticed in the turmoil of busi-MARCH 25.—Holy Week or Passion Week. Unnoticed in the turmoil of business; very different from the time when the Spaniard ruled supreme. Now, the little, old cracked bed at the Mission Dolores may tingle away, but no crowd of abject worshipers or swarm of susersitious Indians will answer to the call. Went to see Lucy M.—, who is one of the faithful children of Rome. She had been fasting, and was ascetically cross. It appears to me infinitely absurd that a religion professing peace and charity, should ordain observances which only tend to weaken the health and sour the temper. Meanwhile, the note of preparation for gayety after faster is already sounded, and invitations to parties already issued. The Pharisee Mortification gives place to the butterfly Pleasure.

MARCH 26.—Henry C called, with a beautiful bouquet in his hand, which he told me he was going to send to Mrs. W—, as he dined there vesterday. I think that the hight of absurdity, if not of rudeness, whereas he calls it a political straight of absurdity, if not of rudeness, whereas he calls it a political straight of the sent at their table, and he pulls five do lars out of his packet, buys something for them and cries quits. They give him a leg of mutton and cauliflower, and he returns them a cannia and violets, Besides, it's bad taste to call upon a lady carrying a bouquet destined for another. Spent the alternoon at the H—is. He is an imbedie and she a good natured, not over-bright, woman is so they called the destinance of the same content of the same called the same II—8. He is an infloctic and she a good natured, not over-bright, woman is on the get on very well together. A note was brought while I was there. Mr. II—said: "Dr. I—writes that he will dine with us, to-morrow. We mush to forget the coysters." When he was gone, I asked her what that meant, when she told me that he was her God-father, and very rich, and on their wedding-day he gave her a dozen forks to eat oysters with, so that whenever he dines with them, which is about once a month, they bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks, to show that they have not forgotten the bring out the forks to show that they have not forgotten the bring out the forks, the bring out the forks the bring out the forks, the bring out the forks to the bring out the forks the bring out the bring out the bring out the forks the bring out his kindness.

MARCH 27.—A great funeral. It was Pascal, I think, who said, "Life is but the preface to death." That may be trac, but still no one cares to buy the book. As I looked at the crowd of people who stood in the street to see the rich man's pample. looked at the crowd of people who stood in the street to see the rich man's panophy—women with babes in their arms, and working men, I could not help thinking that such was the poor man's revence, and can fancy him saying. "It's all very nice to be rich, but I of rather be myself than him just now." Went to my butchers, who lamented the departed, saying "Ah, Madam, he was such a good customer." There it is: very likely the butcher had charged him exorbitant prices, the grocer had not been too particular about the weight, the wine merchant had not been too scrupulous about the quality of that which he sold him, and so Dives is universally regretted, and the shopkeepers go to his funeral.

MARCH 28. -Good Friday. A day of observance by Jew and Christian, and, if we may believe the students of Sanscrit, equally so by those who followed the precepts of the sucred Vedas, at least so Herry says, who professes to rank himself among the philosophers. Went to market and found ad the fish doubled in price, so that the fishermen make a profit out of the crucinxion. As they are mostly Italians, and consequently good Catholies, such comes as a matter of course, for the Apostles were a hermen, and their descendants who enacted the dietary laws took care of the trade. For my part I can enjoy a fish danner as well as one of meat, and the ordinance is no penance to me, but the contrary.

#### New Books from A. Roman & Co.

TREATISE ON PUNCTUATION, by John Wilson. Twentieth Edition. Published by Woolworth, Ainsworth & Co. New York and Chicago.

This work, though written in a manner which specially adapts it to instruction in schools, is also designed for printers and private students, all of whom must have some previous acquaintance with English literature. It zoes thoroughly into the subject with which it deads, and clears away all obstacles which beset one small but requisite pathway to literary excellence.

AESTHETICS: OR, THE SCIENCE OF BEAUTY, by John Bascom, Professor in Williams College. Published by Woolworth, Ainsworth & Co., New York and

These lectures were written to supply the want of a compact and exclusive treatise on the principles of taste; and it has been the author's aim to combine and present in a systematic form those facts and principles which constitute the department of taste and make good its claim to the rank of a distinct science.

D. Appleton & Co., New York, have just added two novels to their list: MOHAMMED ALL AND HIS HOUSE: An Historical Romance, by L. Mühlbach. Translated from the German by Chapman Coleman.

Two Plunges for a Pearl, by Mortimer Collins.

After giving Sandy certain directions about kirk matters, the minister suffied once or twice, and remarked: "Saunders, I fear you have been 'tasting' this morning." "Deed, sr.," replied Sandy, with the coolest effontery, set off with a droil glance of his brown eyes, "'deed, sir, I was just gaun to observe I thocht there was a smell o' sperrits amang us this mornin'."

#### First Indications of Insanity.

We have often read of well-authenticated cases where persons have lost their senses from sudden fright; the detestable system of practical joking has created many a lunatic. The following occurse to me as a case where a permanent "slant" was given to the mind by an unexpected shock. There was a very clever Belgian girl, who became famed on the Continent for her performances on the tight-rope, and from her grace, courage, and talent, great things were expected of her. She married at fifteen years of age, a man who had obtained some celebrity as a rich and acrobat, but who resolved, about that time, to pursue the trade of "lion king," as the bills are wont to style it. In this he was eminently successful, and the young couple bid fair to do well. They were attached to a very large establishment, which in its circuit having arrived at one of the chief towns, announced as usual, the exhibition of its numerous and incomparable produces, and the artistes were soon in rehearsal. Both of those just named were to perform, and artistes were soon in rehearsal. Both of those just hamed were to perform, and the man hoped to produce a great sensation by his feats with the wild beasts, especially with a fresh lion just acquired, which was said to be particularly intelligent, so while his wife rehearsed on the stage he was engaged at the cages. It was in the morning, and while the girl, whose fame, by-the-by, was the leading attraction of the troupe—while she was practising her most daring achievements, there arose all at once a confused hum of voices, the tramp of many feet was heard outside, and a general hurrying in and out took place. In the excitement she was forgotten, and four men entered, bearing an object on a stretcher, which they carried past the rope on which the girl was dancing. She glanced at them, and there saw the body of her young husband, his head torn completely off; he had been killed by the lion, the beast having resented the chastisement of a stranger. The girl fell with a shriek from the rope, and she lay for nearly two months insensible. She could never dance again; nor was the tone of her mind ever restored. But ble. She could neverdance again; nor was the tone of her mind ever restored. But that a kind lady procured her a situation in an English family, where allowance was made for her total ignorance, it is hard to say what would have become of her. Those who know her story can detect the unsettled mind in her now; to strangers she appears merely eccentric.

### Our Leading Agricultural Resources.

It is said on good authority that our wine averages to the makers 30 cents per It is said on good authority that our wine averages to the makers 30 cents per gallon as the first price. In 1870 we produced 3,800,000 gallons, valued at \$1,140,000; brandy, valued at \$235,500; grapes, valued at \$250,000. Total value of the grape crop of 1870, \$1,625,500. In 1871, we produced 6,000,000 gallons of wine, 290,000 of brandy, and sold table grapes to the amount of \$800,000. Total value, \$2,700,000; increase from the preceding year, \$1,075,000. Increase per cent., 66. An equal per cent. of increase this year over 1871 will make every form of our grape crop worth \$4,480,200; and the aggregate gain for the year, \$1,782,000. Our wheat crop promises to run as high as \$4,000,000 bushels. Allowing 8,000,000 bushels for home consumption and seed reserved for the next sowing, we shall probably have promises to run as figures 24.000,000 misness. Anoming o,000,000 misness to home consumption and seed reserved for the next sowing, we shall probably have a surplus of 16,000,000 bushels for export. Wheat is now worth §1 25 per bushel. Should this price be maintained till the growing crop is sold, our wheat surplus Should this price be maintained till the growing crop is sold, our wheat surplus would bring us \$20,000,000. Inferior grades of wool are now commanding 30 to 35 cents per pound in gold here. The prospect favors an advance to at least 40 cents on the average. The clip of last year was 23,000,000 pounds, and the increase over 1870 was nearly 25 per cent. Should a like per cent. of increase be maintained this year over last, we shall have 28,750,000 pounds of wool to sell. At 40 cents per pound, this will bring into the State \$11,500,000. From this view of our three great staple agricultural industries, we derive the following cash summary for the year 1872: Wheat, \$20,000,000; wine, \$4,480,200; wool, \$11,500,000. Total, \$35,980,200.—Sacramento Union.

### Excitement among Horsemen.

The New York correspondent of the Boston Journal writes: The fastest horse in the world, so it is said, is the English horse Sterling. Private letters have been received here announcing that that famous horse will be shipped for America, and be entered for the Manmoth cup at Long Branch this season. His competitor will be Harper's Longfellow. Harper resolved that his famous horse should never run again for money, but he has consented to have him entered for the cup. The heat, two miles and a half, is regarded as especially favorable to Longfellow. Horsemen believe that with that distance he can beat the world. Colonel Tom Scott has agreed to run an express train from Harper's stables to Long Branch in Kentucky without change of cars. An elegant box stall is to be fitted up with all modern improvements, and the famous horse will be attended by his old master, who hopes for better luck than when last Longfellow was North.

— Some stolen apples having been found in his pocket, Jack was called up by the schoolmaster to account for his possession of them. His defence showed the future "great lawyer." "The apples," said he, "were Tom's, and I don't know how he got them; and now they're mine, and he doesn't know how I got them."

## Iron Ship-building on the Clyde.

During the last four years the number of iron ships built on the Clyde has been During the ast tour years the number of troi stays built on the Clyde has been rapidly on the increase. In 1868, the aggregate tourage turned out amounted to 165,000 tous; in 1803 it suddenly rose to 188,600, in 1870 it was 190,800; and in 1871 231 from vessels were built, having an aggregate tourage of 186,200. This gaves the average tourage of one vessel at \$50 tous, and represents a total value in bulls, machinery, and formashings of at least £5,000,000. During last year there were hunched on the Cyde 6 war vessels of 3,050 tons; 15 paddle steamers of 10 900 tons; 125 screw-stamers of 15s,000 tons; and 25 sormy vesses of 12,720 tons. The humher of sailing vessels show a decline of 38 vessels and 26,150 tons a compared with 1870; of 80 vessels and 15,130 tons as compared with 1870; of 80 vessels and 15,130 tons as compared with 1860, and of 80 vessels and 66,626 tons as compared with 1868. The increase in 80 cm steamers is proportionately in excess of the absolute increase of tonnage. Of the normant vessels hamehed, to were for the East India and China trade, 10 for the Baltic and German trade, 9 for the North American trade, 7 for the Mediterrane a trade, 6 for the West Indian trade, 6 for the South American trade, 31 or the African trade, 6 for the

Spanish trade, and the remainder chiefly for the consting trade.

To appreciate the full importance of the front day, being trade in Scotland, it must be remembered that the rewer launched on the Tay at Busides, during the past year, probably another s or to from vesses with a pross tenture of at least past year, probably another's or 10 fron vessers with a press tenner of at least 8,000 tons. As on the Clyde, these have been mainly screw steamers. It with he appeared at a glance how much of this mercased activity is rewisteners is owing to the opening of the Sinez Cana. The fast China chipters have new been drawn out of the field, since it was rendered possible to steam from London to Hon, kong in 50 days. The to days two ages of the crack chippers are thus atterful thrown into the shade, and those latter have recently been employed in making trips from China to American posts. Their is every probability that the Cayle will continue to maintain its wein-deserved presembleme. In the balance of rich steamers for the merchant survives of forcal function. South Is Institute for accounter

ers for the merchant service of Great Britain .- Section American Journal

### Aerial Navigation.

In the Senate, March 22d, Mr Wand introduced the following bill (No. 461). which was referred to the P name Commettee. An act to appear all money to assist the Acim. Steam Navigation Company of Cartornia. Whereas the subject of acrim to Augation is largely attracting the altention of sential remains through out the world, experiments in which have a ready resulted in partial and dimenstrated the probability of complete spacess; and whereas there has bein ferreed, under the laws of California, an incorporation called the Acros Steam New Fation muon the taw or various a, an exception for the factor life are a sealth and later Company of Cablornia, for the purpose of bringing the experimential hards the are to practical results; and whereas this company have also aly expensed large sums of money in the endeavor to perfect to all slip area, so by a cizen of this state; and whereas the experiments here made have demonstrated the possible and probable triumph of the inventou; now, therefore, in order to say and encourage so important a public enterprise, and in order to enable say, company to carry their works to compaction, the people of the State of Carforn a, repress ited in Senate and Assembly, do const as Indows. See ton 1. The stan of \$25,000 is hereby appropriated on of any money in the General Fluid of the state not otherwise appropriated to the Aerial Steam Navigation Company of Caloria, to combine ble sant company, ander the direction of and supervision of the President of the Mechanics Institute of San I rancesso, A. S. Hadiore, George H. Gagas, practical en more, Frederick Marriott, the inventor, to construct an aerial scient carriogation for navigating the air. Section 2. The Controller of State is hereby directed to draw his warrant on the General Fund in layor of the Aerial Steam Navigation Company for the sum of \$25,000, and the Treasurer is directed to pay the same out of said General Fund. Section 3. This act shall take effect from and after its reasurer. and probable triumph of the invention; now, therefore, in ord r to a c and enrassage.]

- One of the morning papers makes an unkind attack upon Mr. Phillips, the One of the morning papers makes an unkind attack upon Mr. Phillips, the Prosecuting Attorney of the Polace Court. The paper rateried to charges that Phillips is not quadried for the duties of the office he holds. This is perfectly true, but it by no means follows that he ought to be superceded. Give him time. When the present Polace Judge commenced his official career as Prosecuting Attorney, the entire press of San Francisco succred and jeered at him as an incompetent and numbered. Yet from that pifful and merifying beginning, bet out to what a hight the Judge has cumbed! We, therefore, move for a stay of judgment against Phillips, may it please the Court. Give hem time. Who knows but that in the process of the revolving years he may develop into as learned a jurist and as impartial and fearless a Judge as Davis Londerback.

Quite recently the Russian town of Chamaka, amid the southern spurs of the Cancasian Mountains, in the province of Georgia, was destroyed by an earth-quake and 137 of the inhabitants killed. Chamaka is not far from the eastern shore of the Caspian Sea, on the great road from that sea to Titlis, the capital of Georgia.

## "A Letter from Home."

A letter from home,
From across the wide sea—
A simple white missive,
Yet precious to me.
Beneath its light folds

Beneath its light folds
Are treasures untold—
Ay, jewels more precions
Than silver and gold!

A letter from home
Breaks in on my life;
I hear from the children—
I hear from dear wife.

And mother sends love
To her "boy" far away,
With "I never forget you,
My son, when I pray."

A letter from home t Of its trials and joys— Of the hopes of the girls And the aims of the boys:

No sorrow so deep,
And no trifle so small,
But in sympathy loving,
My heart may know all,

A letter from home!
From across the wide sea—
A simple white missive,
Yet precious to me!

M. A. K.

#### A Dream of Goat Island.

I had a dream which was not all a dream. I dreamed that I stood upon the eastern slope of Goat Island and with clairvoyant vision pecced into the dim, yet not distunt future. I saw a community of pur-blind capitalists, whose highest idea of financial enterprise was to loan money at two per cent, per month; men who had no enlarged conjection of the uses of wealth and capital, and these men blindly opposed a great enterprise, which, if encouraged and fostered, would have brought wealth and prosperty to their doors. These men were more heighless and more pitiable than the blind leading the blind. This community of imbeciles and their imbecile newspaper organs, which reproduced their imbecile ideas. They were behind the times, and peddled the small policies of their small-souled patrons to a small-souled community. But the time has come when Deacen Fitch and Brother Pickering, and MacCrellish, and the rest of the obstructives shall howl. Remember that this is but a dream. Nothing but a dream. Yet coming events cast their shadows before, and in my dream I saw the "Railroad organ, the Sacramento Record, removed from its native place and transplanted to San Francisco; I saw it enriched and fortified and strengthened by the accession of the best writing talent that the world can furnish. I saw it come like an army with banners, to battle, and compare and possess. I saw Deccon Fitch squirm as if attacked by the colic. I heard Brother Pickering swear. I heard Fred MacCrellish, say to Woodward, "Din't we make a mistake when we quarreled with Stanford?" And I heard the sagacions Woodward reply: "G d d n real colembrate they can't rob us of the Auction certs.

#### Hawaiian Matters.

Our Honolulu correspondent, under date of March 13th, says: "The Nebraska declined to take the Island mail for Australia and New Zedland hist week, and there is quite a feeling about it on the part of the Government. It appears the act passed two years ago, at Holliday's instance, refers the matter to Privy Council, and they are not willing to pay it until Mr. Webb contracts with or agrees to run to Sydney, and hence would not allow the Ministers to pay it, although they made promises to Webb, and have been rather anxious to pay it. The King is much offended at the letter Webb, or rather his agent, sent the Government, saying "that unless the subsidy of \$2,000 per month was paid, the vessel would not take the mail," and put up notices warning passengers and crew not to take a letter; and they did not take mails or paper. The Collector made up the amount the Government pays the steam line, in the way of wharfage for bonts and coal ships, bonts, sheds, water, etc., which amount to \$9,800 per annum. This is a side from the wharves they have built. So, how the matter will end I cannot say."

— One William M. Dowling, having irreverently and blasphemously spoken of the Police Court as "A h—!] of a place to get justice in," was immediately snatched and jerked off to the Station House by an energetic officer. When brought before the insulted tribunal, poor Dowling thought to lie himself out of the scrape by apologizing and pretending that he really didn't think so ill of the Court as he had 'inadvertently intimated. The rhadamanthus of drunks and chicken thieves, however, suspected that Dowling's first impulsively expressed contempt of Court was more honest than bis sneaking profession of penitence. So he find the defendant one hundred dollars. The public are thus posted in regard to the expense of saying what all decent people think about that angust institution. It only remains for the Judge to fix the price of the luxury of silent contempt, and then summon the general body of intelligent citizens to pay the amount into the Police Fand.

#### Comparative Deadliness.

The Elberfeld Gazatle publishes some curious statistics of the comparative dead-lines of the different weapons used in the Franco-German war. According to them, of 3,433 Germans wounded before Metz, no fewer than 95-5 per cent, were struck by Chassepot balls : 27-per cent, only were wounded by projectiles from heavy gins, and there were only 0-8 per cent, of wounds from old steel. As to the French wounded by artillery projectiles, and about 70 per cent, by the fire of the zunctui-delgavehr. No fewer than 25,600 Frenchmen in all were struck by the projectiles of the German articles. This gives an average of one effective shot in every three fired from the German batteries, a result which appears to us to be hardly credible. The losses in the different branches of the German arturated as follows by the Elberfeld Gazette: Of every 100 men put hors do combat, 30 per cent, were in the infantry, 5 per cent, in the cavalry, and only 3 per cent, before all the best of cartridges fired by the Germans in the late war is stated to have been 25,000,000, or about 30 per man. The war having lasted for fighting purposes—just six months, this gives only an average of five cartridges per man per month for the whole army. Taking the total number of French Kified and wounded at 100,000, this would give an average of 25 cartridges fired to each man struck.

#### Navigating the Air.

A bill to appropriate money to assist the Ærial Navigation Company, was introduced into the Senate yesterday by Mr. Wand. We have not learned the amount of the proposed appropriation, but if it is a reasonable sum, as no doubt it is, we hope the bill will pass. We are not of those who look upon the effort to navigate the air as wild and visiomary. We have the utmost confidence that this last great scientific problem will be satisfactorily solved in course of time, it not in our own day. Who shall say what man cannot accomplish? Accompanying the draft of the bill in question is a pamphlet with drawings illustrative of the subject of aerial navigation, and of the avitor built by the company named. This pamphlet, but not a copy of the bill, has been sent us by Mr. F. Marriott, the udefatigable patentee of the aerial steam carriage. The facth of this gentleman in the ultimate success of his magnificent scheme has remained firm from the time when it first onzazed his attention many years ago. His patient and absortions efforts deserve the recomition of the State. He is prosecuting an undetraking pronounced leasible by without from the tome of cool judgment and of a practical turn of mind. He has, we understand, spent a fortune on it, and is compelled to ask the aid of the State to enable him to accomplish it. His success will be a proud thing for Cahfornia and fraught with glorious consequences for humanity.—Succenaelo Record, March 25.

#### The Alabama Claims.

We have only fulfilled a plain obligation in making it known at Washington that we cannot acknowledge any liability for indirect losses occasioned by the acts of the Alabama and her consorts. But, having done that, we are free to consider any proposal consistent with it. The American Government has drawn up its case, and circulated it throughout the world; and if it be true, as some American anthorities tell us, that these indirect claims have only been inserted for their moral effect, and that a verifict awarding damages on account of them is not expected, the American Government may perhaps be of opinion that the end it sought is already attained, as for as practicable; and that, without dissowing its own case, it may be able to give an undertaking that the caims objected to shall not be pressed to judgment. The two countries are not contending for any coveted prize. They are not embarked in a conflict of interests. They desire to cultivate mutual and reciprocal Triendship; and, under these circumstances; tought to be, and it must be possible to give effect to their common wishes.

—London Duily Newer, Feb. 29.

We have heretofore in times of peril derived much comfort from the venerable adage which declares that "The Devil never deserts his own." But we regret to say that the pleasing sense of security resulting from our faith in the constant care and pulsant protection of our Master has received a sad shock in consequence of his desertion of his servant Diekson, who, on Wednessday last, was convicted, in spite of the Devil and Judge Tvier. By what process of ratioemation the judge arrived at the conclusion that Murray could possibly be innocent if Diekson is guilty, is one of those mysteries that balle the powers of the finite mind, and are to be apprehended by faith alone, like transubstantation, and the real presence. Howbeit, Diekson is to go to the penitentiary, and if his jailer be a friend of God or humanity, and can procure a deadly potion from some lean apothecary, he will never come out.

<sup>—</sup> The large ship Adriatic cleared for England, recently, with 3,500 tons wheat, the largest cargo dispatched this senson. The Adriatic will stop at Magdalena Bay, Lower California, and take aboard a quantity of orchilla.

## "Man Waz Made Tew Mourn."

This waz the private opinion ov one Burns, a Skotchman, who waz very edikated tew poetri from hiz infansy. I and he differ, which iz not uncommon among grate minds. The ornary minds in this wurld are disposed tew coinside, which iz he reson whi superstitions prevale so mutch. Tew differ upon matters with another iz a fair presumption that yn are in the habit ov smelling ov things before yn swallow them. Man wernt made tew mourn; man waz made tew laff. He iz the onla creeter or thing that God made tew laff out loud. Man waz made tew smile, tew creeter or thing that God made tew laff out loud. Man waz made tew smile, tew laff, tew haw! I tew thro up his hat, and sing halleluger. Man waz made tew pruze God, and he cant dew it bi mourning. Tharfore is a tew aw! men and women, stop crying and go tew laffing; yu will last longer, and git fatter and stand jist az good a chanse tew git tew heaven with a smile on yure countenanse, as you will with yure fase lecking at every pore. I sa man warnt made tew mourn: if he had bin, he would not have bin put in Paradise, where everything else was made in the image ov smiles.

P. S. I dont want employ tew think that i am down on Burns, for i dew think him the most Poet that ever lived. I had ruther be the auther ov one poum i kno ov, that he rit, than tew be king and queen ov England, and keep a hoss and carrage .- Josh Billings.

#### The Cadi's Decision.

The Cadi's Decision.

A poor Turkish slater of Constantinople, being at work upon the roof of a house, lost his footing, and fell into the narrow street upon a man who chanced to be passing at the time. The pedestrian was killed by the concussion, while the slater escaped without material injury. A son of the deceased caused the slater to be arrested and taken before the Cadi, where he made the most grave charge, and claimed ample redress. The Cadi listened attentively, and in the end asked the slater what he had to say in his defense. "Dispenser of justice," answered the accussed, in humble mood, "it is even as this man says; but God forbid that there should be evil in my heart. I am a poor man and know not how I can make amends." The son of the man who had been killed, thereupon demanded that condign punishment should be inflieted upon the accused. The Cadi meditated a few moments, and finally said: "It shall be so." Then to the slater he continued: "Thou shalt stand in the place where the father of this man stood when thou didst fall upon him." And to the accuser he added: "And thou shalt, if it so please thee, go upon the roof, and full upon the enlyrit, even as he did fall upon thy father. Allah is great."—Our Young Folks' Budget.

#### A Maiden's "Psalm of Life."

Tell us not in idle jingle, "marriage is an empty dream" for the girl is dead that's single, and things are not what they seem. Life is real, life is earnest, single blessedness a fib; "man thou art, to man returnest," has been spoken of the rib. Not enjoyment and not sorrow is our destined end or way, but to act that each tomorrow finds us nearer marriage day. Life is short and time is fleeting, and our hearts, though light and gay, still like pleasant drums are heating wedling-marches all the way. In the world's broad field of battle, in the bivouse of life. be not like dumb driven cattle—be a heroine—a wife. Trust no future, however pleasant, let the dead past bury its dead! act, act to the living present! heart within and hope ahead. Lives of married folks remind us we can live our lives as well, and departing leave behind us such examples as shall "tell." Such examples that another, wasting time in idle sport, a forlorn unmarried brother, seeing shall take heart and court. Let us, then, be up and doing, with a heart on triumph set; still contriving, still pursuing, and each one a husband get,

# Story of an Elephant.

There was some years ago a trained elephant in Travancore, whose keeper was accustomed to call daily at an arrack-shop in passing, giving the elephant a little of the spirits each time, both being "fond of a drop." One day the beast was refractory, and the keeper, much displeased, threatened that he would stop his allowance of arrack. Shortly afterward, calling at the shop as usual, he brought out the arrack in a dish, drank the whole before the eyes of the animal, and returned the vessel. The elephant, highly incensed, struck the keeper with his trunk, but so heavy was the blow that the man was killed on the spot. Perceiving what he had done, the spracious and on the whole affectionate creature exhibited marks of the doe, the spacious, and on the whole affectionate, creature exhibited marks of the deepest grief, roaring and crying like a child over the corpse, and fondling it, and was with much difficulty ultimately led away.—Indian Notes in the Quiver.

The Hon, S. O. Houghton, M. C., will please accept our thanks for his favoring us with a copy of the Reports of the Secretary of the Navy and of the Postmaster General for the year 1871; also, the valuable annual Report by the Secretary of State upon our Commercial Relations.

### Special Brevities.

The notion, observes the Boston Journal of Chemistry, that those who work only with their brain need less food that those who labor with their brain need less food that those who labor with their brains is followed in the constructions; mental labor causes greater waste of tissue than muscular. According to careful estimates, three hours of hard study wear out the body more than a whole day of hard physical exertion. Without phosphorus, no thought "is a German saving; and the consumption of that essential ingrement of the brain increases in preparation to the amount of labor which the organ is required to perform. The were and tear of the brain are easily measured by careful examination of the sales in the liquid exerctions. The importance of the Fram are; working organ is sales by the amount of blood it receives, which is proportionally greater than that of any other part of the body. One-fifth of the blood goes to the brain, though its average weight is only constituted the weight of the body. This fact again working only one-fortieth of the weight of the body. This fact again working changes and farm laborers.

The Italians are usually under the influence of some neighboring nation, and at present there is a deceded Anglomatia in Italy. English nooks are translated into Italian: almost every Italian family of any distinction speaks English, and the dress of the Italian girls is identical with that of their Ifa, ash sisters. A very pretty young lady, who is now married to the son of the Dinks San Cremento said to an English lady, a short time ago, "I lawars wear a lat and a necket, for I observe all English girls do so, and I wish to look like them." If may seem trivial to mention this, but it is the key-note to much that is remarkable in the present state of Italian feesing. English and American girls marry Italians much more frequently than either Germau or French girs, and in this manner a considerable mixture of Anglo-Saxon blood will flow in the veins of the Inture generation of Italian.

— At Agra, in Hindostan, there is still in fine preservation a structure known as Taj Mahad, a mansoleum built in the sevent-earth century by the Emp ror Shah Jehan, in memory of Noor Jehan, his favorite queen. The susperb outface is declared to be the finest in India, if not in the word. It stands on the hanks of the Junius, forming a quadrangle of nearly two hundred square yards, with a lefty dome in the center seventy feet in diameter, and claborate minar as rising from the angles. It is built of white marble, and the great contra hall, where are the temposed of corne unit, happened of the proceed of corne unit, happened with a lefty posed of corne unit, happened with a latter or mannered with exquisite mossile work, composed of corne unit happened with a first proceed of corne unit happened on an appened of corne unit happened on the manner of with exquisite mossile work, composed of corne unit happened on an appened of corne unit happened on the manner of with exquisite mossile work composed of corne unit happened of corne unit happened

— Dr. A Loffler, of Stockenau, states, in the Wiener Med, Wordenschrift of Peb, 10th, that he has treated more than forty cases of small-pox by the external copiens application, by means of cotton-wood, of a sociation of one past of call-ofte as all in twelve of oil. The result in all the cases was, that the cutakeous swealing soon dimmished; and that, when the application was made carry, the course of the disease, in relation to the number of justules, was in their. He believes also that by this treatment the danger of infection, was greatly dunit send. I trace clin sted children, inhabiting the same rooms with sing pox patents, either remained from the disease, or had it in a very mid form. Carbolic acid was also diffused through the atmosphere of the sicker ome.

— It is reported that the Boston felles have another Yankee notion in the shape for cashesis range my, which works aft r las wise and would not use had thus for Cashesia; cher, when in good standing of every evan rehen denomination can, by the payment of a document, other their names every evan rehen denomination can, by the payment of a disc sum, relegraph their want of a minister, the amount of pay, etc. By following up this practice it will not take long for Boston to acquire the homeable title of the Hub of Manisters in particular, as well as that of the universe generally.

A son of Brigham Young, in response to a Gantile inquiry admitted that the young Mormon women undoubtedly objected to the fractional bashand system; but, he said, "they have to marry somebody, and if they choose a married man, they save thems lives the pan, which they would afterward experience of they took a single man, and he married again." There is enough of temmine burnan nature in that brief was of parting it to supply the text for a volume of an also-s and philosophica reflection. It must be ever so much mover to make another woman wild with jealousy and humiliation than for any dear creature to experience the process legisle.

Some interesting discoveries have been made in excavations at the Ceromicen of Athens. Sessenal too los, some quite mate, were brought to light, and among teem as that of two ambiesardors of Coreyra (Corin, who formed part of the departition treat X-nophen sent to ask for the assistance of the Athenians against the Jacobinomans. Another bears the mane of Hipparele, daughter of Alexander Core and the Athenians against the properties of the Athenians against the properties of the Athenians and the other researches have led of indeng a monument, composed of five tombs, bearing inscriptions, and belonging to the Vexpleos family, and a sixth, ornamental with a basso-relievo composed of two women, one standing, and the other seated.

— A new style of glove for New York is made of opossum skin; it is very soft and durable, and can be worn in full dress.

- A Cleveland modiste is doing a large business in ladies' dresses made up with an Alexis polonaise, the waist of which contains a steel trap concealed by a masqued panier. When a young gentleman calls and accidentally or otherwise places his arm around the wearer's waist he hears a "click" and finds his arm caught. A big brother and lamp enters, and the victim sorrowfully starts for the jewelers to examine some wedding rings.
- The receipts of the Sucz Canal for tonnage dues during the month of January last are the largest on record, one hundred vessels, of which the aggregate tonnage was 604,773, having passed through it, and the receipts being 1,130,825 frames. Of these vessels sixty-nine were English, which paid dues amounting to 849,625 fr. Its eeems that the Porte will not entertain the proposal for an international purchase of the Canal.
- In Cashmere one hundred thousand persons are employed in the shawl manufacture. The weavers are all males; most of the spinners women. A female spinner carns about seventy-five cents a month. The weaving of a shawl of ordinary pattern occupies three weavers for three months; the most elaborate and costly from twelve to fifteen months.
- A curious literary treasure was recently announced for sale in Paris. It was a copy of the Constitution of the French Republic of 1794, bound in human skin. The volume is supposed to have issued from the Meudon tannery, where it is asserted this kind of leather was manufactured during the Reign of Terror.
- The house in which John Brown was born is still standing in Torrington, Connecticut, on a hill-top—a brown, wooden farm-house, now tenanted by a colored family, and even the bedroom on the ground floor in which he was born is shown to visitors, and half its door cut off and carried away for relics.
- The Howard Benevolent Association, of Sacramento, cleared, over and above expenses, by the entertainment at the Metropolitan Theater, March 28, when Senator Pendegast appeared as "Richelieu," the sum of \$730.
- A widow won \$90,000 from a German gambler at Baden-Baden, and a French General, whose hatred of Germany is undying, married the avenger of his country and the \$90,000.
- England is said to be fortifying Heligoland and arming the fortifications with numerous heavy guns.
- A complete concordance of the United States Constitution has been compiled.
- The Legislature has adjourned, thank God! We breathe more freely; we are grateful that we still live; we thank Thee, O Lord, that for the space of two years we shall be free from the plague of lice and toads and repriles and crawling things. Tom Shannon returns to his hydrant on the corner of Montgomery and California streets. Siche will again dispense lager, and Sam McCollough and James and Jost are no longer statesmen. Giles Gray can help his agod in the undertaker's business, and we hope may be able to bury his associates before they ever come up again for legislative honors. A very good thing is fold on Giles; a gentleman log-rolled with this young Christian upon health matters, and afterward found the religious member working against his little bill; the reason was manifest, Giles could not afford to legislate for the health of his constituents, because his father is an undertaker, and how can the old man live unless others die. Nice delegation in the lower house—dear, dumb and blind; only one man could talk, and he was an Italian, and while the statesmen from the country cracked the lash over the city of San Francisco, they all stood and took it like dumb animals. In the Senate it was just as bad; Tompkins and Farley and Larkin and Pendegast gave San Francisco "hark from the tombs," and poor old Betge trembled and turned red in the face, and Oulton, the splendid statesman from Nova Scotia, wriggled on his chair and east supplicating looks to Bill Carr, and tried for sympathy to catch Stow's game eye. The tinker, Garratt, was the laughing stock of the Senate. "the man who don't know nothing and who can't tell what he knows," was the remark of Col. Henry Clay Clarkson. Report says the boys have soured on Stow and Carr—that they did not divide fair is the general impression. We are very glad the apportionment bill did not pass. It would be very dreadful to have very glad the apportionment bill did not pass. It would be very dreadful to have thirty-one representatives from San Francisco—only hink, ten Oullous
- The Pacific Churchman preserved an ominous silence on the Rev. A. C. Garrett's departure, and the presentation of \$1,200, gold watch, chain, pencil case, etc. Not so the Occident, the Presbyterian organ. "A prophet is not without honor," save among his brother elergymen and in the religious organ of his own denomination. It is said that Reverend Chapin, who edits the Churchman, and was the dear departed brother's particular friend, burst into a passionate flood of tears on hearing of his good fortune, and exclaimed, in the language of Jeremiah's Lamentations: "Nobody ever gave me a fatted calf, that I might make merry." Oh! O-b-h!!

#### Court Chat.

The following hymn, written for the occasion by Mr. Stone, was sung during the thanksgiving service at St. Paul's Cathedral for the recovery of the Prince of Wales from his late illness :

O Thou our soul's salvation ! Our hope for earthly weal! We, who in tribulation Did for Thy mercy kneel Lift up glad hearts before Thee, And eyes no longer dim, And for Thy grace adore Thee In eucharistic hymn. Forth went the nation weeping With precious seed of prayer,

Hope's awful vigil keeping 'Mid rumors of despair;
Then did Thy love deliver,
And from Thy gracious hand,

Joy, like the southern river, O'erflowed the weary land.

Bless Thou our adoration ! Our gladness sanctify!

Make this rejoicing nation

To Thee by joy more nigh; Oh, be this great thanksgiving Throughout the land we raise, Wrought into holier living In all our after-days!

Bless, Father, him Thou gavest
Back to the loyal land;
O Saviour! him Thou savest
Still cover with Thine hand;

O Spirit, the defender ! Be his to guard and guide, Now in life's mid-day splendor

On to the eventide ! - The following letter from the Queen to Mr. Gladstone was published in a supplement of the London Gazette on March 1:- BUCKINGHAM PALACE, Feb. 29. 1872.—The Queen is anxious, as on a previous occasion, to express publicly let-ore personal resp deep sense of the reception she and her dear children met with on Tuesday, February 27, from millions of her subjects, on her way to and from St. Paul's. Words are too weak for the Queen to say how very deeply touched and gratified she has been by the immense enthusiasm and affection exhibited towards her dar son and herself, from the highest down to the lowest, on the long progress through the capital, and she would earnestly wish to convey her warmest and most heartfelt thanks to the whole nation for this great demonstration of lovalty. Queen, as well as her son and dear daughter-in-law, felt that the whole nation joined with them in thanking God for sparing the beloved Prince of Wales's life. The remembrance of this day, and of the remarkable order maintained throughout, will forever be affectionately remembered by the Queen and her family.

- The ex-Empress of the French sold a little while ago her extensive collec-— The ex-Empress of the French sold a little while ago her extensive collection of fans. A number of sanish-boxes are now passing under the hammer. There are forty of these bijoux, and they are being exhibited in Pall Mall. The most remarkable enriosites are two magnificent works of Petatot, the portraits of the Duc d'Anjou and of Colbert, exquisite pastoral subjects by Watteau; an enamel of the seventeenth century—Louis XIV. and Mme. de Montespan in the characters of Mars and Venus; a gold snuf-box, the work of Koble, representing the different sights of the Petit Trianon: this last was the property of Marie Antoinette. Then follow two Saxon enamels, with subjects by Boucher; two boxes in amber, ornamented with diamonds and rubies—presents of the Khedive to the Emperor Napoleon. Finally, there has been added to the collection three superb pieces of furniture, dating from Louis XVI. and coming from the Little Trianon.

A late star of the Parisian world, who was a few months ago one of the most assiduous habituses of the Tuileries receptions—the Baroness de Presles—has made her debut on the stage of the Open Comique, in the part of "Zerlina," in Aubers Fra Diarolo. Mmc. de Presles, who has assumed the transparent pseudonym of Prelly, was celebrated both for her beauty and dramatic powers in the pieces played at the Theatre de Societe at Compiegne. Her husband, an ofhere in the Curnessiers, was killed at the battle of Reichshoften, leaving his young wife nearly destitute. Mmc. de Presles resolved to make use of her talent and voice, and accepted an engagement of the Opera Comique. In spite of the severity of the Parisian public, who has compiletely accepted and erities are annaimous in preliain the new prime she has completely succeeded, and critics are unanimous in praising the new prima donna's accomplishments.

- While at Rangoon, a very few days before his assassination, Lord Mayo While at Rangoon, a very few days before his assassination, Lord Mayomade a very brief speech, almost hismurckian in its terseness, siemiticance, and vigor. Finding the people full of an idea that he was come to restore British Burmah to the King, he gave the following address: "Let no man tell you that any change is likely to occur. Arraem, Pegu, and Tennasserim are British, and British they will remain for many generations of men; but we rule you only for your good. We govern in order that you should live in peace, prosperity, and happiness, that you should be free to come and go, that whatever you possess should be secure, that all your rights should be preserved, and your national customs and habits respected."

· Among the passengers who left Liverpool on March 6th for Africa in the Among the passengers who left Liverpool on March 6th for Africa in the British and African Company's steamer Folda, was Mr. Charles Livingstone, British Consul at Fernando Po, and brother of the celebrated African explorer. Mr. Livingstone expresses the greatest confidence in the safety of Dr. Livingstone, whom he believes to have been detained by the unwillingness of the natives to assist him in his object. Mr. Livingstone also thinks that his brother will, in the course of some months, reach the sea coast near Zanzibar.

It is said in Madrid that King Amadeus of Spain is a henpecked husband, and that his consort is the real ruler of the country.

The well known Liberalorgan, the Spectator, says: "The revolt of the Duke of Newcastle against Mr. Gladstone has, of course, done a good deal to turn the scale, but no doubt Conservative reaction is a principal cause of the change. We have now an early prospect of a Parliament in which the counties will return very few Liberals indeed, and even in the boroughs their majority will be vastly reduced. The advent of a Conservative Government, with a majority of its own, and power to do what it likes, will be quite a refreshing and very instructive novelty."—Court Journal.

The Grand Duke Alexis has a good deal to answer for. Read what a Michigan belle writes to her confidence: "Out of the glare and heat and weariness of the great ball given by Milwaukie to the Duke Alexis, I brought a picture for my shadow gallery. The gaslight and rouge and pearl-powder and hothouse perfume that surrounded it have all fallen away, just as the dark callyx, that these the beauty and fragrance of the rosebud, shrivels into nothingness under the unfolded petals, and left me a flower as sweet and simple as ever bloomed in the summer wildwood."

— Blsmarck recently came very near being assassinated by a crazy drug-clerk from Posen, who had come to Berlin for the purpose of shooting him. He had practiced for months at target-shooting, and had become a dead shot. If he had been more cautious, his scheme to waylay the chancellor, after the adjournment of the sitting of the Chamber, and then to fire at him from behind a tree with a seven-shooter, would have probably been successful.

— The Count de Chambord, the Legitimist pretender to the French throne, is treated by his servants as a real king. They call him only his majesty Henry V., and his servants kneel down before him whenever they present any thing to him. The pretender, like the former kings of France, always dines alone in the presence of his aristocratic attendants, and precisely in the manner prescribed in the court ceremonial of Charles X.

—The last enormity that has been perpetrated in the Tichborne case took place in Pall Mall. A gentleman boldly enunciated the fact that no matter how great an impostor the claimant might be, the bonds were most decidedly "Wagga bonds."

— Prince Frederick Charles of Prussia is about to visit Constantinople, Cairo, and Bombay. He may extend his voyage to China, Japan, and California, and return through the United States to Europe.

— Fremuerunt gentes, some of the gents connected with St. James' Episcopal Church have abused the Town Crier in the strongest ecclesinstical language, for stating that a certain Church Warden directly descended from the Apostles, through his father, who is a Bishop, had not paid up his subscription for some months. Now, whether the fact were so or not, is a matter of no personal interest to the Town Crier; but inasmuch as the statement was made by one of the leading spirits of St. James', and came direct to him from the gentleman to whom it was made, he conceives that it is a miscrable meanness to accuse bim (the T. C.) of starting the story. But this is invariably the way. There never yet was a sendal set a going about a church member which did not originate with his co-religionists. They keep sing and defame him at their prayer meetings, but when a newspaper writer is told of it, and happens to mention the alleged fact, without animus or comment, these plous are after him with a sharp stick. We said no harm of Fitzbishop merely that he was in debt to the church, which, indeed, is the highest praise, since it shows him a faithful follower of her example. No decent church in the present age is free from debt, and the larger the indebtedness the more respectable the church. Church Wardens have a right to "do likewse," and whicher their stock operations succeed or no, they would be foolish to assist in placing a church on another basis than the established and orthodox one—a chronic state of embarrassment.

— There has been a marriage recently not a thousand miles from the celebrated Goat Island, on the other wide of the Bay. The bridegroom was a genial and frank soul, heartily esteemed by his surviving bachelor acquaintances. The bride, a young lady whose amiability is said to be only equaled by her good looks, was descended, we believe, from the founder of the Inductive Philosophy. "All went merry as a marriage bell," and the marriage belle went merrily to church. A goodly throng of our best nobility were there, the only aristorat absent being the Town Crier. The candles on the altar shed over the church a "dim religious light." Unfortunately they had the same effect on the service book, and the worthy elergyman who officinted put the question which the Church intended for the bride to the bridegroom. He paused, he shivered, but gallantry prevailed, and he made the self-immolating response, "I will." Well, "to obey is better than sacrifice;" but for a man to promise to obey his lady love in the present age of Woman's Rights is an alarming scriftice indeed. But he did it, and it can't be helped. Let him take comfort in algebra and grammar. Two negatives make an affirmative, and minus into minus makes plus. He promised to obey his wife and his wife promised to obey him. The omen is a good one. With but one sweet will, let them meander through the plains of life, and let their "two hearts beat as one!"

Wayside Gushings .-- By Mrs. Harris. DEAR NEWS LETTER: Von a voman as is gettin into years Takes to writin of vuss for a livin, and appears In your waluable columns conseketive veeks, Since I wrote you my nerves are bin werry much shook By letters asthrestenin' that wenge are would be took On my person, ven diskivered, for illusions an' stricturs On warious parties, a h'njurin' their carrickters. On warlous parties, a hinjurin' their carrickters. Father G. a., her writes: "You shall rise your periphrastics, A c. stri of redictions upon it he celesiastics? That analysism young men, too, which its hose is a snub. Ave sworn to lephon coupers are fore the Boseman Club; And the Finnyune, I 'ear, 'ave all secretly swore.

Not to take Dublin Castle till' Arris is no more. So in case I should 'appen to be spirited away, And you 'car a lovely corpse is seen floatin in the Bay, And you can a lovely corpse is seen death in the Bay, Please dentity my body, as you'll easily know B. Lact their major the left in thing you. And you in our open and the relative you. And you in our open and the relative you. You will find the name Dank engraved on my lart. I stoud not holigate to your avin, me embalmed, And kep as a vax work that the world might be charmed. By a wartuous statoo, but 'twould p'raps do more good. Farinaceous for hinfants, or best caif's foot jelly For stummicks as is veak, likeways wermicelli. I'm glad Lent is over, for fastin' don't suit me, And I've 'ad to take stim lants vunce a hour to dilute me; I'm werry much shrunk, and my vaist, which before Was jest five foot circ lar, is now only four. My corset's that loose that it feels like a sack And the bladebone is wisible in the small o' my back, And hadmirers, as was, 'ave now took to 'intin' That I'm growin' werry like the livin' skelintin. That I'm growin werry hat the light sachilla.

I've bin werry partic'lar to keep all the 'igh days,
And 'twe cat hears and homlets on Toosdays and Fridays;
On Vensdays my diet 'ave mostly bin fish— Lobsters, crabs and stoo'd hoysters—a werry nice dish.
Every Sate riday as r \_ larges the fish eart came round,
I've purchis'd fresh 'errins at five cents a pound, Yerh ave made me to sme. that conspict mass of fish, Man with moses to sit down hash, and don't vish, But ven vun's forbid to eat fresh meat or gammon Of bacon, vun's obliged to eat 'errins and salmon, As r quir s for digist on a sip glass of groz. And ven in cold weather the system congeals, You may loobricate ver in ards by swallowing of eels. You may loobricate yer in ards by swallowing of eets. But my own const tooschar, I don't need to in al.
And you hard tim' a steak I abus says "brider."
For them fryair pants is a room in these limited States,
Where the kitchens is destitoot of gridirons and grates,
And the cooks is all higherent of brillin" an 'roustin',
and now heard in the away and calls it a tension. And pops bread in the oven and calls it a toastin.'
Talk of sooicides! no vuuder, ven their stummicks is that tried
Vith digestin' of chops as didn't ought to be fried, That the hinner man, compressed by rank pork and 'ot bread, Gets low in the sperruts and crazed in the 'cad, And vings its vay hupward to that 'evunly sphere Where the cooking is werry medibett whan 'erc. I was 'orribly 'umbugged on April Fools' day, Vich it appened on Moneiay, yen An Sam was away In the subbnbs a gatherin the veek s dity men. Yen a small boy come in, quite distorted with grinnin', And said that a lady as was took werry i'll Of a sudden, and 'ad 'eard of my medikul skill In dew lopin' binfants, was banxious to see me In town right away, as would liberal me.
So takin the address I started oil strucht
To South Park by the 'oss cars, a fearin' I'd be late,
And knockin' at a onee in a belegant grove, And Knockin at a onse in a nelegant grove,
Says I to the sarviot, "As the hinfant arrove?"

"Vot hinfant? says she. "Vy, the one what's expected;
Tell your missus I'm the nuss as she lave selected,
Vich my name is Mrs. 'Arris." Says she, "If yer please, ma'am,
Jest vait in the 'all ville I calls a perliceman."

"Vot! Is he the lather?" says I. "You'll soon see."

Says the 'uzzy, and a hofficer come an' collared 'old of me,

And 'auled me to the station 'ouse with hoaths and habuse. And called me a gang as was up to a ruse For robbin' the premises, but ven the Hinspecter For tolling the property of the transport of the charge, he soon gave that there M. P. a lectur, And says he, "The old gal is the wictim of an 'oax," And he pushed in choutside with severial pokes
In my ribs, and vile veepin' to think I'd bin a doop,
A hurchin cries out: "Vot's the matter with yer 'oop?" A hurchin cries out: "Vot's the matter with yer 'oop?"
An' the small hoys kep' ollerin' at my 'cels through the town:
"Old lady, the 'oss 'air on yer 'ed's comin' down!"
And vun unbeknown come be 'ind me with paste,
And libeled my back with the words, "Werry chaste."
Next April Fools' day it ain't me that'll roam. For to hinnocent females "there's no place like 'ome," That there hearthquake last veek shook my witals with awe, And Sayrah, who slep' with me, were pitched on the floor, And 'er'ed came in contack that 'eavy with crockery, That I felt conserlashun were only a mockery, And says I, "Tis the comet, leastways the wibration Foretold by Dr. Cumming in 'is 'Great Tribulation.'" Oh, where in this vide vorld can a vidder repose, Vithout 'aving fresh 'orrors stuck under 'er nose Every 'our? As if horgans and fires didn't rack us Sufficient, at this moment they're letting off crackers Right hunder my vinder, and demons is dancin', And a man they cal's Colonel on 'ossback is prancin'. And a man they calls Colonel on 'Ossback is prancin', And tin trumpets is blowin', and the roosters is crowin', And yot in 'evvin's name 'tis about there's no knowin'. '' Vot's hup now, you wagabones!'' cried I, from the vinder, Ven a squib struck my nose, as is nat'rally tinder, And but for some aperrits which I 'appened to 'ave by. Warry light th' is demonstrated by the large the control of the colonial struck my house. Werry likely th' inflammation would 'ave flown to my heye. And vile I was asking what the doose it all meant, oh! Says they, "Our delegation 'ave returned from Sacramento, And a canpon will be fired ven the train comes along, And to-night they'll be velcomed with supper and song, 'Cos they've got the three 'undred thousand grant as we wanted, Vich that stingy Gov. Booth did not vish to 'ave granted, And for builders and masons there'll pienty of 'work be On the new Univarsity buildings at Berkeley."

Oakland, the "loveliest village of the plain," where science flourisheth and art doth reign, has been victuiized in opera, at two dollars a ticket. The Academy of Music, so called because it is not an Academy, and because no music except the banjo has ever been heard within its wooden walls, was to be the theater of Lucrezia Beogia's trumph. There was, first, an ominous delay. At great additional expense, as the manager put it, B Trocatore would be presented instead. The looked-for evening came, and the music-loving folk turned out to find what looked very like a hoax. The expectant ticket holders "opened wide the door," and lound "darkness there and nothing more!" Alas! alas, oh! Where was the eminent basso! The violin no appearance had put in. There was only a solitive piano, and no one knew what had become of the soprano. Signor Bianchi went to Oakland with one of his company, looked at the village, and took the next train back. His orchestra were otherwise engaged. The other singers didn't come. A second piano couldn't be got at such short notice. So, smiling benevolently and retaining the hundred dollars which had been paid as deposit, this "soul of music fled." Tara's Hall was desolate, and the votaries of melody went home wiser and sadder by their loss. Alack a daisy! It drives one crazy to think that Apollo should prove so hollow!

<sup>&</sup>quot;Comparisons are odorous" said Mrs. Malaprop. So are parsons, if we can believe a writer in the Pacific, who says that "the elder Scudder lingers in our hearts like a heavenly odor." By the way, who was the elder Scudder! It can't mean our Scudder, the late lamented of Howard street, for he wasn't an Elder, but a full-blown pastor. If it allude to his father, we had much rather; if it be his brether, still better than another, but if it be only H. M. why not say so! Perhaps in the flying scud of parsondom, there is a younger Scudder still. Do they all smell! we mean, of course, do they all "smell to heaven," or as The Pacific puts it more touchingly, "fill us with a heavenly odor?" Let us hold our noses in silent homage.

<sup>—</sup> The Jewish Chronicle notes as a significant fact that a Jew has been invited o act as chaplain to the House of Representatives at Washington, and has officiated with success. Why not? was not our Savior an Israelite?

#### Mahomet.

We bold, then, that Mahomet was, from the beginning to the end of his career, honestly convinced of the truth of his own mission. We hold also that, in a certain sense, at least in his carlier years, his belief in his divine mission was not ill-founded. But we hold, also, that he gradually fell away, and that he fell away mainly from not taking due pains to find out the real nature of the Christian revelation. When the first downward step had been taken, the other steps of the downward step had been taken, the other steps of the downward course were easy. The prophet of truth and righteensess, the asserter of the unity of God against the idols of the Kaaba, sank to the level of an earthly conqueror, extending the bounds of his dominion by the sword. He died while waging war to force his own imperfect system on those who, amid all the corruptions of the Christianity of those days, still held truths which he had rejected and blasphemed. The real charge against Mahomet is, that, after the Gospel had been given to man, he fell back on the theology and morality of the Law. And the waging war to force in so with imperient system on those who, and all the corruptions of the Christianity of those days, still held truths which he had rejected and blasphemed. The real charge against Mahomet is, that, after the Gospel had been given to man, he fell back on the theology and morality of the Law. And the effects of his life and teaching on the world at lar chave been in close analogy to his own personal carreer. In his own age and country he was the greatest of reformers a reformer alike religious, moral and political. He tounded a nation, and he gave that nation a religion and jurisprudence which were an unspeakable advance on anything which that nation had as yet accepted. He swept away idolatry: he enforced the practice of a purer morality; he helightened the ybke of the slave; he even raised the condition of the weaker sex. If he had done nothing but wipe away the frightful practice of burying female children alice, he would not have lived in vain in his own land in his own age. But when his system passed the borders of the land in which it was so great a reform, it became the greatest of curses to mankind. The main cause which has made the reazon of Mahomet exercise so blighting an influence on every land where it has been preached, is because it is an imperfect system standing in the way of one more perfect. Islam has in it just enough of good to hinder the reception of greater good. When Islam is preached to a tribe of savage heathen, its acceptance is in itself an unmixed blessing. But it is a blessing which cuts off all hope of the reception of a greater bressing; the heathen, in his utter darkness, is fair more likely to accept the faith of Christ than the Mahometan in his state of half enlightenment. In all the lands where Islam has been preached, it has regulated and softened many of the evils of earlier systems. But in regulating and softening them it has established them torever. The New Testament nowhere forbids show every; it can hardly be said to contain any direct prohibition of Review.

#### A Wise Measure.

The Chamber of Commerce have petitioned the General Government to increase the subsidy to the China Mail service—one of the most important of all questions to the Pacific Coast. If one half the interest was taken by our people in this matter that is wasted on the Goat Island scare, our commerce with Asia would be multiplied four fold. How so intelligent a person as Senator Casserly should have gone astray on this question is more than we can understand. The harbor of San Francisco is the natural entroped of this great Pacific trade; from San Francisco the Trans-contine tal Railroad should bear the wealth of India to the East. It has built cities and made nations weathly. It has created merchant princes, and wherever the India trade has touched, it has acted like the enchanter's wand. Prejudice to Chinese immigration is well enough for party purposes on election day. It is becoming in the mouths of demagogues and small-beer statesmen; but it does not sound well from the Senator of the State, and a resident of the very city that is to be the first to reap the benefit of this new highway of oriental trade. The National Government should not hesitate to grant subsidies, and to do all in its power to grasp and secure this magnificent and growing business.

<sup>—</sup> Ste transit gloria, etc. In a pawnbroker's window near the corner of Washington and Dupont streets, may be seen a silver label, or coat-badge, that cert was doubtless worn upon the manly and defiant breast of a now decayed reporter, for the inscription reads: "Reporter Morning Cull." In the words of Cowper—"Hard lot of man! to toil for the reward of Virtue and yet lose it."

#### Idle Words.

Once I said. Seeing two soft, starry eyes, Darkly bright as midnight skies-Eyes prophetic of the power Sure to be thy woman's dower When the years shall crown thee queen Which the years shall crosen:
Of the realm as yet useen:
"Sometimes, sweet, those eyes shall make" Sweet, for kiss of thire, some day,
Lovers mad for their sweet sake!"
Men will barrer souls away!"

Once I said. Seeing tresses, golden brown, In a bright shower falling down Over neck and bosom fair, As you sculptured angels are-

Appleton's Journal.

Odorous tresses, drooping low O'er a forehead pure as snow: "Sometimes, sweet, in thy soft hair, Love shall set a shining snare!'

Once I said. Seeing lips, whose crimson glow Mock the roses wet with dew Warm, sweet lips, whose breath was balm, Pure, proud lips, serenely calm— Tender lips, whose smiling grace

Idly said ! God hath taken care of all Joy or pain that might befall! Lover's lip shall never thrill At thy kisses, soft and still; Lover's heart shall never break In sore anguish for thy sake; Lover's soul for thee shall know Nor love's rapture, nor its woe All is said!

- We have an instinctive respect for whatever is excellent and superlative of its kind. There is nothing so damnable as mediocrity. Your crude rascal, your hesitating, half-hearted malefactor is a pitfully abject creature. The unleavened regue, who grows white about the gills when detected picking a pocket and makes confession of his guilt in his scarcel face and trembling limbs, does not interest our contession of his guilt in his scared face and frembling limbs, does not interest our sympathies or command our homage. But from the unbashed prig who loudly retorts the charge upon his accuser, and clamors vociferously for his arrest, we cannot withhold the tribute of our admiration. We accordingly feel moved, as an act of simple justice to crown Mr. William Mackay Laffan, of the Baltimore Sunday Bulletin, as the prince and paragon of the smaller sort of literary thieves—the sort whose talents find their suitable sphere in the flash papers. Laffan's contributions to the Baltimore Sunday paper have consisted of a patchwork of industrious pilferings from other papers, but principally from the News Lefter. Our recent croposure of the thier attracted some attention in Baltimore, and placed him face. posure of the thier attracted some attention in Baltimore, and placed him in a a position where nothing but consummate impudence and intrepid lying would save him from disgrace. But the scamp proved equal to the occasion. In the issue of him room disgrace. But the scain proved claus to the occasion, if they appeared in the Bulletin are suspiciously like certain others that have appeared in the Bulletin are suspiciously like certain others that have appeared in the Bulletin are suspiciously like certain others that have appeared in the Letter, and then could charges that it is we who are the thirf, notwithstanding the In the Butletin are suspiciously like certain offices that have appeared in the Moule Letter, and then coolly charges that it is we who are the thicf, notwithstanding triging circumstance that in every instance of the appearance of two similar articles in the two papers, the one in the News Letter appeared from ten days to two weeks earlier than the one in the Baltimore Sanday paper. Mr. William Mackay Laffun stamps himself prince of liars as well as of thieses in the following ingenious paragraph: "We recollect upon one occasion last Summer taking up our pen and writing a trenchant and foreible article, in which we severely reflected upon the unbecoming conduct of a San Francisco paper in transferring into its columns, without credit, certain defly-worded and attractive paragraphs into its columns, without credit, certain defly-worded and attractive paragraphs with editor of this piratic sheet—the San Francisco News Letter—was wont to so alter and adapt the matter that it became, as it were, local in its application. For instance, when we would narrate something particularly amusing about Baltimore street, he would change it to Montgomery or Dupont street, and would similarly fit our remarks upon Baltimore individuals to sait well-known characters in San Francisco." This unique embodiment of theft, mendacity and check then proceeds to complain of our exposure of himself, and threatens to "smite us severely with a club" should he have the good fortune to meet us. This piece of bluster on the the part of the Polyphemus of the Sunday paper, will be much enjoyed by the select circle in San Francisco who know the history of a little episode in his career which occurred shortly prior to his departure for Baltimore—an episode in which Polyphemus figured in the attitude of a convicted slanderer begging on his career which occurred shortly prior to his departure for Baltimore—in episode in which Polyphemus figured in the attitude of a convicted slanderer begging on his knees for mercy, while the man he had defamed stood over him with a cow-hide, about to execute summary justice upon the culprit. We have alluded to Laffan's paper as a patchwork of pilferings, and for further evidence of the justice of that charge, we find on the first page of the very number from which we have quoted, a story entitled "Old Biles—A Glimpse into the Past History of a City Wair, which was written by one of the local staff of the San Francisco Morning Call, and was published in that paper two weeks before its appearance in the Baltimore journal. Yet the systematic Mr. Laffan has the sketch printed under a top-line declaring that it was "Written for the Sunday Bulletin." We suspect that it is about time that this geutleman should begin to look around for a new sphere of usefulness. San Francisco couldn't stomach him more than a year, and unless Baltimore is less squeamish than we inactine, she must be pretty nearly preparing Baltimore is less squeamish than we imagine, she must be pretty nearly prepared to dispense with her "humorist."

<sup>-</sup> We notice the arrival at Occidental Hotel of J. Blickensderfer, Jr., Chief Engineer "Atlantic and Pacific Railroad.

## Atlantic and Pacific Railroad.

Among the various questions propounded a few days ago by Mayor Alvord and others, leading citizens of San Francisco, in a letter to Gen. Alexander and other army engineers, relating to our ra Iroad and terminal enigma, we note that all the questions, except one, asked in the letter were enterorically answered by the lastmand rentleman, which question they, for reasons best known to themselves, entirely ignored. We refer to the on-relating to the translation of the 35th perceived, or Aller dre and Pacific Rairoad, reaching Sin Francisco tranella Seath of the perinsuld the the route suggested by said company, which proposes to enter San Fran-

cisco via the coast without the requirement of a bridge.

This may think the omission one of no great innertance; we don't, and would like to know who they have our conthern courties out in the cod, who is a mortant a question as the Inture reilread policy of San Francisco and State of California is about to he divided. Some of our readers, as well as some of our gony engineers, may not leave the time or inclusation to seek in the prope, and most relink opacie, may how the time of the solution sees if the period, and most re-liable quarter for facts and figures relate; to thus great quies sen, and as we are brought dudy into contact with ideas and in press one published in open, "tree pro-posed, as strewest which we drowning writches of San Francisco must c'utch, and recomizing, as we must, even short soiled as we are, now ignorent soile of and foco inzing, as we misst, even short sign following free how rehoresh some of those scribes are of the reography and topologically of our own state, we propose the set our propose registration so promise resisting on the question so promise sked by Maxon Avord, and so practive left processed by General Alexandron and others. In the open letter to Medically, is in all by Who error in the strate on appears showing the position of railrooms tow over all by the Central Parish Company and their processed routes, one of which the San Low Dear the processed routes, one of which the San Low Dear the processed routes, one of which the San Low Dear the processed routes, one of which the San

Jose Bond the hagian shows as the Coast Parford.

This is an error, for the Coast line, as we understand at large to the west of the San Jose Rord, and is prejected to skirt the coasta from San Perantsian to Wests riville, which the Son therm Parisine, or say Jose Railwest, testions the Bay line to Historian Bayes, the high coasta faunt's expert, the three to the time that least San Francisco until they much at Wastson be, on the Bay of Mont by These expendences on one sided arguments say the side by Palai days being proper serve, who depend upon our dailies for regular information relating to Important

subjects.

Then, considerable interest in the railroad bridge Cout Island. Trusted matters ste, and knowing how at views our papel are to learn faces in the possibles, we have, during the past week, acquarabled oxastics with the following facts relating to the 35th parallel or Atlantic and Pacific Railroad.

This and view decished, will extend from St. Lenis, Wessenit, to san Frances C. Celstonia, a total distance of 2,460 mass, and t will be context the examplement and countrie of one company, who with their languages of a loss of a loss. When control of one company, who with their languages in a face of the Messon's River, was much seen against of the Messon's River, was much seen against the decision of the loss of the loss of the languages of the control of the control of many languages and the result of many seen against the control of many languages of the language of the language of the languages of the language of the la

fully for the carrying trade across the contor in.

Our aim and our sain is to have the All into and Pacific Bailread to enter our city, at as cirly a day as possible, and if taken hold of at once, it can be done a less time than it wil take to "Brodge the Bay." Let san Francisco once it herself to St. Louis by rail, having an all year routed the Frestern States, "coping to the fron cord our rule southern counties," mineral Argona, "taule of southern 1'tsh, one bearing New Mexico, cather rossing Tyxas, and the special dands and agricultural resources of Indian Tear fory and Missouri, with a weed discar and same connections, at St. Louis with New York, LasS index and all points fast, having direct coan ction with New York, LasS index and all points fast, having direct coan ction with New Orcans by pregnitivent staupors, at the Rest. Battes chosent hand. Such a railway having its formatics at San Francisco, with have the good feeling and sympothy of our chaons on its side, and we need not fear Goat Island, Terminal city, Stanford, or any other mais.

The Central Pacific Railroad Company bave good rosso for asking aid. Are they not, as a company, \$60,000,000 in debt? Have they not been forced into several ruinous and expensive trades, which has calm match in what is now could deal aims of the value of system of a potential. Have they not been forced into the ownership, and

crai rumous and expensive trades, which has calm insterf in what is now earlied the railroad system of coforms. Have they not been forced into the ownership and base they not to sustain four routs between San Francisco and Sacramento. Well these routes all pay, when they loose one-ball of their overland trade, considerable to the Utah and a portion of White Pine! They bought the Western Presite to abundon it for a longer and loss clevated route. They bought the California Bacilie to abandon it for a longer bat less destructable line. They became the awares of the river line because they couldn't help fit, and the Saudsern Pacific uniterest of Compariser and others went with the Oakland Front, anticipating the inability of the A. and P. Company to finally reach San Francesco without their assistance. This last fact, if once established, and a contract and understanding entered into between these two roads. San Francisco may have the inclination and means to build a dozen roads to the castern States: it will awail her nothing, for the avenus between the Atlantic and Pacific Oceans are few and narrow, and from present ap. pearances they are all occupied by railroads built-under construction or contemplated-hence the importance of San Francisco making the first bid, and let it be large enough to secure the A. & P. Railroad beyond all doubt. Don tput it off too long. Now is the time to act. If we wait we can do no better. An egg to-day is

long. Now is the functo act. If we want we can no no nearer. An egg today is worth a line of raise an reach the most direct and practical route over which a line of raise can reach the Eastern States from San Francisco certainly seems to exist upon the line as surveyed by the Engineers of the Atlantic and Pacific Railrond. They have been at work in California for over a year, and are still in the field locating and improving their former lines. A profile of the entire line, with the maps, etc., of the same, having been unrolled lately before our eyes, we are embled to say that San Francesso can be reached by the 35th parallel road, via the Constemnite spitte paintenance and that the roade, as successed, is in even respect a satisfactory one. We teel assured Mr. Wheeler has not the correct rathroad system of Cabiornia on the end of his pen if he ignores this southern route and all the branches that must in the end be built to feed it; and the lime suggested by "Publicia," who has not been surveyed, but which he says can be built, is a snare and a delusion. The Attantic and Pacific Railroad is un no way connected with, or is the line in any way identified with the so-called Southern Pacific Railroad; the latter being a local organization belonging to the State, the covnership and control of which plays in the Central Pacific Railroad. The Atlantic and Pacific line will not cover a foot of land in the San Joaquin Valley, for the reason that it follows a westerly course on a line south of and near to the 35th parallel from the time it enters into the State of Catitornia until it reaches a point in the Santa Chara River Valley, about thirty-six miles east of San Buenaventura in Santa Barbara County, while San Inity-six inites cast of San Bachavenura in Sanfa Barbara County, Wilde San Joaquin Valley heads to the north of the 35th parallel, and runs in a northwesterly direction. From the point above mentioned in the Santa Clara River Valley the Atlantic and Pacific Rairond finds its way into the Santa Inex Valley over one summit, passing the same with a tunnet 2,400 feet long, at an elevation of only 950 feet above the sea, the maximum grade being less than 100 feet to the mile, and common of Salor radius. Error, Santa Inox the read loss but me shelds more of curves of 8 deg, radius. From Santa Inez the road has but one shight range of mountains to cross in reaching San Lurs Obispo, which will require a second tunmoniants to cross if reaching sair bus conspo. which will require a condition need about 1,500 feet long, and this can be avoided by a slight increase in ength of line with grade not to exceed 70 feet to the mole. At San Lucs Ob spo the first and only great obstruction is met with on the entire line from St. Louis, Missouri, and only great obstruction is not with on the entire the from St. Lolls, Missolff, namely; the St. Luis range, which separates the Salimas Valley from the San Luis Valley. Several lines have been surveyed over thus range, all of which are practicable, and two found that will answer with a tunnel 3,000 feet lon, allowing grades of less than 100 feet to the units. The company have a peaty ocating a new line, by which it is proposed to shorten the line and tunnel materials. After reaching the Salimas Valley, the line is over a flat country until it results Watson-ville, from which point to San Francisco the line follows the coast, by one of two coasts are first colling at Variable parts. routes, the first ending at North Beach, with a proposed extension to the city front, apposite Goat Island; and the other on to the south side of the city to any convenient water front not already given to the Certina Jacine Barones Company.

The Atlantic and Pacific Company is the only one looking towards ' uping rods that will benefit all the coast counties, and to Los Angees the Abant'e and Pacific Ruilroad is thirty miles shorter than the Southern Pacific, via San Josephin Valley, as now proposed. That every one may understand how these two lines propose to

as now proposed. That every one may and extent now these two may propose to reach this city, from the south, we od r the lodowing information:

Atlantic and Pacific Line. -San Prancisco to Santa Cruz and Watsonville; thence up the Salims Valley to San Mignel Mission; thence to Santa Marzarita; thence to San Linis Obispo; thence to Napoma; thence to Purissania Mission; thence to Dos Pueblos; the ce to Santa Berbara; thence to San Inconventura; thence up the Santa Clera River Valley to San Fernando; thence datedly east to thence up the Sania Clera layer valve to San berhando; thence directly east no the Needles (via Solidad Pass) on the Colorado River, below Fort Mojaxe. As the branches from San Fernando to Los Angeles—distance thirty-tour ucides. This will give a very correct idea of the proposed line of the Atlantic and Practic Road. The Southern Pacific is from San Francisco to G. roy; thence to Watsonville; thence up the Salimas Valley to San Mignel Mission; thence up the Estrello River, out in the Taylor Phina via (Palaga Phas. Thance and the thomas has a large to the angeles of the Colorador and the Salimas Valley to San Mignel Mission; thence up the Estrello River,

out in the Tulare Plains, via Chabamo Pass; thence south through the Te-bechapah Pass, on to the Mojave Plains; thence to Solidad Pass, and down the Santa Clara River Valley to San Fernando; thence to Solidad Passles; thence to San Bernardino, and on to Fort Yuma, to connect there with the Texas Pacific Railroad. It will be noticed from the above routes, that these two roads meet at San Fernando,

and both branch to Los Angeles from that point.

The following extract from an article published in the Bulletin, April 14th, signed The following extract roll an arrive pulsarian in the Boulean, Apin transition of Enterprise," we indorse, and trige upon our people to awake to the importance of entering into a contract with the A, and P. Company and give them liberal aid, with the understanding it is to be expended on this coast, and that, too, without delay, so that we may connect ourselves with St. Louis by rail at the earliest moment possible:

There has been considerable discussion in this community as to the probable effects upon our prosperity, should the Central Pacific Railroad obtain a grant for Goat Island, and thereafter set to work in building a rival to this city upon the Cookers have had piently of material for predicting the absolute desertion of this city, it is about time that those of our so-called leading men, who are downeast by the outlook, would lay aside their inactivity and be up and doing. It is time that such men gave evidence of some little enterprise, do less grumbling and talking, and cast about them for a cure to this continual agitation of the terminus question. San Franci-co is rich enough to assist immediately in the construction of an opposition road, that may do away with this Central Pacific Railroad war altogether. If her citizens were not sleeping, as they surely seem to be, the road would ere now be in an advanced state—it would be pushed forward with energy, and our pros-

pects would be more encouraging

Let San Francisco lend her credit to the amount of five or even ten millions of dollars, to the building of a road by the thirty-fifth parallel at once. Let the city offer great inducements for the construction of this road immediately, under such provisions and restrictions as good judgment and a proper regard for the public interests may dictate. The leading merchants and business men of this city should call a meeting for the discussion of this project, and take measures to have the same brought to a successful operation.

St. Lous, through her prominent men, has already taken the matter in hand, with her usual chergy and enderprise, and why should not we do likewise, and hereafter reap the reward that is estain to follow the encouragement of such an

undertaking

Were St. Louis, or Chicago, or Baltimore, or any other of our large cities to be placed in the same position we now occupy, you would see how quickly and thoroughly they would take up the building of an opposition road, and delay not until the same was in full and positive operation. Say what you will, there is no denying the fact that it is due to the lack of energy and enterprise in her citizens that San Francisco is to-day doundering in suspense and great depression,

The building of such a road as I have above suggested I believe to be a neces-sity. Firsty Because the Union Facilit Railroad, new operating in conjunction with the Central, cannot be resided upon, during a heavy winter, that may occur in any year, as witness the snow blockade hardly overcome at this date. Such inter-ruptions have caused and will continue to cause great inconvenience and damage

to our business, interests, and they cannot be permanently avoided an assage to our business. Interests, and they cannot be permanently avoided concessions Secondly. The Central Pacific Rairoad has obtained already more concessions than it in justice could demand. It has been enriched by subsidies and and grants almost beyond limit. It has attained such political influence on this coast, as to give great alarm to those in favor of good government and the proper and even ex-cention of the laws. It does not alone attempt to control the government of the State and the public affairs, but it is even going further in its dictorial exercise

Through its officers, it seizes upon mines and mining interests, without the shadow of title in most cases, and ourst the man of moderate means from his just rights, because if has the power and will to wheat the same, the condemnation private lands, upon the plea of necessity for its construction of depots, etc., but pressor same, upon the page of necessary to his constance of dispate, e.g., our really for no such purpose. It is energy a plant to obtain variable lunds for speculative purposes, and to add to its great wealth, at the loss and expense of those number of the purposes, and to add to its great wealth, at the loss and expense of those number of the purpose of the grasping and wollfals designs of those having loss. control.

Were this state of affairs to continue much longer, it is certainly clear, to me at least, that this State, if not the whole Pacific Coast, will be absolutely in the control of this monopoly.

### Ancient Map of North America.

At a meeting of the American Geographical Society, held at New York on the 28th of November, there was exhibited a large photographic copy of a map of part of America, described as made by Verazzano in 1529. Verazzano is supposed to have preceded Hudson in the discovery of the buy and hurbor of New York, and to have been the first navigator who explored the coast of what is now the United States, landing in several places between North Carolina and New Brunswick, a full account of which voyage is contained in a letter written by him to Francis I., which is now in a public thrary in Froence; but the gentimeness of the letter has been questioned, as well as the fact of such a voyage. A map or planesphere of been quiscounce, as wen as the next to store a sequence in the world, made by Vernzzano's brother diev evers after this alleged voyage—that is, in 1529—was discovered a tew years ago in the College of the Propaganda, at Rome, containing the North American coast, and indicating the discoveries Verazzano. The society has obtained a photographic copy of this map. It shows the oneines of the North American Confinent, almost as in modern maps. Verazthe onesses of the swint theorem continuing amost design movest maps: vesses and of obscure which, but became known as an adventurous satior, and made several voyages to the last Indies. He subsequently became a corsair, or buccaneer, and capatived two of the ships of Cortex, and also a Portuguese ship laden with gold. He was finally taken prisoner in a naval battle by the Biscayens, and banged at Porta la Pico, as some historians relate, while others say he was taken to Madrid and imprisoned.

<sup>-</sup> The San Jose Patriot contains the correspondence between Thomas Gray, of this city, and Thomas Fallon, a black man at San Jose, in reference to the Cincinnati Convention. The colored brudder goes for Grant and Stude to Gray most numerifully. The letter was undoubtedly intended to be confidential. Moral-Don't trust darkies with political secrets; they will blab.

#### Ocean Steamship Subsidies.

A special meeting of the Chamber of Commerce, which was numerously attended, A special meeting of the Chamber of Commerce, which was numerously attended, was held April 3d, at 2 r.M. The meeting was called for the purpose of considering the proposals for subsidies to the steam line to Japan and China, and to Australia and New Zealand. President R. B. Swain called the meeting to order and explained its object. He said it was unnecessary to arge anything on behalf of the Subsidy bills, now before Congress, relating to the China and Australia lines. There was no division of opinion in reference to them. The questions involved had been discussed over and over again, and the interests of San Francisco were unmistakable. W. T. Coleman said that in view of the importance of the subject to mistakable. W. T. Coleman said that in view of the importance of the subject to the trade and commerce of this port, it became the Chamber to diligently act whilst action is necessary. It had been, he said, thought best that the Chamber should again, at this juncture, express its opinion. He then presented the following memorial: The memorial of the Chamber of Commerce of San Francisco to the Congress of the United States respectfully represents: That the increasing claims of commerce in the Pacific Ocean, the opening of more friendly intercourse with the countries bordering thereon, and the larger facilities for the transportation of passengers and freight from this port to the Atlantic seaboard, require the permanent establishment of lines of first-class mail steamers, under more liberal patronage of the Government, from San Francisco to Japan and China, as also to the British Colonies of Anstralia and New Zealand. That the encouragement of these two lines of steamers by Congress, semi-monthly to China and monthly to Australia, is a matter of vital consequence to the people of the United States, inasmuca as it would undoubtedly result in diverting a large portion of the trade and intercourse of those countries, and the productive islands of the Pacific Ocean, from the time-worn routes via the Cape of Good Hope or the Isthmus of Suez, to the American continent. That in the opinion of this Chamber it should be equally the policy of the Government to further intercourse by sea get well as a bullend with leading the collection. policy of the Government to further intercourse by sea as well as by land, and to points of the comment of the transfer merculars of set as we have year, and to grant reasonable subsidies to lines of mail steamers, for the purpose of attracting and securing foreign commerce to our shores, as well as to extend assistance to lines of railroad for the purpose of facilitating and developing internal communication. That it is the earnest prayer of this Chamber that Congress should extend such assistance to the steamers plying between this port and China, as will enable them to secure permanent of a semi-advantages of the trade between the two countries, by the establishment of a semi-advantage of the countries, by the establishment of a semi-advantage of the countries, by the establishment of a semi-advantage of the countries of the steamers plying between this port and Australia and New Zealand as will promote the important and increasing intercourse with those rich and rapidly developing countries. Mr. Sneath moved the adoption of the memorial, and the motion was seconded by Mr. Hopkins. Mr. Coleman said that too many citizens who live inland are apt to think of nothing but the development of the interior. We are poorely represented at sea; our marine has been allowed to dwindle till it has become insignificant. This should not be, and on the Pacific there was a splendid opportunity to make up much of our lost ground. Mr. Fay offered an amendment, referring to the alleged assistance of the Pacific Mail Steamship. Company given to the Central Pacific Railroad Company to obtain Goat Island. The amendment was not seconded, and therefore was not entertained. Mr. Sneath thought it strange that another meeting had been thought requisite in order to enforce that which was so palpably necessary. The trade of the Indies was an important thing. We are now in immediate contact, with the countries named, and it was wise and right that steps should be taken to secure their trade. The memorial was then adopted manimously, and a copy was ordered to be forthwith telegraphed to our representasteamers plying between this port and Australia and New Zealand as will promote unanimously, and a copy was ordered to be forthwith telegraphed to our representa-tives in Congress. Mr. Hopkins then submitted the following resolutions:

Whereas, a bill has been introduced into the United States Senate authorizing the establishment of a regular monthly mail between San Francisco and the island of Tahiti and Marquesus Islands; and whereas, it would greatly increase our comercial interest to have such a line established; and whereas, those islands are known to be rich in spices and other tropical products, which would nearly all come to our port if such a line is established; therefore, be it also come to come to the product of the stablished in the second compared to the seco

Resolved, That our Senators and Representatives in Congress be requested to use all honorable means to procure the passage of said bill, in order that said mail communication may be permanently established.

Resolved, That the President be instructed to forward to each of our Senators and Representatives in Congress a copy of these resolutions.

Mr. Coleman thought that it would be univise to load down the important proposals in reference to Australia and China by tacking on an addition of this sort. He moved the reference of the resolutions to a Committee of three. This motion prevailed, and Messrs, Staples, Hopkins and Coleman were appointed such Committee, with instructions to report at next meeting. The meeting then adjourned.

<sup>—</sup> We regret having given a wrong credit in our last issue: an article entitled "Navigating the Air," from the Sacramento Reporter, March 23d, was credited to the Record, and we take the earliest opportunity to acknowledge the error in our

#### A Voice from the Ranks.

[STANZAS FROM THE "NEW CUT"-BY ONE ON 'EM.]

Ve are corstermongers, Me and Bid, my pardner. I vos. vonce, a horseler, He vos. vonce, a gardner.

And, bein' fond o' natur', Ve has a pair o' barrers: And \ dliam, he sells wegables,

And \ illiam, he sells wegables, And I sells larks and sparrers.

In each we goes a tradin'
O' Sundays, in the "Cut;"
Enjoyin' of ourselves
All in the mud and dut,

(Vich is vy our country's Tryin' to uproot us: If we was idle loafers It wouldn't persecute us.)

It ain't because we likes
The mud particler much,
It's cause we ain't got nothin' else

To do that we doos such.

If we can't trade, what pleasure
Are we poor things to get
When every blessed pub (not
To say hotely is shet?

If everything is shet up, And corstermongers, too, I ask my country what Me and Bill's to do? For we ain't eddicated,
As bankers' clerks and sich is;
Nor hein of that lot
Vich God has blessed vith riches.

I'm told that there's museums— Or something of the sort— Built purposty, that we

May be amused and taught.
Ve'd give up Sunday tradin'
Without dissatisfaction
Por anything vich has

But half as much attraction.

Bill's greens 'ud stand no chance
Agin artistic treasures

Agin artistic treasures, And sparrers wouldn't be nowheres a-Gin intellecthal pleasures.

But they're locked up o' Sundays, For our country seems to think As intellecshal pleasures Is rather wus 'an drink,

Does Guverment expect
We corstermongers may
Edify ourselves
By fightin' all the day?

The fact is this here country's
Much too intelleceshall,
And the means it takes to make us
Is, therefore, ineffectshall.

### Morse.

One of the most remarkable men of this or any age was Samuel F. B. Morse, inventor of the electric telegraph, who died in New York City on the 2d instant, from paralysis of the brain, at the ripe age of eighty-one years. A matter of Charlestown, Massachusetts, born April 27th, 1781, his infancy, manhood and old age were aitke marked. His father, Jededah Grant, was an emitted with a diagnostic marked. His father, Jededah Grant, was an emitted with earlied position, a devoted lover of science. Thus young Morse came into the world into the attent that position in society and such education as placed him in commanding position. He graduated at Yale Gollage in 1810, and the following year saided for England to study pointing. As a painter, his original model of a "Dying Hercing to the United States, he became one of the founders of the National Academy of Design, was elected its first President, which office he held for sixteen years. To complete his art studies, he again wisted Europe in 1820, where he seminined three years. While absent, young Morse was elected Professor of the Literature of the Arts of Design in the University of the City of New York. But he was not fated law to see the held for the professor of the Literature of the law to see the history of the City of New York. But he was not fated to live immortal as an artist, to paint his fancy creations on cancas. His destiny led the professor has a history of the City of New York. But he was not fated to live immortal each of the City of the City of New York. But he was not fated to live immortal each of the City of the City of New York. But he was not fated to live immortal each of the Soul, as the great Persan poet. Firdous, has the phrase in his invocation to his immortal epic. In 1832 Professor Morse made the subject of electro-magnetism a profound study, and in 1835 finished the first recording apparatus—one rade in make and faulty in operation. It was, however, the model when held to perfect in. His plan or system of telegraphy was how to complete d

his efforts with both those highly civilized Governments, and he returned once more, sad in heart, to his native country. In 1842 and 1843 he secured powerful influences at New York, Boston, Philadelphia and Washington, and thus backed, once more appealed to Congress for an appropriation. Although many members of Congress had little or no faith in the scheme, the political threats brought of Congress had fittle or no faith in the scheme, the political threats brought against them if they did not use their influence in granting the appropriation, compelled them to favor the project. The sum of \$30,000 was finally appropriated, and in 1844 the line between Baltimore and Washington was built and proved a complete success. Among the Congressmen who fought bravely for the appropriation, at the risk of losing his personal popularity and political prestage, was our present distinguished fellow-citizen, ex-Senator Wm. M. Gwinn. Through his aid and poweful influence, Professor Morse was largely indebted for the success of the enpoweful influence, Professor Morse was largely indebted for the success of the enterprise. As soon as the line was completed and in splendid working order, scientific men in England, France and Germany claimed the honor of having first invented the electro-magnetic telegraph. There can be no doubt that a great advance had been made in the science. We remember of visiting the celebrated Andrew Cross, in 1832, at Broomfield, West of England, and seeing the chime of electric bells, in his garden, worked by electricity. Mr. Cross, although a magistrate, prided himself on his then great invention. At that time he became widely known, and in the famous work entitled "The Vestiges of Creation," he is spoken of as baying discovered a new, principle of life, through the creation of acaria in the electro-magnetic battery. It is conceded, however, both in Europe and America, that Professor Morse can honorably claim the proud distinction of heing the real originator of the telegraphic system as now in use; his practical genius demonstrated its utility, and his name in connection therewith is imperishable. The history of the electric telegraph since its application has been a household story of the tory of the electric telegraph since its application has been a household story everywhere throughout the earth. Continents are spanned and occars fathomed; nations that only spoke to each other in months, and sometimes in years, are now nations that only spoke to each other in months, and sometimes in years, are now like neighbors in communication every day. The poet dreamt that the earth might be girdled in forty minutes: Morse put the dream into practical execution. But the full force of his magnificent and benificent genius is not expended. Day by day the grand, noble and humanizing work goes on. Europe, Asia, Africa and America are being gradually linked together by the electric wire, and mind acting upon mind, through this marvelous agency, is working out a more glorious mission than any agency that has ever yet pulsated this active, thinking, ceaseless world. There now remains to be solved a problem of no less grandeur that of navigating the air by acrial steamships. A great advancement has already been made in this department of science. California has a steamship Action, which, in the presence of many hundred intelligent scientific mon, traveled they only the circumstance. made in this department of science. California has a steamship Action, which, in the presence of many hundred intelligent scientific men, traveled through the air with as much case as a steamship moves through the ocean. The Aritor will prove an undoubted success. Through it the problem of aerial navigation is solved beyond a matter of doubt. In other States of the Republic, in France, England and other continental countries, earnest and resolute men are deeply engaged in this problem. Its entire fulfillment and practicability is merely a question of time. When it is practically solved, this aerial steamship communication, combined with substantial will lead to a universal hyperactic properties. telegraphy, will lead to a universal language, a universal language to universal ideas, and thus, step by step, the nations of the earth, almost unknown to themselves, will be brought into mutual sympathy, which must one day result in making them as but one loving, universal family.

# Bills Approved Relating to San Francisco.

A great many bills were rushed through the two Houses of the Legislature on the last day of the session. We append a list of those relating to San Francisco, to which the approval of the Governor was given: First—Authorizing the Harbor Commissioners to set apart a portion of the water front for Italian fishermen. Second—Granting certain privileges to the North Beach and Mission Railroad Company. Third—Authorizing Supervisors to make appropriations to improve Mashington Plaza. Fourth—To prevent hunting and shooting on private grounds in San Francisco. Fifth—Authorizing conveyance of lot to Ludies' Protection and Relief Society. Sixth—Authorizing supervisors to provide rooms, lights, etc., for the Third and Ninetcenth District Courts. Seventh—Giving streets, alleys, market places and basins in Mission Bay to the city. Eighth—Changing time of holding municipal elections in San Francisco. Ninth—Amendment to Justices' Court have Tenth—For support of common schools of San Francisco. Eleventh—For the comery Avenue. Thirteenth—To repeal Laguna Survey Act. Fourteenth—Supplemental to Act for opening Market Street. Fifteenth—Amending Act authorizing Supervisors to grant wharf franchises. Sixteenth—Concerning the office of Sheriff, Seventeenth—For repair and improvement of roads. Eighteenth—Conferring further power on Supervisors. Nineteenth—Supplemental to Industrial School Act, placing institution under management of Board of Supervisors. Twentieth—For repair and improvement of south of the proposes.

<sup>-</sup> In the redwoods near the Tamalpais Hotel, in Marin County, some very large trees have been discovered, one of the group being over seventy feet in girth.

## Is it Will or Destiny?

Whatever may be said of the relative merits of systems of Government, history teaches that controlling minds shape their destinies. This holds good whether tory teaches that controlling minds shape their destinies. This holds good whether applied to great and powerful nations or small communities. The three handred millions of souls comprising the Chinese Empire are moved and impelsed by the ideas of Confucius, the millions of Hindostan and kindred peoples are controlled by the doctrines of Gorama; Mohammed, undoubtedly the greatest resisions teacher all things considered—that ever existed, sways the vest populations inhabiting Exppt, Tarkey, Persia and other countries; Jesus Christ has his millions of followers, who bow in blind adoration to his Divinity, and thus the past illustrates the overpowering and all controlling inducence of the offenant power over the masses. In a political sense the power is no less marked and striking. Peter the Great haid the foundations of the policy of Russia, which has made that the the masses. In a political sense the power is no less marked and striking. Peter the Great laid the foundations of the policy of Russia, which has made that nation one of the greatest powers of the age: Frederick the Great enanciated principles and policies by which he believed Prussia was destined to absorb ad German nationalities, and through this end conquer France and become, in the time, the holder of the balance of power in Europe—a consummation almost achieved. Napoleon the Great destroyed the fendal system, which was the curse of France, and laid—own the dogma that every Franchman was the legitimate and lawful owner of a portion of the French soil, and under him France ruled Europe. In England, Pit and Chutham so shaped the policy of the nation that England's greatness in the past and to this day is the result of their controlling mands. Cavour and Mazzini in Itary sowed the seeds of thought by which the most powerful eccessastical tyranny in Christendom was overthrown. In the United States, Thomas Jefferson, in that most sacred of books, the becharation of Independence, case burther opiniciples which has placed the American Republic among the greatest nations of son, in that most sacred of books, the Declaration of Independence, case borthsto principles which has placed the American Republic among the greatest mations of the carth. If we study this question in its less extended reations we find that the individual thinker is no less arbiter of the destances of the erroles wherein his power is felt. Garrison, Summer and Wendell Phit-laps have controlled what is called "the Yankee element" of the nation with a despotic power for over half a century. Jackson was no less despotic in controlled; but the democrate masses of the nation; the bold and imperious leader of the Southern Democracy was master of the situation while he lived. Let us enter the word of finance, commerce and and trade, and we have this one-finan power felt and as knowledged everywhere as the controlling power. The Rothschieds are the financial masters of Europe; the Lloyds control the vast shipping interests of the great nation which is mistress of the seas; in the United States the Astors and Vanderbids are the great financial and commercial powers. In the every day affairs of life this one-man-power is no less positive. A breath has searcely passed since Fisk convulsed our financial market; A. T. Stewart controls the drygoods trade of New York, and his induence is felt in every city of the Republic and in every hambet where cotton is worn. If is felt in every city of the Republic and in every hamlet where cotton is worn. we arrive at our own doors and mour midst, we find this same all-pervading power of one mid controlling the masses and slaping their destinies. In finances Balston is master: in commerce a few minds shape our entire trade, in ran-roads Stanford's great head and heart controls the press and people. In every case mentioned the grand figures stand out in bold relact among the masses of humanity like those colossal mountains and mighty rivers which tower in grandent among the smaller hids and streams. No sophistry or argument can overcome these granife Whether we like it or not we must concur that contro bing minds ,end and master us. It merely remains to be solved whether this tremendous power of individual minds over the masses is the result of will or the all-conquering force of

## The Republican Party.

The political condition of the Republican party is not dissimilar to that of the Democracy when the spit occurred between Van Buren and Cass. General Cass was the regular nominee. The Buildo Convention placed in nomination Martin Van Buren and Benjamin F. Bullet, of New York. The result was the defeat of the Democracy. The disaffection in the Republican party to-day is well pronunced and wides-spread, lead by the earliest and most devoted of its party leaders numbering Senator Summer, Horace Greeky, Judge Trumbull, Carl Schurz, the Tribinos, the Springsted Republican, and other prominent and leading men and journals. The Convention at Cincinnsti will be composed of bold men, and we shall look to their action as one of great importance to the country. The Philadelphia Convention of packed office-holders will renominate General Grant without Gold, as it is pronounced treason to the party to hold any other opinion. rminacepina Convenior of packet once-noners will renormate centeral Grant without doubt, as it is pronounced treason to the party to hold any other opinion. Nearly every State will be represented at Cinemanti, and should it place before the people names acceptable to liberal Republicans and not objectionable to the the produce manifest acceptance to need a representation and not objectionable to the Democracy, it will make the election of General Grant very doubtful. A movement is on foot in this city to send delegates to Chichand, and we didected in the term of the no opposition made at the primaries to oppose the office-holders in sending Grant men to Philadelphia.

<sup>—</sup> We regret exceedingly to announce the death of James Bell, in London, March 30th, the worthy founder of the highly respectable house of Falkner, Bell & Co., of this city.

### Nobody's Daughter.

Little and pallid, and poor and sby,
With a downcast look in her soft gray eye;
No scornful toss of her queenly head,
But a drooping bend of the neck instead;
No ringing laugh, and no dancing feet,
No subtle wiles and abandon sweet,
No jewels costly, no garments fine—
She is Nobody's Darling—but mine!

No 'Dolly Varden' coquettish airs;
No high-heeled boots to throw her down-stairs;
No yachting jacket and nautical style,
With a sailor's hat that she calls her 'tile.'
But 'Lady' is stamped on her quiet brow;
And she crept in my heart I can't tell how;
Not made to dazzle—nor born to shine—
Nobody's—pobody's Durling—but mine!

No sancy ravishing girlish grace,
But a settled calm on the sweet pale face;
No sparkling chatter and repartee;
Very silent and still is she.
White and still is my pearl of pearls,
Yet to me she seemeth the queen of girls;
Why I love her I can't define,
For she's Nobody's—nobody's Darling—but mine!

There is a large family of hints—the respectable branch we will let pass undefiled—that with which we are best acquainted, and which shall come under the withering blight of our anathema and marantha is of the class femime problidens; species, infernal; variety—well, you know how it is yourself. The driven such hints must have been born of a slave, who dared not ask, demand, or explain—who had leaten the bread of hitterness and dependence till all idea of the majosty of straightforwardness was dead within him—who had licked the hands of a master till decency was extinct, then crawling on his helly, abjectly mouthing the dust, he conceived the monstrosity of a hint; and like all mean things of the earth, it has propagated until it has well nigh crowded out frankness and sincerity. A free born soul could never indulge in so low a subterfuge for the accomplishment of ends. Akin to these hints are anonymous letters. They both spring from the dastardly resolve to strike a coward blow upon a helpiess creature, who knows not how nor where to return it. The craven soul who figures in the role of the one, leans kindly to the other. A hint is the wordy boomerang of a bloodthirsty, but imbecile subserver to the things of time, and is an especial feminine weapon. It is only in such gentle hands that it reaches its perfection of finish, and in the fair society of our household angels is most carefully nurtured this most diabolical of social atrocities. Show us a woman who, smiling maleiously, remarks: "He took the hint," or "She took the hint," on what who will read the massacre of St. Bartholomew as a pastime, and who sees beauty and wisdom in the removal of little children from this earth. It may be said that when will read the massacre of St. Bartholomew as a pastime, and who sees beauty and wisdom in the removal of little children from this earth. It may be said that when unto your unwilling spirit is proffered this form of a diluted insult, that the doner has an eye to the prescruation of your reflects the melting head

Presentation.—We are much pleased to note that in the Senate, on the closing day of the late session, an elegant silver set was presented to the President proten., the Hon. T. H. Farley; a gold watch to the Secretary, Senator Bob Ferrell; and a cane to the Sergeant-at-Arms, Mr. J. M. Hawkins.

## Eastern and Foreign Dottings.

Cincinnati, at the city election, March 28th, went Democratic by 2,000 majority.

Last year there was a Republican majority of 1,500, and the year before of nearly 3,000. Disgust with the Republican management of city affairs has caused the sudden change, and it is also interpreted as a rebuke to the Washington administration.—Professor More, inventor of the belgraph, died at New York, at 7:30 P. M., April 28, aged 81 years. The cause of his death was paralysis of the brain.— Report says the Mexicans are spreading false news about the capture of General Rocha, to counteract the the influence of Rocha's victory at Zacateess — General Rocha, to countered the the influence of Rocha's victory at Zacatecas.—General Sherman was at Cairo Ezypt, a few days ago, and treated with marked countersy by the Khedive. He is now on his way to visit the Sudan at Constantinople.—It is alleged by the New York Herote that during Andrew Johnson's administration there were frauds in collecting the revenue on tobacco amounting to \$160,000,000 in the city of New York.—Thiers gives up the project to remove the French capital from Versailes to Paris. Austria will soon withdraw her Minister from the Papal Court.—Artesian wells in Los Angeles county have been seriously adjected by the Inyo county carthquake. Some of them have stopped entirely.

The French Assembly has adjourned to April 22d.—In the House Sargent presented a position of 4 600 teathforware in favore of female sufface. At 12 M. April 22d.—In the House Sargent presented a position of 4 600 teathforware in favore of female sufface. At 12 M. April 22d.—In the House Sargent presented in optimizer of female sufface. At 12 M. April 22d.—In the House Sargent presented in optimizer of female sufface. sented a petition of 4,000 California in favor of female suffage. At 12 M. April 1st, the nineteenth session of the California Legislature was adjourned stor die. is, the innetectule session of the California Legislature was adjourned sing the, having expired by limitation.—The Indian appropriation bid cake for \$5.56,000, of which the branches of the Sionx obtain a large share.—Indexes Bernard and Cardozo, at various times, released over 200 of the worst crimmals in Blackwell's Lisland.—A deadlock exists between the United States and Engannion the question of submitting the claims for consequential damages to the Genexa Conference—Type Language and Ingrangiand question of summang the chains for consequential damages to the Genesal Conference. — Two handred and twenty-five thousand dollars will be appropriated this year for the United States Storm Signal Service. Last year the appropriation was \$160,000. — In the United States Senate, Slater's bill passed April the granting was giranou.—In the United States Senate, Suiter's bitt passed April in Jenning the right of way through the public hands for a Railroad from Great Sail Lake City to Portland, Oregon.—Holland celebrated the third contembal anniversary of her independence. The Hollanders, like the Americans, dat the independence of their country from the beginning of the war that achieved it, and not from the actual establishment of the civil government, which happened, not in April, 15rd, but in July, 1581.—The forty-second annual Conference of the Mormon Church and Conference of the Mormon Church commences at Salt Lake City, to-day. - Marshal McMahon testified recently that commences at Salt Lake Caty, to-day. — Marsha! McMafion testified recently that after the Germans had broken through the French lines and severed the Grand Army the march to Sedan was against his wishes. This testimony causes great excetement. — Dana, of the New York soon has been acrested on a craminal charge of libeling parties in the State of Pennsylvania about the Evans frauds. — The present Governor-General of Canada is soon to be received and Earl Duffaron, now chancellor of the Duchy of Lancaster, is to succeed him. — A riot occurred at Gaszow, caused by Bradhaugh, member of Pardament, declaring that as Parlament cave the crown to William and Mary, of Orange, by its right to do so, it certainly had the right to take the crown away and establish a Republican Government. For this the speaker was stoned. — A Convention has been a med at London. April 3d. this the speaker was stoned.—A Convention has been signed at London, April 3d, by the Maintenance Construction Company, of Great Britain with the Government of Portugal to lay a cable from Lisbon to Brazil via Maderia and Cape de Verde or rotters to a came to make the state of th not responsible for many of the mulitary disasters in France.

## Udolpho Wolfe's Schiedam Schnapps, as a Medicine and Beverage.

As a general beverage, a necessary corrector of water, rendered impure by vegetable decomposition or other causes, as Limestone, Sulphate of Copper, etc., Aromate Schredam Schnapps is superior to every other alcohole preparation. It purity and exemption from all grossy intoxicating properties, combined with its mildly stimulating and invigorating elements, establish it as the only alcoholic because in our country that can be imbited with pleasure and safety. The nervous torpor and debil by which follow the administrations of other alcoholic preparations and mixtures of the day, succeeded by their intense and paintal nervous reactions, are unknown as the subsequent effects of the Schiedam Schnapps, even when taken so freely, while as a Stomachic, a Tonic Appetizer, it stands prefimment among the established curatives of the day. A public trial of twenty years' diraction, in every section of our country, of the Schiedam Aromatic Schnapps; its production, in every section of our country, of the Schiedam Aromatic Schnapps; its diraction, in every section of our country, of the Schiedam Aromatic Schnapps; its diraction, in every section of our country, of the Schiedam Aromatic Schnapps; its diraction, in every section of our country, of the Schiedam Aromatic Schnapps; its diraction is distribution, have insured for it the reputation of purty and salubrity claimed for it by the proprietor on its original introduction to the public.

PLATT & Newton, Sole Agents for the Pacific Coast.

Orient Mining Company, In a letter of March 28th to the Secretary of this mine, Superintendent Coburn says that the mine develops fixely much better than he expected and that he will be able in a short time to take out ore enough to pay all expenses of developing the same.

## Leaves From a Lady's Diary.

MARCH 30 .- Almost everybody declares that he or she felt the earthquake, and they who did not, say that they felt very strange before going to bed, and had an uneasy, disturbed night. Is it possible that animals have premonitions of carthquakes, or is it that they are more nervously sensible than man? At all events, many well authenticated narratives of birds and beasts showing signs of fear and many werranthenticated narrarives of brids and beasts showing signs of tear and distress before such an event, do actually exist. Igwish that it were ordained that every year one human being on the earth should be immortal. At that rate we should only have 1,872 since the commencement of the Christian era, but what a history theirs would be! Fancy a meeting of three or four of the oldest among them. We laugh at the Pioncers and their babble of memories, but these could result of the order to accomplisher that the production of the order to accomplisher that the order to accomplisher that the production of the order to accomplisher the order to accomplish the order to accomplisher that the production of the order to accomplisher the order to accomplisher the order to accomplisher the order to accomplisher that the production of the order to accomplisher the order to accomplisher the order to accomplisher the order to accomplisher that the order to accomplisher the order to accomplisher the order to accomplisher the order to accomplisher the order to a them. We ladge at the Fromers and their banne of the face of the certh. And, again, how queer to think that one might read in the papers: "Of 1772 only three people are now living." What strange thoughts each must have, and how it may

people are now living." What strange thoughts each must have, and how it may enter into the mind of one to kill the two others and inherit immortality. Also, at the birth of a child, the parents may say: It may win the prize—if life forever be a prize. How stupid of me to go on dreaming in this way!

April 1.—Went to see Louisa B— to-day, and found her in tears. Upon a piece of black velvet on her boudoir table lay a long white hair. Her maid had found it while dressing her. She was au desespoir. "Not twenty-five," cried she, "and already growing old. Do look, dear, and see if you can find any more. I have been looking all the morning, and can't see any, but I notice that wrinkles are beginning to show themselves on my face." I tried to laugh her out of her fancy, said that one gray hair was nothing, but in vain; so I left her with her mortified vanity. When I got home I looked in the glass, and really did see faint lines at the corner of my eyes, incipient crows' feet, and I got sad, and thought that after all Louise had reason to ween.

that after all Louise had reason to weep.

that after all Louise had reason to weep.

APRIL 2.—As I was passing by a money-changer's to-day, I thought of the several uses that most people put the various coins to. There is the half dollar for household bills, the quarter for small shopping, the dime to pay where a bit is demanded, and the half dime for charity. The first for our daily bread, the second for our petty gratifications, the third for economy, and the fourth for our duty to our neighbor. Mrs. R.— sent me a great basket of cut flowers, both from the conservatory and from the garden. I like them that way, so that I can arrange them myself. Nothing makes me more angry than to see the bonquet makers impaling camelias on wires, and mending broken limbs of flowers with rushes and thread; as other the due lody as she sticks the bonquet in her hospon, little image. thread; so that the fine hdy, as she sticks the bouquet in her bosom, little imagines what coarse, hot, dirly hands have arranged these flowers into an artificial sprightliness, and twined the beauty of nature with a falsehood.

#### Buggies.

The buggy is purely an American institution. There is something like it in England called a gig (emblem of respectability, according to Carlyle); in France it is a cubriotet—the ambition of the homest bourgeois is to possess one; in Germany it becomes an einspanner, and in Russia a drotoschka. Our business is with the San Francisco buggy. Not the fast two-horse arrangement that cometh forth like a bridegroom out of a fashionable livery stable, and dashes along the Chiff House road with a pair of melancholy looking individuals scated therein who converse not, but whose only object in life is to look between the horse's cars, and drive like Jehu, the son of Jehosophat. No, our remarks apply to the buggy of commerce, whereof every branch has its idiosyncracy. There is the merchant s buggy which daily stands at the counting-house door. It is quiet and unpretending, and the horse, without being showy, is well bred. The head of the house trots him gently along as becometh the respectability of the chief of the Co., but when you see it ratting down to the wharf at a "two-forty," be sure that it is one of the young gentlemen frightening the very life out of the skipper who would rather be in a gale of wind off a lee shore than bump that way over the cobble stones. The produce merchants drive showy fast horses with seedly buggies, and their great delight is to get down to friedlander's warehouse half a minute before the other England called a gig (emblem of respectability, according to Carlyle); in France it produce merchants drive showy last horses with seedy buggies, and their great delight is to get down to Friedlander's warehouse half a minute before the other grain man. Their victim, the farmer, comes into town in a Concord wagon, which is generally up to the hubs in dry mud of at least four months' date; the horse is sound, slow, budly groomed and evidently accustomed to family work. The merchandise broker is particular; his buggy is nicely painted and kept, a comfortable canadise broker is particular; his longly is nicely painted and kept, a combotable robe for his knees, and for those-who mistrust the watting patience of their steeds, the strap to tie them up to the post is carefully arranged. As a general rule, the wool broker's buggy has, like its occupant, a depressed appearance. There is a shorn look about the whole institution: the horse droops, the unpainted wheels move dreavily, and as the buggies lean up against the Wool Exchange, they look as if they had been left for sale, and no buyers. The doctor's buggy has much changed of late. In old times one horse sufficed, to-day no man can aspire to practice unless he drives a pair. Still, especially among the foreign medicos, one horse drags them along their daily round. Their buggies are chiefly remarkable for the trades each atong enert dary round. Their buggles are three properties from his driver, who looks as if he were flying a kite with two strings. The undertakers -but that's not fair after the doctors—suffice it to say that Gray's is like the white horse of the Revelations.

### Postscriptum.

[Appreciative of the Chronicle's "City Lyrist's" Poetic Morceaux.]

Lepidum caput '. TERENCE.
Thou rhyme-ridden victim to Lyric inflation,

Thou Tryme-ruden vicini to Lyraic innation,
For Pherbus' sake, bardling, vouchsafe a cessation:
That last "lay" confirms thee of Danwin's pet race—
The higher thou climbest, the plainer thy—face.
O Stycin Claron, respect our combine.

O Stygian Charon, respect our opinion.
And ferry you variet to Put to's dominion!

SELAH.

### Professor Morse and Popular Prejudice.

The history of Professor Morse is the story of inventive genius struggling against ignorance and projudice. It is a story as old as Prometheus who was purished for drawing fire from heaven; it is a story as old as Prometheus who was purished for drawing fire trom heaven; it is a story that will continue to be told as song as incredulity and skepticism predomenate in man's nature. Morse was more than fifty years old before he could obtain a grant to construct a telegraph line, even impostor. He was not to be put down, and finally obtained a grant, which was yielded more to importunity than given from conviction of the success and importance of his application of electricity to tran-mission of thought. Lat he did succeed; he did triumphantly prove its importance, and then the scotlers fell down and worshped him; cowned heads honored him; nations subscribed a fortune for him, and at the age of four score years he saw the earth covered and the beds of the great oceans traversed with a net-work of lines of the electric relegraph. May we not apply this to the present day as respects the Avitor. Many of us, without in the least understanding the matter, or without having given the subject of acid navigation the sightest study, declare off-hand that the their is importantly enforming without an effort. It is as much as to say that because the sun shines by natural causes, it is impossible to light a room by gas or candles. Indeed, the invention of gas was scoffed at, inst as Morse was scofled at, and the same weak minds that rediculed these, shake their heads to-day when it is proposed to mavigate the air in the like way that ships sail on the corem. It was a vise man who said in this day, when invention treads on the heal of invention, that he dared no longer doubt anything. The German philosophers draw a wide line of distinction between the Reason and the Understanding, and it is the former that so often leads us astray. We reason by amilogys, so that our understanding becomes dun, and in our narrow-mindedness or out

### The Next Triumph of Inventive Science.

Professor Morse is dead—passing away eipe in years and full of honors. Within our memory he was the inventor of a great idea the electric telegraph. Ignorance econted the possibility of his success. He asked Congress for aid. He demonstrated his invention. The Government aided him, and the telegraphic wire to-day sends its inteligent communications beneath the sea, around the world; the lightnings are harnessed to bear swift messages. Another invention, not less movel, not less inpost less important, not less probable of success, to-day, in California, awaits a few pairty thousands of dollars to demonstrate the practicability of invariant the same and its air-akip, asked money from the Legislature to enable himser and has associates to construct a arger ship. We have no complaint to make of our treatment by legislators. We were too late in the session, and only laired for want of time to explain the principles of our great invention. We shall renew our efforts for private assistance, and San Francisco, in spate of the indifference of her wealthy men, shall have the clory of being the bearer of this hest and greatest progressive scientific fact. We have already made our model ship mount to its are evention and navigate space, obedient to helm and rudder, breast the winds and return to its starting point. In a larger vessel, constanted on the same model, we can make

It is shown by a recent statement of the Treasury Department that the receipts of the Government for this year will be \$255,000,000; expenditures (including interest) \$230,500,000, believe to be a considered by the construction of the constructio

#### Careful Cogia.

Wherefore, oh my son, dost thou disturb me when I fain would slumber? Fearest thou that I shall never awake to discover to thee the treasure for which thou longest, or fearest thou that a peaceful forty winks may restore me to life? E.ther longest, or learned that has a peacetth rorty whites may restore the other. Each at way, thy discretion does credit to the training of thy father, and I am pleased, abeit the water thou hast thrown over me is cold. I feel I am not long for this world, wherefore hearken unto my words, which shall teach thee how thou shalt

find many sequins, and how to keep them:

find many sequins, and how to keep them:
"Always select a fool to be thy master; for such will find you a good servant.
There he, besides, several reasons why thou shouldst be careful in this regard, and
select none but a fool to serve under. Thou art laws, oh my joy; wherefore none but a
fool will keep thee. Thou art careless; and only a fool will think thee good for
anything. It is justly said that a fool and his money are soon parted; so the
the better for the fool's servant, for does not he who first shakes the free got the most dates?

"If a man findeth his couch not soft to his back, he riseth and beateth it with much punches; whereof beware my son, and be as yielding down to thy master's

will.
"Be discreet in thy choice of friends; and be not as thy brother Jac is, who one day is treated, but the next bath to stand treat. As with thy master, so with thy friends; select fools before all others.

"Let thy friends be beneath thee rather than above; for it is those above us we praise, those we fear we speak well of, and those whose favor we seek we treat.

Be not scrupnions that thy friends be clever (for out of such can nothing but cleveness begot); not honorable (for honor is the stumbling-block to prosperity);

nor pleasant-pleasantness fosters credulity, indulgence, love, and other vices.

"In all things, be to thy friend as the worm is to the carrot, "Be not eager to fight. If thy foe kiss thy sweetheart, and pull thy nose, smite him not before nor behind, lest thou in thy turn be smitten. Remember it is less

nm not before nor behind, lest thou in thy turn be smitten. Rememor it is less easy for thee to recover a black eye than damages in a civil court.

"What availeth angry words? Will they afflict thine enemy so much as a window broken in the night, or the poisoning of his favorite eat?

"Be not cuvious, my young Cogia. If thou seest thy brother's basket filled with abundant glass, why waste thy time in soul-tormenting reflections that be is richer than thou art, when a dexterous kick with thy toe will render him as poor

as thou?

"Be prudent and circumspect in thy choice of wives. Getting wives my son,
is like unto catching flies; ensuared by a lustrous wing, thou snatchest hastily at the insect, and flatterest thyself thou holdest in thine hand a lovely moth of price-

less value, until to the cost thou findest the creature hath a sting in its tail.

"Seek not for beauty; for beauty quickly finded, like the petals from the poppy, and leave only a poisonous head behind. Beauty is deceptive; like the ray of smilight that tempts the unwary for to go forth without his umbrella. A lovely of sanight that femples the daway for to go form without its anothers. A fovely woman hath nothing but her beauty for a dowry, and requireth much veils and millinery. Beauty marries either for money or for love. My son, thou art as poor as an untertaker in Paradise, and as ugly as thy mother; therefore is it likely thou wilt safely avoid the evil of marrying a pretty wife? Choose rather an ugly wife; for ill-looks diminish not, but rather increase and multiply. If thou delightest over one wrinkle in thy young bride, how gratified must you be a year after to rejoice over fifty! As the prudent are tew, so are ugly maidens plentiful; whereby thou shalt have little difficulty in obtaining a wife after thine own heart. An ugly thou shart have nittle difficulty in obtaining a wife after time own heart. An ugly bride hath a treasure to her down; for without such will no man take her out of the house of her father. If thou beatests pretty wife, men will side with her against thee, and carry thee before the Cadi, who indeed will have no pity on thee; but if thou whackest an ugly wife, people shall laugh, and the Cadi say—'s sarve her right.' Yet even in your choice of ugly wives be circumspect, and profit of the tale I will tell thee of a rich nerethant of Bugdad and the artful Cadjá of Bassora." Here the old Cogia reclined on his cushion and dozed off, and the young Cogia having already done so, the pair slept, the time for going to press came, old man's story is unavoidably held overfill next week.—From that with "insect" the London Hornet.

#### Chinese Arithmetic.

A correspondent of the London Athenarm says the Chinese have a most ingenious method of reckoning by the aid of the fingers, performing all the operations of addition, subtraction, multiplication and division, with numbers from one up to a hundred thousand. Every finger of the left hand represents nine figures, as follows: The little finger represents units, the ring finger tens, the middle finger hundreds, the tore finger thousands, the thumb tens of thousands. When the three nundreds, the fore inger thousands, the humb tens of thousands. When the three joints of each finger are touched from the palm toward the tip they count one, two and three of each of the denominations as above named. Four, five and six are counted on the back of the finger joints in the same way; seven, eight and nine are counted on the right side of the joints from the palm to the tip. The fore finger of the right hand is used as the pointer. Thus, 1,234 would be indicated by first touchies the interest of the first force forces and the back of the first the width is the problem. the right hand is used as the pointer. Thus, 1,234 would be marched by hist louding the joint of the fore fuger; next the hand on the inside; next the middle joint of the middle finger on the inside; next the end joint of the ring fuger on the inside, and intally the joint of the little finger next the hand on the outside. The reader will be able to make further examples for himself. The writer alluded to asserts that the correctness of Chinese computation thus performed is proverbial.

#### Wayside Gushings.

RY MRS. HARRIS.

DEAR News LETTER. Last Sunday were a werry fine day, And I woke out of sleep so unkimmunly gay That I said to young Sayrah, who was fixin' my 'air, 'Six days' caven as hordered to be given to care, But the sexenth is dewoted to headyfication, Vich means goin' out on a day's recreation. Vot a blessin' is Sunday ven the sky is serene, And van's conshans is clear and van's linen is clean! And this constants is clear and this since is clear. Now where shall we go to, so as to combine Improvement with pleasure, since the day is so fine?" Says Sayarh, or face breakin out into smiles. "Please, Mem, I've long vished for to see the animiles At Woodward's, whose Gardings, likeways 'is Museum, Continuish streeties. I'm heaviour to see 'om'."

At woodwards, whose Gardings, likeways is addeductional to the rare critters I'm hanxious to see 'em."

Speakin' thus, Sawath put 'er two arms round my waist in a coaxin' like posture. I was glad to see a taste For nat'ra 'istory in a gal of 'er years, and I knew if refused, she would bust into lears. So packin' up an 'amper with some Guinness's stout As I allus takes vith me venever I goes out
And likeways 'am sandvidges to est on the vay
We set off after vishing Ah Sam a good day.

That young crittur's raptur in the Gardings were a sight As filled my varm 'art with the hutmost delight. I shook 'ands werry cordial with the man at the door, As I allus do with parties as I've never seen before, And says I, "Mr. Handrews, vich I 'ear that's your name, Vich my own is Mrs. 'Arris, and I vish you the same, My maid's heddication 'ave not bin complete
In the study of Natur', so to give 'er a treat,
I've brought 'er to the Gardings, and I'd take it werry kind If you'd show us the animiles, for presence of mind Ain't nat'ral in females, and the gal is that narvous She'll be scared if a keeper ain't there to preserve us." In the 'andsomest manner he offered 'is arm And begged Sayah or bagitated feelins to calm, For, says he, "All our beasts 'ave 'ad a good heddication And bin reared in the buzzum of Christian civilization. They recognize ladies like you ven they sees 'em, And wont hoffer no houtrage except ven you teaze 'em."

'Ere he showed us a peacock vith a tail of sich size As caused Sayrah to hutter a cry of suprise: "La, Missus, I wish as they'd give 'lm to me,
for sich helegant feathers I never did see."
"Though so lovely," says Handrews, "that bird is a tearer
As breaks glass vith 'is beak." "You 'ear that," says I, "Sayrah?"
For that gal 'aye a 'abit the same as the bird's, Vich indoosed me to call 'er attention to 'is vords.
We next saw a rooster vith a 'orn on 'is 'ed,
Vich in fightin' would kill any other bird dead. In the Museum were woodpeckers, finches, and howls, Heagles, wulturs, and every species of fowls, Likeways spoonbills with feathers the color of roses, And flamingoes with werry long legs and look moses.
And Sayrah says, "Missus, sin't they all werry nice?
And oh! ain't they 'evunly, them birds of Paradise!"
We then came to a fish with a beak like a how!, And green eyes as looked at us vith an 'orrible scowl, The fox-shark and sea-wolf are curious creeturs, Combinin' fish nature vith animiles' feeturs, But the 'orridest monster as ever I see'd, oh, Were that wenomous fish as they call a torpedo, To kill other fishes by shockin' their nerves.

Ere Handrews huntrodoosed us to a cinnamon bear As died of takin' pison, preserved with great care,
And a leopardess as was born 'ere, and if I'd bin 'er nuss
She might not 'ave died of 'er confinement or wuss. The cynocephalus monkey or Arabian baboon 'As the look of a politician and will be vun werry soon Ven the suffrage is extended to these sensible craters As is much more progressive than our present legislators. Them young halligators wriggles their figgers as well

And as graceful as any Montgomery street belle And the camels 'as eyes far more gentle and pleadin'. Than 'alf the young vimmen that boast of good breedin'. I respected the donkey hupsettin' the boys As is now-a-days a noosance for himperence and noise; And I fell quite in love with that hamisble seal Vich 'is name it is Commodore—who at every meal Will come to 'is keeper at the call of 'is name And I only vish Sayrah vould himitate the same. That Mexican pig, too, though by natur' an 'og, Follered Handrews about like a Noofuniand dog. But what charmed me most and brought tears to my eyes Were them mandarin ducks, for ven vun of 'em dies They don't marry agin, like vidders as is jolly, But vears avay vith veepin' and dies of meiancolly. I was hangry vith Sayrah because she did laugh At the 'oss with two tails and the five-legged calf, Likeways at the sheep as 'ad three legs o' multon.—'Twere unfeelin', but, says she, "they don't mind it a button."

"'Ow mysterious," says I, "is the ways of Providence, As makes hup for halflictions by givin' 'em sense To bear sich misfortun' with Christian resignation, Though looked down on by animiles of a different persuasion!"

But vile tellin' Sayrah as she were a silly 'un A bell rang and the crowd urried toward the Pavilion. I were werry much 'arrissed in mind by the loss Of my basket, but cries Sayrah, 'My kingdom for an 'oss!' As Shakspar 'ave said,'' and clapped 'er 'ands at the osses, For fresh hobjects vith gals soon hobliterates losses. But ven them two young vimmen stood on the man's 'ed I pitied 'im and, says I, "'they is werry ill bred For though Man is a crittur of lower hunderstandin' Than Voman, 'it's no reason for two of 'om a standin' On 'is 'ed both at wunst.'' But my 'art gavea roll Ven I saw the poor feller atop of a pole "Whirlin' round on 'is stummick and did haudibly say "He'll be picked.hup a corpse should 'is stummick give way!"

'Twere now time to go 'ome, but we mean to go again, And long will the raptur' of Woodward's remain, For 'tis only sich 'aughtycultooral heddication As will helevate man and make tame animiles of the nation.

Two stock brokers, who for this occasion we will call Brown and Robinson, though their real names are—but that deesn't matter—were sitting in the rooms of the former. It was five in the afternoon, the Board was out, the corner still held its grip, and Brown could not fill his shorts. Robinson was moodly smoking a pipe, and endeavoring to read the future in the wreaths of smoke. "It goes to my heart to part with these things," said the owner of the apartment. "That library desk contains all my family and private letters, and has inclosed my most secret correspondence for years. That little hearthrug, on which, permit me to observe, you just expectorated, was worked for me, at least the border was, by the pretitest bittle grif you ever saw; she ran away with a nigger minstrel afterwards. That arm-chair has been my comfort many an evening when I came home tired or tight. That book-case was given to me by Read, and every one of those handsomely bound books that you see in it has its history, possesses a memory for me. Those engravings in their spiendid frames that adorn my walls, they must all go. I've been to Spear, and the will advertise them to be sold at auction to-morrow, and yet I would give ten thousand dollars rather than part with them; that blasted excelsior I wish ——The rest of the sentence was stopped by the entrance of a telegraph boy. Brown tears open the dispatch. "By Jove, Bobsson, they've come upon a large body of rich ore in the Ojibbeway. I shall clear a hundred thousand at least." "The solelighted, old fellow, for now you will save your traps." "What traps." "What traps." "The solelighted, old fellow, for now you will save your traps." "What riaps!" "What this furniture and things that you value so much." "Dann the old rubbish!" "Well, you soon forget your regret." "My dear fellow, when oue is rich one has no regret, no sad remembrances. I live now for the future, and have nothing to do with the past."

— The perspicacious dramatic critic of the Call expresses his enthusiastic admiration of the water in the fountain scene of the new play at the "California." He pronounces the effect "splendid," and the "illusion" so perfect that most people would think it "real water." Those who are aware of the fact that it is real water, and that the actors have to take especial exre in approaching the fountain to prevent their costumes from being damaged by the spray, will think that the Call's dramatic critic is an ass. But as that has long been the opinion of the reading public, this new piece of evidence will happily involve no distressing change of mind.

#### Court Chat.

The Prince and Princess of Wales are on their way to Cannes, and intend visiting Rome to meet the King of Dennark. The Pope, by the way, if he has had as many opinions about remaining in Rome as the telegrams report, must be absolutely in his second childhood. The latest intimation is that His Holiness, intends to stop. It is exceedingly improbable that he would find a more peacefu, home anywhere except, as an exile, in British dominions; and we have the assurance of ministers that he has not been invited and is not likely to be. The Prince of Wales was cordially entertained at Paris, and was unintentionally a header of political strife, though it will not be said that he went out of his way to interfere with French politics. It appears that in the memory of the oldest deputy there has never been such a scene in the Freuch Assembly as on Monday, March 11th. The censure of two deputies for newspaper comments on the character of the Assembly was under discussion. The Right had moved an "annesty of contempt:" the two transgressing deputies refused to listen to it for a moment. One trade to mount the Tribune, the Right should him away: the Tribune was then stormed by a number of deputies, the Left all the time standing and shouting among themselves. Being in a minority and divided, they attacked one another as well as the Right. The President appealed in vain: the Assembly was broken into knots of raving men, and the excitement was indescribable, when suddenly open glasses are employed, deputies creep out of the House as of ashamed of themselves, and the hubbub rapidly subsides. The Prince of Wales has entered the House, and the effect appears to bear analogy to nothing so much as the sudden appearance of the village dominie upon an uppractions seene in his school.

There is now on view at Messrs, Simpson & Co's, Regent street, London, an interesting collection of perhaps the greatest number of decorations which in modern times have been awerded to any individual for purely scientificatta numents. They are the stars, crosses, orders, and other emblems of distinction presented to the late Sir Roderick Marchison by the various sovereigns of Lerope who described to mark their sense of his eminent services as a geologist and geographer, commencing with the superb cross of St. Ann of Russin, with its loop of brilbants. The collection ends with the Polar Star of Sweden. In the center of the group is the familiar silver medal with three clasps which the late baronet received for services in the Pennsenla, and which he prized more than any of his other decorations, even including the Order of the Bath. The clasps on the medal record the testics of Corunna, Vimera and Rolla. These Orders now pass by will to Mr. Kenneth Roderick Murchison, a nephew of the late baronet, to whom he has bequeated as heirlooms to perpetuate a name which in Scottish history will ever be associated with the varying fortunes of those Highland families who suffered so much for their loyalty to the house of Staart.

March 15th, unfortunately tripped and fell down the second flult of stairs, receiving an injury of a very pantul character. The Ambassador was at once conveyed to his residence, when Sir James Paget and Mr. Forbes, of Oxford Terrace, were immediately sent for. On examination it appeared that His Excellence had broken his right forearm, and was also suffering from a shock to the system. The injured arm was skilindly set by Sir James Paget, who visited His Excellency at a late bord arm was skilindly set by Sir James Paget, who visited His Excellency at a late bord last night, and pronounced him to be going on extremely well. In the course of the afternoon Her Majesty was graciously pleased to send to make inquirous after His Excellency's condition, also the Duke of Cambridge.

— The Queen of Wurtemberg, who lately visited the Imperial Court at St. Petersburg, stood a good chance on her arrival of being lightened of her traveling parts and jewelry. The cases containing those valuables were committed to the care of an imperial coachman, but knowing and appreciating their coachtas, that employé abused his trust. He drove the wagon into a descretel part of the capital where criminals are hanged. Here, a blow on a whistle specific brought to his side thece or four tramps dragging sleighs whereon to convex their sports way, but the Wurtemberg servants' agorous cries for help at the same time attracted a gendarine, whose formidable appearance at once dispersed the thieves.

In private life, (inseppe Mazzini was accomplished and courteous, and gifted with a genial manner which won regard almost instantly, at least unconsciously. In London he lived in the humblest manner, occupying often only a single room, and generously bestowing the earnings of his pen on the cause which ever lay nearest to his heart. His tall, gaunt form, long face, and high, narrow forchead must be familiar to a great many Londoners; and whatever we may think of his political opinions, few will be disposed to question the smeerity, even to fanaticism, of his devotion to one idea—the cause of Italian unity.

The eleven jurors (special in the Tichborne case were paid their fee for attendance for the last thirty-three days. The solicitors on both sales agreed on a former occasion to pay the jury between them. The first sittings extended over 40 days, the second 30, and the last sittings to 33 days, making 103 gaineas to each amounting in the whole to £1,40° 13s., one-half of which was paid by the solicitor for the claimant. The special jury had been granted on the application of the other side.

— A dispatch from Yeddo dated March 26th, announces that an attempt has been made by a party of twelve persons to assassinate the Mikado of Japan.

- The ninth anniversary of the marriage of the Prince of Wales, which occurred on Sunday, March 10th, was celebrated with great iclust at Jersey on Monday evening. A procession by torchight was made to the residence of the Lieutenant-Governor of the island, where cheers were given for the Queen and the Prince of Wales. The ships in the harbor at St. Aubin were illuminated with lanterns, and bonfires and tar-barrels blazed, amid general rejoicing.
- King Amadeus, of Spain, is a tectotaler, and never drinks anything but water. Though unpledged, he is a stanch tectotaler. The king's charities alone average £17,500 a month. The whole expenses of his late provincial journey, calculated at £30,000, he defrays from his private purse, unlike his predecessors, who always had their yourneys paid for at the cost of the State.
- Prince Alamayu, son of the late King Theodore, who, for nearly four years, has been under the guardianship of Captain Speedy, was entrusted, on the 4th instant, to the care of the Rev. T. Jex-Blake, Principal of Cheltenham College. The boy is nearly eleven years old. His future has not been determined—probably, a civil service career in India.
- Amongst the articles offered for sale at the Baker Street Carriage Bazaar, were some state carriages of the ex-Emperor Napoleon, but the prices realized were far below the original cost. The equipages were purchased by an undertaker, who is about to convert them into mourning coaches.
- The Prince of Wales, in causing an answer to be forwarded to an address from the theatrical managers and actors, congratulating him on his recovery, expresses the warmest interest in the drama, and signifies that it will always be his endeavor to promote its success.
- Mr. Archibald Brown, brother of Mr. John Brown, her Majesty's personal attendant, was married at Windsor parish church to Miss Johns, niece of Mr. William Miles Tapsier, of Windsor Castle. The bridegroom is Prince Leopold's personal attendant,
- On the recommendation of the Prime Minister, the Queen has approved of the grant of a presion of £100 per annum on the Civil List to the widow of the late Mr. Mark Lemon, in recognition of her husband's literary services.
- A marriage is arranged, and will take place early in May, between Mile.

  Musurus, eldest daughter of his Excellency the Turkish Ambassador, and Mr.

  Warner Heriot.

### Special Brevities.

- "Just imagine Germany coming forward with a claim against the Government of the United States for consequential damages, in having, by the sale of Government arms from the arsenals, prolonged the war in France from the capitulation of Sedan to the surrender of Paris. The effect would be most injurious to the executive who had drawn up the American "Case," and England would entite that "the biter, bit." Now suppose that Germany did make such a demand, and it was submitted to arbitration. Suppose they assessed the consequential damages at an enormous sum, might not the injustice become apparent to Americaus, of insisting that arbitrators should decide whether Germany was justified or not in making such a claim! Though spoken of in a banter by German papers the proceeding is highly improbable; but still, enough of probability remains, for Americans not to furnish the material, as we before observed, upon which such a claim may be based."—Anglo-American Times.
- based,"—Anglo-American Times.

   Carlotta Patti is pronounced by the European critics, of late, to be the greatest concert singer the world knows. Lately, when she made her tour in South America, her reception probably surpassed anything ever known in the history of vocalists. This is all the more noteworthy that Itio Janeiro is one of the most critical and wealthy cities of the universe, and has had an opportunity of judging all the great reputations of the present day. It may be truly said that Carlotta Patti had an entree worthy of a princess into the city. Triumphal arches were creeted, under which she was to pass; flowers streewed her path, and at her performance bouquets were thrown her, glittering with precious stones. The critic of the leading paper wrote: "When we hear Carlotta Patti we look for the bird that produces the sound." Another: "If angels sing so we shall be satisfied with Paradise." And so they went on with this hyperbolic language to express their admiration of this delightful singer.
- A large wagon left the Garde Meuble of Paris lately for Versailles, containing various works of art and valuable pieces of furniture which had been stolen from the hotel of M. Thiers by the Communists, and afterwards recovered in different places. Amongst them may be mentioned a marble statuette, signed "Carova," of a shepherd holding a rabbit; an ancient chim wase from the Paluis d'Elé; a Chinese god leaning on a seven-headed dragon; a cabinet of the 13th century in black wood, with the arms of France engraved; a number of bronzes, and amongst them a splendid reproduction of the "Dying Napoleon" of the Great Exhibition; and, lastly, a Minerva in massive silver, 16 inches high, from the chisel of Salvatore Marchi. The total value of these objects is estimated at 50,000 or 50,000 francs.
- In March, four ships have laden with corn at Taganrog, Russia, against 260 in March of last year. All the better for California.

- At Charleston, South Carolina, recently, a captain, seeing that two of his satiors were not likely to be on lund when his vessel was ready to sail, had them locked up in fail on some pretext. The tars, however, were equal to the emergency, and barred the door inside, so that it could not be opened when the ship was ready to depart. The consequence was she had to go without them. When they got so pressed by hunger that they could not be need as y longer, they unbarred the door and were released, as they could not be held any longer.
- Can it be true what a native paper says about a small State in this Presidency? According to this paper, there has been a custom in the Vencatagiri zemindary to have all the zeris, high and low, put up for site before being united in marriage. They are bought by people of their own caste, and, of course, the price varies according to the beauty of the girl. The Ragah is having this abuse removed, and quite time it was removed. How was it that it has never been heard of before?
- Mr. Dawes has introduced into the United States House of Representatives a Bill to aid in the construction of ten first-class iron steamers, of not less than 2,000 tens each, to connect the United States with forcest ports, and to secure to the United States Government the use of the same for postal, mayal and other service. The Bill provides that the steamers shall be built by a corporation to be known as the National American Steamship Company.
- In a Scotch church in Kingston, Jamaica, a Christian minister preached a functal sermon in memory of a Jew, the late Mr. Emanuel Lyons. He took his text from Acts of Apostics, chapter x., verses 31 and 35, in which the following occurs: "Then Peter opened his mouth and said, Ot a truth I perceive that God is no respecter of persons, but in every nation, he that feareth Him and worketh rightcourness is accepted with Him."
- Great progress was made last year in the construction of railways in Russia. One of the lines completed in 1871 that from Smolensk to Brest is 600 versts in length. Russia possessed, at the commencement of this year, 12,650 versts, or about 9,750 miles of lines. The most important lines about to be commenced in Russia are those of the Cancasus and Siberia. The length of line completed in Russia in 1871 is returned at 2,550 versts.
- The Othawa valleys provided during the last season 100,000,000 feet of sawn deals and 285,000,000 feet of sawn boards. The St. Lawrence Valley provided 225,000,000 feet of sawn deals and 350,000,000 feet of sawn board. These figures do not, it should be remarked, relate to the whole Dominion, but only to the result of twelve months work in the great valleys of the St. Lawrence and its tributary, the Ottawa.
- Recently Roderick Davidson, one of the ferrymen at Kessock, observed a large fish tumbling and splashing among the sea weed on the shore, which he immediately attacked with a small anchor, the only weapon at hand. The fish was a hage cel, which when captured was found to weigh nearly 60 lbs. It was six feet long, and upwards of two feet in girth.
- It is stated that the use of steam for the production of power to propel street locomotives is to be superseded by ammonia. Dr. Lamm, of New Orleans, has succeeded in driving a street ear for seven miles by the use of ammoniacal vapor. This, if correct, will make ammonia of greater value than it has become from being used in the manufacture of ice.
- The Geelong Advertiser affirms: "It is stated on good authority that among the riches of the partly explored Cape Otway ranges a discovery of stream in hilly twelve mehas in thickness, and, on analysis, yielding 36 per cent. of the pure mineral, was made some time ago by one of the party of geological surveyors dispatched thither by the Government."
- In the Union Medicals for February 6th, M. Rabutean refers to the use of bread made with sea-water as increasing the appetite and stimulating direction. He states that it is pleasant to eat, and exercises a beneficial medicinal influence in cases of dyspepsia, phthiss, and scrothia. It has also been found conducive to health on board ship during long voyages.
- Mr. Stracham, the Superintendent of Cotton Experiments in Sind, makes mention of the following in his Diary for the week ending 11th instant: "Carbolic acid seems a good remedy for scorpion stings. I have treated seven cases with it. Four were of our own workmen, and taken at once they did not stop work for an hour."
- The works on the Scutari and Ismid' Railway are being actively pushed forward. Ethem Pasha has returned from an inspection of the whole line, and has let a contract for the principal station at Haidar Pasha near Scutara, which will be commenced forthwith. The line is expected to be ready for traffic in the autumn.
- Negotiations are being carried on between the Italian Government and the English for the transfer to Italy of the Island of Socotara, and are fast approaching a termination. The island, it appears, has been in possession of the English since 1835. A penal colony is shortly to be established there by the Italians.
- The report is confirmed that the Russian Government has given orders to a bookseller at Bale to procure for it all the publications of the International which are published in Switzerland.
- The Branch Mint coined \$3,178,500 during the first quarter of the current year, against \$3,706,725 for a like period of 1871.

## Our Mineral Wealth.

The San Diego Union says: "All the mills on the Butler lode are running on full time, and the rock yields at the rate of \$53 to the ton. The Owens lode is yielding largely as heretofore." Remarkable developments have recently been made in the Zacetara mine, ('alaveras County, and go to show it is one of the richest mining properties in the State. The Bartolo, Reed, Hillary, and Steger mines, same county, are yielding at the usual rates, On account of recent rich indications in the Science mine, near San Andreas, the proprietors have been offered \$20,000 for the mine. The Stickle mine, at Angels, continues to yield large quantities of low grade ore, which is worked at a very fair profit. A correspondent of the Inyo Independent, speaking of the Mono County mines, says: "The rock from the principal lodes yielded at the mills from \$100 to \$700 per ton during all last summer." The same paper, of the 16th inst., says: I sandry's works commenced running February 1st, at 3 p. m., and stopped March 2d, at 7 a. m., making 20% days running fime, during which 3,100 bars of bullion were run out, weighing 282,200 pounds, or 1,412 tons. The last thirteen days were run on raw orce entirely, that is, without using sage. This run averages 115 bars per day. In Lassen County, Messes, Ward and Sooner have a very large body of orce in sight, assays of the same averaging \$26 to \$94 to the ton. The rock from Bunton's claim gives \$35 to the ton, and well rewards him formly increasing in richness.

The Dunderberg quartz load, near Castle Peak, Mono County, is reported sold to an English Company for the sum of \$180,000. The silver mine known as the El Capitian, situated on Queen Springs, Moantain Schell Creck, Nevada District, has just been sold by Archie McDonald and others to C. A. Low of this city, for \$55,000. Another mine, known as the Woodburn, situated twelve miles north of Shelburn, has recently been sold for \$20,000 to a party of military men residing in Washington, D. C. The Daisy Hill mine, near Grass Valley, is about to ruise a large quantity of rich ore, and the North Star is being treed from water. In Calaveras the mines on Railroad Flat are resuming active operations, and several freshodies of immensely rich ore have been discovered, and the same we can say regarding the Prussian Hill mine. Gravel mining in this class of mines, having reaturns of \$60 a day to the hand; and as there will be no scarcity of water this senson, old Calaveras will "Keep up her lick" with a very large gold yield. Great activity and energy prevails throughout the mines in our own and adjoining States, and the product of precious metals for 1872 will exceed that of any former year.

The Tarshish miners, says the Alpine Chronicle, of March 30th, have struck the richest and finest body of ore ever opened in any part of this lode. Ore from the Mountain mine, on the slope of Red Mount, assays \$70 per ton. The Calaveras Chronicle, of April 6th, says: The survey for the difeh to convey water from the Gwin mine is completed and the stakes stuck. It is rumored, says the Grass Valley Union, of April 4th, that J. W. Gashwiler and others have purchased the quartz claim at Nevada city known as the California and Illinois. This is a continuation of the old Gold Tunnel claim, and has prospected well. The Napa Reporter, of April 6th, says: The Onkville Quicksilver Mining Company have received a United States patent to their claim. This company have made extensive improvements during the last few months, and are now smelting about on tons of ore daily. Their furnace is said to be superior to any otheryet designed.

The Placer Herald, of April 6th, has the following: Superintendent Jones, of the Belevue mine, has finished crushing the rock taken from that mine, at the St. Patrick mill. The amount of ore reduced was 420 tons, and the yield was some \$18,000, an average of over \$40 per ton. The mine is said to look better now than over before. A correspondent of the Napa Reporter, writing from Yountville, says that some rich quicksilver discoveries have been made a few miles from the Little Geysers. An ofter of \$40,000 cash has been made to the lucky owners, for a part interest, what part is not stated. Another company have offered \$25,000 for the whole mine. Other discoveries have lately been made between the Knoxville and Phenix mine. These discoveries, with the Whitton, Steckter and Oakville snines, would lead to the supposition of somewhat extensive deposits of ore around the head of Napa Valley. The Cariboo mining interests, in British Columbia, are reported as flourishing. The silver mining regions of the State of Nevada, says the Grass Valley Union of the 5th inst., are attracting, this spring, more than usual attention from mining capitalists and mining faborers. The developments of the past year have established the valuable character of the mines of Ploche, Eureka, Mineral Hill, Shell Creek, and other localities, and their reputation have spread far and wide. This is sufficient to induce many to seek those fields for the Investment of money, or to obtain employment; and Grass Valley, which has always furnished its quota of men for every new mining field, is witnessing daily the departure of working miners for the various towns of Nevada. It is estimated that at least 200 have left this district for Nevada within a month or six weeks, and they are going daily. Recent rich developments are reported in the famous Emma mine, Little Cottonwood, U. T. At a depth of 400 feet a body of ore has been struck running \$1,000 per form. English experts who have visited the mine are asserted to have placed its value at \$20,000,000.

## Love Rhymes by Sally.

I am in love, but I prefer
My lover should not know it;
Although the flame burns bright within,
Outside I will not show it.

I wonder much if he loves me,
And doth his love conceal;
If that he true, for him, poor youth,
Much sympathy I feel.

I won't make known my love, lest he Should my affection spurn, But I will nurse the flame, although It meet with no return. This sweeter far to love in vain
Than never know the pleasure
That doth accompany the pain
Which in my heart I treasure.

But I'm in hopes that something may My lover's mind impress That I love him, that he will then The mutual flame confess.

O joy for me! I then would be As happy in a trice As Eve was when she first beheld Adam in Paradise!

Goat I-sland and on the other by the Town Urier, several young ladies' seminaries, and churches in the ratio of half a church to each small boy, is in a tever of excitement. Cause: innate energy of the village ladies. Object, the abstract on of conform the passive and lamb-like citizens. The Town Urier trusts that this public concoming will be accepted as an equivalent for pecuniary assistant may plante will not be solicited to purchase any more dols at bazzars, hes list investment having been attacked with cholera and shed its sawdust. The theater having colmaying been achieved with cholors and sheel its sawdist. The theater having collapsed for the simple reason that the performances were not for any charitable object, but only for the starvation of the actors, the ladies of a church took the Skating Rink this week, and besides selling no end of texts beforehand, took in \$250 a night at the doors. How many metal pocket handkerchots well wipe perant noses in consequence we know not, but the Sewing your ty of St Paul's, Oakhand have reaged several hundred dollars for church purposes. The Second Artillery noses in consequence we know not, but the Sewater Soot by of St. Pan's, Oakland, have reaped several hundred dediats for church purposes. The Second Article and Twenty-first Infautry bands set all the enterhancers, candidates for confirmation, excommunicated persons, lay readers, Sanday school children, and theologically desposed doctors and lawyers, dancing like mad. The Torm Origin limited nearly lost his serious equilibrium, and came very near accepting the blands-lament of a retaingular spinster to "Walitz, an, do Tom". He contented hunself, however, with burming a doxology and devouring an oyster stew. On such occasions commond us to the ladies who dispense refreshments. Never does famile loveliness appear to such advantage as when "bossing" a celestial cook over a stewpan, or administ ring a necessary spoon to a voracions genius. For the aske of being thus tended by the ecclesiastical beauties of Ockband, we suffered a night of exeruciating torment about the region of the pericardum, and dreamed we were returnemental good standing on whom Episcopal an numplis, in surplies, were performing the "baptism of such as beof riper years." On the list evening the bound tarkey. Those two small Japs can thave so much as a rebut the areat delight of the Milittery Infants, or Oakland Juvenic Brass Button Grays. Take bound tarkey. Those two small Japs can thave so much as a rebut their artifications with carcases. Two more big fairs are to come off shorty. On the 22d, the Endres Reside Society, controsed of all doministions, and samply humane in its objects, will open the grandest festival ever given to Oakland. Concerts, plays, and a marvelous exhibition with a name that depression, and apply humane for its objects, will open the grandest festival ever given to Oakland. Concerts, plays, and a marvelous exhibition with a name that depression, will afford solve to be flown tried and other misantropes, while good flavance will smell the sweeter and probably cost the more, for being dispensed by a bawkich of leainine fumi in Oakland will hold a fair, under the management of fathers, brothers and sisters, in Oakands with nord a fair, differ the additional state of the control of the co Rafael or Santa Barbara to get fresh air for the summer. Aas, for those poor sons of toil, who, like ourself, are pent up in that densely populated village all the year round !

If virtue had its reward—which it does not here below, for the Town Crier is still poor—the happiest man now upon God's footstool should be Chaffers. Chaffers is a London solicitor, or the species-potificager, who has heed for years in honorable independence, by proclaiming the integeries of others. Fit now lays his head upon his pillow with the happroving consciousness that his detamation Lady Twess has, whether true or false, bughted her happiness when she was flying respectably and respected, driven her hasband, one of the foremost men fragland a gentleman, schokr and lawyer of enumence meane, and given the world a scandal to gloat over for a long time to come. Chaffers is only pharisaism embodied. Every community and every church has its Chaffers. We know a few in San Francisco who are only too ready, when they dare, to divide husband and wife, make households desolate, drive good men mad and give an inpetus to scandal to "awinge the scaly horrors of its folding tail."

#### Shall we Live or Perish?

If we reflect upon the style in which we build our houses, roads and bridges, we come to the conclusion that we are not destined to live long in history. Everything we do is shallow and superficial. And no people ever lived who were so vain of and babble so much about such trivial exploits. If a man has the hardihood and daring to build a couple of miles of horse railroad the newspapers chant his and daring to build a couple of miles of norse railroad the newspapers chant his praises with a lamentable vehemence. And yet the work is of such a pastry character that in cases of emergency it could be torn apart by an iron bar in twenty-four hours. Build a bridge across a stream 3,000 or 4,000 yards wide and the whole nation cackles over the Herculean feat. If we take a scraper and throw up one hundred thousand tons of earth in the center of a public highway we have a greater glorification over it than the Incas enjoyed in building their massive and everenduring roads; than the Romans in constructing national thoroughfares which were the wonder of the world. If one of our architects plans an ordinary church, which, when erected, might be put into one of the closets of the Egyptian or Hindoo temples, the plan and the church are lauded to the skies. In works of a masdoo temples, the plan and the church are lauded to the skies. In works of a massive character, according to the modern estimate, such as spanning a continent with iron rails, hallelujahs over the finishing stroke of "one of the wonders of the mineteenth century" are pealed forth from the press, pulpit and people until the car retuses to receive vibrations of this vain glorilying. But, considering the means at hand, the work is of a very light character. Its completion one thing, its duration another. A band of wild Indians could destroy miles of it in a day; an ordinary freshet would sweep away its tob-webb masonry; a state of war entirely demoifsh it in a single campaign. Our most solid public buildings, compared with the public buildings of the ancients, are pens in which sunlight and fresh air are never known. As to our houses, they are egg-shells. A modest shock of carthquake tumbles them down with as much ease as we can throw over a standing row of tenins. In att matters, if a painter portraws a dead fish or a living face with any of tenins. In att matters, if a painter portraws a dead fish or a living face with any of tumbles them down with as much ease as we can throw over a standing row of ten-pins. In art matters, if a painter portrays a dead fish or a living face with any de-gree of accuracy the press, either with a keen sense of burlesque or wrapped in the cloak of ignorance, discover a genius. Songs that perish with their singing con-secrate the fame of the newly found. It is the same in sculpture. Our literature has no marrow in it. Longfellow, Bryant and Bayard Taylor—we mention the lathas no marrow in it. Longfellow, Bryant and Bayard Taylor—we mention the latter out of courtesy—will live as translators more than as creators. Yet Longfellow and Bryant are men of positive genius in this age. What are they compared to Homer and his contemporaries? In physical or mental works we have done nothing that can long endure the ravages of time. If a serious famine or frightful pestilence should afflict the nearer coasts of China and flood us with one million of Chinamen, in fitty years their mere physical weight would crush so ut of existence. We should soon be forgotten, for we have not even built mounds, as did the rude Indians, which would endure for centuries. The ancient Romans, Egyptians and Hindoos live in history, after ages of ruthless destruction, because they constructed imperishable works and created a literature and art which time can next destroy. Even their gods were such magnificent fellows that it is a pleasure—even if a Pagan one—to linger over their memories. We sometimes think that the reason why the moderns have only one God is that they are too poverty-stricken in son why the moderns have only one vood is that they are too poverty-stricken in magination to have more. Even this one is more atrocious, according to modern theology, than that atrocious mythical man-God who fed his horses on human flesh. The Divinity of the moderns grows merry over tortured souls in hell; so that even in theology we have nothing to boast of. Have we then invented nothing, created nothing out of which we ought to be proud. Of course we have, There's that harp of a thousand strings—the telegraph. It does not matter that this blessed instrument is largely occupied in telling us about burning barns, rhemmatic politicians, crim. cons. and crimen falsi of every sort, fugitive royalists, dead showmen, etc. It is the telegraph, and we invented it. We also invented steamboats. It does not matter that in our eagerness to be smart and intelligent we have abolished the "apprentice system;" and in our eagerness to find cheap labor we abolished the "apprentice system;" and in our eagerness to find theap labor we employ an ignorant engineer, through whose ignorance we shatter steamboats and blow from one hundred to one thousand souls into the presence of the Great I Am in the twinkling of an eye. Well, we invented steamboats, and that settles the matter. But have we really done nothing that is without alloy, that is imperishable in and of itself? Yes, we (Radicals) have created the imperishable political idea that all men are created free and equal; the imperishable true theological idea that that all men are created tree and equal; the imperisance true incological idea that every man has the right to worship God according to the dickates of his own conscience. We have not been able to put in practice in their entire fullness these glorious and immortal ideas. Political and theological tyrants have still a powerful influence over the masses of the people. But a sound, solid system of education—which we have not yet attained to—and multiplied, bold, free and outspoken. News Letters will put in practice to their very culmination the saving and sublime ideas of which we speak. And whatever comes after us, whether they be Huus, Goths or Vandals, while the grass grows green, the waters flow and the sun shines, these ideas are indestructible and imperishable. They have taken deep root in the blood, brain and heart of man. Unlike our mushroom art and literature, they will survive the shocks of earthquakes and of ages. With and through them our names and our liberties are eternal.

<sup>—</sup> Mr. Whymper, the celebrated Alpine traveler, writes to the London Times, from Chicago, stating that he has received over 25100 from the inhabitants of that burnt-out city towards the Livingstone Discovery Expedition.

#### Hope.

When, from that evil casket hurled,
All ills descended on the world,
And care and sorrow:

When all the griefs and woes were past At last the dawn win surey come.

When all the griefs and woes were past At last the dawn will surely come.

There yet remained unto the lest

And when you reach your gonzous home

Hope for the morrow.

The light will shine.

#### The New City Hall and Law Courts.

We have been favored by the Secretary to the Board of City Hall Commissioners with a printed copy of the specifications for the stone or granite plants course for the New Cay Hall, with the conditions of contract and bus of quantities of the work for which tenders are invited, to be received on the 26th instant. And we must compliment the Commissioners upon the extreme chartness and completeness of the details of these documents, which are at once into highly to intend by tenderers and even to the unprofessional, and to those who are mexpers need in such determine the first the first processor of the first point of the building whole will appear above the finished bine of the terrace that is to surround the whole win appear across the master one of the certace that is to strictly the whole structure, and is technically termed in the specification the plants, or base course, which will torm, we suppose, a portion of the podium, of the brieding. It is to be three feet eight inches in hight, and will be on the same level and of the same hight as the corner stone, which was laid on the 22d of I ebruary. It appears that the Board are prepared to receive offers for the work other in granite, freestone, or artificial, or any other suitable stone, in order to develop the resources of the State in reference to different varieties of stone; bids to be accompanied in every case by samples of the material proposed to be used, so that the Commissioners and their samples of the material proposer to be used, so that of the materials offered on their entire merits; rearchitect will be able to judge of all the materials offered on their entire merits; regarding at once a.l the questions of durability, appearance and expense. The specification is so prepared that bids may be made at the option of parties lenderspecimenton is so prepared that one may be made at the properties of per-ing either for the entire work, according to the drawings and specifications, or near artery for supplying the material, for labor in working and preparing it, and for setting it on the braiding. Under the head of "material," all the new ssary stipulations are made for quarrying the stone in proper skape and condition for the work, and delivering it at the City Hali-Reservation in blocks of the requisite size, which are all to be figured and lettered so as to indicate their intended position in which are all to be nighted and bettered so as or indicate their discharge person in the walls. The mode of "working" the material is head carefully and clearly set forth; the "faces," "beds "and "joints" heing at separately described. The exposed portions of the work are to be fine dressed; if of grantle, to be firstless with "bush hammers" of eight cuts to seven-eighths of an inch. The drawings show also a very effective manner of finishing portions of the face work with an angular "fluting," sunk in the face of the stones. The "Setting" of the stones angular minute, same in the inevent the stones. The "setting of the stones is described under the third heading, with the thickness of the joints, mode of cramping, etc. The setting mortar is to be made with sand and boiled is are ground under edged "rollers," which, we are informed, is the method now most approved for this work: preventing discoloration, so often observable in some of our most important public works. The mode of "Measurement," of the work is next specified, and the definite arrangement of this prevents the possibility of any dispute on the question, which is frequently the source of much annoyance and niheulty with contractors in winding up accounts of building operations. Under these specific arrangements of the Commissioners the people of San Francisco will undoubtedly receive full value for the money expended. In case of the work being let in portions to different contractors, the exact amount and extent of work and responsi-House of different contractors, the exact manner exercises of work and re-point-bility deceasing upon each of them appears, to our unantifacted eye, to be very carefully defined. Attached to the specification is a "Bill of Quantities," in which is given the size of every stone required, with the mode of working each; the whole being summarized at the end by an abstract in which the total lineal and cubic measurment of each dimension of stone, and of the whole amount, may be can measurate to each dimension of some, and of the water almount, may be seen at a giance. Together with the specification, very full and compete working drawings have been prepared, giving the details of the critice work to be included in the contract. We commend this matter to the attention of all persons engaged in the business of quarrying or of stone-cutting, as a work for which they can tender without any doubt or uncertainty, and for which the necessary calculations are made and printed ready to their hands, so that there will be no fear either of miss-ing the contract or of losing money in it from any miscalculation or error in ascertaining the amount of the work, nor any subsequent doubt or dispute as to the quality or quantity of work intended to be included in the contract. There will in this case be no excuse for the very wide variation often displayed in contractors' tenders. Anything of this nature can only result from over-competition or personal spite between those competing for the mastery of the work. We repeat that we consider the Commissioners and their Architect and his officers deserve to be complemented for the completeness and meidity of the documents before us, which augur well for the exhibition of summar qualities in the numerous speculications which will be required of the architect for all the subsequent work on the building.

# Theological Advertising.

O Lord, we pray Thee come near unto us and Thine other servants of the Holy Word, Rev. Stobbins and Rev. Elder Miles Grant, for Thou knowest, O Lord, how great is our yearning for the benefits and blessings of honest theological advertising. For lo and behold, in all humbleness, we have our respective temples wherein we advertise Thy wares and deal out spiritual consolation to the wavering and manufaithful lambs, male and female. O Lord, take notice that our temple is on Montgomery street, near Washington, and specially bear in mind that we charge one dollar a line to Thine humble and devoted servant, Rev. Scott, yea even unto the Jews and the Gentiles alike. And our temple is open from the going up to the going down of the sun, and everything done therein is done on the square, as we did lately testify on oath. O Lord, Thine ancient prophets bath written that whose-ever loveth wickedness loveth darkness, and as our temple is closed at the sun going down Thou wilst testify that we love not wickedness. But Thy servants Steb, and Miles love wickedness, for their temples are open, yea far unto the night, and the unwary are caught therein. And yet Thou wilst be merciful unto them for thus, O Lord, for if the unwary were not trapped into the temple of our beloved brether and co-workers in Thy cause they might be reveling in theatrical sin in the temples of John McCullouch or Billy Emerson. Thou knowest, Lord—and if Thou knowest not we tell Thee—that of two evils it is better to choose the least of them. But what Thou wilst never forgive is the theological advertising-in-the-dark dodge practiced by Thy servants Steb, and Miles. For so great is the iniquity that our hearts know no peace until it is known unto Thee. Verily, it is written—but Thou art a stranger to the fact—that the Rev. Stebbins preaches Thy word in the Rink on Stockton street, corner of Post, on holy Sabbath evenings, and when Thy pious flocks move to the spiritual and welcome music of the benediction, its membersane beset and waylaid by advertising a

If Jemima Meek, who quareled with her husband a week or two since, and after striking him violently on the boot with her left eye, aggravated the offense by giving him in charge, will return to her home and resume her occupation of supporting him, all will be forgiven, and she will be treated the same as ever.—B. C., late in the employ of Mesrs. Nabhim and Nailer, who absconded with five thousand dollars belonging to that firm, is earnestly requested to call or send his address to Inspector Catchaldatski, at City Hall, as his employers are anxious to see him.—If the gentleman who asked a lady he met casually in an omnibus, to meet him in South Park on the following Sunday, kept that appointment, the lady will be glad to learn the fact per advertisement, as it tained cats and dogs, and she hopes he caught a violent cold as a reward for his insolence; at all events, let us meet at Woodward's Garden at 2 P.M. to-morrow.—Found, in the pocket of a lady traveling by rail, a purse containing a greenback, two-and-a-half, and some dimes. The finder means to keep it for his trouble, and requests that the cost of advertising may be forwarded to him, addressed "Kinehin," Merchant street, San Francisco.—Lost, a One-eyed Yellow Mongrel with three legs and no tail. Doesn't answer to any name, as it is deaf. The finder is warned not to go to the cost of advertising in the Call, as its late owner doesn't want it back, and even if sold (which is doubtful) it would not cover the poundkeeper's expenses.—If the three gentlemen who called at Lone Villa, University Mound, late at night and took away the plate-hest, are disappointed on discovering that it contains only plated articles, they can be accommodated with real silver in exchange if they will call any day—between twelve and two—on payment of the difference.—This is to give no-hard. Jeremy Diddler, will not be answerable for any debts contracted after or before this date by my wife or myself. Signed, Jeremy Diddler. Witness, R. Swiveller.

— Policeman Patrick Kearns, who snatched Mr. Plate for using vulgar language on St. Patrick's Day (when it behooves Americans and other "furriners," bedad, to kape a dacint tongue in their heads), has been mulcted by the Police Commissioners in the sum of \$40 for this exhibition of his pious zeal. We concur with Judge Louderback in the opinion that this outrage will probably fire the Hibernian heart, and lose the Commissioners the Irish vote at the next election.

## Eastern and Foreign Dottings.

Some 1,600 emigrants from Alsace and Lorraine arrived during last week in New York bound for the West and apparently in good circumstances.—The London Felegraph states that Internationalism has been declared by a German jury to be high treason and punished as such.—Edwin Forrest, who has been quite ill in Boston, is recovering slowly.—A bill in the Senate appropriates \$85,000 for incidental expenses of the California Indian service, \$10,000 being for the Mission Indians.—Cole has introduced in the Senate a bill authorizing the Southern Pacific Railroad Company to construct instead of its line of road situated north of Kern river, other lines under certain conditions.—A shock of carthquake, lasting thirty seconds, was experienced in the capital and several States of Mexico, March 26th.—The Pussians are said to be fortifying Metz with enormous cannon, and enlarging Strasburg.—William C. Bryant has arrived at New Orleans from Hayana.—Red Cloud and his friends in Dakofa talk yery neaceably.—The Some 1,600 emigrants from Alsace and Lorraine arrived during last week in New non, and changing Scrasburg.—Windon C. Bryant has arrived at New Orleans from Havana.—Red Cloud and his friends in Dakofa talk very peaceably.—The Utah State Constitution recently referred to the Committee on Territories has been printed. The terms to be prescribed as the condition for admission will be subprinted. The terms to be prescribed as the condition for admission will be subject to ratification by a majority of the people. It guarantees freedom of conscince in religious matters but not licentiousness nor acts prejudicial to the peace and safety of the State.—The House has passed Saggent's bill, anthorizing joint entries on public lands, or one entry for several settlers. Cole has withdrawn his recommendation of Lewis for Hardenbergh's successor, and urges Lewis F. Jones of Mariposa. It is also stated that Cole intends to demand the removal of Collector Phelips, but the name of his proposed successor has not transpired.—The French Charge d'Affaires, M Ballonet, has been recalled at the request of our feature and for writing a proposed successor has not transpired.—The tor Phelps, but the name of his proposed successor has not transpired.—The French Charge d'Affaires, M Bailonet, has been recalled at the request of our Government, for writing an impertinent note to Secretary Fish.—Steamer Oceanus exploded her boilers twenty-five miles above Cairo, and seventy lives were lost.

The Carlist or International movement in Spain looks formidable.—An insurrection broke out in Hayti, and was put down with shaqcher.—John Bright says he hopes it will be long before the English people are called to decide between a republic and a monarchy.—Neither counsel nor arbitrators will meet at Geneva, April 15th, but the English and American agents will meet and exchange cases. The Board of Arbitration will not agam assemble until the 15th of June.—O'Connor (the grand nephew of the notorious Fergus O'Connor, who committed the assault on Queen Victoria, has been declared sane by the jury, and sentenced to receive twenty lashes and a year's imprisonment.—The fifth and last session of the Dominion Parliament opened at Ottawa, April 12th, with more than usual display.—The slave trade on the Persian Gulf has been lately abolished.

A late Washington dispatch says that the consultation of independent Republicans and leading Democratis in that city has acreed that the Cincinnal sorehead and Democratic National Convention shall nominate Judge Davis and Governor Curtin, for President and Vicc-President.—The Liverpool wheat market declined two pence on April 10th.—Colonel Caney, from Arizona, reports that the earthquake of March 26th destroyed the adobe barracks at Camp Cady, but no person was injured. The shock came in waves from the northward.—The small-pox is increasing in New York city at an alarming rate. Vaccination seems to have no efficacy.—The Republicans carried the Springfield (III.) election, April 10th, The Democracy elected their Mayor in Jersey City. The City Council is equally divided.—The wind causi for the immediate impocalment of Judges Cardozo and Barnard—A special from Matamorus says t divided.—The World caus for the immediate impeachment of Judges Cardoco and Barnard—A special from Matamons says telegraphic communication with Reynosa, at present invested by the Revolutionists, will be re-established. General Palacios has issued a proclamation, declaring Reynosa in a state of seige, and prohibiting vessels ascending or descending the Rio Grande at any point within 12 miles of the city unless by special permit by the Mexican authorities. General M. E. Cook protested against this, and Palacios did enforce the proclamation towards E. Cook protested against this, and Palacios did entorce the proclamation towards American citizens or ships protected by the American flag. — The claimant of the Tichhorne estates appeared in the Criminal Court, April 10th, and pleaded not guilty to the indictment charged against him. A writ of certiorari was issued, removing the case to the Court of Queen's Bench, where the prisoner will be true in June. In the meantime, he will be recommitted to Newgate. — A dispatch to the Tinues says Thiers has abolished the passport system. Henceferth travelers will be registered at the trontiers. No tax will be levied therefor, nor will they be subjected to the scrutiny of civil officers while in the country. — General Sherman has served in Constantingle. — A dispatch from Albany April 9th announces the arrived in Constantinople.—A dispatch from Albany, April 9th, announces the death of Hon. Erastus Corning.—George Gordon, with several disease, claiming to be the Earl of Aberdeen, has been arrested on the affidavit of Jay Gonid, charging him with converting to his own use 600 shares of capital stock of Eric cutrusted to him to sell.—Fuller returns of the recent elections for members of the Cortes. Show as follows: Ministerists, 201; Radicals, 63; Republicans, 62; Carlists, 38; Opposition Conservatives, 32.—Mr. Gladstone has accepted conditionally an invitation signed by 3,000 citizens of Belfast to partake of the hospitalities of the city, and deliver an address.—Gambeta is continuing his tour throughout France.

He delivered an address to the citizens of Angers, in advocacy of Republicanus.

—The great Northamptonshire handicap was won April 10th by "Messager," a four-year old of French breed.—Forty-seven thousand women of Alsace and Lorfour-year old of referen freed. —For-seven thousand women of Assace and Darraine have addressed a petition to Bismarck, asking that their fathers and soms may be exempt from service in the German army for a few years. — A Baltunore dispatch says that enough is now known of the Huston investigation to show that the charges against him are true. —The committee to provide for the erection of a monument to the memory of Mazzini has organized. Garibaldi is President.

Mount Vesuvius is again in a state of violent eruption. The column of flame shoots Mount Vesuvius is again in a state of violent cruption. The column of flame shoots several hundred feet above the crater, and stones, ashes and cinders fall in a dense shower around the summit.—In the House of Representatives, April 6th, Hill, from the Post Office Committee, reported a bill providing for a system of penuly postal cards. The bill directs the Postmaster-General to furnish cards at a cost not to exceed one cent, including postage; size, three and a half by six and a half inches; the face to be used exclusively for address and the reverse side for communication. The bill was amended by requiring the Postmaster-General to advertise for proposals for furnishing cards and to reward the contract to the lowest bidder, and by providing that the card shall have a clasp or cover. The bill was passed.

# Leaves from a Lady's Diary.

APRIL 6th.—Henry droae me out to the W—s to stay till Monday morning. Now to my mind, of all bores, the vulgar man who has suddenly grown rich is the greatest, especially if he makes a kind of hero of himself. The man who begins a story with "when I landed in San Francisco I had only six bits in my pocket," is a man to be shunned as if he had the small-pox. Such a man is Mr. W— His wife rather pretty, with a kind of surprised look, such as I could fancy Cinderella wife rather pretty, with a kind of surprised look, such as I could lancy concerna-wore as she rode to the Prince's ball in her pumpkin chariot. The place is pretty, but there is too much evidence of money having been expended, a sense of gilded nature. The very flowers looked as if they had sprung up full blown in a night; there was an air of varnish and prosperity even about them. We can't always choose, but I wish Henry would go alone to these places; there are always people

thoose, but I wish from young go alone to those places; there are always people there who only come to eat and drink, and don't disguise it.

APRLESH.—Henry B. has come back from Europe, and to the surprise of every-body brought his wife with him. There is an old play translated from the Greek where a husband puts out his eyes on being convinced of his wife's continued infidelity, for said he, "if I look upon her I shall forgive her." The man who pardons one fault in his wife is an angel, he who forgives two, is an idiot. Mr. B. may think that the world will receive his wife and obliterate the past as he has done, but she knows better; men re-enter society, but women take care that their own sex do not. Madame E. insisted on my accompanying her to a meeting of French sex to not. Madame E insisted of my accompanying her to A meeting of reaches all laddes in committee, because, as she said, the men were coming and she wanted somebody with her. There was much discussion but entire unanimity in one thing among them, and that was the necessity of raising money by any and all Ithought what a strange, impulsive character is that of the French. If a monarch or minister had endeavored to impose a tax on a necessary of life, bread for example, a revolution would in all probability have dethroned one and guillotined the other; but when the tax is voluntary and not obligatory, the ultra reds join with legitimists in a rivalry of sacrifice. For every milliard that Louis Napoleon called for as a loan, the people offered him two; had be demanded it as their Emperor, his whole army could not have wrung it from Frenchmen.

APRIL 9th. - Very well dressed and went to pay a round of visits. How much better one feels when nicely dressed; there is an independence of action and greater freedom of conversation. Left my card at many houses and thought how useful freedom of conversation. Left my card at many houses and thought how useful and even moral those little bits of pasteboard are. There's Mrs. B., whom I hate, If I had to go in there I must say all sorts of civil things, when all the time I long to box her ears, for she is criticising every stitch of my dress and is sure to say something ill-natured about me the moment my back is turned; so I leave my card and avoid many little sins thereby. Again, Mrs. R's, husband, who had led her a dog of a life for the last three years, is dead. I can't go in and congratulate her. It would be a mockery to condole with her, so I leave my card and save my conscience. However, I made a very pleasant round this afternoon, and felt that I was admired, so came home in good spirits very late for dinner.

- Toredo por Usted-Bully for you. Professor W. F. Stewart, whilom of San Jose, but, since his late discoveries, a peripatetic philosopher upon the crust of this earth, has offered his services to the State. He is willing to go to Inyo to examine the throes of poor Mother Tellus, and, with his conductors, draw off that superfluity of electric force which, according to the Professor, has concentrated there, owing to the Central Pacific Railroad and the various telegraph lines of the Meanwhile, the crust quack has scared up a new bugaboo in the shape of the pile-destroying teredo, which he calls toredo, whereof his description is as cor-rect as that or his theory of earthquakes. He has gone beneath the waters of the Bay, and there his eyes have gazed upon the rawages of the worm, he is lost in admiration of its wonderous dental apparatus and announces to the ought-to-be awestricken world his discovery. Our air is seething with electricity, our waters are teeming with worms. The one acting on the crust of our globe will engulf our houses and the other will let down our wharves. The teredo was known long helong before the San Joaquin line was commenced, and yet this man, with his mare's nest, comes forward and pompously announces himself as the great Lin of modern discoverers. There are always more or less harmless windbags in society, which, however, tease us with their noise till we long to stick a pin in them and send them to annihilation. fore W. F. Stewart was weaned, the earth's crust has been seamed with railroads

#### Mazzini.

Yesterday's edition of La Voce del Popelo, the liberal Italian journal of this city, devotes fourteen columns to the memory of Mazzini. From a perusul of its pages we can understand how deep and protoned was the grief of the Italian people over the death of the great and noise patriot. Every city, town, village and bemiet mourned his loss. In Rome, the Iterrali City of the seven halls, the news amounting his death threw the cut re-population into grid, and immense placards, in mourning borders, were distributed commencating in bref his pute nature and broke works. The Mayor of Rome in person received a basi of the great patriot, from a dengation of Republicars, saying that magnitude and broke works. The Mayor of Rome in person received a basi of the great patriot, from a dengation of Republicars, saying that magnitude and pournal, we carm that at the time of his death Mazzin was fiving with a private manuly named Ressoli in the city of P-sa under the assumed ham of George Brown, and represented himself as an Haghist gentlement. The faminy were well aware as to who their distinguished guest was, but the attending physician and all others are centrely ignorant fixed the dying man was the immortal. Joseph Mazzin: The Italiun patriot was a great admirer of English thata for, a character which seems to have given to himself as solid impress. In this respect an interesting amendate about Mazzini appears in a new book, just published in Paris, under the title of "Le Dereiro des Napoleones." Sur James Budished in Paris, under the title of "Le Dereiro des Appeleones." Sur James Budish the Dereiro des Napoleones. "Sur James Budish of the Budish of the respective of the United Statistics of the Budish of the Budish of the Statistics of the

Of the life work of the cross broken, the Manch star Grandian eloquently says; "On Rome as the capital of Pray and the center of her ideal gardes, Magazia moked with an enthusiastic veneration, beside which it is aw of the reagain above was but a feeble and an flee had smoton. His last days were sport in editing a gournal casked Brown of the Proper of the Proper of the reagainty of the control of the sport of particle conditions of the language of the star up the smoldering face of particle teste and price, and, by the exposition of the Pope and the establishment of an Patien Republic centrolled at Rome, to compare its inheration of Iri's. Devot I to what he regarded as the testical regeneration of his construct, he was also account to its spiritual regeneration, and stood like opposit to the extreme maternalism of the new socialist and "internations" Republican party. In lossing Magzan, halv will have lost the mint to whom, next to Caronii, she is, perhans, most mel-fred for her freedom. She will have lost, to a pure spirit, who, whatever I is cite actual circus, had not of the each ambition of the criminal uncertupions insected a circus, had not of the said have lost, to a pure spirit, who, whatever I is cite actual circus, had not of the said inhibition of the criminal uncertupions and socialists.

<sup>—</sup> There is a bill at present in the great fight between the City of San Francisco and the would-be coart Island lessees. Both combatants are resting on the kness of their backers. The both-choiders on each side are in conference. The unplie is attending to the next Presidentri election: there was a fant cry of "police." reset by the Sarr, sento Virine, but, as yet, the Issue's uncertainty. Meanwhile, to Mila to distribute is knocking the skin off its knuckles and wearving its readers to constant attacks at the stone wall. The end will be fossion of the opponents, as the organ of the anertoneers will be left out in the Cold. The late editorials in its of paper are like the old cost. The

<sup>&</sup>quot;I saw an ancient porker a-down a river float,
The pig swam well, but every stroke was cutting its own throat."

<sup>—</sup> Man is, par excellence, an ungrateful animal. When you do a man a friendly turn, you too offen set kicks or a lawsuit instead of thanks. J. A. Compersues Mythade Riely, in the Fourth District Court, for Shooke dam, see, because the said Riege, at personal meanwhichice, no doubt to himself, appeared in church when Festier Gallagher was about to marry Cooper to Bridget Fazan, and attented that the bridgeroom had a wife in New York. Now, either the indictions intersention saved Cooper from biganty or from martimony. If from bugany, then from probable incarceration. If from marriage altogether, then from an abyse of — , but as the Foura Crier is much read by married people, we will not say what we was agoing to.

### A Coward's Libel.

One of the most successful creations of the great master of modern fiction was fond of telling all whom it might concern that he "liked to be despised," and it is by no means certain that such a feeling is not more common than would at the first blush seem probable. How, but on the existence of such a desire can we account for the line of conduct pursued by Alexander Chaffers, an elderly solicitor, who has been holding himself up to universal execration at the Southwark Police Court. By the collapse of the prosecution, Mr. Chaffers has escaped punishment for the crime with which he was charged, but he can certainly not be congratulated on this result, as he had contrived to place himself in so peculiar a position that he would by all right-thinking men be adjudged a viler specimen of humanity if he told the truth than if he had lied from beginning to end. Thus stands the case: In the the truth than if he had lied from beginning to end. first rank of society, in the highest grade of the legal profession, in the position of arbiter of morals to the clergy of the Church of England, stands Sir Travers Twiss, Queen's Advocate, Vicar-General of the Province of Canterbury, and Chancellor of the Diocese of London. This gentlemen, whose position should have rendered him, like Cesar's wife, above suspicion, some ten years ago, being then past middle life, married a young lady of considerable personal attractions, and said to be memthe married a young may of considerable personal attractions, and said to be member of a noble Polish family. Lady Twiss, by virtue of her husband's position, was admitted into society, and was presented to the Queen. But while to the outside world no household seemed more free from reproach than that of the Vicar-Gencral, there was a terrible skeleton in the closet, for this man Chaffers professed to have had with Lady Twiss-before her marriage-an intimacy of such a nature as nave link with Lany rwiss—before ner marriage—an intrinse; of sient a nature as would place her at once among the most degraded of her see, and it is asserted be used this foreknowledge, real or pretended, for the purpose of extorting money from the unhappy husband. The patience of his victim at length being exhausted, Chaffers, in April last, went to the police-court, at Bow-street, and there made a statuters, in April 668, went of the point-count, as nowseried, and there inside a sami-tory declaration, swearing, besides his own intimacy with Lady Twiss, that she lived with Sir Travers as his mistress for some time previously to their marriage, and entering into the minute details of an abundoned career. Copies of this details ration he forwarded to the Archbishop of Canterbury, to the Bishop of London and to the Queen's Proctor. They at once had the documents they had received before Sir Travers Twiss, and, of course, utterly disbelieving the allegations, gave him the only advice which, as honorable men, they could give him, namely, that he should prosecute the libeler. The advice was taken, and it is undoubted that throughout the progress of the trial the sympathy expressed for Lady Twiss was as universal and as profound as was the indignation aroused by the cowardly attacks of the defendant. This feeling was heightened by the straightforward dignity and simplicity with which the lady distinctly and emphatically contradicted on oath one and all of the charges brought against her. Then numerous witnesses were called whose evidence, if trathful, made the allegations of the defendant absolutely impossible, and it was anticipated by all that this foul excrescence on the outer stages of humanity would ere long receive the due punishment of his crime. It may therefore be understood with what disappointment, with what sorrow, London therefore be inderstood with what disappointment, with what establish the learned on Wednesday that the prosecution had collapsed, that on the very day on which the defendant was to call his witnesses, Mr. Poland informed the magistrate at the Southwark Police Court that "Lady Twiss had determined not to appear again, and had left London.

This abrupt announcement left to the magistrate no option but to discharge the prisoner. In doing so, however, Mr. Benson made some remarks which should be well weighed by the public. Expressing a fear that the results of the trial would be terribly demondizing, and would cause the vulgar and uneducated to believe that any libel, if true, was justifiable, he pointed out that no greater mistake could be made, and that the real offence of a libel—legally lay in the malice or intention with which it was written. Then, turning to the detendant, he told him that, although discharged, he would be to the end of his days an object of contempt to all well-thinking men, and he warned him against continuing his "frightfultyramy," and against thinking he would be acquitted by any civilized society for bringing and breath of the land; and here we may be content to leave Mr. Alexander Chinfers, who is by no means a savory subject for comment, to the tender mercies of the Law Institution. For the unhappy woman whose antecedents have thus ruthlessly been made the subject of inquiry, we can have no feeling but one of profound pity. Expressing no opinion as to the truth or falsehood of any of the statements made in the poilee-court, it is, at least, clear that, since her marriage, her conduct has been irreproachable, and our gorge rises as we think of the despicable and miscrable week the balasted her future happiness. But, if possible, even more deeply do we pity Sir Travers Twiss. The career which has been so honorable to himself and so useful to his country is perforce at an end. But while we admit the imperious necessity of his retirement, we may, at least, recall with respectful admiration the salient features of his life. A fellow and tutor of University College, Oxford, Dr. Twiss was Professor of Political Economy in his university from 1842 to 1847. In 1852 he was made Professor of International Law in King's College, London, and in 1853 Regime Professor of Civil Law at Oxford. Of his legal dignities we have already spok

into play a new engine of extortion, and it is rather startling to discover the loose manner in which declarations are taken and wilmessed at some of the metropolitan police courts. It may be taken for granted that, had Chaffers' statement been read by c.erk or magistrate, he would not have been allowed to make the declaration; but the fact that it was made at all suffices to show the necessity of a change in the law making obligatory some such regulations as are already in force at the Mansion House, where no criminal charges can be made except in open court and after proper notice. As the jackal in the wilderness, the rat in the sewer, and the skunk in the prairie have their uses, so, if this case shall lead to this very necessary amendment of the law, even Alexander Chaffers will not have lived altogether in vain, but will furnish one more proof that the Omnipotent has a purpose in fashioning even the meanest of his creatures.

# Granite Works of the Ancients.

We quote the following from an exceedingly interesting account of the colossal granite structures of ancient Egypt, India and South America, which appears in the current number of the People's Magazine: "The art of carving in grante has never been carried to higher perfection than on the continent of India. At Chilambaram, also in the Carnatio, and on the Coromandel coast, is a congeries of temples, representing the sacred Mount Meru. Here are seven lofty walls, one within the other, round the central quadrangle, and as many pyramidal gateways in the midst of each side, which form the limbs of a vast cross; consisting altogether of twenty-eight pyramids. There are consequently fourteen in a time, which extend more than a mile in one continuous direction! Nor are these the only wonders associated with this metropolis of pyramids. The interior ornaments are in harmony with the whole; from the nave of one of the principal structures there hang, on the tops of four buttresses, festoms of chans, in bratch shout 54s feet. Each garland, consisting of twenty links, is made of one piece of granite sixty feet long; the links themselves are monstrong rings, therty-two inches in circumference, and polshed as smooth as glass. Compared with the monolith temples of granite at Mahaba'ipuram, which is likewise situated on the Coromandel coast, those in Expt sink into insignificance. The rocks thereabouts are composed of hard grey granite, containing quartz, mica and leispar, with a few crystals of hornibende interspersed. Many have been hollowed out by art, and sculptured into temples with spirited bas-reliefs, representing episodes in Hindu history and mythology, and supported by graceful columns; all carved from the solid rock. Detached masses have been cut into shapes of elephants, tigers, lions, bulls, cats, monkeys and various nondescript monsters, and colossis, date of the remples is about forty-nine feet in length, and in breadth twents-five feet: it is rent by natural causes from summit to base. According to the local B

— Henry Ward Beecher, in a lecture recently delivered at Yale College, defines true worship to be a "supersensitiveness of supernal feeling." We were glad to see this, for we have often wondered whether true worship consisted, as to its essence, in the paid choir, the big organ, the little organist, the deagenous deacons, the cadaverous sexten, the parson's "sounding brass," or the soprands "tunking cymbal." The attitudinarians, like Dr. Ewer, would try to persuade us that it consists in genuticxions, medieval dresses and Greek oils asa means of greacs. Sendeder, Stone, Spurzeon, Cumming & Co. locat: true worship in the hearing of sermons, and ask, with some show of reason, how can men worship when they don't believe, and how can they believe without hearing, and how can they believe without hearing, and how can they hear without praching, and how can a man preach except he be sent-his quarterly stipend regularly? But Beecher gives us a higher and clearer definition. True worship is a "supersensitiveness of supernal feeling." We know this is the correct one, because it exactly expresses our own feeling on getting up on a fine. Sunday morning and perfecting that the labors of the week are over. A friend of ours, moreover, who was accidentally hanged and resuscatated with difficulty, says that this was precisely his state of feeling when all feeling left him. Our dog Jack, who is keek vice "the relics of our leg of mutton.

The "Taranaki" sand, N. Z., is supposed to be identical with the famed beach sand of California. It is now used in the manufacture of the finest quality of steel, and emery paper for burnishing metals.

# Winter Song of the Soul.

We miss the sweet music of fountains,
We miss the glad song of the breeze
That breath'd from the faraway mountains And then, not a dark veil remaining,
Upon the green harps of the trees.
Yes, Winter, we miss the sweet glowing
Of Summer's Queen over the land;
Then let for a time temperst roll;

Of Summer's Queen over the land; Then let for a time tempests roll; An why hast thou fettered the flowing of brooks by thy terrible hand? Sum season in matter's for dying. But no one was made for the Soul.

# Immense Crops--Jubilant Farmers.

From every section of the State we have the most gratifying intelligence of unusual prospects for abundant crops the present season. Especially does the wheat yield promise to be immense. Colusa county, which chains to be the banner wheat producing county of the State, has never had such a large area under wheat as at present. In Sutter county, the farmers calculate that they will harvest a larger crop than they have ever had before. The crops in Tulare valley promise an exceedingly rich yield. An immense crop will be produced in Berrycssa valley, the wheat looking better in that section than has ever been known. In the valley surrounding Salinas City the growing grain is to be seen for miles in a most healthy and promising condition. In many portions of the great wheat regions of the San Joaquin valley, the grain crop is reported as something wonderful. It is not uncommon to find individual farmers there who have sown from 2,000 to 4,000 acres. It is stated that on the west side of the San Joaquin, in Stanislaus county alone, there are over 100,000 acres of continuous wheatfield. In Napa county there never were better prospects for an immense yield. On the cast side the area is said to be three or four times greater. The Napa Reporter says that from Antioch to a point twenty-five miles above Hill's Ferry, a distance of at least one hundred and fitty miles, the whole country is one continuous wheat field. It is a sight to gladden the eyes of the beholder, and especially of those who have passed through two successive vears of disaster. The vield of the wheat crop of this State for the present year will be immense. Mr. Friedlander, an excellent and reliable authority, estimates that we shall have 20,000,000 bushels of wheat for exportation, which, at one dolar per bushel, will yield us \$2,000,000. All other kinds of grain crops promise exceedingly well. The fruit and grape crops were never so promising. No wonder that the sturdy farmers—the salt and saving-power of any State—are jubilant, With them we wax fat in

### Disraeli.

Disraeli will have positively nothing to do, if he can help it, with the Alabama affair in its present condition. He is full of pluck and vigor this session, quite jubilant and confident. He still looks wonderfully young despite his awkward, shuffling, slinking walk, and his stooped shoulders. A few evenings since I saw him pass along Parliament street, leaning on two friends. Everybody looks dafter him. He is a much more remarkable figure in the street than Gladstone or Bright. Let me describe him as he then showed: A tall man, with stooped and rounded shoulders; a peculiarly-shaped head, fast denuding itself of hair, but with the hair that remains still black as ever; a complexion of dull brick-dust; a face puckered up like an old mask, or as if the wearer of the face were always screwing up his lips to whistle, and never accomplishes the feat. A small chin-tuft adorns the countenance; and, let me add, that the expression on the countenance is lngibrious enough to become an artistic and conscientious mute ata funera! A long gray or white outer coat reaches nearly to the ankles of this remarkable figure; and beneath the coat might be seen trowsers of a darker gray, and very neat boots. There was something of the air of a decayed and fading dandy about the entire personage, which, joined with the odd walk, and the stooped shoulders, and the chill gray atmosphere of the early evening, diffused a sense of gloom over the meditative spectator. Was this, then, the brilliant, eccentric and dashing man of genius, who used to be the cynosure of eyes in Lady Blessington's bright salons, who wrote "Vivian Grey," and came out as a wild radical, and proclaimed that revolution was his forte, and challenged O'Connell to a duel, and heard the chimes ever so long after midnight with the elderly gentleman now vegetating at Chiselhurst, who was then Prince Louis Napoleon? Yes, that was he. "There goes old Dizzy," said a working-man, as the great politician, romancist and adventurer shuffled along...—Austh McCarthy.

— We shall take the earliest opportunity to state the results of the two Committees on the vexed question of Goat Island—in truth, exult in proclaiming to our readers that there is very great probability that the whole antagonism will end in a solution much to be desired and an announcement that "peace reigns in Warsaw,"

# A Paper "Without a Rapp."

The little Post eprice one cent,) has changed hands. George, Hinton and Rapp have sold out. The notion prevails that one Thompson on the P. who was formerly connected with the Builtin, has purelased the whole concern, backed by some mysterious unberne, various y surm sed to be the Central P. with R. cond, the Thirty-little Praded Railroad, the International Society, the Tanapayers Union, the Chief of Polyce, and Sherid Adams. Thompson boughts fourth interest in the paper some moneths some, but being a Crommat man, brought agent to rest have some moneths some, but being a Crommat man, brought agent to rest have been a Crommat man, brought agent to refer have the paper some moneths when the first continue that the state of the supering up its squad may set dividing for so small at the Rail Society at the Post, and after its fartesial force in the multicinue referrit buriness and the withdrawl of its eart Rapp, there is reason to four that the control rang survive. At least there mould be reason for a tear of this kind if it were not for the fact that the untryding who has really bought on the fact that the untryding who has really bought on the paper is Brother P. ekering. The fact is that Thompson is Bro. P's man Fraday; Brother P. somites to become the chef recentistic power on this coast, next to the Centra-Pacific Rullead. He dready controls the Frencia Bulletin, the Moning Bulletin, and the Manning Call. But this does not safely a Boo P's notion production and the Manning Call. But this does not safely a Boo P's not be four. The sum, day daded up to two chains to provide a both to be the teach of the Pack of Bro. P's the Bro. P's the Bro. P's sum of \$11,000, which he pend trove has been been a Brown and the Hall Bro. P's has been a lamply, theorge not safely a beauting the same of \$11,000, which he pend trove halls men Friedy to be an all bappy. George not Season to the Booth has been all bappy. George not Season to the Booth has past in Brown, late of the Bulletin and Maphalail late of tween George, Rupp an

## A Rome-Antic Sketch.

The Rev. C. H. Spurgeon, prince of thumpers of the tub of non-conformity, chief purvever of Baptismal comfort to the milion. Boncional of the convenience and light and glory of the casses region of Newngton-butts, is encoding to the convenience and light and glory of the casses region of Newngton-butts, is encoding an analysis of the extraording blessed with a more than ordinary amount of that which the goody word assignation, and the ungoily well, sed-possession, a different order of interior in the property of the substration and the ungoily well, sed-possession, a different order of interior in the property of property of the p

—A distinguished clerggman, who delivered a discourse at Res. Mr. Hemphill's installation, said that "the gospel ministry had made the other two sarned professions respectable." That is to say, law say's among the heathen were disreputable, but are bighly proper among Christian brithren. And those who practiced the healing art previous to the Christian era were unworthy of decent society, but a believing sawhenes is a very respectable man. What do our doctors and lawyers say to this? Haven't they anything to do with making the clerical profession respectable?

paper, the MM, labers fearfully in its issue of Wednesday, to prove that Mrs. —, the minister's of church, has instituted a new) and very attractive little annusement for hard clore and "ladres fair," who may visit the present her during the day time. We presume it was intended as a puri for the benefit of the church, or the WeB, it is difficult to tell what the MM ever means. Stepidity, when it is amusing, will be forgiven; but when it makes a church an assignation house it ceases to be funny.

## Gallantry in India.

I wonder whether they allow the latest news to circulate in Paradise. Whether, as a crowning bilss, the peris occasionally hand round a dump copy of the Times. I have in my mind's eye a scene: it is a pleasant grove where three old warriors are walking along arm-in-arm; they are Wellesley, and Outram, and Clive. He in the middle is reading the latest telegrams from Calcutta. He reads how in the neighborhood of Delhi camp, where were 15,000 picked men, there was a multiny among some 200 or 300 natives, men and women. How our galants soldiers hunted then down; how four intrepid warriors captured 6s of the desperate men and women, who were indeed half famished and terrified, but still very terrible. How the brave Deputy Commissioner Cowan, with unflinching valor, ordered 50 of them to be blown into nothingness from the mouths of guns—a death in anticipation only equal to that of being boiled alive. How one escaped and ran at Mr. Cowan, and might, to the endless remorse and sorrow of all Christian souls, have rid the earth of that sweet creature, but that a valiant hero cut down the unarmed wretch. How 49 were thundered and shattered into eternity, when a letter came from Commissioner Forsyth, foolishly recommending some kind of trial. he himself, good man, having put sixteen out of their missery, hanished two and imprisoned ten more. And then the old hero reads the date, "February, in the year of our Lord, 1872."

\* \* On consideration, I don't think they do allow the latest news to circulate in Paradise. —The Hornet.

### Earth Movements.

Sir Charles Lyell and Dr. Chambers have made us familiar with the fact of the upheaval of the Scandinavian Peninsula, and M. Reclus adds many curious details. Certain fine woods in Norway are "continually being upheaved toward the lower snow limits, and are gradually withering away in the cooler atmosphere; wide hets of forests are composed of nothing but dead trees, although some of them hats stood for centuries." The Gulfs of Bothnia and Finland, like vessels tilted up out of the horizontal, slowly pour their waters into the southern basin of the Baltic. Fresh islets appear, and M. Reclus contemplates a remote future in which the Aland Isles will become connected with the continent, and will serve as a bridge between Stockholm and the Empire of Russia. Of South American weare told a very curious thing. The western coast, from the island of Chiloe to Callao, is upheaving: Patagonia and Brazil are sinking. "Then a large portion of the South American continent is constantly gaining on one side that which it loses on the other, and is gradually making its way through the ocean in a westward direction."

# Marriage of the Emperor of China.

The Emperor of China is soon to be married, and has imported a lot of elephants to assist at the exercinony. His future consort is undergoing a careful training in the etiquette of court life. For three years the looms of Nankin, Hongehan and Canton have been engaged on the silks and satins for her bridal tronssoan, and just now they are announced as completed, at a cost of nearly half a million nour money. White the bridegroom, who has the sun for his emblem, goes forth in a car drawn by elephants, his bride, who represents the moon, is to be borne to her palace in a palanquin composed entirely of strings of the incomparable silk grown only in the province of Che-Kyang and monopolized by the Imperial family.

— The "San Francisco Directory," recently published by Mr. Langley, who has been fifteen years engaged in that specialty, asserts that the population of this city is over 178,000, while the United States Census for 1870 makes the number about 20,000 fewer. We are of opinion that Mr. Langley is correct, his observations and inquiries having been carefully carried through a long series of years, while those of the Government officials were necessarily obtained within a limited period, and the results of unpracticed, inexperienced canvassers.

They say in Madrid that the Queen of Spain is the ablest woman that has sat on the Spanish throne for many years past; that she has brought about the consolidation of the conservative parties under Sagasta; and that she will prove more than a match for the adversaries of her husband, Amadeus. Amadeus himself has little taste for political life, and devotes himself almost exclusively to the study of military affairs. As soon as the present complications in Spain are brought to a close, he intends to make an extended tour through France.

<sup>—</sup> We are pleased to note that Colonel J. P. Jackson, formerly President of t California Pacific Railroad has bought the Napa Soda Springs for \$120,000.

# Wayside Gushings.

BY MES. HARRIS.

DEAR NEWS LETTER: T'other hevenin' vile takin' our tea,

Sayrah 'anded me a playbill, and, quite hinnocent, says she,
"I picked it hup, missus, and I vant you to explain
Them there 'orrid 'ard vords. Votsomdever do they mane!" So puttin' on my glasses I looked at the sheet, Vich announced to the public a werry great treat, To be given by McCullough at the California Theayter, And th' adwertisements did say it were goin' to create a Werry big sensation all hover the city, 'Cos the scenery were superb and the hargument vitty.

Says Sayrah: " Vot do they mean ven they calls it 'spectacular?" I were floored, so I frowned and looked werry oracular, As I does ven she asks questions hout of my reach.

As I does you she asks questions hout of my reach,
As taxes my knowledge of the warious parts of speech.

"It's connected," says I, " with hoptic hilloosion;"

"Vot! calico 'ops as takes place in profocsion
In vinter?" "'Not werry much calico, Sally,
Is cenerly to be seen on the corpses do baily."

"Vot's the meanin', then," she says, " of Terpickyrean?"
Says I, " "It's a troop as was wunst European,
And was brought "ere by McCullough, who paid their expenses,
Vich their legs do quite captivate the masculine senses."
"Them corpses you speak of," says she, "Mrs. 'Arris,
Io you mean for to say they're himported from Paris?
Who'd a' thought in so wirrousa country as France.

Who'd a' thought in so wirtoous a country as France, That corpses of females were permitted to dance? Owsomdever, dear missus, please take me to-night To see this terpsicky, spectacular sight."

I took 'er, for 'tis 'ard to refuse a request I took 'er, for 'lis 'ard to refuse a request From a hinnocent maiden ven werry 'ard pressed, And I wish that I 'adn't, for since seeing the bally, A change 'as come hover the constituent on Sally, And the gal, as was always of a serous turn of mind, 'Ave took to standin' on vnn leg and kickin' out be ind, 'Vleh she did it last Sunday, and, says I, "Keep it 'oly Arter six days of labor," 'I'm a doin' Wenturoli A valtzin' on 'er toes, and I'llbe a darnsoose, And it's no nee bein' hangry, for I'll dance ven I choose."

O Lord! ven I 'eard that 'ere child of adopshun O Lord! ven I'eard that 'ere child of adopshun A tellin' me she meant to follow 'er own hopshun, I felt that combusted that I give 'er a crack Vith the 'arth broom, as laid 'er out flat on 'er back, And, says I, "'I'll forgive yer, but don't do it again' — Says Sayrah, "Mayn't I himitate Mamiselle Gaugain And that sweet Wenturoli!''. 'Wentur' nothin, 'says I, And I give 'er the flatiron right hover 'er eye. I'm werry much a-feared she may take to the stage I'm werry much a-leared see may take to the stage For a livin', vich the thought of it puts me in a rage. Should McCullough engage that 'cregal for a dancer, I'll take hout a summins an' 'ave 'im' 'eld to hanswer For abductin' a hinfant as is 'Arris's by rights, And hinweiglin' 'er into vearin' of flesh-colored tights. French capers is good as a sass vith vun's dinner, French capers is good as a sass vim vum a unuter, But to turn 'em into dancin'—I didn't think it was in 'er, As I've trained from a hinfant to learn texts of Scriptur' 'Owsomdever, ve'll see the effect now I've whipped 'er.

All the rest of the com'dy 'cept that corpse of Coryphees, I thought 'ighly hinstructive, as did haudibly please Both Sayrah and me. Ve vos charmed vith the founting, Vich they calls it prismatic, as kep' on a mounting In cascades of all colors, and the green mixed vith red Were that gorgeous it give me a rainbow in my 'ed.

And says I, "'Twere well, Sayrah, from our hearliest youth,
To pay frequent wisits to the Palace of Truth; This com'dy reweals the hinside of hooman natur',

As is 'id in real life but seen at the theayter.'

I vent to the 'Ebrew Benevolent Ball Last Saturday hevenin' in Platitude 'All, Not becos I ain't a haughtydox Christian in creed, But vos hasked so to do by a Hisraelite indeed, Who 'ad lent me a trifle on poor 'Arris's pants The same day that he died, for lone vidders's vants As 'ave to wear mournin' ven a 'usband is took, Is that noomerous they must 'ave cash by 'ook or by crook. But prewious to goin' to the ball I took down

My Family Bible, as is grown werry brown With hage and hoblivion, and I says to young Sayrah, "Please to read me the 'istory of Joseph an' Pharer, Likeways Habram an' Hisaac an' Samuel an' Moses, As were patterns to hinfants, for, says I, I supposes 'Tis rekisite afore goin' to an 'Ebrew festivity To be hable to conwerse on their Babyloanish captivity, Vich the vord do bring mem'ries of cash loaned by Jews On baby linen, ven the hinfamts 'ad no further use Of sich childish wanities, 'avin' bin put to sleep By 'Arris's Syrup, vich in them days I did keep. The comp'ny was select, and the ladies in carriage
That gracefu! no vunder they vos much sought in marriage
By helderly patriarche like Joshyhat an' Solyman,
Who from all ve do read must 'ave bin quite a joily man.
The heyes of them Jewesses is that yieldin' and tender,
Their figgers is that slim an' their valsts is that slender, An' the jewels they year is so fine and their dresses So helegant and rich, that combined vith black tresses Of 'air vorn vith taste, I don't vunder that Ruth And Rebekah made 'avoc in the 'arts of 'Ebrew youth, And Rebekan made 'avoc in the 'arts of 'Eorew youth.

They vos 'orrified at my sayin' I'd 'ave some pork pie

Ven supper time came, and a 'andsome young Rabbi

Who sat next me, and looked as though I'd said something hawful,

Did hassure me that even 'am sandwidge is hunlawful

On tables of stone, but, says I, "On ma'ogony

Shew me where it's forbid from Revelashuns to Dooterogony,

And vot can be more tender than suckin' pig stuffed,

As eats jist like an hinfant?" But his look was that huffed,

Law 'Buve no good to beynetiste my kiewe. I saw 'twere no good to hexpatiate my views A tellin' them I'd hargued vith an 'Ebrew' igh priest, Vether suckin' pig were not a digestible beast. But this I vill say, that the 'Ebrews is kind To the poor and the friendless, and let Christians bear in mind Ven they gets into debt and their rent's hoverdoo,
Ahe only vun vith money to 'elp 'em is the Jew,
Tnd but for circumcision and sleepin' in the boosum Of Abraham before 'alf the Christians I'd choose 'em.

# Special Brevities.

It seems that the leprosy, the horrible disease so frequently mentioned in the Bible, and which was known to the ancient Greeks, still exists upon the American continent. The "eldest daughter of death," or the dephantiasis Greecorum, is fortunately confined to one or two sea-coast villages of New Brunswick, near the Miramichi river, and is said to have been implanted there a century ago shipwreck. A vessel coming from the Levant was thrown upon this shore, and the inhabitants seized and divided the bundles of rags which were brought in by the waves. The people of this locality are French descendants of the Basques. A person attacked by the disease became at first deadly white and waxy, losing sensation, then red and swollen, then covered with livid spots. Death by the leprosy is said to be horrible. It is consoling to hear that the disease is not contagious, and that it is not necessarily hereditary. A leprous mother often gives birth to and nurses perfectly healthy children. One doctor attributes the disease to a fish diet and the absence of bread; another thinks it the result of a specific virus well-known everywhere; but both of these theories seem to be controverted. Experiments are now being made, under the direction of the Government of New Brunswick, to ascertain the nature of the disease.

— The new loan for three milliards, about to be put out by M. Thiers, has had a very serious effect upon the public funds. The semi-official organs, speaking by inspiration, say that there will be no loan upon the market for six months at least. Even at the end of that time, adds the Bien Public, it has been already proposed to abandon the idea of a public loan, and to borrow the sum from a syndicate of leading bankers, "who have already submitted offers as serious in its eyes as those of the Cabinet of Berlin." We have no idea what is meant by this expression, never having heard of any offers of the kind from Berlin; but it results from the statement that a loan will be avoided if possible, and the three milliards borrowed from the great bankers. On this we can hardly agree with the Government, for we believe that there is money enough in France to pay the whole indemnity in a month, and that it needs but a good financial plan to do the work.

— Mr. Bright, replying to an invitation to the meeting in Birmingham to consider the recent outrages upon Jews in Roumania, writes: "I cannot attend the proposed meeting at the Town Hall. The outrages on the Jews, as reported in the newspapers, are very shockling. How slow the world is to learn what is just and right in regard to differences of religious belieft?"

- Among the plants from Guinea, one of the most curious is a cannon-bal, tree. It grows to the hight of sixty feet, and its flowers are remarkable for beauty and fragrance, being of a beautiful crimson, app. reag. in large batches, and exhaling a rich perform. The trust resembles have a mon-balls; hence the name. However, some say it has been so cathed because of the noise which the baldinarkes in bursting. From the shed domestic utonish are made, and the contents contents content south as everal kinds of weds, besides sugar and guin, and to most the materia for massing an excellent drink in sextenses. But, sangular is it may appear, this paip when in a perfectly ripe state is very fishly, and the odor from it is exceedingly unpeasant.
- The English consuls in foreign countries has a made an appeal for more salary and less work. It is generally admitted that they are the worst paid and hardest worked body of me in the sary so of the Breissh crown. With the present increased cost of hyme they can barely keep body and soni together. If they are hardly treated our consular officers have still greener reason to complian. We know many United States consuls who spend the whole of their salaries in office expenses and prices in representations. This should be at once remedied by Congress. Let us make a detent appearance before stem or seven though it be necessary to put a stop to official plander at home. American Register Paris.
- Mr. and Mrs. Barney Williams have arrived in Paris, and are stopping at the Hotel Chatham. Mr. Williams is somewhat improved in health, but not sundentify so as to warrant his returning home or resuming the lost of its profession party yet. In the meanwhite he occupies his bisure in the gratification of his artistic lastice. Since he has been on the Continent he has made meny additions to his faccollection of pictures, his purchases during the last three mounts from the Franch, German and Hadian schools having hear quite heavy. He is an excellent addition of works of art, and has been very fortune in his selections. American Registery
- In March, 1870, Mr. E. Hering, London, received a small piece of the front of a shoulder of salted pork, which was phosphores only and had a slightly putre-flective door. It emitted, in the dark, a binsh green beigh, strong chould to grad by. The museuplar substance was most humanous, on breaking the bone, the broken surfaces were strongly phosphoresecut. On scraping the surface with a piece of wood, the wood became phosphore-scent, and the hone crossed to be Neither water, muchage, nor ether, affected it, but nitric gold or heat destroyed it. The humanosity disappeared after three days, when patrefaction became intense.
- The Government scheme for the reorganization of the French army, it is said, prescribes universal liability to military service for all Frenchmen from twenty to rorty years of are, and abolishes the right of subsolution and the granting of boundles. Exceptions are made only in such cases as the only since widows, eccasionation students, and schoars in the multary schools. A structer recruiting system is being carried out in Germany, and in its check, it is estimated, will be to give 40,000 more men to the reserve every year, and to raise the available forces in twelve years to 1,700,000 men.
- At a sale at the Hotel Dronot, of the collection of stringed instruments left by the late Durand Durous, an undoubted Amart voluments soil for sle notes, and a macrific and side by Stradivarius, for 4, see frames. This arter had been brought several years back from Italy by M. Tarrsier, a deader which knows to the other of Paris and London, and was purchased from him by M. Vuibaume, the vicilin maker, who disposed of it to the late owner, now deceased. The present possessor is M. Manaza, an amateur of Paris, well known for his extensive accumulation of fine instruments.
- first a bridgeroom in Cleveland kept the wedding ring in his mouth during the first part of the exementy, so that he could find it when the right time arrived. He mumbled the responses all right till the minister worked at him as a hust to produce the ring, when, in his nervousness, he swallowed it, and the marriage had to be concluded without a ring.
- An injured husband at Berlin has posted the following "notis:" "My wife having deceived me in regard to her age before her marriage, claiming to betwenty-six only when she was thirty-two, and had take teeth, while I am only twenty-two and have sound teeth; therefore I wil, pay no debts of her contracting."
- A Russian printer has invented a type-setting machine which, the St. Petersburg papers assert, for surpasses all sinear machines that have hitherto been produced. It sets in an hour thirty thousand letters; it costs five thousand rubies, and one thousand letters set thereby cost only five cents.
- Russia has, according to the recent census of the empire, eight cities of between fifty and one hundred thousand anhabitants, viz.: Odessa, 121,000; Warsaw, 180,000; Moscow, 190,000; and St. Petersburg, 662,000 inhabitants.
- A New York newspaper states that the Japanese have suddenly evinced a passion for pel animais. Any one who has pet rabbits to sell had better export them to Yeddo at once, inasmuch as three fetched \$50.
- Five of the leading Paris publishers are making efforts to secure the copyright of Fla Memoirs of Trategrand, which will shortly be given to the world and published in five languages simultaneously.
- It is rumored that Mr. Tenny son is engaged on a poem on the illness of the Prince of Wales, and that it will appear shortly.
- It is said that Mr. Swinburne has written a poem on the death of Mazzini, which will appear in one of the April magazines.

### Court Chat.

A case very similar, in many of its features, to the Tichborne affair, is about to be brought before the Constantinople Courts of law. There is in London a young Turk about twenty-five years of age. He calls himself Mastapha Djehad Bey, and he claims to be the son of His Highness the late Kibrish Mehemet Pasha, exgrand Vizier, and formerly the Sultan's Envoy at the Court of St. James. The claimant has entrusted his case to a firm of English solicitors, and it will be prosecuted by English counsel at Constantinople. His claim to the property of Kibrish Mehemet Pasha is based on the following statement, for which, of course, we do not voich in any particular: In 1840, Kibrish Pasha married the widow of a Kuranean physician of Constantinople. not voich in any particular: In 1840, Kibrish Pasha married the widow of a European physician of Constantinople, and had by this lady a daughter and a son. The son was born in 1847, at the time that His Highness was Governor of Belgrad, in Servia. The birth of the heir was celebrated with a considerable display of rejoicing. In the year 1948, the Pash was sent to the British Court as the Sultan's Representative. During his absence the child Djehaā became seriously ill, and his mother, Melek Khanum, suffered much anxiety on his account. The loss of her only boy would have been for her a very serious matter, since the Pasha might be induced to marry again. Accordingly Melek Khanum had a consultation with a veryon of the name of Fattersh described as the lady stayard of the latersheaf as th woman of the name of Fatmah-described as the lady steward of her harem and decided on averting the dreaded evil by feigning that she was about to give birth to decided on averling the dreaded evilby leigning that she was about to give form to another child; and to carry out this deceit a child was to be bought or borrowed. This was done, and the Pasha (who was then in London) in due time received the news that Heaven had blessed him with another boy. But things did not turn out altogether according to expectation. The first-born recovered from his illness. The woman Fatmah and one of the cunnebs, named Boshir made use of the secret The woman Fatmah and one of the enunchs, named Boshir made use of the secret of the borrowed child, and dicinted to their mistress and the whole bousehold. But when they had achieved this, they began to contend between themselves for absolute supremacy; the Pasha's wrie, it is said, all this while playing a very humble part—the part of one who had put herself entirely at the mercy of others. In vain Melek Khanum tried to appease the contending parties, and restore order to the house. Fulling altogether in this, she asked the intervention of the Pasha's amoof business, Reshid. Effendi, who, however, took it all very lightly, as a woman's quarrel. Thereupon Mme. Kibrisli resolved to dismiss Fatmah, at the same time quicting the cunnet by gifts of money. A little while afterward, during a reception given at Mme. Kibrisli's residence, he was smothered in his bath. Mme. Kibrisli's residence, he was smothered in his bath. Mme. Kibrisli's residence, he was smothered in his bath. Mme. Kibrisli's nest dence, he was smothered in his bath. Mme. Kibrisli's nest dence, he was smothered in his bath. Mme. Kibrisli's nest dence, he was smothered in his bath. Mme. Kibrisli's nest dence, he was smothered in his bath was not such as the same time. tion given at Mme, Kibrieli's residence, he was smothered in his bath. Mme, Kibrisli was charged with implication in the murder, but the accusation was not substantiated. While the trial was going on the Pasha was summoned from Loudon, and hastened to Constantinople. On his arrival there he found affairs in a hopeless state of imbroglio, and he divorced his wife. This done, the question of the legitimacy of his children arose, there being a natural suspicion that if one child had been borrowed the origin of the others might be doubtful. The question being had been borrowed the origin of the others might be doubtful. The question being put to the wife, she declared that the child Djehad had been borrowed also. But she now maintains that she was actuated in so doing by a feeling of revenge, awakened by divorce and the Pasha's second marriage, which soon followed. From that time the boy Djehad has been a wanderer over the earth. He spart some years in Egypt as a domestic servant; he joined the Papal Zonaves; he has been a lay immate at the convent of St. Lazare, in Venice; and, at his reputed father's death, which occurred in September last, he repaired to England, the land of portentous lawsuits, there to prepare his claims to Kibrisli Pasha's property.

A curious story is told of two Italian celebrities. One day, when Count Cavenr was still alive and in power, Sir James Hudson, the English Ambassador, asked for an andience on behalf of an English gentleman. The great Minister, who always kept very early hours, appointed five A.M. for the interview. The visitor was punctual. He was the ideal of an English gentleman, with stately manners and irreproachable attire. He hid before the Italian Minister a complete scheme for the renovation of Italy. Cavour, who knew the whole question well, was amazed at the boldness, lucidity, and comprehensiveness of the design, but finding it difficult to follow him in English, he asked whether the traveler knew French. The gentleman at once spoke in pure and elegant Italian, and completed his explanations. When he arose to take leave, Cavour said to him, "You talk polities like Machiavelli, and Italian like Manzoni! If I had a countryman like you I would cede to him my place as President of the Council. What can I do for you?" "If you had a compatriot like myself," replied the strange visitor, calmly, "you would sentence him to death. You ask what you can do for me in return for my counsels? I answer, not upon them and deliver Italy. Until then, the protection of Sir James Hudson is all I require." So saying, he courteously withdrew, leaving a card, on which the astonished Minister read the name of Mazzini.

—The Parks Journal has received a dispatch from London announcing the

— The Paris Journal has received a dispatch from London announcing the death of Lord Lonsdale, the inventor of postage stamps. "His Lordship," says this paper, "was the owner of several quarters of London, and his fortune amounted to 7.000,000 francs a year. He had a peculiar liking for dogs. In his magnificent palace of Richmond, where he received the greatest people of England, the politicians of all Europe, and the actresses in vogue, he generally arrived preceded by a large number of dogs, and armed with a large bag filled with bones, which he would toss to his canine friends. The sight of these animals fighting for the bones, reckless of sumptuous furniture, much amused his lordship. No enterprise was ever started touching the honor of England to which the Earldid not subscribe a million.

- A grand fancy-dress ball was given by the "Speaker" and the "Government" of Fiji on January 3d, at Levuka. About seventy gentlemen were present, and thirty ladnes, only a very few of whom were able to appear in fancy costume. With the gentlemen, however, the case was different, and consequently there was a good variety of costume, from the gentlemen of the period, in "Fijian evening dress," whatever that may be, to oddities of all kinds. The Hon, the Speaker, after sustaining his part in the opening presentation, boldly took off his coat and went in for dancing with vigor in his shirt eleeves.
- The Unita Nazionale, of Naples, mentions that the King and Queen of Denmark visited Pompeii on the 9th ult., accompanied by Senator Fiorelli. Excavations were made in their presence which brought to high the following objects the remains of a wooden box containing eight bottles symmetrically arranged, six bronze vises, a marble table, some amphore and several eartherware vises.
- On Saturday, March 9th, the Prince and Princess of Wales left Mariborough House for the Continent. They arrived in Paris by mail train on Sinday morning. Their incognito was strictly respected. The Princess wore a close-fitting lemon-colored tunie, trimmed with Russian sable; a bonnet rather larger than Parisians are accustomed to see; brown feathers, and some unobtrusive flowers.
- Cairo is now one of the most charming places in which to spend a happy Winter, and so it appears the Duke of Satherland thinks, for he has just been granted a valuable piece of land clooking on the beautifur. E-bekand Gardens, three niles from Cairo, on which he intends building a large house as a Winter residence. It is to be begun almost immediately.—Court Journal.
- There is likely to be an addition to the catalogue of royal and noble authors. Princess Alice, of Hesse Darmstadt, wishes to offer to her own countrymen a picture of the domestic life of her husband's future subjects. For this purpose she has written a novel and given it the pleasant title of "Our Home Ways."
- The Right Hon. Lord Lisgar, Governor-General of the Dominion of Canada, will shortly be called home, and will be successed by the Right Hon, the Earl Dufferin, now Chancellor of the Duchy of Lancaster.
- The following is the balance sheet of the Cairo Opera for the season just passed: Receipts, 277,000 francs; cappased; Receipts, 277,000 francs; deficit to be made good by the Khedler, 728,000 francs.
- An annuity of £1,000 has been granted to Lady Mayo, and a sum of £20,000 is to be invested for the benefit of her children.
- Prince Otho, of Bavaria, the only brother and heir of King Louis II., is hopelessly insane.
- —A correspondent of a London paper writes from Brussels: "A singular spectacle attracted this morning a large crowd to the Grande Place. There were erected four posts, guarded by gendarmes, and to each of them was fastened by the public executioner a judgment of the Court of Assizes concerning criminals who had not made their appearance before the Court. Post No. 1 was assigned to Andre Legrand, clevated by the Pope, on account of his Catholic inancean schemes, to the dignity of Roman Count, and sentenced ast week by the Court of Assizes to ten years' imprisonment for fraudment bankruptey. Post Nos. 2 and 3 were occupied by the judgments of a railway cashier who had absconded with 60,000 fr., and of a bankrupt money changer. Post Nos. 4 told that De Plas, in religion Brother Celcus, had been sentenced to lifteen years' imprisonment for nameless offences."
- An important discovery has been made in Sweden. An extensive coal-bed of remarkable depth and excellent quantity has been struck near Raus, in Schonen. An enterprising company formed some time ago was encouraged by promising geological indications to institute borings, but the first results were hardly satisfactory. At a depth of 366 feet, eleven sirata of coal had indeed been pierced, but none of these exceeded a depth of 1½ feet. Five feet farther down, however, a bed was struck with a thickness of 8½ feet. The borings have been continued, and are believed to prove satisfactorily the existence of an extensive coal-bed. The shares of the company have consequently risen at a bound from 100 to 700, and great schemes are already affoat for monopolizing the Eastern markets.
- The ex-Empress Carlotta has now perfectly white hair. Her teeth are falling out, and she looks like a woman of sixty. Only her eyes are as bright as ever, and her form looks like that of a young woman of twenty-five. Her doctors believe that she will live yet for a year or two.

### The Poet's Dream.

A poet lay with blissful face,

His large eyes closed in sleep,
And round his soul strange fancies seemed She loved the moonlight's beauteous hue
To flutter and to leap—
Upon his coal-black hair; shone,
A shadow passed across his brain,
Hung in a sable sphere!

Hung in a sable sphere! He dreamed a noble maiden came, She softly pressed his sunken cheeks,

And kissed his faded lips, And heard his wild heart beat; As lightly as a tolling bee He thought the moments passed away
From honeyed woodbine sips;
From carth on goden feet:
And then his soul broke from its gloom—He ne'er had feit a joy before, From sorrow's dark eclipse ! So tender nor so sweet.

Within a wood he calmly lay
With flowers around his head-And soon the maiden passed her arm.
Around his neck so cold, The winds were sighing through the trees That seemed like to a lily clasped

Like mourners o'er the dead: Before his fancy keen and bright A glowing phantom fled! Within a marble mold—
His white hand 'mong her auburn hair,
Like ivory meshed in gold.

Fame came, he thought, with brilliant gaze
And took him by the hand,
To Shakspeare, Shelley, Byron—kings A figure like a marble saint Then won his slumberous glance,

Still and fair as a noble maid Locked in a midnight trance: Of the immortal land; And a thought or fame went o'er his soul, He saw and heard the singing spheres,

Long wedded to romance. The golden and the grand.

He woke, and then the maiden smiled, And softly spake his name; When o'er his soul her glorious look Passed like a silvery flame. Ye gods! what other dreams so fair As those of Love and Fame1

Brigham Young and his Fellow Prisoners Liberated.

The Supreme Court of the United States having decided that the indictments against the Mormon leaders are illegal, null and void, District Attorney Bates, of Utah (now in Washington), has instructed his deputy at Salt Lake to apply to Jus-Itah (now in Washington), has instructed his deputy at Sait Lake to apply to Justice Hawley and procure an order for the immediate discharge of the prisoners, as a further incarceration would make the United States Marshal liable for trespass. The decision is a very important one, and is a virtual declaration by the highest authority in the land that no portion of the people of the United States—however abhorent their religions faith—can be deprived of their liberties except by due process of law. In the prosecutions and indictments against the Mormons, Clief Justice McKenn, his associates, political intriguers and anti-Mormon religious sects combined to overthrow the liberties of the Mormon people by the United States Marshal summoning anti-Mormon jurors to render verdicts in suits against the Mormons. These "packed juries," in every instance, disgraced themselves by carrying out the instructions of their masters. The News Letter, and such able and influencial journals as the Cincinnant Commercial and the Louisville Courier Journal, denounced the outrages of the religious and pelitical bigods, who proved themselves to be even more fanatical than the Mormons. The law was plain in these prosecutions: the Marshal elected by the people was the officer legally emthese prosecutions: the Marshal elected by the people was the officer legally empowered to summon juries, and the Supreme Court has so decided. But the anti-Morman fanatics in their zeal twisted and distorted the law to carry out their put. Morman fanatics in their zeal twisted and distorted the law to carry out their purposes. They have ignominiously failed, and the American people can feel grateful and secure that the Supreme Court—always the pride and hope of the nation—will be governed by law and not by passions and prejudices. But this decision does not by any means settle the Morman problem, as it is called. It simply decides the point of law indicated. The political and religious institutions of the Mormons are not in harmony with our Republican Government. They are theoratic in every sense. But the work of harmonizing the "peculiar institution" is going on more rapidly than we imagine. The influx of a large mining population, of leading and influential Americans and their families, railroad influences and visitors from all parts of the world will gradually leaven the Mormon mass into American and cosmopolitan ideas. The better to ensure this end in a legal way, Mr. Voorhees, of Indiana, has introduced a bill in Congress "to aid in enforcing the law in Utah." The bill will undoubtedly pass both Houses, and when a law, will cover all the grounds needed to prosecute the Mormons legally. We are not of the opinion that this so-called Mormon problem is at all a serious one. The causes already at work for its solution will continue until the problem is solved.

One of the "three gentlemen" (?) who stole the plated spoons from the "Lone Villa" at "University Mound" has been detected. He is a perfect hog, and would not hesitate to steal a steamboat; he is a deeperate cuss, and fights well with his tongue; he was captured on an Oregon wagon road trying to "go through" an Englishman. Some hogs are victims to Law, but Law is a victim of this hog. Canes timids vehements alrant.

## " Big."

The Pacific Mail steamer America arrived on the morning of the 18th instant The Pacific Mail steamer America arrived on the morning of the 18th Instant with passengers, Government mails, treasure to the Bank of California, and a very valuable cargo. The leading items for this port were: Tea, 4,621 pkgs; Henp, 1,200 bales: Rice, 5,331 bags; Sugar, 173 bags; oils, Spices, Silks, etc. For New York, Tea, 2,846 pkgs; Silk, 306 pkgs; Spices, 33 pkgs. For Hartford, Tea, 5,800 pkgs; Silk, 37 pkgs; or a total of Tea, 8,003 pkgs; Silk, 343 pkgs. Merace to China and Japan will be commenced May 18th, subsidy or no subsidy; but that, we are quite sure, will be given for the important service rendered by the Pactife Mail Steamship Company. The rapid increase of the Tea Trade with China and Japan absolutely demands a semi-monthly service: without it the trade, to a considerable extent, would be lost to us. The announcement of a tri-monthly steam service to absolutely demands a semi-monthly service: without it the trade, to a considerable extent, would be lost to us. The announcement of a tri-monthly steam service to New York via Panama is announced by the press of this city, but of this no official advices have yet been received by the resident agents of the P. M. S. S. Co. L. W. Raymond, local agent of Webb's Australian line of steamers, has chartened the pioneer steamship Collifornia to carry the English mails and passengers to Honolulu on the 24th instant. The steamship Constitution solved for Panama on the 17th instant with a valuable cargo for New York and Pacific Coast ports, besides treatment, 6824,537, divided as follows: London and San Francisco Bank, \$500,000 to Callao, B. Davidson & Co., \$94,537 to England; and \$50,000 by John Parrent to Punta Arems. The ship intrepid, from Hongkong, arrived here on the 18th hist with a valuable cargo, say lice, 52,829 bags, Oi, 2,320 cs; Sugar, 2,959 mats, Pepper, 28b bags, ctc. It is charged by merchants that there is more Opium smuggling going on here now than ever before. The price in the open market is therefore greatly depressed here and prices both low and nominal. Advices from Hongkong by the America's mail say that cargoes of Australian Coal were there selling to arrive at \$16.50 per ton; that is better than sending to California. Tonnage was scarce in China waters, and high freights everywhere ruling. What has become of all the ships? Russell & Co's Hongkong Circular quotes California. Tonnage was scarce in \$20.75; Cloves, \$9.255a0 so. Black Pepper, \$14.25 to \$14.50. Nat (Oli, \$8.355a0 so.) Black Pepper, \$14.25 to \$14.50. Nat (Oli, \$8.355a0 so.) Black Pepper, \$14.25 to \$14.50. Nat (Oli, \$8.355a0 so.) Black Pepper, \$14.25 to \$14.50. Nat (Oli, \$8.355a0 so.) Black Pepper, \$14.25 to \$14.50. Nat (Oli, \$8.355a0 so.) Black Pepper, \$14.25 to \$14.50. Nat (Oli, \$8.355a0 so.) Black Pepper, \$14.25 to \$14.50. Nat (Oli, \$8.355a0 so.) Black Pepper, \$14.25 to \$14.50. Nat (Oli, \$8.355a0 so.) Black Pepper, \$14.25 to \$14.50. Na for this port

for the port.

The Bay Refinery has purchased 956,450 fbs Batavia Sugar, being the Gesiena's cargo of 1,739 baskets, consigned to James De Fremery. This vessel returns at once to Batavia with a full cargo of Flour, etc., including 2,000 bbls of the finest Extra (silk dressed) from the Golden Age and Golden Gate Mills. The California Refinery has received this week a full cargo of Sugar, direct from Central America, ex Energie, 4,011 bags, say 800,000 fbs; they have also purchased the Leopoldina's ex Energie, 4,01 toggs, say exclose 5,20 sacks central American, ex constitution, besides a small importation of Hawanan. The "spirit" of the Commerced Bridds agas: "An important law-suit is now on the tapis, growing out of a 40,000 gallots contract purchase of Spirits at \$1 20, owing to a third party to the contract having contract purchase of Spirits at \$1.20, owing to a finite party to the contract having furmed up, going between buyer and seiler, and pocketing fice, per gail, as his share of the transaction; he having actually bought the Spirits at \$1.10, seiling it at \$1.20, and then getting the distillers to make out the contract to the latter at the advanced rate, taking a note for \$4,000 as his share of the transaction, payable when the matter was closed. The Spirit has all been delivered, and half the purchase money paid, say \$22,000, but the balance refused unless the \$4,000 is deducted from the bill Some nice points of mercantile law will doubtless be presented on of purchase. the trial. The parties to this transaction are all prominent, wealthy business men.

the trial. The parties to this transaction are all prominent, wealthy business men."

The Stock market is all aglow. The pave is crowded with anxious expectants, both Boards are doing a smashing business; everyhody buys 'em-women and boys, old men and maidens—all are happy and content. Hayward's Crown Point is the beacon light around which all revolves. It is the center of attraction. Alvinza Hayward's lucky strike in the Grown Point caused him to try his hand with Savage, and that also turned to gold. It is gold here, there, everywhere. The excitement on the street corners of California and Montgomery is intense; it pervades commercial circles to some extent, but not to the extent stated by many, We hope of a few lucky fellows that have mude his attivas and whome the whom the Values comining the third way to be some carried and the carried way to the control when the some the some to keep the years the good sense to keep it, by quietly withdrawing from the arena of strife, which is sure to "bust" and engult the unwary some or later. The crash will surely come, by and by; wait till some of the big bugs, knowing ones, begin to unload -- then what? don't cry

Arrivals for the week include three ships from New York- Edith, S. G. Glover and United States-bringing assorted cargoes of general merchandise; the Clara Bell, with 4,224 bags Central American Collee; the Energie, with 4,011 bags Peruvian Sugar; three vessels with Sydney Coal—St. Nicholas, 2,563 tons; John Risson, 755 tons; Springwood, 1,495 tons—and El Dorado, from Chili, with Light tons Coal; two vessels from Carmen Island with Salt—Ocean Pearl, 400 tons, and tons cont; two vessels from Carmen Island with Salt "Ocean Pearl, 400 tons, and Frances Parmer, with 200 tons; three vessels from Tabilit with Oranges, etc., "Fire Fly, Nor wester and Vivid. Besides these, we have had a fleet of consters with Coal, Lumber, Wool and produce generally, including the Mary Ellen, from Santa Cruz, with 5,500 kegs California Powder.

The Committee of One Hundred has been published. Among the number we see one or more that have already "gone up higher" to render their account; others given are on the sick-list—not out—not able to attend to business "at all,

at all "—"O. K." There is fault found with the selections made; some of the biggest Front street merchants omitted from the list, passed by, and for a purpose, while others of their neighbors less prominent in business put on, and why? we will see. It's all nice, and be sure you'll see that the Central Pacific Railroad will get all they deserve. A compromise will be made; Governor Stanford will be king, with a three million purse of gold; a railroad bridge across the Bay, sure, Goat Island for a defeuse. A. R. Depot at Mission Creek for the Chima and New York trade; the Wheat, trade of the valleys will be concentrated at the docks in the city and county of Nan Francisco, whether at Goat Island warehouses, or docks at Oakland made after those of Liverpool. There will be business enough, gentiemen, don't be too greedy, Caiffornia is a great State; we are a great people; we have big mines of Gold and Silver, immense Wheat fields, millions of cereals for export, and Wool and Wine to cheer the heart of man. Come on, ye St. Louis men, we want all of you, with your 35th parallel Railroad. Come on, the Chamber of Commerce will greet you warmly. Caleb T. Fay and J. W. Stowe, with R. B. Swain, Washington Bartlett and Alphabetical Campbell are always around. Cone, gentlemen, be introduced to Mr. Frederick McCrellish, mother of the Press of Sancelito and San Francisco. Here, too, is Brother Loring Pickering, nursing mother of the Morning Call, Daity Bulletin, morning and evening, both weekly; Poet, price one cent, change invariably given.

Business marts continue to present scenes of life and activity; the presence of large buyers from the distant interior, drawing supplies by the Central Pacific

Business marts continue to present seemes of life and activity; the presence of large buyers from the distant interior, drawing supplies by the Central Pacific Railroad, is an encouraging feature. We have conversed with some of these parties, and judging from what we have seen, it is quite evident that we can sell them Coffee, Tea, Sngar, Rice, Spices, Dried Fruits, Oranges, and Canned Fruits and Vegetables, upon more advantageous terms than can be procured at the East. It is also probable that we can supply them with Blankets and Knit goods of better quality than can be had elsewhere. There are, however, certain kinds of goods made in New England, that can be procured there cheaper than we can furnish them, but for staples enumerated we can defy competition. So, therefore, we say to traders East of the Mountains, from Colorado, Utah, Montana, etc., come and see what inducements we have to offer; and ye, men of St. Louis, come buy our Coffee—new crop, Central American; it is better and cheaper than you can procure on the Atlantic board. Havaiian Sugar is a great favorite with Utah buyers they on the Atlantic board. Hawaiian Sugar is a great favorite with Utah buyers, they, for a year or more past, drawing constant supplies from this coast; besides, our Sugar Refiners are disposed to make special terms with large Territorial huyers of their products, as an inducement for them to buy here. Altogether, the way seems to be opening for this wast trade of the interior to come to headquarters for its supply. It only requires a personal visit to satisfy the most incredictous that this supply. It only requires a personal visit to satisfy the most incredialous that this is the true source of supply for them. Our exports overland for March Include the following, all in pounds, as we glean them from the books of the Central Pacific Railread: Australian Wool, 353,077; California Wool, 163,289; Tea, 509,555; Butter, 60,128; Salmon, 143,922; Quicksilver, 20,250; Powder, for Salt Lake, 100,289; Hops, 13,500; Wine, 173,970.

Hops, 13,500; Wine, 173,970.

The market for Dundee Goods looks cheering. With bountiful crops of Cereals in store for us we pay 17% of for Burlap bags here, 18c for invoices to arrive, and 146015c per yard for Hessians. Chemicals are advancing. Crockery and Earthenware improving in price and demand. Candles sell freely at 15 to 18c for Adamantines. Coal is scarce at \$13 for Australian, \$15 for West Hartley, \$12% for Chilipsell (180) of Candles and 18c 55% 55 for California. Coffees sell at 17c 619% of or Cumberland, \$10 for Pacific, and \$6.25% 55 for California. Coffees sell at 17c 619% of Central American, 18% of for Manila, 19c for Rio, 23c 624 for Java. Fish plentiful and dull for all kinds. Fruits are plentiful and cheap, oranges especially; iour cargoes now afloat from Tahiti. Hardware is steadily advancing. Mall Liquors are in considerable stock, and some old favorite brands need to be warehoused, awatting improvement in ripeness; we must therefore defer farther comment just now. Metals are on the rampage—up, up, up she goes. Nails also need to be clinched; they are advancing. Naval Stores ease off a bit. Oils are plentiful and cheap. Petroleum shades off. Hayward is king, and will be so for time to come with his brilliants. Devoe's 36c 639c; standard, 34c 68-35c. Provisions move off briskly at good prices. We cannot say 'n no more Hams,' for the demand for Eastern Sugar-cured Hams, and the consumption is large. Among other invoices recently received, and now being introduced to is large. Among other invoices recently received, and now being introduced to public favor, is the "Union" Ham, from the packing house of T. S. Doremus & Co., New York. The quality and order is equal, if not superior, to any before offered in this market. Duffield's Chicago Hams and Breakfast Bacon continue to command their well-earned reputation, as do those of F. Whittaker & Sons, of St. Louis. We have then the Optimus Ham, from Cincinnati, and many other brands of Sugar-cured Hams, all commanding a place among the increasing number of commencer upon this cost. Objectiver see for an advisor of reason accounter to the control of the control o of Sugar-cured Hams, all comminding a place among the increasing number of consumers upon this coast. Quicksilver, so far as advised, no arrangements have yet been effected looking toward a combination of interests. It is, however, more than probable that a ring will be formed and prices kept up to 85c as for more than probable that a ring will be formed and prices kept up to 85c as for more than probable that a ring will be formed and prices kept up to 85c as for more true help, \$23 30 for Liverpool stored factory filled. Spices are in fair stock; Allienger, \$1000 for Liverpool stored factory filled. Spices are in fair stock; Allienger, \$1000 for Liverpool stored factory filled. Spices are in fair stock; Allienger, \$1000 for Liverpool stored factory filled. Spices are in fair stock; Allienger, \$1000 for Liverpool fo

12½c; Extra Powdered, 12½c; Extra Granulated, 12c; Extra Go'den "C." 11c; Golden, 10½c. For ht bbls, ½c extra, and for bxs, ½c ½ ½ additional is charged. Teas are more called. We are in receipt of inquiries from the East respecting imports of Formosa Oolongs at this port. Those exhibited to us were of superior quality, and were in bulk. New York orders include Basket Teas, which have been sent forward in small parcels. Heretofore this description of package was confined to this port, and the quality uniformly good. We knew of no important change in prices for any description. Quotations as heretofore, with a good overland trade. French Goods—There has been quite a speculative movement of late in most articles, with a view to a concentration of stocks. Supplies here and enrote are said to be very light. So far as reported, transactions include the following: 2,500 bxs Castile Soap, here and to arrive private—said to be 12c. 400 bxs do, from store, 12½c.: 4,000 bxs Marseilles Castile, in two lots, to arrive, private: 600 cases Sardines, private—quotable at \$2.550 425 per dozen, respectively, for q and from store, 12%: 1,000 0x8 Marsellies Castile, in two lots, to arrive, private; 600 cases Sardines, private quotable at \$2.550.425 per dozen, respectively, for q and hf boxes. Olive Oils are held with great firmness, and are "stuff;" Plagniol, \$5.25 (9.5 3); Possel, \$4.8505, with purchases to arrive of 1.500 cs qts and 500 cs pints, upon terms withheld. Fine Salad Oils continue in favor. Cargo Claret is searce, with sales to arrive at \$12; on the spot, \$4.45045. Case Claret in very light stock, with sales to arrive at \$42; on the spot, \$446945. Case Claret in very light stock; and now held at \$2.5604.50. Champagnes are more called for; time Wines, favorite brands, command \$296025. There is also a better feeling for all low grades, with sales at \$146046. Freuch Cognac is also called for, but at low prices. There have been considerable purchases made of Eastern Whiskles to arrive, at good prices—details withheld; but W. W. Dodge & Co. and Booth & Co. don't do business in that way—they tell us that the demand for 8. T. Suit & Co.'s old Bourbon Whiskly is daily on the increase, and that the quality is so good that people will but in whether they drink it or not is quite another thing. Then there is our modest friend Hotsling, A. P., of Jackson street, he says he has just received a fresh invoice from the East of J. H. Cutter & Co.'s genuine old Kentucky Bourbon, very old and nice, and that the demand is good for a genuine article, and that it is appreciated by all who have tasted it; if it were not superior there would not be any spurious imitations of the brand; remember, "J. H." is the genuine.

Liverpool Wheat goodations come through to-day at 12%, and that stiffens our market price \$1.9062 per cental for choice; Superfine Flour, \$5; Extra, \$6 per barrel.

barrel

Wool arrives freely; receipts daily increasing, both from the north and the south coast. Probably one half of all the Wool in the State belongs and is held by speculators, purchased upon the sheep's back at prices tar below the present quota-Frecursors, parcaused upon an energy some a precessar lacon the present quosi-tions. Some huge transactions made inland during the Winter months show sur-prising stupidity upon the part of the growers, exhibiting a degree of knorance in regard to the true value of the stable which is remarkable in this age of chace m regard to the true value of the stable which is remarkable in this age of cheap newspapers. We have been creditably informed within the week of two large sheep owners in Tulara County owning over 50,000 sheep each, who actually sold and contracted for their entire Spring clip at 25 cents per b, and which to-day is worth in this market 50 cents, and, being a desirable clip, would self-readily at the price named. Here we see the folly of selling Wools inland, far away from the reach of reliable information, selling yes, giving away—thousands of dollars worth of Wool which rightly belonged to the grower, and would have been saved to him had be consulted, by letter or telegraph, with any respectable commission house or Wool-dealer in the city; for the sake of saving a paltry \$5 for a telegram, or paying \$28 per cent, commission upon the sale of his Wool in algetimate way, actually gives away—yes, loses many thousands of dollars. The instances cited are not the only ones of a like character. There are many other sheep men who have parted with their Wools to strangers scouring the country for bargains, at rakes far below its relative value, and at prices 25 to 50 per cent, less than they could have realized by sending the same to this city to be sold in the open market. Long Staple Wool of the Spring clip brings 500555c for Northern, \$5, 400,45c for Southern according to cleaniliness and general condition. Southern according to cleanliness and general condition.

### Pickeringian, not Pickwickian.

If the Alla's report of the proceedings on Wednesday evening, at the meeting of the Committee of One Hundred, be reliable, something quite unprecedented and astoniding took piace on that occasion. The report to which we refer says: "Loring Pickering, Esq., then came forward and placed himself squarely on the record against the contemplated outrage," etc. Now, we do not believe a word of this. We denounce the statement as a gross libel on a most worthy and conservative citizen. Nor is there any use in the Alta poddling glaring falsehoods of this character, tending to injure the reputation of the proprietor of a rival publication for fence riding. No one will credit the assertion; no one will believe anything so preposterous and absurd. Mr. Pickering is no longer a blooming and impetuous preposterous and absurd. Mr. Pickering is no longer a blooming and inpetuous youth. He has been a well-known citizen for twenty years, during all which period he was never known to do such a thing as to "place himself squarely on the record" for or against anything whatever, and we do not imagine that at his time of hie he is going to alarm the community and astonish himself by developing this new phenomenal trait. One thing we are certain of: if Mr. P. did so far forget his habitual caution as to "place himself squarely on the record" against anything, the phenomenon must be accounted for on the hypothesis that the worthy gentleman consumed too much champagne at the interview with Mr. Huntington, of which he speaks. Even then his language must be taken in a Pickermician across. which he speaks. Even then his language must be taken in a Pickeringian sense, a term which will now supplant the inferior qualifying word Pickwickian.

# Are we not Governed to Death?

If we reflect upon the slavery of government we endure we will be startled. As a people we rather seem to court clogs, chains and ties, by which we are bound hands and feet to some system of oppressive rule. Not contented with our civil laws and the obligations and duties arising therefrom —laws all sufficient to prolaws and the obligations and duties arising therefrom—laws all sufficient to protect our lives and property, to secure our peace and enhance our happiness—we rash into a net work of private, public and general burdens, which make us the slaves of customs and habits, the good sense and utility of which are not apparent. In the general acceptation of the term, we live under a Republican form of government, but the Cynic, a necessary plague to every community, discovers the fact that we are living under a system of petty despotisms, as despleable as they are useless. We will illustrate this by taking San Francisco as an example. The most private well as the most vital points of dispute that can arise in all the relations of life may be adjudicated in our law Courts. This being so, it would seem that the civil law is all sufficient for special nurvesse while our realities institutions. the civil law is all sufficient for special purposes, while our political institutions, general in their character, govern us in our local, State, national and foreign relations. Where, then, is the real necessity or want for the slavery while the masset of the state of the sta endure in accepting the surplus chains which fetter them? Let when the their weighty burdens and we will be able to see why there are so many puppers and so few men amongs us. Take, for instance, the large number of religious governments which oppress the people, and you realize in some measure the tyranny of these petty despotisms. The city is districted by at least fifteen different sects, each these petty despotsons. The city is districted by it least filter university seets, such having a chief ecclesiastical governor or ruler, and under him are his ecclesiastical policemen, who have their regular "beats." Amongst the most absolute and despotic ecclesiastical governors are the Right Reverends Alemany and Kip; among the lower spiritual nabobs are Reverends Stone, Stebbins and Miles Grant. To enumerate the entire force individually would take up at least two columns of the News Letter, an honor we cannot confer upon the patriarchs at present. That these bishops, priests, parsons, elders and religious teachers of one kind and another are extremely despotic in governing their dupes is well known. But why another are extremely despone in governing their dupes is well known. But why a people professedly republican, who have abolished all titles of nobility, and scorn the idea that one man is born to lord it over the many in the political sense, should in the religious sense be the most abject slaves to spiritual titles of nobility is beyond our comprehension. Yet this is the actual condition of affairs. The Catholics, Episcopalians, "congregationalists, Unitarians, Methodists and Baptists, with the almost innumerable minor sects, are as much under the lash of their spiritual masters as are the Cuban slaves under the lash of the overseers. The instant any including the presence related to the destroyer of the overseers. individual member rebels against the doctrines and tenets of some miserable sect, the spiritual influence receis against an electrices are the serious or some miscute the serious of the spiritual lerd estracizes that individual member, male of female, cut the erring one off from the Church and hands him or her over to the would, the flets and the devil. This happens in our middle every day—the legitimate result of this accursed coclesiastical despotism which seeks to crush out the germs of free thought in the human mind. How sadly amusing it is to hear the pappet of these petty infallibilities prate about liberty of conscience under the Constitution! Nor is it in the religious sense alone that the people are duped and enslaved. The numerous and increasing secret societies shackle very large numbers of our population with obligations and oaths, onerous and revolting, and in every way repulsive to the freedome and dignity of an American cilizen, to the beneficent laws and generous sys-tem of government under which we live. This mental lunsey which drags men to-gether at the midnit hour in some handsomely furnished den, where they robe themselves in fantastic array, war paint and feathers, and go through certain mockeries and tedious ceremonies, with doors bolted and barred after the fashion of lanatic asylums, is a lunacy utterly incomprehensible to a man of common seus. There is certainly nothing Republican or Democratic about it. On the contrary, t is the very essence of combined royalty and despotism. Yet, if you talk about monarchy, royalty or despotism in a political sense to the "Brethren" they fly at yon like so many tigers. Behold how meek, servile and slavish they are under the lash of the despot in the bolted and barred den as they go through all the pupperty marked out for them. How sadly amusing it is to hear these creatures call three selves freemen. In still another but less outrageous sense the passion for limits. selves freemen. In still another but less outrageous sense the passion for limits bounds and fences to our freedom is strong. There is a main for Clubs. Almost any person can find a Club, high enough or low enough, to take him to its folds. An admission fee and signing the Constitution and By-Laws will admit any tolerably intelligent (if wealthy) ass to the best of them. You must in this, as in the cases already cited, do something by which you are less of a man an more of a puppet. This admits you to the brotherhood, because you have signed and scald the verdict which states that you can be "used for a purpose." The man who will not be used for some selish purpose must live like some mighty oak, isolated and alone, bearing the storms and defying them. Admit all this, are we then to have no religion, no secret societies, no Clubs? Yes, we can have religion in the heart without the despotic government of religion. Secret societies are huge farces at best, and Clubs may be good or bad according to circumstances. In these three at oest, and those any be good or had according to ercumisations. In must be admited that a vast amount of the physical and mental energies of the people are fritter d away. Now every man has but a certain amount of physical and mental energies of the people are fritter d away. Now every man has but a certain amount of physical and mental energy, and if he expends this in the mockeries of religion, secret societies, club-rooms, etc., hogies loses so much force, which, if given to practical, useful and necessary labor, would benefit society and enrich the State. The citizen who understances that the state of the state. and appreciates the spirit and genius of our civil institutions will give his best energies toward perfecting them. Such a man will have but little to do with the mockeries of governments of custom and habit which afflict society. If has been demonstrated in this city, with disastrous and sad consequences, that if good citidemonstrated in this city, with disastrous and sad consequences, that if good citizens will not combine to perfect and carry out the civil laws, above and beyond all other objects, cyll-minded men, weaponed with the sacred rights of citizenship, will rule to ruin. What is true of San Francisco in all that has been written, it rue of every city in the Republic. As a people, we are iterally governed to death. With all our boasted republicanism, detestation of royalty and shams, we find, upon thoughtful investigation, that we are the dupes of the very mockerles we despise. Does it matter if in all this we are pronounced expised the strength to correct thus, is not the time in the true reights and weaknesses, and the strength to correct thus, is not the time in the true reights and weaknesses, and the strength to correct them, is not the t'ynic the true priest and surgeon to bring back a nation, sick with infirmities, to a life of vigor, manhood and true independence

### Chat About the Bohemians.

EDITOR MAIL BAG:-On Saturday last I received an invitation to attend the opening of the Bohemian Club, both at the reception in the afternoon and the "feast of reason and thow of soul," and punch in the evening. Accepting the kind and hospitable invitation, I visited the Club-rooms in the afternoon and found and hospitable invitation, I visited the Club-rooms in the afternoon and found them pretity furnished, tastily decorated, and crowded with visitors, a glance at whose faces was quite sufficient to show the success of those who had catered for their annusement and gratification. The walls were covered with the works of many well known artists, members of the Club; the pictures, without making any mixidious comparisons between them, show as a body the great improvement and advancement of art in San Francisco. I noticed the names of Buerstadt, Bloomer, Brookes, Denny, Loomis, and Kidd; the last named artist having, besides several pictures present, two models of a horse and donkey's head, worthy of high praise. The fair sex were well represented amongst the visitors, and your correspondent had the pleasure of being introduced to Miss Rose Evans, who looked and was as a charming off the stage as on. Lotta was also present, immante, river, and lovels; charming off the stage as on. Lotta was also present, piquante, vive, and lovely; Charming of the stage as on. Lotta was also present, popular, east and not of the she made sad havoc amongst the gentheren; two old soldners in every sense of the word lowering their colors before her battery of charms. So with wit, beauty, and champagne the atternoon passed away, leaving nothing behind but pleasant remembrances, and kind wishes for the success of the Bohemian Club, and empty bottles. The evening enjoyments may be said to have commenced about ten o'clock, when the regular toast being disposed of, Boheman toasts and speeches, teening with wit and sparkling with fun, reigned supreme. Scated on a raised dais, Thomas Newcomb, President, ladded ont punch and wit to all comers, seeming, in spate of his successful exertions in the afternoon, never to tire in his hospiting, in spite of his successful exertions in the afternoon, never to tree in his hospitable and kind duties. I am sure all who were present will join with me in saying that he was, pur excellence, the idol of the night. Considering so good a President to be supported in office by so genial a Vice as Henry Edwards, who can doubt the success of the Club! And when, in the absence of the author. Mr. Edwards read the poem of the evening, "Bohemia, Boys, Bohemia!" he created a perfect furore, and from the moment to the breaking up of the party mirth and fun never ceased. To follow the whole of this delightful evening in detail would be impossible, but I should like to lay before your readers an epitome of the proceedings as they flashed through my brain after I went to sleep. First came Henry Etwards with wings, comforting our Father Adam by the promise of Bohemm, while Coi. Barnes reviewed a regiment of the "Amador Battailon," but the men would not pay attention, list rung instead to Mr. Eastman's "Origin of Cubes in San Francisco Before the Flood." Mestayer, as Sheridan, would have reached the battle field in time had he not waited for Mr. Kidd to light his cigar for the hundredth time, while Williamson, as "Schneider," would have escaped had he not been stopped by the police for appropriating one of the Sutter street car mules. A little farther off Colone! Cremon and Lighad scaling the Colone! Green is to the control of the Sutter street car mules. A little farther off Colone! Cremon and Lighad scaling the Colone! Green is to the street of the colone of the Sutter street car mules. ble, but I should like to lay before your readers an epitome of the proceedings as further off Colone! Cremony and friend scalped the Colone!'s foster brother, the gentle something, an ugly lujun in red and blue paint, who put me in mind of Hood's lines -

"As for his body, it was coated, For painted things are so denoted."

To this interesting savage Vivian was singing, "I'm glad to see you, boy," and Mr. Robert Craig, as Dickens, was saying he ought to have proved "a hallibi." During the whole of this curious panorama the President was 'unging, "Bohemia, Bohemia, the Daughter of the Barber," in which refreshing chorus I must at last have joined, when, being awakened, I, like Mr. Pickwick in the wheelbarrow, softly murmured "Cold Punch," and fell into a refreshing slumber.

INDIGESTION.

The Chancellor of the Exchequer presented a very cheerful financial statement in the House of Commons. England, on the 25th of March. The revenue exceeded the estimates by £2,201,000. The National debt, in April, 1859, was £885, 481,000. It was increased by the purchase of telegraphs to £81,1412,000, but on March 31, 1872, it will island reduced to £792,740,000, while at the same time the balance in the Exchequer will be four millions more than it was in April, 1869.

# Mr. Longfellow's New Poem .-- The Baron of St. Castine.

Baron Castine of St. Castine Has left his chateau in the Pyrenees, And sailed across the western seas. When he went away from his fair demesne All day amid those forest scenes, The birds were building, the woods were And to sleep in the tents of the Tarra-

And now the winds of winter blow Round the turrets of the old chateau, The birds are silent and unseen. The leaves lie dead in the ravine

His father, lonely, old and gray, Sits by the fireside day by day, Thinking ever one thought of care;

and tall. The sun shines into the aucient hall. And makes a glory round his hair,

So silent is it everywhere; So silent you can hear the mouse Run and rummage along the beams Behind the wainscot of the wall; And the old man rouses from his dreams, Across the sea, like a bird of prev,

His footsteps echo along the floor
Of a distant passage, and pause awhile;
Has married a dusky Tarratine,
He is standing have He is standing by an open door Looking long, with a sad, sweet smile, Into the room of his absent son. There is the bed on which he lay, There are the pictures bright and gay, Horses and hounds and sun-lit seas; There are his powder-flask and gun, And his hunting-knives in shape of a fan; The chair by the window where he sat,

With the clouded tiger-skin for a mat, Looking out on the Pyrenees, Looking out on Mount Marbore And the Seven Valleys of Lavedan. Ah me! he turns away and sighs; There is a mist before his eyes

t night, whatever the weather be, Wind or rain or starry heaven, Just as the clock is striking seven. Just as the clock is striking seven,
Those who look from the windows see
The village Curate, with kintern and maid is left to guard it, and to wait
Come through the gateway from the park The coming of the rightful helr; The village culture, with land years and the park The coming of the riguous dear. Come through the gateway from the park The coming of the riguous dear. No other life or sound is there; And cross the court-yard damp and dark. No more the Curate comes at night, No more the Curate comes at night, And now at the old man's side he stands, his voice is cherry, his heart expands, the gossips picasantly, by the blaze of the fire of fagots, about old days, And Cardinal Mazarin and the Fronde, And Cardinal Mexicus Sair and fond, And Ones.

And the Cardinal's nieces fair and fond, And Ones.

And what they did, and what they said,
When they heard his Eminence was dead. With flying skirts is the Curate seen
Speeding along the woodland way,
Humming gaily, "No day is so long

brain, "Are there any tidings from over the sea? Ah, why has that wild boy gone from me? And the Curate answers, looking down, Harmless and docile as a lamb,

And draws from the pocket of his gown A handkerchief like and oriflamb, And wipes his spectacles, and they play Their little game of lansquenet In silence for an hour or so,

And the Curate listens, and smiling says:
"Ah yes, dear friend! in our young days
We should have liked to hunt the deer tines:

But now it is better sitting here Within four walls, and without the fear Of losing our hearts to Indian queens; For man is fire and woman is tow. And the Pyrenees are white with snow. And the Somebody comes and begins to blow."

Then a gleam of distrust and a vague surmise

Through the southern windows, narrow Shines in the father's gentle eyes, As firelight on a window-pane Glimmers and vanishes again; But naught he answers; he only sighs, The house-dog stretched beneath his chair And for a moment bows his head:
Groans in his sleep as if in pain,
Then, as their custom is, they play
Then wakes, and yawns, and sleeps again,
And another day is with the dead.

And another day is with the dead.

Another day, and many a day And many a week and month depart, When a fatal letter wings its way And wanders restless through the house, And strikes and tears the old man's heart.

As if he heard strange voices call.

Lo! the young Baron of St. Castine, Has married Madocawando's child! The letter drops from the father's hand ; The the sinnows of his heart are wrung, He utters no cry, he breathes no prayer, No malediction falls from his tongue; But his stately figure, erect and grand, Bends and sinks like a column of sand In the whirlwind of his great despair.
Dying, yes, dying! His latest breath
Of parley at the door of death
Is a blessing on his wayward son. Lower and lower on his breast Sinks his gray head; he is at rest; No longer he waits for any one. For many a year the old chateau Lies tenantless and desolate; Rank grasses in the court-yard grow, About its gables caws the crow; No more is seen the unsteady light, Threading the alleys of the park; The windows of the hall are dark, The chambers dreary, cold and bare ! At length, at last, when the winter is past, And birds are building, and woods are

Humming gaily, "No day is so long But it comes at last to vesper-song." He stops at the porter's lodge to say That at last the Baron of St. Castine To the one sad thought that haunts his Is coming home with his Indian queen, Is coming without a week's delay; And all the house must be swept and clean, "Young blood! young blood! It must And all things set in good array!

And the solemn porter shakes hi And the solemn porter shakes his head; And the answer he makes is: "Lackaday! We will see, as the blind man said!" Alert since first the day began, The cock upon the village church

Looks northward from his airy perch,

Till the clock at nine strikes loud and clear As if beyond the ken of man From the village lying asleep below, And across the court-yard, into the dark Of the winding pathway in the park Curate and hatern disappear, And darkness reigns in the old chateau. The ship has come back from over sea, She has been signaled from below, And into the harbor of Bordeaux She sails with her gallant company. But among them is nowhere seen The brave young Baron of St. Castine; He hath tarried behind, I ween, In the beautiful land of Acadie!

And the father paces to and fro street,
Through the chambers of the old chateau, A cracking of whips, and scamper of feet, Of wheels on the road that runs below, Of servants hurrying here and there, The voice in the court-yard, the step on The Curate is waiting in the hall, the stair,

Waiting for some one who doth not come! But letters there are, which the old man But his mind is full of vague distress,

reads

To the Curate, when he comes at night. Word by word, as an acolyte Repeats his prayers and tells his beads; Letters full of the rolling sea Full of a young man's joy to be Abroad in the world, alone and free; Full of adventures and wonderful scenes Of hunting the deer through forests vast In the royal grant of Pierre du Gast; Of night- in the tents of the Tarratines; Of Madocawando the Indian chief, And his daughters, glorious as queens, And beautiful beyond belief; (tongue, And so soft the tones of their native The words are not spoken, they are sung! Beneath the shadow of her hair The gold-bronze color of the skin Seems lighted by a fire within, As when the burst of sunlight shines Beneath a sombre grove of pines -Beneath a sombre grove of pines A dusky splendor an he air.
The two small hands that now are pressed.
In his, seem made to be caressed,
They lie so warm and soft and still,
Like birds half hidden in a next,
Trustful, and innocent of ill.
And ah! he cannot believe his ears
When her meladious voice he hears
Sheaking his nettice Gascon tower. Speaking h's native Gascon tongue; The words she utters seem to be The words see these seem to be Part of some poem of Goudoull, They are not spoken, they are sung! And the Borron semicand says, "You see I told you but the simple truth; Ah, you may trust the eyes of youth!" Down in the village day by day The people gossip in their way, And stare to see the Baroness p On Sunday morning to early Mass; And when she kneeleth down to pray, They wonder, and whisper tog-ther and To bless the bridegroom and the bride!

Surely this is no beather lass. " [say, The choir is singing the matin song,
And in course of time they learn to bless The doors of the church are opened wide,
The Baron and the Baroness. The people crowd, and press, and throng And in course of time the Curate learns
A secret so dreadful that by turns
He is ice and fire, he freezes and burns. The Baron at confession bath said That though this woman be his wife, He hath wed her as the Indians wed, He hath bene'lt her for a gun and a knife! The warm wind blows from the bills of And the Curate replies: "O profligate, Spain, O Prodigat son! return once more The birds are building, the leaves are green To the open arms and the open door Of the Church, or ever it be too late. Thank God, thy father did not live

To see the ships come sailing on, And pass the isle of Oleron, And pass the Tower of Cordonan. In the church below is cold in clay The heart that would have leaped for joy-O tender heart of truth and trust !-To see the coming of that day In the church below the lips are dust, Dust are the hands and dust the teet, That would have been so swift to meet The coming of that wayward boy, At night the front of the old chateau

Is a blaze of light above and below

Voices are shouting, and horns are blown, The Baron hath come again to his own.

Most eager and alive of all To welcome the Baron and Baroness: For he hath read in Jesuit books Of those children of the wilderness, And now, good, simple man! he looks To see a painted savage stride Into the room, with shoulders bare, And eagle feathers in her hair, And around her a robe of panther's hide. Instead, he beholds with secret shame A form of beauty undefined. loveliness without a name Not of degree, but more of kind; Nor bold nor shy, nor short nor tall, But a new mingling of them all. Yes, beautiful beyond belief Transfigured and transfused, he sees
The lady of the Pyrenees,
The daughter of the Indian chief.
To see what he could not forgive: On thee so reckless and perverse, He left his blessing, not his curse. [ni But the nearer the dawn, the darker And by going wrong all things come right; Things have been mended that were worse And the worse, the nearer they are to

For the sake of the living and the dead, Thou shalt be wed as Christians wed, And all things come to a happy end. O sun, that followest the night In you blue sky, serene and pure, And pourest thine impartial light Alike on mountain and on moor, Pause for a moment in thy course, And bless the bride room and the bride!

O Gave, that from thy hidden source In you mysterious mountain-side Pursuest thy wandering way alone. And leaping down its steps of stone, Along the meadow lands demure Stealest away to the Adour, Pause for a moment in thy course To bless the bridegroom and the bride:

mend

To see the bridegroom and the bride. They enter and pass along the nave; They stand upon the father's grave; The bells are ringing soft and slow; The living above and the dead below Give their blessing on one and twain

The birds are building, the leaves are green And Baron Castine of St. Castine Hath come at last to his own again -Atlantic Monthly.

#### San Francisco and the Goat Island Grant.

Mr. Stanford, the President of the Central Pacific Railroad Company, says that the occupation of Goat Island for railway depot purposes, and the necessary works the occupation of Goat Island for railway depot purposes, and the necessary works connected therewith, will not injure the entrance to the harbor or materially change the currents of the Bay. Mr. Stanford is an interested party; he and his associates own and are in possession of thousands of acres of land that will be immediately benefited and appreciated in value by such occupation. It is not the custom of the Government of the United States, or of other maritime powers, to select sides for fortifications for harbor defense, or to dispose of islands in harbors and bays on the advice of civilians, especially those directly and personally interested, and who are to be largely benefited in case their advice is taken and acted upon. What would be the fate of a similar proposition in the British Parliament? Would England consider for a moment, or would any great power other than the United States, even contemplate giving an island in the middle of the finest and largest States, even contemplate giving an island in the middle of the nices and largest barbor, and near to a young city destined to become one of the most important and populous within the limits of her whole domain, to a railroad company which already possesses more depot and vater-from thank than all the other railroad company which already makes to the world combined. Mr. Stanford also asserts that the Government is asked to code Goat Island to the C. P. Co. because the interests of Commerce demand that it should be done. Does the interests of Commerce require the termin of the great system of railroads necessary to accommodate the business of the Pacific countries, and of San Francisco, to be located on a part of a very small island, or very large rock, situated near the middle of the Bay of San Francisco? The characteristics of the Pacific Countries, and of San Francisco? acteristics of the island, which make it valuable for harbor defense, renders it naccessible and valueless for railway purposes; therefore the military value of the island must be destroyed, that a railroad-commercial(!)-value may be created. Aside from military considerations, Goat Island possesses but one other great value, viz: as a key to one of the most gigantic real estate schemes ever concocted in this State, and what is more surprising to the uninitiated than all clse is the fact that the stockholders of the Central Pacific Railroad Company—as stockholders—have no interests in the profits expected to be realized by the real estate ring. More than ten thousand acres of land on the Eastern shore of the bay have been according to the real estate of the realized by the real estate ring. quired by, and are in the possession of, Stanford and his real estate associates. This immense property lies along the shore of the bay, and extends on to deep water. It lies almost east of Goat Island, and is, to a very great extent, dependwater. It has almost east of Goat Island, and is, to a very great extent, dependent upon the island for means and facilities for complete and perfect development and control of a water-front between eight and nine miles in extent. Along this projected line of water-front the entire commercial interests of the Bay of San Francisco could find ample accommodation, and upon the ten thousand acres, fast as they would become reclaimed, all the rising industries of a new metropolis would locate, accumulate and expand, to enrich the schemers and destroy the San Francisco of to-day

San Francisco has a line of water front, improved and unimproved, not less than ten miles in length. The water front now in possession of the city at Mission Bay is one mile and one-eighth in length, and is more valuable for commercial and rail-way depot and termini purposes, than an equal extent anywhere else around the entire circuit of the Bay. It contains, in all, over two hundred acres, and will cost less to render it available than the leveling of one-half of Goat Island. The Central less to render it available than the leveling of one-half of Goat Island. The Central and Southern Pacific Railroad Companies own, by donation or subsidy, sixty acres; is additionable the contral to the contral contral to the contral cont In addition, the city of San Francisco is ready and willing to extend to these com-panies the free use of as much more as their bisness may require. These facts prove but too conclusively that Goat Island is not wanted because of its extent,

or because of its superior commercial site.

Mr. Stanford also says that the occupation of Goat Island will not injure the present Metropolis, will not detract its trade, decrease its business, or reduce its real estate values; proof upon proof can be adduced to the contrary, while not one single fact can be shown to sustain his statements. The concentration of population, trade, and commerce makes the city, and in proportion to the concentration of those vital elements real values find trade and availability. To transfer the commerce from the western to the eastern shore of the Bay of San Francisco means commerce from the western to the castern shore of the Bay of San Francisco means the transfer of population, trade and industry, and a ruinous decrease in real values. A mechanic, having a family, employed at San Francisco, either owns or rents a house and purchases all his supplies of food, clothing, etc., at San Francisco: the butcher, grocer, merchant, and property are all benefited to an extent; his employment at San Francisco ceases, and he removes with his family to the eastern shore of the Bay, where he can find labor. The effect such a change would seek the such a change would be such as the produce on real estate, both improved and unimproved, would be ruinous to present owners. Unimproved property is held according to its available and prospects. the value, and improved property according to the rental, or income it produces. That suburban property would decrease in available value no sane man will deny, and that an untenanted house is an expense instead of a profit every man must admit.

Those owning property in the northern part of the city are affected by the progress of the city southward; they experience that extensive improvements in that direction tend to decrease the available and productive value of their property, and cite the fall in rents in the northern, and the increase of rents in the southern portion of the city as proof of the charge. If the removal of the center of business from the north end of Montgomery, and from Jackson and Washington streets to the southern end of Montgomery and to Market, Second, Third and Fourth streets tends to reduce rents and effect real estate values in one section of the city and increase them in another, would not the removal of the commercial interest, with all its auxiliaries, to the Eastern shore of the Bay injure business and affect property values at San Francisco, as well as the mertigage security for the \$35,000,000, for which the homes and property of San Francisco are held by the Savings Banks. The depositions are the numers of the millions which constitute the capital of the Savings Banks, and they are the actual loaners to the real estate of the city, and when the latter falls by such an influence, and by such a cause as is now threatened it will not fall alone.

Had San Francisco been built up and enriched by an immense trade ponred into her lap by a powerful corporation controling the entire railroad system of the Pacific and the commerce of Asia, that power, whether just or unjust, might claim the right to desert her to rear up rivals intended to sap her financial foundation and cause her ruin: but, happily, such has not been the case. She made the trade the roads were built to accommodate, and was directly the cause and influence which carlied those who now seek her destruction. San Francisco grew by the hardest knocks by which a city was ever built. Cut off from the outer world, isolated and alone upon the margin of a vast wilderness, three thousand miles from civilization and supplies, she arose like a new star in the great western horison to herait to the world that the march of empire had reached the distant shores of the Pacific.

It has been said that the country is in opposition to the city in the present contest because of the want of liberality and enterprise on the part of the city in couraging the development of the resources of the interior. And yet 20 where you may within the boundaries of California, ascend the Columbia and traverse the country of Oregon, visit the coal and lumber regions of Washington Territory, call at Victoria, Vancouver's Island, steam up the Frazer and penetrate the valleys and mountains of British Columbia, extend your investigations to Alaski, travel through the 201d, silver and agricultural sections of Idaho and Nesada; go to Utah and the savage-infested fields of Arizona, and in every place and exercished and practical evidence of San Francisco's venture, investment, enterprise and liberality. San Francisco has sunk millions of dolfars building mining canals, quartz mills and delving in wild-cat mimes. Gigantic real existences, are wholly foreign to the "carrying trade" and the interests of commerce," and when a great railroad company, or those using it, acquires thousands of acres of land opposite an established city, and makes preparations to build a new metropolis, or intimates such an effort for speculative purposes, it is time for a people to become alarmed and seek to prevent the Government from aiding and absting so

#### Suitable Dresses.

As for dresses suitable to certain persons, I need say but little. There are many books on the eliquette of dress, showing what is proper to be worn in the morning, in the evening and at noonday. A few very simple rules will suffice here. Those who are very stout should wear nothing but black; those who are very thin should put a little padding in their gowns; and neither should be in the least deadlete. Perpendicular strips in dresses give hight, and increase fullness, and are therefore particularly suited to very slight, small people, and particularly united for stout figures. To fair nersons blue is becoming but not very blue. Dark blue, or too brilliant a blue, is extremely unbecoming to that kind of complexiou, and makes the skin vellow and the hair sandy. It is the old, pale dull blue that really makes sand gold. Pink, especially the old-fashioned yellow pink, is, when not too brilliant, becoming to all complexions except that which goes with read her.

Light green may be safely worn by the very dark, the very rosy, and by the very pale when the skin is extremely clear; but to ordinary English faces it is a trying color, though there are people who look well in nothing cles. Green, mixed properly with pale blue, is very becoming, indeed. Gray is the most beautiful color for old and voing. I mean the soft silver gray which is formed by equal parts of black and white, with no touch of many in it. It admits of any color in triuming, and throws up the bloom of the skin. Rose-color, for some people, is pretty and not unbecoming. White, so disastrons to rooms, is generally becoming in dress—only very coarse complexions are spoiled by it. Short women should never wear double skirs or tunics—the hight so much: unless, indeed, the tunic is every short and the skir or tunics—the hight so much: unless, indeed, the tunic is every short and the skir or tunics—the hight so much: unless, indeed, the tunic is every short and the skir or tunics—the hight so much: unless, indeed, the tunic is every short and the skir or tunics—the shight so much: unless, indeed, the tunic is every short and the skir or tunics—the significant of the ship to the ship to the ship to the ship to the skir or tunics—the ship to the shi

Treasure shipments for the week ended April 16th, amounted to \$20,164 41, of which \$3,548 were in gold bars, and \$16,616 41 in silver bars. The Prince Alfred from Victoria, April 15th, brought \$59,417 treasure; and the German brig Moorburg, from Mazulan April 15th, brought \$1,631 in silver bars.

# Consulting the Oracle.

STANFORD.

Ye awful fates! before whose piercing eyes
The future stands unveiled, without disguise,
Say, when Goat Island we essayed to take,
Did we initiate our first mistake?

ORACLE.

Beware! mark well our words, our meaning seize,
For oracles speak darkly fate's decrees.
Thou know'st what ancient king to rain came
By one false step in war's tremendous game,
'Gainst which we warned him.

STANFORD.

I forget his name.

Ah, yes! excuse me, classic lore is not Your strongest suit; beg pardon, I forgot. Now hear our riddle: When the crow turns white, And cooing ring doves prow! for prey by night; When Grandam Alta stands no more "in readiness," But takes her side and holds the same with steadiness; When all the town knows where the Call is found, And Pckr-ng's voice gives no uncertain sound, But speaks in accents bold and phrases square—When this shall come to pass, beware I beware !

STANFORD.

Already, Oracle, these things are so;

All but the prowling dove and white-washed crow.

Thou see'st not these?

STANFORD.

However, you juggling fiend, I'll heed or hear;
I see the dove turned hawk, the crow turned white.
When Fred and Loring dare this dangerous fight,
Dangerous I'll make it cre the fight is done—
Henceforth the battlefield is Washing;on.
We'll laugh at Oracles and shub the fates,
So long as we control the fares and freights.

— There is one man in San Francisco who does not like General Grant, and employs himself in making treasonable puns against the Republican annointed. He says the Presi-dent's commission to office should read thusly: "Know all men by these presents, etc." or "This in-Hent-ure witnesseth" that he shows his Irish extraction by being fond of "Murphys." Greeley illustrates what he knows about farming by showing up Murphy. Booth was elected Governor of California because among the rehels in Kern, Tulare and San Bernardino he was understood to be a near relative of the man who killed Lincoln. The Labor candidate for President, Judge David Davis, is muning well in the Southern States, and in the more benighted parts of Connecticut and Indiana, because he is supposed to be Jefferson Davis. If the Liberal Republicans, Denocrats and labor men unite on one candidate, it will be hard on Ulysses in this State, as California is very much down on traudulent Grants. We were willing to give the son of Jesse one league of office, but do not think he ought to have the "Sobrante," or extension of another league. It looks now as though Summer had soured on the liberal movement, and as been since he was presented with a cane by Brooks, of South Carolina. Greeley, too, is hedging, and will go back to the regular organization unless he can build the new platform and put himself upon it as candidate. Greeley is ambitious to be regarded as a self-made man, and if he ever succeeds in getting to be President it will be in spite of God Almighty and the people. Colfax expects to be forced for Vice-President, and it seems to us that he is stooping just a little so that he may still have connection with that office; Schuyler is a standing candidate. Carl Schurz leads the Dutch. Summer leads the Yankees. Trumbull leads the may still have connection with that office; Schuyler is a standing candidate. Carl Schurz leads the Dutch. Summer leads the Yankees. Trumbull leads the may still have connection will be composed entirely of office-holders and

#### The Tichhorne Claimant.

The following interesting letter, signed "A Neutral," referring to the case, has appeared in the Daily News: I was talking the matter over with a friend of mine shortly before the collapse of the trail, when he suggested that we should call at the Waterloo Hotel and interview the great riddle ourselves. This we determined the Waterloo Hotel and interview the great riddle ourselves. This we determined to do. We obtained an introduction to him from a gentleman with whom he was acquainted, and at 8 r.m. we sent in our cards, and were at once admitted. The claimant was seated at a table smoking, in company with two of his adherents. He rose, and, welcoming us very civily, offered each of us an excellent eigar, which we accepted. After a few preliminary observations we soon drifted into the "trail." He talked of it with a cool, quiet manner, as though it in no way personally interested him. Some one observed that the Attorncy-General had used very strong language respecting him. He repided that often lawyers will use strong language, but that he thought if was a mistrice notice as a presence of the control of the production of the control of the cool of the control of the language respecting him. He repoised that often lawyers will use strong language, but that he thought it was a mistwice policy, as it usually produced a counter effect to what was intended on the minds of a jury. "I do not completin," he continued, "of the Attorney-General abusing me, but I consider that he had no right to intendence my wife's name into the case, and read my private letters to my mother respecting her. Whether I am an impostor or not does not depend upon those letters," "Who is Guides, the pricest," I asked. "Wait," said an adherent, "till we have him in the box, the Serjeant will furn him inside out. "No," observed the claimant, "you will never get anything out of a priest by cross-examining him, he uses few words, and is too well trained in fencing to allow himself to be

eaught."

We then asked him about the tattoo marks. He said, "I cannot understand how any one can suppose that Roger Tichborne was tattooed. For five years the 'family' have concealed their knowledge. They say that, had they published it, I should immediately have tattooed myself; but surely when Mr. and Mrs. Radeliffe and Mrs. Nangle were with me, they might have called upon me to turn up my coat sleeve. Had I refused to do so, they would have stated it, and I never should have been able to raise the money to carry on proceedings. Now I have four marks on my person which are so like those that were on the person of Rozer that they are obliged to assert that I made them myself. To do so I must have known of their congect to a serie that I make them my self. To do so I must have known of their existence. Moore, Bogle, or some one, consequently, must have told me of them. Is it probable, or in any way likely, that the person who did tell me of them, supposing this theory to be a correct one, would not equally have told me of this tattoo must. A man who would cut open his legs, his eye, and the back of his head, would not shrink from tattooing himself. Mrs. Rade life says that she saw the tattoo mark when I was catching minimous to fish in the Itehm. Now, no one does fish with minnows in any part of the Itehin, and in no part of the world does a person catch minnows with his left hand. "And where, pray, do you timb Arthur Orton is "was my next question." Somewhereabout the swan liver, he answered, "should recommend you to get hold of him," I said. "That's more easely said that done," he replied." "Orton has committed some crime under another name, and is keeping it "out of the way." "It's perfect nonsense," observed an adherent, "to suppose that Sir Reger can be Orton. Why, where could Orton have learnt fly-fishing, and no one denies that our friend here is an accomplished fly-fisher, to become one requires years of practice," "Not it," muttered the claimant; I'd teach any one to fly-fish, and well, too, in a month." "I suppose the Attorney-General's crosse-examination a little confused you, I said, "although you appeared to take it so cooily." "I'did not know whether I was standing on my head or my feet," he answered; "for instance, he asked me whether I knew the difference between a rook and a pawn. I said that I did not, and yet I can play a good game at class." "Perfectly true," observed an adherent, you beat a fair player a few evenings ago three games out of five; and what is more, although you are supposed not to know a worl of French, you transisted to me a day you are supposed not to know a worl of French, you transisted to me a day. tattoo mark when I was catching minnows to fish in the Itehm. Now, no one does After this two ago a letter in French which I happened to have in my pocket." After this we got on the subject of bush life. The claimant told stories and by no means we got on the subject of bush lite. bad ones -about kangaroo hunts and different rides which he had taken, and he then diverged to South America, and the quality of South American horses. now run into a period, when, according to his case, he was the original Sir Roger; but he did it so naturally, that it was impossible to detect the transition.

It was now past twelve o'clock; the claimant, swindler or no swindler, had It was now past twelve o'clock; the claimant, swindler or no swindler, had naturally contributed to our passing a very pleasant evening. His manners are not by any means vulgar; on the contrary, they are natural and unaffected, indeed, they are a cood deal better than those of the majority of Englishmen. He certainly takes great liberties with the letter h, but his accent is not a cockney one. He pronounces almost every word in an odd, outlandish manner, and when he becomes excited in conversation this accent becomes stronger. He speaks in that low, wheezy tone which is peculiar to those who have had much to do with horses, now, whosex tone which is peculiar to those who have hid much to do with horses, and generally before commencing a sentence, he pants like a seal. He were a double chain from his button hole, and sut-most of the time with his hands—which are small and well formed—passed between it and his waistenst. When we left him, my friend, who is a hard-headed man of the world, and who had always regarded him as a swindler, declared that he was convinced that he was the regarded him as a swindler, declared that he was convinced that he was the regarded him as a twindler, declared that he was convinced that he was the regarded him as a twindler, declared that he was to environmentally for the period of the limits of possibility. If he be not the man we have a greater actor among us than kean." For my part, I was staggered, but I still remained undecided, as I never care to risk a headache. I was staggered, but I still remained undecided, as I never care to risk a headache by trying to find out this sort of conundrum. Notwithstanding the collapse in Westminster-hall, I remain undecided still. The strongest point in favor of his being Sir Roger is his thumb. At the trial a photograph was put in of the original man, with the thumb of one hand peculiarly formed, the nail being smaller than that on the other thumb. Now, I narrowly examined this thumb, and most assur-

edly the nail is smaller.

The theory of the Attorney-General is that the claimant, having during the trial observed this photograph, immediately fore off his nail; and in support of this suggestion he begged the jury to remember that never, when he was in the witness-box, was his left hand ungloved. It must, however, he remembered that during this time he was daily seen by persons who would not have been parties to a fraud, and that they declare that when out of the witness-box he rarely wore gloves, and that they did not observe that he had been 'doctoring' his thumb. As long, therefore, as the thumb remains unexplained, and as long as no sort of attempt is made to show who—if he be not Sir Roger—he really is, I shall remain in doubt as to whether he is a swindler. Marco Polo, when he returned to Venice, was not recognized by his relatives, because he had forgotten his native language. If it be said that any one after an absence of ten years ought to be able to prove his identity without the shadow of a doubt, it may also be asserted that there ought to be no real difficulty in proving the identity of a person who admittedly has resided for many years in Australia, when those interested in doing so have had the unlimited command of time and money. The Attorney-General asserted in his speech that the claimant had, and must have had, confederates. He never, however, ventured to say whio those associates were, nor, acting as a law officer of the Crown, and no longer as an advocate of a private cause, does he venture to indict them.

The institution known as the Independent Order of Red Men is an institution wall calculated to advance the charitable purpose of permitting a set of modern barbarians to meet in a dark room and imitate the aboriginal natives. We do not intend to expose the secrets of the order, but as we were initiated recently, we give for the information of our readers, the following programme. Being taken into a dark room and stripped of our clothing, we were handed a fig leaf and a feather; the feather, for want of a better place, we stuck in our hair; blindfolded we were lead into a wigwam, where, looking out from under the dirty handkerchief placed over our eyes, we saw the chiefs, warriors, high muck-a-mucks and hyas-tyces squatting on their haunches around a kerosine lamp, which represented the campifer; they were smoking short dudeens as the pipes of peace; they were clad in nasty blankets and dirty sheep skins for furs. The first salutation was an Indian yell, resembling the cry of the Hoodlum on a "drunk;" our bravery was tested by running a muck-a-muck over chairs, benches and recumbent warriors; our honesty and fidelity was put to the sewere test of declining to receive the embrace of a big brave with a nasty breath, played on us for a squaw; we were turned loose in a forest by having dried brush spread under our fect and hearing tin pan thunder. The Sagamor cread us some cheap morals out of dirty and well thumbed memorandum books; the Great Prophet and Medicine Man gave us a drink of glicerine whisky out of a very nasty cow's horn; the bandage was then taken off, and we were welcomed into the company of a very dirty set of fellows, who have since pressed their acquaintance and evidenced their brotherhood by borrowing smal sums. Ancient and honorable order! Staff. An adjourned meeting of the "Who Eliled Tecumseh" Lodge will be held at the wigwam half an hour after the setting sun. Bring your wampum. Season of blossoms, third moon; year of discovery, 380th, of independence 96th, of the institution 82d. The fool-kill

The Alta is par excellence, the Bunsby of the Pacific Coast. To talk nonsense oracularly is a great gift. To be "with verdure clad" every day in the year is the happy distinction of this journalistic evergreen. How delicious is the style which, commencing with a platitude, meanders through a series of "on the other hand," while we admit," etc., sentences of slipshod English, and then, like the timorous hare, the unclean spirit, yea! like man himself who returns to dust, gently retreats tail-foremost to its starting point of bosh. We love Mother Goose's meiodious cackle when she lays an editorial egg, and after complacent incubation cries, "without doubt a large-sized chicken"! We delight in the old lady's conceptions, though she wastes her pangs to bring forth nothing. She is Joanna Southcott between the sheets, convinced that she is big with a Messiah who is to save and reconstruct the world. What can be richer in simplicity and grandiloquet emptiness than her recent editorial on the abolition of all monarchies and the formation of the "United States of Europe?" Tremble ye crowned heads Deprecate the pythoness Queen of Great Britain, Emperors of Germany and Austria, and kings of Italy and the rest! But while "the idea," she tells us, "is a conception worthy of the genius and liberal views of Señor Castellares, the Spanish Republican leader, it is very difficult of execution." Ha! that is a striking thought indeed! Again: "Pure Republicanism, as established in this country, is almost unknown in Europe." Pro-digious! Have Tweed and Connolly and Barnard and Mother Goose been created in vain? But "let Spain make a good beginning under a semi-monarchial government." Excellente? "Let the restablish a Republic." Excellentissime!!! Let the mouse first conquer the lion, he may then subdue him. Let the hare first be caught, it may then be cooked. Let the Alta attend infant school, and the poor thing may become in time a teacher. We have fears for our respected grandmother when she labors with child.

#### En Passant.

"He that is ungrateful, is all things that are amiss: he is like the Devil, that seeks the destruction of those most of all that have done him the best service."

The truth contained in the above aphorism of the author of "Hudibras," recurs to us just now with twofold force, from the fact that an ignoble catch-penny paragraphist, a former hanger-on and leech upon the proprietor of this journal, who having for years past been exited from the editorial rooms of nearly every decent newspaper in this city, has lately "brought up" in the columns of the Allac; and in a doletul jeremiade in last Monday's issue of that paper, the entrish ingrate aftects to be wofully concerned for the we fare of the local department of the News Letter. to be worms vagabond! We here spit upon his brazen face, and proceed to pickle his flipution carcass in our vinegar-cruet of wrath. His groveling ill-nature and paper institucts resemble the dust in the highway, that flice in the face of those who raise it; or, a truant river, that runs away from the spring that feeds it and undermines the banks that support it. Like his ancient prototype in Scripture, this insolent calf now waxeth fat and kicks, over the fact that the gentleman, scholar and wit, whose trenchant pen-emanations heretofore adorned our ninth page as Town Crier, has for the monce retired from literary pastime: all of which, as plainly appeareth, redounds greatly to the comfort of certain laplog Bohemmas, but to none more especially than the parasite of the Aller in question. The impu-dent variet has good reason to roll up the whites of his Sleek eyes at this do him) unlooked-for dispensation; for Bierce was a Nemesis to malapert scribblers, and wont to scourge the runp-fed starvetings howling to their kennels. We know what perturbs the stagnant soul-waters of the Alie's "Old Cio" vendor, that now seeks to vent his spleen against the Nens Letter through the columns of our blanket-sheet contemporary. When Fortune frowned upon his path and friends oundet-succe concenporary. When rorume from the whereing blasts and friends were few and far, we screened the wretch from the withering blasts of Euras, often going out of our own way to lift him from the shough of depend; and with counsels of good cheer, and that which is more substantial and comprising and those solutions. who hunger and are athirst, we have time and again brought health to his body and peace to his landlord. But, no one so strongly indicates a base and thankless nature as he, who oblivious of kindnesses conferred, tures, scorpion-like, to sting the hand that saved him from destruction: and we withhold from further contemplation of a reptile so ungrateful and debused. Such characterless victims to the scribbling rabies as the one before us, may well seek refuge under the more congenial sheiter of Mac. & Company, for they and their stalwart herd of "able-bodied notists" have much space to diurnally fill, and (unlike ourse f) are in nowise captions as to have much space to diurnally fill, and unlike oursed are in nowise captions as to quality—their size quar non being quantity. Former'y, the msecrable parodus and misselumeous screeds of this slovenly drab "Old Clo" of the 18th in the absence of our censor, have occasionally crept in to mar the pages of this journal Latterly, however, dog "Jack," our Cerberns, has kept his weather-eye upon the varlet, and the villainous composts, proffered "at a cent a line," have some science view of the pages of the properties of the consideration quiescently pocketed that genteel slap athwart the scence from a contributor to the News Leider, who recently deemed it but poetic justice to place the admirative in tillary for divers flavitions outrages against the heatityste Child. the plaigarius in pillory, for divers flagitious outrages against the legitimate Children of the Muses.

That this ingrate, whose body, brains and soul, fill a space in the intellectual circles of San Francisco no bizger than a mustard grain, may be consumed that we entertain toward him no other feelings than those of profound pity, miggled with contempt, we give him gratuitously the benefit of this notice. And, in the wish that he will never again pollute our sanctum with his pestiferous presence, nor view or patience with his trashy, stale and stolen modicums, we take pleasure in commending him to our journalistic brethren throughout the land particularly to the Alla folk. Mac, and his voke of "notists" will find the little fellow arful, crafty, unconscionable and serviceable in sundry ways; yet, in none more than at paredizing, re-vamping "'Old Clo'" screeds, and other like drudgery: (see "Post, price one cent."). The generous Bard of Coila will pardon us for here borrowing his caustic vein to declare, that we know this Alla-ic scribbler to be a cunuch of language; a servile ceho of isabionable barbarisms; a quack, vending the nostrums of empirical elocution; a marriage-maker between vowels and consonants; a cobbler, botching the socks of bombast oratory; a blacksmith, hammering the rivets of absurdity; a butcher, imbruing his hands in the bowels of orthography; a carpenter, mortising the joints of jarring sentences; the pitch-pine of affected emphasis; the squasking dissonance of cadence; the pinn of gender: the executione of construction; a scapegallows from the land of syntax; a scavenger of moods and tenses; the antipode of grammar; a persecutor of sylabiocation; a broad of the speech-destroying builders of the Tower of Babel. In short, a scalegar whom God only can mend, and the Devil only can punish! We here leave, we delectable upstart to the roseate enjoyment of his laurels, and will be excused on the score of magnanimity for thus giving the scamp this extended open Letter of Merit; wholly its scare of the rightfully belongs, in the rogue's-gallery of literary charlatans.

The aggregate sales in the San Francisco Stock Board from April 11th to the 17th, inclusive, were \$8,494,431.

### The Real Estate Market.

[Reported by William Stuart, Real Estate Agent, 418 California Street.]

As a marketable commodity, real estate continues very dull. But those who study the signs of the times, cannot fail to see that a change is coming in it much sooner than is generally supposed. A year or so ago mining stocks were scarcely sought for beyond the regular operators, and now the whole city is wild about them. Songar for beyond the regular operations, and now the whole capts who dood them. Undoubtedly the prices they are yielding are, in many instances, much in excess of their value; but there is no doubt that the recent development-more, especially in the Washoe mines, are, in their richness, entirely unprecedented. Herein lies a the washe mines, are, in their remease, emirely unprecedence. Herein lies a source of wealth to the country which it is impossible to estimate, or even to overate. Another, and a more important addition to our resources is coming with the next harvest. The latter rains have removed all fear or doubt on the subject. So far as anything unaccomplished can be a certainty, it is certain that the products of cereals this year will be unexampled in their extent. Our population must increase largely by the immigration necessarily to be prompted by such cheering news, and largely by the immigration necessarily to be prompted by such cheering news, and our commercial and manufacturing industries will find an impetus from the same causes such as hitherto they have never had. With such a present and such a prospect, how can real estate fail to advance? It has been so dult of sale, and for so long a time, that many holders have become despondent, and labor under the impression that it is in the proverbial dismal lane which has no turning. The prediction is now ventured, that within three months from the present time these despondents will find their mistake, and that, as is usual, when the turn comes and prices are offered for their property, much higher than such as they would now readily accept, they will insist on waiting for something better. The sales recently have been unimportant, excepting in the case of a few choice lots in the Western and Mission Additions, which brought fair prices. Outside property is unsalcable. Among the more important transactions recorded for the week ending the 19th instant, inclusive, are the following:

406; and the releases, \$176,675.

# The Primaries and the Railroad.

The Primaries and the Republican Primary Elections yesterday. At first view it would seem as if the C. P. R. R. people had been Sedanned—routed, horse, foot and dragoons; or, to put it more appositely, locomotives, palace cars and baggage trains. The Alta's anti-Goat Island Grab-ticket has won. But how is this? It has won without an opposition. The vote was unprecedentedly small—not half of what it was last year. There seems to have been no fight. Will Mr. MacCrellish and the Committee of One Hundred explain this curious—this suspicious circumstance. Is it possible that Stanford & Co. have been too deep for their fussy opponents, and have won the fight on the masterly inactivity policy? It looks very much like it. It looks as if the C. P. R. B. people were quite satisfied with the Alta's ticket, and, knowing their men, made no effort to defeat them. It has been a very curious sort of fight any way, and if we were a C. P. R. R. rooster we should feel like flapping our wings lustily and indulging in a hilarious crow. hilarious crow.

- The Rev. E. F. Burr, D.D., has written a book upon the evidences of Christianity, which the Pucific recommends to young pasters. This book recognizes modern miracles, and gives some wenderful instances where "God answers prayer, moverfi intraces, and gives some wonderful instances where "God answers prayer, reveals heaven and opens the spiritual world, and so forth." If this Reverend was a Burr upon a sheep's tail, we will bet Magner's Opera House against the Bethel Church that ad the preachers in this city cannot pray it off. We advise all young pastors to throw up their present useless and pharasateal profession, go to some honest employment, and if Elder Grant will pray over one single one of these idle honest employment, and if ratter Grant will pray over one single one of these tills and worthless young humburs to follow our advice, we will record the miracle in the Town Grant, and believe in it ourselves. We will undertake to show for every instance where it can be even possible that God has answered prayer, a thousand cases where He has not. The plants of Argonnaure worthless desarts because they are dry; now Congress will give home steads to every preacher and member of the Young Men's Christian Association if they will go down there and settle; al, they have to do is to pray for rain, and if they get it their farms are valuable. Why note organize a corporation under the lawsof Cablornia to go into the prayer and miracle business. If praying will get thenes, we should like some stock in the company, business. If praying will get things, we should like some stock in the company, Did any one ever hear of a pious young paster being willing to settle over a congregation that had no money, and rely upon hos prayers for his pay. The Fourier Creat belief yet in intractes thuse it; especially modern mixacles, does has tooted by horn, and the walls of Jerneo felt down, stanford has tooted his horn, and the world of San Frame soo are crumblying. Christ raised Lazarus from the dead, Gout Island has breathed new life into the Alter Cadationara newspaper. Journally gourd grow up in a night time; seven how we and dishes ted a muttale. Hay ward has mude four ni lions of dollars on the rise in Crown Point in less than seven wart mis much four far and 60 donors of only the far and far rown for far far days; the whole twelve Apostles never made half as much in their nor likes. The whale swallowed Jonah, and the story is not half as marvelous as Vector Hugo's devil fish, nor half as likely to be true. Water was turned into wine at the mardevi, isin, nor nan as meet to be true: water was turned more with all nor so right fragrefiest; we have seen Helber do the true, and bring all norts of vime figuous and cordinis out of an etpty bottle. San Francisco dairymen turn water into milk at halt a dollar a gallon. The helbes of the Congregational Church at their recent tair employed a necromancer to perform miracles for them at two bits admission, to furnish their new tabernacle, and he did perform meracles, and the *Town* (*Trier* believes they were miracles simply because he can't see how they are done, Joshua commanded the sun to stand still, and it has remained stationary ever since, so the miracle still exists. Nebuch almost are was turned out to grass and flourished; we like asparagras, letture and Indian salad ourserves, hence we see nothing improbable in old Nebs, going to pasture. Egypt had seven plagues; California had twice as many, and we have been willing to let the Israclites go all the time lice in 1819 and froze ever since. Moses divided the waters of the Red Sen, and the hee in 18th and rogs ever since. Moses divided in waters of the fed Sea, and the largelitish flests went over on dry land; it only costs \$1.5,000,000 to bridge the bay of San Francisco, and trains of ears will cross to our city. In the old Christian times it was impossible to serve tood and Mammon; we have seen a circus rider on six horses. Pickering runs two newspapers. In those good old times a rich on standards. I externe that two howspapers, 1d those good out index a fren man could not get into heaven easier than a camel could go through the eye of a needle; now all our rich men go to heaven direct. We agree with the Rev. E. F. Burr that there are a great many mixedes being performed in these stater days. The Romish Church performs miracles daily. Virgins over church altars weep tears; actual, real tears run adown the painted checks of wood and stone. It is a very actual, real lears run attown the painted checks of wood and stone. It is a very simple thing: a little boy goes up a ladder behind the altar, and pours a spoonful of water into the eye sucket open from behind, and lot the vergin weeps. The Welsh girl lives for months without eating, and never dies till she is watched and the larder locked. The last and greatest myscle of all has just come to our knowledge. It heats municulate conception, several instances of which have recently occurred in san Francisco. It beats Papad Infallibility all hollow. The Pope has declined to accept \$600,000 annually from the Italian Government; this is the grandest miracle of the age, and forever sets at rest the question of modern miracles.

<sup>&</sup>quot;Dulness," said Sydney Smith, "turned up with temerity is a livery all the worse for the facings." The irretrievably duil 44th has ventured to criticise us. It has crawled out of its den, like a toad out of its bole, and after spanning forth some sickly spite, has relapsed into its state of hopeless, helpless imbee htt. We should very much like to know by what rule the 44th even thinks of arrogating to itself the right of literary judament. There never has been a more heavy, stapid staff on that paper than it is encumbered with at the present moment. From the gallant Colonel, whose conquests lie in the coolises of the theater to the wordy blockhead with the heart of a Fennan, the build of a Durchman and the clothes of an Engaishman, or to those seedy, needy and greedy locals who pick up news and their board at free lunch tables, there is not one writer for the 44th whose compositions would be passed even by our creand boy. So that, forsooth, when anything out of the merest routine is to be done, they must go out and hire a mercensity, whereof there are two or three hanging on the sketts of Rohemia, ready to do a job clean or dirty, for one side or the other, so long as they get paid for it. Machesth says in The Beggar's Operat, "That Jemmy Twitcher's hould 'peach me I own snap at the hand that fed it.

# An Ending.

I dreamed a dream exceeding fair— They woke me rudely from my sleep; I toil my task, I nothing ask— I neither laugh nor weep. I grow so tired from day to day, [creep, Through hours that lag and drag and I almost wish to dream again— To dream and sleep.

Some day my hands shall lie quite still; Quite still my heart shall lie, in sleep; I shall not dream, I shall not wake, I shall not laugh nor weep!

-Overland Monthly for May.

"Rip Van Winkle" has awoke from his long slumber in Sleepy Hollow and returned again to his native village. The old Bear, ceasing to suck his paw in Hibernation, all guint and nimble, is out on the path again. The Wandering Jew, having made the circuit of the earth, escaped all the perils of ocean and land, all the dangers of disease and death, comes back to us. Monsieur Tonson, with his eccentricities has turned up again; old age has renewed its youth; old wine in new bottles. A mirnice has occurred; a new Daniel come to judgment; a new Gospel; a new revelation. Something new under the sun in spite of old Solomon; another a new revelation. Something new under the sun in spite of old Solomon; another tide in the affairs of men; galvanism to an old corpse; resurrection of the dead; Spring out of the lap of Winter; the old moon in the new moon's arms; a new-born infant from the loins of age; new tops to old boots; new patches to old pantaloons; new vigor to old age. The Alla California newspaper, the "tarquest journal" in the State, has amused itself to make war on the Central Pacific Railroad; talous have grown to the old lion, and it scratches; a second growth of fange, and rad" in the State, has amused usen to make war of the Central Picture Various, talons have grown to the old lion, and it scratches; a second growth of fangs, and it bites; a new breath comes to its nostrils, and it rears; it lashes its recking sides with its own monstrous, bushy tail and makes the dust fig. Great God! how maeb it must be paid to be so much in carnest! Earnest all over, it exudes sweat from every pore, from head to foot; from the tip of Ulpton's nose to the end of MacCrellish's tale it is fairly alive. A lion in its jungle is not more active; a female grizzly in defence of its young is not more desperate; the behemoth of the Nile never slashed and floundered more resolutely. Napoleon, with the mitrailleuse, never rained his iron hail upon the enemy as the Alla rains its type and ink upon the hydra-headed monster Stanford. The earthquake shat shook layo, dashed around the world and shattered Syria, is Nature's sympathy with MacCrellish's rage. The new volcances that are bursting out of the Sierras are satety valves for the escape of Upton's indignation. We stand appalled at the strength of this old giant, refreshed with new wine. We look on in simple admiration of his wonderful power; and we feel safe; we are reassured. Had Tyre and Babylon, Bolbec, Carthage possessed a daily journal like the Alla California, "delends set Carthago" would never have been written; 'Illium fuit' not transcribed over the ruins of Troy; 'Weighed in the balances and found wanting.' Would never have been transcribed upon the banquet halls of the Assyrian king. Had Rome possessed such a journal as the Alla California she would to-day sit in grandeur on her seven hills, the monarch and mistress of the world, and all railroads would have run to Rome. San arch and mistress of the world, and all railroads would have run to Rome. San Francisco can never be sufficiently grateful for the possession of such a journal. So long as the Alta lives and Upton survives, our prosperity is assured. Saucelito. Goat Island and San Andreas may shake their gory locks in vain, our withers are unwrang. If the New York of the Pacific, or Benicia, or Sutterville, or Collins will could have had the foresight to have had James King of William murdered in ville could have had the foresight to have had James King of William murdered in their cities, and out of his blood to have had the Alta spring like Minerva from the head of Jove, fully armed and fully equipped to fight their enemies and rivals, then their now desolate sites would have been crowned with municipal glory. So long as the Alta lives, so long San Francisco flourishes. No matter if we are on the wrong side of the Bay, we are on the right side of the Alta. Oriental commerce would be in vain without the Alta. Our beautiful climate would be worthless without the Alta. All we mind is the smile of God and the smirk of MacCrellish. Let us never cease to return our grateful thanks for so "large," so patriotic, so unselfish, so spirited a journal. Let us thank God for its honesty and shilly. its honesty and ability.

— Darwin's monkey is in bad oder with our ministerial co-laborers in the cause of righteousness. A short time ago our reverend Brother Garrett attacked the unfortunate animal in an hour's lecture, and still later another attack was made upon our favorite by our reverend Brother John Hemphill. Christian ministers seem to have a special spite against Mr. Darwin's little pet. What the monkey has done to array against him these Christian warriors we known not. They cannot be jealous of the lazy, worthless life the pet enjoys, nor envy him in his domestic bliss. In the economy of nature the monkey fills his allotted space. So does a mule and a minister. Nothing is made without a purpose in God's great Kingdom, and we are half inclined to the opinion that a monkey was purposely made to caricature a Minister. The original and striking difference between them is that the Monkey plays his part for the fun of the thing, and the Minister plays his fantastic tricks before high heaven for—from \$5,000 to \$10,000 a year.

# The Last Journey .-- A Realistic Drama in Five Tableaux.

TABLEAU I .- THE HEARSE.

#### TABLEAU II .- FIRST CARRIAGE, -THE TWO SONS,

The Younger Son Poor, poor father; gone at last, eh? and so suddenly, too—ah well, well, we must all die some day, I suppose.

The Elder Son I suppose so; but it cas awfully sudden, wasn't it?

T.Y. S.—Shocking! I may say mysterious. By the way, talking of mysteries: what became of those fifteen bank notes which were in father's desk last Monday? r. E. S.—What do you mean !

Y. S.—I believe I spoke English. I say, what became of those notes I saw father counting last Monday?

R. S.—How on earth should I know. I spose he changed 'em.
Y. S.—That would all be very well, only he hasn't left the house since.
E. S.—Well, don't bother me; I know nothing of 'em.
Y. S.—Oh no, of course not. Your memory must be very weak though, if you've E. S.—Well, don't bother me; I know nothing of 'em.
Y. S.—Oh no, of course not. Your memory must be very weak though, if forgetten them already, when father pointed them out to you so particularly.
E. S.—Oho! we've been cavesdropping, have we!
Y. S.—Eavesdropping is better than stealing!
E. S.—What do you mean, sir!
Y. S.—What I say. Where are those notes?
E. S.—Ill slap your face if you say apother.

S.-I'll slap your face if you say another word! Y. S .- Come on, then !

(Carriage passes by.

#### TABLEAU III. - SECOND CARRIAGE, - THE DOCTORS.

First Doctor -- This is a sad case, gentlemen, a very sad case, indeed; and should be a warning to us of how slight the thread is which which I may say which binds us to this—a—may I say terrestrial globe? Apoplexy, gentlemen, is a fear-(Smiles blandly and hands round smitt law.)

ful thing. [Smiles blandly and heards round south-left.]

Second Bostor (after a hearty pinel)—Yee, apoplexy is a fearful thing, but I don't see what connection exists between apoplexy and our deceased friend.

Third Doctor [also a hearty pinch]—Neither do 11

First Doctor [mild'y indignant]—Welther do 11

First Doctor [mild'y indignant]—Well, but zentlemen, I thought we had perfectly agreed if was apoplexy which had—if I may use the expression—carried off our

Second Doctor O dear, no! Third Doctor-Nothing of the kind

First Doctor [shutting snuff-box violently-Well then-if I may be so bold-what was it ?

Second Doctor - Clear case of heart disease!

Third Doctor-Rubbish! Sunstroke! First and Second-My Dear Sir!!

TABLEAU IV .- THIRD CARRIAGE .- FRIENDS.

First Friend [with a heavy sigh]—Excellent man, gentlemen!
Second [ditto ditto]—Excellent! Third [ditto ditto]—So honest!
Fourth [ditto ditto]—So kind! First—So rich!
Second—How much dive's pose he leaves!
There!—About twenty then, I should think. Why, his farm in Ess. Why, his farm in Essex is worth ten thousand at least

Fourth-O dear no. Third-Eh, why not? Fourth Well, I don't mind telling you, gentlemen, as we're among friends, but

you know I was very — mind, this goes no further.

Omnes [excitedly] - No, no, proceed.

Fourth - Well, you know I was very intimate with the deceased; and he told me, in the strictest possible confidence, that he had quietly sold the farm, and that, owing to certain unlucky speculations, he wasn't worth a rap!

First, second, Third [wildly]—You don't mean it?

Fourth—I do, though.

Third—Why, I've leut him a thousand pounds! Second—And I, too.

First-Our friend a bankrupt, ch! [has an idea] ah! that accounts for the

apoplexy. Fourth-How so? First-Felo de- Fourth-Hush!

Third-I shall never see my money again!

Second-Curse him for a swindler.

Third-Here, stop the coach. D'ye think I'm going to ride in a d-d forger's funeral?

First—Hush, pray hush! It'll do no good.
Second—I'll have the brokers in the moment we get back.
Third—So will I—curse him!

TABLEAU Y. AND LAST.—THE DOG.
BOW-wow-wow, Poor master's dead, Bow-wow,
Nobody to take care of Toby—Bow-wow;
No more sugar, Bow-wow,
No more bones, Bow-wow-wow!
[Currain.]

-- Hornet.

### Primitive Human Races.

The Revue Scientifique publishes an interesting lecture on primitive human races, in which an endeavor is made by M. de Quarrefages to trace the origin of the races inhabiting Europe through the various traditions of the different countries. The Greeks and Romans did not go very far back to account for their origin: the former declared themselves descended from the stones of their country, the latter traced their descent from the Trojans—that was the utmost stretch of their lancy. In short, most of the nations of antiquity considered themselves children of the soil. In our days the comparative study of languages has greatly contributed to cast some light on the origin of nations. In 1784 the study of Sanserit commenced by the publication of the sacred books of the Hindoos. Anquetil-Daperron brought over to Europe the Zend-Avosta, and Bournouf rectified its text by means of the Persian and Sanserit, and in this way got upon the track of a language lost many centuries before our era. It became apparent that the Zend of the book of Zoroaster and the Sanserit of the Vedas are but dialects of an older idiom, and sisters, not ancestors, of our modern European languages. Hence, all the nations that speak them are descendants from one common stock, called by M. Pietet, the primitive Aryas, whose history he has recomposed by nearly the same process employed by paleontologists for the reconstruction of the past ages of our globe, with this difference, that here fossil remains are replaced by words. The surface covered by the Aryan race extends almost without a solution from India to Gibraeltar and the Baltic. South of this vast zone there was another group of whites, the Semites, completely separated from the former by their language. This much has been obtained from the linguistic science, but human paleontology has unfortunately stepped in to create some confusion in this system so satisfactorily arranged. Two difficulty which modern science has still to grapple with.

# Vindex Pixley.

Frank Pixley spoke at the "Meeting of the One Hundred" the other night. That he "spoke right out in meeting" is a matter of course, since it was Pixley who spoke. Nevertheless, the dim opacity who drools in the local columns of the Alla declares that the Hon. Frank on that occasion "lacked determination and a settled idea." The opacity adds: "It was impossible to tell exactly where he (Pixley) stood on the question." We wonder whether the Alla's intellectual dark lantern heard the speaker when he intimated that the Committee had been got together as a sort of stock-jolbing move, to give a boost to the Atlantic and Pacific Railroad Company? Did he hear him declare that "if the Central Pacific Railroad were trying to levy black-mail" by flourishing their Goat Island "stuffed club" (such was the Hon. Frank's picturesque metaphor), he, for one, "was ready to pay his assessment and get rid of the cloud on his property?" If he did hear these somewhat significant utterances of the Hon. Speaker (they were delivered in a voice that a deaf man might have heard), and yet found it "impossible to tell exactly where he (Pixley) stood on the question," he must be the inheritor from his ancestral chimpanzee of one of those robust crania that protect the brain from the invasion of an idea by any gentler process than trepanning. The fact is, the position of the Hon. Frank on the Goat Island question is very pronounced. Mr. Pixley will accordinely consider himself both vindicated and avenged; and the dunce who "could'nt understand his position" will consider himself promoted from the ranks of the merely average idiot of the San Francisco reportorial corps, and assigned the proud position of chief phenomenal block-head of his tribe.

Tenacity and unreliability has been pretty well confessed by the Bulletin of last evening. After adding the painful sensation from the late earthquake in Inyo county and the adjacent disturbances, it says the whole thing has been much exaggerated. This at the time we concurred in; but what will not our sheet-owners do to sell a few extras, illustrative of newspaper enterprise on the Pacific Coast?

# Leaves From a Lady's Diary.

APRIL 14 .- I was thinking, as I sat in Grace Church this morning, how very much stained glass windows are like people's minds and character. On the exterior they look dark, time worn and almost forbidding, but when the light of love or and I verily believe if the small-pox were prevalent she would get up a sympathetic pustule.

APRIL 15.—Horace W— has just returned from Mexico, looking brown and handsome, and as conceited and loose as ever. I don't know why he should always make me the completent of his petits emours. I told him this morning that be talks as it a woman could never jithim or leave off loving him, and that the could drop them whenever he pleased to do so. I can't bear his mother, she is always saying fil-natured things of people, and really prides herself on her discernment of their faults. She only sees the blight on the rose, not its beauty and per-

April, 16 .- Nothing offends me more than Caroline H -- 's way of jerking your April 16.—Nothing offends me more than Caroline H.—'s way of jerking your arm when you are walking with her, and directing your attention to some one you are meeting. In nine cases out of ten it is a gentleman, and in nine cases out of ten lie sees the movement and looks awkward. What extraordinary people one does meet, however. There's Mr. G.—, for example, he wears a hat that is so stupendously ngly that it is no longer ridiculous, it becomes sublime. There is no nam more ridiculous than he who endeavors not to appear so. One sees the painful effort and immediately the feeling of being ill at case comes upon once, went to see The Paluce of Truth and isked it very much. The house was crammed, and The Paluce of Truth partially affected the audience, for I saw some ladies who profess the greatest refinement pushing and struggling, with flushed and distorted faces, like the lowest of their sex.

### The London Press on the Geneva Conference.

A telegram, dated London, April 19th, received yesterday, says: "The Times describes the British counter case as conceived in a grave, statesmanlike spirit, while the American case reads like an advocate's speech to a jury in a trial reasonable and battery. England's reply reads like the atterance of a Judge. The Telegraph says Americans, studying with impartiality our counter case, will find reason to fear not only for their claims, but for something more. Instance on inreason to rear not only for their variate, our for sometiming more. Instance on instance of overstatement and inconsistancy is brought against them until the great fabric of laborious ingenuity trembles to the foundation.

The intimation received here of the probability of the withdrawal of indirect

claims is favorably commented on by the press, which praises the Government and people of the United States for an apparent disposition to render possible a fulfillment of the terms of the Treaty of Washington.

- In reply to an " Enquirer," we beg to say we know nothing about the " Gulf In reply to an "Enquirer," we beg to say we know nothing about the "Gulf of California Commercial Company of San Francisco and London Capital \$600,000 e 6,000 Shares at \$100 each; Landed Property, \$6,000 Acres; with Town-site of Port Pariso." At present San Francisco knows nothing of the country beyond its ability to raise peanuts, and the Londoners, without further information, will not give Badger a dollar. Of course, the Londoners will send to us, and we shall say what we think. It is one of our ordinary "swindler," and no one will touch it without evidence of value from the S. F. News Letter.

- On the first of May next, there will be two gold note banks in San Francleco, each with a capital of a million dollars. Two million in gold notes will be put in circulation, which will materially augment the available business currency of the city. The second of these institutions to adopt this system of banking is the California Trust Company.

- By private advices from India we learn that the assassinations of the Chief Justice and Viceroy are discovered to be part of a plot to remove those officials and the military Commander-in-Chief, who is therefore described as a marked man. The fact that the assassins of the two former are brothers lends color to the story.

## Adoon the Lane.

Upon ane stormy Sunday,
Coming adoon the lane,
Were a score of bonny lasses—
And the sweetest I maintain,
Was Caddle,
That I took beneath my pladdie
To shield her from the rain,

She said the daisies blushed
For the kiss that I had ta'en;
I wadna hae thought the lassie
Wad sae of a kiss complain.
"Now, laddie!
I winnie stay under your pladdie,
If I gang hame in the rain!"

But on and after Sunday,
When cloud there was not ane,
This self-same winsome lassic—
We chanced to meet in the lane—
Why dinna ye wear your pladdie?
Wha kens but it may rain?"

### Our Mineral Wealth.

In Trinity County an exceedingly rich quartz ledge has been discovered on East Hay Fork. A sample sent to this city to be tested assayed fourteen hundred and odd dollars to the four in gold and silver, yielding \$155 per to in silver. The miners in the mine owned by Richard Inch, near Sugar Pine, whilst drilling for a best hole during the late carthquake were astonished at not being able to strike bate. hole during the late earthquake were astonished at not being able to strike the drill, as it danced about in an unaccountable manner. This being deemed unnatural by the old gophers, they unanimously stampeded. A chispa weighing \$300 was found last week in Sonora. The editor of the Sonora Independent says: "We hear every day that the mines are played out, but we are almost daily in receipt of some lucky hondre coming across a rich pocket. We were never more strock with this then the other due, we are almost about or of Turnbury and the other due, we are almost about or of Turnbury and the other due, we are almost about or of Turnbury and the other due, we are almost about or of Turnbury and the other due, we are almost a former or of the other due, or according to the other due, or according to the other due to "We hear every day that the mines are played out, but we are almost daily in recipt of some lucky hombre coming across a rich pocket. We were never more struck with this than the other day, on seeing about \$7,000 taken out of Turnback Creek by some Chinamen, and the yield of gold from all our mines is shown to be large from the certified statements of Wells, Farco & Co." The San Diego Union, of April 10th, says: "A clean up of ore from the Owen's ledge at the mill of De Frees & Co.\(^9\) shows that the grade of the ore has advanced from \(^\$17\) to \(^\$50\) per ton. Eighty tons were crushed which yielded \(^\$4,000\), and the mill has commenced runing upon another lot of the rock, which is expected to yield \(^{\$75\}\) per ton. The Antelope has just cleaned up a small lot of ore from the Madden mine, which yield \(^{\$150}\), one time the substitution of the lock is very large and the mine looks promising. Workmen in the Barlow mine, Amador, have struck rich rock on the level, and their are indications of a fine lead ahead. Indications of very rich gold quartz lodes have been found twenty miles northeast of Chico. The Gilroy Advocate of April 13th says: "Robert Stanyon & Co., of this place have discovered what promises to be a rich quicksilver mine on the headquarters of the Los Ranos, in the northwest corner of Fresno County. The company have a number of men working the mines, and with flattering prospects. The cinnabar assays the equivalent of \(^{\$222}\) 50 per ton." The Napa Reporter of April 13th says; "Rodney Hudson showed us vesterday some very rich specimens of cinnabar, found in the mountains between 8t. Heisma and Guilicos Valley. The Oakville mine has excelent prospects. The mine is now rather being prospected than worked, and we they are reducing from eight to now rather being prospected than worked, and yet they are reducing from eight to ten tons per day of ore as it comes, ranging from one to five per cent. The monthly yield is about 10,000 or 150 flasks. It is estimated that there are at least 10,000 cross of ore in high to yield is about indood of loo masss. It is estimated that there are at each month tons of ore in sight. The company have received a United States patent for their property." From Calaveras we have reports of very large mining operations in the various districts in that county, and corresponding results may soon be expected. The following very interesting account we have from the Inyo Independent:
There is in the vicinity of Columbus about 3,000 acres of least containing borate of
lime and borate of soda. The deposit varies in thickness from one inch to fifteen lime and borate of soda. The deposit varies in thickness from one inch to filleen inches, and the crude material, as taken from the marshes, yields about fifteen per cent, of boracic acid. Hearne and Mott are manufacturing a superior quality of borax from the borate of soda. Their borax is made by a process differing entity from that by which the English borax is made. It contains an excess of boracic acid, and a less per cent, of soda, hence its superiority over the European article. They own their own lands under State laws, but when the Government surveysare They own their own lands under State laws, but when the Government surveysure extended over them they will of course have to purchase of the Government. Large quantities of borax can be made from these marshes, as the supply is almost inexhaustible, the borate of soda forming again within a few weeks after it has once been gathered from the surface of the land. The Grass Valley Union has the following: Hunt & Talbot have had twenty loads crushed from the Eric mine, which yielded \$1,200 in the aggregate, or \$90 to the load. Donahue & Ryan, from their claim on Woodpecker Ravine, have had a crushing of twenty loads, which returned \$784.75, or about \$65.50 per load. The Bradley & Boss lode is about three feet thick, and the rock pays from \$40 to \$60 per ton. The last crushing from the Blue Leud Company's claim gave a result for sixteen loads of \$32.50 per ton. The Grass Valley Republican tells of a gold brick weighing 529 ounces, which came from the Empire mine, and was valued at \$8,900. It was the product of less than a month's run. month's run

Altogether the mining interest in California was never more promising.

### The Married Flirt.

Fair young flirts ridiculously pretend to have such things as hearts, and no man who dallies with them knows when he may find himself hopelessly involved in an affair which can only end honoraby in matrimony. A married woman, of course, is above all suspicion of any serious or dangerous meaning in her advances, and when the husband is of easy-going temperament, and looks on with a rather flattered air than otherwise, the business of flutation becomes exceedingly pleasant for both parties. The domestic bargage, indeed, is not always a dead weight pleasant the lady's movements; and, just as a soldier sometimes delivers an elective shot under the cover of his knapsack, so the married flar may make her demestic surroundings the medium for the accomplishment of her days late. Her title exemines roundings the medium for the accomplishment of her designs. Her butle exemings at home, where the men predomnate, and the hady visitors are all either out or plain, are the scenes of some of her finest exploits. If she is not very landsome herself, she stands out prominently from a rather commonplace background of ladies who are, perhaps, toned down to the proper pitch of propriety. She usually has her favorete of the evening, who may be a gentleman of any age, but prefers, perhaps, a rather black individual, who wears the appearance of having dipersonded deeply into the forbidden pleasures of the world. She is, however, perfectly omnewerous in her tastes, and for a change, or to stimulate a jaded palite, she toys, now with a youth, whose freshness pleases her; now with a man in the early prime; but her half-wearied man of the world is the especial layorde. To him she reveals all the pretained little secrets of her domestic life, her special trails and frombles, not the life trails and frombles, not the life, with an air of romance about them invested for either of fact but fictitions ills, with an air of romance about them, invented for effect, and told with the charming air of a suffering martyr. She does not tee, bim, for example, that, though her face is full of smiles before company, she has usually nothing but black looks and sour speeches for her husband and children, when no one is looking on; or that the weaker vessel has long since surrendered the control of the household into her hands, and has no voice at all in domestic attacts. She would chide him, and in no solvery tones, if he dared to seem at home in his own drawing room, and her children know her too well to cross her imperious will. But we are trespessing behind the scenes, and have no right to expect a woman of this class to waste the amiable side of her disposition upon her family. To them she is simply an object of terror, or a clever actress who does not foolismly practise stage walk, or talk in stilled language when the curtaen is down. The domestic squidbles, could we but reproduce them, would no doubt be edifying, but we have no right to intrude upon the sacred spot where all the venom of her nature is vented. For us she is simply a public character, and it is in her public capacity that we For as such samply a phone character, and it is in her phone capterly man we must regard her. Her husband we may at once dismiss from consideration, he being merely an animated piece of furniture, or a portion of the domestic laggage. She is by no means bland to his failings; and, while all the other men in her circle are absolutely faulties in her eyes, he alone is full of faults, which she is in the constant habit of reviewing with no friend y eye. She could stab him, like another Cytemnestra, did she suspect him of one tithe of the peccadi locs that her favorite has committed, but the farming of the house is intended for every day wear, and must have no visible daws, while the men who afford her the greatest accessment are necessar in delightinly wicked. She can return sensions looks with 21 necessar equally sensuous, and might possibly forget the conventional restraints of life if it were safe to do so. But even with such a woman as this, public opinion has some weight, and there is a point in her firted one beyond which she will not be induced to go. All the treedom that is possible within the wide bounds she sets for her-self, she will have, and, fruth to let, it is difficult to say where propriety ends and impropriety begins. An inexperienced man mucht interpret her freedoms rather too i teracy; but men of the world know exactly how to receive her attractions, and do not loose their heads when she is looking unniterable things, or laying on

The married first goes to bais and as & of the desights of the dance with all the freedmest of the grain her freedmest of the grain is threadfast to grain her peasures, and wonder how they fare, while manma is threadfast the guidy mazes of the waltz, or what domestic confort there can be for the hasbeard whose wite spends her time in such unsersomable gatety, or what his real common may be allowed the such as a first the guidy haves of the waltz, or what domestic confort there can be for the hasbeard whose wite spends her time in such unsersomable gatety, or what his real common he of her conduct and character. She attends the theaters when she can get any one to take her, and throws out broad binds about hox orders and stalls for two. She would like to see the new piece; and, if you are at leasure, you mught take her, or drop in before the play is over. She likes a but-a-tick with a grateman in a theater-one can take so freely when there are no on-look rs, or perhaps you won darke to go with her to the next ball, she usually dances tell electually upon a man who has seen much of the world. In one's younger days it might have been pleasent enough to take a lady to a dance ng party or the theater. But imaging the hore of paying the carpet night to such a woman at the time of the when the pleasures of socially have began to clay. The vexaction of dancing with her daring the greater portion of an evening, and the misery of seeing her home in the morn ng! Some men, indeed, retain the vigor and thoughtless gately of youth was of the pleasures of socially a train the vigor and thoughtless gately of youth was of the pleasures of social was cannot not have a refer to do an evening and the misery of seeing her home in the morn ng! Some men, indeed, retain the vigor and thoughtless gately of youth was of the pleasure of social to can compleaenth bear the follows of a woman of maken according to the cases of the tan

ordeal. You may, indeed, have met the lady at an entertainment when she appeared in heavy marching order, with all her domestic baggage about her, but that was quite another affair. You danced with her then without the dread suspicion that you would be compelled to see her home, and you were not required to pay her undivided attention. What, indeed, is the special advantage of being unmarried if a man good-naturedly encumbers himself with the wife of another? A sense of duty will, no doubt, enable a Benedick to go through many and grave domestic ordeals; but a man who voluntarily places himself in a disagreeable position can only cousole himself with silent curses, which, however, unfortunately tend to discompose the placidity of his features, and reveal what is passing in his mind. The wise man will, of course, flirt with the fair creatures at all times and seasons when he can do so with the least inconvenience to himself. We are not so Quixotic as to believe in the absolute perfection of the superior sex; and it is just as well for an enthusiastic admirer to remember that the married flirt tries her hand upon all her masculine acquaintances alike, without fear or favor. \*Civilian.\*

Taking up a religious contemporary, the other evening, to read it aloud to our family, as our custom is o' Saturday nights, we came to the heading, "A Minister Fallen." Mrs. T. C. stopped us at once. "Why," asy, she, "do they love to releat over a brother's fall?" We could only say it was customary in the profession, and proceeded to read on. "Few ministers were once so popular, belowed and respected in religious circles as the Reverend Hilkiah Jehosbaphat Rabshakeh Sykes." Our closest daughter, a kind-hearted girl, interrupted us. "How cruel of them in his fall to harp upon what he once was! What must poor Mr. Sykes feel on reading the paper to which perhaps he once contributed and being reminded how much he was thought of, now in his fallen state when no doubt he is despised, by everybody!" We feebly suggested that perhaps Sykes would be the better for it, as it might induce him to pick himself up again. We read further: "Alas! the places where he was an honored gnest now know him no more." "How very shabby to treat him so," exclaimed our cledest boy, who attends high school. "He will never again be permitted to ascend a pulpit and deliver with that wordeness unclined the message of sulvation." "Now! call that downright Pharissism!" said our wife. "We are all fallen creatures, more or less, for that matter, although some sink lower than others. This poor clergyman seems to have held a very elevated position, and to have fallen very low down, indeed. Still, he may repent, and it is presumption for any one who calls himself a Christian to say that he will never be permitted to preach the Gospel again. Many ministers have fallen, but been restored after suspension. I declare the church nowadays is even less charitable than the world. But go on." "Poor Sykes! how are the nighty fallen! Thou wast a cedar in Lebanon, and we but fir trees. 'How fire tree for the cedar is fallen!" This was too much even for us. We put down the paper, and turning our eye-glasses seriously upon our family we said: "Children, never indu

<sup>—</sup> Now, in the name of all the gods in the calendar, what has betrayed "Our Grandmother" into the fancy that the people of San Francisco can any longer stomach her spasmodic retchings? Were it not that the rickety wheezings of the imbicile octogenarian exhibit symptoms of chronic dry-rot, the Tome Uriar would be half-inclined to bastimado the jade. Out of pure benevolence, however, he prefers to tickle the palate of the petulant old body with lollipops. If our predecesor, Rierce, ever said anything forbearingly of the Crone, may the good Devil forefand him—for verily we know the good God will not. What we have done, was but to chronicle the fixed contempt existing in the minds of the thinking public, touching the leaden stupidity and celestial duliness which have for years marked the columns of that vapid, sleep-provoking, huge, "undouble-ouble-up" horse blanket. And this, in simple justice to the intellectual reader, who habitually looks to the News Letter for judicious criticisms; knowing that it admits nothing into its pages but that which is just and that which is true—two trifling attributes, by-theway, the Alta California has never been suspected of possessing. We are not disposed to waste further thought upon that inanimate paper—for it is already as ifeless and fetid as a corpse seven days dead of the plague.

## Is There Not Truth in This?

There are thousands of good-hearted people who are seriously afflicted because this world is no better than it is. They have the desire to better the condition of mankind but not the power. It is easy to plan theories and systems of government by which we might all become angels, and, so to speak, feed from the dewa ment by which we hight an become angers, and, as practice is among the impossiof heaven. To put such theories and systems into practice is among the impossibilities. Notwithstanding this, modern reformers, gushing with the very cream of
human kindness, attempt to reorganize mankind on a new basis. So enveloped
and enthused are they in their own ideas, that they will scarcely admit the hard,
practical and useful work accomplished by the plodders and to sers who, without
any special "mission," or laying claim to such, have really accomplished wonders.
In discussing the practical, ethical or metaphysical, the Uyaic, from the laws governing his mind, first commences at the root or home of his subject. He knows
that there are much things as infinite space, boundless eternity, a thirst for immorthat there are such things as infinite space, boundless eternity, a thirst for immortality, and all that, but his mind being analytic and positive, he commences at tality, and all that, but his mind being analytic and positive, he commences at tality, and all that, but his mind being analytic and positive, he commences at tality, and all that, but his mind being analytic and positive, he commences at home, and if there are wrongs, griefs or evis, there remedies them. What there is good will receive his praise; the evil, his censure. This without fear or layer. An article which appeared in the Neurs Letter three weeks ago, criticled "Shall we Survive or Perish" and which argued that the eminent men of modern nations were intellectually inferior to celebrated characters in ancient Roman, Greek, Hindoo, Egyptian and Persian history, was declared to be decidedly cynical. Among others, one of the first thinkers in this city accessed the News Letter in this instance of being a worshiper of the past and a cruel crusader against the present. In the article alluded to we maintain that the position taken is impregnately, namely that eminent modern scholars are intellectual pigmies compared to the intellectual Titans of antiquity. This view was extremely congenial to the amiable reformers of whom we make mention, and who loose no opportunity to throw a gentle sheer at the efforts and accomplishments of the practical toilers of to-day. But the Cynic aims at universality, and will not be chained to isms, hobbies or special missions, which distort the mind and make as look at the world from narre w and contracted which distort the mind and make us look at the world from harrew and contracted years. Whatever may have been said enlogishe of the intellectual past, the intellectual present is not to be succeed at. The former was largely posts, the atter is extremely practical. And here we come to the root or home of our experiences, We need not go outside of San Francisco to illustrate this. There are in our midst hundreds who are greedy worshipers of ideal past, dreamers of beautiful dreams as to what might be, estatic adorers of some pet theory to elevate mankind to the millennium. But this is all they do-to theoretically elevate, worship and adore. Like the ancient Hundoo sages, they are to theoretically extent, worship and adole. Like the ancient Hundoo sages, they sit down and think, and think until they mesmerize themselves into mighty reformers, whose breath touches the heart of mankind and inflames the world with prophetic power. In this mesmeric state we are all perfect, and the dream, the long and agonizing dream, when the lion and the lamb shall sleep together is realized. But this does not litt humanity out of the slough, shall sleep together is realized. But this does not sit humanity out of the slough, nor does it have any other effect than simplying the intelnet subject to the hall-neination. This is about the work accompished so far by modern reformers. To have noble, exalted, divine thoughts, and act them out in life, patting them into force and practice, and move the world by their mighty power, thus, and thus alone is the destiny of the heroic reforming soni. And while we may not know of such soul, may we not inquire as to what the so much abused intellectual plodders in our midst have done? Wonders: They have made a beautiful city out of sand-hills; by slow growth, hard toil and much dangers, given usa local government in which life and property are seenre, built spiended school houses, asylams for the orphans, insame, and the deaf and dumb, jails and penitontiaries for the unfortunates, temples of worship, are reared on every hand, and, in fact, provided for the multijudious wants of society. Hotels, stores, pleasure gardets, watering paced multitudinous wants of society. Hotels, stores, pieasure gardens, watering paces, public parks, nuc drives, race courses, agricultural societies, public libraries, etc., are created by these piedders for our pleasure or amusement. So thoughful are they that water and gas, at the touch of the hand, minister to our wants. They have built street suite. have built street railroads, state and national railroads, telegraph lines, established steam-ship lines and sailing lines by which, at a moment s notice, we may fly—if we can use the expression to any part of the world. May we not be permitted to add that the hope of being able to fly, through the steamship Aritor-a peculiarly California marvel—will at no distant day be realized in its ful ness? What shall we say of the practical, toiling farmers—God bless them who have made out of our wild wastes one of the first agricultural States in the Republic? But more: even these plodders are so careful of the lives of their fellow-citizens that men are specially employed to watch over us night and day lest we should be harmed in perspecially employed to watch over us night and day lest we should be barmed in person or property. At the first alarm armed guardians of the peace fly to the rescue of any citizen in danger. If wronged, Cohris are established to do justice, In politics we are all equal, the humblest having the power of the greatest—if the humblest appreciates the sacred power the intellectual plodders have confided to him. Need we ennumerate other and no less plant and practical works, which these plodders have anaugurated and carried out? Shall we mention by namethose energetic and enterprising citizens who create work for the masses? Are their names not household words? Should we not respect, admire and wenerate them? Are they not the very salt and leaven of this and every other community? Can 'modern reformers' sneer at them with justice? And if they do sneer, the 'grife asks what have the reformers done but dream tidle dreams, wasted their cuergies in vain words and accomplished nothing. vain words and accomplished nothing.

# Special Brevities.

On Saturday, April 20th, "Napoleon," John Wilson's old circus dog, died in this city at the advanced age of twenty-three. Dogs die daily that deserve no particular mention, but "Napoleon" merits as fair a share of honorable reference as any dog that ever lived or died in this city. One fact alone will prove it. He accomplished in his lifetime more than thousands of men do in theirs: he saved three persons from drowning at the risk of losing his own life. "Napoleon" knew all about the circus, and was never better pleased than when withnessing or participating in the sports of the sawdust area. When he reached the years of doghood he became subject to fits, resulting from precipitation of blood to his overwrought brain. He became his own physician, and instead of resorting, as men similarly afflicted sometimes do, to stimulating drinks, which aggravate their malady, he tried cold water. Whenever he felt an attack coming on, "Napoleon" would start for a bucket of water or a trough, plunge his head into the water and hold it there as long as he could hold his breath. This generally had the effect which he desired. As age advanced he became deaf and blind, and his limbs were stiff and almost useless. The last attack killed him. "Napoleon" was a "traveled" dog. He came to San Francisco from New Orleans when but a youth, and soon engaged with Wilson's Circus. With that he visited nearly every county and town in California and on the coast. He also visited Australia and China, and became a favorite of men wherever he went, for he was honest and true. "Napoleon" was buried on a hill at the corner of Powell and Sacramento streets, in the presence of a very large company of men who had known and respected him. A gendeman read a sketch of his life, fresh flowers and wreaths lay on oid "Napoleon" sy grave, and the majority of those assembled adjourned to their respective favorite resorts for "drinks and a cigar."

— A correspondent recently visited Baron von Liebig, and had a very interesting conversation of an hour's duration with the veteran, which he reports very fully. Touching questions of alimentation the correspondent writes: "And beer? Is it necessary that people should drink as much beer as you do in Munich?" I asked. "Beer," said the Baron, "is better than brandy. Man must have a stimulant of some sort. Brandy is a great evil. We find that the consumption of beer is making headway even in the wine districts, for instance, in Stuttgart. As a nourishment, beer takes a very subordinate place, not higher, indeed, than potatoes; and we find that in no city is there such an amount of meat consumed as in Munich, where the greatest quantity of beer is also consumed. Beer must have meat or albumen. Before every beer-cellar in Munich you will find a cheese-stand. Why? Because in cheese you find that albumen which in beer is lacking. Therefore you see that beer and cheese go together like a law of nature! But as an article of nourishment beer is very subordunate. Schnapps is a great misfortune, and destroys the power. Through our late war we have won great respect for tobacco tea, coffee, and extract of meat. A physician told me that when the wounded would take nothing else they have grasped at cigars; their eyes glistened—they felt a lifting up of the sinking nerves. Tobacco must have its effect. We could not do our to wounded, frequently, a greater service than by giving them cigars. And we came to the conclusion that tabacco was invaluable to us." These are Baron von Liebig's own words, noted down as he spoke to me in German.—Court Journal.

An alarming increase of deaths by heart disease leads the British Medical Journal to warn people to take a little more care not to kill themselves for the sake of living. In twenty years the percentage of deaths from this cause has greatly advanced, and the total, which in 1851 was 5,746, in 1870 was 12,428—more than double. The increased fatality from this disease appears to be entirely among males—the percentage of females is unaltered—and it is almost solely during the time of life when a man's energies are most actively employed, that is to say between twenty-one and forty-five, that, according to the returns, he is exposed to this danger. The simple fact is, that the extraordinary pressure and excitement of the present day produces this large number of cases of heart disease. It is in a great measure unavoidable. Competition, burry, the disposition to annihilate time and space, which steam and electricity encourage, are destructive of the machine. We are cautioned to avoid incessant labors which too often "make useful lives joyless, and embliter the harvesting of the crop which has been too diligently sown." This advice applies with even greater force to ourselves.

Nine 35-ton guns, the number ordered to be manufactured at the Royal Gun Factories, 17-to, 4 resenal, Woolwich, this year, are now completed, and ready for proof. The the been bored out to a calibre of twelve inches, but there is still an opinion precedence of the control of the control of the result of the result of the result of the result of the gun, and that the enlargement of the bore will necessitate an elongation of the barrel. These new "Woolwich Infants" are the most powerful pieces of ordinance now in existence in this or any other country. They will send a steel shot through fifteen inches of armor plate, or carry a 600-pounder cannon ball from Woolwich into the city of London, a distance of seven miles. These guns are specially intended for the navy, and are to be first used in the three large inonclads now in course of completion. Two of these ships, the Thunderer and the Devastation, are of 4,400 tons burden, and the other, the Fury, is of 5,000 tons. Each of these vessels will be provided with four of the 35-ton guns, which they will carry in two turrets, two guns being placed in each turret side by side.

- London is likely soon to have a very novel and curious kind of visitor; the tattoocd man is coming. From the crown of his head to the tips of his toes, he is covered with dark blue figures of animats and plants, in the inter-paces of which appear to be characters in blue and in cinnabar red. On the for head, one on either side, are two painthers, "regardant," as headds would say, and separated in the middle line by red characters. There are altogether on the body no less than 38 figures. All of these are of a blue color, and represent apes, leepards, eats, tigers, eagles, crowned splantses, storks, swans, men, women, ciephants, crocodiles, backs, fish, ions, smalls, fruit, waves, lowers, hows, arrows and gravers. Some of these are fairly done after nature; others are "conventionaized. He was, he states, forced to independ this calmorate tation by the Chinese Government as a punishment for some portical offence—a capital offence he will make it of he plays his cards, or rather heists his colors, properly in our lion-loving metropolis.
- Austria has now definitely adopted the French metrical weights and measures, to be employed optionally from the 1st January, 1873, and exclusively from the 1st January, 1876. The standard metre is a crystal rod, which, at an ice-melting temperature, gauges 969-95765 millimetres of the prototype preserved at the Arts and Metiers Museum in Paris. The standard weight is a crystal cube weighing in vaccio 969-9578 milligrammes of the Paris prototype.
- Boettcher, the inventor of gun-cotton, says that 'adies ruin their complexion by remaining too 'eng in rooms contain up large murrors. The heat of the store affects the tur-foil on the back of the mirrors, and vibrates the air in the room. In order to find out this, he says, it is only necessary to suspend a plan gold ring over a mirror hanging near a stove. In the course of a few days the color of the ring will undergo a marked change.
- It is said that an Italian of the name of Goroni has undertaken to petrify the body of Muzzini within eight months. M. Goroni has been for years engaged in special studies of this nature, and has arrived at the most extraordinary results. Among other proofs of his skill, the doctor possesses a stick of which the head is formed of a human eye in an admirable state of preservation, and as hard as a crystal.
- Among the eminent European musicians that will visit the United States next fall, will be Appollinar Konsky, the greatest Polish violinist. Together with his daughter, a brilliant pianist, he will give concerts in the principal cities of this country.
- Salomon Heine, the banker of Hamburg, has left his immense fortune to the widow of Heme, the poet. The lady is a Frenchwoman, and immediately subscribed \$200,000 to the Liberation Fund.

#### Court Chat.

The recent attempt, by a foolish Irish boy, to coerce the Queen of England to sign an annesty of the Fenian prisoners, by presenting a worth ess oil postelather here head, is the fifth outrage of this sort of which Vectoria has been the vicinian since she are need the throne. Assassins do not always choose tyrants as the objects of their vandictiveness; neither has Victoria ever given occasion, or the shadow of exense for the insults-she has received and the attempts which have been made upon her the. A milder or more harmless sovereign never wors a crown. The exits of the British monarchy are rather inherent in the system than the result of personal characteristics. The first attack upon the Queen's 'life was that by the public house boy, Oxford, on June 10, 1810. She had then been about throe-years on the throne. The Queen and Prince Albert were leaving Buckingiams Paines by a side-gate for their atternoon's drive, in a low placton, drawn by tour houses, with outriders, when the boy, who stood a little apart from the crowd which had gathered to see the royal people, fired directly at them. The Queen side in high children in the state of the interest of the side leveled at the carriage, pulled her down again. A second shot was fired by his head. Oxford could be seized; and it appears that the Prince heard both shots whiz by his head. Oxford was about seventeen, the same age as O'Connor's, the latter was found to be clearly a lumaid, and curiously enough, O'Connor's attack was on nearly the same spot as Oxford's. The hatter was found to be clearly a lumaid, and was returning from her afternoon drive, and had reached Constitution Ital queen by being sent to an asylina accordingly. About two years later, Victoria was returning from her afternoon drive, and had reached Constitution Ital queen by Ki, James's Parki, when she was shot at by a fellow named Francis, who seems to have had no excuse excepting desperate poverty. The Queen showed great coolnave had no excuse excepting these powers. The Queen showed great c

was in the late Spring of 1850. She had been paying a visit to her uncle, the Duke of Cambridge, in Park Lane, who was ill, and soon after died. As her carriage turned into Piccadilly, a rufhan named Pate rushed up to it and struck the Queen several severe blows across the face with a stout cane, crushing in her bonnet and leaving an indentation on her checks. The Queen's children were with her, and Pate seemed about to attack them when he was seized. The royal lady displayed on this occasion remarkable courage, ordered the carriage to proceed, and drove quietly to the palace. The police with difficulty saved Pate from the fury of the populace, who manifested a disposition to apply lynch law on the spot; he was tried, and, the defence of instantly failing, he was transported for seven years. The result of the assault of 1842 was a parliamentary statute, which provided proper penalties for such casses; and this act has been applied to the subsequent offenders.

- The Bombay Gazette says: "Of all the addresses which were delivered to the congregations on February 27th, perhaps the one which for its specialty particularly merits notice was that made to the Khojas a division of the Mussuiman community—by their high priest, his Highness Aga Khan. Our report of his address mentions that, after speaking of the happy recovery of his Royal Highness the Prince of Wales, he referred to the lamented death of the Viceroy, and quoted a tradition from the Prophet Mahommed, 'That it is a great duty upon his followers (Mahommedans) to pray for the health and prosperity of their Hakam (king or ruler) under whose authority they are protected, even if the Hakam were anjast. His Highness further said that he recollected having seen many other traditions from his Holiness the Prophet Mahommed, confirming the above tradition. The British Raj, he pointed out, was very just and kind, always caring for the welfare of his subjects; and it was a fact that, wherever the intentions and purposes of the King were directed toward the welfare of his subjects, God Almighty always sert His blessings upon the country of such ruler, and it was always prosperous. He also impressed upon his hearers that at the present time all the people under the British rule are comfortable, while the people in many other parts of Asia are in trouble, through fundace, sickness and other causes; and this, he said, showed that the intentions and purposes of the British Power were kinder and better to their subjects than those of any other kingdom. Therefore, according to their belief, twas necessary to pray for the health and prosperity of the Hakam. And, this being a special oceasion, to pray and offer up thanksgiving to Almighty God for the recovery of the Prince and Heir Apparent to the kingdom, under whose protection lives and property were safe and religion free."
- Prince Bismarck, while conversing at dinner with the governor of a province, attacked the feeble politics and incapable attitude of some past Prussian kings, and, seeing the astonishment of the poor functionary, he added: "You see, when I read Prussian history, I always imagine what I should have done in this king's or that minister's place. Then I perceive that Prussia long ago might have conquered, and easily enough, quite another place in Europe. Perhaps, then, we could have spared the battles of Koenigraetz and Sedan!"
- We stated that a special excavation had been made at Pompeii, in honor o the King and Queen of Denmark, and other royal and illustrious persons then staying in Naples. We learn that it was one of the most successful excavations almost ever remembared; the room to which the attention of the company was drawn being a dining-room, with the dishes and service of the table found intactus they had been left at the epoch of the destruction of the city, and a skeleton, moreover, who was taking his daily meal at the hour of the dire calamity.
- The Empress of Russia is suffering from gort and dropsy of the heart. The Empress of Austria is consumptive. The Empress of Germany is rheumatic. The Queen of Denmark is deaf. The Queen of Holland is subject to frequent fits of hysteria. The Queen of Portugal is a confirmed invalid. The Queen of Spain is the only crowned lady on the European Continent who enjoys good health.
- M. Fournier, the French Minister, arrived in Rome by the same train that brought the Prince of Wales. He was also met by the members of the French Legation. He is reported to have said in reference to his long delay, "Crest honteux; mais cen'est pas ma faute."
- Rio Janeiro advices of April 2d announce the arrival of the Emperor and Empress, and the Duke Saxe, on the morning of the 31st March, amid the general rejoicing of the populace. The city was decorated and brilliantly illuminated for several nights succeeding the arrival.
- The King of Siam, who recently visited the Viceroy of India, is a very small, placid-looking mun who dresses in European fashion, with knee-breeches and stockings, and lives like a European in all respects. He has a lot of wives.
- Only four ladies of France have ever received the decoration of the Legion of Honor. They are Lady Pigott, "decorated." for her devotion during the war; Mdlle. Bertha Rocher, of Havre; and Seur Victoire.
- The ex-King of Araucania (Chilian Patagonia), advertises for a partner amongst the "women and daughters of France," by way of an Ovidian epistle published in his own journal, the Steel Crown.
- Prince Azim Jah (Madras Presidency), who is an old man of between seventy and eighty, was only a short time since wedded to his forty-second wife, a young girl of sixteen.
- Mazzini's large fortune will be inherited by his grandniece, a young lady of considerable literary ability, and at present art critic of a daily paper at Turin.

### Extract from our London Letter.

London, April 6, 1872.—The much taiked of Conservative demonstration in Lancashire proved superior to the depressing influences of bad weather. The political event stands first. It has peculiar significance, and is altogether an important revelution of opinion on the Government of the day of a kind stogether an important revelution of opinion on the Government of the day of a kind stogether an important revelution of opinion on the Government of the day of a kind stogether and obtainable except at a general election. If there has been any doubted the feeling of the country in regard to the Government it must be removed by the reception of Mr. Disraeli in Lancaster; not but that an ovation of a certain kind would be awarded to the right hon, gentleman's political opponent in almost any part of the country if the were similarly to court it. At Manchester the public welcome to Mr. Disraeli was, however, so unbounding, the ceremony of presenting addresses so unique and hearty, and the great assembly of thirty thousand so unanimons, that it is impossible to misinterpret the meaning. Mr. Disraeli standing on the platform of the great fron Trade Hall, and speaking for three hours and a half to a crowded, sympathetic, and entinsistic audience, is certainly so far the political event of the year. Passing from the Sovereign to both Houses of Parliaralent, from the Statesto the Church, thence to social problems the agricultary the Government of the day in reation to Ireland, the army, and foreign affairs. The effort was massive: the range of subject one that no other man but Mr. Disraeli's happy sentences, not the least effective of which, though severe upon his opponents, was that which portrayed Mr. Gladstone as "their eminent chief, a'ternating between a menace and a sight," and the occupants of the Treasury bench as forming "a range of exhausted volcannos." "Nota affame flickers," beaut on the significance. There have been conjectures about the allogrance of the head of the house of Stanley to the Conservative party.

## The Committee of One Hundred.

The Committee of One Hundred must be composed of exceedingly anniable genetiemen. They are purely ornamental. This is their history and their attitude: The cat will very shortly make its appearance from this meal-tub, or we are much mistaken. Two committees of seven each, known as the Sacramento Committee and the Bridge Committee, consider the rational question and recommend certain concessions to the Central Pacific Railroad. Gov. Stanford is widing to accept them, the committee was composed of our best people. As soon as they have reported, a self-constituted Committee of Seven, with Squire P. Dowey at the head and Alfred Wheeler at the tail, the Alfa as the organ determine to cal one hundred gentlemen to consider the situation. The best men in San Francisco are for the most part selected, gentlemen having the entire confidence of the community. They are notified to meet at the Merchant's Exchange, and do so; and now mark the transparent farce; Mr. Squire P. Dowey calls the meeting to order and state its object; all right. Then he should have taken his hat and left the One Hundred to organization for the One Hundred, himself Secretary. A cut-and-dried series of resolutions are read by Mr. John T. Dowle. Speeches follow from insiders—not passionate anti-Stanford, anti-Goat Island speeches. Not only that, but Mr. Robinson is introduced, the agent of the Atlantic and Pacific Rair road, with figures and statistics prepared for his road. Then the Committee of Seven appoint an Executive Committee of twenty-four out of the hundred. Then the hundred gentiemen are dismissed with no provision for their being again called together. Their officers, their resolutions and their Executive Committee have determined upon a plan of action, which they have given to the newspapers without submitting any report to the One Hundred. If this were politices, we should say it was a very transparent and well put-up job. There are some good men on the Executive Committee. We befieve they are in a majority, and we hope that any scheme th

# Wayside Gushings.

BY MRS. HARRIS.

DEAR MAIL BAG: I'll write you a headytorial leader 'Bout the British Benevolent Picnic to Alameda, Vich the day were that 'ot I were dressed werry light In a bumbyzeen gownd, and "don't lace me too tight," Says I to young Sayrah, "for fear of flustration In my in'ards as is touchy, likeways prespirashun." I thought as they'd take that young crittur 'alf price As is hignorant of the world and hinnocent of wice, And I hargued the matter but found it no use But was forced to put up vith houtrageous habuse.

"She is fully deweloped," says they. "That 'er statur' Is fine," I replied, "I hadmit for that matter, But I've took 'er 'alf price ven a hinfant in arms, And am I to pay hextra for hadditional charms
As dewelops vith time ven 'er structur' is the same
As yen sent me in a bandbox as did give 'er a name And fed 'er vith a bottle vich caused stimilation Of 'er nat'ral purpensities, likeways 'er heddication 'Ave made 'er look holder, but just look at 'er mind, 'Tis as pure as a hangel and hinfant combined 'Er weight is a feather; you could put a weddin' ring Round 'er vaist 'tis so small, the poor hinnocent thing !" But men 'as no feelins', especially British, And Sayrah that mornin' be'aved rather skittish, Though I'd told 'er to put on 'er Sunday School look Till the hordeal was passed and the tickets was took.
This misfortun' weren't all—we got on the wrong train,
And the conductor made me pay hover again,
And 'ad it not bin for a bottle of Scotch ale, As proved a counter hirritant, I might 'ave turned pale At so many disasters ven come out for a treat. 'Owsomdever, I called the conductor a 'beat,'' Vich made 'im swear hawful, and it might 'ave bin wuss But for an 'igh hairistocrat who, 'earin' 'im cuss, Says: "Speak civil, you wagabones, to my friend Mrs. 'Arris," Vich 'ad met me before at the Exhibition in Paris, And I never 'ad seen 'im again till that day, As 'ad known all his fam'ly in Ratcliffe 'Ighway, The Committee they asked me to run for a prize,
And says Sayrah "You're sure to vin, Missus, if you tries,"
So I asked vot it vos. Says they, "Three legged race,
And the prize "conserlashun," so I 'urried to the place
For, thinks I, surely 'tis a big 'amper of wine
Or leastways bottled beer and oh! vould it were mine!
But the judges purwented my tryin' to vin it,
'Cos they said as my large work not thick to be in it 'Cos they said as my legs were too thick to be in it, Cos they said as my legs were too thick to be in it, But, says they, "you may try for the wild flower collection If you're found to 'ave no wegetables about you on hinspection, But vun of 'em says, "Vy, er nose is a turnip, And 'er 'air it is carrots," so they vouldn't let me earn it. Sayrah asked if she might run for the "kid satchel" prize, But I would not convent to the continues to the cont Sayrah asked if she might run for the "kid satchel" pl But I vould not consent to give continence to wice, For, says I, "Ven a poor gal is 'ampered vith a kid She should send it to the vorkouse, and not keep it 'id In satchels and sichlike," but the hinnocent crater Were fort int in vinni" a big perambulator. In the Fat Voman's race I put forth all my wigor, And I 'eard many parties hadmirin' my figger, But ven it was hover the judges agreed. I were fust in proporshuns but second in speed, 'Owsomdever, I von in the Grass Vidders' race, For, says they, "As a vidder she's fastest in pace." Sayrah tried to vin a bundle of hoperratic hairs

But 'er speed vos much 'indered by the 'oop that she years. I much vished she 'ad von me a gem of a pianner, As numbers was give away and my woice is sopranner. As induced was give away and my whole is sopramile. I danced many times with Sekkertary M'Curric, An 'orrid bad dancer as did keep me in a flurry, Through gettin' out of step, and 'is talk were that wapid I told 'im if he couldn't waltze a trifle more rapid I'd 'ave to sit down, and he said but for bunions He'd a werry light foot, vich 'is breath smelt of o'nions, I were glad to get rid of 'im soon arter that waltze, As is an 'orrid old monster, vich 'is vig it is false. My next pardner were a youth vith a faded neckan'kercher, Who said as 'is fam'll was 'ibh neople in Lancashire.

Who said as 'is fam'ly was 'igh people in Lancashire,

But 'is dancin' conwinced me 'e'd bin used to 'ard work At treadmils or factories, 'tih an 'op and a jerk He vhirled me round that andden I 'ad to 'ave gin To cool me, sich condensed prespirashun was I in. I think as 'is askin' me to dance were a trick To throw dust in my eyes as is wonderful quick At smellin' a mice, for I b'lleve it was 'is pal! As took the hoppertoonity to run avay vith Sal. Arter drinkin' gin and vater I continued to dance, But a dizziness come hover me and I fell in a trance, Vith my nose on 'is shoulder a-snorin' that loud They was forced to give me brandy, and I 'ollered to the crowd "Vhere is Sayrah, my maid! 'Ave anybody seen 'er As is elim round the vaist, and is dressed in meriner!" The poor gal was a missin' and we 'unted the woods, And I give a perliceman a hinwoice of 'er dry goods. "On, Sayrah! you're vanted!" vos borne on the breeze, And the man 'gers all 'nnted each corner and nook And I 'iccapped vith 'isteries and cried' "I'm forsook By the 'itzzy' as was seen vith a young man from Surrey, By the vaiter of the 'otel, and they seemed in a 'arry. But searchin' proved wain and I bust into tears. And, says I, "She'll be rooined as I've brought up for years And whoever return's 'er," I added vith a cuss. "Shall be well rewarded," and I showed 'em my pues. "Mrs.' Arris,' says they, "you' ad better le down And compoge your own feelins' till Sayrah is foun,'" And findin' a table as was used for lager beer, They laid me upon it, and says they "you stay 'ere Till ve bring you the gal as vili no doubt come back Unless the young man an ave took 'er off in an 'ack." So I vaited in hanguish till the werry last train, Ven I left never 'opin' to see' er again.
But at two in the mornin' purcise by the clock I vos woke out of sleep by a werry loud knock; It were Sayrah and the young man as henticed 'er avay And 'ad give' er a hoyster supper and took' er to the play.

The Boston Globe has the following keen bit of satire: "We see that a billis before the Legislature to forbid members of any city government or its officers being pecunarily interested in furnishing materials for the use of the city. Now, what enemy to the joys of office could have been guilty of so small a piece of business? After a man has spent his money and worked night and day to get into the common council in order that he may thrust his hand into the public coffers, is he to be thwarted by process of law? We shall next have enactments to prevent to be the tharted by process of law? We shall next have enactments to prevent favoritism, and taking fees for advocating doubtful measures will be made crimmal. Members of school committe will be interfered with in their inadicable right to appoint friends to situations in our public schools regardless of capacity; and they will not be permitted to in roduce text books published by concerns that have given them a per centage for their influence. Our law makers will be made law breakers for daring to listen to the anriferous music of the lobbyist. This is all very wrong, and if it he permitted to go on, there is no knowing where it may stop. Not furnish materials for the use of the city? Shall a counclinant in the paper interest he prevated selling his wares to the government at double their market price, because he holds office? Shall a member who has a coal yard be forced to resign the happy privilege of selling eight tons of coal for ten faccause he fills a place of public trust? Perish the thought? At this rate office will not be worth the holding, and we shall have a pladding, thresome, honest set of virtuous people holding the reins, instead of enterprising, public-spirited and typical men of the day."

— The imbeeile Alfa is tottering with the blind staggers of stupidity. This driveling idiot of legrous iterature, this unsavory sewer for Bohemians, flounders and wallows in the sink of mental twaddle as a pig revels in the slums of a hot Summer day. Like a toothless dog it growls and barks, but its bite is harmless, save and except the unclean slime of its maw. Why this Leviathan should continue to spew forth paroxysms of basis, billingsgate and bummerisms, can only be accounted for on the axiom that "out of the abundance of the heart the month speaketh." And from such a mouth good Lord deliver ourselves and our humble servant, the And from such a mouth good Lord deliver ourselves and our humble servant, the public.

A Washington special says Secretary Fish is willing to withdraw the claim for indirect damages if England will agree that it shall be a recognized principle of international law. Sir Edward Thornton approves this basis of compromise, but the assent of the President is yet doubtful.

### New Books from Bancroft's.

THE LAND OF DESOLATION, by Dr. Isaac I. Hayes. Published by Harper & Bros., New York.

This very agreeably written work is a personal narrative of adventure and obser-This very agreeably written work is a personal narrative of adventure and observation in Greenland during the summer of 1869. The author, who had already visited the arctic regions with the celebrated explorer Dr. Kane, accompanied Mr. William Bradford, the artist, in his steam yacht Panther. They sailed leisurely along the coast, halting at all points of interest. They visited the ruins of the ancient settlements of "Eric the Red;" they hanted polar bears and fur seals, shot eider ducks and lumme; danced all night with pretty native girls in red and yellow beots, sliver seal skin trowsers, and jaunty jacket; ascended the highest mountains, crossed the most dangerous glaciers, and had all sorts of escapes from jeebergs. They followed the Greenland coast for more than a thousand miles, passed the land outpost of civilization on the globe, and reached the much-dreaded ice pack of Melville Bay.

THE AMERICAN BARON, by James de Mille, author of "The Cryptogram." Pub-

lished by Harper & Brothers, New York.

Like all of the works of this auther, "The American Baron" abounds in incl. dent, is full of sparkling conversations, and is quite a good guide book to some parts of Europe. It is published in Messrs. Harper & Brother's best style, and is finely illustrated.

AROUND THE WORLD: Sketches of Travel, by E. D. G. Prime, D. D. Published by Harper & Bros., New York.

This venerable gentleman made up his mind to go around the world in just so many days, and he did it; he calculated to a nicety the very hour and minute at which he would arrive at a city, and he got there on time. He saw the saints at Salt Lake on time; the seals at the Cliff House on time; gazed on Yosemite, from Sait Lake on time; the seals at the Clin House on time; gazed on roscume, from Inspiration Point, with religious awe, on time; sailed in the Japan, for Yokohama, on time—and by-the-way he rather sits down on the Pacific Mail Steamship Co., because he was not allowed to preach on Sunday, against their rules. He does up China and India and Egypt and Syria like the genuine old Yankee that he is; everything and everybody that he sees being a fresh cause for a gush—a slop over of Fourth of July enthusiasm on the "finest country in the world, sir." Now he comes home and writes us out 455 pages of guide book talk, and inveigles his unhappy countrymen into purchasing by the gorgeous binding, tinted paper, and profuse illustrations of the same.

### Sutro Tunnel.

Relative to the progress of this great undertaking, we give the following articles from the Virginia Evening Chronicle of April 12th and 13th respectively

"Joseph Aron, Vice President of the Sutro Tunnel Company, David J. Seligman "Joseph Aron, Vice President of the Sutro Tunuel Company, David J. Selignan and Edward Hooper, Trustees, and Melville Atwood, one of the ablest mining engineers of the age, arrived this morning from San Francisco, and at noon proceeded, in company with Superintendent J. B. Bethel, to the Sutro Tunnel, to make examination of the progress of that great enterprise. We are glad to learn that the work all along the line is progressing favorably, and that the working force is being increased from time to time as fast as circumstances will permit."

"The Sutro Tunnel was in (this morning) 2,830 feet, the formation in the face being very hard. Shaft No. 1 is down 152 feet, with wet and good working ground, No. 2 has attained a depth of 344 feet, with some water, and the ground works well. No. 3 is down 190 feet, in soft ground; struck water this week. No. 4 is very wet, at a depth of 180 feet, and the ground works well. No. 3 becoming too soft for ad-Aron, and engined responsible works well. No. 3 becoming too soit for advantageous work with the diamond drill, the drill will be started on No. 4 to-morrow afternoon. Messrs. Seligman and Hooper, Trustees, Vice-President Joseph Aron, and engineer Atwood, will visit shaft No. 4 to-morrow to witness the working of the diamond drill. These officers are well pleased with the progress and prospects of the tunnel."

We have had some conversation with Engineer Atwood, who expresses himself much pleased with the progress made in the Tunnel and different shafts commenced in that work. The ground is much more favorable than he had anticipated, and the prospects of their early cutting some rich veins amounts almost to a certainty.

- At Littleton, N. Z., a game of cricket was recently played between eleven Maories and eleven Englishmen, resulting in the victory of the natives over the settlers; the latter scoring 87 in two innings, while the Maories scored 97.

## The Mistery of Hollow-Ash.

You want to know about the smash That happened down to Holler-Ash? Wal! If anyloidy knows, He wears about my stile of clothes. "Twas Deacon Humper's funeral, And all was goin' well When them there Templars, up in town, On an excursion train cum down. I driv the mourners, and "Jo Fresh" He went ahead of the procesh, And as we neared the railroad track, We seed that train a comin' back.

Jo turned around and winked at me, And from his vest he drew a V.
"I'll bet you those, that this ere hearse Crosses ahead of that excurs." The mourners they sot up a yell, And then was missin' for a spell; It was amazin' how that crowd Cavorted upwards in a cloud.
We piled them victims on the sward, About three-quarters of a cord. On top we put the deacon's meat, But where Jo went, we all was beat.

We sarched the ruins of that train But all our sarchin' was in vain, And to this day it does heat me, Where the piece went that held that V.

- The Town Crier has a theory in reference to the origin of man, which he proposes to ventilate in opposition to that of Darwin, who brings us along down the dim highway of life from the monkey with prehen-lie tail to the man with his long fingers of dextrons manipulation to eatch and hold things coming within his The theory of Darwin has much to commend it to our comprehension and belief; nor is the baboon and ourang-outang and the gor: ha so widely different from the present species of man as many would have us to think. The habits of the two animals (man and monkey) are not essentially unlike. The disposition of the monkey to run wild in the woods, to avoid school, to play hookey, to tear leaves out of books, to imitate his elders, to experiment in smoking and chewing tobacco, to worry the cat and play with fire, is very like the animal boy. His fondness for trees and nots and truit is not unake, and the stool boy exhibits a nervey equal againty in climbra; trees and fences. The monkey steals for two motives: for his belly and for mischief. The hoodlum does the same thing. As the monkey advances in years he becomes grave and sedate; so does man, some monkeys advances in years he becomes grave and sedate; so does man, some monkeys are wicked and bite; some men grow sour and ugly. Some monkeys need the chain; some men need the State Prison to carb their propensities. Some of the monkey specie get amiable as they grow old, like the *Fouru Crier*, and only grin and chatter out their lives, thankful if the looker-on throws them nuts and confection in re-But there is another long-tailed animal from which doubtless a portion of mankind has sprung-an animal domestic among us, interesting in its habits; an mankind has sprung—an animal domestic among us, interesting in its habits: an animal preferring to live in houses, omniverous, mysterious, product, migratory, brave in battle, irresistable in its rage, cannibal in the hunger. We refer to the rat. Cut off the rat's tail, change his fore paws into hands, stand him on his feet, teve him six feet of statue, expand his chest, clothe him in fashiomable garments, put a hat upon his head, teach him to talk, and you have a man. Now bet the rat drink whisky (when he is treated), smoke (when he is asked), give him a pen to write (what he is paid for), dwarf him in statute to four feet six, give him a shocking had hat, a greasy cont, let him retain all his varity, conceit, impadance, ingratitude, dishoners, via his mean and rat-like proposities, and although you have not onlike proposities, and although you have not onlike proposities. nat, a greasy cout for him retain an instrumey, concert, impassince, ingrantume, dishonesty, all his mean and rat-like propensities, and although you have not quite a man, you have the Bohemian rat, who thinks the Torne tries has lost his wit. Take another instance; give the developed rat a long-starded black coat, a wite choker, a bombazine waistcoat, a broad-brimmed hat, let him draw his face up at the eyebrows and down at the chin, and you have a preacher. Put him in the pul-pit with a congregation of cats eating stolen cream, and the divine becomes elo-quent in the demunication of sins he cannot enjoy. Let him take the vows of cell-acy (not chastity) and take snuff, and you have a priest. Take off his shoes and acy (not crassity) and take smill, and you have a priest. Take off its shoes and put a rope around his waist, and you have a monk. Clothe him differently, let him retain his side whiskers, part his hair in the middle, put a hot potato in his mouth, and behold an Engishman. Teach him to chew to bacco, stand on the curbstone with a crooked-handled cain, and be, a politician. Let these rats get hungry and go to eating each other up, then you have havers or brokers. With petricoats and crinoline is a female with furtive eye coquetting with every passer-by. Get a little considerant traction around a man of milk and a bit of teached. social crowd together around a pan of milk and a bit of toasted choose, and a lunch party with all its gossip and tattle is before you. Perhaps, after all, the origin of specie is not confined to either monkeys or rats. The doctrine of Zoroasten to the control of the control be true, and souls may transmigrate from the animal to the human form. for a moment doubt that the editors of the Alta California in some other sphere were asses! Not that their ease illustrates the doctrine of Metempsichosis, as the editors of the Alta are asses still.

Treasure shipments overland for the week ending April 24th reached \$198,355-51, all in silver bars. The steamer America, from Yokohama, brought \$2,083,200 in disused Japanese gold coin, sent here to be refined and recoined a pieces of the new denomination recently ordered by that Government. It was the first installment of \$22,000,000 to be treated in the same manner.

## Goat Island Again.

Grandmother Alia appears to have gone clean datt on the subject of the possible cession of Goat Island to the Central Pacific Railroad. Her daily paroxysms exhibit a degree of fatuity pitable in the extreme, and which, if not speedily relieved, must render it necessary that her ravings should be checked by the issue of the writ of Lunatico Enquirendo. What with the threats of another Vigilance Comwrit of Lundico Enquirendo. What with the threats of another Vigilaire Committee, and the recent vehement, pointless invectives of that fool-bappy sheet, one would suppose that our beautiful city had, indeed, fullen on evil times and been bound hand and foot, ready to be delivered over to the tender embraces of the gorgons, Starford and Company. The impotent rage and crack-brained editorials which have lately appeared in the Alla have, in fact, contributed in a great degree to the success of a measure the innocent old dame was most anxious to defeat, and it is a pity that her vein should have been followed by several other journals, of whom better things were to be expected—seeing they had not the cue of their fugle-man. For, did not the Alla assist in inaugurating the "reign of terror" which, in 1856, tarnished the fair fame of our city in the eyes of the civilized world? does it not owe its present existence to the violence of a mob who destroyed the Daily Herald, transferring the valuable fruits springing from the auction advertisements, to its own columns, and which were midely forn from a fearless defended of law and order? "Is it not ime that our conciliatory policy should be abandoned?" shrieks the rabble-wooding Alla of Wednesday last.

Let us for a moment take a view of both sides of this Goat Island bug-bear, brushing away the smoke and rubbish with which it has been invested. The friends of the railroad allege that the business men of San Francisco have done nothing to advance the commercial prosperity of the city in the way of providing adequate warehouses to receive the millions of tons of grain and other products which should find a place within its limits, its over-grown moneyed fellows being content to lend their plethoric gains on mortgage securities at the most ruinous rates of interest; the tendency of which has been to drive from our midst the most energetic and industrious class of our people. And they add: that Goat Island, of therefecte and understons class of our people. And arey add, that Goat Issand, of itself, has no commercial value except for railroad purposes, and that its occupation would farnish better accommodations for the commerce of the State and city than it now possesses. That the navigation of the Bay would in no manner be interrupted in consequence of such an occupation of the island; that the accommodations at the present time for railroad uses within this city are of limited extent, and these hampered with many restrictions; that the grain crop of the present year will reach one million two hundred thousand tons over and above the quantity needed for our own consumption; being equal to four thousand tons per day for three hundred days. That a great portion of this must go into storehouses somewhere, and these do not exist in this city, where there ought to be not less than one hundred warehouses, each with a capacity of from 7,000 to 8,000 tons, to receive this variant deposit for the present season alone; and that if these warehouses were built built being the contract of the present season alone; and that if the warehouses were built bui they would fill a street nearly a mile in length.

In a well-written article, which lately appeared in the News Letter, from the pen of Mr. Curtis, that gentleman says:

"Should the United States Government allow the railroad the use of this island, the work of leveling and filling in the shoals around it would be immediately commenced. Some idea of such an undertaking can be formed from the statement that 20,000,000 cubic yards of rock and sand and other material would have to be removed before this island would become of any value as a railroad terminus. For years to come, it must literally swarm with busy life, requiring a vast outlay of capital, if this spot is to be made a place of commercial importance. What practical difference does it make to San Francisco whether a certain number of men are employed in building docks, wharves and warehouses, or in handling freight at Goat Island or Mission Bay? It will take as many men to do the business in one place as in another, and will, consequently, give employment to as many. The island is a part of and inside the county lines of San Francisco. Its improvement will add so much more to her taxable property. It is nearer to the present heart of the city than the Mission or South San Francisco. Whatever im-Whatever im-

proves any part of that city, improves and makes valuable, relatively, the whole,"
Now, if the foregoing be facts—and to us they seem to be so—the raw-head-andbloody-bones aspect of the Goat will disappear, and the wintry visage of Stanford
become at once aglow with all the warmth of Summer. Mr. Stanford says that the

become at once aglow with all the warmth of Summer. Mr. Stanford says that the interests of his road and those of the city are identical, and inseparably interwoven. And then, too, should the Congress cede the use of the island to the railroad, let us inquire what results would be likely to follow. The grading of the high land and filling up of vast tracts of the contiguous shores would necessarily require the employment of thousands of our own "abburing people, who, but for this, would probably remain unemployed—thus furnishing a busy bee-hive in our midst, and probing, perhaps, a real blessing in disguise.

Rejecting all the twatte of the Alla and its echoes, let us at least endeavor to treat this subject with the gravity it merits. That the Congress will make the cession, seems now to be a foregone conclusion; a proceeding in which, judging from the action of our last Legislature and that of the Convention held only the day before vesterday in Sacramento, it will be likely to find a instification.

fore yesterday in Sacramento, it will be likely to find a justification.

But where shall the ribald Alla find an apologist for its scaly and ungrateful behavior toward its new Senator and whilom friend, Mr. Sargent, whom erst it extolled to the skies, pranked out and aided to the extent of its scant ability, to place in his present exalted position?

### " Biz."

The noteworthy items of the week are the arrivals of steamships from Australian ports, from Panama and Central American ports. The Nebraska, of Webbs Line, came through from Ankland, New Zeahad, and way ports, stopping eight days and twelve hours at Honolulu, and then finding that the Mohenqo did not arrive, Wm. H. Webb discharged her return Australian cargo, reloaded her cargo of 1,688 bales wool, and then sailed for this port, making a quick run from the Islands. The mulls and passengers had quick dispatch overland. The Vebraska returns to the Colonics this day, xia Honolula, with the London mails. The China, not the Alaska use the Bulletin, Allu and Chronicle all Bay), arrived on the evening of the 24th from Panama and way ports. Her passage by the stopped at nine way ports for cargo, and yet, after all did not bring up half the coffee and sugar expected from Central American ports. Honolulu, was twenty-two days on the voyage ap, bringing 2,800 kegs sugar, etc. The Light of the Age, from Peru, brought 8,730 bags sugar for the California Re-The Light of the Age, from Perli, brought 8,730 bags sugar for the Cantornia Refinery. The Linkin Empire, from Marseilles, had a valuable cargo of French goods, well assorted. The Corsion, from New Castle, brought 1,700 tons Sydney coal, and the Edwood Cooper 875 tons same. Besides this the week's receipts of coal from Coop Bay aggregate 2,500 tons, which sold at \$11 from ships' side. The Corsica's cargo of coal is held at \$13.

The excitement in Mining Shares continues with unabated furor. "Everybody buys em." All getting rich unon rising tide. Some say that daht million of buys em. All gelfting rich upon rising tide. Some say that sight millione of British gold is doing the work for as. He it so, we hope all will escape impending rinh. It is not possible for prices to keep up long at these figures. The Commercial Hearth, in alluding to this subject, remarks: "Money is plentiful, and this fact lends enchantment to speculation in mining shares. The stock mania is great, and is diverting capital from business marts to that of the street. It is true that for years past we have been, as a people, exploring and developing mines of the pre-cious metals at great expense and outlay of capital and energy, with comparatively small returns for the money actually invested; but now it seems as though we had actually found the mother vein of silver upon the Comstock ledge, and this discovery seems to have caused the wildest excitement at the Stock Board, and which has attracted outsiders to participate to an alarming extent. How long the excitement can be kept up it is impossible to say. Some of the largest stockholders, desirous can be kept up it is impossible to say. Some of the largest stockholders, desirous of unloading quietly, are now busy increasing the number of shares dividing up, as, for instance, the present number of shares in Crown Point is 12,009—new number, 100,000: Belcher, 10,400, raised to 104,000: Hale & Norcross, 16,000 shares, up to 48,000. This will enable many persons of moderate means to unvest, and thus the risks will be considerably scattered. For months past, prices have in the main been steadily advancing; yet, judging from past experiences, it would be strange,

indeed, if an important reaction does not take place ere long.

The Tariff question is yet unsettled in Washington. Goal Island seems to be the attraction just now. Business suffers because merchants are in doubt as to the removal of duties on Coffee and Teas, or a modification of the same, and for like reasons dealers in Wines, Wool and Tobacco all hestate about operating. These reasons dealers in wines, wood and "robacco an inserted anotholography." Interest is some taik about the new Wheat crop, and a desire manifested to know the future of the market. Contracts can be made for first receipts of choice shipping at \$150 per cental. Present Liverpool quotation, 1286/428 dd. Extra Flour is now called for from New York, Boston and Portland, Maine. Shipments by rail have also gone forward to Saint Josephs, Missouri. Flour cost \$5 50 gold; Freight, \$4

also gone forward to Saint-Josephs, Missouri. Frour cost \$5 or gon; Freight, excurrency \$2\$ bbl rather steep.

The ship David Crockett, for New York, is filling up with flour at one dollar per barrel, freight: she will carry perhaps 20,000 quarter sacks—some say the bulk of 2,000 bbls., Oregon Standard Mills and 2,500 bbls., Oregon Imperial Mills—the latter we know is going: price \$5 50 per bbl. The Panama steamer will carry 200 bbls Oregon Imperial flour packed in gunnies, each \$3 sacks: freight, \$2 50; cost \$6 per bbl., f. o. b., which makes the cost of the flour delivered in New York about \$9 per bbl. The Buckeye Mills at Marysville, are sending 1,000 bbls., extra flour to New England by rail direct, and the proprietors of the Golden Age Mills, not to be shalled above in the rape, have arranged to sond a few hundred barrels of their best behind others in the race, have arranged to send a few hundred barrels of their best fancy silk dressed flour by rail to Boston. This overland trade in flour is altogether unexpected, and promises to be of some moment. The East calling for our X X Flour, fancy brands, and China buying the superfine grades, with Central America demanding extras and Batavia seeking our choicest products, altogether there is a good outlook for our big surplus wheat crop. Best extra flour is worth to day \$6 per bbl; superfine, \$4 50 @ \$5; extra-superfine, \$5 50; best white wheat \$2 @ \$2 (5 per cental

Wool receipts are large and steadily increasing. Thus far in the season we have sont East 1,000 bales less than for a corresponding period of last year. In fact, there is very little business doing; there are plenty of Eastern orders here to buy, and without limits—discretionary power is given—and yet, when a telegram is sent East for advice, the reply comes, "Use your own judgment, but buy cautious;" thus for advice, the reply comes, "Lse your own judgment, but buy cautious; thus throwing the responsibility entirely upon resident agents, anxious to do right, yet really at a loss to know how to act, owing to the great distance which separates them from the scene of action. Advices received in regard to the great London Wool sale are unsatisfactory and conflicting, and yet, after all, the quantity catalogued at the sale was 50,000 bales less than last year's offering. Probably the agitation of the Tariff question at Washington, and the satisfactory condition of the Australian Wools received by New England manufacturers give a check to business in California Wools. It has been remarked by all careful observers of Eastern market reports, that the late advance in Wools at the East shows no improvement in the quotations of California fall or spring clips as compared with other States. And why? Because California Wools are out of condition—dirty, ouner Saices. And why! because California wools are out of condition—dirty, burry, etc.—and the loss by shrinkage, wastage, etc., greater than any other, running up to 60@75 per cent. Here is the secret of the trouble; and if what we hear is half true, the condition of our Spring clip will show no improvement upon the past, and we fear quite the reverse—as the result, in part, of the high terms paid and slack conditions of purchase stipulated before shearing. This is unfortunate

for the reputation of our Wools. The Commercial Herald says: "Prices with us are to some extent nominal. the present state of things, it is almost impossible to give prices that are reliable, the market range being from 35 to 55 cents as extremes. The Nebraska, from New the market range being from 35 to 35 cents as exercises. The New Assa, from New Zealand, brought 1,437 bales for this city, 84 bales for Boston, and 178 bales for New York. Our advices from Melbourne are to the 12th of March. The total clip for the season was 25,000 bales less than last year; 20,000 bales balped to the United States—thus giving a total failing off in shipments to England of 45,000 bales. A States—thus giving a total falling off in shipments to England of 45,000 baies. A cargo of 1,950 bales had been purchased in Melbourne, at high rates, for Montreal, Canada, to go forward per Maggie Leslie. The execution of this order at high figures, prevented California orders from being filled within limits. Goldsbrough's Monthly Wool Circular, dated Melbourne, Feb. 29, says: 'The Americans have materially assisted the sales here the present season, and we look forward to an increased trade, more especially if the Tariff should be modified. The purchases for the United States of Wool since October represent a money value of 2330,000. The quotations given for Fleece, average to good, is. 7d.61s. 10d.; superior, 1s. 11d.62s. 2d.; inferior, 1s. 2d.61s. 3d.; ordinary, 1s. 5d.61s. 7d.; middling to good, 1s. 8d.61s. 10d.; superior, 1s. 11d.62s. 2d.''

There is a great and growing scarcity of small vessels suited to the coal and

Inderior, is. 3.4.018. 4d., ordinary, is. 3.4.008. id., induding to good, is. 3.4.018. id., superior, is. 11d.22s. 2d. There is a great and growing scarcity of small vessels suited to the coal and number coast trade. Freights in this line are steadily advancing and business cramped for want of needed supplies. There is more freight offering for New York, both ria Cape Horn and Panama – Flour, Wool, Wine, etc. There continues to be a good demand for ships to load Wheat for the United Kingdom at full rates. For the new crop, £3 is paid for Liverpool direct. In regard to markets, Bags are firm at 17½c, for Standard Burlap; forty-inch Hessians, 14½c, per yard. The San Francisco Cordage Company—Tribbs & Co.—quote Manila Rope, 10,000 h, 18c.; less than 10,000, 19c.; extra lengths, 20c.; New Zealand Flax Rope, to the trade, 12½c; retail, 13½c. Building materials, lumber, etc., are steady in price. We quote Orcgon Pine, \$4166,\$30 for Rough and Dressed; Spruce, \$176,\$18; etc. Wedwood, \$166,\$30 for Rough and Dressed; Spruce, \$176,\$18; etc. \$2, 500,\$2, 75 \$M. The carco of Lumber sent to Melbourne, ox King Philips, Soid at £6 12s 66 \$M. Candles sell at 156,18c, for Adamantines; Patent Wax, 20c.; Patent Sperm, 42c; Paraffine, 27½c. Coal—West Hartley, \$15, Lehigh, \$32, 50, Australian, \$13. Coffee rules from 1½6,19k,6 for Green's; O. G. Java, 236,24c. Chemicals are tending upward, owing to scarcity and high cost at home. Fish are plentiful and cheap. Fruits—Oranges are abundant, Tahitian sclling cheap for cargo lots. At auction, on the 23d instant, S. L. Jones & Co. Sold, by order of the Government, surplus stores on hand, consisting of Cutting & Co. sold, by order of the Government, surplus stores on hand, consisting of Cutting & Co. sold, by order of the Government, surplus stores on hand, consisting of Cutting & Co. sold, by order of are plentful and cheap. Fruits—Oranges are abundant, Tahitian selling cheap for eargo lots. At anction, on the 23d instant, S. L. Jones & Co. sold, by order of the Government, surplus stores on hand, consisting of Cutting & Co. sold, by order of the Government, surplus stores on hand, consisting of Cutting & Co. sold, by order of the Government, surplus stores on hand, consisting of Cutting & Co. sold life packages. The order, style and general condition was superior in every respect. The goods were sold for cash, prior to delivery, the buyer not allowed to examine the goods except as offered and exhibited in the salesroom. They were, therefore, sold "as is," yet the bidding was spirited, and the entire offering closed chiefly to a single house at rates as follows: 1,250 cs fresh Peaches, 2 doz each, 2 b b tins, \$3 95 % doz.; 100 do Corn, 2 b tins, \$2 273; 100 do String Beans, 2 b b tins, \$2 000 do Penss, 2½ b b tins, \$2 000 do Penss, 2½ b tins, 200 do Penss, 2½ b

<sup>-</sup> Two young English noblemen, the Earl of Ranfurly and Viscount Coke (son of the Earl of Leicester, have been for the past week hunting in the Coast Range of mountains, in Monterey county, and after some hard traveling and camping out for several nights, they succeeded in shooting a hunge grizzly bear, weighing nearly one thousand pounds, and bagging several deer. They enjoyed the sport hugely, and pronounced bear steaks delicious when a man is hungry, but very poor when compared with English venison.

#### Under the Waves.

In his cheek my brave love bore roses; Life-warm the grasp of his hand, The warmth that a true heart discloses, And true hearts understand

Still red in his cheek are the roses 'Mid the sea-winds roughly blown; Sti.' my hand in his hand reposes, While the hot tears fall -my own !

How then should I think of my lover, And how of his dear face speak, If not with the smiles dancing over, The roses set in his cheek

So, how should I dream of my lover, Nor dream of his love and truth! And how should my fancy discover A vision of Death in youth?

And yet, fool, oh, fool! my brave lover Is lying the waves below; And their weight sweeps cruelly over The red roses turned to snow ! - Cassell's Magazine.

# Ladies Spring Toilets.

Le Follet the celebrated authority in these matters, thus describes a few of the latest tolicits: Costume of washing satin and monsseline de lane. The under-skird is of a pale grey mouseline de lane, with emerald green strips; between these are scattered small stars and greesse of a darker shade of grey. On this skird tolicits are scattered small stars and greesse of a darker shade of grey. On this skird washing to the same stars are scattered small stars and greesse of a darker shade of grey. On this skird washing to the same stars are scattered small stars and greesse of a darker shade of grey. On this skird washing the same stars are scattered small stars and greesse of a darker shade of grey. On this skird washing the same stars are started as the same started as are scattered simil stars and crossess of a darker shalls of gree. On this skirt are three cross-way bands of the lighter grey, piped with the darker shade, and edged with a pisse of green, the whole executed in washing satin. Of these bands two cross each other in the form of lozenges; the third, a trille narrower, moreouts them. High plain bodice and coart-sleeves of monssedine de lane, fastened by green buttons. Polomaise "Princesse," of the light grey in washing saton. It is open nearly to the waits in front, with revers of the darker shade, edged with a pitse of green; the revers form a square collar at the back. The skirt portion is open from the waits with revers like those on the corsage, the back breadths are en point, with busque cut in point, and a fane-shaped oritanient of the derker grey, edged with green, is placed to hide the join of the skert to the bodies. Large hanging sleeves, with revers. Grey strew monsquetairs hat with drooping feather and bunch of shaded green leaves. Faile dress of pele green, with long trained skirt; on this is a broad diomac of with a musting only slightly fulled, the lower edge is cut in wide wandskee, edged with a musting meriting, in which is run a green skirt; on this is a broad donnee of white massine, only slightly fulled, the lower edge is cut in wide vandkee, edge-of with a musim-insertion, in which is ruin a green ribbon, beneath this fulls a three-such Va-enciennes. As a bearing, a similar insertion edged with lace, from which fall pointed pattes of insertion trumed around with narrower lace; these hang on the homee. Low round bodice and short sleeves of green faille. Long tunic of white musim, open to the waist at the front, trimmed round with the wider Valenciennes, headed by uncertion over green and similar pattes to those on the flource; these are placed above the insertion, and point upwards. The back of the funic is very long, and raised high at the sides. The muslin corsage is open square, and trimmed with insertion and pattes pointing from the opening. Ceinfare basque of insertion over ribbon, plan round the waist; from this falls a wide lace and pattes of insertion and lace, increasing in length towards the back. The sleeves are hong longers to the eibow, the patting in length towards the back. The sleeves are hone onness to the chow, the puttings, three in each number, being separated by insertions over ribben, they are finished by a frill formed of the patter-surrounded with the wide loc, and fastend together.

Small white marabout feather and a spray of fern leaves in the hair.

Yisting dress of grey point de soic, with deep hounce put on in large plaits while apart; between these are long points of claret satn, reaching nearly to the edge of the flounce, and trimmed round with narrow lace—a doubt pasting of grey. Along the center is a band of claret satn, caught in loose putilizes. Above his double platting are smaller points of care's saint, staged with lace; these should be three inches wide and the same hight, and afternate with the lower points the latter, are three and a half by six. The space between the upper points is occupied. latter, are three and a halt by six. The space between the upper points is occupied by plasses of grey silk in the form of a horse-shoe, the center bein; occupied by a round pull of claret satin. Grey poult de-soie tune, forming round tabuer in front, and two deep points behind, trimmed to correspond, on a smaller-scale. Mousquetaire jacket of the same, open to the waist, and trimmed to match over a claret satin waistcoat. Loose sleeves, with similar trimming. Our hading elegants having discarded the very long chignon for a shorter coffine arranged higher on the head. The milliners are introducing a new form of bounct, of which we shad be to speak more decided, next month. For evening went long curis falling on the shoulders, or chignons composed entirely of graduated curls drooping on the shoulders, are still most eleganty worn, and very becoming with low dresses. It is only the platted or crépé chizon, hanging very low on the back, that is no longer considered bon genre. The Prince and Princess of Wales and suite are lively longer (onsidered only gettre. The ring rest in the same shade and a reason ing at the Hotel des Hes Britannies, in the Pizzza del Popolo, Rome. The Princess at divine service was dressed in a dark violet merino costume, trimmed with veixed of the same chark who can be same shade with a sea-blue reather, and it was remarked that no huge projection of false hair and padding concealed the back of her neck. In the language of a century or so ago, the Princess "wore her own hair."

### Cost of English and American Governments.

Mr. Disraeli, at the great meeting at Manchester on the 3d instant, thus compares the cost of Government of the United States and that of Great Britain; "There is no analogy between the portion of our Sovereign, Queen Victoria, and that of the President of the United States. The President of the United States is not the Sovereign of the United States. (Hear, hear.) There is a very near analogy between the position of the President of the United States and that of the Prime Minister of England, and both are paid at much the same rate the income of a second-class professional man. (Hear, hear.) The Sovereign of the United States is the people; and I will now show you what the sovereignt of the United States costs. Gentlemen, you are aware of the Constitution of the United States costs. Gentlemen, you are aware of the Constitution of the United States costs, Gentlemen, you are aware of the Constitution of the United States costs, there is a Confederation of States to conduct their external affixire, which consists of the House of Representatives and Senate. There are two hundred and eighty-five members of the House of Representatives, and there are severenty-four members of the Bonse of Representatives, and there are seven the cost of Congress. Now each member of Congress receives \$1,000 stelling per annum. In addition to this he receives an allowance called "mileage," which yaries according to the distance which he travels, but the aggregate cost of which yaries according to the distance which he travels, but the aggregate cost of which is about \$30,000 sterling per annum. That makes £384,000, almost the exact amount of our Civil List. (Cheers.) But this, gentlemen, will allow you to make only a very imperfect estimate of the cost of Sovereignty in the United States. Every member of every Legislature in the thirty-seven States is also paid. (Hear, hear.) There are, I believe, 5,010 members of the States Legislatures who receive

# English Immigrants for the United States.

The Anglos, Imerican Times (London), a journal of great influence and ability, has a timely article on the question of points in the United States best suited for English imagerants. The article headed "A Disappointed Settler," is called forth by deleter from "Brother Bush," a house painter and glazier, who has been deterred from imageranting to America, owing to the letter of one Edward Henry Stoner, published in Lloyd's Newspaper. Mr. Storer, writing from Nebreska, among other things says: "If any man has plenty of money, nerves of steel, a constitution warranted to stand all climates, and last, but not least, "an indua robber conscience," he may do very well out here. Any one not possessing these qualities had better stay away." "Brother Bush," as the representative of thousands of mechanics in England who desire immigrating to the United States, wishes the editor to reconcile the above statements with the lavorable and flattering views states forth in the American Settler, a journal published at the office of the American Times. The editor fully does away with the statements of Mr. Edward Henry Storer, by stating that pioneers and immigrants to the Far West need not expect to sleep on beds of down or lell about in magnificent parks, but that by steady labor, industry and economy, they can in a few years become owners of the soil, and make themselves and families independent. We ourselves know that the climate of Nebraska is trying, the Winters are long and bleak, wifthe Europea are as prosperous, independent, we contented as any pince on the globe. But if English immigrants desire a congenial climate, let them come to check of the prople are as prosperous, independent and contented as any pince on the globe. But if English immigrants desire a congenial climate, let them come to check the prople are as prosperous, independent and contented as any pince on the globe. But if English immigrants desire a congenial climate, let them come to check the prople are as prosperous, independent and contented as any pinc

# A New Moral Song.

'Tis the voice of the business man!—hear him complain:
"Why didn't you call me? I shall miss the fast train!"
At the very last moment he turns from his bed,
All feverish and flurried, with oft aching head.

With too little sleep, often only short slumber, He injures his health, and runs risks without number; And when he gets up, breaks his fast as he stands, And tears off at once to meet business demands.

I passed him but lately. His eye seemed on fire, His brow's become furrowed both broader and higher. His money still wastes to preserve the last rag Of flesh that hangs on him—of bones but a bag.

I paid him a visit. It grieved me to find The wreck of his body was shared by his mind. He told me, with tears, constant working and thinking Were needed to keep him from socially sinking.

Said I then to myself, "Here's a moral for me: My friend's but a picture of what I might be: But, thanks to the care bestowed on my breeding, This lesson I've learnt—my health Finer to be heeding."

The Pacific Methodist is the most interesting of all our religions exchanges. It contains in its last sene "a beautifu" incident, of an old buffer, who, having driveled along to the idioxy of eighty-six years, and who had been stuffed so full of the nonsense of the Hallehugh Coy style of Methodism that he funcied his daughter was his grandmother, and caling her to his bed-sade, he said the stupol article child's doggerel of "Now I lay me down to sleep," and then the reverend mule dwine who religions to the hallehugh Coy style of Methodism generally. God must be very busy just now attending to more important things. The universe is getting out of order: too many comet. Hyriz about a meteors are rather frequent; the earth is getting staky; the mining exectment and tout Island; the wheat crop, are all absorbang questions inst at present. Busides, we are a little doubtful about the efficacy of prayer. We believe un miracles, forcerofination, total departity, infant damnation, failing from grace, predestination, vicarious salvation, and several orther dogmas of Methodism, but about prayer we are not quite certain. Cox prayed for the election of General Grant and his prayer was answered. What do the Southern Methodists, but about prayer we are not quite certain. Cox prayed for the election of General Grant and his prayer was answered. What do the Southern Methodists, but not little time to the control of the force of the redemption of tallies which is think of that for an illustration. Senator Wisson, of Massachusetts, said at the Cooper Institute meeting, in New York, recently, that we must pray for Grant's resclection; it and Mrs. Wisson over going to do so. It may do, but woman's resclection is any the resident of the proof of the part of the part of the part of the part of the force of the part of the part of the force of the part of th

A Baltimore lady, who had been exceedingly annoyed by boys who rang her door-bed and then ran away, finally set a trap for them by which a pail of water was to be split upon the next person who rang the bell. In a few minutes her pastor called and was baptized, but retired without making a visit.

## Eastern and Foreign Dottings.

The Spanish Government are willing to release Dr. Howard, but will not admit The Spanish Government are willing to release Dr. Howard, but will not admit that any injustice was done him by the Cuban authorities.—Authentic information received from St. Petersburg states that Catacazy has been disgraced on account of his conduct at Washington.—The British Lord Chanceller has introduced a bill to create a Supreme Court of Appeal Judges for England, with sularies of \$30,000 each.—The Mexican news confirm the reported death of P. Diaz.—The United States Supreme Court has reversed the decision of Judge McKean, of Utah, in the case of Englebrecht.—President Grant announces that assessments of officials for party purposes must stop. —General Sheridan has captured thirty privates and seven officers (Mexicans) for depredations in Texas, and holds the officers for trial in the Courts. - On the Rio Colorado, two hundred miles above Hardyville, rich placer gold mines have been discovered.—The British counter case presented to the Geneva Arbitrators on the 16th instant denies the right of America to damages for enhanced insurance, or the prolongation of the war, or the transfer of American shipping to the British flag—Morse memorial meetings were held in all the principal cities of the United States on April 16th.—General Sherman and Lieutenant Grant's party leave soon for a tour in Russia.—By telegraph from London, April 18th, it is reported that Bismarck's ultimatum presented to Thiers demands the immediate reduction of the French army to 225,000, and to Thiers demands the immediate reduction of the French army to 225,000, and hints that in case of refusal that it would be necessary for Germany to establish a Government for France.—The Commission on Capitulation, in their report on the surrender of Sedau, severely censure Napoleon for not consulting with the Generals before capitulating.—McKean Buchanan, the actor, died at Denver, Colorado, April 16th, of apoplexy.—In the House, April 18th, the Salt Lake and Colorado Raliroad bill was passed.—The new House tariff and tax bill reduces taxafion from last year a little over \$31,800,000. It don't disturb the income tax.—A steamer made her first trip from Corinne across the Great Salt Lake April 18th.—London advices say that the General arbitration is at a computer saturation. 16th. - London advices say that the Geneva arbitration is at a complete standstill until a reply from Washington to Granville's second note is received, and that the nature of the English protest leaves little hope for the success of the arbitration.—Thanksziving for the recovery of the Prince of Wales was held throughout Canada on the 16th instant.—The reply to Earl Granville's second note has been prepared, and was sent to England by last Wednesday's steamer.—A telegram from Constantinople, received at London April 18th, states that the city of Antioch, in Syria, has just been visited by an earthquake. One-half of the city was totally destroyed, and 1,500 persons killed.

A recent Kansas hurricane threw a train from a railway and carried a newspaper A recent Kansus nurricant threw a train from a railway and carried a newspaper press over a quarter of a mile.—The Senate Postal Committee reports in layor of doubling the subsidy to the China and Brazilian steamship lines, and subsedizing the Australian line \$500,000 a year.—The Archbishop of Paris and certain other French bishops have decreed the existence and full force of the Papal mobilion in dogma. The Paris papers pronounce this decree illegal.—Secretary Fish says Government has no intention of backing down from its Geneva case. The Government desires a decision of the Arbitrators on the question of indirect damages, so that we may know how to regulate our conduct in future wars. - Advices from the Spanish frontier state that the Carlists have been victorious and captured carbineers in two recent engagements with the Government troops near Bilboa Bisbineers in two recent engagements with the Government troops near Bilboa Biscay.—A royal proclamation has been issued at Madrid, April 24th, declaring the provinces of Navarre, Lerida and Biscay in a state of siege.—The members of the Japanese Embassy, who recently went to Europe from the United States, are at Lyons.—The House passed the Goat Island bill April 24th—yeas, 101: ang. 85.—European news, received by mail at New York on the 22d instant, indicates as probable an alliance between France and Russia against the German Empire. as probable an alliance between France and Russia against the German Empire. It causes a stri in London fluancial circles. —Don Carles of Spain has put himself at the head of a rebellion against the Spanish Government. —Preparations are being made by the Junrists to defend and hold Matamoras against Quiroga, the revolutionist. —Delano, Secretary of the Interior, comes to San Francisco with the St. Louis rathroad party. —General Sherman and party left Constantinople yesterday to visit Sebastopol and other military positions in Southern Russia. —The reports that Queen Victoria is likely to abdicate in favor of Wales are again revived, and the event is now regarded as quite probable. —Charles Francis Adams and Judge Davis, of the United States Supreme Court, are prominent mames for Presidential nomination at Cincinnati, with Adams on the inside. —The London News predicts that the Gladstope Ministry will be deleated on a test nuestion within the week, and give way to a Conservative Cabinet —The a test question within the week, and give way to a Conservative Cabinet. —The obseques of Earl Mayo took place at Dublin April 25th. There was an imposing procession of nearly a mile in length, consisting of the principal officers of the Government, a large detachment of regulars, and many civic societies. The Marquis of Lorn represented the Queen.—It is announced in a Hamburgh periodical that a German company is about to establish a line of steamers from Europe to Valparaiso and other ports on the coast of Chili.—In Salvador a decree has been passed expelling the Jesuits from that Republic. Ex-President Duenas has not yet obtained his liberty, a boon which the Government seems willing but atraid to grant.—In Guatemala political matters are reported quiet and the country seems to be settling down guidually once more to peace and prosperity. The cochineal crop is unusually small this year.—Nicaragua is uneasy, and much ill-feeling exists within her borders against President Quadra, and there is some fear of a revolution.

## Tell Me.

Tell me thou wilt love me ever. With a voice too sweet to falter:

Say there's but one power to sever-None to make thy feeling alter!

Tell me if there be a pleasure, Aught to make thy young heart lighter; Say that love's thine only treasure, Nothing's sweeter, nothing brighter.

All the world can see its splendor, Lips and hearts are ever meeting And bright eyes dart pleasures tender; But the rapture, oh! how fleeting!

Angels watch the kisses given, And the heart that love embraces Feels the ho jest touch of He .ven-All its sweet immortal graces.

Love's fair dreams can never perish. Hearts that meet no power can sever; Life hath many hopes to cherish, And the good is shining eve Tell me, Love's the guest of Heaven, Clasping, clinging to each duty, Unto every mortal given— Sweetly shrined in perfect beauty!

9. H.

#### Caustic.

In the House of Representatives, April 23d, Wheeler ca'led up the bil' granting the Central Pacific Railroad Company the use of one-half of the is and of Yerba Buena, and offered a substitute providing for a Commission to fix the sum to be paid by the Company for the grant. He proceeded to address the House in support of the measure. Surrent supported the measure, and classical that the people of his State were almost anamons in favor of the bill. He said that the Alfa. iforma, which called his name in question in connection with this matter, was a direcutable short among newspapers. Not one, except the daily associated who chief it, ever after a grant process the state of the stat Cox expressed the opinion that the State of California was not represented properly on this subject.

Sargent: It is as well represented as any State that can send here such an insignificant person as the gentleman is

Cox, who appeared not to have heard Sargent's remark, said that he made no personal allusion to any gentleman when he said that California was not represented on this subject.

Sargent. I would like to know who made the gentleman the schoolmaster of me and my colleagues?

Cox: I represent my district here as a member of Congress; I don't represent any bank; I don't represent any portion of the Legislature, I represent a list matter the property and the people of the United States, now sought to be despoiled by this special legislation

Sargent: The gentleman represents Tammany; nothing else; that is what he represents.

Cox: That is a blackguard remark. Holman moved to table the bill. Negatived- 73 to 99. Niblock offered an amendment reserving to Congress the right to latter, amend or repeat the state. Adopted. Cox denounced the bill as Democratizing and indicated the Alba Cobjournet, Sacramento Coicon, and San Francisco Bulletin. Wood opposed the substitute as more objectionable than the origina, bill, as providing the never-chaing ass of the island on payment of a sum to be fixed by the Commission. Coghlan advocated the bill, on payment of a sum to be fixed by the Commission. Coghish advocated the bill, calling the 41m a paper which could be bought cheaper and do outset work than any paper in the United States. The crowd that burned himself and colleagues in efficy, in San Francisco, could be hired to burn the Sawour for \$10,5 or having preached the Sermon on the Mount, and the 44m could be hired for \$11 to applicable deed to be suffered by the could be hired to hard the sermon on the Mount, and the 44m could be hired for \$11 to applicable deed to the commission of the commission of the Rail road Company, can take possession. Wheeler assented to the amendment and it was agreed to. Without making further progress on the bill, the House took a recess.

On the following day the House took up the Goat Island bill, and a motion to lay it on the table was negatived—79 to 96. Holman s first amendment, requiring a minimum annual rental of \$50,000, was rejected; yeas, 88; nose, 94. The second amendment, requiring the company to refund the interest pared to its bonds, was also rejected; ayes, 79; nose, 92. The subsettute was agreed to without division,

and the bill as thus amended passed; yeas, 101; noes, 89.

<sup>-</sup> A wag who had been troubled with rats, informs a friend, seriously, that he greased a thirty feet board, filled it full of fish-hooks, set it up at an angle of forty-five degrees, and put an old cheese at the top. The rats went up, slid back, and he caught thirty of 'em the first night.

Local Dottings.

Extensive beds of a fine quality of peat have been discovered on the sea coas near Los Angeles.—General Joe Hocker is coming to California.—A tournament is to take place this year at Woodland in regular old fishibmed Southern style. -Captain Paul Shirley has been ordered to the command of the Lackawana. The plans are drawn by architect Raun for a costly residence in this city for Leland Sunford. The edifice and grounds will cost \$200,000.—The Montana mines have produced in the last ten years over \$120,000,000.—The Kimball Carl Company have an order for fifty-one horse cars for Woodwards. The of street railroad. They have an order for fitty-one horse cars for Woodward's line of street railroad. They have no platform for londers, and are run without conductors,—A mustang worth, at a very liberal valuation, \$25, running away on Market street, Tuesday atternoon, caused five other runaways and the smashing of that number of carriages. The bill for consequential damages amounts to \$1,211,—The Board of Supervisors authorized the Superintendent of the Industrial School to receive the voluntary surrender of children from Ukier parents, and also from other counties in the State, upon the payment of \$15 per month for each child in advance,—Joseph Brown, President of the Missoni Pacific Railroad, Francis B, Hayes, President of the Atlantic and Pacific Railroad, representatives of the City Council, Merchants' Exchange, Board of Trade and other officers and stockholders of the above-named roads, from \$1, Louis for San Francisco, are now due here, where a conference will be held relative to the propositions which have recently been made in California with the view to husbening the completion of the Athantic and Pacific Railroad. be held relative to the propositions which have recently been made in California with the view to hustein g the completion of the Atantic and Pacific Railroad across the continent. Several Indies and representatives of the city press accompany the party, — L. W. Kennedly was before the Police Court on Tuesday, on a charge of assault to commit a rape on an English woman named Reed, who insisted on advertising in the Chronicle, under the head of "Personal," offering to become a housekeeper for a gentleman in such terms as gave reason to suppose Decome a noisesceper for a gentleman in such terms as gave reason to sulphose that an equivocal meaning might attach to them. The charge was not sustained. The case has attacted considerable attention from the standing of one of the parties, and as illustrating the real object of most of the "personal" advertisements in the San Francisco duilies.—Judge McKinstry, sitting in the place of Judge Dwinelle in the Fitteenth District Court, rendered a sweeping decision in the Second street cut case on Wednesday. He declares the assessment illegal and void, and permanently enjoins its collection.

# Sport, Gentlemen, Sport!

This is a Christian country, and we are a civilized people. Of all things we boast This is a Christian country, and we are a civilized people. Of all things we boast our humanity—and we are doubtless a humane people. We have put down cockfighting with a rigorous hand, we have put down man-fighting with a stronger, and if we do allow piecen shooting at Hurlingham, it is only out of a high respect we give him the treadmill, and write leading articles about his brutality. When an unhappy wretch dies in the prize-ring we sicken at the spectacle; when a drover beats a bullock or overdrives a sheep, an excellent society very properly sends him to jail, but—there is vast hypocrisy in this, but—we permit and foster the Grand National Stronghelize. Does anylogy have what series of sport the Grand National Stronghelize. National Steeplechase. Does any body know what sort of sport the Grand National gives us year by year? Well, here are a lew cuttings from the Echo's account of it, and if, when you have read them, you can look a Spanish bull-dighter in the face without blushing, so much the worse for you. We will head them, if you please,

THE GRAND NATIONAL DISGRACE.
Royal Irish Fusilier joined the leaders, Snowstorm having come to grief, and his jockey's hoots torn off

Nunge, having hurt his leg, and jumping badly, put his hip out, and was stopped. At the next second fence Primrose fell and link her back. Schiedam fell over her, and Marin over Lord oglinton's horse. The three, with Philosopher, being all down together, Cinderella, shortly afterward, came to grief.

None of the others passed the post, Franc Luron having been knocked over at Beecher's brook by Acton, who also fell.

Harvester bundered at a fence before the Canal-bridge turn, fell, and overreaching himself, milled one of his feet off.
Scarringion s plate being completely turned round materially interferred with

him in the result

Mr. Brockton was very much injured, three or four ribs being broken, and Primrose was killed.

Time, ten minutes fourteen and a half seconds.

This is sport, my noble lords and gentlemen, if you will, glorious, sanguinary, hellish sport. Hide your diminutive heads, miscrable pigeon shooters of Hurlingham, the grand steeplechase of Christian civilization leaves you high and dry on pinnacle of refined mercy. -Hornet.

The Evening Chronicle, Virginia City, Nevada, is on our desk. It is a hand-sprightly, well-edited journal, and in every way worthy of the Virginians.
 E. F. san and John I. Ginn, both old newspaper men, are proprietors.

### Sonnet .-- The Winter Wood-Flower.

Through the bared forest, by its dreary ways,
So hard and rugged in the grasp of froet,
I wandered where a million leaves were tossed,
The fading trophies of dead summer days:
There, in the coldest, gloomlest nook, ablaze
With gorgeous color, like a fairy lost
In some lone wild by fairy feet uncrossed,
Bloomed a strange flower amid the woodland maze.
All round the dimness of that desolate place
It shed both light and perfume, its fair head,
Swayed by the gale, still bent in curves of grace.
Bloom on, O flower! the blessed type thou art
Of one last hope, which o'er its brethren dead
Shines on the frost-bound stillness of my heart!
—Pauk H. Hayne, in Appleton's Magazine.

## Abolishment of the Passport System.

Another relic of despotic power has been abolished in France by the passage of a law which consigns the passport system to oblavion. The system, as established by the semi-barbarous covernments of the Dark Ages, was an almost magnetically the semi-barbarous covernments of the Dark Ages, was an almost magnetically and learned who could afford to avail themselves of its privileges, while the masses were entirely prohibited from exercising the rights it conferred. Great hard-ships and danger resulted from the enforcement of the law of passports. Distinguished men, who, through accident or forgetfulness, did not possess the proper papers, were often arrested as spice and placed in the vitest dangeons with the most motorious criminals and outlaws. Even under the empire of Napoleon III, the system was figorously enforced, and was one of the greatest evils of his government. In Russia and other European governments, passports are as much a necessity as food. In some districts the commonest necessities of the hour cannot be procured unless the traveler exhibits his passport. In fingland and the United States, where the system was long ago abolished, the people can have no dea of the tyranny unflicted upon the unfortanate travelers in Continenta, ranope who had lost their passports. Its abolishment in three of the most nowerfulned civilized governments will have a most beneficial effect on Russia and other countries which still c inst to the system tenaciously. The notion that travelers contected the traveler are an injurney from one country to annother without having to undergo the tortures of insolent officials. It is to be hoped that even the civicus of which were the civic injurities of the Dark Ages.

#### Is it Medicine?

A friend of ours, who buils from one of the upper districts of South Carolina, called at the *Pick* office, and among other novelties, he mentioned "Wolfe's Aromane Schiedam Schnapps," and stated as a fact that in his section of the country, nearly all the physicians, in certain cases, when they deemed ardent sprits necessary to prolong or save Fig. invariably used these Schnapps, justly regarding it as the only spirits that could be procured pure and unadulterated. He also stated that this medicine or Schnapps was becoming the only bevarage soid on the great stage or raifrond routes. He says those physicians who have used and analyzed it state that for diseases such as gravel, gout, rheumatism, etc., it is mecomparable. \*\*Assorbeam Picaryme.\*\* Plant & Newton, Sole Agents for the Pacific Coast.

#### Post Office Directory.

We tender our thanks to the Hon. John Tauffe, M. C., for his esteemed favor in forwarding to us a copy of the Post Office Diffectory. An invaluable compilation contaming a list of Post offices in the United States, arranged alphabetically and giving the salaries of Postmasters: also an Appendix contaming the names of Post offices arranged by States and Counties, with Money-order offices, and other postal information with changes up to March, 1872. The matter has been ably compiled by Win. Van Vieck, of the Postal Department, and published by Win. H. Boyd, Directory Publisher, Washington, D. C.

— A woman's head may be entirely severed from her trunk but never from her wardrobe.

#### Court Chat.

Following the kindly old Scotlish custom of presenting a bridal gift on the occasion of the marriage of the "Laird," the tenantrics on the estates of the Marquis of Bute have resolved on making the following presents to the future Marchioness: First on the list is the "Bute" tenantry, who present a superb gold pendant and earrings, set with diamonds, pearls, rubies, and emeralds in the form of shells. The gems in the pendant are set in alternate rows, centered by a large of shells. The gems in the pendant are set in afternate rows, centered by a large brilliant diamond of fine lustre and purity, and it is intended to be worn attached to a handsome gold neckband. The stones in the earrings are set in a similar way, and the whole is enclosed in a handsome velvet case. On the back of the pendant is an inscription noting the presentation, and bearing the "Bute" and "Howard" shield quartered and a Marquis' coronet. The 'Dumfries' 'tenarity at Cunnock, Ayshire, give a magnificent diamond tiara of seven stars, all brilliants of the finest water, convertible at pleasure into bracelet, necklace, and brooch, and, in addition, a beautiful Scotch pearl and diamond ring—the pearl is one of the most lovely and most delicately tinted we have ever seen, and the whole forms a perfect picture when seen in the handsome velvet casework. On the back of the bracelet is the Dumfries and Howard shield and coronet. The people of Rothesay have also selected a calculate it for her holdship. It teles the form of a heady to read the sealer people of the sealer of the sealer people of lected a splendid gilt for her ladyship. It takes the form of a bracelet, pendant, and carrings, and is composed of coral pearls and diamonds artistically grouped and carrings, and is composed of coral pears and diamonds arisinally and and beautifully blended, producing an effect which, though quiet in color, we have rarely seen surpassed. It is perfectly beautiful, and in point of taste all that could be desired. The bracelet bears the inscription stating the purpose of the gift, and also the arms of the town of Rothesay, the whole being enclosed in a ruby velvet case. - Daily Review.

— The Paris papers are indulging in all kinds of pretty stories about the Queen and the Prince of Wales. The Avenir National tells us one which is certainly not generally known. During his Royal Highness's iliness, a robust young man, half geatleman, was always remarked at the chatcau Sandringham, he was even admitted to the patient's bedside, and the Prince appeared to be deeply attached to him. Everybody was puzzled at the presence of this stranger, whose name and position were kept secret. However, all has since been discovered, and here is the enigma explained. In 1855, during the stay of the Royal Pamily in the Isle of Wight, the Price of Wales kicked over a basket of shells which a boy was gathering. The boy, red with rage, dared his Royal Highness to "do it again," and he would see what he would get. The Prince did do it again, and the boy thereupon landed his list upon his Royal Highness's nose, giving him a pair of black eyes. The Queen, on seeing the Prince, insisted upon knowing the truth, "You have only got what you deserve," said Her Majesty, "and were you not already sufficiently punished, I would punish you myself. I hope you will always be served in the same way when you are guilty of such conduct." The Queen the sent for the boy's parents and offered to bring him up. The parents consented, the boy has grown up with the Prince of Wales, and is now treated as his foster-brother. brother

— The Poet Laureate must take care: already America is ahead of him in the way of odes about the Prince of Wales. This comes from Chicago:
"At Sandringham, the Prince."

Of Wales is getting round his illness; And his princess wife's all goodness

And yet they say that America has no native school of poetry!

While visiting Rome, the Prince and Princess of Wales gave a dinner at their hot 4, followed by a reception, to which all the chief English visitors to Rome were invited. The Princess of Wales invited some of the Italian celebrities of the National party and also some of the chief personages attached to the interests of National party and also some of the carel personages attached to the interests of the Vatican, so the result of this amusing and amiable mistake was that at dinner, Monsignore Howard was scated opposite to the Duke de Teano, and the Liberal Deputy Arrivabenear the side of Mgr. Mérode, a more complete mingling of the fire and water of Roman politics than has yet occurred since this city became the capital of United Italy; the charming manners of the Princess and the hospitable warmth of the Prince prevented any coolness arising from this untoward combi-

— Grillparzer, the Austrian tragedian, was an intimate friend of the ill-fated Emperor Maximilian, of Mexico. In 1865 he said to a distinguished Vienna diplomatist, "Will you write to the Emperor Maximilian?" And, when the diplomatist answered in the affirmative, Grillparzer continued: "Tell the emperor that I admire and respect him; and, if he does not accomplish his enterprise (for he is no good, and cannot direct events), he has done his best, and adopted the wisest course best statements. that could be pursued. If he must return, low-minded people will perhaps sneer at him because he is an Austrian prince, and because they do not want him to suc-ceed; but all intelligent men will admit that he was worthy to rule over a great

The Norwegians have determined to erect a huge granite monument on the wild coast of the Scandinavian peninsula, to celebrate the one thousandth anniversary of the establishment of their kingdom by the mighty warrior, Hurald Hanginger. This is a long period of national existence, filled with an interesting, almost labulous history. In the early part of it Norwegian navigators excelled all others in boldness and skill, and it is pretty certain that they made discoveries on our coast centuries before the voyages of Columbus and Cabots.

— An immense meeting was convened at Lordon, April 27th, including many of the most prominent men in the Kingdom, to consider the subject of the creetion of a memorial statue to Earl Mayo. The Duke of Edinburgh passible. Disraeli, the Dukes of Cambridge and Kichmond, Earls Derbyand Shaftesbury were among the speakers. A subscription committee was appointed.

- The physicians of the Empress of Russia, attribute her present severe illness to the efforts she made to complete a water-color painting of the imperial famally which she intended to give to be hisband, the emperor, as a Constituse pre-ent. For two weeks she worked nearly day and night on it in order to finish it in

— Several German Princes will soon visit the United States. It is said the Crown Prince will do so in October. The reception of the Prince Alexis in this country has created the greatest sensation among the monarchists of the Old World. By and by the King of the Cannibal Islands will want to come.

- The Sultan will visit Europe this month. He will disembark at Naples, remain some time at F orence, and will enter France via Mont Cons. His Majesty will proceed to London, and will be accompanied by his Grand Vizier, his Minister of Foreign Affairs, and all his military household.
- His Highness, the Maharajah of Putfiala has offered 15,000 rupers to the Punjab University Codege to found a scholarship in memory of the Harl of Mayo. The benefactions of this nobleman to the university now exceed a lakh of rupees.
- Prince de Sayn-Wittenstein has just come out on the stage at the Wallner Theater, Berlin, as a tenor singer. He conceals his identity under the pseudonym of Arnold Walden.
- The Tiehborne claimant publishes a letter thanking the public for previous subscriptions and asking for £4,000 to enable him to continue the contest for the possession of the estate.
- A London pempous scientific lecturer reminded his country audience re-cently, in concausion, that the same shooting star can never be seen twice. Some one at the back exclaimed thereupon, "You be a shooting star, then, mister."
- Prince Bismarck completed his fifty-eighth year on the 1-t of April. Decidedly Ad-Fools' Day got the worst of it in the case of the Prince
- The Empress Augusta of Germany is about to visit her royal sister, Victoria of England
  - Nellie Grant was presented to the Queen, April 26th.

# Special Brevities.

- Dr. Adler, the London Times correspondent at Berlin, is admitted by all who have reviewed his works, and have watched the character of his communications, to be a remarably able politican, and a most faithful compiler of facts and figures; therefore, we are not surprised at the marked attention which has been given to his last letter. Its tendency is to prove that another war between France and Gormany is a matter of certainty, even proximate, and we are astoniced, in-deed, at the figures begives. From these it would appear that ore long France will outnumber Germany in sold ers, as the scheme of M. Thiers well raise the atmost the Republic to at least 1,600,000, a figure which, Dr. Adier says, the German troops, now estimated at 1,250,000, cannot in their present or an zaf on attem before 1880. He adds, owing to the full Landwehr and Reserve system having been but recently introduced in the three Southern States, some eaglat or nine years must clapse, even introduced in the three Southern States, some eight of mine years mast chapte, even with the new increased rate of regiming, before the armises of Germany will ammerically equal to the host M. Thiors intends to create by a single-inst. A still more formidable feature in the French plan, he thinks, is the contemplated in formal plan is to the run up to 2,500. It is obvious that with her 1,500 pieces formany would find it difficult to oppose this correlated of the still produced to the plan in the plan is the same and the still produced the size of the plan in the plan is the plan in the plan in the plan is the plan in the plan in the plan is the plan in the plan in the plan is the plan in the plan in the plan is the plan in the plan in the plan in the plan in the plan is the plan in the plan is the plan in the p the instruction which the off cers of each country receive, the stamina of the men, their respective fighting qualities, the value of recruits in comparison with trained soldiers, and the resources of money and material of France and of Germany.
- A book that makes some sensation in England just now is the reminiscences of the old Chartist poet, Thomas Cooper, who was imprisoned for two years in Stafford jail for his opinions. While there he wrote his poem, "The Purzestory of Suicides." He put upon the title-page, "By Thomas Cooper, the Chartist," and Suicides." He put upon the title-page, "By Thomas Cooper, the Chartest," and it was Mr. Disraed who advised him to keep the defiant political phrase there. When the present conservative, Lord Lytton was the thereal sir Edward Lytton Bulwer, Mr. Cooper asked him one day at the table of one of his principal supporters in Lincon, "What government would rou prefer for rangland, if we could rehouse the kind of Government now? he replied without has fatton, "A republican government." One of the most interesting passages in Mr. Cooper's Life, ican government, "One of the most interesting passages in Mr. Cooper's Life, it and the treatment of the control of introduction from "Honest Tom Duncombe?" "My Dear Disraed! I send you Mr. Cooper, a Chartist, red-hot from Stafferd jail. But don't be frightened. He won't bite you. He has written a poem and a romance, and flunks he can cut out 'Coningby' and 'Sybil'!" Help him if you can, and oblige yours."

- One of Turner's most famous and magnificent pictures, his "Slave-ship," has behome the property of an American, and is now in New York. Ruskin owned it and has made it famous by his eloquent description and unstinted praise. It is odd enough, in this connection, that Ruskin, who quite hates American has always been set against any of his fovorite Turner's works ever coming here. Years ago, an American, having come into possession of some very fine drawings by the great artist, was applied to by Ruskin to sell them to him, for this very reason; to which the American, with the usual national impudence, replied, that he could not think of parting with them, and that it would be hardly worth while to indulge Mr. Ruskin in this feeling, since all of Turner's works would be coming over here by and by! Ruski has either outgrown this contemptuous jealous, or finding, it necessary to sell his picture, was more anxious to get the big zest price for it, than to indulze it. We trust this master-piece of Turner will be placed for a while at least where the public can see it.
- To those about to commit suicide it is interesting to know, on the authority of a Kanesa murderer, who was hanged, that that mode of departing this life is exteremely pleasant. The murderer in question, it is stated, was quite dead when he was "cut down" to be operated upon by a scientific gentleman, who restored life by means of galvanism. The murderer's account of the sensations of strangulation is as follows: "Hanging is rather pleasant than otherwise; for after the first spasmodic struggle for breath, a delightful tickling sensation followed my veins to the tips of my limbs. Consciousness scended to lose itself very gradually, and for a time a portion of the brain scended to retain its vitality. The happiest moment of a lifetime was centered in a dream at that instant. From that moment until I found myself in the hands of science I knew not."
- Wonderous reports have been received at Sydney regarding Paxton's claim at the Tambaroora reefs. A regular vein of gold appears to have been struck between the casing, 80 tons of stone yielding 440 onnees of gold was obtained from this claim in a fortnight. Trustworthy news states that the vein of gold through the claim, appears as a regular pillar of gold between the slate casing. Old mires say that nothing was ever known like it. There is scarcely a bit of quartz to be seen. A dividend has been declared of £4,800 per share as the result of seven weeks' work.—Melbourne Arque.
- The amount of gold exported from Tasmania during the year 1871 was, according to the Custom House returns, 22650zs., worth £8615, from Hobert Town, and 1870zs. worth £8615, from Hobert Town, and 1870zs. worth £14,218; but it is believed that the quantity actually sent away was much larger, the Custom House authorities finding great difficulty in obtaining correct returns from private parties and miness leaving the Colony. The last year syield of gold in New South Wales amounted to 296,921ozs., which is nearly 100,000ozs; over the yield of the previous year.
- An iminent divine says: "I have been a great sufferer from brouchitis and asthma, and I am anxious to make known to my rev. brethren, and through them to others, a valuable remedy which has never fuiled me. It is as follows: 20x. of garlic peeled and bruised; I pound of coarse brown sugar; one pint of water. To be simmered together for two hours; it must never come to a boil, since boiling-heat destroys the spirit of the garlie. It should be put into a bottle, and a wine-glassful taken first thing in the morning and last thing at night."
- In Melbourne there are no less than ten banks of issue, and an eleventh is now under the title of the "City and Provincial Bank." The projectors (says the Argos) start with an altogether new principle of allowing depositors whose accounts have not fallen below £50 during the year, to part.cipate in the surphis profits, after providin for a return of six per cent, to the shareholders. The institution is designed to advance small cash credits on the Scotch principle, and to assist manufactures, etc., established on the co-operative system.
- "Boys, hear our solemn adjuration, and be warned in time. Never be editors! Dead-head tickets to circuses and dog-shows are all very well in their way. But don't let them lead you into that diney den of inky horror and iniquity, burlesquingly known as the editorial sanctum. Stand back. Keep out. Be stockgamblers, railroad directors, presidents of a sage-stuffing machine, rag-venors, charcoal-bawlers, or North Methodist whangdoodlers. But never, no never, never be editors!"
- The largest solid iron easting ever made has just been turned out at the Elswick Ordnance-Works at Newcastle-on-Tyne. It is an anvil-block, weighing one hundred and twenty-five tons, to be placed under a twenty-ton hammer specially constructed to forge a thirty-five ton Armstrong gun.
- The oldest merchant-vessel still afloat is the Dutch ship Commissaries des Coming ron der Heine." She was built in 1568, and is still in good condition. Eight years ago she made the long and dangerous voyage from Batavia to Holland around Cape Horn.
- Sixteen vessels of 17,300 tons were launched on the Clyde last month, compared with thirteen vessels of 17,700 during the same period of last year.
- Forty-seven years ago President Thiers was "devil" in a printing office in Paris.

# Governor Stanford's Refutal of the Resolutions by the Committee of One Hundred.

The following letter, from Leland Stanford, has been sent to the Committee of One Hundred, in reply to the resolutions adopted by that body :

SACHAMENTO, April 26, 1872.—Sir: I have the honor to acknowledge receipt this day of yours of the 16th instant, enclosing copy of the preamble and resolutions adopted unanimously as you are pleased to inform me io in that day by the Committee of One Hundred. That they should have been adopted unanimously is, or ought to be, somewhat surprising, because the assumption of facts upon which the resolutions are based are almost entirely erroneous, and must have been known to be so by several of the well-informed gentlemen composing the Committee.

The first recital is: "WHEREAS, The Central, Western and Southern Pacific Railroad Companies have received enormous grants of land and sub-idies of bonds and money from the Federal Government, from the State of California, from various counties in the State, and from the city of San Francisco, which grants and subsidies were more than sufficient for the entire construction and equipment of said roads.

The actual facts are, aside from the aid of the United States, which is so well un-derstood that it is unnecessary to particularize its character, the Central Pacific has received from the State no bonds, but an agreement to pay the interest on 1,500 Freelyed from the State no Commis, our an agreement to pay the inter-two rows, bonds of the Company, for \$1,000 each, and thirty acres of land in Mission Bay, upon certain conditions. The same Company received from San Francisco City and County 400 bonds of \$1,000 each, after much I tigation, in fulfillment of a set-It received from the County of Sacramento 300 bonds of \$1,000 each, and

thement. It received from the County of Sacramento 300 honds of \$1,000 each, and from the County of Placer 250 honds of \$1,000 each, giving to the two latter counties an equal amount of its stock, worth as much as their bonds. Now these three counties are the only ones that ever gave bonds to the Central Pacific Radroad Company, as originally organized, and are the only county bonds that the managers of the Central Pacific Company touched, and those cight years ago, when all but the first thirty-one miles were before us for construction. No mency has ever been given to this Cenpany, or either of the companies, nor has there any lands been given to this Cenpany, or either of the companies, and there are any lands been given to the Central Pacific Central Pa there any lands over given by San Francisco to the central Facine Raisroad Company, or, so far as I am informed, to either of the companies mentioned. Nor were the "grants and subsidies more than sufficient for the entire construction and equipment of said roads." Nor were the entire gold values of the grants and subsidies at the time received by the Company sufficient for more than forty per cent. of the actual cost of its construction and equipment. The second recital reads as follows:

\*\* Whereas, This State and city have given to said railroads large subsidies and valuable grants of land withen this city, with the intention and understanding that the said roads should make their western terminus within the city of San Francisco, and upon the tract of land granted for the purpose in Mission Bay.

The city of San Francisco never, as before stated, gave either companies any lands, nor did it ever give to the Central Pacific or Southern Pacific any subsidies with the intention or understanding that the said road should make their western

terminus within the city of San Francisco.

At the time the city of San Francisco voted to take stock in the Central Pacific, and afterward, when upon the mandate of the Supreme Court, she delivered to the Company her four hundred bonds, the Central Pacific Company was organized to build from Sacramento eastward, and the Western Pacific Company was organized to build from San José to Sacrathento. But both these companies were now complying with the law by which the State gave them lands in Mission Bay for depot purposes, and intend to continue so doing; and further, the companies are not, and have not at any time been in default.

The Acts of Congress never made San Francisco the terminus of the Central Pacific or Western Pacific Railroad Company, but very much to the contrary, as will be perceived by reference to the Acts. The first Act providing for a point in the Pay of San Francisco or the mavigable waters of the Sacramento, and another one providing for the Western Pacific, between Sacramento and San José, and bringing it no nearer to San Francisco than the latter place. The third recital:

"Whereas. The said companies have obtained large grants of lands on the opposite side of the Bay, in front of Oakland, and have directed the entire railroad system of the above lines, and of the railroads of this coast, toward said last-mentioned point, in disregard of the conditions of said contract."

There was no proviso or conditions of any kind in the law granting by the State There was no proviso or conditions of any kind in the law granting by the State the land in Mission Bay, or by any other law, that the companies might not have depots at Oakland, or any other place where the companies might think was to have them to accommodate or facilitate their own business. The fourth recital: And

" WHEREAS, The said companies have been and are now making strenuous efforts to obtain from the Federal Government a grant or lease of Goat Island, lying in the Bny of San Francisco, midway between this city and the Oakland shore, for the purpose of a terminus of all the lines aforesaid, in spite of and against the expressed wishes of this city, and defiance of the damage and danger to the harbor and commercial interests of this port, as conclusively demonstrated by scientific investigations and the judgment of eminent engineers." It is true that the Central Pacific is trying to obtain a lease of a part of Goat Island—not the whole as the terminus, but not "in defiance of the damage and danger to the harbor and commercial interests of the port." For the Railroad Company would be as unwilling as the gentlemen who passed this resolution to do anything of the kind; but the Railroad Company would reach the island in such manner as to do no damage, as is shown it might do by the report made by General Alexander and others to the Hon. Wm. Alvord and other citizens of your city.

"Resolved, That the city of San Francisco has a right to expect, and does expect of said Railroad Companies, a strict compliance with the terms and conditions of the compact made by said companies, to wit: The actual and immediate location of the terminus of said roads (now merged into one ownership) upon the sixty acres in Mission Bay, in this city, and the actual and immediate abundonment on the part of said companies of any construction or proceeding having in view the fixing of such terminus at any point whatsoever."

The companies are now providing for depots on the land granted by the State in Mission Bay, in the city of San Francisco, and do not admit the right of the Committee to demand that the companies shall not have depots at other places, but the companies now, as at all times, deny that they have in contemplation the establishment of depots to the prejudice of San Francisco or any such desire. As to the assertion that the Railroad Companies are merged into one ownership, there is a mistake. The Southern Pacific and Central Pacific Companies are distinct corporations, having different officers and stockholders, holding stock in each of the companies that do not hold stock in both, though I do not wish to conceal the fact that there are individuals who hold stock in both companies; and further, I wish to state there is no intention or desire, so far as I know, of any officer or stockholders in either of the companies to consolidate them; on the contrary, the policy will undoubtedly be adhered to of keeping them independent organizations.

"Resolved, That the citizens of San Francisco believe that the said companies should withdraw from Congress immediately all claim, demand or request for any grant, lease or privilege of using or connecting said roads with Goat Island, and at once cease all further construction of wharves, piers or strips in the channel of this Bay at the terminus of their present Oaklank wharf or elsewhere."

That this resolution is unreasonable will be readily shown by a simple statement of facts: Four years ago, when the Central Pacific Railroad was nearly completed, and about to form a continuous track from ocean to ocean, it was the desire of the Railroad Company to establish its terminal depot in San Francisco, with space and accommodation not only for its local business but such water front connection with the ocean shipping as would enable the overland route to have the advantage of complete facilities for transfer to compete successfully in time and expense with all foreign routes for the through traffic of the islands of the Pacific and countries bordering its vast waters with the Atlantic States and Europe. With that intent and for that purpose the Railroad Company made overtures for depot grounds in Mission Bay, offering at its own cost more than ten millions of dollars to fill in the Bay, to construct Bulkheads, docks and wharves to be the property of the State. The overtures were ungraciously received, disapproved and denounced; how wisely, may be inferred when it is considered that the submerged lands sought by the may be inherred when it is considered that the submerged ands songh by the Railroad Company have since been sold by the State to individuals in small parcels for an aggregate sum of about \$500,000; and there they remain unimproved and substantially worthless, and bulkbeads, docks and wharves unbuilded, and if ever substantially worthless, and bulkbends, docks and wharves unbuilded, and if ever to be built to be builded at great cost, and then nothing secured for the city or State that would not have been secured by granting the lands to the Railroad Company, who would, at-its own expense, have made the construction mentioned. Other propositions of a most liberal kind were made by the Company and rejected; but after much discussion there was, however, granted to the Southern Pacific and Western Pacific Railroad Companies thirty acres each of tide lands in Mission Bay Western Pacific Railroad Companies thirty acres each of tide lands in Mission Bay for depot purposes, upon condition that the said Railroad Companies should expend \$200,000 thereon within two years, and not extend their tracks nearer than three hundred feet of the water front. Said depot grounds were then subdivided by the authorities into lots, streets, alleys and market places, etc. It was in vain that the Railroad Companies endeavored to convince the people of San Francisco that the space granted was insufficient for the purposes designed, and that it was recard. the space granted was insufficient for the purposes designed, and that it was necessary to bring the tracks to the water front to avoid expense of unnecessary drayage, as also unnecessary loss of time in trans-shipment between the cars and ships, age, as also dimercessary loss of the intransimplified of which would tend to drive business from the whatves of San Francisco and from the Railroad Company to the injury of both. These prohibitions remain to this day unchanged, and for their through traffic the Railroad Companies have been day inchanged, and for their through trains the Kantoka companies have been compelled to look elsewhere for necessary accommodation prohibited at the San Francisco side of the Bay. Most of the commerce of the Pacific Ocean finds its way to and from Europe by the capes or through the Suez Canal. To direct through

our own country there must be no unnecessary expenses or loss of time.

It has taken long years to build the Pacific Railroad. Shall it take as many to establish this through traffic over the road? Are not the interests of the railroad, of San Francisco and of the whole country the same in this respect? What so much as this business can tend to build up San Francisco into the great city that the natural lines of commerce intend her to become! This brief recital of facts shows why the C. P. R. R. Co. seeks to run its cars to shipping tackle on the opposite side of the Bay, and why the resolution of the Committee is not right. Still, if it can be shown that commerce can be better accommodated at other points than

those contemplated by the Company, we will cheerfully abandon our present plans and adopt the better.

"Resolved, That in case said companies shall decline, refuse or omit to comply with their reasonable request, it is the right, the duty and the purpose of the citizens of San Francisco to take all lawful measures for maintaining their rights in the premises, and to prevent the said wrongful acts of said companies."

"Resolved. That if the city of San Francisco should be compelled to resort to legal tribunds to assert and maintain her right as against said companies, it would be proper and just that the grants and subsidies conditionally made to said railroads be annulled and set aside."

As to the third and fourth resolutions, the companies do not conceive that they have given cause for their adoption, and regret that the Committee thought their adoption necessary.

"Resolved, That it is the interest of San Francisco and of said companies that there should be complete accord and harmony of action between them, and that to facilitate and said the requirement of commerce, the city should not be governed by an host? or any untroved y forsing toward said companies, but should continue to be liberal and accommodating, only demanding in return on the part of said companies the same prompt and exact compliance with agreements as would be demanded of and accorded by this city."

As to the lifth resolution, I am sure the companies appreciate its kindness of tone and wisdom, and desire, so far as in their power, to reciprocate and act in accordance therew the bully believing that there is a unity and munt obty of interests between the companies and the city. And here I desire most carnestly to assure your Honorabe committee that the companies believe that the use of Goat Island by the railroads is very necessary to the prosperity of San Francisco, and for the reasons given before the committee on Federal Reations of the Leeps attra, and published in your daily papers, to which I beg to call the Companies of and published in your daily papers, to which I beg to call the Companies of Brieford Reations of the Leeps attra, and immediate expenditure, would be the sheerest folly, and a blunder in railroad and immediate expenditure, would be the sheerest folly, and a blunder in railroad and immediate expenditure, would be the sheerest folly, and a blunder in railroad and immediate expenditure, the contains that would amount to a crime. Much better of the object were to build a city, to use the money necessary to grade Goat Island for city purposes, to hay ands in the neighborhood of their Mission Bay property, and have the certain, immediates and very meer than future value of Goat Island and opposition of the good citizens of San Francisco.

"Resolved, That it eminently concerns the whole Pacific Ceast, and especially the city of san Francisco, that another radiood connecting the Abaric with the Pacific, and traversing a route free from danger of obstruction and dealy by severities of Winter, and having its terminus in san Francisco, should be constructed as soon as possible, and that this city and the adjoining counties should contribute liberally to aid such an enterprise."

As to the sixth resolution, the Southern Pacific Company cannot demur; but for the Central route 1 must say that I do not concur, so far as it always to the obstructions and delay by severities of Wulter. The Central Pacific has demonstrated, by the successful operation of thout a day's detention east of Santamento since its completion, that the resolution in that respect, so have the Central Pacific is concerned, does not apply. And I am informed by otherers of the Union Pacific is concerned, does not apply. And I am informed by otherers of the Union Pacific Santhay had to encounter during the past Winter, make ample provision will be made to successfully meet such called the will now, being advised by the experience of the past Winter, make ample provision to secure prompt and regular transportation in the future.

In conclusion, perm time to assure the Committee that the rule ad companies have no the notion name. So a Francisco, and if they were convinced their plans

In conclusion, permit me to assure the Committee that the ratroad companies have no intent on to injure 8 at Francisco, and 71 they were convinced their plans to accommodate commerce, by expending and cheapening transfers might by possibility have that effect, they would be state long before carrying them out, and endeavor to accomplish the object in some other manner, it has do not entirely about money with them at once. But the companies feel assured that their interests run in harmony with that of our city, and that what they seek is of great consequence to commerce and highly beneficial to San Francisco, and in the whose matter of locating their terminal depots they desire to be just and considerate, and to discuss the question dispassionately and traditivity. Respectfully your ob distat s reant.

(Signet)

To A. Wheeler, Secretary of the Committee of One Hundren.

D. Z. Yost, Private Secretary.

# Abolition of the French Passport System.

It is with great satisfaction that we are able to report, on the aethority of Earl Granville, that within the next ten or twelvedays the French Government will abundon the expensive and troublesome passport system which the Republic has hitherto enforced, and produce some simple substitute requiring neither the loss of time nor money. Protests have been entered on all sides against contenuing the existing regulations, which have been found most inconvenient to English travelers. It is a sign of the cordiality existing between the two countries that the point is conceded.

# Portuguese Slavery in Africa.

Before I left Senhor A., my Portuguese host at Quillimane in the Zambezi, I saw him superintending the punishment of a slave boy whom he kept to wait upon him, and who had been guilty of some act of disobedience. The punishment was severe; it was a whipping inflicted by a strong man—the Portuguese Sergeant, in fact—with a three-thonged whip, each thong consisting of a plait of three strips of buck-hide. I remonstrated with the Senhor upon the brutality of this punishment. He took it in good part, but maintained, as a principle which cannot be set aside, that wherever slavery is, the discipline, even under the best of masters, must be more or less brutal, and the results demoralizing both to master and slave, especially in countries where the masters form, as with the Portuguese in Africa, a very small minority. "You cannot," said he, "treat a slave in this land like a free man; do so, and he will rise against you or rim away. You must keep here under the whip, and any other means that suggest themselves, until they are reduced in mind and soul to the condition of dogs and live only for you. You see duced in mind and soul to the condition of dogs and live only for you. You see that man?" pointing to one of his slaves, a stout-bodied, study-looking fellow, who was at work near the house; "well, that fellow gave me a great deal of trouble when he first became my property. He was brought down here fresh from the hills. He is an Achowa, and, like all his tribe, had some independence of character. The Achowas make good slaves when well broken in, but out of five you are fortunate if you get one molded to your will, for the process kills them, that is, they will die rather than submit to you as unreservedly as is needful, is, they will die rather than submit to you as unreservedly as is needful. This fel-low at first was sullen and disobedient—thought of his home on the hills, his wife and children, may be. Well, that was nothing to me; he had become, through the operations of a perfectly legitimate traffic, my property; for though the law pro-hibits the exportation of slaves, it permits slavery, and consequently the buying and selling of slaves amongst ourselves. So when he was disobedient I whipped him; when he ran away, as he did more than once, I made every effort and spared no expense to recover him, as it will never do to let a slave escape—better kill him—the example of a successful rmaway is so pernicious to the rest. At last kin him—the example of a successful rmaway is so pernicious to the rest. At last kin gave me so much trouble, and was the cause of so much excitement amongst my other slaves, that I orbid each bit to be beaten in a way that I hoped would kill him, and his punishment was severe cough to kill any but a brutos-negros. Youlshall see. Come here, you — !" called out the Schoot to the man in question. The fellow came, and his master turned down his loin cloth, which in shame he had fellow came, and his master turned down his loin cloth, which in shame he had carefully tied over large sears in his loins, and I saw from them how horribly he must have snifered. "Well, that man would not die," continued the Senhor. "Life was strong in him, as it is indeed in all of the Africans. But the whip had at length cleaned the mucus from his brain. As he got well he became cheerful, went to work without a murmur, and having made up his mind to his position, determined to get to himself as much pleasure out of life as he could. So one day he came to me, and said, "Master, give me a wife; it is bad for a man to have no woman to high his fire, cook his food, and make him happy." I had no spare women at that moment, and this I told him."

"Will you give me a woman when you have one?" asked he

"Will you give me a woman when you have one?" asked he.
"Certainly; I shall be sending ivory to Quillimane in a few days, and I will have

"Certainly; I shall be sending lvory to Quillmane in a few days, and I will have women brought in return," said I.

"That is good. I will at once build a house for her," was his joyful response. I received three women in exchange for my ivory, and as I was examining my purchase, the Achova came up and looked at them. Presently he said, "Master, you promised me a wife; will you give me one of these women?"
"Certainly; take which you please."
"May I have this one?" taking hold of the hand of the youngest and best

I gave consent, and away he went with her, light of heart. Time passed: the wife became ill from maternal causes. She was not then able to cook the Achowa's food, light his fire, and make him happy, and the man was evidently getting back

white became in from material causes. She was not then able to cook the Achowa's food, light his fire, and make him happy, and the man was evidently getting back into his old state of mind.

"What alis you?" said I. "Do you want another whipping?"

"No, master, no; but the woman you gave me is ill; she can do nothing for me. I am worse off than if I had no wife." was his reply.

"Then why not take another wife?"

"May I?" said he, with animation.

"Surely; there is So-and-So; take her." And he took her. But she was not the last, for having on a journey he undertook for me picked up another girl, he with my permission took her to wife also. And but lately, with my consent, of course, he has taken to a fourth. I passed by his hut the other day. One woman was in the house nursing her baby, another was preparing the evening meal, another was threading beads and making a necklace for him, and he was sitting at the feet of the fourth, who was dressing his hair. He looked up at me as I passed, as much as to say, "It is all right, master; I am content. I shall not run away again." It was necessary to give this man the whip first, but now the women will keep him quiet. Should they not—well, he must have the whip again, for he is a valuable fellow, and I don't mean to part with him easily. I do not use the whip unless it be necessary; but the misfortune is, it is necessary, always necessary.

<sup>-</sup> A party of Californians who went to Guaymas by the steamer Olympia, obtained a valuable concession for a railroad from Guaymas to Tucson, Arizona.

#### " Biz."

The subject which most deeply concerns the public, and business men in particular, is the following telegraphic announcement

TEA AND COFFEE TO BE FREE OF DUTY AFTERJULY 1, 1872.
WASHINGTON, May 1.—The President has approved the bill repealing the duties on Tea and Coffee after the 1st of July

This bill, which goes into full operation July 1st, admitting Coffee and Tea free of all duties, also applies to goods in free and bonded warehouses, refunding duties upon all under Government lock. This is well, but the law ought not to have gone into operation until January 1st, 1872. For this reason, that importers and merchants here, in New York and all leading cities of the Union carry heavy stocks of Coffee and Tea upon which the duties have been paid a cents per pound on Coffee and 15 cents on Teas. Upon the Tees beavy losses must be entaited, as prices will no doubt ease of considerably, though of Coffee the loss will be inconsiderably as we look for no material decline in passe own, to be sent and a considerably as we look for no material decline in passe own, to be sent and a considerably as we look for no material decline in passe own, to be sent and a considerably as the loss will be inconsiderably. siderable, as we look for no material decline in price owing to lessened product on, light stocks and increased consumption the world over. The remove of duties upon these two leading staples, placing them alone upon the first list, is of questionable policy; it is simply a political dodge to catch the votes of a few. The cost of collecting the revenue from Tea and Coffee was in one detable. Better far to have abovished the impuisitorial internal revenue lineaus Tax, but no this latter furnishes "pap" to many thousands of office holders whose votes are wanted at the next Presidential election, and through its operation scatters milhons the office with its myriads of employés actually costs the Government all it squeezes out of the people by the Income Tax, leaving no revenue for the Government to aid in paying off the National Debt, while the very reverse was the case it taxing Ten and Coffee. A contemporary, in alluding to this subject, says "The bil repealing the duties on Ten and Coffee has passed both Houses of Congress, and has received the approval of the President. It goes into operation on the 1-t of July, and it is confidently be leved will prove of great advantage to the overland Tea trade, and consequently to san Francisco. It does away with the troublesome and expensive system of transportation in bond, and must not as a great stand afor to expensive system of transportation in bond, and must act as a great stam and to to trade between China and dapen and other countries, via the continents railroad. One effect will probably be that all the Teas consumed in Canada will come by this route. In order to accommodate the increasing trade between this port and Chena and Japan, as sent-monthly time will be managnated by the Pacific where the second company, the next steamer leaving on the 16th mst. The growing trade across the Pacific is attracting attention in England, and London papers say a company has been incorporated for the purpose of putting on a time of steamers between China and Japan and some point on the Pacific Coast, to connect with the American systems of raisways." Our people ought now to wake up to the magnitude of the business. If we are to be the Tea mart and Tea distributer of the United States, or improvers must see that they have full stocks of all kinds suited to the trade of the interior. Free Teas will now go overland via Central Pacific with a rush. No bonds required at the Custom-house, no barreters mont the transit trade, our moneyed bonds required at the Custom-house, no barriers upon the transit trade, our money men and capitalists will be saved the necessity of going upon Custom-house bonds for the nultion. It will save annoyance and much hard swearing in passing Teas through Uncle Sam's clutches.

for the nultion. It will save annoyance and much hard swearing in pussing Teas through Uncle Sam's clutches.

Three steamships have gone to sea since our last, exclusive of coasters. The Nebraska, of Webb's Ashastralian line, for Honoinlu and New Zeaiand, with passing Teas three steamships have gone to see the Nebraska, of Webb's Ashastralian line, for Honoinlu and New Zeaiand, with passing Teast York over say bids Fibrary 1480 galls Brandy, 12,000 cmlbs Wine, etc.; for Cartial America, over 900 bibls Flour, etc., valued at upward of \$50,000 A.so, over \$507,000 in treasure, destined mossiy to Callao. The America, for Japan, carried 502 bids Flour, 30 carboys Acad, 198 rolls. Cather, Provisions, Stationory, Boots and Shoes, etc., valued at \$78,284; for China, 4,006 bibls Flour, 44 casks of saving, 500 bixs Soap, Provisions, etc., valued at \$32,893, and Treasure, \$1,524,766 97. The Kirkwood, for Liverpool, carried 39,307 cts Wheat, etc., valued at \$83,295. Our imports for the week include the Pudacy Dawson's Cargo of 3,695 baskets of Batavia Sugar, to the San Francisco and Pacific Retinery; the Montrose, from Cardiff, with 5,055 bars Railroad Iron; the Cultivator, from New York, with 1,700 bis Cardiff, with 5,055 bars Railroad Iron; the Cultivator, from New York, with 1,700 bis Plaster, 2,022 cs Canned Goods, 750 bkes Lugar, etc. Petroleum, 300 bibls Cement, 102 hids and 102 tons Coal, 2,750 keps Natis, 3,000 cs Petroleum, 300 bibls Rosin, 2,300 keps Natis, 1,200 bbs Conder, 1,000 bks Cinder, 1,000 bks Cinder, 1,000 bks Lugar, etc. Ship J. B. Bell, from New York, brings 5,000 bbs Conder, 1,000 bks Condern, 2,000 keps Lugare, etc. Ship J. B. Bell, from New York, brings 5,00 bbs Condern, 2,000 bbs

There continues to be a large business done in Mining Shares; the masses seem There communes to be a large offishess done in annual smartes, the masses seem to be making money, and this has been the rule for months past. Some that we know have realized immense fortunes, and have "saited down" the proceeds in improved real estate; others have large gold deposits, etc. We hope that many more will be wise and escape in time.

The depression in Real Estate continues, presenting many opportunities for

judicious investment that may not again occur to those who have a desire to become land holders

It is said by those well versed in mines and mining developments that the "Washoe" mines will this year pay dividends to the amount of fifteen millions (\$15,000,000). The bullion developments are of far too extended and important a character to permit any permanent depression in stocks upon the Comstock Lode, although there is no doubt but that many stocks have gone bigher upon expectation in proportion to others which have large actual bullion resources.

There has been quite a movement in French Wines of late. The operations of the ad valorem duties upon Color Port and Charets have stimulated extensive purchases, including nearly all old stocks in bond. The Commercial Herald, in alluding to this subject, says: "Immediately following our last issue it was discovered that the late imports of Port per ship Indian Empire and others to follow, would, by reason of their high cost, be subject to increased ad relevent duties; consequently parties at once entered the market and purchased all the so-called 'Color' Wine, including an invoice of 500 eighth and or casks; two invoices, each 150 eighth and or; also, other small parcels of Port-aggregating in all about 1,000 packages - paying for the same \$1@\$1 10, and advancing the price to \$1 200 1 25 49 Bergasse at full figures - cask Clarets now held at \$44@\$46 for cargo, and \$48@\$50

for choice Marseilles Claret.

Treadwell & Co. are doing an immense business, as of old, in the line of agricultural implements; there are several other large establishments in this line now in full blast in this city, but the magnitude of the grain crop gives great stimulus in full blast in this city, but the magnitude of the grain crop gives great stimulus to this department. Bays and bagging material, for a like reason, command increased attention at full figures. Coffee is more inquired for at 18620c for greens, and 23624c for O. G. Java; prices will probably be higher during the year. Conte are searce; none for sale in first hands; West Hartley to arrive offered at \$13.56614 on the spot—worth \$150715 59. Anthracite is searce at \$186020 for Lump. \$30 for Lehigh, and for Sydney \$12.506012 75; Cumberland, \$25562750; Coos Bay and Seattle \$11. Cordage—Manilla hemp, 186019; New Zealand flax rope (made here) \$122660135c. Chemicals are searce and advancing. Fish—Plentiful and cheap for all kinds; the first car load of fresh salmon—on ice—taken into New York by rail this season, sold at 65c per pound by the car load—that paid handsomely: season ow ended for such prices. Eastern people know how to appreciate choice Pacific salmon, extra fine Point Reyes Butter, etc. Next Spring, carly, we will show the Bostonians and New Yorkers what we can do in the way of shipments of fresh roll butter that is nice. Ask James de Fremery, who is having 5,000 pounds extra choice Butter packed in fine for the East Indies, by Wooster & Shattuck, to go to Batavia per the Duteh bark Geseina; the same vessel is to carry a cargo of superior. silk dressed family flour, packed in barrels expressly for the purpose at the Golden Age and the Golden Gate mills. It is superb.

Oranges to Denver, Oranges to Kansas City by the car load. Now is the time for Howe & Hall and others in the fruit line to secure a blg trade in the Territories for Tabitian Oranges, etc. Gunpowder.—The California Powder Company at Santa Cruz are sending us large supplies; price, \$3 for Blasting. Hardware and Metals are all tending upward, owing to increased production and short supplies the world over. Nails are also up to \$5 256.9 \$ keg. Naval Stores droop and are the turn cheaper. Oils are plentiful and cheap. Petroleum is in large stock, but Alvinza Hayward controls this trade, and keeps "Deroes Brilliant" and "standayd" just where he pleases. Provisions arrive overland in large quantities. Suzar-cured where he pleases. Provisions arrive overland in large quantities. Sugar-cured Hams are nice, and it would be invidious in us to say which brand is the best, whicher it be from packers in Chicago, Cincinnati, St. Louis or Louisville. J. Y. Wilson & Co. are rebuilding their burnt packing house on the old site at Black Point, and Captain Merry is delighted with the prospect of steaming up on May 20th. Go it, "Optimes." It lice is sluggish and prices droop. Sait goes slow—too many substitutes and imitations of fine Liverpool to suit the importers of a genuine article. Spices are unchanged. Spirits droop. Neutral easier to the buyer, but is pure, varying in price from \$1.05 to \$1.25. Whisky holds its own. Hotaling's J. H. Cutter's has the palm, or at least he and Dodge, with Suit's, are striving for the trade in choice fine old Kentucky Bourbon. Both are good; we know it, for we have tested the merits of both; price, \$3.50@7.50 per gall, and up to \$12@14 if you desire age. desire age

desire age.

Sugar continues in active request; the supply of prime Grocery raws, such as No. 1 Hawaiian, is actually scarce, and prices well sustained at 9a11½c for the best. Imports from Peru and Central America are less than in previous seasons; this gives our Reflueries full occupation in executing orders. The California Refinery—Spreckles & Eggers—is now doubling its capacity, erecting large additional buildings for next year's business. The Bay, and San Francisco and Pacific are alor running to the full extent of their capacity. Prices of Refined are unchanged, and are thus: Cube, 12½c; Circle A Crushed, 12½c; Extra Powdered, 12½c; Extra Granulated, 12c; Extra Golden "C," 11c; Golden, 10½c. For half bbls, ½c extra, and for bxs, ½c # D additional is charged.

Starch—Coleate & Co., of New York, have reappointed Platt & Newton local

Starch-Colgate & Co., of New York, have reappointed Platt & Newton local

agents for this coast; and so we have now three agencies in this city for the sale of Eastern Starch. It is a big business, and Colgate is disposed to share it with Kings-ford of Oswego, and Duryea of Glen Cove, leaving a corner only for the Glending

patent Our Native Wine interest continues to loom up. J. M. Curtis, in his quarterly circular says: "The local demand for matured Wines was very light during the first quarter of the current year, and the shipment east by rail was much retarded by the snow blockade; in February the entire shipment overland amounting to by the show blockade; in February the entire subprent overland amounting to only 3,230 gallons. The loss of trade cansed by the suspension of mai committee the main was probably not less than 75,000 gallons. The export of Nauve Wine and Brandy during the period under review was: From San Francisco by sea, 102,187 gallons. Since the 1st of April the local demand has largely increased, and orders from the Eastern States are coming very treely to land. The reduction of triegible by the overland railroads especial rates for Wines having been recently made, will seem be fully now increased and with Working with the overland railroads especial rates for Wines having been recently made, will soon be felt in our increased trade with Western cuies, while the opening Sammer soon no left in our increased trade with western cutes, while the opening Sammer will bring many dealers to our market for the purpose of examining our stocks and contracting for supplies in the future. Notwithstanding the unfavorable condition of our market for r-penied whee, producers have had, on the whole, no reason to complain of their success in placing crude wines of last vintage. The prices realized have been, perhaps, a little lower than in previous years; but it is generally received that with the rapid increase of productions years must more nearly con-form to the value of equal cualifies in Europe. We can already produce a wiele as cheaply as the most favored districts of France of Germany. Until we can sell as cheaply as the most lavored districts of France or Germany. Until we can sell as cheaply we cannot regard this industry as based upon a sure foundation, for now we hold the only market open to us by grace of uncertain 'protection' - protection which we do not want if the Government will but remove the restrictions of the Internal Revenue Law." The sparkling wines of I. Landsberger & Co. are steadily growing in favor. We quote Private Cuvée \$10 50a12 50; Muscatelle, \$12 50a14 00; Sparkling, \$9 00a10 50 in quarts and pints. The Buena Vista Sparkling Vincultural Society is \$12 P case to the trade.

\$12.50041.00: Sparkling, \$9.00410.50 in quarts and pluts. The Buena Vista Sparkling Vincultural Society is \$12.9 case to the trade.

Freights and Charters—But little business doing at present. Grain freights to Liverpool, \$2.2 128. 6d.262 155. direct: to Cork, for orders, \$2.3. More would be paid for ships to carry the new crop in mid-summer. Crop prospects size "magnif." The late full of three-tourths of an meh of rain in all the San Joaquin Valley settles the crop question for this year. The what plant is now up four to five feet high and looks well. Flour is wanted for New York at \$5.506; Wheat commands \$1.500 to \$9.5 Enrley, \$1.4001.50: Oats, \$1.5501.70 \$9.0 cental.

Wool—Watt & McLeman have on exhibition at their warerrooms some splendid camples of the New Zealand clip that would do credit to crowers in any country. The visit of Donald McLeman, of the Mission Woolen mills to the Australian dumst lead to important results. The Commercial Heroid, on this subject, says: There seems to be a dead lock in our Wool market. Arrivals from the interior are liberal, and stocks rapidly accumulating. There are Eastern buyers here and orders to purchase at discretionary limits, yet there is a remarkable feeding of sheer in difference manifested upon the part of Eastern manufacturers and buyers now "watching things." Heretotore our early Spring clip has been sought for at the East with avidity, to eke out supplies in the New England factories until the Ohio and Michean clips were brought in, and thus it was that we had a special season of activity provided, but not so at present. Imperts of Australian Wools have been received just in time to "fill the bill," and the quality being approved by mannfacturers, has supplied the want and enabled them to act with far more independence than would otherwise have been the case. In fact, the very high prices dramaded by "california growers has tended to check business, particularly as the first arrivals of the southern clip were of poor quality—short staple and dirty, not to say mo Fall trade. Unless they decide to do this, a break in price will soon be inevitable, or clae holders must turn to and ship East on their own account and draw against it. Thus far our local Wool graders and packers have done very little business other than fill up with storage. Their hands seemed to be tied up for the present. Recent shipments East by rail include a considerable portion of late receipts of Colonial Woos, some samples of which have been publicly exhibited, being of long staple and of superior quality, as compared with the California clap. With us, the arrivals are very free, with considerable stock accumulations. If buyers do not enter the market speedily, speculative holders will ship East on consignment. Present rates are entirely nominal—say 355-32/gc for Spring Recec.

Our Eastern exchanges, like ourselves, are waiting for full details of the public sales in London. The Boston shipping List of April 24th says: "The Wool trade continues quot, but as the London sales progress, there is evidently more disposition on the part of manufacturers to purchase, and we would not be surprised.

continues quiet, but as the London sales progress, there is evidently more disposi-tion on the part of manufacturers to purchase, and we would not be surprised if large purchases were made before the close of the week. Present prices, compared with leading markets at home and abroad, are certainly low enough to induce more free purchases." The New York Commercial List and Prices Current of same date says: "The market remains quiet. There is more inquiry from manufacturers for Fine Wool that is in good condition, and for this full prices are bid; but other qualities are dull. Domestic Fleece is attracting more attention, and some small

lots that have been sold indicate a firm feeling, but the reduced stock prevents any extensive transactions. Pulled Wools are lower; the stock is comparatively small, but the trade has been so light for some time past that holders reduced their rates, which has led to more business. Foreign Wools are quiet; the advices from the London sale continue to be quite favorable, which gives strength to the market, but buyers still refuse to purchase beyond present wants. Sales are given of 44 butles full clip California Burry at 32c.; 2,000 fbs Australian at 68c.; 3,600 fbs Mestiza at 41c.; 60 bales Cape at 46g.46/j.c."

## Leaves from a Lady's Diary.

MAY 1.-What a glorious month of May. Nothing could be prettier than the streets and wharves at an early hour. They were strewn with fresh, bright had maded groups of children, the girls almost all dressed in white, they covered the steamers like blossoms on a fruit tree, and sailed away to various groves on the Bay, to return sun-burnt, dusty, tired but happy, in the evening. I thought of those lines of some forgotten poet-

"Where is the May? The dews have filled mine eyes; The hills rise steeper than they used to rise. Where is the thrill of Nature glory born, That which of old I greeted each May morn?"

I sighed and wished myself a girl again. Was much vexed in the afternoon, That dreadful old Mrs. D — has been making mischief again. She can't bear Mrs. C-, although professing love and affection, so has pretended to take offence at

C—, although professing love and affection, so has pretended to take offence at a spiteful remark made by old Miss N—, and repeats with feigned rage what see said, thereby spreading the scandal and saving herself.

MAY 2.—Poor Pioche. It was but yesterday I saw him. He was always kind to me, and now that he is dead no one thinks of him; they only think of his money. What has he done with it? How has he disposed of it? What is he worth? Who are his executors! No one cares now to reflect that in goodness of heart he was richer than many who turn up the whites of their eyes in church; that he has done with his money more real good, without thought of return, than the majority who roll easily in their carriages, dressed in fine clothes; and that he was a better man in many respects than his colerators. How many are there of those who call against him who would jump at the opportunity to act as he has done, even with foreknowledge of the action, which he had not, and would withhold hope of restitution, which he never did.

"When first he entered this dark world, He hailed it with a moan; And when he left its confines dark, His farewell was a groan."

MAY 3 .- Everybody rushing into the country. Met good natured, vulgar, fat Mrs. E-, who is going somewhere. At home she puts on an old straw hat and pokes about among her chickens and in her garden, and goes out to see her neighbors or takes some dish of her own contriving to a sick friend; but now that she is great to the Springs she must fain attire herself in a fancy hat with flowers, and put to a Dolly Varden, looking for all the world like a prize beef dressed of a laddens. She will be so miscrable in those little hot bed-rooms, and so staffed up with ner tight dress that I can see the day when she will harry home, undo herself with a gasp of satisfaction, and expand with a grunt into Ber wonted amplitude of form. Her girl Mary will be glad, too, for she will have been on short rations too the pact fortnight, and can now return to the tit-bits that fall from her mistress' wed-served table.

- San Francisco has been startled by another suicide. A capitalist, where benevoience was boundless as his wealth, and whose scientific and artists takes were as refuned as his generous hospitality, has made a voluntary ext from the season puzzling life. One circumstance, however, connected with his death senus to be escaped attention. The pistol was found upon the bed, and to that has been extinued the death wound. We do not deny that it was the immediate cause if death, but what induced the act of firing it? A thousand conjectures have been extended to the constant of the pistol was found upon the state of the pistol was the immediate cause stated, but what induced the act of firing it? A thousand conjectures have been extended to the pistol was the pistol was the pistol which was the pistol was the pi started, but the cause of mental derangement is not far to seek. A copy of the 1s of was found at the unhappy gentleman scide! He had been ailing for some time, and the Alfa editorials fuished him. His fate reminds us of Demosthenes, who died by taking poison from a quill! From the quills of Mother Goose, he who there by tracing become with the desired the marcotic poison which stopped the measure the action of the brain, and so distorted life as to make death a refere and a book. Why does the church hesitate as to giving him Christian burial? Why does the jury doubt whether, at the moment of self-destruction, he were some or not: A sufficient cause of mental aberration hay beside him. Taken before breakfast, eye of those pouderous articles might well dispose him to eternal sleep. The mind per sufficient production are the mind per sufficient pouderous articles might well dispose him to eternal sleep. The mind per sufficient production are not sufficient to the product of the production of the product of the production of the p vaded by those dreary platine es would not only lose all power of calm reflection, but would doubt the real existence of the human intellect. The bullet did but hasten a work already commenced. The cause of death was Alta on the brain.

### Song of Steam,

[WRITTEN FOR THE "NEWS LETTER" BY JACOB PRICE.]

Clang! cling! clang! cling! For zee glow and anvi's ring:

Mid thronging ships. Her quivering sides
Pond'rous wheels with thund'rous sound Spurn the dark wave. In seeming wrath And fearful speed, swing madly round, And crash and roar and hiss and scream Swell my wild song - the song of steam. My fierce, hot breath puts forth its strength Long snake-like trains by me are harled In grimy, iron lunga; at length The clanking engine moves with life; Long shafts respond. The busy strife Shakes the vast factory; wall and beam Throb with my might, the might of steam.

My arm impels the roaring blast Into the glowing furnace; fast The most n iron, sparkling white With heat, leaps forth like liquid light Into the smoking sand; fit birth For forms of beauty, strength and worth. When man's highway shail be the sky.

How swift von crowded steamer glides She tramples white a snowy path Of undulating foam; 'tis steam Thrills her with life from keel to beam. From State to State across the world With speed of light. See how to A ong the mountains' dizzy side See how they glide And through green valleys; praries vast Scarce greet the gaze ere they fly past. And yet my crowning work remains, For swifter far than whirling trains The flying ship shall cleave the storm. A'ready its prophetic form Has soared aloft; the day draws nigh

Behold, then, pnny man, thy slave! I work thy will; yet must I have An iron armor staunch and strong And without blemish, lest my song Shall change to crashing thunder, when I seek my freedom once again.

- "I say, Bob, when is this devilish thing going to stop, this mining and stock "Stop" why, it has not commenced; it is not half begun; we have excitement stop with the commencer, it is not that regult, we have only open d a little game for servant girls, politations, and poor awyers, we are getting ready now some big 'my-outs' for the capitalists. First, we must take in the wheat crop, and soon as that we over we my a spread for Eastern capitalists, and then we shall just be in trim to do business with the European 'money bags.' The wheat crop, and soon us one so the sum of the European 'mone, bags,' said then we shall just be in trim to do business with the European 'mone, bags,' Stop' there cannot be any stop, from the Rocky Mountains to the Sierras; from Alaska down the chain of the Andes to Patagonia there are fessares of silver rock from the surface to the center. It is the Andr's kamp of the world. The marved of Sinbad the sailor are no where. The Missussippi bubble and Law's scheme are only surface indications of how crazy the world on become. Why, or, there is now the rive of carthquakes: the hato shake was an effort of the silver to get to the surface. The innerso theory of the earth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense; the context of the carth's interior is all nonsense. the earth is a solid silver ball, we shall strike it solid, sir, so of "Make 4 ver cheap," of course it will make silver cheap; cheap as did, "Use it for manifectaring purposes." Of course, use it for everything; dishes for the table, and posts, ernamental go'den fences, roofing material for first class houses, paying the present use at for everything where you now use from or stone. If San Francisco will only give us time we can furnish enough silver to build the New City Hall. The Jewesh bymagogne is going to have its empolas covered with silver plateat. Of course we will build a Southern Railroad. Stanford's idea of monopolizing On the second of with silver palace immegrant cars, overeind within ten years; we will bridge the bay with a solver bridge, piles of solver; the torredo worm cannot cat silver; a the of steamers to China and Jajan dany; a 4,000 ton vessel will go out every morning up balest of silver to India, bringing back Eastern fabrics; that's commerce teas, silks, dve stuffs, etc. Steamers to Australia, to the North, steamers merse leas, sias, diversings, etc. Seamers to Austrana, to the North, steamers everywhere. Stanfords road up the mountains will be used for poone exernsions to the mountain lakes; business will go over the lower levels; San Francisco will have four millions of people; Alamela County will be a bug country village; Marin County will be terraced to the tops of its hils; Tamalpais will be a heard grander. San Francisco will be crowded from Melgas wharf to San José; wharves said ships from Fort Point to the bridge at Ravenswood, all around Goat Island, all along the Contra Costa shore, all we require is silver and time. "How about goal!" Well, the fact is, there is more gold in California than there is solver in the balance of the world; plenty of gold, but we must run out the salver excitement. the backarde of the world; plenty of gold, but we must run out the server extrement first, and then we shall get up another and a greater agrication on our gold unner; silver will be worthless, undoubtedly, except for manufacturing purposes. "On the contraction of the contractio I reskon, will have to be used for money unless we go back to hides and tallow for a circulating needicm—can't tell, history repeats itself. No, you won't catch be, before the value drops out of gold and sincer; I shall get a homestead in the town, and a farm in the country. Wheat will always be wheat. Anybody is rich who has secured his board and clothes for life.

#### The Rails.

Most men know themselves imperfect in judgment and admit it to themselves however they may be averse to acknowledge it to the world. We do not claim perfection, but think that a residence of almost a quarter of a century in this city, coupled with no small or limited experience of the world, and observations of, and celuctions from its enterprise and necessities, have qualified us measurably or judging correctly of the wants, the interests, the capacities of San Francisco and the Stoke and of the best measurably account. the State, and of the best means of meeting the demands of its commerce and trade. To our mind there arises no doubt that it is to the city's best interest to encourage every enterprise calculated to bring capital for investment in this State. Our people appear united in support of the lines of steamers running to different ports of the vast Pacific Ocean, and think that generous subsidies in their encouragement are well and wisely hestowed. So of the action of Congress in its conagening for which wisely destower. So of the attain of the sentiment was not to criticize too closely the amount of encouragement given, but only to the point that it should be adequate to insure the speedy construction of the road. was adequate. We have the road. Of its untold and measureless benefits to the city and State and the world at large we do not propose here to speak. The company find, after an experience of some years, that the acquisition and use of Goat Island, as a partial terminus is a necessity to the convenient, economical and efficlient working of their great company. We say, let them have it. It is one of the necessities of commerce and trade. We deny that its occupancy for such purpose will at all operate against the interests of the city or State. On the contrary, the utilization of that island, which has lain ever since the acquisition of California. unimproved, useless, a barren, unsightly waste, of no use to Government, people or business of any kind, would prove a positive blessing to San Francisco, as has or inisiness of any kind, would prove a positive of feast boston, intrinsic to the property the improvement of the once waste peninsula of feast boston, intrinsic to the passes perity and convenience of the busy "Hub." We hope to live to see that now barren and unsightly lump of useless land converted into a productively improved. suburb of this city, teeming with busy men, alive with the activity of trade and suburt of this city, teeming with busy men, alive with the activity of trade and commerce, an immeasurable convenience to the business of the great overland and overceen lines of business, a permanent contributor to the well-established supremacy of the trade and prosperity of San Francisco. As for the 'fuse and feathers' 'about the assumed injury to this city in consequence of converting that desolate and useless island into a convenient appendage of the great overland railroad, it all appears as simply a ridiculous fanfaronade by men who may have proved themselves very successful merchants, but who lack very materially in the qualities which so toward constituting the statesman or the man of great enterprises. Now, all of this line and cry appears to us made in the interest of a few owners or lesses of some warehouses and a few others the owners or lessed or a few owners or lessees of some warehouses, and a few others, the owners of land on the proposed line of the road into the city, or near chough to its proposed terminas, to be materially affected in value by the location of a depot. It it were worth the powder—and it may be hereafter—it would not be difficult to demonstrate to the satisfaction of all that the location of a a drival-populated city is, as has been proved by much experience, an injury rather than a benefit to adjacent property and business. It would puzzle the wisest to show in what respect the location of the terminal docks of the lines of steamers at Jersey City and the termini of the railroads there, have injured the prosperity of New York or the business of its merchants and citizens generally. On the contrary, it and demonstrated that such location has proved a blessing to the great city. And the same laws of life and trade are as applicable here as there. But now the question arises, is one overland railroad sufficient for the business and trade between this arises, is one overland rainroan sufficient for the business and trade between this city and the great East, this city and the great nations of the almost limitless ocean lying spread out before us? It may, possibly, do for the present, but how about the future the days to come, when San Francisco is to be to the commerce of the future what the now dead cities of Asia, what Tyre, and Venice, Alexandria and Amsterdam were to the past? We say, no. This city has scarcely yet cutered upon the era of the great destiny which God, by location, by geographical, geological and agricultural supremacies has made inevitable. We want, because we had the accessible above. shall weed, more railroads—one, two, three—across the wide and lengthy millions of miles between us and the great East and South, upon the western rim of which we sit ready to take toll of the commerce of the world. Wherefore, out of the local disturbance which has created our Committees of "Seven" and of "One Hundred," and brought our good neighbors of St. Louis and Boston and the East generally to our city to confer with our own people, we augur another great step or stride in the march of progress, not of this city and the State, merely, but of our whole country, the influences of which shall be felt also throughout Europe, Asia and the islands of the sea—not only the fast-approaching present, but through the still more remote but advancing future. Wherefore: success attend every rational, home-twood librard effort made by our merchants, our tradesmen. every rational, none-tand inormic coort made by our merchands, our tradesmen, our people in full sympathy with our eastern visitors, to imaggarate and complete the new line that shall doubly unite us with the eastern world, and act matrially, like the poet's "one touch of feeling" which "makes the world skin." May the proposed (company be formed, the road constructed, all the capital possible be drawn hither and invested for the development of our resources, and for advancing all the great interests of man in esse and futuro.

The National Debt was reduced \$12,588,000 during the month of April. The present coin balance in the treasury is \$109,000,000.

## Irrigation.

The rains of December last were so copious as to raise high hopes that the farmers of the San Joaquin Valley would be able to redeem their losses incurred during the two preceding years of drought. The rains, however, fell so heavily that it was only on the lands that had been summer failowed that the early sown grain could be got in ; and certainly one half, if not more, of the area now under wheat is late sown. The absence of the later or spring rains, and the long continuouse of is late sown. The absence of the later or spring rains, and the long communes of the strong north winds have caused the ate sown grain to wither, and it is only the early sown that can be depended upon for a crop. If the canal system proposed for the west side of the San Joaquin Valley, from Tubere Lake to Antioch, had been in existence, every farmer on that side of the valley would have used the control of the valley would have used the following the same within the denning to save himself from rain. There made to scene his crop on which he depends to save hiniselt from rain. These of are few in this valley who have not had to horrow their seed in Time Theore the late sown grain will fail not only on the farmers, but also on those in San Francisco and Stockton, who have supplied the seed. This season has per supplied the seed. renorm that without water one agreement interest of the varyy cannot be permanently established on a profitable basts, and that water is as essential to these agreement countries possessing the greatest powers of production are those in which the yearly rainful is concentrated into a few months. Settled warm weather is the best for crops at every stage of their sprouting, growth and ripening. Crops grown during uncertain weather, as all unifricated crops must be, are as often injuried by rains or flood as by drought. Two things are essented to the development of the productive powers of and; First, settled weather, which are almost also choose not not not settled and the productive powers of and; First, settled weather, which are almost also control. Second, Irrigation, which must be controved by art. What is equivalent into make those central plants of childrenia, as far as possible, capable of heary cettled up by an indistributions agreed there has a goal before and in the childrenia of the control of the contro settled up by an industrions agricultural class, and independent of other districts for food, and to provide a net work of cheap communications. In securing a supply of water to the lands, we secure at the same times net work of the cheapost possible lines of transit. Railroads alone cannot succeed in prospering these plants, they must have the assistance afforded by water. If a railroad through the theoretical can create towns and draw wavey to its vicinds the population of it was previously established. established, it torture must a cannot with an un mated supply of wat I build up along its course towns and vinages. The Tulare Lake has an area of nearly seven hundred square miles, or a surface of about two thousand mil ion square yards of water, and three feet, or one yard in depth off this surface wou to be subsecure to cover over one million of acres with one feet in depth of water. One is it out of acres would represent a strip of land two handred miles in length by nearly right miles in breadth; and every year there is at least the above ment oned amount of water evaporated from the surface of Talare Lake, at the same time there is not more than six hundred thousand acres of irrigable land along the western slope of the San Joaquin Valley below Tulare Lake. If only one hundred and fifty mass of the San Joaquen variety below Tulare Lake. If only one hundren and fifty inter of canal were constructed expable of irregating lands along if two noises only in width, this would represent nearly two hundren thousand agree, which could be made to yield grain at the rate of twenty bushels to the agree, or a total of four miners of bushels, worth at the very least four indicates of dollars. A canal capable of distribution, the made to work a supply sufficient to arrigate this area. Such a canal would not cess as much as a rathroid them in the hearth of the a ratiroad through that length of the valley, and would make the lands very valua rainread through that learners with cheap, sow transitior than produce to tide water. We see day militens of docure invested in mines, and gas works, and yet how few tresceng capitalists there are who are willing to take hoad of so great and sure an enterprise as this.

If any one should wish to contemplate patient suffering he has only to look through the window of the building at the northwest corner of Sanssone street and Broadway, any morries, from ten o clock to twelve. He will there see some half dozon gentlemen, with a look of sattled melancholy on their faces, either gazing hopelessly into vacancy, or at one another, or else indeavoring to extract consolation out of an Easteen paper. These are the holders of wook, who have been securing the country and going into the highways and byways of California, been South and North, busing the Spring clip even on the sheeps back. The gentle sheepherd who has butherto been shorn by the buyers, now has his time, and finding that the market has come to him instead of his being forced to go to the market, his made a go den fleece of it this year. And so the unhappy buyers most daily in gloomy discontent. They can't unload. Eastern houses prefer Asstration wood, at equal prices, to California. Perhaps one of the mourners wit, say, "C get a telegram has incirch," "Is it so," is the answer, and a gream of hope pisses over their faces. At moon they wend their way slowly to the arbor in the rear of Frank's, and drown they are so to warm. Santa Cruz punch, whence they adjourn to a nook in the neighborhood of the Merchants' Exchange.

<sup>&</sup>quot;Swords into Plowshares."—All the Russian cannons large calibre, each worth, as come, \$1,000 have been sold and broken up for old iron at two cents per pound. The old pioneer steamship Panama is being broken up and her iron sold for \$50 per ton.

#### The Six Martins.

The slender poles uplifted high
The trembling wire for many a mile,
And over all broke tenderly
The gentle evening's parting smile.

How lightly moves each thoughtless bird, Unconscious of those words of fire! Its little bosom is not stirred With the agony of our desire.

Six martins sat upon the wire, And sunned their purple plumes. Beneath Their clasping feet, the words of fire Passed swift; the words of life and death.

Birds that sing, birds that wing ath Your courses over pleasant ways, Your life is but a little thing, th. And lightly waited are your days.

The maiden's hope, the lover's prayer,
The messages of cheer and peace,
The startling cry of blind despair,
That tells a cherished life must cease.

And yet you have your loves and fears, Your joyous moments and your pain. Like us, the measure of your years With golden sunshine mingles rain.

But happy man, or bird is he Who looks beyond with cheerful eyes— Shakes off the stormy drops with glee, And spreads the wings for sunny skies.

-H. Gillman .

Fanny asks a divorce; Judge Dwinelle declines on the ground that a man cannot get good and drunk except on alcoholic, vinous or mall fiquors. Fanny thought she had done well in marrying the Slavon, but she would have been "Weller" it she had remained single. This is an original joke, first perpetrated by Samiyel Weller, Jr., afterwards successfully reproduced at the expense of Governor Weller, of this State. We do not hesitate to drag the skeledro from the domestic close, nor to expose the secrets of the family fireside, in order to perpetuate a conundrum of this character. The inviolability and sacredness of the private life is all nonsense. The Town Crier is a married man, has a mother-in-law and a haby; we know all about it. Mst. Town Crier was an angel—Angelina was her name; the form was sylph-like (?); her mouth a rose-bud; her breath the perfume of violets; she lived on thistle down and dew; she called us at first "Towney, darling;" she hung over the gate to welcome as home when first married. We propagated and she bore fruit; with the baby came her mother. Like a thief in the night, the old gaid domiciled herself upon the establishment, and is there still. Angelina has grown fat; she eats corn-beef and cabbage, baked beans, and drinks beer (malt liquors are good for the baby). The dulect sweetness of her tones are not appreciable when she says, "Now, Town, don't wake the baby." She don't hang over the gate any more. The venerable female, the respected mother of Mrs. Town Orier, is a tyrant. She won't let us slam the door or spit upon the carpet, or can with a kink, or pick our teeth with a fork, nor smoke in the parlor, nor go out nights, nor keep a fast horse. She goes through our pockets for notes; she sends use for milk to a particular coat on Telegraph Hill. We don't like it. The baby is exceedingly diminutive, is crimson in color, smells bad and eries, except when it is suckled or sleeps. We were permitted to hold it but once, with right hand supporting the front and left hand the rear, when warm cu

A company of young gentlemen set out one bright Sunday morning to have a sail in the bay of San Francisco along the ocean beach to Tomales. Weary of the fresh breeze and the bright sun, full of sparkling wine and cold ham sandwiches, a game of cards was proposed, and all, save one, joined the game. One only was pious; drawing his Testament he sat himself upon the gunwale to peruse the sacred volume and meditate upon the wickedness of card playing on the Sabbath day. Every good little Sunday school boy can anticipate the catastrophe; bow the storm came up, breakers mountain high, how all were drowned except the good young man who read his Testament on the gunwale, and was saved by floating ashore upon the Testament. Alas! the good young man was knocked overboard by the boom, and now lies buried upon the Bolinas shore; a redwood board marks his resting-place, and its inscription warns all young men how much more dangerous it is to read the Testament than it is to play cards on Sunday.

# The St. Louis Railroad-" Heads I Win, Tails You Lose."

The opinion of the Committee of One Hundred as to what, in their opinion would be acceptable to the people of San Francisco, we do not think will meet with the warm indersement of the St Louis people. The Committee take a very one-sided view of the affeir, and their distancial proposition would lead people abroad to think that we hold the winning hand in San Francisco. In our mind this is a mistake, and the question an easy one for us to settle, as follows to wit:

Let us or any ze a company under the laws of "Casifornia," with a captel of
\$20,000,000, to build a road from this city to the Colorado. We are assured by engamers who are fully accurated with the route that such amount is ample to grade, ite, iron and balast the road. Let us agree to do this, and so state to the st. Lous Deceration. After this is done, let us lease the road upon meaning terms to the A. and P. Company, for say inner, once years; said inleage to be upon a sliding scale that will admit of the A. and P. Company realizing a sufficient income to state that will added of the A. and P. Company realizing a sufficient income to meet the interest upon our investment. It is unnecessary for us to say we will commence work immediately upon our end, for that is a foregone conclusion. The road should be consensed at once over the coast, me as surveyed by the A and P. Company, and completed without delay to the State line. Let the A and P. Company on up and run the road as fast as every twenty-five miles are completed, until the contrado fiver is reached. Let us raise all the funds we can of the required \$20,000 no lay previous cached, but us raise all the funds we can of the required \$20,000 no lay previous exclusive theory. Any surplus of finds so raised over the amount required to complete the have any developing of lemins or raised over the amount required to compacte the main line can be develod to side lems and extensions. Done the taste to St Lemins to what she chaff to, or how many miles of road she shall baild per gent. Thus people will study their own interest, and we have no fear that we will taste night colorade nater first. Let the A and P Company despose of their bonds and and it is still the study to be set the state of the study of rota with naving the interiors and r meet to reach their abuilty or faith, but rather offer ours, for any one much to know that the A, and P Company, joining bandwith the Central people, can terminate at Goal Island upon very good terms and without delay. When we reach the Colorado River et us agree to await there the Eastern connection, and while we are writing we can do a arge and remunerative business for S.n. Femersco, that may not be so large when the proposed connection is made. When the connection is made at the "Colorado," at us make a new lease with the A and P Company, and mercase the time from to to the years. Let as come to a fair and reasonable understanding with the gent emen now here, and that, too, without delay: have the papers s gned, sealed and indersed by a neeting of our citizens in mass, so that these gentlemen, who have left their homes and their business to visit us for our benefit, may return to their people and sat the ball rolling that well, in our estimation, join us with St. Lones by iron access in less than five years. We trust the Committee well change their minds and ideas so that our friends from St. Louis will in the end get some of the pie.

Though most reluctant to trouble our readers with our personal and peculiar concerns, and seasable that it is the hight of upper theme to do so, we cannot respect from from once more adverting to the concrevers which has been a give for the last footfood dash between ourselves and the Alla Corposition on the subject of the last footfood dash between ourselves and the Alla Corposition on the subject of non-clusion, we shall with our usual inspirituality, give a brief summary of the arguments of horizontal way to be subject of the arguments of horizontal control of the arguments of the booky who associated as the Alla, or in his notociate contempt for veracity, we have the control public to determine. By that we then are well that the warfur it is soldent cold in February to the state excess the Alla, with its panel that the warfur it is soldent cold in February to the state excess the arguments which are also the arguments which are also as a consumber in February. Salting Down the Profits.—We hear that one gentleman who has been lucky in stock operations has been wise and purchased a corner lot on Montgomery street for \$175,000, and paid down \$100,000 in cash.

# A Song for the Hot Winds.

Mrs. Harriet Miller Davidson, the authoress of the following verses, is a daughter of the celebrated Hugh Miller, author of "The Old Red Sandstone," etc.:

Oh for a breath o' the moorlands, A whiff o' the caller air, For the smell o' the flowerin' heather, My very heart is sair.

Oh for the sound o' the burnies
That whimples to the sea,
For the sight o' the browning bracken
On the hillside waving free.

Oh for the blue lochs cradled
In the arms o' mointains grey, | clouds
That smile as they shadow the drifting
A' the bonny summer day.

Oh for the tops o' mountains
White wi' eternal snaw,
For the mist that drift across the lift,
For the strong east winds that blaw.

I am sick o' the blazing sunshine That burns through the weary hours, O' gaudy birds singing never a sang, O' beautiful scentless flowers.

I wud gie a' their southern glory For a taste o' a gude saut wind' Wi' a road ower the bonny sea before, And a track o' foam behind.

Auld Scotland may be rugged, Her mountains stern and bare: But. oh, for a breath o' her moorlands, A whiff o' her caller air!

Adelaide, Australia, Jan. 13th, 1872.

-Harriet Miller Davidson.

# Eastern and Foreign Dottings

The troubles in Missouri continue, but the Governor has ordered troops to the scene, and is determined to restore order and bring the marderers to punishment. -Satisfactory arrangements have been made to transport the English mails via San Francisco to New Zealand and Australia.—Dispatches from Cincinnati say the adherents of Davis and Trambull are severally making a strong fight against cach other.—The Basque provinces in Spain have joined the insurgents. The pretender is unking proclamations. Serrano has commenced an active campaign. King Amadeus insists on commanding the Spanish forces in person. —The insurgents have been defeated with a loss of three hundred killed and wounded at Tagents have been defeated with a loss of three hundred killed and wounded at Tudela, in Navarre, Spain. — Brownsville, Texas, is filled with Mexican refugees on
account of the fighting going on across the border. — Concessions have been obtained, according to report, for a railroad from Gausymas, in Mexico, to Prescott,
in Arizona, to connect with the Texas Pacific, and it is said the capital is ready and
the work will commence early. — The Acting Secretary of the Treasury has directed the Assistant Treasurer at New York to buy \$2,000,000 of bonds each
Wednesday and sell \$2,000,000 gold each Thursday in May. — In the House, April
27th, Mr. Sargert introduced a bill amending the currency act so as only to require
cold banks west of the Rocky Mountains to redeem their circulation at mar in Sec gold banks west of the Rocky Mountains to redeem their circulation at par in San Francisco by an ageing designated by the Controller of the Currency — For Arderbilt has succeeded in getting a charter from the New York Legislature for the form tion of a company to build an underground railway in New York City. —Governor Hoffman of New York vetoed the New York charter April 20th and had his veto Homman of New York verocut the New York Charter April 20th and made not be usuationed by the House.—The London Fines congratulates the United States for proposing that neutrals shall not be held responsible for consequential damages, thus paying a way for the settlement of the difficulties beween England and Amerthus paying a way for the sectionent of the dimetries between Englind and America.—Forty-five prisoners were discharged at Salt Lake under the decision of the Supreme Court of the United States.—Twelve persons are believed to have been killed by the late cruption of Vesuvius and some twenty injured by the running lava. Several villages are almost entirely destroyed, the inhabitants escaping.—It is supposed at Washington that the congressional business will probably be finished by the 29th of May.—The plasterers of Chicago have struck for five dollars a day, and it is believed that in May all the trades in Chicago will strike for increased wages. — The cruption of Vesuvius is accompanied by fearful electrical and other wages.—The eruption of Vesuvius is accompanied by fearful electrical and other phenomena.—The new ocean steamship Adviatic has just made the trip from Queenstown to New York in eight days and a half.—Alfred Tennyson proposes to come to America to study Republican institutions.—A letter from Castelar explains the troubles in Spain and the cause of the recent outrages. The opponents of the Ministers were outraged by arrest and imprisonment. The polls were surrounded by the forces of the army and navy. Returns were faisified, and Republican majorities turned into minorities. It says that many Spaniards desire a Republic, and all object to a foreign dynasty.—It is ascertained from authentic sources that while the Government has not withdrawn, and will not withdraw the claims for consequential damages, it has been signified to Great Rivian that of claims for consequential damages, it has been signified to Great Britain that no money award is anticipated or desired, but simply a decision of the question prolved touching the duties and obligations of neutrals. ——Special disparches represeveral engagements in which the Carlists have been successful. It is also stated that deserves from the royal forces are very numerous. —The iron miners of the Basque Provinces of Spain have joined the insurrection, and mining is suspended. —The President has approved the bill repealing the duties on tea and coffee, to go into effect after July 1st.

# Great Reduction of Harbor Charges.

The Act of the Legislature authorizing the Board of Harbor Commissioners to

reduce or abolish the rates of dockage, whartage and tolls has passed, after the 1st day of May, 1872, the reduction will be in force, as follows:

after the 1st day of May, 1872, the reduction will be in force, as follows:

Dockage.—Vessels under 10 tons, 50 cents per day; the tons and under 25 tons.

Dockage.—Vessels under 10 tons, 50 cents per day; the tons and under 25 tons for 75 cents per day; 50 tons and under 50 tons, \$1 25 per day; 50 tons and under 75 tons, \$1 25 per day; 50 tons and under 75 tons, \$1 50 per day; 75 tons and under 100 tons, \$1 25 per day; 100 tons and under 25 tons, \$5 per day; 250 tons and under 250 tons, \$5 per day; 250 tons and under 250 tons, \$5 per day; 250 tons and under 700 tons, \$5 per day; 250 tons and under 400 tons, \$5 per day; 250 tons and under 600 tons, \$5 per day; 600 tons and under 500 tons, \$15 doper day; 500 tons and under 1,000 tons, \$15 doper day; 1,000 tons and under 1,000 tons, \$15 doper day; 1,000 tons and under 1,000 tons, \$15 doper day; 1,000 tons and under 1,000 tons, \$15 doper day; 1,000 tons and under 1,000 tons, \$15 doper day; 1,000 tons and under 1,000 tons, \$15 doper day; 1,000 tons and under 1,000 tons, \$25 per day; 1,000 tons and under 1,000 tons, \$25 per day; 1,000 tons and under 1,000 tons, \$25 per day; 1,000 tons and under 1,000 tons, \$25 per day; 1,000 tons and under 1,000 tons, \$25 per day; 1,000 tons and under 1,000 tons, \$25 per day; 1,000 tons and under 2,200 tons and under 2,000 tons and half rates of dockage

Tolls. Vehicles drawn by one or more animal's, 12% cents: loads, when in excess of two tons, 6% cents additional for each ton or part thereof, except transfour, potatoes and other vegetables, when in excess of two tons, 5 cents additional four, potatoes and other vegetables, when in excess of two tons, 5 cents additional

flour, potatives and other vegetables, when in excess of two tons, a coats-orbite and for each ton or part thereof. Loads of lumber, when hauled on the wharves, of 2,000 teet, or less, 125, cents; loads when in excess of 2,000 feet, or less, 125, cents; loads when in excess of 2,000 feet, or less additional 1,000 feet or part thereof; extra vehicles, 125, cents; cattle or horses for transportation, 5 cents each; sheep or hogs, 15, cents each; hand-catt, 5 cents each; when handed upon the whart and remaining for a period not exceeding one week, shall pay wharfage as follows: Wood, per cord, 125, cents; tumber per M feet, 10 cents; tone, from and general merchandise, per ton, 65, cents; bricks, per 1,000, 10 cents; cond, per ton, lucents, chapped from the wharfage at the each week, or fractional part thereof. Hay, when landed on any wharfage at the rate of 10 cents per ton, and the same rate for exery additional 24 hours or fractional part thereof. Lumber reschaped from the wharves into lighters or other vessels, chall pays cents per M feet. Lumber loaded it cents discharged from vessels lying in a slip or upon the water front, shall pay 5 cents the marger with two sets landed upon the wharf, and taken from the more in latters of other vessels, shall pay 6% cents per ton wharfage. All goods received or discharged by vessels bying alongside of the wharfage.

Charged by vessels bring anongene of the wharf, or in stips, from or incompacers or other vessels, shall pay 5 cents per ton wharfage.

RULES AND REGULATIONS. Dockage to commence upon a vessel making fast to the wharf, and to conclude when she hauls out, and to pay for each day or fractional part thereof. No allowance to be made for Sanday's, holidays, baleast days or rainy days. Vessels shall rig in jtb, flyeng-jib and spanker-bosons when required by the warfinger, and shall also haul or change berths, at their own expense, by his direction. No merchandise will be allowed to remain upon the charge an aidstrational parts and those only at the risks wharf over night without permission of the warfinger, and then only at the risk of the owner. All goods remaining on the wharf, after the owner or considere has been notified to remove the same, will be removed by the warringer at the expense been notified to remove the same, will be removed by the warringer at the expense of the owner. All goods, wares and merchandise shall be charged by weight or measurement, according to custom. Two thousand pounds shall constitute a ton, except coal, iron and stone. No load exceeding five tons shall be admitted on or off the wharves, except single packages. Parties holding portions of the water front under lease from the Board of State Harbor Commissioners, are obligated to charge and collect the above rates; and any person violating said rules shall for-

The great importance of this action of the Harbor Commissioners, and its effect upon trade and commerce will be best known by the fact that the rates, in all

instances, are thus reduced one half from the old standard.

Professor Bolander, from the Committee on Instruction, reported that the sularies of the several instructors of foreign languages in the University had been fixed as follows, for past services up to April 1st: Spanish instructor, \$50 per month: French, \$100; German, \$125; but that it now remained for the Board to fix the salaries for the future. (We should very much like to know by what rule of three the Regents of the University of California and Mr. Bolander class the salaries of the professors of languages, or why the tariff on pure Castilian should be one-thard less than that on the guttural Saxon. If it is based on positical grounds in order to catch the German vote, then it will be necessary to have an instructor of Celtic at a salary of \$250 a month, so that Paddy may have no reason to complain. Bolander cannot think that his native tongue is harder to learn than French, nor should one soor devil who drives parts of speech into dull heads be less paid than another performing the same thankless task.]

# Leaf Fall.

Fall—let them fall around;
Fall, on the reddening ground;
Fall, as we fall away from life's sere tree
Into the ocean of cternity.

Lost, swallowed up, and drowned.

Fall, though the sun is high,
And bright and blue the sky;
Yet every soughing wind its myriad sends,
Falling, still falling, as false-hearted friends
In our adversity.

Yet while they fall, still fall, A bonnier light than all, A bluer sheen than yon autumnal sky, Shines on me, as I feel thy love-lit eye Dispel my being's thrall.

We walk, those leaves above,
Thy soft voice, like the dove,
Low murmuring; or as when, the woods among,
On morn of Valentine, the wildbird's song
Whispers her mate of love.

So let them fall away,
Friends of the summer day—
False friends, who cannot bear affliction's test;
I know the love that liveth in thy breast
Will rever fall away.

Never! Not even when Beyond earth's narrow ken, Like dead leaves fluttering in the autumn-tide, We two have passed, our love shall still abide, Shall have grown perfect then.

-Tinsley's Mag

An informal meeting (all meetings are informal now-a-days) of the Committee of One Hundred and the St. Louis Delegation was held yesterday. It was intended that it should take place at Pacific Hill, but by some mistake the members found themselves in the California Theater, finally wandering into the Palace of Truth, where the meeting having been duly organized, R. B. Swain, wagging his beard, was compelled to deliver himself of the following discourse: "You infernal old humbugs from St. Louis, I address you as chairman of the chosen seven. You know as well as I do that I don't care a continental for your city any more than you care for ourse We only care for ourselves. There's Sneath who loves popularity, and would squeeze himself on to a committee on brimstone in the infernal regions if he might but draw up the report, and Woodward, who wants the Mission Bay terminus, and Doyle, with his eye on Ravenswood, and little Alf. Wheeler, who, Junius like, wrote a letter, whereof he is very proud—do you think they care for your flat, swampy town on the banks of the Missouri? Not a bit of it. We know that you checkled over the Goat Island grant and thought you saw benefit to yourselves in it. We know that you want to have a line to the Pacific so that you may do as Chicago has done, flood our market with cheap goods and undersell us to our own customers. We want to have your depot here so that our real estate may increase in value, and so we will offer to build a line all through our own State which we should have built whether your Texan probability had existed or not, and in return insist upon your building double the length and leaving the rest to Providence. Therefore it is that we encourage the Alfa to cease for a while its Goat Island Jeremiads, and pipe the note of welcome to you, our visitors. After all, Mr. Mayor and deputation, you are but a parcel of old fogues, and not in the least to compare with our functioning the host of welcome to you, our visitors. After all, Mr. Mayor and deputation, you are but a p

It must have been a highly edifying scene upon the night of the arrival of our St. Louis guests at the Occidental Hotel, to see the fat and unctious "Halli-lipiah Cox," all recking with smiles and oily with perspiration, embracing and kiesing the St. Louis, party as they reached the head of the stairs, seizing them and perpetrating his impudent familiarity before they could recover from the surprise of his masty embrace. One of the negro waiters should have scized this oleaginous Methodist by the slack of his trowsers, dropped him over the balustrade, and carried him into the street with the tongs. It reminds us of poor Thomson Campbell's story—"I only did it to try your faith, Glory Hallelujah."

BY MRS. HARRIS.

DEAR NEWS LETTER: From the werge of the Plutonian shore I drops you a line just to say an rewore. For I werry much fear as my circus is run Through life's wale of tears, as inflammation 'as begun And pimples 'as appeared all hover my corpus, Vich makes me to kick like a howean-bred porpolse, Vich makes me to kick like a howean-bred porpolse, Vich the cause were a sittin' permisconos on the grass At the fust of May Picnic on Vensday, wen alas! The day were that close Sal and me was both melted, And my coppers was that 'ot they was werry near smelted. Vich wunst more they did make me the wictim of an 'oax, A writin' me from a Masonic Lodge of Live Oaks In the followin' words, which did cause me to go In the 'eat and the dust to the 'orrible show; '"The Grand Washupfu! Horder of Masons do pray Mrs. 'Arris'a comp'ny at their Picnic May Day; Likeways Sayrah as vell, to play the part of Maid Marion, Prowided Mrs. 'Arris is sure she won't carry on The same rigs as last veck, as ave hinjured 'er crakter, Vich is werry 'ard to mend ven vunce there's a fractur. Mrs. 'Arris 'crself is to be the May Queen, And dance vith Robin 'Ood round the pole on the green.'' I accepted their hinvite and set out in a vaggon, Vich the driver were that drunk he forgot to put the drag on Ven goin' down 'ill, and the consekens vos I were pitched from my seat on the 'ead of the 'oss, Who, feelin' me kickin' my legs in the air, Turned 'is hoptics upon me vith a handible stare; And I should 'ave been killed, but the driver did stoop And 'auled me back to my seat by tuggin' at my 'oop. The following were the Hode wrote for me as May Queen, As pooty a bit of poetry as ever was seen:

ODE TO MBS. 'ARRIS AS THE MAY QUEEN. Vake up early, Sayrah sweet, Take the road to Alameda and you'l 'ave a glorious treat; For Vensday is of all this veck the gladdest 'appiest day, [the May! 'Cos you're to be Queen of the May, Mrs. 'Arris, you're to be Queen of Mind your vig is nicely powdered, and your skirt is not too long, 'Cos you'll 'ave to dance permiscious, and your ankles, vich is strong, 'Cos you'll 'ave to dance permiscious, and your ankles, vich is strong, 'Cos you're to be Queen of the May, Mrs. 'Arris, you're to be Queen of Vill he expected to kick up a power of grass and dust to-day, [the May! 'Cos you're to be Queen of the May, Mrs. 'Arris, you're to be Queen of You're to be Queen of the May, Mrs. 'Arris, you're to be Queen of the May, Mrs. 'Arris, you're to be Queen of the Sayrah, too, must be drest neatly, and shall bear 'er missus' crown, And 'er fingers put the faxins to your new vite muslin gown; Maidens, too, shall dance before you, and strew liltes in your vay, [May!' Cos you re to be Queen of the May, Mrs. 'Arris, you're to be Queen of the Ven the brass band's glorious music sends its hanthems to the sky, Green vill be the face of Natur', green vill be your spacious eye, And o'er 'ill and dale ten thousand wirgin woices loud shall say, All 'ale to the good Mrs. 'Arris! Give a cheer to the Queen of the May!

I will not describe vot you've read in the papers;
Sich an 'orrible crowd a cuttin' sich capers
I never did see; I felt queer in my 'ed,
And ven we got 'ome Sayrah put me to bed.
She did lancy 'twere the lemon I took in some punch,
Or may be the sassage I dewoured for my lunch,
But ven the next mornin' the pimples came out,
I voke 'er from sleep vith a kick and a shont,
And sent' er to the doctor who said 'twere a rash,
And demanded 'is fee, vich were five dollars cash,
Before sayin' another word, arter vich he shook is 'ed
And said as the small of my back must be bled
To reduce hinfiammation, and he give me a mixtur
To take every 'our vich I fear he's a fixtur
I'll never get rid of, 'is wisits is that many
'l's bill will redocce me to my werry last penny.
And says he, ''Mrs, 'Arris, the eruption's in the brain,
Through too much metyphisics, so don't do it again.
Brain gushing is 'olesome in moderate gushes,
But ven hover done the 'ole system it crushes,
By takin' witality out of the limbs

And puttin' if into poetry, likeways into hymns. As your med'kn! hadwiser I forbid you to write Any more wayside gushings until you are quite Rekivered from symptoms as is werry distressin'." To a yoman sich a viz 'rous constitushun possessin'."

So I send this 'ere' oping it finds you quite well,
As I probably shan't gush again for a spell,
'Cos the veather is 'other than ever was known
In this 'ere San Francisco, likeways forrid zone,
And the surgeon hardwises my goin' to Voshumity
And wearin' no clothes except moslin and dimity,
Likeways Turkish baths for to open the pores,
And an 'ost of perscriptions as will prove dreadful bores
All the summer if I takes 'em. So I'll try a wacation
And leave Sayrah with the clergyman to prepare for confirmation,
For I give 'er free choice vich church she liked best,
And she chose the Episcopai, 'for,' says she, "they're better drest,"
And I could not deny it. "Bishop Kip's 'ands is whiter,"
She added, 'than Alemany's, therefore he's righter
In doctrine, and ven a man lays is 'ands on my 'ed,
I prefers a vite 'and to vun that is red.'
'Vash your ands, make yon clean and be vite as the sky,''
And I leaves that young crittur to the care of Bishop Kip
And the clergy of the parish, who von't let 'er slip
Too far from the path as leads to salvation,
Through layin' on of 'ands vich they call confirmation.
And I'm told as the candidates is all werry nice
And entirely free from pomps, wanities and wice,
For they say as all Henerson's monstrels is a learnir'
The catechism for to save all their brandles from burnin'.
Likeways 'mong the hactors is some werry 'ligh names
Desirous of escapin' varm scorchins and finnes.
And some of 'em sings lond in church on a Sanday,

And the beauty of it is as the werry same notes
Can be serious or funny at the vish of the throats
As do sing them, and on Sundays they sing "Rock of Ages,"
But on veek days sich songs as ain't fit for your pages
As 'ave allus bin chaste since we both vent to school
In Hingiand hunder George the Third's greeshions rule.

### Demand for Labor.

At present there is great demand for labor in this city and throughout the State. We learn from Mr. Zehandelaar, preprictor of the California Labor Exchange, on Clay street, that ordiers for men are pouring in from the lumber and mining regions. Several hundred aborers are immediately wanted to work in the saw mills and other counties miners are in great demand. Wood choppers and milk men are eagerly sought for, as are realized hands for Oregon and California. Farm hands are beginning to find remunerative labor, and within a tew weeks, when having commences, they will be very eagerly demanded. In this city many contractors and steamship companies are fit need of men. The demand for women is no less pressing. Within the past two days orders have been received at the Exchange for sixty-three house servants for the city and country. In several instances the wages offered for good servants are very high, and in all cases, both for men and women, the terms offered are larger than in any other city of the United States. Where laborers have procured situations there have been no complaints about not being paid regularly as stipulated. It is very difficult to fill all the orders, through the obstinacy of men and women desirous of working in the city rather than in the country. Many of those applying for work demand exorbitant wages. After a while they come to their senses and accept what is just and reasonable. In the general sense the labor market is very active in every department, and any man or woman secking empowement and good wages can find both. Working people out of employment should avail themselves of the golden opportunity and make hay while the sun shines.

<sup>—</sup> Society loses one of its bright ornaments by the departure of Madame Cerruit, the wife of the Italian Consul to San Francisco. Madame Cerruit goes home with her children to her native land, having passed nearly eight years with us, during which time she has endeared herself to many, and not made a single enemy. We wish her Godspeed on her voyage. Her needy compatriots will much miss the kind hand ever ready to help and succor them.

# The Burial of the Kentucky Dead.

The following soul-stirring poem was written by Col. Theodore O'Hara, and was read in Frankfort, Kentucky, at the burial of Major Clay and Col. Hardin, two gal-lant Kentucky soldiers who fell in the war with Mexico. The four concluding lines lant Kentucky soldiers who fell in the war with Mexico. The introduction of the first verse of the poem have often been quoted, but very few, even of those of the poem have of the believe the poem has who make use of them, know from whence they come, never before been published on this coast:

Like the flerce northern hurricane

Our heroes felt the shock and left To meet them on the plain, And long the pitying sky hath wept

Above the gallant slain, Sons of the "dark and bloody ground,"

That sweeps the broad plateau Flushed with a triumph yet to gain, Came down the serried for

Ye must not slumber here, [sound

Where stranger steps and tongues re-Along the heedless air;

Shall be your fitter grave— She claims from War his richest spoil.

Your own proud land's heroic soil

The ashes of her brave. So 'neath their parent's turf they rest, Far from the gory field, Borne to a Spartan mother's breast

On many a bloody shield :

The hero's sepulchre.

The sunshine of their native sky
Smiles sadly on them here,
And kindred eyes and hearts watch by

Rest on, embalmed and sainted dead, Dear as the blood ye gave.

No impious footsteps here shall tread

The herbage of your grave; Nor shall your Glory be forgot,

The muffled drum's sad roll has beat

The soldier's last tattoo,
No more on Life's parade shall meet
That brave and fallen few;

On Fame's eternal camping ground Their silent tents are spread,

And Glory guards with solemn round The bivouac of the dead. No rumor of the foe's advance

Now swells upon the wind,

No troubled thought at midnight haunts Of loved one's left behind; No vision of the morrow's strife

The warrior's dream alarms, Nor braying horn nor screaming fife At dawn shall call to arms.

Their shivered swords are red with rust, Their plumed heads are bowed, Their haughty banner trailed in dust

Is now their martial shroud; And plenteous funeral tears have wash'd

The red stains from each brow And the proud forms by battle gashed Are free from anguish now.

The neighing troop, the flashing blade, The bugle's stirring blast, The charge, the dreadful cannonade,

The din and shout are past; Nor War's wild note nor Glory's peal

Shall thrill with fierce delight Those breasts that never more may feel The rapture of the fight.

While Fame her record keeps. Or Honor points the hallowed spot Where Valor proudly sleeps. You marble minstrel's voiceful stone

In deathless song shall tell, When many a vanished age hath flown, The story how ye fell.

Nor wreck nor change nor winter's blight,

Nor Time's remorseless doom,

Can dim one ray of holy light

That gilds your glorious tomb.

### Patriotism.

Whatever may be one's personal views respecting the German-French question. war, treaties and national animosities, it is scarcely possible that there can be in any generous minds any diversity of opinion respecting the sentiment of nationality which has produced the present successful Fair of our French fellow-citizens. A people comparatively limited in numbers, the majority not oversupplied with riches; many thousands of miles away from their native land; many of them many years away and never expecting again to tread the pleasant vales of sunny France, combine as by common impulse to help raise the onerous burthen improact upon the fatherland, and set it free again. Ornaments of the parior, bijouente of the cabine, decorations of the baddor have been brought forward by them, and have been laid upon the country state. ears of their ornaments and their delicate fingers of their gold and diamond decorations, and made them a national gift for the dear old land far away. A nation whose children thus love her may look hopefully to the future,

# Shall we Have Light or Darkness?

A raw and rabid Catholic priest has been creating a sensation by predicting that the Catholic Church would be the controlling power in the United States within the Catholic Church would be the controlling power in the United States within fifty years. He bases his prophesy upon the growth and power of the Church in this country during the past fifty years. As this mitraillense of bigoty has been fring his theological shot and shell into the enemy's camp from his stroughold in New York city, we have been at pains to discover what the Cathora inducence there has done to ment this prophetic paff. Our search presents the start mg fact that the sectorian power of Catholicism has had such a tremendous inducence upon the Legislature of the State of New York that during the years 1857, 68, 69, 70 and "It that body grained to Roman Catholic schools over a quarter of a moliton of dollars. For the five years mentioned the Legislature appropriated \$2,031,000 for dollars. For the five years mentioned the Legislature appropriated \$2,031,000 for the use of sectarian schools, charities or churches. In securing appropriations for the use of sectarian schools, charifies or churches. In securing appropriations for charities and churches, the Remish Church has had the floir's shar. All this money coming out of the common fund in the Treasury - a tax is vited upon the people at large—was principally applied to building up Catholicism in the city of New York. Our reading goes to prove that in Boston, Philadelphia, Cinemant, Chicago, San Francisco, and all the other great crises of the Republic, facts and figures are San Francisco, and all the other great cutes of the Republic, necessate neurons are of no less extraordinary character in regard to the influence and power of the Catholic Church in American politics. The ecclessastical representatives of the Historical Harlot, proudly claim that there are now 10,000,000 (atholics in the United States, or over one-fourth of the population. We will admit the estimate to be a correct one. This immense army of fanatics, inflamed by inflambally, is capable of destroying, and means to destroy, free thought in this country if we cancapacity description and the capacity of the c always meant, to overthrow, strangle and destroy Repub learnsm or Democracy. These is no are deadly enemies: they have never been reconciled, and never can be, Catho, cism meshs eternal darkness to the human mind, Republicanism, search Cathousism means eternal darkless to the format mind. Republicanism, search, after eternal light to the human mind, liberary to the human son. In this counter, which is the real "irrepressible conflict." the priestly detators know well what a tre mendion Jewer they have in their hands to carry out the Jesuretan plans. They win be castions but unsemptions in using the means to the end. The organization of the Catholic Church is, in fact, more powerful and despote than any meliant your analysis of the catholic Church is in fact, more powerful and despote than any meliant programment in the Church is a fact of the catholic Church is a fact more powerful and despote than any meliant programment. tary orgalization that ever existed. The enlistments in the Church are for 1 fs, and even the soul is condemned or assigned to Heaven, hell or pursuatory, according to the fance or dictation of the priesty diceator. Like Procustes, the savage robber who placed his captives on a courch, and, it too short, stretched them out, if too long, cut them off to fit it, these priests cut and manage the "unmortal soul" so at to fit it to beaven, pursuatory or hell. From the womb to the grave the priest never quits his grassy on has victim. Body and soul are mortgaged to the church. The terribie evils which arise from this monstrous reagious survery have been written over and over again. Among the most inequitous and inhuman were the torters and butcheries of the Inquisition. To read the brutalities of the Inquisition. To read the brutalities of the Inquisition of Fathers is to make the bood treeze in the voins, appear us with the enormaty of Fathers is to make the bood treeze in the veins, appair is with the circuit, of their crims, or arouse-us to cry out, Venesance upon the human fauls. The old adage that "History repeats itself," is fately true in regard to the consistance tyranny of catholicism. Should this tyranny ever gam a controlling power on the American Continent we will have stakes and tacks and tortures. The tiger does not change his nature, nor does the Historical Harlot her arising. It have any Protestant religious power able to cope with this gigantic power of Catholicism Protestant religious power able to cope with itse grantic power of Catholicann. Not one. Protestantism means disintegration, dissolution. It is already divided up into innumerable sects, each warring for massery against the other, while Catholican wars against all of them. Besides, the Protestantism of to day does not eatisfy the American heart. There are several militions of free tunkers in the United States who have failed out of the Protestant ranks, some of them open and bold advocates of free thought in its fullness, others are patiently waiting for something which will satisfy their cravings. This distinct ration of Protestantism will continue and the free-thinking element in the United States is strong enough to proclaim itself a power. Then will spring forth, as in all ages, a man for the constitute a mighty man to organize and direct, this mighty agency. I deas which proclaim used a power. Then will spring forth, as in all ages, a man for the occasion a mighty man to organize and direct this mighty agency. Holess which we dream not of now will be processized, and the hearts of the people, mellow which are for the seeds of the new ideas, will germinate and fructily them into hig. The coming man, in the cycle of the News Letter, will be the center and soul of all the religious and political systems which have ever existed. His soul will be the reservoir containing the universal thought of the past ages; whatevar is pure, noble and elevating in this past he will embody in the present. As thought controls the world, and as he will be the embodiment of all thought, it follows that the lidade he arreseastly must conneur. He voice will be use the entered to a victorial of the controls the world, and as he will be the embodiment of all thought, it follows that the tions the worst, and as the discussion of the matter of the matter of the matter of the matter of the matter. He will be as a tempest and a whirthwind to eweep over the heart of the nation. He will be the personation of a Confucing, a Budding, a Christ, a Mahozumed, and all the other heroic souls who have filed the a Buddha, a Christ, a Manomired, and all the other heroic souls who have held the world with their heroic acts. In a word, he will be "beautiful hero" of the Hindoo sages, who is to be the All of humanity. Between the power he represents, which is the soul of freedom, and Cuthonicism, which is the spirit of slavery, lies the true irrepressible conflict. We are being prepared for the war; yos, in the midst of our seith-haess, and our struggle for gain pleasure and pride, the hand of destiny is shaping and moiding us ready for action. We need have no fear for the future. The triumph of universal ideas, like the irrevocable law governing the privace is cartien. universe, is certain, immutable.

# The Central Pacific and Goat Island.

The Executive Committee of the One Hundred on May 8th sent a dispatch to General Grant, protesting with false statements and ubuse against he passage of the bill coding a portion of Goat I sland to the Central Pacific Railroad Company. The Eric Ring was formed to steal a great railroad. The Central Pacific to build road. The latter company has constructed within three years thirteen hundred miles of iron roads, and expended among us over fifty millions of dollars; it has kept in employment on an average 8,000 men, distributing nearly \$1,500,000 a month in running and building railroads, and this steadily for the last three years. It is against such a company that this abuse is burled by our Committee of One Hundred. Besides this, what benefits has the completion of the Central Pacific road not conferred upon California? Mr. Edward Curtis sums up very strongly the blessings our Pacific Railroad has brought us, as follows, in one of his brilliant and eloquent addresses:

What has the Central Pacific done, that some of the so-called leaders of either party should assail it now and strive to make of it the pivotal fact in California State politics! The mists of slander rising from the swamps of prejudice, would make the people believe that the Great Overland Road is a public enemy, instead of an invaluable public benefactor. Yet the facts are that the property controlled by the Central Pacific Railroad Company, is to-day paying nearly one-tenth of the entire taxes of the State—that it has raised the value of real estate along and near its lines more than \$30,000,000—and that it has brought into market millions of acres of agricultural, timber and mineral lands, that were worthless before its iron lines penetrated them.

The completion of this railway struck down at one blow the prices of about everything we imported from the East, on an average of 33 per cent., by creating competition between the Panama Steamers and the Railroad; which competition reduced freight charges very materially; and therefore the prices of all goods, ma-

terials and implements, we are obliged to get from the Atlantic side.

A few merchants and speculators who had large stocks on hand at the time this A few merchants and speculators who had large stocks on hand at the time this road was finished, may have suffered, because of this sudden reduction in values, but the farmers, mechanics, and in short all consumers, have been benefitted in every way by the Overland road. Before there was a Trans-Continental Railway, it took twenty-three days to make the journey to New York; now it is easily done in seven, and at a cost to each passenger of at least \$100 less than formerly. Taking 30,000 passengers, which is the lowest average number who, up to the year 1869, annually traveled by steamers to and from California, and counting the sixteen days time now saved by the railroad at two dollars per day, counting also the \$100 saved in expenses, and we have a net annual gain of \$4,960,000 to the traveling public, by

reason of the Pacific Railroad.

Nor is this all; twenty-five thousand persons have been induced to come here during the past year, to see our Yosemite, and other wonders, who never would have come had they been compelled to endure the hardships, loss of time, and inconveniences of an ocean voyage to get here. It is a low estimate to say that these extra visitors leave with us an average of \$250 each, for his or her personal expenses while in California, making \$6,250,000, added to the wealth of our State in one year from this source alone. So that the saving in expenses to Californians who travel Eastward and return, together with the money made from the extra influx of tourists and other visitors, amounts to more than \$11,000,000 per annum net gain to this State, because of the building of the Central Pacific road. At least \$3,000,000 more are saved to us in reduced freights. The great number of silver and gold mines, located in this State and Nevada, and owned by residents of California, that are now being successfully worked, but which would have remained untounled and useless, were it not that this railway runs near them, must add to our annur resources as much as \$6,000,000 nore. Putting the facts together and we have in round numbers, twenty million dollars saved to the people of California, as the fruits of one year's business with the Central Pacific Railroad.

Twenty million dollars-a sum larger than the value of our entire wheat crop for any year since California was a State. An amount seven times as great as the sum total of all the taxes collected by the State in the year 1870. The mighty fact of twenty million dollars now being annually saved, or made to the people of this commonwealth, ought not to render unpopular the corporation that has been the direct cause of all this material wealth.

The fact that notwithstanding the drouth -- that notwithstanding our gold product has fallen off two-thirds, that there is still more money in our banks and in the hands of the people, and to be had at lower rates of interest man at amoust and fore, is the best evidence of the savings wrought by the Pacific Railroad. So much currency and coin is brought and left by our Eastern visitors—and a trip to the Atlantic States now costs so much less than formerly, that the money retained in the states are account of these things, amount to a very large figure; large enough Atlantic States now costs so much less than formerly, that the money retained in this State on account of these things, amount to a very large figure; large enough to bridge ouvr two dry unproductive years; large enough to bridge over what would other timee have been with us very hard times. For all of these blessings which are showered upon us by every locomotive that crosses the Sierras the State has had to pay really not one dollar. The \$105,000 paid out of the Treasury for interest on railroad bonds guaranteed by the State, is more than counterbalanced by the state, is the context of the treasury every year.

As to the cry of "Monopoly," "monopoly," the Central Pacific has destroyed more monopolies ten to one than it has created. It has broken up the beef and meat monopoly, so long fastened upon San Francisco by thirping here moted thous meat monopoly as long fastened upon San Francisco by thirping here moted thous.

meat monopoly, so long fastened upon San Francisco by bringing here untold thou-

sands of cattle from the plains of Nevada and Texas. It has destroyed the lumber monopoty, by opening up the measureless timber lands of the Sierras—It has crushed the coal monopoly, by bringing here vast quantities from the Rocky Mountains, which can be transported 600 miles by railroad, and sold at lower rates than those formerly exacted by the Bellingtonn Bay, Mt. Diable or Australian Coal Companies. It has shattered, and in some instances utterly smashed the great land rings that have so long held away from the settlers much of the best soil in Cabrorrings that have so long held away from the settlers much of the best soi in Carfornia, by offering at low prices, and with easy payments, small or large tracts of good land in nearly all parts of the State, to actual settlers. Unlike the land grabbing speculators who get all they can and hold all they get, it is for the direct interest of a railroad owning land along its tract, to dispose of it as soon as possible, or even to give it away to settlers. For when it becomes improved possible, for even to give it flyay to servers. For when it decembes impryed and cultivated, the business of the railroad running near it is increased more than the original value of the land. Therefore no railroad sagaciously conducted can be a great land monopolist, it before in every manner to its interest to divide and cell its lands at the earliest possible moment. How atterly foolish and nonsenseal, then, is all this talk against railroad monopolies. Have I not shown that vast advantages, progress and wealth, have been promoted by the construction of the overland railways. Even now, when it is but in its infancy of usefulness, they are simply unmeasured and immeasurable.

Who more than the railway directors are interested in low taxation, good government, peace and order in society. Who more than they are interested in economy and reform, and in having who esome and wise legislation for every species of

omy and retorm, and in maxing wind-some and were regulation for every species of property and every class of individuals in our State.

In conclusion, let us in San Francisco remember that he who toils in the sand and under burning suns, as he prepares the way for the locomotive, to is for us. He who have down the mountain sides and runs the iron lines across precipites and over rivers, works for us. Every additional mile of railroad built in California, Teare not where, adds something to the wealth and business of San Francisco. It was said of old that all roads led to Rome. All roads built in California must eventually lead to San Francisco. There may be a half a dozen railroad centers in the interior, but they will all become but feeders to the great center of all - this metropolis. California was once the Robinson Crusoe of American States, standing here by the blue waves of the Pacific, separate and alone. To-day she is in ful. fellowship in the lamily of States. The Overland railway has made her one with her sisters east of the mountains—one in a common patriotism—one in a common interest-one as all the States are one in the Union

Interest—one as all the states are one in the thron.

But our work is not half done. In a stretch of 700 miles along the coast there is but one navigable river penetrating the interior from the ocean, making railroads more of a necessity to this State than to any other. All the fertile portions of California must be united together as only the locomotive can unite them. Then, and only then, will the Golden State achieve the prospersty and them. Then, and only then, will the cooled state achieve the prosperity and greatness that the God of Nature intended for this fair portion of the Pacinic Coast. California was once called a gant without bones. In spite of all the obstruc-tions narrow-minded politiciaes can throw to her way, I do believe she will ye

have plenty of bones to hold her grandly up, and they will be bones of iron.

A sentimental blue-stocking, signing herself "AUDACIA," addresses the Town (Pier a lengthy communication in praise of the Bohemian Club of this city, and with charmun' prierite, expresses the highest delight over the discovery that persons of the weaker sex are not excluded from membership therein. She thence proceeds to solace herself with the sweet conceit that this Club comprises within itself the creine de lu creine of the most intellectual, the most pullshed, brillant and original, the most free and unconventional, the highest-crested, the purest and the hest of our Athenian society; and straightway becomes exalted with the ravishing thought, at no distant date, of being translated into what the dear thing describes as the gay recess of Wission and Wit, wherein assemble the Grave's and the Mussis—and what not. And then "Audagia" half-expires in the contemplation of becoming herself one of the bright particular stars in this shining. Both tion of occoming nersen one of the origin particular stars in this saming bone-mian constellation, in which cluster all the taste, genine, knowledge and learning of all the ages; and all the poetry, song, sentiment, chivairy and romance, now ly-ing loose around Goat Island and this Railroad-haunted borough! Ever ready, as the Town Crier is, to go on foot an hundred miles to assuage the griefs of all gen-tlewomen languishing with the pains of expectation, and who desire to grope their way back to the regions of rationality, he sorely regrets, that beyond burnt frathers, he has no means at hand of ministering to the relief of "AUDACIA." He will, he has no means at hand of ministering to the relief of "AUDACIA." He will, however, at an early day endeavor to present for her edification, as well as that of the public, a fall report from a special correspondent, of the recent orgies -and eke, characteristic sketches—of the so-called San Francisco Bohemian Club, now holding, as it is said, its seances in the CAVE OF ADULLAM.

<sup>-</sup> An English gamekeeper has recently broken a black sow to hunt game in the woods, and she is said to run in the hunt with wonderful success. She will track game, buck and stand and point partridges, phensants, snipes, and rabbits as skillfully as a bred pointer. She bounds in response to a whistle and wags her head and squeals with delight on being shown a gun.

# An Old Letter.

I enclose you, dear Bob, an old letter

fetter. And when I was a bachelor gay! You'll perceive-'tis the queerest idea !-But do read, and believe, if you can! That there once was a time I could be a Yes! quite a-Romance of a Man!

THE LETTER. Darling Kate! do you know cousin Jack, But about this I ought to be dumb! He is quite a Romance of a man!

He does tell us such wonderful stories, Alas! Bob, all those days a All our back hair quite stands up on end! Long, long ago faded away! And his pictures of Indian glories Are much more than we can comprehend! For indeed-entre nous-his relations Are so strange, that we frequently can Only call them great-eraggerations! But he's such a Romance of a man!

Is for nets to catch salmon or plaice! He has brought such a silver tiara O he's kindness itself; mia cara, He is quite a Romance of a man!

Darling Kate! you must come to us quickly Of the times that are long gone away, We're so longing for you to be here! When my Kate wore no wedding rig We've such parties! so sweetly picnicly:

I am sure you'd enjoy them so, dear! There's that Captain McBosh, of the 7th, Such a quiz!—but the chief of his clan—And Sir George, who exclaims, "grathuth heaventh!"

When he hears our Romance of a man!

Cousin Jack is so longing to know you! But you don't, I remember it now. [dear! And I've got such a scheme I will show you Well, a fortnight ago he came back, dear, But we'll talk about this when you come. But has only a nice brunette tan—
So I'll meet you at Wyck with the carriage
And O Kate! he's the handsomest fellow! Tuesday morning: now nited and be there! END OF THE LETTER.

> Alas! Bob, all those days are departed. We may swear we are both broken-hearted But they will not believe what we say ! I may go-if I like-far away, Bob, Back again to our old Hindustan; May return here a liverless Nabob. But O! not a Romance of a man!

He has brought us the loveliest dresses! If I went, there is no one to sing me O such darlings! such exquisite lace! "Adiculove," or "All round my hat!"
And such muslin! Our muslin one guesses And they don't say "Remember and bring A cashmere" or something like that, [me But "Going? remember me, Jack, now. And such wonderful things from Japan! And pray send me a queer Chinese fan."

O he's kindness Itself; mia cara, I'm to send not to bring it them back now! No! I'm not a Romance of a man! - Fun.

- The following appeal has melted the wax in our ears: Most sympathetic of Town Criers-In my trouble I appeal to you, and insist upon your advice to me in my tribulation. I had a friend, friend of my youth, companion of my boyhood's days; together we attended school, and in fraternal sympathy we robbed orchards, tes's objective we attended green corn, hinted the com and 'possum of nights, ogether we attended college, smoked the tutor, and together engaged in althouse congenial deviltries that showed our hearts were bound in a common love. We grew to man's estate and married; our wives were childhood companions; they had played together in making baby-houses and make-believe keep company; they grew together like twin ears of corn upon the same stalk—like glowing pumpkins upon the same fruitful vine. Our families continued intimate; our wives were like sisters--ourselves the truest friends. No children were born to either hearth-tone: years passed, and everything was lovely. But now comes the trouble: My friend has a baby; of course we are indignant; we have a right to be: we would have nast analy, of course we are marginal, we have a right one, we with mace endured in silent patience, we would have hid our mortification, but alas! the conduct of our friends is absolutely insupportable. Did you ever see a hen with one chicken! Did you ever see a hen with one chicken! Did you ever observe the proud bearing of the rooster.' Heavens! you would think from the arrogant conduct of this, my ancient friend, that he had attained the proudest hight; that he had accomplished the most impossible of achievements. He actually patronizes me, and quotes the most dinensishle of achievements. He actually patronizes me, and quotes the most oflensive of proverbs: "A stern chase is a long chase;" "No lane so long but it has a turn;" "Perseverance will accomplish everything;" "Pick fint and try it again." "Don't give up the ship;" "Never too old to learn;" "Never too late to mend." Then he describes his baby in detail; its nose, its eyes, its hair; to-lay "notices," and next week it "holds things;" "I never cries;" it has a "wonderful head;" he wants to name it after me, and actually proposed to call it Charles Adolphus. Now, Mr. Town Crier, what can I do! I must not appear jealous; I have to look pleased; my wife has to go and see the baby, and call it a "sweet little thing," a "perfect love," a "darling little ange!" and all the time she is little thing," a "perfect love," a "darling little angel," and all the time she is pinching it to make it cry, and show ugly faces. Of course it must go through the croup, teething and bellyaches innumerable; it must have the whooping-cough and chicken-pox, the measles and scarlatina; it may die, but this won't mend matters much. It is just as bud to have a dead baby thrown in your tretch as it is to have a living infant thrust under your nose. The meanest thing about my friend lies in the fact of his assuming that though he has been fifteen years getting his first baby, he might have had it any time; to hear him talk, and see him shrug his shoulders, one would think that even doublets or triplets were on the dice, if he should throw for them. I wish you would write an article and prove that all sorts of animals have young; that it is no such great thing to do-flustrated by the ass and the goat—make babics ridiculous: in a word, Mr. T. C., do something for us, as we can't do anything for ourselves.

# The Central Pacific Railroad.

For a period of some three months past, our city of San Francisco has been in great excitement over the possible terminus of her railroad system at Goat Island, a point within our city borders, but distant something more than a mile from our commercial water front. The discussion of this question has produced more angry feeling than any other ever agitated in our city since the time of the Vigilance Committee. It has created real abarm in the minds of property owners lest as a result of obtaining the grant of this island by the Railroad Company there should grow of obtaining the grant of this island by the featroad company there should not particle point proposed inderests at variance with our commercial business, and a portion, at least, of our various industries be removed from their present location. We do not partake of this abarm, nor do we agree with those speculative agistators who, through the press and at public meetings, rival each other in vitage-rival abuse of Governor Stanford, and, as a means of exciting our people, pro laint be destruction of our city and its real estate values. In the first place, after careful Consideration of the question, we cannot convince ourselves that the acquisition of Goat Island would work any injury to the commerce or bus ness of the city Got distinctional work any injury to the commerce or his news in macros and our what resembler steam forty boats would constantly ply between the island and our whates, as they now do between the Company's piers and the cit. To bring the order has been considered and another it to the rocky list dwith such whether, piers and depots as would accommodate its business, would be in our opinion an advantage rather than a disadvantage. It is provided in the ball which has passed the Lower House of Congress, that the island is to be used only for rathroad purposes. This, if it means anything, declares that it is not the intention of the grantin, power to a low its occupation for commercial uses, so that as we interpret the bill and the intention of the grantees, Goat Island is sought for only as a convemence for coming directly by the shortest and best route to our city front. venence for coming directly by the shortest and best route to our city front. We have had the out-repeated assurances of Mr Stanford that he intends in good faith to make the city the substantial and real terminus of his road, and as San Francisco is his principal customer, and as it is clearly for his interest to work in harmony with our merchants, we cannot doubt the sincerity of his declarations. As evidence of the honesty of his intention, we substitute the following facts: He has purchased within our city limits eight hundred theasand downs, worth of lands, and contracted for three hundred thousand dollars worth more. These lands are in the immediate winity of says warres granted to him by the State for terminal purposes, a property of large value. He is now ars worth more. These ands are in the immediate withinly of said acres gashed to him by the state for terminal purposes, a property of large value. He is now engaged with hundreds of laborers and teams in grading his property and preparing it for use. He is now constructing an immense depot, some eight hundred feet in longth, and if it is not for handling the fall erroy of grain we are in guorance to wint purpose it is to be devoted. In the meantime the corporate owners of the Atlantic and Pacific Railroad owned in New York and Booton endeavoring to take advantage of the feeling here, come to us with a proposition to unite in the take advantage of the feeling here, come to us with a proposition to under in the construction of an independent read, and claim that the movement is stage-sted by the casy of St. Loons. The proposition is for the city and clinens of Sm Francisco to give \$20,000,000 to complete an independent through competing road from San Francisco to the Missussippi upon the line of the 35th parallel. The assumption that this is a St. Louis road is not an honest one, methor the city one the citizens of St. Louis own one dollar of the stock so far as we tree inference, nor do they prepose to take any. We hear it reported that \$11,000,000 of the stock is already preferred upon a road only 400 meters ong; that it is analytic delt; that its land grant is in absyance until the Indian tibe is evinguished. The reconstruct therefore for San Francisco to city by they millions of do lars for proposition, therefore, for San Francisco to give twenty milions of dodars for twenty milions of ordinary stock is inadmissable and will not and ought not to be er tertained. There is another and more reasonable proposition put forward by the Ex-cutive Committee of One Hundred, which is to incorporate under the laws of C. ifornia a local company, and with private and municipal aid to begin the building of the road from San Francisco to the Colorado. This is well. Such a road y ould open up a new part of our State; would bring us the trade of the South and A "zona, and while if would be a competing road securing a moderation of the fariff of freights aim passengers, it would not be a hostile and sixal road to the Castral Paesine. But either of these plans require years of time and midwine of money for their consummation; in the mentaline on business suffers and our city his under the blight of an unsetted poscy. It seems to us that it would be very much better to negotiate with covernor stanford upon the busis agreed upon between him and the Committee, composed of Messrs. Otis, Merris Sen Francisco would settle the whole very controllers, and bring not only one but air the trans-continent railroads to the city. Mr. Stanford's present net work of roads and his projected ones embrace the whole State; he brings the Central Parific to us direct; he reaches up to the Oregon line and brings down to us the North Pacific road from Puzet Sound; a ready he is stretching along the San Joaquin Yearth Pacine to difform Fugation a teach of the Colorado in time to bring over his line the At intic and Pacific cars; and extending his present system he will gather up and bung to us the 32d parallel road. So that with a asser expenditure of money we shad concenter at our water front all the roads of the continent and as a matter fe lowing this, the commerce of the ocean; all the steam lines of China, the North, the South coast and Australia, and the Islands, trans-shipping their freights within o: water line for transportation by rail across the continent. Separating ourselves from the interest of all, looking only to the future of San Francisco, its business and its prosperity, it seems clear to our minds that the best thing for our people to do is to negotiate with Governor Stanford and harmonize the interest of the city with his system of Railroads.

## Special Brevities.

The following is from the agony column in the London Times: "S. to C.: I leave this evening (Thursday), going through Holland and Germany, without interest in the prospect, however, the same dreary out-look everywhere, and as with a fish upon ashes, life seems but a mockery; besides, I miss those Sunday letters, my greatest consolation, the only Saint's wells in which there is any healing for the fever-thirst which besets me; might they be written and kept until my return in about a fortnight, the fact of which I will communicate by the same means." We should think with a good fish on the ashes-broiling on the coals life need hardly be a mockery, except the life of the fish, which we may consider already mortgaged. A Saint's well of Sunday letters, furnishing a specific cure for fever-thirst, would be invaluable to the quark doctors; the sale of it ought to beat that of Parr's Pills or Revalenta Gumarabica. We would give a trifle to know the whereabouts of the spring.

Their loose and sweeping garments of the day were exchanged for a dress still more convenient, the short and colored synthesis. They loosened their girdles, still waderned their heads with chaplets of roses or ivy—their very sandals were removed by an attendant, who offered them perfumed water as they took their places. Nine, the number of the Muses, was the utmost number of guests for one table, only three of whose sides were occupied by the inxurious couches, or lecti, covered with costly draperty, and iniald with ivery and 'tortoise shell, on which the men reclined during the repast; the fourth side was left vacant for the servants to place the tall trays containing the different courses, each course being changed at more, and no single dishes being brought in one by one, after the modern ridiculous fashion.

foreign trade, and makes a close connection, as cause and large promise of her foreign trade, and makes a close connection, as cause and effect, between the abolition of the head-money tax and the recent multiplication of the foreign steamers and their cargoes. In March there were seven steamers from Boston to Liverpool, five Cunarders and two of the Warren line. In April the number was the same, while in May eight are promised. The imports so far this year show a gain of fourteen per cent., while the exports are nearly doubled. The generous enterprise and the favorable facilities offered by the combination of the Boston and Albany railroad and the Cunard steamship line, and the bad management of the New York Custom House, are better reasons for this increase of business than the release of the head-money charge. But Boston forever delights in a peculiar notion, and if this one pleases her it certainly does not hurt anybody else.

— The island of Kunić, which is to be the future residence of the Communalists sentenced to simple transportation, was discovered by Cook, and called by him Pine Island, in 1774. It was taken possession of by France in 1853 in consequence of the massacre of the crew of the Alemène in 1851. The island, which lies about thirty miles southeast of New Caledonia, the main French Polynesian possession, enjoys a most luxuriant and salubrious ellmate. Cannibalism may be considered as extinct, owing to the exertions of the missionaries, who have also acclimatized large flocks of live stock so as to divert the carnivorous appetites of the natives. The families of the transported are allowed a passage and residence.

Out of the line of edibles there is scarcely any staples of commerce in which a rise of price affects the whole public so quickly and so much as iron. The astonishing advance in England within the last few months, owing to labor complications and a hungry export demand, and the corresponding advance in this country, are already coming home to the business and bosoms of us all. From the washerwoman's flatiron (which certainly comes near to our bosom) to the capitalist's railroad, all products of the mine are made to feel it. It is now announced that the manufacturers of sewing machines are contemplating an advance in retail prices. In England, wood is being substituted for iron in many products.

— A two-headed child, borne by the wife of an omnibus conductor living at Notting Hill, England, was buried recently. According to statements made by Dr. Muggeridge, of Norfolk terrace, Bayswater, and Dr. Merrywether, of the Colville road, the child or children were of the full period. The mother is doing well, and it seems that long before her confinement she satisfied her desire to see the "Two-headed Nightingale."

— The Hamburg American Company on the 30th ult, had a new steamer, named the Frisia, launched from the building yard of Messrs. Laird & Co., Greenock. She is intended for the New York mail service between Europe and America, and is of similar size and construction to their recent new steamers. The Company have also two other steamers building, to be named respectively the Pomerania and

the Franconia.

— We hear of an ingenious arrangement by which copies of messages sent by telegraph can be left at different stations along the line of transmission. By means of a rheostat at each station the current is divided, one portion passing coward by the wire, the other portion doing its work and passing to the earth. The telegraph employed belongs to the printing variety.

— An alligator, measuring fourteen feet five inches in length, was brought lately to the Rajah's landing place, surrounded by some two hundred natives. On examination, an arm was found in it, supposed to be part of the body of a Chinaman. Many human bones were also discovered in the creature, and an entire finger with two rings on it.—Straits Times.

### Court Chat.

Dishop Ridley, in a sermon at Westminster, urged him, before his Court, to comfort and relieve the poor. After the sermon, the King sent for Ridley, and in the great gallery at Westminster gave him a private interview, in-is-ting on the blad premaining covered. The royal boy, with much carnestness, for the appeal had touched his heart, requested Ridley to tell him how he could best perform the duty inculcated in the sermon. Ridley, surprised at the immediate appineing up of the good seed, could hardly recover himself to arge the King to beg the Lord Mayor and A dermen to consult on the subject. Edward, however, would not bet Ridley leave till the letter was signed and scaled, and given to the worthy bistoph of eliver to Sir Richard Dobbs, the Lord Mayor. The result of this letter was the founding of Christ's Hospital at the Grey Friars, for the education of poor and fatherless children, who were "to be trained up in the knowledge of God and some virtuous exercises, to the overthrow of beggary." For the idle and vicious poor, Bridewell Palace was turned into a prison, and for the sick poor the no-pita's of St. Thomas, in Southmark, and St. Rartholomow, in West Smithrield, were charitably founded. When the charter was drawn up the wise young King wrote, with his own hand, in the blank space the servicerers had lett for the amount of annual endowment. "four thousand marks by the year," and then said, in the hearing of all the Privy Council, "Lord, I yield Thee most hearty thanks that Thou hast given in his dust long to finish this work, to the glovy of Thy name." Not long after, this boy of Infinite promise deed. King Edward also left to the four great charities £000 yearly, from the property of the decayed hospital of the Savoy.

The marriage of the Marquis of Bute and the Hon. Gwendoline Howard, eldest daughter of Lord Howard of Glossop, took place on Tuesday morning, April 6th, at the Oratory at Brompton, and excited an unusual degree of interest amongst the nobility and aristocracy of Great Britain. The following will be read with pleasure by those of our readers who take an interest in the matter of bridal dress and costumess. The bride was attired in a dress of the richest white sain, covered with magnificent point à l'Aguille lace, and trimmed with wreaths of the finest orange Bossom. The corsage cut square, ornamented on one side with sprass of diamonds, and on the other a wreath and bouquet of orange blossoms, on her head a large tulle veil, enveloping the figure, over a wreath of the same chose flowers. The jewels worn by the bride were a fine necklace of forty-one single brideholding the stones of unusual size and luster, and a pair of ear-rings to match also two foresses of fine white mashin over white tailedtas made with small flounces up the back, edged with Valenciennes lace, a deep palsse across the front, and a very pretty tablier striped with Valenciennes insertion, lined with pink crôpe de chine, trimmed with Vienciennes lace, bonnets of white tulle, trimmed with pink crôpe de chine, trianged when the interest and any and rosebuds, with long tulle veils.

— Here is the account of the manner in which Elizabeth Woodville, born in a very high station, and afterward wife of Kinz Edward IV, was necessioned to spend an ordinary day: Rose at four o'clock and he'ped Catherine to milk the cows. Six o'clock, breakfasted; the buttock of beef too much booled, and the beer a little of the stalest. Seven, went to walk with the lady my mother in the contrayard. Ten, went to dinner. Eleven, rose from the table, the company all desirons of walking in the fields. Four, went to prayers. Six, fed the hogs and pountry. Seven, supper on the table. Nine o'clock, the company fast asleep.

— The sale of thirty cases of cigars from the ex-Emperor's stock took place at the Louvre on the 25th of April. The weed, directly imported from the Vadla abajo, is of the choicest kind, such as would scarcely be tound in the trade, having been chiefly intended for the guests at the Tuderies. Napoleon, during the last years, had become too unwell to enjoy a cigar to the end, and had taken to the use of cigarrettes on the advice of his physician.

A Saigon correspondent, writing under date of 18th February, says: Miss Longworth—Mrs. Yelverton—Countess of Avoumore is here now. She arrived in the Liezie and Rosa, gave a "friendly" reading at the house of Consu Caswell, and is to give a public one in the godown of a firm to-morrow night. She is going to Cambodia to interview the King. She even meditates a journey from thence to Bangkok.

The Emperor of Germany is the most abstemious of European monarchs. He takes every day but two small meals. After rising he takes a cup of coffee; at noon some roast beef and potatoes, with a glass of Bordeaux wines and at seven in the evening a supper, consisting of bread, sausage and a cup of tea. Persons invited to the Imperial table express their surprise at its extreme simplicity.

The Fifth Arenae Journal, of New York, dated March 23d last, publishes on its front page a well-executed likeness of Queen Victoria, "as an evidence of the estimation in which Her Majesty Queen Victoria is held by intelligent Americans, who have not only sympathized with her during her recent trial, but have never ceased to admire her wifely and motherly virtues."

The Queen graciously consented that models showing the original cutting of the Koh-enoor diamond, when first exhibited in 1831, and the subsequent recutting, shall be exhibited, through Messrs. Garrard, the Crown jewelers, in the London Exhibition of 1872.

# A Strange Story.

Some facts concerning Mrs. Byers, whose body was found floating in the bay a soort time ago, should not be withheld from the public. We are informed upon most trustworthy authority, that Mrs. Byers committed suicide by drowning because her priestly confessor threatened her with excommunication for having narried out of the pale of the church. It appears that this good woman, on her first marriage was unfortunate in the selection of a husband, and her married life was a most unhappy one. Her husband treated her with the greatest crueity, and she was finally compelled to procure a divorce. Her second marriage with Mr. Byers was a happy one, the ceremony, as we understand, having been performed by a Justice of the Peace. The Catholic Church does not recognize civil marriages, nor that the marriage contract can be entered into for a second time by a divorced woman who holds to the Catholic faith. The whole evidence in this case goes to show that Mr. and Mrs. Byers lived in the greatest harmony. The husband was devoted and faithful. He amply provided for himself, his wife and children, and there was not a happier family in the city of San Francisco. To destroy the peace of this family was a crime in the sight of man and the sight of God. That peace was destroyed, and we may well ask, Who was the Destroyer? Without doubt he was a Catholic Priest. The Confessor of Mrs. Byers sowed the seeds of religious dissension which took root in the brain of the unfortunate woman and dethroned her reason. The "secrets of the confessional," as between Mrs. Byers and her Confessional, as between Mrs. Byers and her Confessional, as between Mrs. Byers and her Confessional by a watery grave. The fear of excommunication and the tortures of heal were two ghosts haunting her mind. She endured these ghastly shadows until in a fit of insanity she took her own life. We know nothing about the Resurrection and Day of Judgment, but we do know that the facts being true the Priest in this case will be held by some as morally responsible. A more d

The Pacific Methodist wants a national revival of religion; it wants "the windows of heaven to be opened upon us, and the Holy Ghost to come down like showers upon the mown grass." Now, we like the idea except the showers upon the mown grass. We have been reading "What Horace Greeley Knows About Farming," and we are advised that showers during having time are not desirable, and that rain-storms spoil the hay and make it musty. We do not quite understand about the Holy Ghost jumping out of the window on the grass, but presume it is a sort of Methodist camp-meeting trick—like in the play of The Romance of a Poor Young Man, where the hero jumps out of a castle tower and is caught on a feather bed behind the scenes to break his fall. Why not let us get up a national revival? There have been Worlds' Fairs and Industrial Exhibitions held exercywhere. Mechanics' Institutes are good things, and agricultural gatherings with nice horse races. Boston is going to have a wise jublice. By all means there ought to be a national revival; an exhibition of the industry of religion would be profitable in bringing all the priests together, so that they might compare their various labor-saving machines, swop sermons, and compare notes how to get on without labor. Would it not be a beautiful sight to see all the soap-locks, black costs, white chokers, long-faces together, all the pious old maids and sanctimonious widows, all the Sunday School marms and lanky young men of the Christian Association? In addition to those, all the sinners would be there, else there would be no revival; all the young girls that haven't found Jesus; all the fast old gals that are drifting along the broad way to destruction; all the soiled doves on their way to Noah's Ark to be saved; all the nice ballet girls, with pretty legs, from the theaters; and all the melodeon girls, ready to sing hallelujah as soon as they were converted. We would go ourself, and the nice billet saintesses might fussle with us and see if they could not worry us into a change of he

— The French Assembly has just passed a masterly decree which will doubtless suffice for the further payment of the war indemnity. Not content with raising a tax on dogs, the Versailles legislators have extended it to cats, and henceforward every portiere will be compelled to hand three france every year to the Government for each head of the feline race in her possession. To complete the first law, it would be desirable that the Assembly should devote a second and complimentary one forbidding the execution of kittens at their birth.

# The Brook's Message.

Little brook, that glideth through the meadows, Rustling past the clumps of tufted reeds; Deep and quite 'neath the sider shadows, Swirling round the tangled water-weeds; Little brook, to me a happy passage In thy steadiast pressing towards the sea,

On thy constant waves a little message, Bear my love from me.

Seek him where those waves, grown slow and weary, Languish through the dull streets of the town; Where, instead of flowers, faces dreary.

Peer into the mirror stained and brown.
Tell him that beside the crystal fountains,
Where the shy bird dips and flies away,
In the purple shadows of the mountains,

Waiting him, I stay.
Tell him, little brook—but whisper lowly,
Lest the cossip breezes hear the tell—
That amid this mountain silence holy,

Quiet hearts may learn love's lesson well.
Tell him I am patient, though so lonely,
For the heavens reflect hope's sunny hue;

Tell him, brook, how some one loves him—only
Do not tell him who!

—Atlantic Monthly.

# Carbolized Hose.

As the war of hose is raging so fiercely, we thought it worth while to inquire into the merits of carbelized and meandedized hose, and then lay the facts before the public. Rubber hose is generally made by asternate layers of rubber and canvas; each layer of cloth is called a ply; a four-ply hose consists of four layers of cloth and six bayers of rubber. Rubber contains ingratients which very soon destroy all vegetable and animal matter with which it comes in contact. The cotton or linen ducking of which rubber hose is made is soon destroyed by the rubber, and the hose soon becomes uscless; sometimes even giving out in a few months. To prevent this decay of the cloth, resert has been had to carboic acid, which by its wonderful antiseptic properties, entirely preserves animal and vegetable matter from decay for one periods of time. Any one can try the tollowing experiment for his own satisfaction: Take a piece of common cotton cloth, saturate one-mail of it with carboic acid with carboic acid with exposure the tollowing experiment for his own satisfaction: Take a piece of common cotton cloth, saturate one-mail of it with carboic acid with carboic acid with the found to be decread, which his cost in the ground. By saturating the cotton ducking of which hose is made with carboicacid, it is protected against the cotton ducking of which hose is made with carboicacid has a new tollowing of the full has a much less degree of heat when carboicacid hose has a good record. The United gates Government poponted a special committe to investigate the merits of carboilized and uncarboicacid has protecting the goods from injury. We find that carboozed lose has a good record. The United gates Government poponted a special committe to investigate the merits of carboilized and uncarboicacid has a protecting the goods from injury. We find that carboozed lose has a good record. The United by the goods from injury. We find that carboozed hose has a good record. The United by the goods from injury we find that the goods from injury.

The Anti-Cruelty Society have been very busy in their efforts to protect roosters against each other. Certain he hens have been abusing each other, and these "small poato" Howards have dung themselves into the breach between the cockspirs. They seem determined to correct the mistakes of nature. They are now engaged in teaching her how she ought to have created chiesens. She should not have armed roosters with spirs. These philanthropic gentlemen seem determined to hang their fame high on the ponitry hooks of reform. Bantams are to be reformed, Shanghars taught the rudiments of Christianity and the Westminster Catechian. A new church is to be organized, the deacons and clergot which will be the present defenders of the chicken coops, and the communicants the gay-feathered struts of the poultry yard, who will be expected to present themselves regularly at the Society's altar each morning for worship and their rations of corn. There is to be no more rumpled feathers and bloody combs, but cock-a-doodle and Yankee-doodle are to inaugurate the reign of peace and poultry.

# New Books from A. Roman & Co.

An American Girl Abroad. By Adeline Trafton; published by Lee & Shepard, Boston.

This is a chatty personal narrative, told by a well-bred American woman, who goes to Europe with the desire and determination to be amused. She "does" England, France, Belgium, the Rhine and Switzerland thoroughly; sees some new sights and has original ideas about the same. Her pen pictures of some of the scenes are most perfect, and she has a bright, vivacious way of putting her impressions on paper that make a pleasant break in the monotony of stories of European trips.

Ballads of Good Deeds. By Henry Abbey; D. Appleton & Co., New York, publishers.

These poems have already appeared in print in the columns of Appleton's Journal, The Galaxy, the Old and New, Harper's Magazine, Chamber's Journal, and the Overland Monthly. They are published in Appleton's best style, on tinted paper, and handsomely bound.

PUBLIC PARLOR READINGS. Edited by Lewis B. Monroe; Lee & Shepard publishers, Boston.

This book is made up in the main of selections which have already proved entertaining to public audiences, and therefore deemed acceptable to literary and social circles. A few established favorites are included in this collection, but by far the largest part is made up of fresh and rare productions, not to be found in any other compilation. The selections are from all the modern poets and prose authors: Victor Hugo, T. B. Aldrich, Charles Reade, Dickens, Poe, Whittier, Jean Ingelow, etc.

THREE CENTURIES OF ENGLISH LITERATURE. By Charles Duke Yonge; D. Appleton & Co., New York, publishers.

Mr. Yonge, as Professor of Modern Literature in Queen's College, Belfast, speaks with authority, and gives us a most delightful work. And the pleasure in reading it is not lessened when we find that it has been written in the interest of culture and composition, and is filled with the choicest selections from the greatest. English authors from the Elizabethan era to the present day.

MABEL LEE. By the author of "Valerie Aylmer" and "Morton House." D. Appleton & Co., publishers.

All readers of this unknown author's first books will welcome with delight another novel from her fertile pen, equally charming as those which have already so firmly established her works in the hearts of American readers.

Also, received from A. Roman & Co.; "Christ in Modern Life;" by Rev. Stopford A. Brooks, Honorary Chaplain-in-Ordinary to the Queen, consisting of sermons preached in St. James's Chapel, London; D. Appleton & Co., publishers. "Good Man;" by author of "Credo;" L. L. Townsend, D. D., Professor in the School of Theology, Boston University; Lee & Shepard, Boston, publishers. "The Cranial Affinities of Man and the Apc," by Professor Rud Virchow, No. 2 of "Half Hour Recreations in Popular Science;" Lee & Shepard, Boston, publishers. "The Last of the Mohieans—A Narrative of 1757;" by J. Fennimore Cooper; illustrated by Darley; D. Appleton & Co., publishers, New York.

- —An editor in Victoria, Australia, says: "The people of this region have become so virtuous and well behaved that it is impossible for us to make an interesting daily paper. We hear that a ship load of convicts is on the way to our virtuous port, and we look for greater activity in our local news department as soon as its passengers shall get fairly ashore."
- Professor Brown has completed his bicycle, by which he can travel upon land or water. He will very shortly make a trip from London to Paris, coming by road from London to Dover, and from Dover to France by water. He will be accompanied by two steamers, in case of accident, and visitors will be allowed to go on board.
- The Jury of Admission for the exhibition of paintings now in preparation at the Palace of Industry, at Lyons, have rejected two pictures sent by M. Courbet. This refusal is addressed not so much to the artist, but to the Communist destroyer of the Vendome Column.
- A Boston school boy, aged fifteen years, committed suicide by taking laudanul sat week. He left a note stating that he was tired of living and that he was going to a better world, also expressing the opinion that he was insane. Poor but deserving Boston.
- Clear Creek County (Georgetown), Colorado voted \$200,000 in aid of the Denver, Georgetown and Utah Railroad, a new enterprise, intending to cross the mountains from Denver to Salt Lake, and under the patronage of the Kansas Pacific Road.
- A late Kansas Coroner hearing of a fellow who had made an unsuccessful attempt at hanging himself, called a jury together, and they, after a long deliberation, returned a verdict of "suicide in the second degree."

### The Presidential Aspirants.

A calm, dispassionate glance at the political situation will enable us to get clear and independent views of the prospects of Presidential aspirants. The English, no less than the American, press seems to take a deep interest in the hominating contest. Horace Greeley as the nominee of the Cincinnati Convention has aroused the most favorable and unfavorable indorsements. The London Times says that his nomination is farcical and his election hopeless, but that it kills Grant's chance for refeiection, and makes a Democratic nomination certain. The Indity Vias prasses Greeley, but doubts his fitness for the position of Chief Magistrate of a great Republic. The Post believes that Greeley will be successful if the nomination is indorsed by either of the other conventions to be held, but thinks that this is umjossible. The Post believes that Greeley will be successful if the nomination is indorsed by either of the other conventions to be held, but thinks that this is umjossible. The Telegraph says that the nomination directly concerns lingand, because he is hostile to the Telegraph says that the nomination directly concerns lingand, because he is hostile to the Telegraph says that the nomination directly concerns lingand, because he is hostile to the Telegraph and the Cincinnati tommercial, the tour leading and the Amorican seem to be on his side. The New York Tribum, Chreaze Telegraphican, and the Cincinnati tommercial, the tour leading and most powerful Republican, and the Cincinnati tommercial, the tour leading and most powerful Republican journals in the United States, advocate the causes of the philosopher. The Louisville Conriers Journal, Memphus Academela, Nashving Banner, and the United States, advocate the causes of the philosopher, and the United States, advocate the causes of the philosopher, and the United States, and the United States are successful to the cause of the Cincinnati moral contents of the Cincinnati pounds of the Cincinnati pounds of the Cincinnati pounds of the Cincinnation meeting the dange

# Frear Stone: Its Manufacture and Cost.

The mind of man is constantly active in developing from the boundless wealth of nature materials to enhance our comfort or fill some great want of the times. This sentiment came forcibly to our mind while examining some specimens of Frear stone a few days ago. The composition of this stone consists of ordinary beach sand mixed with a certain gummy chemical solution, which gives to it wonderful adhesive power and durability. The solution having been mixed, is compressed in molds of various size, according to required wants. The process by which this stone is manufactured makes it extremely economical for building power, and the market may be supplied at from fitly to seventy-the per eart. Cheaper than the stone taken from quarries. A block of iour-story buildings erected in Chicago with Frear stone cost only \$\frac{3}{3},000\$, while the lowest estimates made for common building stone figured as high as \$\frac{3}{3},000\$, while the lowest estimates the most intense heat was illustrated in the great Cheago fire, where it stood the test when even granite crumbled. For plain or ornamental work the Frear stone is unsurpassed. To all these facts the most reliable building experts testify. This stone will undoubtedly come into use here, and has been highly recommended to the New City Hall Commissioners, who will doubtless give it their favorabe indressment. The Frear Stone Company has established an office at No. 638 Market street. The officers of the company are the following well known business men: James Gamble, President: L. A. Rooth, Treasurer; N. W. Spaulding, George C. Potter and N. P. Perine, Executive Committee.

<sup>—</sup> Strauss, the celebrated composer, has accepted an invitation to assist at the World's Peace Jubilee in Boston, Massachusetts.

# Two Poems by the Late Thomas Moore.

[HITHERTO UNPUBLISHED.]

The following little poems of Moore have never been published. I am indebted for them to the kindness of a relative to whom they were addressed and given by the poet. The lady occupied a high social position, and was distinguished by her beauty and accomplishments; and though an object of Moore's admiration and gallantry, she was ever too circumspect to permit that admiration to pass the bounds of respect, or that gallantry to become presumptuous. Indeed, the incident with gave rise to the first poem shows the promptitude with which she repelled any advance for which a poetic license might, perhaps, have been successfully pleaded by one whose manners were so fascinating, and whose attentions were so gladly received by women, as were those of Moore. My friend lived to an advanced age, honored and respected. Her death has removed the prohibition imposed by her upon my publishing these poems during her life.

[One summer, while staying at a fashionable watering-place in the neighborhood of Dublin, Moore presented Mrs. — with a seal, having a device—two hearts touching, with the legend, "Qui touche l'un fait trembler l'autre." Upon reading the motto, the lady instandly returned the seal. Moore passionately flung it from the window at which they were seated into the sea beneath. A few days afterwards the seal was found on the strand by one of the bathing women and returned to the poet, who thereupon sent to the lady the following lines:]

The seal which she refused to keep I flung into the silent deep; But, cold as she, the smiling wave Returned, like her, the gift I gave.

Alas! my little seal, I find, In spite of all her soft professions, That water and Eliza's mind

Returned, like her, the gift I gave. Were formed alike to hold impressions.

The song which follows is very characteristic of the great Irish lyrist, both in style and sentiment. It has the easy flow and musical rhythm and cadence, as well as the happy power of illustration which so eminently mark all the songs of Moore.

Bright leaf, when storms thy bloom shall wither,
Oh, fly for calm and shelter hither;
And I will prize thy tints as truly
As when in spring they blossom newly.
Bright leaf, when storms thy blooms shall wither,
Oh, fly for calm and shelter hither.
Sweet maid, while hope and rapture cheer thee,
'Tis not for me to linger near thee;
But when joys fade and hope deceives thee,
When all that soothes and flatters leave thee—
Oh, then, how sweet in one forsaken,
Fresh hopes and joys again to waken.

— Cassell's Magazine.

### The Internationals.

A correspondence between the British and Spanish governments respecting the International Society has been laid before Parliament. Spain has declared the Society to be outside the pale of the Constitution, and will exert all its power to suppress this revolutionary organization. The Minister of State says that the existing social condition of mankind is menaced in its deepest foundations by the "Internationals," which flies in the face of the traditions of the civilized world and effaces God from the mind and the family. The Society, by declaring itself the enemy of every political school and imcompatible with existing forms of government, is a danger and a peril to the peace and welfare of nations. The atrocities of the Commune of Paris are attributed to the agencies of the Society. The diplomatic address of the Spanish Minister is vigorous and strong. It calls upon the British Government to aid in suppressing this secret revolutionary power. Earl Granville replies that by the existing laws of Great Britain all foreigners have the unrestricted right of entrance into and residence in the country, and are under the protection of the law, the equals of British subjects. In alleged violations of law, foreigners have the right to a public trial and can only be punished by evidence proving their guilt in open court. Granville's reply concludes as follows: "Her Majesty's government as a fragrant breach of the hospitality which those persons enjoy; but they do not think that any ground exists which would justify them on the present occasion in applying to the legislature for any extraordinary or further powers in reference to foreigners resident in England; and they have no reason to doubt that this opinion is shared both by the Parliament and the public of this country."

The United States navy costs the government upward of \$20,000,000 a year. This is worse than boarding a five-dollar mule at a livery stable at \$6 a week.

# The Gold Country of Ophir and Carl Manch's Latest

Dr. Petermann has just issued a lithographed circular, and headed as above, giving an interesting account of the discovery actually made by the now famous German explorer, Carl Manch, of the remains of one of the ancient cives which for many years past have been reported to exist in the interior of Southern Africa, at no great distance from the east coast. This important intelligence is conveyed in a letter from that traveler, dated September 13th, 1871, and written at Zimbarbe, in a letter from that traveler, dated September 13th, 1871, and written at Zimbarbe, in 20 deg. 14 min. S lat., and 31 deg. 48 min. E leng. - under 200 geographoeal miles due west of the port of Sofala, and little more than 100 miles north of the River Limpope. Here Herr Manch has found the ruins of buildings with waits 30 feet high, 15 feet thick, and 450 across, a tower, and other crections formed exclusively of hewn granite, without mortar, and with ornaments which seem to show that they are neither Portaguese nor Arabian, but are of much greater autquity, not improbably of the age of the Pheenicians, or Tryians and King Solomon. Br. Petermann is inclined to the opinion, very prevalent among scholars, that here in Southeastern Africa is the Land of Opinir of the Hible, whence the Terro-Israeliush "mavy of Tarshish" of Kings H'ram and Solomon "came once in these years, bringing gold and silver, vory and apies, and peacocks" of Kings, x 282. On this archivological question it will be sufficient to remark that, even admitting that Herr Manch has now and on former occasions actually discovered the regions which produced the "gold of Opin;" it does not at all follow that precious metal was the natural production of the country whence it derived the appelation by which if a known in history, and may formerly have been known in the markets of the world.

# Consciousness in Decapitated Heads.

We learn from a contemporary that M. Heindrich, the headsman of Paris, and, indeed, lately of France, is dead, having discharged the duties of his office for no less than 34 years. During this period 139 criminals had passed through less hands. He was once asked by a visitor whether he thought the separated head continued to live after it had rolled into the basket. He pendered a few minutes, as it to coffeet his memory, and then related instances which went to support an affirmative answer. Among them he said that on one occasion a woman's head made a faint effort to spit at him; and he spoke of volent contortions occurring in the muscles of Orsin's face. Similar contractions were observed to occur in Quacon Mary's face after decapitation. But, surely, none of these movements can be regarded in any other light than as of the nature of reflex actions. The stimutes is, modoubt, the sudden loss of blood, which here, as elsewhere, induces convolvious, and we altogether repudate the idea that counsciousness is preserved even for a moment in the decapitated head. The mere blow must stan, and before recovery ore are the flow of blood from so many large vessels must be sufficient to occasion perfect unseriousness. M. Heindrich appears to have been a man of some cultivation, or, at least, to have had some interest in his calling, as he attended Velpaca's befores in order to acquire a knowledge of the exact position of the most ciril. He seek made various improvements in the construction of the instrument with which he operated. —Lancet.

# How to See Under Water.

A correspondent says: "The Indiana of North America do this by cutting a hole through the ice, and then covering or hanging a blanket in such a manner as to darken or exclude the direct rays of the sun, when they are enabled to see into the water, and discover fish at any reasonable depth. Let any one who is anxious to prove this place himself under the blanket, and he will be astonished when he beholds with what breliancy everything in the fluid world is lighted up. I once had occasion to examine the bottom of a mill-pend, for which I constructed a don't not of inch plank sufficient to bnoy me up; through the center of this float I cut a hole, and placed a blanket over it, when I was enabled to discover objects on the bottom, and several lost tools were discovered and picked up. I am satisfied that, where water is sufficiently clear, this latter plan could be successivily used for searching for lost bodies and articles. I would now suggest that this experiment be tried on the sea; for I am satisfied that with a craft like the circuit Eastern, where an observatory could be placed at the bottom, with sufficient darkness, by the aid of glasses we could gaze down into the depths of the sea, the same as we can survey the starry heavens at midnight."

<sup>—</sup> The Japanese girls have elected to stay at Georgetown, D. C., and be educated there. Ryo, the elder girl, seems to be of the right sort. Some one told her that she had a right to have jewels, sliks and laces at the government's expense, if she wished; but she replied that she did not want them—all she wanted was a good education.

### Sonnat.

[COMPOSED ON A MARCH MORNING IN THE WOOD.]

The winds are loud and trumpet-clear to-day; They seem to sound an onset, half in ire, Half in the sadness of forlorn desire To force Spring's fairy vanguard to delay;
For here, methinks, worn Winter stands at bay—
Yet stands how vainly!—spring-time's subtlest fire Melts his cold heart to nothingness, while nigher Draw April hosts, and rearward powers of May-All maiden verdures, concords of sweet air,
Stealing as dawn steals gently on the world;
Breezes, balm-laden, blown from mystic seas, With armies of blush-roses, dew-impearled-Till Earth, reclaimed from Winter's grim despair, Blooms as once bloomed the weird Hesperides.

-P. H. Hayne.

# Increase in Wealth and Immigration.

Increase in Wealth and Immigration.

During the year 1871 there came into the United States from foreign countries, 346,938 immigrants—or nearly 1,000 per day. In the same time the United States exported, to pay balances against us in trade, \$65,682,342 in specie, and there was imported \$17,399,415 in bullion, leaving a specie balance of \$48,829,297 against us for the year. This is in great part made up to the country by the specie brought by the 346,938 immigrants. It is believed they averaged \$100 cach—some much less, but a large number brought much greater amounts. At the low average of \$100 each these immigrants would have brought into the United States \$34,693,800. Deducting this from the balance of \$18,282,287, above given us, we shall have a net specie loss for the year 1871 were probably not less than \$70,000,000. Raymond's mining statistics estimated our mineral yield for 1869 at \$61,500,000, and gave these fluures for 1870. California, \$25,500,000; Montana, \$9,100,000; Idaha, \$6,000,000; Utah, \$1,300,000; Wyoming, \$100,000; Orceon and Washington, \$3,000,000; Other sources, \$525,000; Total, \$66,000,000. To this amount for the year 1871, there will have to be added nearly \$3,000,000 for Utah, and not less than a million or two for Nevada. So that our mineral yield for that year is stated very low at \$70,000,000. And from all the above statistics it would appear that in spite of our heavy specie exports in 1871 we have received from the mines, from immigration and bullion imexports in 1871 we have received from the mines, from immigration and bullion imports, \$55,410,875 in gold and silver more than we paid out to foreign countries. Our trade—imports and exports, specie included—aggregated \$1,3743,675 in 1871. The imports were \$103,078,992 greater than in 1870, and the exports \$57,575 in 1871. The commercial increase for the year in foreign commerce is represented by these figures. They aggregate \$160,379,080. But while American tonnage increased but 200,000 tons, the foreign tonnage engaged in carrying this trade increased 1,000,000 tons! The growth of our domestic trade has been much greater, though we are not in possession of the exact figures. - Sacramento Union.

# The Needle.

Between the years 1657 and 1662 the needle at London pointed due north. After this it began to shift slowly to the westward until 1815, when it pointed nearly 24% degrees away from the north. It is now on its way back to the north, which it will reach in the course of the next century, after which it will begin to point eastward of north. Besides this, there are daily changes of this variation, and other changes of norm. Besides this, there are daily changes of his variation, and other changes due to different periods of the year, which seriously complicate all the efforts at explanation of this mystery. "True as the needle to the pole" was, I believe, Dibdin's description of the salior's fidelity to his mistress. Did he write this satirically or seriously? Was he acquainted with the above-stated inconsistencies, and was he also aware that there are two magnetic poles in the northern hemisphere, and, probably, two more in the south? Some of our literary correspondents may possibly be able to answer these queries.

# Schiedam Schnapps.

In these days, when alcoholic liquors are so largely consumed, and consumers are so much in doubt whether their systems are not being gradually impaired by adulteration, it is well that one, at least/of the popular beverages of the period is reliable as pure—that is Udolpho Woife's Aromatic Schiedam Schnapps. It differs from other Holland gin, the produce of jumiper communis, the schnapps being made from the Italian jumiper, which gives a tiner aromatic liquor. If it is necessary in the interests of the public to denounce the too common practice of manufacturing noxious compounds as wines and spirits, it seems only just to point to this meritorious exception.—S. M. Herald., Jan. 21, 1871.

PLATT & NEWTON, Sole Agents for the Pacific Coast.

### To Agnes.

These lines originally appeared in the S. F. News Letter about a year ago:
At 'Frisco, on the ocean's briny shore.

But with a giant hand I'll plu

With a fragile reed I wrote Upon the sand and stones—

"Agnes, I love thee!"
The mad waves rolled by and blotted out
The fair impression,

Frail walking-stick! cruel wave! treacherous sand!

I'll trust ye no more;

But with a giant hand I'll pluck
From Norway's frozen shore
Her tallest pine, and dip its top
Into the crater of Vesuvius,
And on the high and burnished
I'll write—
[heavens

"Agnes, I love thee!"
And I would like to see
Any wave wash that out!

### Work for the Soldiers.

Mexican bandits, robbers, cut-throats and assassins threaten a raid from Sonora against the American settlers of Arizona. As adies, the bandits are to be reinforced by the tender and loving Apaches, whose greatest delight consists in sealping white men and brutally outraging white women. While the pastames of Mexicans and Apaches are being indused in the Government is nursing with a genual solicitude hundreds of brave soldiers and gallant officers on Anger and Aleatraz islands, at the Presido and Black Point, at the leading hotels in this city and other military headquarters here and elsewhere. There are probably no less than 10,000 soldiers scattered about the United States doing garrison and hotel duty, who, in their hearts, have a contempt for the matrixe life they lead. Would it not be a wise and just movement on the part of the Secretary of War to withdraw, say 5,000 of the choicest of these toops and throw them into Arizona? We dwell in peace with one another in Canfornia, the lions and lambs, and even the "buils" and "bears" hold peaceful relations, so that as far as this State is concerned it could furnish a full quota of boys in bine to march to the front immediately. The hardy and brive settlers in Arizona have stood the breast of the buttle long enough, and it is high time that the bloody Apaches, and no less sanguinary Mexicans should be soundly ashed into submassion. The Peace Commissioners have done all the talking and to no purpose. The sword seems to be the only means left to subdue the bandits and assassins, and our troops know how to wield that weapon successfully. Let them have work and "let us have peace"—in Arizona.

### Australian Items.

A splendid find of quicksilver has been made twenty miles from Brisbane. The Long Tunnel Company's claim, Walhalia, Gipps Land (Victoriae, crushed during January 1,217 tons of stone, which yielded 2,592 ounces of gold. A crushing of 388 tons of stone from No. 1 shart, Smithheld, Gympie Queenslands, has yielded 2,000 ounces of gold. The imports of South Australia for the quarter enderlists December amounted in value to £589,000, and the exports for the same period to £1,400,000. The shipments of wool from Victoria for the season says the \$1.599,8, of February 15th amount to 181,600 bales; Bd,500 to England, and 17,100 to America. One thousand three hundred and eighty-one tons of wheat and flour were brought to Melbourne in one week lately by railroad atone. It is said in Melbourne that they shilling gold pieces will be coined at the Victorian must, which was to commence operations in April. Pieuro-Pieumonia has broken out frequently ately in dargues has suppressed the disease. The Victorian Government propose to spand £50,000 or £100,000 in the erection of a vice-regal palace on the south side of the Yarra. During the last five months of 1871, the Riverne Meal-Preserving Company (Victoria Killed 3), 748 sheep and 219 cattle. A Sydney telegran bearing defection of the grant of the part of the pa

### Wanted -- A Cook.

Extraordinary advertisements have reached a climax. After the following in the London Times, the force of eccentricity in this direction can "no further go." "Required, by a gent, near to Bromley, in Kent, A cook, on plain cooking plainly intent. She need not make entremets, sances, or jelhes, That cause indigestion and irritate be-lies: Enough, if she's able to serve up a dinner That won't make her master a dyspeptic grinner. If asked to bake broad, no excuse she must utter, thus the able to clumn, and to make melted butter. If these she can do -cke, boil a potato, And cook we'l a chop with a sance call'd tomato, The writer won't care to apply further test That she's ap to her work, and knows all the rest. She must be honest, industrious, sober, and clean, Neat in her garb, not a highly dressed queen; And must be content, whatever her age is, With sugar and tea, and £20 wages. Address," etc.

# Goat Island -- What Shall we Do with It? -- Able Argument of Edward Curtis.

The News Letter a few weeks ago published a few extracts from Mr. Curtis' argument in favor of leasing a portion of Goat Island to the Railroad Company. These extracts attracted universal attention at the time, and in compliance with many reexercise address of "more of it," we publish in this issue his address in "it." No more complete and exhaustive review of the great Goat Island question has ever been given than the following. Mr. Curtis said:

"Before this island could be made suitable and put in proper condition for the purposes of a railroad terminus, at least (\$3,000,000) three million dollars would have pur possess of a fundate themes, at least (85,000,000 in three minor domain word) to be expended thereon for grading and filling in alone. Not less than two million more would be expended in constructing piers, causeways or bridges, builties whereves and docks, and in the execution of basins. Nucrenths of this large whatves into the careful and the careful and the careful and the laboring men, artisans and mechanics of San Francisco and the surrounding country, thousands of whom would find employment and support for years to come, upon and around this island in case the Railroad Company are permitted to occupy the same for countercial purposes. I am credibly informed that the opposition to the bill before Company are companied to the control of the companies of the control of the companies. can purposes. I am creatisy morning that the opposition with introduced gress, on the part of San Francisco, comes in part from certain capitalists cent. per cent. fellows down there—men whose whole ambition in life has been to save the Almighty dollar to-day that they may let it out at compound interest to-morrow. The harder the times and the less chances afforded for poor men to get work, the greater their profits and usurous extortions. Whereas, on the other hand, many mechanics and laboring men of the city favor the bill now before Congress in relation to Goat Island, as it is for their positive interest so to do. Another class oppose it also. I allude to those eminently respectable but slow members of societypose it also. I added to those commentity respectable but slow members of society—men who at an early day acquired a piece of sand in that narrow needs of land that has since become the great city of San Francisco, and not having enough enterprise to sell it have become rich in spite of themselves, become wealthy by what other people have done around and over them. They never produced anything themselves, and never will. They are naturally afraid of any change, and now, of course, they are all shaking with fear or rage, from their morbid expectations that Goat Island, when it shall become improved, is going by some miraculous process to ruin them. Such cowardly motives as these have assisted in sending emmissaries to Sacramento and Washington to lobby against the proposed transfer.

Should the United States Government allow the railroad the use of this island, the work of leveling and filling in the shoals around it would be immediately com-Some idea of such an undertaking can be formed from the statement that 20,000,000 cubic yards of rock and sund and other material would have to be removed before this island would become of any value as a railroad terminus. For years to come, it must literally swarm with busy life requiring a vast outlay of capital, if this spot is to be made a place of commercial importance. What practical difference does it make to San Francisco whether a certain number of men are theil difference does it make to san transisco whether a ceram number of menare employed in building docks, wharves and warehouses, or in handling freight Goat Island or Mission Bay? It will take as many men to do the business in one place as in the other, and will, consequently, give employment to as many. This island is a part of and inside the county lines of Sun Francisco. Its improvement will add so much more to her taxable property. It is nearer to the present heart of the city than the Mission or South San Francisco. Whatever improves any part of that city, improves and makes valuable, relatively, the whole.

I am sure that the Central Pacific Railroad have not any interests the advance-

ment of which would injure the growth or retard the prosperity of San Francisco Seventy per cent, of all its business comes from that metropolis, and anything that would diminish it would do as great damage to the railroads terminating on the would diminish it would do as great camage to the ratifolds terminating on the Bay as could possibly be done to any class of merchants or business men from the same cause. No: the interests of the Pacific Railroad and the interests of San Francisco and of California are mutual. Whatever promotes the prosperity of the one, increases that of the other. With due deference to the resolutions of the Chamber of Commerce, protesting against the proposed leasing of a part of Gort Ushand for a railroad terminus, permit me to say that they embrace a consequence without a cause; they fear an end which has no beginning; they contemplate a structure which has no foundation, and evil results that can exist in pure imagina-

tion only.

An argument that proves too much proves nothing. The principal reason given by those opposed to the Goat Island lease is, that it would divert business from San by those opposed to the contribute reasons, that it would divert business from our Francisco. Now, admitting (for argument's sake) this to be true, such logic leads to this irresistible conclusion, viz., that commerce would be better accommodated and facilitated by being transferred from ship to rail at Goat Island than it is by the present system, else it would not go there. Will any man assert that San Francisco would be benefited if her commercial advantages and facilities were much less than they are now, requiring, for instance, several transhipments of foreign merchandise instead of one? More drays, and wharfingers, and laborers would be required. But is it pretended that the more obstacles and difficulties you throw in the way of commercial shipments and transactions, the more benefits and blessings a city derives from them? If the converse of this proposition is true, that the less impediments and the least expense attached to these transactions the better it is for the well-being of any city through which they pass, then the fact that Goat Island offers superior advantages is an unanswerable argument that San Francisco and

the whole commercial world will be benefited by making that spot a railroad terminus.

Ep to the year 1851 the New York Central was compelled to pay a percentage of its receipts into the State Treasury—on the supposition that the road world injuried the Eric Canal—a State institution. More than this, for some years the road at certain seasons was prohibited from carrying feeight at all. But it was at last discovered that competition in the carrying trade increased instead of duninishing the revenue and receipts of the canal, and this footish tax and prohibition was removed by the State Legislature. It is a universal experience that the more facilities for commerce the greater it becomes, and competition stimulates and crisarged when miles on miles of water front were built opposite her on the Jersey shore, and when great ships landed there, and when the Eric road terminated there. Has New York been injured because of the magnificent whatves that have been contrary, those cities have been immensely benefited by the increased commerce that has shooded in, by the works of passife improvement that lave grown up around them. San Francisco, the metropolis of the Passile, has been day as shan two 25 miles of improved water front. It is cramped and wholy madequate to her business. The Raircad Company propose to increase the frontage by unproving and leveling Goat Island, and it does seem strange that any considerable class of merchants or business men should be tound to object to so prossworthy works. New York has about twenty-live miles of improved water front. San Francisco, as I said, has but two, and her commerce must, at no very distant time, make her scarcely second to New York as an exporting and importing edge.

A city is not a mere machine to be built up after a model, but, like a tree, it should grow and develop itself on all sides; and San Francisco would, in may opin on, be better off to-day if there were a terminus at Goat Island for the Central Pacific, another on Mission Bay for the Southern Pacific, and still another at Sancelto for the Northern Coast Rainway system. Why should San Francisco demand that all the rai roads of the State should terminate in Mission Bay, to accomplish which would cost micions upon milions of Orders, when coast Is and is negered to be business portion of that city than Mission Bay, and when Saccelto is the most natural terminus of all the roads north and west of the Saccelto is the most natural terminus, in connection with a ferry across the Bay, and Carloman and Front streets will have to move further south, it it is missied that south San Francisco. But it that city would preserve a proper equilibrium, she can best of the yadvocating one raironad terminus on the north of her, another at the South, and still another east. Thus, with a Sancelito depot on one side, a Mission Bay depot on another, a Goat Island depot in front of her, another at the South, and side another east. Thus, with a Sancelito depot on one side, a Mission Bay depot on another, a Goat Island depot in front of her, another at the South, and side another east commerce, or be more accessible for business of have more or larger facilities for commerce, or be more accessible for business of every kand?

One word more in relation to the warehouse question: If the Central Pacific R. R. Co. choose to monopolize the warehousing business, they could do it as well on their lands in Mission Bay as at Goat Island; the sixty acres of land owned by the Southern and Central Railroad Companies, in Mission Bay, afford ample room for the headding of as many warehouses as could be build on Goat Island. But why should not the commerce of the interior, or at least some oil it, he allowed to go unnoved and unfettered through the gooden Gate without being stop ped to go unnoved and unfettered through the gooden Gate without being stop ped to go unnoved and unfettered through the gooden Gate without being stop ped to go without being stop ped to go without being stop ped to go unnoved and unfettered through the gooden Gate without being stop ped to go when the same of the commerce of

etc., which now comes in between the producer and consumer,

An important consideration is, that the more the farmer gets for his produce, of the less it costs him to get it to a buyer, the more money he will have to increase his productions in the future, and to invest in the wars of our merciants and manufacturers, or to leave with his bankers; and this is what creates business and makes a city prosperiors; it is not how many draw men or wharfingers are employed, or commission men and agents kept busy, that sustains a city, but it is the activity of her merchants and the extent of her manufacturers, both of which depend very much on whether or not the agriculturist his cheap ficilities and the greatest convenience in finding a market; and if Goat Island, when it shad become a radirector venience in going to benefit the farmer in the way I have prophected it would, I say it will benefit the solid business men, the merchants and manufacturers of San Brancisco also, as I have conclusively shown, I think. But some say that a bridge to the island as the natural terminus of the overland radirond, and conarked further, that a treastle work bridge to the island could do not be Oakland boat, pointed to Goat Island as the natural terminus of the overland radirond, and conarked further, that a treastle work bridge to the island could do not pusy to the shap of San Francisco, while such a connection with the main land would make that rocky, berren spot far more valuable tor military purposes than it is now, and I believe this opinion is concurred in by Generals Schooled and Ord; the chief of

the Coast Survey is of the same opinion. I care not what his subordinates among the hydrographic engineers may say; his single opinion outweighs them all, and he was out here last Summer and examined it in person.

If the great Bay which extends forty miles south of Goat Island, and near to San José, could have been injured by the hand of man, it surely would have been when the natural curves in the water front of San Francisco had been filled in and extended till the original crescent was made to head outward instead of inward, as it tended till the original crescent was made to head sativari macas of the acy as a does to-day. To say that scattering piles, between which the waters of the Buyes ran ran freely is going to do a damage which 230 acres of solid earthwork, driving back the sea that much in front of San Francisco has failed to do, is to me the highly the nonsense. The Oakland railroad wharf is now more than two miles in length—the longest in the world it has done no harm to the harbor that anybody knows of longest in the world that a done not man to the hardon and a don't believe, if it was extended three-quarters of a mile further that it would hurt anything, either. One thing is certain; if it did, when built, work damage to the Bay, the Railroad Company would lose no time in destroying it, for any injury done to the channel connection of the Pacific Ocean with the harbor of San Francisco, would injure railroad transportation and railroad interests more than any other enterprise would receive on this coast. Better for us that no railroad ran within fifty miles of San Francisco, than that its going there should injure that noble harbor, which no railroad mun is suicidal enough to think of doing for a moment.

Chicago made of herself a great city by resolving years ago that every good acre of land in the State of Illinois should be put within tea miles of a railroad; and or and in the State of Himois should be put within teamiles of a railroad; and San Francisco, if she would be great and strong and rich, should resolve to do same thing for California. Let her cease fighting railroads, and become a city of real progress for once. I remember how Creaus was once showing his gold to the philosopher Solon, on seeing which, he replied, "Sir, if any other comes that has better iron than you, he will be master of all this gold; and so of San Francisco; if any other city comes—be it Vallejo or Oukland, that has more iron roads than hear the different will be master of San Warnigarois gold.

her, that city will be master of San Francisco's gold.

The sagacity and enterprise, as well as solid qualities displayed by Californians in seizing and building the western half of the Pacific Railroad did more to popul In second and not one of the reason and of the Fabric vehicles of the open larize, and, I may say, nationalize this 8tte and give California a great name than all her gold mines. They who first lifted the locomotive over the might yellow accounted themselves and us all with glory and power. The over the might yellow a convent themselves and us all with glory and power. Alps, originated by the First Napoleon and backed up by the exhaustless wealth of great nations, was but an insignificant enterprise compared with that which amazed and finally accomplished the building of an iron highway across the American Continent. And now we are told by certain newspapers that the new who did it are public enemies—men who are trying to ruin San Francisco by anchoring their road to the rocky shores of Goat Island. But this savage, and to me most unreasonable denunciation of the leading railroad men of the State is nothing new. From its very inception the Central Pacific Company has had to fight its way ince by inch, foot by foot, over not alone the greatest natural difficulties, but ever and always over unscrupilous assails 1s, who pretend they can see nothing but ruin and destruction in everything Stanford, Hopkins, Hautington & Co, are doing.

The same men—almost identically the same men who are to-day the most prominent in the meetings called to aid the defeat of the Goat Island bill are the ones nent in the meetings called 10 and the detect of the Goal Island bill are the ones that worked and voted against the \$400,000 which San Francisco, in 1863, decided at the ballot-box to give to the Central Pacific Railroad. Analize that vote and you shall find 5,757 ballots for the donation, to 2,626 against it. The men who then worked so hard against building any Pacific Railroad at all, were a class of capitalists then as now, the enemies of all internal improvements that do not directly benefit themselves at the expense of somebody else. The five thousand and upward of voters who gave their support to the Pacific Railroad on that occasion were the verying read to the control of the pacific results of the control of the pacific results and the control of the pacific results and the control of the pacific results and the pacific resul ward of voters who gave their support to the Facine feutroad on that occasion were the working men, the artisuns and mechanics, who then, as now, are the friends and well-wishers of Gov. Stanford in all his laudable undertakings. Who shall say in the face of the meager vote at a late primary in San Francisco, when Goat Island was the forced watch-word, that the masses—the bone and sinew of that city—are opposed to a Goat Island terminus! No; the agitation is confined to a newspaper clique and their congitators in and around California street—men who never yet have subscribed a dollar to a railroad, and I doubt if they ever will. These are the self-constituted guardians of San Francisco. I deny their authority. The men who earn their honest bread by the sweat of their brow, and they outnumber the capitalists four to one, have not yet spoken nor authorized any one to speak for them. When they do, I am sure it will not be to censure nor abuse the men who are furnishing employment to nearly a thousand of their fellows in San Francisco at this moment, and expending among them more than ten thousand dollars among them every week. And the Central Pacific Railroad is doing that very hars among time every week. And the central racins trained as done to the thing. And right here let me say, there are two or three other things that Company has done for San Francisco. It has saved to the city since it was completed \$550,000 per annum in the single article of ice, by furnishing it at one cent a pound should be a single affected of the system of the statem of the statem when it formerly cost five cents. It is flooding as with Eastern visitors and tourists, who are expending in the aggregate five million dollars per annum in this State, and a large portion is left in the stores and hotels of San Francisco. It has state, and a large portion set in the stores and noters of san Francisco. It has attracted here the immense wool product of Australia, the sugar and coffee of South America, the tea and silks of Japan and China, which never would have come here had the Pacific Railroad remained unbuilt. In addition to this, the statistics will show that three tons of merchandise are sent from San Francisco to the State of Nevada to one before there was a railroad to that State, showing how

vast has been the increase of trade the railroad has brought to the San Francisco merchants.

merchants. The mineral wealth and the increase of agriculture that the locomotive hadeveloped and promoted is simply immensurable. But I digress. Let me in conclusion say that the sudden and via ent opposition to the proposed improvement. Goat I stand is not unpresceed need. It is processed like the opposition that new and labor-saving machinery often encounters from a class of operatives who teams it will rain their implement. I remember how in Sacramente groundered execution. years ago protested in mass meeting against the Sucrametro Vallar Ratro d coming within a mile of the layer or water-troat, bucton it would run the basiless of the draymen, who made a livesthood by halfing from the depot to the river. But The Gravinell, who made a recommon was making from the depot to the first. Fast the laws of trade and commerce are in worded, and in time the drayment has it expressed before the lecomotive. As now again the folly of this time far, o, s egges tion. So in San Francisco at is now missed that free his shall go on! of their way and natural course for fear that if they do not, the wavehousemen, draymen and wharf ingers will be injured by a change of routes. In time allowed be settle felly of an apposition to Goal Island based on such stender grounds. The call advices so d possible to Goal Sechil based on such stellar Toolins. The cold addy we sord needles for a livelihood fet sees y troubled let the introduction of the switz, that chine. She leared her occupation would be gone when the new mach in came into generaluse. Schafor Powler objects to rat roads in Tular county beautises the trains we beside in the beautism of the such is a cite, and have so the hocomotive stapt to fit, the beautin mountain roads with sincke and cinders. A too it Is and radronal termans, it is mountain rouges with smoke and cinders. A coost leading factions from a set in true, well facilitate, quick in and cheaper the commerce of left the rought the commission rought the way, but him as I we ware boost men and dragin, in of San Francisco might cose that has he say, and their force it should not be used to the record company. Such my friends, is the copie, such the reasoning in the results which the chamber of Commerce and the Commerce of the Heart and extraction to the religious at roughts, but for some and the Commerce of the Heart and extraction of the heart of box. As to the charge that a new city is to spring in out of the box, like Minerva when she pumped fail-grown from the heart of Jove. I know that such a thought never entered into the hearts of the Reviscod by the corrections. It would be impracts able, impressible, and the very 11 now before Compress torby left. It is to be a rin cond terminal, and recting else, and any attempt to make a city there would work an immediate forfeiture of the grant.

Ten years home and only well cout I cand be requested for depot purposes, but we shall see does and whaters built for along the Oakland shore, and the largest accommediations Sun Francisco can be well be a long that make an the largest accommediations. Francisco can be well be a long that make an interpretation has been not not seen as well be a long that the largest cathern be no no more processy of total Island than Ph. de plactors towards Camben, Puttbourg towards Acquite of the West towards the Marchants' fixed make a largest cathern be not for the companion of the Marchants' fixed make we have not of for business purposes, for control teres, for cartering well embrace every fertify valley in the State. The Southern Pacific in comportion with the Texas Pacific to the Admitted and Pacific with have been but but, but, up to or door the Admitted and Pacific with have been but, but, up to or door the trace of the could and Mass sapit vaccy states, the processor for so for the first own that they been the processor of book lost and New Marco. For the states we trace the trace of the could and Mass sapit vaccy states, the processor for so for a large to or door to the first southern the first trace of the could not be successful to the first southern the first southern we shall be under any or of country we can perfect that say from the Taxas Pacific and Bast the mines and commercial that notion will be under the first become the protection must be first carried. Ten years bence not only well tout Island be required for depot purposes, but

beautiful but more unfortunate sister:

"Tyon my fresh green sods No king has walked to curse and desolate, But in the valleys Freedom sits and sings; And on the hights above Upon her brows are olive boughs.

You may ask me, what has Mexico to do with Goat Island. I answer, it has to do with the fature railway system of this State, of which took I should I should will be the frontil point, and be seveng the; I have thought if proper to close what I have had to say with an outleok that extends farther than Cadfornia, and even be vond the island of Yerba Buena.

### Welcome.

Edward Curtis, Esq., whose recent cossays on railroad questions have caused so much comment, is in the city and stopping at the Grand Hotel. We give this inmuch cemment, is in the city and stopping at the trand flote. We give tens information for the benefit of the Committee of One Hendred, many of whom, we
doubt not, with at once call and pay their respects. They must love ture young
man dearly. His Goat Island argument, published in full in to-day's News Letter,
will undoubt dily increase their admiration. We are sorely afraid Curtus carries too
many guns for any of the artificational shrickers. His logic and facts are bearing
down very heavily and disastrously upon the railroad's Goat Island ememes, and
the reaction is setting in. We we come it, as must the friends of progress and internal improvements conversables. ternal improvements everywhere.

# The Granite Song.

In his lair subterranean grumbling, Old Granite said: "One thing is sure, That sloping and slippery tumbling Up yonder, no more I'll endure.

So wearily wallows the water His billows of brine o'er the land.

'Stead of prouder and fairer and better, All is turning to slime and to sand.

A sweet geological swash.

If the coat of the wide world all over Were one sedimentary wash.

By and by 'twill be myth and no true thing. What were hills what was high or And Limestone, the marlplot of chalkers, was low.

ing

Hurrah! for eruption I go ! "

So he spoke, and to aid him pro rata, The brave-hearted Porphyry flew, The weak-minded crystalline strata,

He scornfully shattered in two

With flashing and crashing and bellow, As though the world's end were to dread, Even Greywack, that decent old fellow, In terror stood up on his head.

"That would be a nice limestony cover, Also Stone-coal and Limestone and Trias Fast vanished, internally mined. Loud wailed in the Jura the Lias

That the wild-fire had scorched him behind:

Said later, in deep earnest chimes, The deuce take their drifting and smooth-" Was there no one to stop, mong you talkers.

This wild revolution betimes ?"

But upward through strata and fountains Passed the conquering hero with heat, Until from the sunniest mountains He gazed on the world at his feet Then he shouted with vodling and singing. "Hurrah! 'twas courageonsly done; Even we can be doing and bringing What it only needs plack to be won!"

Translated from the German by Mr. Leland.

# Horace Greeley.

The whirlight of politics having brought Horace Greeley prominently forward as a candidate for the Presidency, he naturally becomes a subject of curnest interest, and his antecedents, whether of ancestry or acts, a question of much inquiry. No man living has been the subject of so much ridicule, misrepresentation and carica-ture, and no man ever suffered so little in public estimation in consequence. A purfball may be flung through a pretentions and highly decorated screene, a can-non hall rebounds from an ironclad. Horace Greeley's ancestors were on the non nail renormals from an ironciad. Horace circley's amessiors were on the paternal side, English, on that of the mother, Scotch-Irish. His Ruglish ancestor was Benjamin Greeley, who with two brothers about the year 1650 emigrated store the vicinity of Nottingham, England, and settled in Massachusetts. His ancestor on the maternal side, were Scotch, who settled in Londonderry, Ireland, after it had been sucked and razed during the rebellion against James the First, two hundred and sixty years ago. From that city in Ireland, John Woodburn the ancestor of

and sixty years ago. From that city in Ireland, John Woodburn the ancestor of Horace Greeley's mother, enigrated to Londonderry in New Hampshire about the year 1725. He was Greeley's great-grand father.

Two of Greeley's great uncles perished at the battle of Bennington, where General Stark was the hero, a citizen of Londonderry. Zachens Greeley and Mary Woodburn were married about 1807. Two children were born and died before the birth of Horace who was the third, and who was born on a farm in the town of Amherst, on February 3d, 1811. He was born apparently dead, gave ho sign of life, uttered no cry, made no motion, did not breathe, and was as black as a Mandingo, perhaps indicative of his future sympathy for the ensiaved African. A kind hearted and experienced aunt came to his rescue and saved him, else what should we "know about farming?" His mother was a woman of strong muscular development, industrious, overflowing with animal spirits, possessing an exhaustless store of songs, ballads and stories, and full of good will towards everybody. It is easy to imagine what an influence such a woman must have upon a child even of only ordinary capacity. As Greeley has himself said, it awakened in him "a thirst for knowledge, and a lively interest in learning and history." He could read any book in the English language at four years of age. At three years of age he attended the district school in Londonderry, living at the house of his grandfather, David Woodburn. A district school is the highest grade of educational establishments have recently a school in the school in the highest grade of educational establishments. ments be ever attended.

His youth, rather his childhood, was spent in the usual routine of New England boy-life, going to school summer and winter until ten years of age, thereafter only during the winter. He had a thirst for reading, and fairly consumed all the books within his reach. His choice of a trade was formed early, having announced at the age of six years that he was going to be a printer. This he eventually put into practice. Before he was ten years of age his father became ruined in fortune and fled from New Hampshire to Westhaven, Vermont, where he commenced life for fortune anew. Here Horace completed his school education, having attended school in all, about forty-five months. By this time his thirst for knowledge and its pursuit through reading was so effective that the country school teachers then and thereabouts, were incapable of teaching him, and at the request of one of them, at the age of thirteen he ceased attending school, and henceforth was not only his own teacher, but the instructor of others. At the age of thirteen, or four-sen, by permission of his father, he went on foot to East Pouliney, applied for-sen, by permission of his father, he went on foot to East Pouliney, applied forboy-life, going to school summer and winter until ten years of age, thereafter only een, by permission of his father, he went on foot to East Poultney, applied for a position as apprentice in the printing office there, was questioned upon his educational qualifications, and accepted. There he served his term of apprenticeship, four years. In the loginning of the fifth year, the newspaper, the Varthern Spectator, expired, and his apprenticeship ended. While serving his time he was a prominent debutor in the local debating society, and he has never bestated in the expression of his convictions upon any subject under discussion. The young man Greeley, now mincteen years old, left Poultney on foot for his father's home in Pennsylvania. It was June, 1880. It was a tramp of six hundred miles, partly made on foot, partly by canal boat, at a cost of seven dollars. After various efforts for couplowment at his trade, he succeeded in the town of Eric, and took a position on its Gazette. Seven months later found him again out of employment, the printer whose place he had supplied having returned and resumed work. All of his seven months' wages, except some twenty dollars, he gave to his father to of his seven months' wages, except some twenty dollars, he gave to his father to aid him in his struggle with fortune. Now he struck out for the great world, left the interior, and partly on foot, partly by canal book, reached New York city on the 18th of August, 1831, with ten dollars in his pocket. He had no acquantances in the city-had brought no letters of introduction. After unnumbered and busine-cessful applications for a position, he got a "sit" at West's, No. 85 Chatham street, under Mr. Borter, the foreman, since famous as edidor and proprietor of his Spirit of the Times. Here he worked as a journeyman for fourteen men tas. Next he held a position on the Frening Post for a short time; then upon the Commercial Advertiser, and subsequently upon the short-haved Amolde. Next we find him on the Spirit of the Times, as compositor and volunteer writer. On the morning of Language L. 1828, the Meetics December of the Spirit of the Times, as compositor and volunteer writer. On the morning of Language L. 1828, the Meetics December of the Spirit of the Meeting December of the Spirit of the Meeting December of the Spirit of the Meeting December of the Spirit of the Spirit of the Meeting December of the Spirit of the Spirit of the Meeting December of the Spirit of the Sp the spirat of the Times, as compositor and volunteer writer. On the morning of January 1, 1833, the Morning Past was issued, Mr. Greeley, one of the publishers, being forced, through want of knowledge editorial of its originator, Dr Sheppard, to furnish most of the getting up of the paper. It fived only three weeks. In the beginning of 1834, Mr. Greeley and his partners started the New Yorker newspaper. It was first issued in March, 1834; it was a good paper, but not a probtable one. It hved seven years. Meanwhile Greeley wrote articles for the Dudy Wing, and in It have seven years. Meanwhile Greeley wrote articles for the Daily Whag, and in IRSN undertook the editorial charge of the Lifetissation, a weekly campain paper, which eved one year. On the 2d day of May the first number of the Loy Cobia was published, Mr. Greeley editor, It was a campain paper. Forty-se 2d thousand of the first number were sold. The circulation run up to about mucty themsand. The paper's influence upon the voting population was unprecedented, and the tramph achieved in the election of General Harrison was due in no small degree to Greeley, for which service he received no office, nor even the thanks of the Whig Committee. On April 10, 1841, the first number of the New York *Tribune* appeared, the capital furnished by Mr. Greeley - chiefly his known honesty, intelligence and capacity as an editor, and one thousand dollars loaned him by James Coggeshall. It began with six hundred subscribers; to-day its circulation is in the buildreds of thousands. It wields a greater influence than any other paper on the continent. Since then it has been an aggressive paper. Since then Mr. Greeks has become more and more known to the public—as lecturer, as postered speaker, as writer, as author, as member of Congress—riden'ed for his occuntricity. ties, admired for his genius, honored for his integrity, and thatly put into the field as canadate for the highest position in the country that of President of the United States.

—We have heard of "bible pounders" and "sixty-four pounders," but until lately our ears were never grarted with the inharmonions sound wrapped up in the phrase of "boy pounders." That some persons calling themselves men must claim such a puzilistic title as "boy pounders" is self-evident: Mr. Bernhard Marks, Principal of the Luncoin Grammar School, in tendering his resignation to the Honorable Board of Education, says that "For nearly two years past not a single boy on the Lincoin Grammar School has been struck a blow." Verily, this is a hunge consolation; a tender and aftering spectacle of the progress of our local pedagogues from savagery to civilexistion. For nearly two years no little human chermbs, made in the image and likeness of God, have had their eves gouged out, their hair pulled from the roots, or floir posteriors welted into a blood red richness by the able-bodied boobies whom the generous and confiding public have liberally paulity teach the young idea how to shoot. How shall we ever be able to repay Mr. B. M. for this precious information? Will not the school masters of the city present him with a beather needal, a wooden watch, a glass eye, or some other Yankee jewel of inestimable value? Can the yearning fathers and mothers of San Francisco permit this blessed testimony to go forth to the wicked cities of Cheago, Boston and New York wichout indorsing it by some apapopriate testimania! We feelingly think that some local Nast could make a splendid but in this connection. Let him allow his fervid and fiery imagination wender back some two years ago, when "boy pounders" were as much a California institution as strawberries, fine weather and divorces. Present these pounders of juvenile fiesh and bood in the act of torturing the cherabs of immortality, slinging then into muchair by the hair of the head, or suspending them by the nose from hooks in the ceionic, etc. Then weather sketch showing the advanceme t made by the "boy pounders," in civilization, Christianity and the fine arts, an advancement,

### Court Chat.

— On the occasion of the marriage of Marquis of Bute to the Hon. Gwendoline Mary Anne Howard, the bride received many valuable presents. Mesers. Garrard (Crown jewelers), of the Haymarket, were commissioned by the Marquis of Bute to reset and rearrange the heirloom jewels as presents to his bride. They consisted principally of a very fine necklace of forty-one single brilliants (the stones are of usual size and luster), and a pair of ear-rings to match, to be worn at her marriage; an ornament, composed entirely of brilliants for the front of the dress, designed from a picture of the period of Holbein; a diadem of very simple outline, but consisting of a mass of fine brilliants en pare, producing a charming effect; a necklace of alternate large and fine emeralds and brilliants, and pair of ear-rings and a bracelet to correspond; a brilliant fringe necklace, graduating forward the ends with a fine ruby in each drop, so as to form a continuous line all round the neck. The combination is quite novel, and is Lord Bute's own idea. The wedding dress was looped up and ornamented with some curious old diamond flowers taken from a bouquet of the work of the last century. A suite of silver ornaments for morning dress, consisting of two bracelets, ear-rings and neck ornament of very highly finished work of early Italian Gothic design. The bride wore upon the occusion of the wedding two Oriental pearl bracelets of two rows each, with brilliant snaps, and two superb half-hoop rings, ruby and brilliant. All the above were Lord Bute's presents to his bride. Among the other notable presents were the following: The Pope, a large pendant, with camee in center, and a smaller one, with a camee in a circlet of flagree gold; the Duchess of Argyll, a smaller one, with a camee in a circlet of flagree gold; the Duchess of Argyll, a smaller one, with a camee in a circlet of flagree gold; the Duchess of Argyll, a smaller one, with a camee in a circlet of flagree stone the flagree to the content of a Marquis; the Hon. F. Howard, a gold neg

It lacks but a decade of half a century since Spain began to "break out" with Carlism. Carlos, the brother of the last Bourbon King, Ferdinand, was the first Carlist. Ferdinand had had three wives and no issue, and Carlos, wearying of waiting for him to die, attempted to seize the throne before the corpse was ready. This so piqued the corpse that he roused himself, married again, begot the now exqueen Isabella, and placed her on the throne in spite of Salie law and everything else. This Carlos pretended the title of Charles V., and his family have kept up the struggle for the throne, until now the cause is taken up by Charles VII., graudsake short work of his operations, we suspect, but the tranquility of the rest of his reign will depend in a great measure upon the tact with which he deals with this faction. Like the other decayed links of the Bourbon family, this one draws its main support from the tyranny of the priests over remote and ignorant provincial populations.

— Meyerbeer and Verdi met only once in their lives. Meyerbeer, in 1861, heard Verdi's Troratore for the first time at the Italian Opera House in Paris. He was stiting in the box of Rossini, and expressed his delight at the fine music to Mmc. Rossini, who was sitting by his side. While he was conversing with her, Emile Ollivier entered the box with a stranger, and said to Meyerbeer, with whom he was well acquainted, "Would you like to know Verdi'?" "He is the man whose acquaintnee I should like better to make just now than that of anybody else," was most cordial. Meyerbeer insisted, after the performance was over, upon taking Verdi to the house of Rossini, with whom Verdi was also unacquainted. Thus Verdi met his two greatest competitors for the first time in the course of a few hours.

- Prince Pierre Bonaparte, the assassin of Victor Noir, is so little depressed by the fact of his wife opening a millinery shop in London, that he boldly declares he looks with entire resignation upon the cruel fate which throws him upon his wife for support.

— The Rothschilds will hold a great family reunion next July at Frankfort-on-the-Main, when, it is believed, important changes will be agreed upon in regard to the management of the various branches of the great firm.

— The Empress of the French is said to be suffering from a painful, although not a serious indisposition.

### Io. Bacche!

Truth is strange-Stranger than fiction.

I know a lively little girl. So rosy, red and ripe: And what I like about her is, the lets one smoke one's pipe.

Inde d she once contessed to me-I thought it was in joke-That even she here i sometimes Enjoyed a quiet smoke,

In fact, I've lately ascertained That many charming pets Lean to those drams of nicotine. The fragrant cigarettes.

Well-scated in my sanctum, calm As totar side of Jordan,

I smoked, as is my nightly wont, A primitive "churchwarden." My charmer gazed in silence long;

At last I heard her say, In elenthi'f-s .iloquy "I'd like to try a clay."

I handed her a virgin vard. And speaking as a poet— Adding my pouch of 'Best Returns,'' I simply bade her "Bown.''

She blew it -blew an azure cloud. Midst which her pretty face Showed like a chubby cherubim In some old burial-place.

She puffed like any railway train,

And felt, no don't, as fast;
Til. slewer zew the gradua' whiff,
And stopped quite dead at last. All silently she laid the pipe

Upon my study table: And strove to fly. I much regret To say she was not able.

To chronicle what next occurred Would be, I feel, uplawful,

The consequences that ensued Were very, very awini. And since that melancholy eye.

No more her ardor burns
For moking them sun front!)
A pipe of "Best Returns."

So let me well advise you all. My little female pets.

If you mest smoke, confine yourself To modest cigarettes.

Or else the voice of Destiny, In accents harsh and cracky,
May quote for you those classic words
Of warning, "Heigho, baccy!"

-Homes

# Gwin Mine.

The mining estate described in the following extract from the Calumeras Chron-ives of 7th inst., is the property of ex-Senator Gwin and family, which accounts for 1's noneappearance on the Stock Board:

A GREAT MINING PROPERTY .- The Gwin mine, in Lower Rich Gulch in this contry, some of the most extensive and complete mining establishments on the Purper coast. The mining capacity consists of seventy heavy stamps, which, when in it I up sation, reduce from 120 to 140 tons of ore days. Attached to the mills or not operation, reduce from 170 to 10 tons of ore early. Autocome to the pens 27 pans 't rough which the tablines and an physics are passed, and below the pens the stephanets are concentrated, rousted and subject on the debrination process. There are two man shafts are holisting works, with each an air shaft, one 500 and the other 250 feet deep. A contral shaft between these two is being suit, on a We chart 20 her deep. A contral shall between these two is being sitk, on a most greatly series, it having three compartments each six feet superior. With the type that the another the two that the upper mile is 200 and at the lower mile 350 feet. The near s, with the heisting works at the north name, are man with hardy-gardy water whosts, while the mans and ama gamators are run by a terione wheel towards material. There are about fifty buildings on the property, with a location tap and the first property with a location to the contract of the contract d mage near he shall and stopped the mells for several months. Copying after the Attacker until s. arge to kets were reced on to keep the water down instead of pum; s. Bott, with such a Winter as the last, would have been scarcely adequate to to task of he ping the name ery, and though the water backets were shoese intly pied, they preved insufficent to prevent the works from filling. We are glad to learn took all, damage has been reparred, both sharts put in complete order, that one of the miles tarted yesterday, and that in a short time all the stamps will be again in motion. Then we will have lively times in this locality, with penty of money, for it is well known in the 500-toot level there is an immense deposit of modey, for a lesser, known in the 505-loof level there is an immense dejoid of right e a that has been strack only a week or two before them is were stopped by the foods. The mine extends four thousand feet on the great mother sode, there is no do which have been thoroughly prospected, developing covern become detected of each quartz edge, varying from a to the work feet in thickness, with three pay delimines. The name has been recently incorporated at two mallions of dollars, and those the thousand and one new mines lately incorporated, it is worth every do let reasod in the incorporation, and we predict that it will pay one per cont. per mouth dividends on the stock before the first of January next.

Original Hidden Treasure Mining Company,—Wm. B. Bourne, President; A. Haward, Jos. De la Montana, J. H. Crocker, S. Pinkham, Robert Sherwood and Waster Ludum, Trustees; Captain Wm. Boyle, Superintended.

### China and the Chinese.

A very interesting and instructive lecture on the above subject was given in London lately, by Mr. Herbert Laurence, who commenced by a brief but comprehensive outline of the historical, geographical and natural features of China, calling sive online of the historical, geographical and natural features of Cana, caning special attention to the "Grand Canal," which is of so much service to the country, and the "Grant Wall," and then proceeded to divide his lecture into three parts, the religious, political, and social aspect. The first part comprised a glance at the ancient religion of the country, when it was "free from the corruption of idols and statues," down to the period when the three religions of the present day came into existence, the leading characteristics of each of these three systems, the Confucian, the Buddhist, and the Taonist being accurately and simply explained. Considerable amusement was afforded by the recital, with instrumental accompaniment, of a portion of the Litany of Buddha. A vivid description of some of the chief superstitions ceremonies, exhibiting the most puerile practices of the worship of idols, was followed by a very cheering testimony of the steady and genuine progress of missionary work in China. The second part of the lecture naturally divided itself into the foreign policy and home government. Of the former, the lecturer ventured to speak in terms of rather severe condemnation, and appealed with eloquence for his justification to the terrible tragedy at Tientsin, in the Summer of 1870. The home government was minutely described, and its many excel-lent institutions warmly commended. The penal code was defended from the charge of excessive severity at least in theory; and the laws of the Empire were described as founded on that which should be the basis of all good government, not merely the punishment for violation—that alone were but a poor success—but the encouragement and maintenance of the principles of virtue, purity and peace. The third part—the social aspect—was dealt with at considerable inexth, and began with a notice of the written and spoken languages, the difficulties in the way of mastering the various dialects being shown by specimens presented on the sheet. The use of this language, as shown in the standard and popular literature of the Chinese library, afforded an opportunity of quoting some of their interesting proverbs, such as the following :

"A gem is not polished without rubbing, nor is a man perfected without trials."
"What cannot be told had better not be done."

"There are two good people-one dead, the other not yet born."

The social position of the fair sex was described as one of close seclusion and inferiority. The marriage ceremonies were detailed with considerable minuteness, as also the superstitions rites with which they seek to pay honor to their departed relatives. The Feast of Lanterns and the Dragon Festival were very beautefully explained by some excellent pictures of native design, following which were de-picted specimens of the various trades - such as barber, seamstress and others; and the lecture was brought to a close by a favorable review of the benevolent and charitable institutions of the most ancient, most numerous, and most interesting nation in the world.

Ten dollars reward for any corpse fished out of the bay. The Board of Supervisors never did so wise an act of legislation. This is a solution of the Chinese It sustains the Morgue, supports the boatmen, and opens up to them a question. It status the mognets supports the container, and opens up of addition new and profitable industry. It is a great temperance movement, and will work a reformation on the water front. Of course, it is hard upon the saloon-keepers, unless they consolidate with the boatmen. The crabs will suffer most, and we may look for very poor and thin soft-shells from this time forth. If corpses increase, we shall be spared any further nonsensical stuff about drowning men being rescued. If make-believe suicides desire to be pulled out of the wet before drowning, they had better pin a \$20 greenback in some conspicuous place on their garments and nad better pin a \$20 receivable the some conspicuous pince pince and the strain at the a witness, or the distinguished members of the Humane Society will steal the bill, drown the victim and get the \$10 as clear profit. The Board at the same session passed an ordinance to muzzle Newtoundland dogs, lest they should interfere with the body-snatching business and save people for nothing. These ordinances will depress the value of real estate in Oakland, and life insurance companies must advance their rates.

- Gail Hamilton says there is a subtle etherial, intangible, invisible influence — Gail Hamilton says there is a subtle etherial, intangible, invisible influence exerted by women. We accept the subtle and etherial, but do not quite believe in the intangible and invisible part. Victoria Woodhull and Tennie Claffin are certainly both tangible and visible; one is a candidate for the Presidency and the other for the Coioneley of a regiment. If Vic. should become Commander-in-Chief of the Army and Navy, and have to dispense the patronage of 100,000 offices, we presume the world have on new of the patronage of 100,000 offices, we presume she would have an army of Amazons, and perhaps, after all, the army would not be less efficient than at present. We know of no good reason why a female cannot loaf in barracks as well as a Dutchman. There would be less of Immaie cannot load in barracks as well as a Dutchman. There would be less of smoking and drinking, less wearing of the ball and chain, and as for the uniform, it is our opinion that the Dolly Varden would be much more tasteful and elegant than the present dirty blue soldier's dress. A parade of the army would be an interesting exhibition, and we should watch them in their flank movements with great interest. The privates would be the best part of the army. We would not mind ourself being an officer to drill the awkward squad and put them through their exercises.

### Special Brevities.

— The famous journal, the New York Tribune, was established April 10, 1841, and is now thirty-two years old—just in the prime of life; and is bistory, if minutely written, would be as interesting as a romance—its roof having beoised more bright wits than any other journal in the land, or 'n any and. The Iribune's present stockholders—that is, dating Jam. 1, 1872—are Horace Greeley. Mrs Greeley, Isavard Taylor, Thomas N. Rooker, Solom Robinson, Samuel Smela r. George Ripley, Theodore Thirton, Oriver Johnson, Charles E. Wilbour, C. A. Rant e., John Hooper, Elis L. Price, Silas E. Cheney, John F. Cleveland, Patrick O'Rourke, Philip A. Frizpatrick, Whitelaw Reid, Parsons Farnham, E. H. Jenny, J. C. Ayer, and the estates of A. D. Richardson and S. T. Clarke twenty-two owners and one hundred shares. Any owner who wishes to sell a share can readily set ten thousand dollars for it, and something over. But even at that high price the Tribane stock is a better thing to hood than to sell. President Grant would be glad to own fitty-one shares. A year hence the Tribane will 'pull down its barn and build greater." The present antique shanty will give place to a structure worthy of the first of American Journais. The creetion will be carefully superintended by Mr. Sinclair, leaving Mr. Greecey has whole leisure to write his presidential messages and dictate his felteral appointments.—Golden Age.

It is stated on the authority of an Italian journal that the Emperor of Russia contemplates tuiting the Caspian with the Black or Euxine Sea by means of a canal, which will be about 400 miles long and take six years to compete. This project is worthy of one of the greatest powers on the globe. More than one object is subserved by it. It secures entrance to the heart of Russia to the countered of the world without necessarily a transhipment of goods, the Caspian and the Vorga being maygable allogather more than 2,000 miles, it will enable Russia to concentrate greater military strength upon the southern shores of the Caspian and within 500 miles of the Persian Good. And another object is said to be the replenshing of the waters of the insand sea, which is showing a subsidence year by year, threatening in the course of time the destruction of the fishing business, which now gives support and imployment to hundreds of thousands of the Russian peope. The Caspian is 3-3c, feet lower than the Black Sea by latest measurements. A scheme of the kind is in consonance with the spirit of an age that sees the completion of the Suez cana', seeks to cleave the granite barriers in the tropic zone to unite the waters of the Atlantic and Pacific.

— If report speaks true, Prussia is straining every nerve to give to Berlin the vogue of Paris, but such attempts are fruitiess, for Paris still remains, in spite of her recent misfortunes, what she has ever been and ever must be the centrae point towards which converge all that is most prized in art and science, escance and pleasure. For the rich man Paris is pleasure, for the ambitious she is faune, for the speculator she is fortune, and for women she is the paradise of elegance and fashion. And besides, what inducements could any one have to go to Beram, save and except to grafify our curiosity, if not our eyes, with a view of the Empares Augusta, who is no longer young, and never was handsome: to cat sourkrout, which is not to the taste of everybody; and to abuse France, which is not to the taste of anybody—of our friends, at least:—Englisheeman's Magazine.

— William Page, President of the National Academy of Design, who recently discovered a German cast of the head of Shakespeare, now chains to have discovered a remarkable proof of the authenticity of that bust. In the Chandos portrait there is evidence, which the unskillful artist of that work evidently attempted to obliterate, that Shakespeare had a sear-over his left eye, of such a nature as to cause the skin to adhere to the bone. Now, Mr. Page, on magnifying the photograph of the German bust, has actually found the sign of this sear, clear and unmistakable; and he considers this, added to other evidence, positive proof of the authenticity of the cast, about which there has been much dispute since its discovery. Page has also found in one of Shakespeare's sonnets a distinct reference to this sear on his forehead.

A damsel who resides in the neighborhood of the Mississippi, as the Chicago Journal informs us, lies in bed smoking every day till noon, and so manages to consume \$100 worth of tobacco per annum. Also, she is addicted to opnum, to morphine, and to chloroform, and altogether fulfills the ideal of the Girl of the Perrod, as set forth in the Saturday Review, and justifies all the warnings of the speciator about the dressing boxes full of chlorat. Within a circle of twenty miles of this sweet creature, we are ominously told, twenty-five murders have been committed within a few months. It would be interesting to know whether murderers and murdered were rivals for the hand of this young lady.

## Silk Raising in California.

It seems that the culture of silk has been abandoned in the Sacramento Valley. The submerged land produced a rank and luxurious growth of leaf to the detriment of producing substantial food for the worms; and consequently an inferior quality of silk would be the result. It is stated, however, that the foothils are well adapted for mulberry plantations. The Sacramento Union has an article on this subject in which it says: "Our valley lands are too moist, it is said, at just the time when healthy food is required for the young worms, which is very probable. It is possible that it may have an excess or deficiency in some of its constituents to produce the mulberry in its perfection. Other parts of the State, in the hilly regions, where the soil is strong in mineral qualities, but has no excess of vegetable mold, where the air is lighter, clearer, and without any malarious influences, are more successful in the growth of the mulberry and in the raising of healthy worms. The size of the cocoons and the quality of silk attest the value of localities as silk districts. But, after all, the question is not yet practically solved firstilk-growing in California can be made, during the present generation, a paying industry. It may be that the best districts will have to follow suit with those that are practically abandoning the cultivation of food for silkworms. There are strong grounds for hope of success. The cheapness of land, labor-saving machinery, and the strength of the soil that enables the plants to spare their limbs repeatedly without sulpecting the silk-grower to pluck the leaves, leaf by leaf, may compensate for the cheap labor of other countries. If, as Prevost claims, on account of climate, freedom from disease and the other enumerated advantages, one person can produce as many coroons in California as eight in France, silk-growing in the foothills of the middle region and in the southern part of the State, ought to be a prominent branch of industry.

# The Queen's Birthday.

The Committee of the British Benevolent Society have made arrangements for celebrating their anniversary festival, as usual, on Queen Victoria's brithday, the 24th instant. The commemorative services will take place at the Lick House, and will include the time-honor of British dinner, with the customary post-prandial acompaniments of vocal music and addresses. It is intended to make the occasion a happy reunion of all the British residents of the State, who are asked to show their presence that they still remember and prize the virtues of Britain's hobbe Queen. The recollection of her trials since the last anniversary, and her happy issuance from them, will render this gathering peculiarly felicitous, and all who owe homage to the lands under the benign sway of her scepter should not fail to attend. Nor is the occasion one only for natives of Great Britain. Many citizens of this great Republic know and admire Her Majesty's worth, and will, by their presence, cement the union between the two great English-speaking peoples, heyond all the force and power of treaties. The untoward interruption in the proposals for settling the matters in dispute under the Treaty of Washington have been amicably adjusted, in a way honorable both to the United States and Great Britain, and the fraternal union of the two great nations cannot be better symbolized than by the cordial and hearty greedings over the banquet table, in the highest of all social calls that of charity. The Committee of Arrangements will spare nothing to make the anniversary feativities worthy of the day on which they are held, and worthy of the Society on whose behalf they take place.

— Crossing stock sometimes improves it, and sometimes it does not: the bull-dog and hound, if crossed, gives the fiercences and strength of bone of the one, and flectness of the other, good for hunting the kangaroo in Australia. Crossing the ass and mare produces the mule, a useful, patient animal, but a hybrid. Intermingling races gives the highest physical and intellectual development. Cross a Yankee with a Scotchman, and you have a head to conceive and a hand to exocute. Cross the Dutch and Irish; the Celt and Slavon; cross anything that is white, and you have the American people, inexpressibly the most aurmingly brillant race in the world. Cross the white and black races, and the deterioration is marked from the standard of either, as instanced in the result of intercourse between the Spaniard and the Aztec. Cross a negro Jew with a Christian white, and you have the strongest possible compound of physical, intellectual and moral development that can be conceived; an Ishmeelite, whose hand is against every man, instead of a heart the gaul of a terrapin, the nose of a hook-billed salmon, the color of an old saddle.

If there is anything we admire, it is a polite man, and Edward Tompkins is that thing. He is obsequious. Delos Lake once remarked of him, that he went bowing through the world as if a pologizing for the fact that he had been born. Now, we do not object to let the Hon, redward live; we tread aside and let him; but we do object to his being head schoolmaster in the State University. He is not only too polite, but he is too tunny. Now, we do not like funny men; besides, Tompkins is too poor, and under the pressure of his necessitier he might overcome things, and in five years he would own Berkeley and all the circumjacent country.

### California Cotton.

The Kern County Courier of the 11th inst. speaks flatteringly of the prespect of the cotton crop in that part of the State. It says that the largest area planted and being planted the present sension will be in that vicinity, but that the interprete there is only preliminary to operations of the most extended character in the finite region of the most extended character in the future. The Cotton Growers and Plantes' Association commenced work active vicinity as little more than a month ago. They have a field of nearity one thousand across inclosed with a fence of boards and end properly. A great deal of blood has also been expended in pertecting a system of detents for jurigation. But this is now almost accomplished. Nearty through the center of the field is now flowing a stream of water eight feet in width, and about two and a heaft feet in depth, elevated sufficiently above the general back loadnit of water being readly country of which purposes exceed hat one channels have already been constructed, and others are progressing. It is not specific to the finite of the control of the first and others are progressing. It is not specific to the introduction of the second of the second of the second of the second of the company of the control of the company and with a second of the company of the control of the company is seed by a sometiment may after each of the company is seed as second in the Control gration of the Merce of the company's seed was consummed. The Sucling Merced Country Argus, of May 11th, says that some of the farmers of that country are taking a greater interest at the production of cotten than my other every. This re-experiency so in the Merced every hottom, a portion of wheth, let your, so counterful production the production of the Merce of the company is seed as second in the Country and the planted to the granters and the Backley Brothers tell as that two cut probably have 350 acres planted. We are informed containes the Argus, the thing and cities and the planted of the strines in that inc

# The Oriental Bank Corporation.

The meeting of the Oriental Bank Corporation was held Thursday, April 18th, at the office, Threadmeethes treat, London. The report for the ware radius been her just showed that the net presit for the war his been 18th, 42 set 10d, 41d at the providing for all bad and doubtful debts, ceaving after payment of a divident, making, with the informal distribution in November 4d, 42 per each, for the concentration of 62,428 8s, 10d, to be carried forward. The beamer shows that the total exposition amount of 29,194 450 as 10d, and amount to asset a are on and bolion 11,20s,89 11s, 91. Government securities, 11,726,192 8s, 1d; and notes and base descended 21,125 46 9th 9th 1d. This report was adopted, and at a special most described on the distribution of the present charters of incorporation. The remarks of Dr. Troon, a large shareho der in the Oriental Bank, was of uncommon interest. He said the Directors were bound to have in hand by their charter, space to the amount along the chiral of their cerebation in notes, which was \$222,000. Species and backon makes togs there in hand were nearly incomes that amount, buston of being constituir, specie was nearly those times the error ation, a suct micely and backonic, he paralleled in bandling transactions. He had been companiant, for every facility to be not along the remove, and he was shall to think that his suggestions had not been allagether known and he was shall to think that his suggestions but not of their money should not be invested in a particular way, one-hand at least of their money should not be invested in a particular way, one-hand at least of their money should not be invested in a particular way, one-hand at least of their money should not be invested in a particular way, one-hand at least of their money should not be invested in a particular way, one-hand at least of their money should not be invested in a particular way, one-hand at least of their money in the set would bring them five per cent.

# Presidential Candidates and the Alabama Claims.

The English Press seems to place too great a significance upon the medis and demerits of the candidates aspiring to the Presidency, as regards they influence upon the Alabama claims. The American people, who make and unuside Presidents, are determined that this international question must be settled amiseds and any Pressidential candidate who would proclaim himself in favor of settlength and support of the controversy in any other than a peaceful way, would certainly be condemned to a disastrous defeat at the ballot how. The good sense of both the Lagish and American people will keep in subjection the goal of ambitious politicians and sensational newspapers. And as to the power of Presidential candidates in doing any serious harm to the negotiations now in process of adjustment, it may be set down as without force. The English press may consequently look upon this matter of state as we do.

#### The Iron Steed.

Along we rush with a perilous speed, And over the points we bound

Hurrah! hurrah! for our iron steed, As it flings the fire-sparks round;

As it bravely pants and proudly breathes, And tosses about its vapor-wreaths.

Onward it goes with a fearless sweep, But strong are its whirling wheels; Away, away, by the mountain steep, Till its massive burden reels;

A giant that will not flag or tire, Along the gorge, or wherever it be, With its breath of steam and lungs of fire. Deep in the city, or fronting the sea.

A way it flies by village and moor, By many a quiet town; From every bridge, with a startling roar, How it harls its thunder down!

By rivers and meadows, and placid streams It flies, and into the tunnel screams.

Aloft it scatters its flery trails, Like lightning its pulses beat; In sweltering noons, through furious gales We can hear its iron feet,

Hurrah! for our courser, fleet and strong, In its daring race with time; It thrills the blood as it leaps along, With a mighty step sublime: And the world its power and service claims In return for its ravenous feast of flames!

# The Horrors of Infallibility Painted.

We have been requested to publish the following. The document was handed to some of the leading newspaper publishers here, but they declined to print it. We give it to the public as freely as we would a love song. The News Letter never flinches from publishing the truth. The article speaks for itself:

[Translated from THE GARTENLAUBE, No. 6, 1872, Leipzig.]

KAULBACH'S GREAT PAINTING, THE "HOLY" JUDGE OF THE INFALLIBLE: A SAINT OF PIO NONO.

Before describing the merits of this remarkable painting, some amazing and

bloody historical facts are appropriate.

bloody historical facts are appropriate.

Five hundred thousand families were sacrificed by the Holy Inquisition in Spain alone. Of this number thirty one thousand nine hundred and twelve are burned at the stake alive. The 'holy office' had no better executor and servent than Peter Arbues, of Epila, Until 1867, humanity had the consolation that this horrible scourge of society had been a state of inanity, but this consolation has gone, Pius IX, has declared, by virtue of his power, that this Arbues, the most blood-thirsty executor, this savage butcher, whose name has been cursed for centuries, is a Suint of the Catholic Church! The Pope has the most horrible crime against the laws of God rewarded as he would reward the greatest virtue and consequently. 13 a same of the tamone transfer and the transfer against the laws of God rewarded as he would reward the greatest virtue, and consequently put himself on the same step as the seclerat. It is now a historical well known fact, that on the same day on which the most powerful Catholic State of Europe declared war, in 1870, against Germany, which is the head of Protestantism, that on the same day the Council at Rome declared, as its last and highest resolution on Infallibility of the Pope, this gigantic serman Empire, against all the wishes which enemies, went through this gigantic war and won the great moral victories which secure free schools, civilization, and liberation of the people from the power of the priests. The consequences are felt already all over the wor'd; and to stir the great actitation. Kaulbach painted his wonderfully expressive paintine, which represents Peter Argues, the Sant, in the act of condemning a Protestant tamily to the stake, for which acts he has been several hundred years afterwards rewarded by his Holiness, Pio Nono.

Copies of the painting are sent by the hundred thousand all over the world. It represents before the entrance of the tribunal of the Inquisition at Saragossa, Peter Argues, the image of the blind Fanaticism itself, above his head the circle of holiness. The appearance of his figures reminds you of the bloodthirsty hyena, and at ness. The appearance of his figures reminds you of the bloodfairsty hyena, and at his feet by bags full of gold and silver and pearls, which were offered by the rich Spanish Protestant family to the Church. The family will be executed and the money configured. The family group in the foreground is nobleness itselt; it shows you in everything a refined, educated, and rich family. The face of the father expresses that there is no hope, and he is resigned to his fate. The mother's picture is horrible to look at; desperation in her eyes; already her wide open eyes stare at emptiness; she does not even hear any more the bitter cries of anguish of her two beginning the discussion of the control of the control of agreements of angients of the control of the man bodies, and between them march a number of monks, carrying a crucifix. Above the entrance of the Palace is the statue of Madonna.

Such a picture, which honors the courage of the great master, will have more effect than a thousand books, and Germany will steadily fight her victories for religious liberty and progress.

Notarial Bond.—Mr. E. V. Joice has filed his Notarial bond, with R. H. Waterman and Anthony Ludlum as sureties.

## A Stage Kiss.

The following little episode has just occurred at the Imperial Opera House in Vienna. In Lortzing's Waffenschmied there is a scene where Count Liebenau, Herr Neumann, has to kiss "Trmentraut," Mdlle, Gindele. The kessing cannot be Herr Neumann, has to kiss "Tementrant," Mølle, Gendele. The Ressing cannot ne omitted, because in the two fellowing scenes the conversation is continually turn-ing upon it. After "Trmentrant" has commanded the Count to kiss first her right and then her left hand, she winds up by saying, "And now the lips." Full, prob-ably, of his part, Herr Neumann, in rep yto this chridenge, gave Mølle, Gindele, at the first performance, the kiss specified in the stage directions. The lady was at the first performance, unpartied to the minagement. Eagle (Precything like argument to the effect that the person on the stage was "Trunchtant and not do a coincide proved perfectly unevalving. She declared—by first insulation of the horizontal and the document and the stage of the person of the stage characteristic first insulation of the person of the stage of t and that, if she could not obtain reparation from the management, she would seek and that, if she could not obtain reparation from the management, she would seek it from the law. Several days claused, and the affair was a truth topic of conversation. At length the Wafforschmidt was again put up. All the minated were very curious to know now the kiss scene would go off. After "count Lachenson" had kissed "Inmentrant's "right and left hand, the hely said: "There: I well not trouble you for the kiss on the lips. Her Neumann hereupon queky replied: "Thank Hawen that I have not to kiss that firsh!" Malle, Gindele became so excited that she had to be carried in a fainting state to her room. She has again compound to the management. Stage juriest are deeply underseted in the matter, for they want to know whether a kiss even in character to a lady on the stage can be recorded as an insult to the conjugate. be regarded as an insult to the recipient.

### Book Notices.

THE CARIN BOOK: OR, NATIONAL CHARACTERISTICS.

A beautiful and well-fold story, illustrating the founding, revolt and liberty of "Texas." A sample extraction this lists volume win recommend it to all our readers: "Had Mexico once a right upon Texas, it had long ugo absolved the readers: The steeme of practiced with us; and not only that, but not aggregation of Fight by the minister of practiced with us; and not only that, but the high unrestricted of liberty—as well political as religious, urgently domained these paratron of Texas from the mother country. So, at least, reasoned our greatest revolutionists. In low that these reasons would in no way stand the test of England. What of the low that these reasons would in no way stand the test of England. What of the world, if professors of international right had robed the who do it the worlds is the world in the standard way to the British merchants right to the East Indias. Who gave Massachusetts, Bhorde Island and Viegonia to their Kanse. The regist of the strongest, was it not! But the right of the stronger, with all its wrong brings in its train much good, very much good; so much so, that it for exceeds all the cvil. The founding of Privas State gave honor to the handful of men who ded it. They have shown how to effect great things with the smallest means, and where such patriotism reigns we may repect great things." We advise every one to read this book. For sale at A. Roman & Co., 11 Montgomery street.

HALF-HOUR RECREATIONS IN POPULAR SCIENCE, -We have before us one of the most useful little compendiums of scientific knowledge that has appeared for some time. Its writing is clear and free from those obstrass brain which are from to puzzle and dishearten a beginner. Its daagrams are well executed, and marked in such a plain way that the relations between the subject ang the instruction seen at once. Its sentiments have a moral tendency, and we feel sure that a few seen at once. Its sentiments have a moral tendency, and we feel sure that a few half hours devoted to the perusal of these valuable works will amply repay the reader. The subjects that have already been handled by the "R creations" are the following. No. 1, "Strange discoveres respecting the Aurora, and recent Polar researches", by R. A. Proctor, F. R. A. G. No. 2, "Grant admittes of Man and Ape," by Prof. Rudolph Verchon, of Berlin, author of "Celou ar Pathology," No. 3, "Spectrum anaevise explained," and uses to science flustrated. Each writer has evidently made the subject of his article his especial study. A collection of the various prunchlets, when bound, will make a most useful and comprehensive work. It is published by Lee & Sheppird, Boston. San Francisco; A. Roman & Co. and Bancroft & Co. New York, Lee, Shephard & Dillingham. lingham.

#### Tobacco Culture in California.

Tobacco culture is likely to become one of the great enterprises of this State. Tobacco culture is likely to become one of the great enterprises of this State. Some months ago we notice do the fact that a number of sangure men experimented last year in raising tobacco with great success. The present year more extended experiments will be tried. In the neighborhood of Girosy from sevents to one hundred acres are to be planted. The soil and clumate there, remarkably well adapted to the cultivation of the consoling weed, will, it is said, produce an article equal to the cultivation of the consoling weed, will, it is add, produce the consoling weed, which is the consoling weed with its factor of the consoling weed. as famous for raising tobacco as she now is for producing wheat and god. There are hundreds of thousands of acres in this State which, planted in tebacco, would yield an immense revenue. It is stated that a company have ng a cash capital of a quarter of a million of dollars has been organized in his city for the purpose of establishing a tobacco plantation,

# To-Day.

A single sparkling drop Of love divine Presses my mortal cup; To-day is mine—

Mine all its fleeting hours. Its golden light; Mine with its highest powers, Its scroll to write;

Mine ere its moments fly, To toil and pray,
To lift mine eyes on high—
This brief to-day.

Soon in the purple west Its beams shall cease; Oh, happy in my breast To write its peace!

## New Incorporations -- The Bowels of the Earth.

The following certificates of incorporation have been filed in the office of Secretary of State:

Baker Hill Mill and Mining Company; object, mining on claims in Cherokee Mining District, Plumas County, State of California; capital stock, \$5,000,000. Trustees -J. D. Fry, W. H. Sears, Thomas Nelson, M. D. Townsend, W. F. Myers.

Mining District, Planas Coulty, State of Californa, capital stock, Symmonous Trustees J. D. Fry, W. H. Sears, Thomas Nelson, M. D. Townsend, W. F. Myors. Place of business, San Francisco.

Midas Gold and Silver Mining Company; object, mining in Storey County, State of Newada; capital stock, \$1,600,000. Trastees—R. C. Wilcox, D. L. Hastings, R. M. Black, J. G. Libbey and J. A. Pritchard, Place of Dusiness, San Francisco. Genessee Mining Company; object, mining in Lyon County, State of Newada; capital stock, \$3,000,000. Trastees—James A. Pritchard, Chaunevy B. Land, John Gillig, C. W. Kellogg, H. H. Hagg. Place of business, San Francisco.

Amended certificate of incorporation of the Gold Hill Tunneling Gold and Silver Mining Company. The capital stock of this company is increased by \$2,000,000; its object is mining in Gold Hill Mining District, Storey County, State of Newada. Trastees—P. Sutro, P. G. Venard and Chas, Sutro, of San Francisco, and J. Mayer and H. Nugent of Virginia City. Place of business, San Francisco, Frear Stone Company; object, the manufacturing and selling stone under the Frear patent; capital stock, \$500,000. Trustees—N. W. Spaulding, James Gamble, N. P. Paine, L. A. Booth, George C. Potter, C. F. McDermott, E. Tupp, W. E. Miller, George W. Beaver and Egbert Judson. Place of business, San Francisco. Odd Fellows' Hall Association, of Nevada; object, to purchase a lot and erect suitable buildings for the use of the society; capital stock, \$15,000. Trustees—Jonathan Clark, John W. Hinds, Charles Marsh, Halstead Stansheld and Andrew H. Parker.

South Belcher Mining Company; object, mining in Gold Hill Mining District, Storey County, State of Nevada; capital stock, \$4,000,000. Trustees—Joseph Roberts, Jr., Joseph Clark, T. B. Lewis, M. J. Martin and E. M. Frey. Place of business, San Francisco.

Lord Byron Mining Company; object, mining in the Devil's Gate Mining District, State of Nevada; capital stock, 82, 00,000. Trustees—G. W. Beaver, J. W. Roberts, C. F. Balcom, G. W. Blake and H. W. Arnold. Place of business, Sec.

Francisco.

Consolidated Gold Hill Quartz Mill and Mining Company; object, mining in the State of Nevada; capital stock, \$2,000,000. Trustees—II. II. Flagg, Robert T. Morrow, Geo. W. Beaver, Charles Forman and Robert Sherwood. Place of business, San Francisco.

San Francisco.

Plymouth Rock Mining Company; object, mining in the Little Cottonwood District, Salt Lake County, Utah; capital stock, \$2,000,000. Trustees—Moses H. Renjamin, John J. Marks, James L. King, A. J. Bryant and F. J. Thibault. Place of business, San Francisco.

Harper Mining Company; object, mining in Lincoln County, State of Nevada; capital stock, \$1,500,000. Trustees—Robert Sherwood, Chas, F. Hamilton, Samuel Dixon, Wm. L. Higgins and P. E. Connor. Place of business, San Francisco. Cedarburg Gold Mining Company; object, mining in Greenwood Mining District, El Dorado County, California; capital stock, \$4,200,000. Trustees—A. J. Morell, Philip Mointhardt, J. G. Bitty E. W. Hullford, W. R. Davis, James C. Pennic and Geo, P. Fisher. Place of business, San Francisco.

Bismarck Mining Company, to work in Sacramento District Humbold County.

Bismarck Mining Company, to work in Sacramento District, Humboldt County, Nevada; capital \$5,000,000.

Providence Company, to work mines in the State of California: capital.\$3,000,000. Cerbat Consolidated Company, to mine in Wallapi District, Mojave County, Arizona; capital \$4,000,000.

Sutro Mining Company; to operate in Virginia District, Storey County, Nev.; capital, \$2,400,000.

capital, \$2,400,000. Columbia Smelting and Mining Company: to mine for gold and silver, to crush and smelt the ore from the company's mines, and for such other mines as the company may select, in San Diego, State of California; capital stock, \$5,000,000. Trustees—W. Weeks, J. W. Tripp, John Whalen, D. Friedenrich, G. Jancovich, H. G. Coward and K. Tierman. Hayden Hill Mining Company; to conduct and carry on the business of mining and milling in all its branches, in the Hayden Hill Mining District, Lassen County, State of California; capital stock, \$5,000,000. Trustees—A. W. Bean, Samuel Fair, Geo. W. Pinney, S. A. Raymons and H. H. Brown.

Europa Mining Company; to carry on the business of mining in all its branches, in Gold Hild Mining District, Storey County, State of Nevada; capital stock, \$2,000,000. Trustees—H. T. Wheeler, J. H. H. Williams, C. H. Kingsiey, C. Cortes and S. R. Thomson.

Marion Silver Mining Company; to carry on the business of gold and silver mining in the Marion vein, Eay District, Lincoln County, State of Nevada. Trustees—M. J. M. Donald, P. E. Connor, Charles M. Leavy, Charles F. Hamilton and George W. Blake.

George W. Blake.

The Pacific Cordage Company: to manufacture cordage of every kind, in the city and county of San Francisco: capital stock, \$200,000. Trustees—John Parrott, Oliver Eldradge, James Ois, Jahes Howes, J. D. Farwell.

The Mohave Consondated Coold and Silver Minary company, to mine for gold and silver in the Warapi Mining District, Mohave County, Territory of Arizona; capital stock, \$200,000. Trustees—M. G. Gillett, F. G. Berry, R. Denvon, C. P. Hull, Richard Wheeler.

Providence tool and Silver Mining Company; object, mining in the State of California; capital stock, \$3,000,000. Trustees—B. C. Wheting, A. D. Hatch, L. J. Lewis, E. C. Fellows and E. O. Brown. Place of business, San Francisco.

Lewis, E. C. Fellows and E. O. Brown. Place of business, San Francisco. Original Good II I Gold and So ver Mining Company object, maring a coast Hill Mining District, Storey County, State of Newada, capeta stock, 39,000,000. Trusteess, G. D. Reberts, R. F. Morrow, C. B. Land, James O Donnell and J. B. Overton. Place of business, San Francisco.
Goddes and Bertrand M.II and Maning Company. To mine in Bertrand Mine. Nos. 1 and 3; known as the Callo Man, and the Goldes, Mones Nos. 2 and 4, and the Leatt Valory Mine, in European Stories on 10,000 shares. Trustees. Louis Bertrand, Sanure Goodes, S. W. Lee, M. C. Havrerd and K. A. Escale.

Gopher Gord and Silver Mining Company—To mine in the Gopher Lodge, Devi's Garband Chindwan Mond, District Capital Stack, \$2.00,000, in 20000 stages, Trust on J. P. Jones, J. A. Puttherd, S. A. Raymond, B. H. Freeman and Henry

Raymond.

Alta Silver Mining Company To mine in Good Hill Mining District, Storey County, Nevada. Cap to stock, \$2,000,000, in 26,000 shows. Trustees C. Jones, C. B. Land, J. L. Vanbokkelen, W. F. Meyers, M. D. Townsend.

South Constock Goods and Stroot Manin, Company Townsend, Sector Goods and Stroot Manin, Company Townsend, Cap to stock, \$4,000,000, in 26,100 days, Townsend, A. K. P. Harmon and James A. Pritchard.

Leo Maning Company Townse and min, in Good the Means District, Capital stock, \$4,000,000, in 29,000 shores. Trustees F. Schwartz bid, L. W. Wood, Win, H. Sears, H. W. Byington and A. Staples.

Wolverme Memag and Mining Company, townse in Calaveras county, in Independence, and Rayroad Fix Quarty Maning District, Capit, stock, \$2,000,000, in Shores of \$200,000, in Trustees S. B. M. Hartshorne, W. H. Tayor, Win, Merris, W. H. Moor and E. Norton.

Asthema and Humboldt Consoidated Mining Company, Object. Townse niver Stat M. Ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Stock, \$2,000,000, in Silver Stat M. ming. District, Storey county, N. v. da. Cap to Storey Cap States.

Silver Stat Muniz District, Storey county, Newton, equive shock, St. Sississon in \$100 shares. Trustees Charles Jones, C. B. Land, A. P. cischbacker, John Celliz and Wm. H. Watson.

Chief of the Hi.) Mining Company, to mine in Ely Mining District, Lincoln county, Nevada Capital stock, \$2,000,000, divided nto shares of \$100 each Trustrees J. B. Haggun, John P. Jones, Chas. E. Elliott, H. C. Kibbe and Jessif S. Wali.

Wali.
Victor Silver Mining Company, to mine in Ely Mining District, Lincoln county, Nevada. Capital Stock, \$1,800,000, in \$100 shares. Trustons. John W. Gashwiler. Robert Sherwood, M. J. McDonald, E. J. Baldwin and Joseph Clark.
Setting Sun Silver Mining Company, to mine in Ely Institut, Lincoln county, Nevada. Capital stock, \$2,000,000, in shares of \$100. Trustons John W Gashwiler, Robert Sherwood, M. J. McDonald, E. J. Badwin and Jesseph Clark.
Dunderburg Mane and Meh. Company. To carry on bessures in Memo county, Capital stock, \$5,000,000, divided into 5,000 shares of \$1,000 each. The Trustons are J. P. Jones, A. H. Rose, George Monekton E. B. Rail and O. H. Rose.

arc J. P. Jones, A. H. Rose, George Monekton, E. B. Rail and O. H. Boyd.
The Crown Fount cond and Storer Mit. a. Company vest rank find use artificate
of increase of capital stock from \$3,000,000 to \$10,000,000, divided into 100,000

The Best & Belcher Mining Company have also filed their certificate of increase of capital stock from \$448,000 to \$896,000, in \$100 shares.

#### Guaymas Railroad.

Our Guaymas correspondent, under date of April 18th, writes as follows: The concession asked for by Mr. Eldridge is from Guiymas to the frontier. It wenty-five sections to the mile; the State to guarantee the interest on the Company's bonds at eight per cent, to be issued at the rate of \$50,000 per mile of the road built. The Company failing to pay the interest, the State pays and takes the road, etc. This is the concession—the main points asked for. It's before the State Legislature, and I hope it will pass, as Sonora needs something to give her new life and turn the ability of her people in the direction of industry and in provemment.

## Remarkable Prophecy.

Captain Benjamin Bichardson has obligingly sent us the following remarkable prophecy, which is known as "Mother Shifton's Prophecy." It was first published in 1448, and republished in 1641. It will be seen that all the events it predicts have come to pass, except that contained in the last two lines, which is still in the

Carriages without horses shall go, And accidents fill the world with woe; Around the world thoughts shall fly In the twinkling of an eye. Water shall yet more wonders do: Now strange, yet shall be true. The world upside down shall be And gold be found at the root of a tree. Through hills man shall ride, And no horse or ass be at his side. Under water men shall walk,

Shall ride, shall sleep, shall talk. In the air men shall be seen, In white, in black, in green. Iron in the water shall float, As easy as a wooden boat. Gold shall be found and shown In land that is not now known. Fire and water shall wonders do. England shall at last admit a Jew. The world to an end shall come In eighteen hundred and eighty-one.

# Leaves from a Lady's Diary.

May 12.—Nothing I dislike so much as leave taking. Went with dear pretty Mrs. C— to Oakland to see her dragged away by the train that screamed as it in triumph, as it whirled away the prize. Such a melange of passengers on the boat; plienic parties all excitement, and baskets and a theatrical troop that were evidently old stagers and accustomed to move from place to place, and had a kind of property man to look after their luggage; a poor young girl all alone, who cried silently, and about whom one could imagine a history. Returned home, and was not fit for any-

thing all day

May 13. - Everybody going out of town, exchanging the comfort of their homes for hot, poky rooms in a badly-kept hotel, or else making believe to go into the country by hiding in an eighteen by twenty shanty on the confines of Oakland, with regretful looks at the hills of San Francisco and an occasional shower of dust with regretful looks at the hills of San Francisco and an occasional shower of dust from those melancholy live oaks that never seem to grow, never to change. I have often remarked about Oakland that one doesn't see a young oak there, but only sad old fellows, that belong to the ancien regime. There is a line in Keats' Hyperion something about "tail oaks that so live on without a stir," that exactly applies to these. Fanny B—— came running in, as she always does, in a state of excitement, to tell me that she had got a new friend, such a dear, darling, delightful girl, she was quite in love with her. It will last about a week, and she calls that friendship, when it is nothing else but companionship, as different one from the other as modern stained glass is from that of the moyen age—the one is laid on as with a heapth and soon wears off: the other nervades the whole mass and canasa. with a brush and soon wears off; the other pervades the whole mass and cannot change. The one is a lost art. Is friendship also extinct in this modern time of frivolous excitement?

MAY 15.-How selfish this stock gambling makes one. What do I care who is ruined so long as Henry makes money, or how can I rejoice in another's fortune if Henry loses? That melancholy, tearful old grumble, Mrs. T—, came and ponred her sorrows into my unwilling ears to-day. She professes the most unbounded love for her husband, and yet is always talking of the sacrifices she has made for him. for her husband, and yet is always taiking of the sacrifices she has made for him. My opinion is that when lovers begin to count over their sacrifices, or friends begin to reckon loans of money made to one another, then both love and friendship have field to more worthy objects. Bored to death dining at the  $H = -s_1$ ; sat next to that dummy, Mr. C = -, a man who bows over his plate and talks solemn nothings with an oracular tone. Henry said, coming home, that he was just the sort of man who will spend a whole afternoon leaning over a bridge and spitting into a river. One of those men that you never ask if he has done anything, you feel sure that he near here and feel also that it is not true he about part.

that he never has, and feel also that it is better he should not.

## Chamber of Commerce.

Mr. R. B. Swain, the retiring President, closed with the following utterance: Mr. R. B. Swain, the retiring President, closed with the following utterance: "In conclusion, permit me to congratulate members upon the flattering business prospects of the present year. Never before, in the history of the State, has such a hopeful future been presented. The copious rains of the past winter have gladdened the hearts of the farmer and the vinturer, who already feel assured of abundant harvests. The enterprise of the miger has promise of unusually rich reward. in the increased production of the precious metals. Indeed, all the resources of In the increased production of the precious metals. Indeed, all the resources of the State are rapidly and surely developing to a degree which inspires confidence in its future prosperity, and in the happiness of the people." The Chamber then elected the following officers, Mr. Swain having declined to accept the Presidency for another term: President, C. Adolph Low; First Vice-President, W. T. Coleman; Second Vice-President, I. Friedlander; Trustees, W. F. Babcock, H. P. Blanchard. C. Christiansen, Oliver Eldridge, James Otis, Thos. H. Selby, J. W. Stow, John H. Wise, Albert Dibblee, Levi Stevens, R. B. Swain and Horace Davis.

#### Have We A Mission?

There are many journals published in the United States which pretend to have special "missions". It is as much a necessity for some newspapers to have a "hobby" as it is for women to have a "hubby. In either case some deusion has to be bu\_cd, or else the axle whee's of the universe are declared to be ent of has to be fine od, or else the rate where so the universe are do three the constituent of oder. With near the to the masses on of newspiers, much depends upon the brain power at the helm. The lettle seets and pottles which have herefore power to presented by pany time botted populars are going to decay. As people occurred educated, the ratical are on unred, the populars boson with an insularization of the first directed editors who pany the role of Jacksofad strades because definition and are ranged advantaged or directions. These editors and powers to be consequently. which continue to champion speciaties are an engst the most si kix is stant ons of where continue a chang on specific are an engage inclined as lay institutions of the country. The party position, organ, once a powerful engine, is required when our its place being substitution by journa's having a greater scope of the office and more extended views of the necessities and changes of the lates. Such is party to the New York Technology, the Springfield Republicate, Uncurrent Conversed and the New York Trusting the springhete Reputerion, the thinks to broad and the Lousvije Couriers down and have made great advances towards a general redefence pendence. They are no longer detailed to veparties, but rather detects to them, Strict party organs, like the New York Times, however also vertee are who tever Strict party organs, less the New York Times, invested any original, which by it the merits may be cannot hope to have that influence and prover which is no read by independent journals. The religious newspapers are also make a rape of towards independence. The federal and is he hadron which, the Labora Correction and the Index, and short or inclined to lither distribution for the religious power of the federal and the still may also a region of some or the still may also a significant of the laboration of parts and seed are no losses and the day the control sector in class. The originals of parts and seed are no husks and cf. witherem of sector in that. The origins of parts and social remoining recognized powers in the and. They are more street in the experimental posters and removal for support. They are more street in the experimental in posters and remoining them with he associate of grantle on the horizontal remoining many forms of grantle or or the reflect of remoining the product which is supported by the original parts of the many of t institutions are not on a solid basis. What we written the cers highly of mind is more powerful than even the consingulative of blood a Bood a cross are frequently bitter enemas, and in a national seaso often resort to tradity itarical strates. Domestic life and national existence amply the strates the and national existence amply the strates this. But where there is a consanguality of mand there is harmony. If we neighborstompt where there is a consan musty of mind there is harmony. If we me labels improphery we should predict that in the mear ages to come the goop of the lab ted states we, be a tankly in their policiest and records mode or their labels. The journals we have mentioned as representing advanced policies and early one shows the gaining accessions years), and all such will be to the loss of party and sectation power, often the controlling element. Indeed, this progress toward, bloom to advantage with controlling element. Indeed, this progress toward, bloom to advantage with controlling and the labels of the labels of the labels. where the New Letter stands the advanced guard of free theo, art, two bold and fearness advocate of the highest, nobest and most exalted ideas when the the human sont. As to ourselves, we have never claimed to have are special intestion. The Nan Letter aims to be a practiced news, commercial and it is as pourml. But we recognize the fact that some men are gibed to see into be it have, their But we recognize the fact that some man are glidd to see into be faune, their destiny is of such a character that they lift the ven for us and show mister read that we she'd travel in the year to come. ## The "Grab?"

With ears erect, and with sonorous bray,
The Atta—ever seeking "jobs" that pay—
Thus roar'd at Stanford: "Grabber, be thou still!"
Behold: Goat Island 'waits the "grabber's" will.

Alas the Central! thus to be bewray'd; How ill it judged the power the Alta sway'd! If "sixty thousand" were th' alluring bid. 'Twas scant reward for all MacCrellish did.

н.

## There!

America has finally taken her rank among foreign nations, and is now recognized among the powers of the carth as respectable and first class. The civit war helped us amazingly. When it was ascertained that a republic could cut throats like a king, and that Democrats could wage a war as bitter and as brutal as the rule of an hereditary aristocracy, we immediately went up in the scale of nations; but he last and finishing touch is to send our Princes abroad. The Prince Imperial of the louse of Grant, and heir apparent to Long Branch and the Seneca stone quarries, has gone to visit the crowned heads of Europe, in a Government war vessel all bristing with gans, and commanded by an Admiral, having for his companion the scale of national contents of the Republic the brown old hen who pecked a hole in the empty Southern egg and found nothing in it—nothing except tarkey-gobblers from Atalanta to the sea. This gallant young Lieutemant, who has so bravely cut loose from his mother's apron strings, and now under protection of a first class war frigate, has dared the dangers of foreign travel, is the guest of the Sultan of Turkey, and is sporting upon the sweet water of the Boshorus and the golden horn, having a good time at the expense of the people who will graciously submit to a tax of some hundreds of thousands of dollars in order that the Prince Imperial may enjoy himself abroad. Could any crowned head do more for its heir? The Prince of Wales had his first among our pretty girls. The heir of all the Russias had his fling at our buffalos. Why should not the young American Telemachus go abroad with his mentor to sport among the nymphs in the gardens of the Sultan, and have a good time with the houris in the harrens of the Crescent? But not only have we a Prince but also a Princess traveling in foreign climes. Other royal families are content to have one seion abroad, but as the femire of our kingly office is short, we are compelled to precipitate matters somewhat, and send those though on the vome families are content

## "The Cup is Not Found in Benjamin's Sack."

Just at the last hour, as we are going to press, information comes to us that a telegram has been received from London with the intelligence that Mr. Judah P. Benjamin has given a legal opinion to the Anglo-California Land Reclamation Company to the effect that a foreign corporation cannot hold real estate under the laws of California. We have great respect for the legal learning of this distinguished gentleman, but the announcement strikes our California lawyers with surprise. We had supposed that our Constitution and laws provided that lands and real property might not only be held by foreign owners, but transmitted to their heirs. It will also strike our English fellow-citizens as somewhat singular that all the property womed by them is held by so uncertain a tenure as indicted by Mr. Benjamin. Divers banking houses, business blocks, villa residences, farms and town properties scattered over the State are owned by Englishmen who have had their titles passed upon by half the lawyers in the State, and it is left for Mr. Benjamin to discover the fact that Englishmen may not hold and own lands in California. Doubtless some error in the dispatch.

#### Is It Not So?

We can see a great deal and think a great deal by occasionally turning aside We can see a great deal and think a great deal by occasionally turning saids from our counting desk and editorial room, from the busy cares of everwelly life and the small perplexities which are the common lot of us all. The mend will not be content when claimed to the treadmil of routine work. It has a his her and better destiny. For instance, the thoughful citizen, rais ng his lead from his counting desk, orders and receipts, may have asked himself how it is that our bar-rooms and belikard saloons are filed mightly with young men whose I ghost amb bit on seems to be in pushing a comple of round balls at the end of a long stack. The congenual change from this silly performance is to the eight or whisky class. The congenial change from this strip performance is to the cigar or whisky mass. Perhaps as a recreation billiard playing is not to be denounced as an artist a strip ampsement, but where young men have no higher aim than this they certainly ment our profound contempt. If a few of the hours devoted to be raisely were given to reading we would not have so many wretched abortions of our men as are commonly known under the non-coveted title of "men about town." Again, our streets are filled with Hoodlums, and our alley-ways with mud incrusted Arabs, our streets are men win troubility. The who may not according to the term of the wheel of Fortune, become Presidents, Senators, or immates of penitentiaries. These three elements, the "men about town," the Hoodiums and the street Araba, are, we take it, in a great measure the result of our much boasted and londy enloying we take it, in a great measure the result of our much boasted and boolive elogized common school system and its opponent. In the first case the ind's draws expresenting that class have had what is called a common school education. This means to say that they were put through the educational mil much after the manner in which dogs or rats or squirrels turn miniature codes mills. In bong educated their young minds received no solid moral education, no solemn and impressive ideas as to their future duties as men and citizens were medicated, and impressive items as to their feture detres as then and curzons were the characteristic they were turned out of school with just enough of education to a down them from stupid shorance. Finding thems does in a world of great network where men are constantly warring for supremacy, where the bottle for bread and futter is prolonged through a life time, they find themselves on the field poor's equipped, is protonice through a file time, they find themselves on the field poor's equiped, and acknow edging their helploss, situation they become what is known in ring language as "sku kers." You can see battalions of these tenfortunate sku kers on Montzom ry or Kearny streets any day in the week, saturdays not executed Here then is one of the evil products of our common school system. Protest and its inception and genius. As to the Hoodburns and street Arebs, they are the evil results of Catholic education. While at school they receive too much moral training, are being constantly impressed with the solemnity of life, the seints and training, are being constantly impressed with the something of the, the senters and angels are held up to them as paterns, and the poor creatures come into the great outside world where all is contusion and perhaps corruption. The change is too great; they loose their balance, and, characteristic of human nature, 20 to extremes, and thus are Hoodeums manufactured. The legitimate of speing of the Hoodeum is the street Arab. How to remedy the defects in both these shool systems may now be asked? We answer, by Keeping the youth of the rind and from the manipulations of pradish priests on the one hand, and gageting girls on the conclusion. from the manipulations of prudish priests on the one hand and eggeting errls of a the other. How can a priest who has never known the dwine pussition of a father a soul, or a young girl who has never experience d the heavenly emotion of a mother is heart, be in sympathy with the tender bads of homan promised neutrosted to their care? Either of these is unit to teach the young ridge how to shoot. The priest is too gloomy and solvenn, the young lady teacher, with the exceptions, too frivolous and fretful. Tutil the schoolmasters and schoolmistresses of the country are recognized as being members of the learned peadesolmisms, and are specially fitted for their avocations through mature age, have characterises and school has the properties of the second peadesolmisms. and genuin love of humanity, just so long will our common school system and the other system turn out regiments of "men about town," Hoodlums and street Arabs.

It is curious to note how the exigencies of politics oblige sovereigns to cultivate the most friendly relations with those who are the worst enemies of one amother. Thus we read of Queen Victoria paying a visit to Chiselburst fo-day, white to-morrow she is as likely as not to drive over to see some member of the family whose property her host of Chiselburst so ruthlessly confiscated, and who hold him as a scoundrelly adventurer. It is generally understood in England that the Empress Eugenie made a most favorable impression on the Queen of England that the amenorable occasion when Louis Napocon paid a visat in state to Windsor, and was invested with the star and ribbon of a "K. G.". It was noticed at the time that the adieux of the English royal family seemed so far, at least, as their distinguished had yenest was concerned more like that of persons parting with an old frend for whom they entertain warm regard, than with a good-bee to a new acquaintance. No doubt the Queen, with her innate goodness of heart, is determined now to prove that it is not always true that

<sup>&</sup>quot;Friendships commenced in the Summer Die when the Winter comes on."

<sup>—</sup> The award of \$60,000 San Mateo County Bonds was made to Woods & Freeborn, of San Francisco, at 165%. The bonds bear interest at the rate of ten per cent, per annum, and run fifteen years, with interest payable annually.

## To a Debutante at the Queen's Drawing Room.

In spotless virgin white,
With lilies, "just a few,"
And here a diamond flash,
And there a drop of dew;
As a fair ship new launched,
With snowy sails unfurled,
Doth tempt uncertain seas—
So thou the unknown world.

Adown the tearing stream,
O beauty, venture not!
Lest in the fuller life
The old life be forgot.

Lest on the world's sandbanks
I some day see thee cast;
With no o d memories
Of any holier past.

Or, wrecked on social reefs,
Thou shouldst return no more;
Or drift, with storm-rent sails,
A battered hull, to shore.

A battered full, to shore.

Not so. The glad waves leap,
And the clouds break above thee,
To show that Fate will smile,
And men and Heaven love thee.
—[Alice Horton in the Graphic.

#### Court Chat.

— The Drawing Room on Tuesday, April 23d, though not remarkable for the number present, was one of extreme distinction, from the rank and fashion of those who came to pay their depoirs to the Queen. If the great flower shows of the season are of mark among the general public for the display of rich costumes generally witnessed there, and give ample scope for observations and for after comment, the great Court gatherings of the city at the comment, the great Court gatherings of the city at the court gatherings of the city at the court gatherings of the city at the great Court gatherings of the city at the great Court gatherings of the city at the great Court gatherings of the city at the city a gant and distingue attire must always, among those present—among the relatives, the friends, and the general fashionable public be events of exceptional interest in those respects. Therefore we have, as is our custom, endeavored to make the record of costumes as complete as possible. The efforts to introduce the new shade of blue have been more successful than was the attempt with the delicate shade of blue have been more successful than was the attempt with the delicate green tinge, although white and pink were en masse, and violet was much paironized, having a very prononce effect. The fashion of coffure has undergone a notable change, and in place of the heavy chignons there was a light and graceful style arranging the hair, consisting of curie ondule, tied with bows of hair. Another style it hat looked most becoming was a chain of hair with curls tuned up, instead of hanging down, the effect in front being very pleasing. The feathers being artistically fixed, the whole of the coffure could be seen, and it was a great improvement on the veil covering all the hair. The Queen wore a black satin dress with a train trimmed with crape and jet, and a long white tulle veil, surmounted by a coronet of diamonds. Her Mujesty also wore a necklace and brooch of opals and diamonds, the Riband and Star of the Order of the Garter, the Order of Victoria and Albert and Louise of Prussia, and the Saxe-Coburg and Gotha Family Order. Her Royal Highness Princess Louisa, Marchioness of Lorn, wore a ruly tulle petticoat and a ruby satin train trimmed with Honiton bee and daisses. Headdress, diamonds, emeralds, feathers and veil; ornaments, diamonds and emeralds. Orders, orde ticoat and a ruby satin train frimmed with Honiton bee and daisses. Headdress, diamonds, eneralds, feathers and veil; ornaments, diamonds and emeralds. Orders, Victoria and Albert, Coburg, and St. Isabel. Her Royal Highness Princess Reatrice wore a pluk satin dress trimmed with Brussels point lace, a headdress of white daisies, and ornaments of pearls, emeralds and diamonds. The Duckess (Dowager) of St. Albans wore a train of rich black glace, trimmed with black lace, ruches of tulle, and jet, with covarge to correspond; black tulle netticent over black glace slip, trimmed with ruches of tulle, glace and jet. Cofffure, feathers, black lace alappets, diamonds and jet, ornaments, diamonds and jet. The Marchioness of Hertford wore a train and corsage of black satin, lined with black sik and trimmed with Brussels lace looped with velvet; with Brussels lace and black velvet, an echarpe of Brussels lace looped with velvet; black tulle perticoat over a silk slip; headdress, plume and lappets; ornaments, diamonds. The Marchioness of Waterford wore a dress of rich black poult de soie, trimmed with graduated bands and folds of white satin and black silk, with large bows; train of black and poult de soie, trimmed with deep band of white satin and folds to match; ornaments, pearls and diamonds. The Countess of Caledon wors a wich black worst resume with tulb housillows. don wore a rich black moire train, trimmed with tulle bouillonnees and pleatings, edged with satin; jets laid in the bouillonnees, and rich black and white satin bows with white fringe; moire petticoat, with waved bouillounces, and fans of black satin lined with white satin between each wave; black tulle tunique, looped with black and white satin bows; sash of point lace, and train tunique and body all trimmed with rich old point lace. Plume and lappet, tiara of diamonds, and Victure of the point lace. toria and Albert Order.

— The Prince and Princess of Wales left Rome on April 8th, by special train. Prince Humbert, the Prefect, Signor Gadda, the Mayor, Signor Crispigni, and all the members of the British Legation were present. The Prince and Princess will remain in Florence ten days, and then leave for Milan. The Prince of Wales received at Rome the same honors as were paid to Prince Frederick Charles of Prussia.

Lord Bute has written a letter, composed in the most excellent Welsh, to the Arch-Druid, thanking him for the "Peithnea," which he composed and presented to his lordship on the occasion of his marriage, recently. In that letter Lord Bute informs the Arch-Druid that Lady Bute has "taken possession of the 'Peithnen,' and placed it in her own room."

— It is reported that the ex-Prince Imperial of France will visit the United States this Summer. He is now sixteen years of age, and is said to speak five anguages fluently.

# Congress and Steamship Subsidy.

The Senate, as well as the House, has shown, as it seems to us, a narrowness of The Schate, as well as the House, has shown, as it seems to us, a hardwares of view on the question of subs diging American lines of deamships. There should have been no hesitation in doubling the amount paid to the China line, her in greatly merasing test allowed to the Braz-lam line, nor in librariany scheening the line to Austra in and the South Sea Islands. And the country would have been the galactic fischmatching had been done in tay of of creating regular strain-ship communication between New York and Buenes Avres, and between San Francisco and the South American coast. Congress has never been very charvabout aving away the funds of the prophe to help corporations, build, railroads, though if is coar to all now that the exact of giving away land is worse than that of giving away money, since whates, r less and to see that the chances of the common people to acquire house must augment poverty and be plessness, and lesses the augment poverty and be plessness, and lesses the augment poverty and be plessness, and lesses the augment of the general deep pendence and manhood which are the bulwarks of a republic. The steams, p incependence and manhood which are the bulwarks of a republic. The sheathst princes always pay back in the in reased amount of enstone duties far more taus the subsides they receive, and he shest bis, what two receive is generally not in the more than the winner of their the weight of the services in carrying the mails. Moreover, aimed add to take about restoring American shapping, here is a plan the best of all and yet the instant it is brothed in imbers cryout against the something monstreads, and they are the same men when he there is to voice showed in the House a perfect willing ness to have the barn of \$156,000,000 intensity and principal to half a dozen ray rook. companies converted into a gath declaring against to injustice of paying a few millions annually for carrying our mals into new countries and their commerce compones converted into a 201, declaring against the injustice of paying a low mit bons ambually for carrying our masks into new countries and their connected back into ours. At this moment there are but thirteen American steams has considered with the city of New York agents froth six forcing most. The American steamshap tomage of that city is \$33 a aimst 139,545 foreign torringe. In each the fourteen erge shapping ports of the lation we have sixty-cited American steamers, of 68,000 tons, with 2,404 American crews, against ninetwisk function, with a formage of 192,649, and crews of 8,788. And why is this 5 Supply because fair and and France and Germany are wise enough to see that the ibertal schedules they pay to steamstip ames are tan-field paid back to them in the enhangement of their commerce and the education of sail ors for their may in the event of war, which the United States is too blind or too marrow in statesmanship to see it. At our expense final and and the continent are having their values educated. At this meant San Francesco is what she is greatly on account of her American steamship lines. Mearce as is that service, it brings to our doors the wealth of Mexico, the North Precite, the South Sou is ands. Austracka, China and Japan. But we should have three times as many straps per animum. That city has say American, and, we believe, one foreign steamer doing a regular base ness with diffusion parts of the world. Their whole tomage is best than 15,000 tons, and their crews less than five bundled men. It is with see the mattern so them. as these that Congress expects us to conquer by our commence the nations of Central and Seath America, to develop the resources of the terming South Sea relands. tral and Smath America, to develop the resources of the tenancy South San plantage to unfold and bring nather for destribution the vast went for tenian, dapan and India, acts to went the trade of Australia. Code and Pres, from Frighted, and when we ask for a latternore said an insetering these magnificant conjects of permitter comes from the House and the Sounders saiden response that the nation can't fail that be true, then let the nation make up its mand at once that it can not take it smoothed as sweet lake rank among commercial powers. Of what award are our Onionial treats a, our productions among the Fig. and Navigator's relating or our Russian purchase, measure we have ships to trade with them. All those covered colonies or friends by a very promise to be werth to us as embraged in the single word commerce, and these we are bindly inviting Ingland, France and Germany to monopolize.

# Udolpho Wolfe's Schiedam Schnapps.

When the pare me dicinal restorative, now so widely known as I dolpho Wolfe's Schnedam Schnapps, was introduced into the word under the indorsation not of four thousand leadure now hers of the medical profession, some twinky wars ago, its proprietor was we haware that it could not who by escape the penalty attached to all new and useft' preparations. He, therefore, enderword to mives it with the strongest possible self-word argumst counterfeiters and me intores it with the strongest possible self-word argumst counterfeiters and me intores it with the strongest possible self-word argumst counterfeiters and me intores it with the strongest possible self-word argumst counterfeiters and me intores it with the strongest possible self-word properties that may be not the purest sparities over manufactured. Its purity and properties having been time ascertained, samples of the article were forewarded to done thousand physicians, including at the leading practitioners in the United States, for the purpose of experiment. A caculate regardence in the United States, for the purpose of experiment, a caculate regardence from thousand of the most cunitent medical men in the Union promptly respondent from the year of the preparation and report of the result, accompanied each speciment proposed to the section on the ordinary injures of commerce, all of which were more or less adulterated, and therefore until for medical purposes. The possible cance come for again the paretter of the account of the section of the accidence of the section of the faculty, a merked superiority over every other diffusive structure as a directic, tonic and restor, two.

PLATT & NEWTON, Sole Agents for the Pacific Coast.

A Day in April.

The wind is high, and in the trees It makes, o'erhead, its ceaseless moan; Like to the soothing monotone, On shingled shores, of swelling seas.

Dark massy clouds ride o'er the sky, And quickly dim the clowing sun : Swift o'er the plains the shadows run; Anon, new brightness breaks on high,

Foretell the evanescent storm;
The rainbow shows its perfect form,
Where dense clouds wear the hues of

Inight.

A sable rook against the blast
Toils bravely up. Too strong to yield,
He dips low down along the field, And clears the far-off hills at last.

The winds are stilled. A solemn hush; No zephyr stirs the slumbering leaf; Lo, in the dead pause, warm and brief, Clear notes outring from brake and bush.

The raindrops, beating through the light, A bar of sunlight, glaucing down [spire, Foretell the evanescent storm; Strikes you lone church, and, from the The vane sends forth a flash like fire, Against the mountain bare and brown. JAMES SILVESTER.

# Laughable Experiment with Mule Artillery.

Out in a certain western fort, some time ago, the major conceived the idea that Out in a certain western for, some time ago, do major conceived one foca martillery might be used effectively in fighting with the Indians by dispensing with gun-carriages and fastening the cannon upon backs of mules. So he explained his views to the commandant, and it was determined to try the experiment. A howitzer was selected and strapped upon an ambulance mule, with the muzzle pointed towards the tail. When they had secured the gun, and loaded it with ball-cartridge, towards the fail. When they had secured the gun, and ionated it with observations, they led that calm and steadiest nule out on the bluff, and set up a target in the middle of the river to practise at. The rear of the animal was turned toward the target, and he was backed gently up to the edge of the bluff. The officers stood around in a semi-circle, while the major went up and inserted a time-fuse in the touch-hole of the howitzer. When the fuse was ready, the major lit it and retired. In a minute or two the hitherto upruffled mule heard the fizzing back there on his neck, and it made him uneasy. He reached his hoad around to ascertain what was going on, and, as he did so, hile a body turned and the howitzer began to sweep around the horizon. He had a last became excited, and his curiosity grew more around the horizon. The mule at last became excited, and his curiosity grew more and more intense, and in a second or two he was standing with his four legs in a bunch, making six revolutions a minute, and the howitzer, understand, threatening sudden death to every man within half a mile. The commandant was observed suddenly to climb up a tree. The licutenants were seen sliding over the binff into the river, as if they didn't care at all about the high price of uniforms; the adjustant made good time towards the fort, the sergeant began to throw up breastworks with his bayonet, and the major rolled over the ground and groaned. In two or three minutes there was a puff of smoke, a dull thad, and the nule—oh! where was was he! A solitary jackass might have been seen turning successive buck-sommersants over the bind, only to rest at anchor, finally, with his howitzer at the bottom of the river, while the ball went off towards the fort, hit the chimney in the major's quarters, rattled the adobe bricks down into the parlor, and frightened the major's quarters, rattled the adobe bricks down into the parlor, and frightened the major's wife into convulsions. They do not allude to it now, and no report of the results of the experiment was ever sent to the War Department.

Chicago Tribune.

## Gone!

It is reported that the mainmast of our contemporary, the Alta, has gone by the board. Mr. M. G. Upton, the most severely logical, brilliant, racy, pungent and talented amongst its able corps of Notists -the Behemoth of the crowd, and the only man with a sound set of brains among them all has gone to Washington to engineer the claims of our Committee of the "One Hundred" before the Conengineer the caims of our Committee of the One Fundance despect the Car-gress. Aside from the intellectual loss the public will suffer in this sad depriva-tion, we cannot refrain from joining in the general lament of the press over the bereavement it has sustained, and mingle our sorrows with the somuoient suck-lings left in charge of the editorial columns of that most capacions and potent of Ings red in design in the contour contours of man more aparonic and power and the journals of the Pacific. Mr. Upton's style as a writer is pre-eminently marked and admired. Years agone, he lent the charm of his trenchaint, graceful and versatile pen to the old Hradt; he withdrew, and the Heacht lell. He likewise, for a season, electrified and instructed the readers of the Sacramento Standard, which flourished amain until his retirement; then the Standard also sickened and went out. There would seem to be something ominous of a like fate in store for the Alla in the report of Mr. Upton's secession, but that the blow is tempered by the announcement of his speedy return to the seenes of his labors and triumphs. For there is no disguising the fact that the present loss sustained by our princely friend Mac(relitsh will be keenly felt and deeply regretted by the patrons of his paper. The delightful freshness, rich vein of deep thought and originality, the true pathos, and, above all, the rare Jaconism which heretofore illuminated the editorial pages and, above all, the rare laconism which heretolore illuminated the editorial pages of the Adu are no longer discerned in its dreary columns; but in their stead naught but empty platitudes, pointless "notes" and unfathomable duliness. In this conjuncture, considering the executive ability and profound address of this wily plenipotentiary of the "One Hundred," and seeing the invariable luck which has hitherto attended his diplomatic services, it behooves the Central Pacific, for its own security, to keep a watchful eye upon his Machiavellian maneuvres at the Capital.

## New Books from A. Roman & Co.

STRANGE DWELLINGS. Being a Description of the Habitations of Animals. By the Rev. J. G. Wood. With Designs by W. F. Keyl, J. B. Zwecker and E. Smith. Published by Lee & Shepard, Boston.

The object of this book is fully given in the title-page. It contains an entertaining history, not of the ordinary dwellings of animals, but of the strange habitations of many of them. To those who are accustomed to look at the animals that we see duily around us, from their own standpoint, their habits and customs may appear too insignificant to attract attention; but to the eye of a naturalist, who instinctively identifies himself with the nature of the animal, their customs lose all insignificance and become subjects of deep interest; and when we reflect on the way in which these smallest of God's creatures are endowed with a wonderful instinct that guides them in the construction of their habitations; the rearing and care of their young; providing of food for their families, and means of defense from their enemies, it should make us acknowledge the infinite power and wisdom of Him who made the lowly animal as carefully and wonderfully as the lordly man. We cordially recommend this book to the lovers of natural bistory, especially to the young. We quote his article on the 'Stormy Petrel;' ''Who would think, on inspecting a specimen of the well-known stormy petrel, that it was able to dig into the ground and form the burrow in which it makes its nest? Such, however, is the case, and the pretty little traverser of the ocean shows itself to be as accomplished in excavating the ground as in flitting over the waves with its curious mixture of flight and running. Each bird lays a single egg, which is white, and organs of this bird. So large, indeed, is the amount of oil, that in some parts of the world the natives make the stormy petrel into a lamp by the simple process of the world the natives make the stormy petrel into a lamp by the simple process of the world the natives make the stormy petrel into a lamp by the simple process of the world the natives make the stormy petrel into a lamp by the simple process of the world the natives make the stormy petrel into a lamp by the simple process of the world the nativ

THE LIFE THAT Now Is. By Robert Collyer. Published by Lee & Shepard, Boston.

This is a collection of sermons preached by the Rev. Robert Collyer, of Chicago. They seem to be earnest, dignified and solemn, and seem calculated to make a deep impression on the reader.

PRINCIPLES OF POLITICAL ECONOMY. By John Stuart Mill. Published by Lee & Shepard, Boston.

Shepard, Poscon.

The reputation of this author is already so great, and the character of his works so well known that it is needless to do more than announce his books, as the reader will see that this work is already in its sixth edition.

GOOD-BYE, SWEETHEART. By Rhoda Broughton. D. Appleton & Co. publishers, New York.

This novel is by the deservedly popular author of "Cometh Up as a Flower" and "Red as a Rose is She." (Miss Broughton, it seems, is tond of fancini titles.) This book compares favorably with her other works, and if not quite equal in pathos to the first, is infinitely better than "Red as a Rose is She," and has already met with great success.

THE WAY OF THE WORLD. A Novel. By William T, Adams (Oliver Optic). Published by Lee & Shepard, Boston.

This writer, so well known by his popular and innumerable books for the young, now appears in the rôle of a novelist, in which his reputation as an entertaining writer has not suffered.

## Persecuting the Dead.

During the past week, Mrs. Emilie Toussain, wife of the well-known musician, died, and her remains were sought to be interred in the Roman Catholic burial ground. Her father, Mr. Aubert, went to Abbe de le Cler, the priest who officiates at the French Catholic Church, on Bush street. This gentleman, learning that Mrs. Toussain had been married by a Justice of the Peace, refused burial to the deceased, but thought that if Mr. Aubert called on Bishop Alemany, "the matter could be arranged for from two hundred and fifty to three hundred dollars, more or less." It being impossible to raise this sum, Mr. Aubert retired from the ecclesiastical presence, and proceeded to arrange for the burial of his daughter in the Protestant-burial ground, which was accordingly done. Deceased was only twenty-two years old, and was respected and honored by all who knew her.

## God Bless the Prince of Wales.

This poem has been sent out from England expressly for publication in the New Letter, and was read last night at the Bampurt of the British Benevolent Society in commemoration of the anniversary of the burthday of Queen Victoria.

Among our ancient mountains,
And from our lovely vales,
Oh! let the pray'r re-echo,
"God bless the Prince of Wales!"
With heart and voice awaken
Those minstrel strains of yore,
Till Britis's name and glory,
Resound from shore to shore!
Among our ancient mountains,
And from our lovely vales,
Oh! let the pray'r re-echo.

Ere threaten our fair isle,
May God's strong arm protect us,
May hear'n stil on as smise!
Above the throne of England
May fortune's star long shine!
And round its secret bulwarks.
The olive-branches twine.
Among our ancient mountains,
And from our lovely vales,
Oh! let the pray'r re-echo,
"God bless the Prince of Wales."

Should hostile bands or danger,

"God bless the Prince of Wales!"

God bless the Prince of Wales!"

God save brave Curistian's daughter.

Our noble Prince's pride:

The Danish flag and England's

Henceforth float side by side.

To our beloved Princess

We look with hope and joy,

May sorrow never darken

Nor fate those hopes destroy.

Then, let the pray'r re-echo

Among our hills and dales,

"God bless fair Alexandria!"

"God bless the Prince of Wales!"

# Monasteries in England.

After a suppression of three hundred years, monastic life has revived again in England, and its spread is one of the most remarkable signs of the times. Indeed, the sprint of resignous to separation, the various gards of controls, the line dictines, Domencaux, Capachus, Augustines, Unstercians, and others, have established themse was in various parts of England, and have extined the amount sprinting of the Roman Church for sequency chose locastics. One of the most noted of these motion facilities monastenes is that of Wound St. Bernard, in Chainwood Forest, Leicestershire. It was begun in 1865, and for some time there were only five modes, who besed on a little furm and telled the adjacent land. In 1862 the present extensive above, buildings were commenced. They are in the pain early English style, but with the charge, closter, chapter-house, refereory, domnitory, and style, but with the charge, closter, chapter-house, refereory, domnitory, and style, but with the charge, closter, chapter-house, represents an imposing appearance. A clock-tower, with section of beds, remains to be added. The monastery owns now three hundred acress, nearly all of which is highly cultivated. The situation is very picturesque, and the land was rocky and not easily oultivated. The situation is very picturesque, and the land was rocky and not easily oultivated. The labor is all performed by the monks, who have made the domain profitable, selling the farm produce at a good price. The lives of the recluses are to isome and abstemious. They are not allowed to speak to curb other except in the presence of the superior, they ear no mean or animal food except milk and choese; then daily round is toil, prayer, and sleep. They work on the farm, feed the pies, make the butter, and do their own washing. No woman is permitted to enter the sacred ground. They have made agarden of the three hundred acres. Attached to the abbey is a reformatory institution for hosy. The order is the Cistercian, a binach of the Benefictures; and tires handed of the

## The Canadian Illustrated News.

Among the many handsomely illustrated newspapers which come to us, we know of none that is more welcome than the transferon Hierbritish News, published at Montreal. The engrevings are of a practical and class section that the representation of the desistence of the engravery who do not be proposed with masterly sked in thography not mere daules of brack againsts from corresponding and worthy of being framed and placed in the gatery of the arts. The tone of the reading matter is morally excellent and always interesting. As an illustrated newspaper the West is not excelled in its artistic and typographical features by any journ coffice character in Engand or the United States. It is now in its fifth year. We wisn it continued properly, and compliment the publishers upon its general excellence.

Among the rich men of Boston is one worth \$18,000,000, one \$8,000,000, and six \$5,000,000 each.

## Special Brevities.

- A correspondent writes: The fair girls of this Empire have certainly made of the Fifth Avenue Hotel a veritable Vanity Fair. The drawing-rooms are splendid, all for the ladies, although there seem to be more beaux than belles. Wits, statesmen, lawyers, financiers, farmers—they all pass in succession before my eyes. The sofas are filled—a girl of sixteen, fair and tall, has two beaux by her side—oney to the East, one to the West—the contest is hot as to who shall carry the day—to go to the theater and see "Marriage" performed. "Mother" is over there, but it would be absurd to consult her. I see them get up and pull out two pieces of paper—the longest representing the winner. The shortest walks off, red as a lobster, and "Fair Sixteen," without saying "good night" to mother and "the governor," marches away to "fix" herself and exit.
- ernor, marches away to "nx" herselt and exit.

  A remarkable story comes from Bombay, which suggests the propriety of employing monkeys as police detectives. A Madras man, making a journey, took with him some money and jewels, and a pet monkey. He was waylaid, robbed, murdered, and buried by a party of assassins. The monkey witnessed the whole affair from a tree-top; and, as soon as the villains had departed, he went to the nearest police-officer's station, attracted his attention by his sighs and groans, and finally led him to the grave of his master. He then enabled the officer to recover the stolen property from the place where it had been concealed, and then went to the bazaar and picked out the nurderers one by one, holding them fast by the leg until secured. They have concessed the crime, and are held for trial.
- Three large iron steamships are being constructed at Philadelphia to run between that port and Liverpool, and a great many others are under construction at Wilmington and other points on the Delaware. Those afready built are pronounced equal to the best Clyde steamers, and they are constructed of American iron by American mechanics. The amount of capital concentrating in this business is already great and increasing. The skill and success of the artisans and capitalists of Pennsylvania and Delaware will stimulate exertion in the same field clsewhere, and the time is likely not to be far distant when we will not look upon the shipyards of the Clyde as we have done, with envy.
- Literary men are looking forward with no little interest to the appearance of a work which Professor Owen has in press. This distinguished sayant, during a recent visit to Egypt, discovered these holes of the old Egyptian law. These tables contain thirty commandments, and among the thirty are the ten commandments of the Mossic Decalogue. The others refer to such matters as the removal of a neighbor's landmark. It would seem, therefore, as if "the wisdom of the Egyptians," in which Moses was "learned," included the "law" which is described as having been given amid the thunders of Sinai.
- We are on the eve of an important revolution in the art of printing. The new system is called the "Logotype," and is different from the present style, inasmuch as instead of single letters, the type is cast in syllables; and an average compositor can set at the rate of 5,000 types an hour. Major Beniowski introduced it, but it was found defective and abandoned. Great improvements, however, have since been made, and the system now promises well for success in the hands of Mr. Green, the present patentee, in London.
- The other day in Paris, a young creature of sixteen had just left the vestry at the close of her marriage with an old man over seventy, when the latter was sudenly seized with an appoplectic fit and fell down dead by the side of his terrostricken bride. The carriage in waiting carried his corpse to the bridal home he had furnished in the most extravagant style. This doting old man, who dreamt that a union could be happy between wrinkled old age and early youth, left his widow a dowry of 400,000 francs on her bridal day.
- The Queensland papers report the marriage of two South Sea Islanders with English women; the first marriages of the kind which have yet occurred. The ladies who have thus broken through the bonds of custom are the Misses Harriet Charlesworth and Ann Sims. The former is a native of Walford, Essex; the latter of Beckington, Somersetshire. The bridegrooms are natives of the island of Lift, and intend to return to their island home immediately, carrying their spouses with them.
- The Young Men's Christian Association of Boston are planning a religious campaign in connection with the approaching Jubilee. If they can get suitable preachers, they will raise a tent for 4,000 people, keep up daily service, and sub-rosa, donate the receipts to the members of the Young Men's Christian Association of Boston, those nice, pious, hair-split-in-the-middle young Christians in Boston!
- It is told of an old Scotch lady that, when dying, a tremendous storm of rain and thunder came on, so as to shake the house. In a quaint, eccentric spirit, but with no thought of profane or light allusions, she looked up, and, listening to the storm, quietly remarked, in reference to her departure, "Ech, sirs! what an awfu' nicht for me tae gang fleein' through the air!"
- Wm. D. Gentry, a telegraph operator in Nashville (Tenn.), has invented a device for propelling railroad cars by the power of electricity. He claims that a speed of one hundred miles an hour can easily be obtained. "A committee of scientific gentlemen, appointed by the Nashville Industrial Exposition," has made a favorable report on his invention.
- "Lovely women," desirous of getting married, should go to Lima, where a population of 160,059, includes 38,704 more males than females.

Castle Brothers' Semi-Monthly Circular.

SAN FRANCISCO, May 17, 1872. Since our last, the P. M. S. S. Co.'s steamer Japan has arrived with China distes to April 12th and Japanese to April 23d. The Tea season is virtually closed, and to April 12th and Japanese to April 23d. The Tea season is virtually cosed, and transactions will be leght until the new crops begin to arrive. Durin, the past fortnight a good domand for all grades of Japan and china Teas, in both, less spring up, with sakes for shopment East of 1,600 packages showings, 700 packages Fore-base and Fortnessa, and 120 packages Moyames and Fingsneys, in adaption to which about 1,200 packages dapane have charged bands for home consumptions of given ranging from 28c to for, in bond. Congots and Southongs are negacited, a though is considered. in good supply

Our Tea trade with the Atlantic cities is steadily increasing, and we look for an Our rea trade with the Atlantic cities is steady thereasing, and we took for an active market on the arrival of the new crop. Orders from this point have been sent forward pretty free y, so that we may reasonably expect a furest even the new supplies. The restrictions of autics being removed, enable fastion bevers to forward their orders without lear of Custom House bound dict. Intense and clear, es, and does away with any doubt of discriminating weights and dutes which may have been a drawback to us in competition with New York, where teasten the einvestigations have been the order of the day. It also challes the selection examine

his goods more accurately prior to Shipman to when they are under his own custred, than he could do were they alipped in bond.

San Francisco imposes of Feas obtain their bank credits for purchasing in China San Francisco importers of Feas obtain their bank credits for purchasing in china or dapan dass low an average rate as any teres and screazed has some a base as in the Attaine States. They aim to import superior quelifies, ask betta smell advance on cost, and are using every exertic in to craw the trade this way, the navarial channel for the Fea business, and every year tends to establish that filet. Some two years since we predicted that over twenty mation pounds amon by et Tea would pass through San Francisco for the fixed and west, and if way then be ded upon by many as a fallacy. Were we to doubte our predictions for the next two years, we do not think we should be far out of the way.

The semi-monthly line of steamers that the Facilic Mail Company have imagestrated from this date also beings us in such close connection with the place of growth, that orders can be more read by fided or condermanced, thus to give a given ways with those great ductions that an overstock or short sample good.

away with those great fluctuations that an overstock or short supply create.

make no change in quotations. We quote prices:

Stear. Imports melude two cargoes Hawaiian per Queen Emma and Hesperian, \$23 4,36 kegs by the former, 3.37 kegs and bigs by the latter. These time y arrivals found the market quite bare of Island Grocery grades, and they find an appreciative market, selling, according to quarty, from se, to He. Following is the schedule of prices, ad in barrels: Circe A, Crushed, 12 c.: Extra Powderec, 125 c; Extra Powderec, 125 c; e. Extra Powderec, 125 c; e. Castle Brothers, &c. per D additional is charged.

(Established 1850) Importers of Tels and East India Goods, 213 and 215 Front street, San Francisco

<sup>—</sup> The following are the dimensions of the great bridge now being erected between New York and Brooklyn: Total length, 5.872 feet; length of central span, 1,600; elevation above high water, 130 feet; waith of bridge floor, 50 feet, length of towers above high water, 268 feet; base of towers at water line, 124 by 36 feet.

## Steamship Subsidy.

It was consistent in the House to follow up its bill of May 20th, for closer diplomatic relations between the United States and Japan, with the amendment on the following day to the postal appropriation bill, doubling the service and subsidy of the steamship line from San Francisco to Japan and China. The votes on the different amendments proposed showed a working majority of twenty in favor of the movement. The Senate had killed this amendment, and the bill will now have to go to a committee of conference, which in all probability will agree with the House. It will cost the Government half a million in favor of the Pacific line and \$130,000 in favor of the line to Rio Janeiro; in all \$550,000 per year. If experience don't prove in five years that the Government has realized money in the treasury from the increase of trade and custom duties by doubling the subsidy and mail service on the Pacific, then we shall be in tavor of its windrawal. We know, however, that this contingency will not happen. The increased customs receipts from our Asiatic trade (which without those fortnightly steamships would amount to nothing) we are sure will pay back into the treasury three dollars for one paid out to keep up the line. This has been England's experience, and it will be ours whenever we open steamship communication with a nation that has any commerce. The Brazilian line now receives \$150,000 from our Government and the same from Brazil. The amendment doubles the service—that is, makes it fortnighly—and doubles our part of the existing subsidy, the new contract to begin October 1, 1873. The entire Brazilian subsidy from that time for seven years will be \$300,000 from the United States and \$150,000 from Brazil; in all, \$450,000 a year. That will be for a semi monthly service, which is cheaper than \$300,000 (what is now paid) for a monthly service.—Secramento Union.

## Greeley's Letter of Acceptance.

One of the most marked public documents which has ever been given to the American people is the letter of acceptance of Horace Greeley. It has attracted great attention in the United States and will, no doubt, produce a profound impression in England and Europe. The letter is characteristic of the author—plain, frank and manly. In accepting the nomination for President tendered him by the Cincinnati Liberal Convention, Mr. Greeley does not think the tribute as one personal to himself, but rather glories in the principles laid down in the plutform, principles wherein the Convention "so tersely, so lucidly, so forcibly set forth the convictions which impelled and the purposes which guided its course; a platform which, casting behind it the wreck and rubbish of worn-out contentions and bygone feuds, embodies in it, and in few words, the needs and aspirations of to-day." It asserts: "First—All political rights and franchises which have been acquired through our late bloody convulsion must and shall be guaranteed, maintained, enjoyed and respected ever more. Second—All political rights and franchises which have been lost through that convulsion should and must be promptly restored and re-established, so that there shall be henceforth no proscribed class and no disfranchised beings within the limits of our Union, whose long-estranged people shall reunite and fraternize upon the broad basis of universal amnesty with impartial suffrage." He reiterates his convictions that "our policy should aim at local self-government and not a centralization," and "that each State should be the reported of the Union whose long-estranged people shall prescribe." It is his belief that the President of the United States should be governed by a rule "inexorably forbidding and precluding his re-election," on account of the temptations and corruptions arising from vast official patronage. The question of tariff he would leave to the Congressional districts. These are the salient points of this remarkable document.

#### A Paradise in the Pacific.

Captain J. B. N. Stewart, of this city, and President of the Polynesian Land and Commercial Company, has just returned from the Navigator Islands, where he has succeeded in purchasing, on behalf of his Company, 300,000 acres of land. This purchase includes the whole of the harbor of Pago Pago, the finest in the South Pacific. A deed conveying the land has been signed by the whole of the chiefs interested, and is duly witnessed by the American and British Consuls. The American flag has been hoisted by an officially authorized Commander of the United States Navy, so that protection is thereby guaranteed to all settlers. The harbor of Pago Pago is to be made a coaling station for Webb's Australian steam mail line and for the United States Pacific Squadron. These islands being situated in the region of the trade winds, the climate is truly charming. Their soil, too, is of unsurpassed fertility. It produces, without cultivation, oranges, bananas, cocoants, bread fruit, nutmegs, etc., and is capable of supplying the markets of the world with cotton, sugar, coffee, indigo, etc. The Polynesian Company, we understand, propose to establish a cotton and sugar plantation, and to form a central commercial depot from which all the other islands of the South Pacific may be supplied with all the necessary articles of commerce.

#### Now.

#### BY ADELAIDE ANN PROCTOR,

Rise! for the day is passing, And you be dreaming on; The others have buckled their armor, And forth to light are gone; A place in the ranks awaits you, Each man has some part to play; The past and the fature are nothing.

The past and the fature are nothing, In the face of the stern to-day. Rise from your dreams for the future

Of gaining some hard fought field;
Of storming some air fortress,
Or bidding some cant sield;
Your future has deeds of glory,
Of honor God grant it may!
But your arm will never be stronger,
Or the need so great as to-day.

Rise! if the past detains you,
Her sunshine and storms forget;
No chains so unworthy to held you

No chains so unworthy to hold you As those of a vain regret; Sad or bright she is lifeless for ever, Cast her phantom arms away,

Cast her phantom arms away, Nor look back save to learn the lesson Of a nobler strife to-day. Rise! for the day is passing:

Rise! for the day is passing;
The low sound that you scarcely hear
Is the enemy marching to battle—
Arise! for the foe is here!
Stay not to sharpen your weapons
Or the hour will strike at last,
When Irom dreams of a coming battle,
You may wake to find it past!

#### Mirrors.

Since the recent improvements in the casting of plate glass, a corresponding advance has been made in the quality and flirsh of mirrors. We were particularly struck with such on a visit to the magnificant establishment of Messrs. F. H. Rosenbaum & Co. 505 Market street, at the end of sunsome street. We remember the immense mirror, 30x444 nuches, which they exhibited at the late Mechanics Fair. It was the largest lookin, glass ever seen on the Parite correst, and of course received a diploma. On entering the store, the visitor is strack with a varied and galter no collection of cluster sheet glass, window glass. German silver glass, plate glass and silvered glass for mirrors. In the rooms upstars frames of every description and value are made, of superior quadity, and at less price than those of New York. There are to be found square and oval frames, frames of walnut and gill frames, besides every variety of modings. The spectator especiences the strange sensation of secting binnelf reflected above and below and could alsides in mirrors that would adorn peraces, for this bouse is the largest on the Pacific coast. Messrs, Rosenbaum Fitted up the Cosmopoleran Hotel throughout, Pacific coast, which is the superior of the mirrors and class for the ministons of Messrs, Ols, Holaday, Weil, Aron, Irwan in short, all those houses where wealth and good taste go hand in hand. The house deals excensively in glass. They are agents for the Patient Linck. They handing a large assortment of goods, or Butter hands a keypool, and are now landing a large assortment of goods, or Butter hands of the bangut hall or ballstoon.

What the devil's to be done with the Woodhull-Douglass vagarists—those demented spiritua isto bedlimites, misseegenists, of how gams omine? Where is the gay Emily Fitz-Pitts-Ste., the gamest chicken of the pichaid flock? In 'rath, we have a right warm side for the chattering Emily and for that matter, for all the rest of the bewrtching, persecuted and down-tredden hussies thus 'strugging manifully against the diabolical virging of the vibrans of our fluity-hearted sex, and by the same token, have wondered how it was that Fitzy-Pitsy had not been tacked on to the tail of the Victoria kite, in the stead of that odorous, elegations, hearthpade person of color, Mr. Frederick Douglass. Howbelt, the phenomena of these deladed old wives of both sexes, like the ways of Providence as well as the way of a man with a maid—are indubitably past all manner of finding out!

— In Liverpool, last month, John Melling, aged 72 years, and standing little more than four feet high, was married at All Saints Church, Preston, by the Rev. G. Beardsell, to Alice Berry, aged 59 years, and nearly 6 feet high. When the couple appeared in the street, they were greeted with a shower of coppers by a very large crowd of spectators.

<sup>—</sup> The small state of Servia has the most rigorous criminal laws of any European country. The number of persons executed for various crimes in Servia was, last year, one hundred and fourteen, and, in 1870, ninety-three. Only one of the criminals sentenced to death in 1871 was pardoned by the prince.

#### Our Mineral Wealth.

The Placerville Democrat says: "In the Cedarburg claim they have found some of the richest ore ever unearthed even in that far-famed locality (Greenhood, Eldorado County) for rich strikes. Patties who have seen the ore inform us that it is literally gold-hearing quartz instead of quartz-hearing gold. From present indications an ent of prosperity is dawning upon the whole section of country between the South and Middle Forks of the American. The prospects for a good supply of water in that locality are no longer problematical. The Pocahontas Company, at Logtown, cleaned up after a ten-days' run, on the 28th, the snug little sum of \$17,600. One thousand seven hundred and sixty dollars per day is pretty good."

The Merced Tribune says: "A few weeks since we published the fact of the discovery of a gravel gold mining claim near Merced Falls, in this county, and gave the names of the locators. Since then a regular company has been organized to develop the property, and has incorporated under the laws of the State of California, under the name of Merced Falls (rawel Mining Com; "SC capital stock, \$200,000; principal office, Snelling. Trustees—John W. Bost, Caarles S. Peck, J. W. Robertson and P. D. Wiggington."

Robertson and P. D. Wiggington."

The Nevada Transcript says: "A large amount of gold dust is being cleaned up from the various claims in this county at the present time. The shipments below are very large. The miners are taking out more than ever before in the same time. The rock from the Buchanna mine on Big Deer Creek pays steadily from \$25 to \$30 per ton. The Idaho mine, at Grass Valley, is one of the richest in the State. There is enough ore in sight for three years' work. The Erie quartz mine at Eureka is paying large dividends to its owners. The Golden Quartz mine is now down on the lode about twenty feet, where it is three feet wide. The milling rock from the lode prespects \$40 to the ton. Some very rich specimens of silvershearing ore, taken from a newly discovered ledge in the Santa Cruz Mountains, are on view in the Santa Cruz Bank. A rich body of cinnabar has been struck in the Oakville Quicksilver mines, Napa County. The miners have gone down twenty feet and have not yet found the bottom of it. The best of it is worth \$1,000 per ton, as the metal now sells at eighty-five cents per pound."

The Oreville Recentle Butte County says: "The energy displayed by the Spring

The Oroville Record, Butte Country, says: "The energy displayed by the Spring Valley Canal and Mining Company has so far demonstrated that the great lead under Table Mountain increases steadily as advances are made from the rimrock towards the deeper portions of the basin or channel. This company has now entered the channel far enough to develop the 'Blue Lead' in a body of from five to fifteen feet, and of unsurprassed richness. The Spring Valley Company realized over \$40,000 at their last cleaning up, while it is supposed twice that sum remains in the boxes. The Cook Company claim, on Bull Creek, cleaned up last week, after a four days' run, and took out nineteen and one-half ounces. Four hands are employed, which would give \$25 a day to each."

The Marysville Appeal says: "We learn that the Brown Valley quartz mines, including the Pennsylvania, Donnebrook and other veins or lodes, have been purchased by San Francisco capitalists, who propose to proceed immediately to reopen and work them vigorously. We incline to the opinion that the purchasers have secured good property. It will be remembered that while being worked the Pennsylvania mine owners paid no assessments, while al! the shareholders were enriched from it. Over \$200,000 was taken from this mine, and from the Donneok a large amount was taken." Nearly all the big mines in Amador Countyare adding to their working force, and the reports are very flattering from all parts of the county respecting the mines.

The Calaveras Chronicle of the 11th says: "The 200-foot level of the Wolverine mine, located near Railroad Flat, has struck the so-called 'south chimney,' at a point 160 feet from the main shaft. The level has penetrated the chimney about ten feet. In the end of the drift the lead of quartz has attained a width of two feet. It is a beautiful ribbon of quartz, containing lead and from sulphurets, and showing gold to the naked eye. We also learn that this level in passing through the 'north chimney' developed an almost continuous body of pay quartz for a length of ninety feet."

Take the whole State, there has never been a time when our mining prospects were more flattering.

## Il Segretto.

Once there was a person who, by one of those curious freaks of fortune, became the proprietor of a daily newspaper, and as such he made a contract with a telegraph company for daily news at \$3,000 per month, dividing the expense and the news with other daily papers—and all was serene. One morning this person awoke to discover that a great railroad magnate had strung across the continent a whispering wire, and was offering all the news at greatly reduced rate to these other papers. This offer was accepted, and the leaving journal was left to pack the \$3,000 solito. And, speaking of solito, another grievance: The magnate would not make the terminal point at Sou-solito. Hinc illa lachrome. That's what's the matter between Uriah Heep of the Daily Blanket and Gov. Stanford, the man who to-day is trying to benefit this State and the city of San Francisco more than any man in California.

## In May.

O, sweetest time of opening flowers, Hadaster was my server Soft to Facility to Warm From Fr

That some rather than a tring! Who hath not have been powers

O lovely May?

Thou bring'st with the the thoughts of And she was mire, sweet May and thou New pist, Let like the once again, When hatters the his gettle pays

We spoke of love, which cold had lain Buried in W. Till thy first day,

O lovely May!

And then it bloomed, full, fresh and fair, The gent beat its if r new di

Thy songeters sang no sad despair. But trilled a lay that sweetly showed

Nought else but joy should linger there, In the first day.

O'min Mat

Wert witness that her heart was mine: Our pedage, a periode a sheary bough, P. a sed from that namesake tree of

thine,

Whose scented air d d went our yow. On thy first day, O lovely May!

#### What Shall We Do With Them?

There is something repulsive in this item, which we clip from the staid and dignified Bulletin; "At the City Gardens, yesterday, a crowd of Hoodlums create a disturbance, and about forty of them were ejected from the grounds. One, however—Con, Hurris—was retained, placed in one of the unoccupied grizzly bear cages, labeled 'Hoodlum,' and kept there all the afternoon and then brought in to the City Prison. The fellow attracted more attention than would a Bengal tiger or a Brazilian ape, and, for a wonder, seemed for a time to feel the disgrace of his position. The charge against him is for using vulgar language." That any human being, however fallen and degraded, should be placed in a position where "the fellow attracted more attention than wonld a Bengal tiger or a Brazilian ape," argues two larges that for a addition cannot be semi-savage and the condition of society semi-barbarous. We are governmently law or brute force in News Letter is under the impression that his community is governed by law, and if it is, argues two tanges, that the authence must be semi-savage that the condition of society semi-barbarous. We are governed by law or brute force. The News Letter is under the impression that this community is governed by law, and if it is, by what right does any man or any number of men take the law into their own hands, and exhibit a human being as they would a Bengal tiger or Brazilian ape? Is there any Act of the Legislature, any ruling of the Courts which confers such absolute and despotic power upon any person or number of persons in the community? Do not our constitutions declare that no person can be robbed of liberty or deprived of life without due process of law? Has not this unfortunate "fellow"—Con. Harris—been deprived of his liberty and subjected to infamous treatment without shadow of law and by brute force? There is not a policeman or citizen implicated in this cruel exhibition of Harris, wherein he attracted more attention than wild beasts, but is guilty of a gross and dangerous usurpation of the law, and subject to the severest penalties. We are in favor of inflicting upon Hoodlums, and all others who violate the peace and order of the community, such deserved legal chastisement as the Courts may measure out; but we respect and reverence the law too much to see it violated by the avowed enemics of the Hoodlums, in a manner even more disgraceful than it is violated by the Hoodlums themselves. There are policemen, jails, juries and judges for the special purpose of vindicating the law and protecting the community from the violence of the dangerous elements in society. Have not the effizers, who in part make up society and who caged Con. Harris, acted as if we had no policemen, jails, juries or judges, and in this have they not acted just as the Hoodlums act? Are these citizens not Hoodlums in the sight of the law? No reason, argument or logic can controver this position. We must punish violations of the law do otherwise, we establish precedents which put a end to hall law, and leaves us at the mercy American Hoodlum is a detestable pest of society; his presence everywhere is an abomination, and his conduct at times such as to call for instant punishment. There are certain emergencies when the law of self-preservation compels us to protect our lives, and having done so, the Courts acquit us of the responsibility of the act. It is fortunate for society that such conduct is the exception and not the rule. As a law-abiding community, San Francisco has earned a reputation second to none, and where the events are not of an extraordinary character, the law should ever be held sacred and above the impulse of individual passion.

We notice that the Pythiatic Knights of Stockton have resolved to come to this city and join their brother pithies in celebrating something or other to-day. What it is, or what they are, or what they propose specially to do on this occasion, the world at large and we, as its chronicler, are happily ignorant. We have heard of "Damon and Pythias" in the play, in which, on the score of friendship, it always struck us that Damon had the advantage. We take up the cudgels for Damon. Damon must have his society, else his spirit will not rest in quiet. Let us organize a Damonian society, in which the ceremonies of initiation shall fossible, exceed in nonsense those of the E. Clampus Vitus, and even those of the Pythies. There are to be found in history the names of several other bilks which might be used and perpetuated in a similar way. Our darkie friends have masonically rescued the name of Hannibal from dark oblivion to black immortality; many senseless whites have hit upon a way to revive our pleasant recollections of Indian outrages, scalpings and tomahawkings, under the follies of nomenclature adopted as Red Men: so, why not pick up any out-throat, Kafir Chief, or New Guinea man-cater, and on the popularity of his name found a similar foolish order.

<sup>—</sup> A merchant of Hamburg has purchased the Great Eastern, for the purpose of converting it into a floating lodging-house for emigrants.

## Mania Poetica.

Spring-tide is most fruitful of this lamentable affliction. As traditionally sentimental May advances we observe that our rythmical remittances from all the quarters of the country are multiplied, a fact which we are inclined to attribute, in part, to the vernal vacations of the boarding schools. We have at this moment before us a small mound of manuscripts, sent to us mainly by misses who think that they are poets because they read poetry with pleasure, and who write, for the most part, from the recollections of what has pleased them in others. Wath these "effusions" there come to us small notes made up of personal confidences and fragments of personal experiences, morsels of aspiration, pretty attentioners which never deceive bardened old executioners like ourselves, and appeals for sympathy which we are always ready to extend, both to the deserving and the undestrying. While we are obliged, in reference to the waste-bask at to consider these contributions in the aggregate, we try never to forget that each of them has an individual history sufficiently pathetic, and that each contributor must bear personally the pain and mortification of rejection. We wish we could hope to make our young correspondents understand that no real good could come to them, but effecting the pain and mortification of these donations. We wish we could make them all comprehend that the quantity of mediciours were at present in existence is quite large enough, and that the world has no need of any addition to the stock in hand.

hand.

The petty songs which are sent to us, harmless enough in themselves save for the wasted time and emotions of their writers, if submitted to the tested utility—not a dry and pressic, but a generous and rethied utility—would be boand amentally wanting. The test may seem to our young correspondents a barsh one, but it is that to which sooner or later all literary works must come. There is no mage in printing which can give value to that which is wanting in all the elements of value. Between not being noticed at all by the world and noticed only to be instantly for gotten, we think that a noble nature would choose the first. Puberation is only of real service to that which has ment making it worthy of publication. Particularly of poetry, let young aspirants for the haure, understand that mere poetrical feeling, and the silent, as well as the course, the lequacious, and the hold. If it were otherwise, life would be less tolerable, and the chances of happiness greaty duminished. It is as natural for a growing girl to feel pocaically as for her to have the measles; yet what Miss Alice or Miss Mary, stricken by that incorable though not offers will bloom and wither; hundreds of thousands of misses, this very mouth, will arrive at the age of sixteen, heave school, be disappointed in their friendships, or to miss for middle and excess the tested to the theory of those oundless which are made an excuse for industing in rhyme—not in rhyme to be sacredly locked in the desk, kept as a memorandum in a commonplace book, or communicated as a great secret to half a dozen dear triends, but rhyme to be written out, with many a long-shaled "2" upon fair, while paper, duy enveloped, sent to us at the expense of threepence, and declined by us at the expenses of threepence more. Sent, too, with such pretty, one of the paper, duy enveloped, sent to us at the expense of threepence, and declined by us at the expenses of threepence more. Sent, too, with such pretty, one of the paper, duy enveloped, sent to us at the expense of thre

is to send off the stern but wholesome negatives. It is an a miserable oursiness, and we enjoy it as little as anybody.

We have spoken frankly and plainly, essaying a little surgery as gently as possible; but we should be misunderstood if it were supposed that we depreclate the cultivation of a refined taste, or the habit of looking for the poetens side of that which it is the common lot to encounter. We do not object to Pegasus as a private and family back. It is only when he is goaded, with feeble snort, little fire, and an indisputable spavin, that he becomes, in our opinion, a disagreeable, if

not an immoral, animal.

The Pacific says "a Christian minister should be a gentleman." The Pacific is simply mistaken. A Methodist preacher should be born in a country barn, of the wite of a traveling tinker, he should be educated in cutting logs for a country school house; he should study divinity by holding a presiding elder's horse at camp meeting; he should marry his boarding-house keeper's daughter as soon as she arrives at the age of fourteen, and should be diligent in getting children, and make the poor little woman toil for them while he rides circuit, attends camp meeting and has a good time with the elders; his hair should grow down the back of a specific hite an ostrich; he should have a voice sike a trombone; an appetite little an ostrich; he should be tall and lank and lean and poor, and uncount and brazen and lazy and ignorant; he should be a burden upon other men's houses, he should pray instead of work, he should preach instead of practice; he should be a sort of moral vagabond that society indulges under the coat of hypocricy and the pretence of religion.

## The Sleeper.

On a beautiful couch she slept, With such a patient look, Sweet and fair as a calm young saint

Reading a holy book;
Over her head large flowers bowed. And lemon-blossoms shook.

She dreamed of future days of bliss, As softly fell the dew;

And joys burst moonlike on her brain, As glides down some deep-cloistere
Of past seenes beaming new;
Of the music from a psalm;
While trembling stars like seruphs looked And memories fell upon her heart

Down from their hights of blue.

She loved a poet young and kind, And summer's luscious hours, And ferny dells and silvery lakes,

And banks of gorgeous flowers; And all the gifts that summer brings, Its fruits preserved in showers.

And, oh! such soft vermillion tints Were aleaming on her cheeks.

As gleams a rosy sunset's rays On distant mountain peaks,-

The time when Beauty wears its smiles, And Love but feebly speaks.

And then she dreamed the poet came, His brow half lost in curls.

And kissed her arms so faintly pink— Her fingers bound with pearls; [lips The rich warm blood that blessed her Had coursed the veins of earls.

Anon she saw him glide away, Cloud-like and softly calm,

glides down some deep-cloistered aisle

Like drops of holy balm.

She woke, as some dear infant wakes
Upon its mother's breast, Her curls as bright as golden tints

At evening in the west:

The poet loved her, and she smiled Like one divinely blest. 'Twas then she felt Love's ripened hours,

Sweet as the golden pause 'Twixt notes of melody when hearts,

From some deep, hidden cause, Beat grandly as the naked spheres, To Nature's mystic laws.

## The Eruption of Vesuvius.

Vesuvius has again become tranquil, but the desolation and loss of life has been Vesuvins has again become tranquil, but the desolation and loss of life has been immense. Vast exates have been completely ruined, and it is thought that the soil will not be fit for cultivation again in less than two years. The number of persons who had left their homes was estimated at 50,000. Many were, however, resurning. The municipality of Naples has voted a sum of 120,000 francs for the sufferers, and the King has given 50,000 francs. The very shape of the mountain has been changed, as though an earthquake had taken place. Hills have appeared where but a few days before stones stood for visitors to rest upon; and precipices have been formed which almost prevent further advance. The path to the Observatory is covered with cinders a foot deep, and the country round about is a scene of utter desolation, not a single tree nor any trace of vegetation being left. During the whole of the fearful time Professor Palmieri held his ground, conducting and reporting his scientific observations with all the calm indifference of Archimedes. Oceans of lava have been surging around him—tempests of dust and pumice-stone have been hurled against him with the utmost violence; yet there he stuck, calculating the degree of volcanic force in action. The authorities sent up two carabineers and a guard of public safety, not to defend him, as we may suppose, against lating the degree of volcanic force in action. The authorities sent up two carabineers and a guard of public safety, not to defend him, as we may suppose, against the eruption, but against the attacks of thieves. The fine old fellow insisted on their leaving him, as he did not care to put their lives in jeopardy; but the men, with equal spirit, refused to do so, and there they all remained until May 1st, when he issued his bulletin to the effect that "as the mountain indicated a tendency to repose," he purposed to descend from his seat, which he had occupied among thunders and fires, to deliver a lecture from his professorial chair in the University on the subject of "The Eruption of Vesuvius on April 26, 1872." It is a remarkable fact that, notwithstanding the enormous proportions of this cruption, Pompeil has suffered nothing—not even cinders have fallen there. During this cruption the correspondent of the Daily News says he saw ministers of religion, "with grim, sarcastic faces, going about whispering in the ears of the afflicted that the wrath of God had fallen upon them, and that they well deserved it, because the Pope was a prisoner." The King was driving towards San Sebastiano, where the hot lava was still slowly pursuing its course. He had stopped several times, giving away money to the people who surrounded him. When, however, they perceived that he meant to proceed farther, where the danger was greater, the crowd began shouting, "No, no; our King must not die!" and they seized the horses of his carriage, and compelled him to turn towards Naples. Private citizens are doing all in their power to alleviate the general misery. One person, a grocer, has given shelter to affecen unns belonging to the Cenvent of the Addolorata, at Portici. One of the nuns, on whom the cruption had produced a strong impression, went mad, and the police were obliged to carry her to the hospital. But even the lunatic asylum is in no favorable condition. The immates are in an unusual state of excitement. It seems as if they, too

<sup>—</sup> Turning stocks—no risk—big interest sure, etc. This is the story of the street, "and many go in thereat" and are entrapped. We know of a clergyman of the Episcopal Church, a resident of this city, who, to eke out a limited salary, invested \$3,000 cash with his broker, and when the crash of last month came the principal and all went by the board; nothing saved; a dead best.

## Special Brevities.

- The sketch which you gave of the late Ear of Ellenborough at the time of that nobleman's death was accompanied by an account of the singular giventures of his divorced wite, which some of your renders may probably have. "garbed as exaggerated or high colored. It was indeed a most strange and execute, heaver, but if was nevertheless streily true, and afrords one among many proofs that truth the proofs that the proofs are trutheless." but it was nevertheless stretchy true, and affords one among many proofs and truth is not untrajuently stranger than fection. I have just net with a gest-count recently retarried from Syria, who happened necidents is to mention that he had fallen in with the ex-Countess in the course of his travels; and he not only confirmed the accuracy of your sketch of her career, but added a number of unions and most interesting details respecting the erring and unhappy lady which, as supplementary to and completting your account of her stery, will, I am size, he not union specified to your readers. My informant assured me that when Law Englishment is sunt was tirst made known to her his band by her own out, seed not in local-ship was anxious, both for personal and public reasons, that the scause should lord-hip was anxions, both for persona, and public reasons, that the scance, should be bushed up. He accordingly sent the countess down to be consistent sent under the care of a strict and vigilant elderly servant, very different from the accommodating addy's mail who had betherto waited on her. The unhappy lide, and the seclision and sounded of her new residue, because excited alias? to madness. She was determined to make her escape that she might join her parameter as he had ordered her to do Finding her keeper as incorruptible as she was vir ant, Lady El enborough contrived to make her take a dose of landamum, which was fortunately so powerful as to defeat its end, otherwise it might have "more ed her life. She had no money, but she had in her possession some valuable had is which she wore on the night when she was sent away from her husband's residence in town, and these she forwarded to her Loudon jeweler, who sent her unreturn the sum of \$200. Thus provised with funds she made her escape from her place of centinerent and succeeded in reaching a seaport on the southwest coast. Entirely Enorant of the value of money, she gave 250 to the captain of a small coasting vessy to convey her to France. But while waiting on the quay she was seen and recognized by one of Lord Edichorough's servants, and apprehensive test she might be detained and foreibly carried back to his lord-she massion, she hastened into the scaport rown, and took her seat in a conen which was just on the justing of London. On reaching the netroports she called a hackney couch, and requested that she should be driven to some convenient hotel. The casciman, who no doubt thought that a lady of her appearance, unaccompanied by any rela-tion or attendant, could be no better than she should be, drove her to a well known twom in the straind—not of the best reputation, which in these lays featful not unfrequently in cases of divorce. She lost no time in sending notice of her arrival to bord Painterston, Sir George Paget, her comen, and to another getti man also of high standing, whose name has escaped my reco-lection. In the course of an hour a lattree were at her side. They reasoned and remonstrated with the unhappy lady, but my aim and at length as she obstituately refused to return to her husband's roof, or to offer any opposition to his suit for a divorce, they were obliged, hand a root, or to offer any opposition to his surface a diverse, they were oranged, with sorrowful hearts, to let her go. She then proceeded to the comment as you mention, and passed through the various adventures you have described. But it appears that after her separation from the Beavarian barron, her second hisband, she was again married and divorced in Italy once, at east, at not oftener. But now comes the strangest incident of all. On proceeding to the cast, where you seem to have lost sight of her, she married the sheakh of an Arab tribe, not the principal have loss sign of new, see married in Suckin of an Arabi rose for the principal chaef, however, but his brother, a person of inferior importance and position—" Jock, the Laird's brother," as my informant expressed it, with whom she as still living, under the assumed title of Lady Digby. Her husband is a poor creature as regards into cet and education, as well as influence, and can talk on two subjects only horses and runs—but he is very proud of his wife. Her winter residence is in Damascus, where she occupies a spandad masson. In summer she accompanies the tribe to the discributes their hock and herds are pastured. She is a constant attendard at the chapet of the American Mission in Damascus, and is most liberal in her contributors to all benevier dojects. Her life is not eny blameless but exemplary, and the American chaplain and other frands who know her well all believe that her character has undergone an entire change. Her behavior well a!! believe that her character has undergone an entire charge. Her behavior undomitted gives credibility to their characters be only in Strange to say, when my informant last saw the hady who was once the consort of one of England's promise cares, and is now the wefe of a Bedoum chief, she was listening with marked attention to a powerful sermon preached by one of your fellow citizens, Professor Eache. I question if among all the vicasitudes recorded in the history of the British peerage there is one so strange and romantic as those whech have occurred in the experience of this daughter of the old sea captain, Jedinoral Dieby.

— Correspondent transport Mail.

The Methodist preachers have started a Club in San Francisco. We have never been there, but presume it is like al other Cabs—whisky lanch all day and poker in the evening—every one of the Rapht Reverend oils buffers must have his night key, just like a wicked and immoral Finen (rier. We wonder if St. Paul ever just dropped into his club when he was down town in Damascus of nights, and stayed so long over his whist and whisky punches that he couldn't find his house in the street called Straight Methodist Club!

- Miss Grant's visit to London is, in its way, an event. The English have thought it a good occasion to prove that they desire to cultivate friendly relations with America, and have shown marked attention to the President's daughter. The wife of the English Minister of Foreign Affairs called upon Miss Grant soon after her arrival, and has acted as her guide, philosopher and friend, through the mace of English society. The Queen sent a functionary from the Lord Chamberlain's office to the United States Legation to say that she desired to see Miss Grant, and to ask in what manner a visit could be arranged most agreeable to her. The Secretary of Legation, Mr. Morun, is as accomplished in the mysteries of ctiquette as in all others belonging to the profession of diplomacy. He intimated that Miss Grant would decline a presentation at a general levee or drawing-room, and it was therrupon arranged that a special reception should be given her by the Queen, at Buckingham Palace, at 1 o'clock on Thursday. A ceremony of this kind is exceptional, and is understood to be intended for a particular civility. It is discussed in the papers with much gravity, and one ingenious writer finds grounds for hoping that it will contribute something toward the settlement of the Alabama claims.
- As soon as it became known in Alresford, two miles from Tichborne, that the claimant was released on ball, the Alresford eight bells sent forth their merry sounds or peals for some time during the afternoon and evening. The Alresford band, conducted by Mr. Thomas Manley, composer of the celebrated "Le Dames de Manrice Waltzes," "Mahebourg Polka," "Star of the Ball Waltz," etc., played most merrily round the town amidst vooiferous cheering, and kept it up rather late. At Tichborne, where the family house, the residence of the Tichborne family, always has been, all the villagers—not one left in one of the houses, we learn—came out and rejoiced with the Cheriton band and hand-bells up to and beyond 12 o'clock at night, on hearing of the claimant's release on bail.

-- Hampshire Independent.

- The King of Dahomey is reported to have changed the fashion of his wearing apparel. He received the Italian Scientific Commission not long ago, seated on his throne, his body profusely decorated with the blue, gold, and green labels which had been carefully peeled from the medicine bottles brought by Europeaus to his country. If his Majesty had any enterprising and business blood in him he would charge for the exhibition of the labels as advertisements, and let out the space on his body for bill posting.
- The health of M. Thiers is said to be in a very critical condition. According to a correspondent he is at times almost suffocated from the accumulation of mucus in the air pussages, which has more than once threatened to end fatally. Even now M. Thiers does not talk—he writes the answers to the questions addressed to him. He cannot speak above a whisper.
- The Sultan's eldest son, Prince Yussuf Izzedin, has been raised to the rank of Mushir, and given command of the First Corps d'Armée.
- The Arch-Duchess Sophia, mother of the Emperor Francis Joseph, died in Vienna, May 28th, of typhoid fever.
- Miss Nellie Grant is the guest of President Thiers and Madame Thiers, at Paris.
- Who has not heard of the India-Rubber Man—the man of limber legs and pliant spine, who ties himself into a double bow-not, and excited our admiration as children, at the circus, by his wonderful contortions and marvelous doublings up. This remarkable exhibition is now outdone and thrown entirely into shade by the marvelous India-Rubber Woman—made to order, for sale in the shops, warranted to fit, bosom inflated with perfumed breath, blown up to any given dimensions of plumpness, soft and tender to the touch, white and fair to look upon, palpitating with emotion, heaving with sighs responsive to sentiment, the cakes and thighs of shapely form, tempting to view, and passingly attractive as the during its raised in stepping over straws at the street-crossing; agonizingly suggestive when entering the street cars; splendidly attractive upon the stage as the balet dancer whirls in the mazy waltz; then the plumpers in the check, iving fair round outline to the damask peach bloom so daintily laid on with brush and pencel. Uncomb the long and silken tresses and from the secret biding places rats and mice come peeping forth, and under the skillful handling of the dressing maid are restored to give volume to the chignon, breadth and compass and fair outline to the stored to give volume to the chignon, breadth and compass and fair outline to the stored to give volume to the chignon, breadth and compass and fair outline to the stored to give volume to the chignon, breadth and compass and fair outline to the man, but the order of the same period of the strength of the dressing maid are restored to give volume to the chignon, breadth and compass and fair outline to the stored to give volume to the chignon, breadth and compass and fair outline to the chead, well poised on neck of fairest alabaster, made of the invaluable gum. Besantiful craft, sailing under full spread of canvas, broad of beam, deep of bottom, lithe of form—all glorious without, all India-rubber within. With clustic, spring step, India-rubber gives age the buo

University Poem of Miss Coolbrith.—In response to an inquiry, we would state that the beautiful poetic lines with which Mr. Edward Curris illustrated his pic-care of California, extending the hand of friendship to her sister Mexico, in his exappublished by the News Letter of May 18th, were from Miss Ina D. Coolbrith's University Poem—one of the most charming productions ever written by a California authoress.

# "Meet Me by Moonlight."

[AN INCIDENT FOUNDED ON FACT.]

"Wake thee my dear, thy dreaming," Till darker hours will keep; While such a moon is beaming 'Tis wrong tow'rds Heaven to sleep."

Thus sang I to a maiden -a maiden passing fair, With eyes of azure blueness, and floods of golden hair, Whose gently budding bosoms no hand but mine caresaed, Whose lips of balmy sweetness no lips but mine ere pressed. Whose up to taim? And there came a gentle nurmar from the window up above. Like the rippling of a brooklet, or the cooing of a dove, And it said in accerts mingled, half with joy and half with fear: "Whatever are you doing at this time of night, my dear?"

Her blue eyes seemed to glisten, but a night-cap snowy white Hid her flood of golden treasure from her anxious lover's sight, " Oh hasten down, my darling, for my gallant steeds are stiff

With waiting round the corner, and we'll drive out to the Cliff: Your fond and anxious parents are long since fast asleep, And you know, dear, that you promised, and your promise you must keep."

Which I funcied sounded husky-was't with tremor or with love (But the night was rather chilly, and she might have caught a cold that the right was rather chilly, and she might have caught a cole From exposure at the window, while my errand I had told.) Then there came a gentic creaking as the hall-door opened wide, A minute more and I had pressed my darling to my side; Her face seemed strangely altered, as I bent down for a kiss.

"A pair of sandy whiskers. By gad," I cried, "who's this?"

"It's me, you dirty rufflan," cried a voice, and Oh, my head Came in contact with a bindgeon before the words were said.

"It's a lucky thing my sister."—(then came another blow)

"A but to thome you studie in the light in the I collection of the property of the collection o

"It's a lucky thing my sister"—(then came another blow)
"An't at home, you skulking villain, but I'd have you, sir, to know
That she'd no idea of going on a moonlight trip with you,
And she took it as an insult the momen! that she knew
That your words were meant in earnest, and before she went she wrote."

Here he slammed the door right in my tace and flung me down a note.

Here he slammed the door right in my tace and flung me down a: In vain I tried to read it, for my sadly battered head Ached so hadly that each letter seemed a fiery, bloody red. Then I struggled to my buggy, and I sadly drove it home. And I vow'd an awful vow that night, I never more would roam In quest of gay adventure, with a virtuous girl, at night. When home, I read her letter, and I think she served me right.

"Sin: Your proposition to drive me out to the Cliff on Saturday, at 2 A. M., when all were asked at home. Lof course, took as a mere joke on your part. I have since he not through a fraud you were in earnest, and boasted to some gentlemen friends of your conquest. I need hardly say, from hence we are strangers."

# Book Notices.

THE POPULAR SCIENCE MONTHLY.—Conducted by E. L. Youmans. D. Appleton & Co., New York, publishers; A. Roman & Co., San Francisco.

& Co., New York, publishers; A. Koman & Co., San Francisco.

This is the first number of a new monthly which is to be devoted to the diffusion of scientific knowledge among all classes of the community, and will contain original and selected papers on a wide range of subjects, from the ablest scientific men of different countries, explaining their views to non-scientific people. The present number has well-written articles on the "Study of Sectotogy," "Science I Immortativ," "The Unity of the Human Spectes" and a remarkable essay, entitled "Woman and Pontical Power." The Littor's Table gives an interacting biographical sketch of Professor Morse, of whom there is a well-executed vignette. The literary notices are comprehensive and exhaustive. The editor says: "The Popular Science Monthly will make its appeal, not to the litterate, but to the generally educated classes. The universities, colleges, academics and high schools of these country are numbered by hundreds and their graduates by hundreds of those rative concated classes. The universities, colleges, academies and high schools of their conditions on their graduates by hundreds and their graduates by hundreds of thousands. Their culture is generally literary, with but a small portion of elementary science; but they are active-minded, and competent to follow connected thought in untechnical English, even if it be sometimes a little close. Our pages will be adapted to the wants of these, and will coable them to carry on the work of self-instruction in science. We confusly recommend the Popular Science Monthly to all persons interested in the pursuit of knowledge.

HOW THE WORLD WAS PEOPLED .- By Rev. Edward Fontaine. Published by D.

How THE WORLD WAS PROFEED.—By Rev. Faward Forname. Problemed by D. Appleton & Co., New York.

A collection of elimological lectures, the result of "diligent and reverent study of theology, and careful researches in archaeology, ancient and modern history, and every department of matural science," and from which researches the author is convinced, and feels it his duty to gave the public the benefit of his arguments, proving that all mankind is decended from one original pair of parents.

#### Court Chat.

Strasburg, according to German Journals, is to be surrounded by a girdle of eighteen forts, at an average distance of about one German mile from the enceinte of the town. Five of these forts, to the northwest of the city, will be first built. Their construction has been undertaken by various companies of contractors, and they are to be completed by the 1st of April, 1872. A commencement has been made by erecting a number of temporary dwellings, sufficient to accommedate from 800 to 1,000 masons at each of the sites. These men will chiefly come from other parts of France or Germany, as the Alsatians are disinclined to accept employment on the works. The remaining thirteen forts will not be begun until the first five are completed. The total expense is estimated at from thirty to forty millions of thalers. When all are finished, and not till then, the old fortifications will be demolished.

— A cold is not, as many think, the result alone of exposure to a sudden change in the atmosphere. It is the product of two factors: one is a certain condition of the within, and the other is a certain condition of the within, and the other is a certain condition of the without. Those who have good digestion very rarely have colds. So, to prevent colds, you must keep your stomach in good condition. There are some habits which give a general tendency to colds. For example, the use of hot drinks, which, in addition to flooding and weakening the stomach, open the skin, and increase thereby sensibility to the influence of external changes: the use of warm baths; sleeping in close, unventilated rooms; wearing the same flannels during the night that have been worn during the day; using fat meats and pastry, thereby deranging the stomach and liver.

— There is in process of manufacture at Cambridgeport, Massachusetts, for the use of the United States Naval Observatory at Washington, the largest refracting telescope in the world. The object glass is twenty-six inches in diameter, and the telescope when completed will cost \$46,000. McCormick, of McCormick reaper fame, has ordered an instrument of the same size, to be presented by him to the Lee and Washington University of Virginia, his native State. The next refracting telescope in point of size is owned by Newhall, of Gateshead, England. The telescope so much prized by Harvard University has an object glass of but fifteen inches diameter, and the one connected with the Chicago University has a diameter of eighteen and a half inches.

— An article by Judge Hannay, in the Kansas Magazine, gives the origin of the word "Jayhawkers," as used in Kansas history. In 1866, an individual named Pat Devlin was seen entering the village of Ossawattomie, in Miami county. He was riding a mule, and loaded with no inconsiderable amount of plunder. "You look as if you had been out on an excursion," said some one to him. "Yes," said Pat, "I have been out jayhawking." Pat then explained that the jayhawker was a bird in Ireland which warned its prey before devouring it. From this little incident sprang the use of the word; and we put the origin on record, to save from unnecessary trouble the bothered philologists of the next age.

A project has been started which has for its object the shortening of time in communicating with the Pacific coast of South America and the important commercial cities in that part of the continent. A steamer will sail from Liverpool, having on board a strong, properly equipped staff of engineers, whose destination will be the confluence of the River Madeira with the River Amazon in South America, at a distance of 1,500 miles from the mouth of the latter, and from this point surveys will be made to determine the feasibility of making a line of railway direct across the continent.

According to the Times there are no less than 12,000 professional musicians in New York city. It as in many cases is true, the bread-winner of the household is the only musician, it will be seen that, allowing families to consist of three persons each, and making allowance, also, for the average number of young folks unmarried, in this little army, there will be no less than 25,000 persons whose daily bread depends on the popular taste for music, and the popular ability and willingness to pay for it.

— The first four days' sales of the art collection of the late Joseph Gillett at London, realized \$750,000, and the works of old masters had then only been reached. All those previously sold were by early and modern English painters. The average price of the whole 397 pictures disposed of in the four days of which we have a report, was more than \$2,100. Several Cremona violins belonging to the Gillott estate have also been sold lately, and brought great prices. One of the instruments was sold for \$800, another for \$370, and still another for \$1,450.

— The five ladies with the Japanese embassy, at the suggestion of their American hostess, recently consented to be laced up and tied down, ruffled, paniered, flounced, bowed and trailed in the "style." Then they were powdered up from an orange-peel hae to a delicate lemon, and pronounced perfect, as far as dress goes. Half an hour later, however, their dismayed civilizers found them smiling and happy in their half-petticoat, half-pantaloon dress. "Too muchee," said the gentle Japanese.

M. Larousse, a French hydrographic engineer, has presented to the French Academy of Sciences a paper on the months of the Nile, and the changes which have taken place in them during the last two centuries. The Damiet'a and Rosetta months have advanced, and are advancing, into the eea at the rate of three metres and 35 per annum respectively.

- All the famous musicians, it seems, talk about coming to America. Next year we are to have Lucca, Carlotta Patti, Tamberlik, Arabella Godderd, Rubinstein, and, possibly, Wachtel and Santiey again. Franz Abt, the song writer, arrived last month. Johann Strauss is coming to Mr. Gilmore's Jubiace; and we now learn that Haus von Bu ow is making a professional tour of Germany, preparatory to a voyage to the United States next fall.
- As an illustration of wonderful success at the African Diamond Fields, the Argus mentions the case of a German captain, named Behrman, who some months ago had the good fortune to lose his ship, the "Ente", "at Port Aired. He went up to the fields, worked hard there for a time, and on Sanday went home as a passenger in the "Cambrian," the fortunate possessor of £10,000 in drafts on Europe, and diamonds valued at £5,000 more still to dispose of.
- It is said that a petition to Congress to prohibit the calling of any more children by the name of "George Washin, 2ton" is in circulation out West Something like this is due to the memory of the great Virginian. The modern George Washington lies and steals outrageously, and is already in jail in various parts of the country.
- The largest cities in the German Empire, according to the census of December 1, 1871, are Berlin, 828,012 inhabitants; Hamburgh, 285,385. Breslau, 208,025; Dresden, 177,025; Munich, 169,612; Cologne, 129,251; and Lepzig, 107,575.
- Madame Patti has lately obtained an immense trumph at Vienna in "Linda." The musical critics of that city declare that she surpasses Tadolini, Jenny Lind, and all other great artistes that played that part before her.
- A collection of twenty-five pins, very well made, we are told, has just been found in the subterranean vaults of Thebes. Made more than 3,000 years ago, they show that the modern invention is only a re-invention.
- The Municipality of Rome has decided that a stone tablet shall be placed on the house once inhabited by Gethe, situated in the Corso, opposite the Russian Legation.
- The heart of the Emperor Maximilian is preserved in a golden urn at the private chapel of his mother, the late Archduchess Sophia of Austria.
- The cldest daughter of Theophile Gautier is the best musical critic and teacher of the Chinese language in France.

# Religious Electricity for the Britishers.

The sturdy Britishers whom we dearly love to fielde, but never abuse, must receive from us a suggestion unctions with the grace of spirituality. Our dear old friend John Bull is an ardent worshiper of three things—himself, roast-beef, and a good sermon, with the machinery of a State Church, the latter red-hot with infull-ble orthodoxy. Now, by the grace of God, and His Prime Minster the Bishop of Canterbury, this is our suggestion: When the Bishop delivers has elegant and sublime sermons in the London pulpit, telegraphic reporters should be present, who would manuellately flash "the glad tidings" to every subordinate pulpit in "Merrice Bigkand." The poorly paid and mitellectually impoverished dominies throughout the kingdom could hus be furnished with the prime essence of orthodoxy, and might address their congregations in this style: "Beloved Brethren and Sisters: The servant of the Most High God, His Grace the Bishop of Canterbury, preached the following sermon in London this morning." Then report and pray. The benefits and blessings that would arise to the British public from this infusion reads-made turnished them could devote their time to tailoring, carpentering, brickmaking or any other useful occupation by which they turn an honest penny. As a labor of love, and for the sake of Jesus, they would willingly devote one-hour on Sundays to repeating the prophecies of His Grace the Bishop of canterbury. In repeating, they could not sin against the British Constitution on the therty-nine articles of faith, for the Bishop, an oracle of both, would be alone responsible. It would also prevent schisms in the Holy Church of pious Henry. But above all, the generous British public would be relieved from an enormons amount of founcial bleeding, now necessary to support the myrinds of unfortunate dominies who, like our own ministers of the Gospel, are most unctuous when they preach for pay. Will the B. P. feed its hungering soul on religious electricity and be happy? Amed

The many friends and acquaintances of Mr. Eugene Dewey and their name in this community is legion; will feel a pang of regret to hear of the departure from our mids; of one whose eminent social qualities, warm heart and generous hand, have endeared him to all who know him. He has grown up in our midst, and from boyhood has been one of San Francisco's favored and favorite some, his handsome face, manly bearing and genial spirits have endeared him to all of us. He occupied a high position in the Board of Brokers, is a leading member of the Union Club, and stands high in the rolls of the Pioneers. He leave so to day for a protracted solourn in Europe, and we hereby wish him good luck and God speed.

#### The Old Garden.

I stood in an ancient garden, With high red walls around, Over them gray and green lichen

In shadowy arabesque wound.

The topmost climbing blossoms

On fields kine-haunted looked out, But within were shelter and shadow, And daintiest odors about.

There were alleys and lurking arbors— Deep glooms into which to dive;

The lawns were as soft as fleeces— Of daises I counted but five.

The sun-dial was so aged
It had gathered a thoughtful grace;
And the round about of the shadow
Seemed to have furrowed its face.

The flowers were all of the oldest That-ever in garden sprung; Red, and blood-red, and dark purple, The rose-lamps flaming hung.

Along the borders fringed

With broad thick edges of box, Stood foxgloves and gorgeous poppies, And great-eyed hollyhocks.

There were junipers trimmed into castles,
And ash-trees bowed into tents;

For the garden, tho' ancient and pensive, Still wore quaint ornaments.

It was all so stately fantastic, Its old wind hardly would stir;

Young Spring, when she merrily entered, Must feel it no place for her. —Geo. Macdonold in "Good Words."

# Railroad Notes--What the Committee of One Hundred Have Done.

How not to do it is an art our famous Committee of One Hundred have learned to perfection. They started in to defeat the Central Pacific people, and have defeated themselves. Like the Tartar that went out to shear and came back shorn, this Committee, with all their buncombe, resolutions and whereases, have accomplished what's simply this, no more: They have created a panic in real estate by solemnly declaring that the price of every lot of ground in San Francisco would depreciate from one to three hundred per cent. if the Railroad Company got Goat Island, and then on top of this declare that the railroad will probably get the island. Wise men! Wonderful benefactors, such counsellors as these! Talk about the Central Pacific being the cause of the present depressed and most deplorable condition of the real estate market, when this Committee of One Hundred have done more to ruin our large and small property holders by their incendiary talk and resolutions during the last six weeks than the Railroad Company is capable of doing in six years.

By-and-by our citizens will learn, we hope and trust that Stanford, Huntington and Hopkins are not enemies but friends—that they have come here to build and not to destroy—as is overwhelmingly proven every day by the vast work they are doing in and around Mission Bay—employing as they are constantly doing, more than a thousand men on works of public usefulness inside the county lines of San Francisco. Look at the tens of thousands of barrels of flour and bales of would be a they are taking from us to Eastern markets every month, and thereby opening up business everywhere for our merchants and manufacturers. Their long, smoking trains, crossing and re-crossing the continent, laden with the richest freights—the very fatness of our fertile lands—are more eloquent than empty resolutions in showing of what value the railroad is to California.

## The Great Canyon of the Sierras.

This great painting by Thomas Hill is on exhibition at the gallery of Snow & Roos, on Kearny street. In company with a gentleman we called in during the week to feast our eyes upon this splendid work. The canvas is 10 feet by 6 feet, appropriately framed. The artist gives us a graphic and powerfal view of Yosemite Valley, from a focus about one mile below Inspiration Point, the scene being towards the northeast. On the right is Bridal Veil Fall and Rock, and still further the Cathedrals, Sentinel and Sentinel Dome, with the Great South Dome in the shadowy distance. On the left are the North Dome and Royal Arches and El Capitan. The picturesque Merced River meanders through the valley. A wigwarm and Indians in the distance are the only evidences of habitation and life. Nature is copied with a masterly hand. The grand and sublime scenery depicted looks life-like as we saw it in the original. Nothing in the work is more marked than the warmth and vigor of vecetable life, and especially the grand old pines, which tower towards heaven in their majesty. "The Great Cahon of the Sierras" has been on exhibition in Boston and New York, where it received the highest praises of the art critics. It is now the property of Judge Crocker of Sacramento, who, as we are informed, paid \$10,000 for it. All lovers of art should see this master-work.

<sup>—</sup> Those who have not seen the remarkable gold quartz specimens from the Cederberg mine, exhibited in the window of Job M. Seamans' jewelry store, No. 311 Montgomery street, should take the first opportunity of viewing them—they are a splendid showing of the great value of our California mines.

The Sutro Tunnel Report of the Committee on Mines and Mining.

The Committee on Mines and Mining, to whom was referred H. R. 1173, entitled "A bill to aid in the construction of the Sutro tunnel from the proceeds of the sale of mineral lands," after careful consideration, have prepared the accompanying

substitute, and recommend its passage

Your committee have patiently and carefully investigated all the questions having any bearing upon the subject; they have heard the evidence of the commissioners and other experts; they have listened to the arguments for and against the bill; and, without conmenting at length upon the detail of their investigations, beg leave to submit the following statement of facts and conclusions.

18t. Our mineral domain is almost unlimited in extent, and of linestimatic value.

2d. The mines on the Comstock lode are the most valuable in the world.

3d. They have yielded already \$130,000,000 in bullion.

4th. Their present annual yield exceeds \$15,000,000.

5th. Their future yield, by means or a deep tunnel, will be almost incalculable.

6th. Deep tunnels are necessary for the full development of our mining interests.

7th. The Sutro tunnel is of the bighest importance to the future profitable working of the mines on the Comstock lode.

The construction of this tunnel was authorized by the Legislature of Nevada

9th. The mining companies on the Comstock lode contracted for its construction, 10th. The Legislature of Nevada memorialized Congress to aid in its construction.

11th. Congress, by special law, endowed it with certain rights and privileges.

12th. Congress reaffirmed those rights by a refusal to interfere with them.

13th. Congress again reaffirmed them by provisions in two general mining laws. 14th. Congress sent out a commission to report upon the facts concerning it.

15th. The commissioners made a report, recommending the work to favorable

consideration.

16th. Some points in the report not being entirely clear, the commissioners were

17th. Other witnesses, amongst whom Professor Raymond, the United States Commissioner on Mining, were also examined.

18th. The testimony (which accompanies this report, embracing 810 pages)

makes a conclusive case in favor of the tunnel.

19th. The construction of the tunnel is entirely feasible.

20th. It will cost from \$4,000,000 to \$5,000,000.

21st. It will take from two and a half to three and a half years to complete it. 22d. It will be of immense benefit to the legitimate owners of the mines.

23d. It will secure the health of the miners by good ventilation.

23th. It will create an outlet for escape in case of fire.

25th. It will establish a new basis of operations 2,000 feet below the surface.

25th. It will drain the water to that depth by its own flow, and dispense with the numerous steam engines now required.

The water contained in the mines may be utilized as a great water power to 27th. pump the water, by means thereof, from below the tunnel level. 25th. Greater depth may be reached thereby than has ever been reached before

on any mines in the world 29th. It will stimulate explorations on all portions of the Comstock lode, and

may increase its yield to \$50,000,000 per annum.

30th. It will develop several lodes in the course of its construction.

31st. Immense quantities of low-grade ores exist in the Comstock lode and other lodes cut by the tunnel. 32d. These low-grade ores can only be utilized by means of concentrating works.
33d. Extraordinary facilities exist at the mouth of the tunnel for the exection of

improved concentrating and reduction works.

34th. The tunnel itself will furnish sufficient water for concentrating and amal-

gamating purposes.

30h. Cheap motive power can be secured with coal from the Rocky Mountains and firewood floated down Carson river.

36th. As a geological survey, penetrating into this argentiferous mountain, it will be of the highest value to science

37th. It wil, serve as a pattern work for all the other mining districts.

38th. Its success will give confidence in mining operations.

39th. A practical illustration of the downward continuance of mineral lodes will give a high value to our mineral domain.

40th. It will make capital flow in that direction.

41st. It will result in the construction of hundreds of tunnels by private enterprise

42d. It will populate our vast mining regions, and create millions of dollars of taxable property

will establish a mart for western produce and eastern manufactures.

43th. The increase of the stock of the precious metals has a tendency of increasing the money value of all property.

46th. That increased value relieves the burdens of the people by reducing the

rate of taxation,

47th. It has a most important bearing on the payment of the national debt.
48th. The Surro tunnel is now in full progress of construction.
49th. The company has secured funds to the amount of \$1,500,000, and is expending upon the work at the rate of \$50,000 per month.

50th. The work is of national importance, and the aid provided for in this bill will

secure its early completion.

51st. The security to the Government is unquestionable, ample and satisfactory: one half of the royalty alone yielding at the present rate of production \$365,000 per

52d. Under the bill reported the aid extended shan not exceed \$3,00000. 53d. The company is required to spend an equal amount to that loaned by the Government.

54th. One half of all the income will be paid over to the Government semiannually

56th. The sum loaned, together with interest, will probably be repaid to the Government within a few years after its completion.

56th. No money will be paid until the commissioners to be appointed shall report the completion of each section, as prescribed by law.

57th. A non-compliance with the provisions of this bill will forfeit all rights

under the same

85th. The aid extended only applies to the first four miles of tunnel to the Comstock lode

59th. This first section of the tunnel will form, as it were, the main artery or highway, from which one hundred miles of branch tunnels may be constructed. 60th. No further aid will be required; for after the unmel reaches the mines, the

income will be sufficient to make it self-sustaining.

61st. We would in conclusion indorse the language used in the closing paragraph of a report to Congress made by a former committee, recommending a loan of

\$5,000,000, in the following words:

"That taking into consideration the magnitude of the undertaking, the large yield of bullion which will be directly secured thereby, the great influence by its successful completion upon all our mining interests, the stimulus it will give to mining generally, the positive proof it will furnish of our immense mineral wealth, and considering the importance of attaining these results, in view of our large national debt, ordinary wisdom and foresight should command that the aid asked for the construction of this important work, or a much larger sum, if it were necessary, should be granted, even were no security whatever offered for its repayment."

Walter L. Sessions, Francis E. Shober, Pierce M. Young, Chas. W. Kendall. Henry Waldron, James S. Negley, Washington, May 14th, 1872.

Mr. Sutro, in his closing argument before the Committee, says:

"It took years of persistent efforts to succeed with the first railroad against the machinations of its enemies Mr. Stephenson found one sterling, unflinching friend to stand by him, and that was Mr. Joseph Sandars, of Liverpool; and I want to pay tribute right here to a noble-hearted, far-seeing, generous, and true man, who has stood by me in the darkest hours of my trials, who has counseled and assisted me at all times, who has appreciated the magnitude and importance of the work to which I have devoted myself. That man's name is Joseph Aron, a resident of San Francisco."

#### The Political Situation.

The nomination of Horace Greeley, editor of the New York Tribune, by an The nomination of Horace Greeley, editor of the New York Triome, by an independent Convention at Cincinnati, and in advance of 'party nominations, is a new departure in American politics. It is, in fact, a bolt from the Republican party, because Grant's nomination, has been a settled fact for some months past. The importance of the movement is dependent upon the action of the Democracy at Bultimore on July 9th. The defection of the Liberal Republicans, although significant and important, is only like to prove dangerous to the election of General Grant in event of the endorsement of Greeley and Gratz Brown by the Baltimore Convention. It is by no means settled as yet what will be the policy of the Democratic party. It is still a powerful organization; chastened by long years of minority it is entirely united and harmonions, and should the Convention adopt the Cincinnati platform and endorse the Liberal candidates, as now it seems probable, the party will prove a very formidable one in its alliance with the discontented Republicans, and if it does not defeat General Grant, will at least drive the Grant party to put forth all its exertions for success. The South, through its press and party to put forth all its exertions for success. The South, through its press and people, is nearly unanimous in its desire for the endorsement of Mr. Greeley. A majority of the Northern Democratic press favors the same idea, and apparently a majority of Northern Democratic press favors the same idea, and apparently a majority of Northern Democratic deen this the only possible means of defeating General Grant. The New York World and the Chicago Times, together with other Democratic journals, are very hostile to Mr. Greeley, and denounce his nomination as unwise and impolitic. Most of the Northern Democratic politicians are reticent, awaiting the result of the Convention at Baltimore. As nearly six weeks occur before the Baltimore Convention, during which time many events may happen and many changes take place, it is impossible to forecast political events more distinctly. It is enough to say that the position to-day is liable to be changed to-morrow. If Baltimore does not endorse Cincinnati then Cincinnati is a flasco. If it does, it is the most important political movement that has occurries changed to-morrow. If Baltimore does not endorse Cincinnati then Cincinnati is a \*fasco. If it does, it is the most important political movement that has occurred since the organization of the Republican party.

#### A Chronicle.

Once-but no matter when-There lived -- no matter where-A man, whose name but then

I need not that declare. He-well, he had been born, And so he was alive; His age—I details scorn-

Was somethingty and five. He lived how many years

I truly can't decide; But the one fact appears, He lived-suntil he died,

"He died." I have averred. But cannot prove twas so. But that he was interred,

At any rate, I know. I fancy he'd a son.

I hear he had a wife:-Perhaps he'd more than one. I know not, on my life!

But whether he was rich Or whether he was poor, Or neither—both—or which, I cannot say, I'm sure.

I can't recall his name Or what he used to do: But then-well, such is fame !

Twill so serve me and you: And that is why I thus. About this unknown man

Would fain create a fuss, To rescue, if I can, From dark oblivion's blow.

Some record of his lot: But, ah, I do not know Who, where, when, why, or what!

MORAL: In this brief pedigree A moral we should find-But what it ought to be Has quite escaped my mind!

## A Yachtsman Among Tahitian Beauties.

As the narratives of travelers who have visited the South Sea Islands are always highly interesting, we give a few extracts from the charmingly descriptive narrative of a yacht cruise in Polynesia by an Earl and his physician, who have published their notes, etc., made during the voyage, in a book entitled "South Sea Bubbles; by the Earl and the Doctor." The authors begin their volume with a very frank confession as to the enervating effect of the climate upon morality, and after walking through the mire of the missionary question with a pair of disquisitionary stilts, they feast us with the following florid sketches:

#### THE CORAL LAGOON.

"Go out in a canoe on the great coral reef that forms the harbor, and, dabbling your hands and feet in the cool water, gaze dreamily down at the gorgeous sights beneath you; that beautiful coral with its mysterious caves and fissures, from which you almost expect to see real water babies appear; Oral, some of it like great crimyou know expect to see real water names appear. Ora, some of it me greatest son has woven from the most delicate twigs, some of a beautiful many or purple, some like miniature models of old gnaried trees, some like great round mounds of 8now-white ivory, chased and carved with superhuman delicacy; some like leaves and budding flowers, while all about are seathered magnificent holothuria and great red and yellow startish, that looked us if they were made of leather, with horn buttons stuck all along their feelers for ornament. \* \* Fish of every shape and color swimming lazily in and out of the black looking caves and fissures, or coasting round under the overhauging edges of the coral precipiess. Some of the finest cobalt blue, some golden, some pink, some more like beautiful orange butterflies than natives of the sea."

#### TAHITIAN BELLES.

"The natives! How well they match the scene. The women, with their voluptuous figures their unique, free, graceful walk—their nightgovns for their dress is nothing but a long chemise, white, pale green, red, or red and white according to the taste of the wearer, which is invariably good, floating loosely about in a cool refreshing manner, their highright black tresses crowned with a gracefully plaited Ara-root chaplet, and further ornamented by a great flowing bunch of white 'Reva-Reva'—their delicious perfume of cocoannt oil dt is worth going to Thinta for the smell alone), and, above all, their smiling handsome faces, and singing, bubbling voices, full of soft cadence—all this set off by the broken, scattered rays of green light shining through the shady avenues. \* \* The most bashful and coy will never pass you without a greefing and a glance of the eyes; or eise, perhaps, she will come up coquettishly and ask you for the loan of your cigar, take a few puffs at it, and hand it back again gracefully to the rather astonished owner, and then, with a parting compliment, which you most likely don't understand, let you go your way in peace—or not.' I suppose it is a fault on the right side, but they are a triffe too amiable sometimes. "The natives! How well they match the scene. The women, with their volup-

## A SAMOAN PRINCESS.

"At last from under the eaves of the tiring room appeared a figure of strange eveliness, which fairly took my breath away. Shimmering the golden setting sun-"At last from under the caves of the tiring room appeared a figure of strange loveliness, which fairly took my breath away. Shimmering the golden setting strange loveliness, which fairly took my breath away. Shimmering the golden setting stranglight, like a gun-metal (not bronze) statue, stood a live princess. the princess, the grincess, the strange is a statue, and the princess of the princess, the princess is the princess of the princess, the princess of the princes of th brown hair. Whatever unartistic there might have been about this was relieved by bookil that: "Mase' intensely crimson hibiscus flowers, which would have utterly 'put ont' any European face, but which lighted hers up like—well, like r-ge. Round her neck she wore a double row of crimson berries as large as small walnuts, and altogether a daintier darling, or a more graceful eye, we have seldom

#### A MOUNTAIN SPREE.

"The orange rum drinking is a regular and elaborate ceremony—no light casual intoxication. Large parties of men and women go up into the mountains for the sole purpose of drinking themselves drunk and enjoying the sensation. It is a weak vinegary stuff, I believe about two pailfuls or 'so being required to make a man jovial. They keep on brewing and drinking for a month or six weeks, till at last one gets killed, or drinks himself to death, when they return to their villages and are penitent until their digestions are restored. A good deal of intoxication, said Mr. V.—, arises out of connubial differences."

#### THE PLATFORM DANCE OF RARITONGA.

"As the procession came on in a dense cloud, stopping short and almost marking time, we saw two men dancing and gesticulating in the wildest manner, apparently on the very shoulders of the crowd. As the mass opened out a little we saw that they were on a rude plation which formed the dancing floor. The dance itself was a most weird and strange one; one of the old pagan dances, which were supposed to be extinct thirty years ago. \* \* \* Strange, also, it was to see how rapidly the old tarantella poison spread among the people, and how the young ladies, starting up from beneath the coco-trees, betook themselves to the dance in the most promone? fashion. Indeed, there is no knowing the length to which they might have proceeded had not our venerable friend Precentor David (who had not been a whit the better himself twenty minutes before) brought the broad end of his goggle-eyed paddle to bear on the liveliest young lady with a force which produced a very distinct and decided 'smack !'—a smack which required such an amount of goggle-eyed paddle to bear on the invellest young lady with a force which produced a very distinct and decided 'smack '—a smack which required such an amount of energy to be expended in rubbing as to leave none for dancing. At last the platform approached the steps, and we saw that, besides the dancers above, it was laden with an infinity of pigs, taro, bananas, etc., suspended from its rafters. At a given signal the whole affair was let go by the run, pigs, dancers, and all, to their extreme discomfort and the increased merriment of the mob."

— M. Jasper McDonald, the amiable short operator, has sued Gen. John W. Gashwiler to recover a trifle of \$30,000, which he says Gashwiler owes him on "Excelsior" stock. We all remember "Excelsior" and the "corner" which M. Jasper McDonald made. We are glad that M. Jasper has sued Gashwiler—for one reason: it settlers the fact that the latter had no connection with or completely in the "corner"—a transaction which plain people, plainly speaking, call a questionable, bare-faced—stock operation. Jasper consequently has all the glory which attaches to that brilliant "operation." Gashwiler denies that he owes Jasper a cent, and between the two, on oath or on voir dire—McDonald and Gashwiler—we prefer, for reasons of our own, to believe Gashwiler. We don't believe, further, that any man could honestly owe Jasper a cent for Excelsion stock at \$250 per share when it was never worth on its merits more than from \$200. believe, further, that any man could honestly owe Jasper a cent for Excelsior stock at \$250 per share when it was never worth on its merits more than from \$8 to \$10. We don't believe Gashwiler bought any Excelsior from Jasper, and we don't believe he sold him any that he did not have, because, as averybody knows, Gashwiler never sells short. We don't believe that Jasper deserves any sympathy, because it is a well-known fact that but for Gashwiler's friendly offices at critical the date of the weight of the worth a cent to-day—provided he is worth so much, which knowing men doubt. Serpents often turn and sting the hand that has warmed then into life. Jasper's sting is in law stilks, and we coto the general warmed them into life. Jasper's sting is in law suits, and we ceho the general sentiment and hope prevalent among stock dealers and finencial people, that before he emerges from the Courts he may have law enough to last him for a lifetime. Gashwiler doesn't seare worth a cent, and Jasper's complaints will not intimidate him. Jasper now owns the entire Excelsior stock, and we congratulate him upon the fact—particularly as he can't get a bona fide bid for it in the Board, despite his numerous "wash" sales. He had to buy it all up to make the "corner," and after bleeding a few "shorts" found himself with the elephant on his hands. Chickens shows from hown to root. Jasper's Excelsive chickens are entirely too more always come home to roost. Jasper's Excelpiant on are made. Contemporary always come home to roost. Jasper's Excelpiant on a realized to memorous. People don't want any of them. Jasper has played at the little game of selling short very lively. When he sold Gashwiler 'short' by sueing him we incline to the opinion that he overreached himself and made one short-sale too many. In the meantime let the lawyers fight the battles for their clients, and when the day of trial comes may the Town Crier be there to see. Now let Jasper go on and "wash" his Excelsior to his heart's content. His hands are not yet

Swamp Land Reclamation.—The negotiation pending between a combination of English capitalists and Californians for the sale of 600,000 acres of swamp or the land in this State, for \$3,000,000, has failed because the legal advisers of the Englishmen has told them that as non-resident aliens they are not secure of their title. They may hereafter, by organizing companies under the Corporation Law of California, avoid the difficulty and do as several companies made up mostly of aliens now do, incorporate here, and select a majority of the directors among the citizens of this State.

## Destiny.

Three roses, wan as moonlight, and weighed down Each with its loveliness as with a crown, Drooped in a florist's window in a town, The first a lover bought. It lay at rest, Like snow on snow, that night, on Beauty's breast. The second rose as virginal and fair, Shrunk in the tangles of a harlot's hair. The third, a widow, with new grief made wild, Shut in the icy palm of her dead child.

## The Supplemental Article.

The proposition of the British Government for a supplemental article in the Treaty, withdrawing indirect damages, has been considered in the Committee on Foreign Relations and in the Senate in executive session, and assented to. The text of the supplemental article, somewhat modified by the Senate, is as follows:

WHEREAS, The Government of Her Britannic Majesty has contended in the re-cent correspondence with the Government of the United States as follows: Namely, cent correspondence with the Government of the United States as follows: Namely, that such indirect claims as those for the national losses stated in the cases presented on the part of the Government of the United States to the Tribunal of Arbitration at Geneva to have been sustained by the loss in the transfer of the American commercial marine to the British hag, the enhanced payments of insurance, the prolongation of the war, and the addition of a large sum of the cost of the war and the suppression of the rebelion, firstly, were not included in the Tesaty of Washington, and further and secondly, should not be admitted in principle as growing out of the acts committed by particular vessels, alleged to have been enabled to commit depreciations upon the shipping of a beligation as that with is imputed by the United States to Great Britain; and want of difference in the performance of the neutral obligations as that wich is imputed by the United States to Great Britain; and
WHEREAS, The Government of Her Britainnic Majesty has also declared that the
principle involved in the second of the contentions hereinbefore set forth will
guide their conduct in future; and
WHEREAS, The President of the United States, while adhering to his contention
that the said content are included in the travel, added for the

WHEREAS, The President of the United States, while adhering to his contention that the said caims were included in the treaty, adopts for the future the principle contained in the second of the said contentions, so far as to declare that it will hereafter guide the conduct of the Government of the United States, and the two countries are therefore agreed in this respect.

In consideration thereof, the President of the United States, by and with the

consent of the Senate thereof, consents that he will make no claim on the part of the United States in respect of indirect losses as aforesaid before the Tribunal of

Arbitration at Geneva.

It is now apparent hat both Governments understand each other, and are inclined to act in a friendly, harmonious spirit. The several causes of dispute in the treaty are in a favorable way for settlement. The question of the San Juan boundary has been referred to the Emperor of Germany, and the Parliament of the Dominion of Canada has ratified those portions of the treaty requiring its approval. By June 15th next, all papers are to be delivered to the arbitrators for final judgmy June from next, an papels are to obtain the different to the arrowances for manifold ment. It is almost certain that the question of indirect damages will not come up before that body. As the case now stands, the people of England and the United States maintain a cordial and friendly attitude towards each other on this question. The final settlement in a peaceful and honorable way is merely a matter of time, When the question at issue is settled by arbitration, both nations will forget and forgive the trilling animosities engendered. Such conduct is alone belitting two of the most powerful and civilized Governments in the great family of nations.

# Escaped Nuns.

The country is full of escaped nuns. As usual they pour out upon the public car their lamentations and griefs. The individualized public pays its fifty cents, hears the tribulations and goes home to sleep. The lecturess makes money and occasionally, by way of extra recreation, is stoned by a mob. It is a dangerous thing to play the role of an escaped nun, but in this wicked world it is dangerous to be horn a woman anyway. Seriously the women folks are having too much to say in matters and things generally. The strong minded have been shreeking and yelling until the whole country is sick of them, and now we are to endure escaped num gas by the hour. Let us have a slight change, just for exchange. Give us an escaped monk a fat sleek, meek-eyed fellow. We do not see why such a religious Don Juan would not have a sad tale to tell. Come forth, meek disciple, and regard us with "truth stranger than fiction." The public maw has a monstrous capacity to masticate scandal. Let it be fed.

<sup>-</sup> Juarez having pacified the whole of Mexico, this news will now be confirmed by the San Francisco newspapers.

#### The Poets and the Mountains.

It would be absurd to quote passages from the great British poets of the beginning of this century and to prove that Scott, Wordsworth, Shelley and Byron loved the mountains and expounded their teaching with a power which has met with no rivalry. The lake mountains discourse very excellent music, and sometimes in favorable moments can rise to the sublimity of the great ode on the "Intimations of Immortality," or the song of the feast of Brougham Castle. But it must be confessed that they are a little too much infected by the "sleep that is among the lonely hills," and can even at times drop into the flat prose which fills certain pages of the "Excursion." We can understand how a poet brought up at their feet should labor under a permanent confusion of ideas between Providence and the late Duke of Wellington—a delusion which would have been searcely conceivable amongst the great central ridges which have shaped a continent and fashioned the history of the world. Scott. too, might have been stimulated to a lofter strain by history of the world. Scott, too, might have been stimulated to a loftier strain by history of the word. Scott, too, hight have been similared to a fortest and a data the tonic of a few good glaciers and avalanches in place of his dumpy heather each hills. Coleridge, Byron and Shelley have each sung hymns, after their fashion, to Mont Blane. Coleridge makes the monarch of mountains preach a very excellent sermon, though I fear it is a plagiarism. There are some good touches, as in the lines-

Around thee and above Deep is the air and dark, substantially black, An ebon mass; methinks thou piercest it As with a wedge;

but we feel him to be more at home in the fantastic and gloomy scenery of "Kubla Khan" or the magical icebergs af the "Ancient Mariner." The mountain air is not congenial to opium-eating. Byron's mountains treat us to some flue vigorous poetry, and have filled popular guide books with appropriate quotations, but they are just a little too anxious to express their contempt for mankind. To my taste, he lost I speak with difficience, Shelley's poetry in the market complete harmony with the seeney shelley speak at the highly credial to the highly credial to the highly credial to the light of the light of the highly credial of poets. He tells

us that his familiarity with such scenery was one of his qualifications.

"I have been familiar," he says, "from boyhood with mountains and lakes, and the sea and the solitude of forests; danger which sports upon the brink of precipices has been my playmate; I have trodden the glaciers of the Alps and lived under the eye of Mont Blanc." Besides the lines written in the Valc of Chamouni, his exquisite taste for the ethereal beauty of the high mountains pervades his whole poetry. There is something essentially congenial to his imagination in the thin his exquisite hate for the energy brandy or the superior poetry. There is something essentially congenial to his imagination in the thin atmosphere of the upper regions, with its delicate hues and absence of tangible human interest. He loves the clouds, and watches them folding and sunning, lighted up by the "sanguine sunvise with his meteor eyes," or gathered into solid masses, hanging "sunbeam proof, over a torrent sea "with unflagging enthusiasm. Now the special glory of mountain scenery, as Goothe has told us, is that the clouds do not there present themselves as flat carpets spread over the sky, but enable us to watch them as they form and disperse, and roll up the sides of the gigantic peaks. All through the "Prometheus Unbound" we feel ourselves to be really looking out from the top of some "eagle-haffing" peak, not yet vulgarized by associations with guides and picnics. We are where

The keen sky-cleaving mountains From icy spires of sunlike radiance fling The dawn, as lifted Ocean's dazzling spray, From some Atlantic islet scattered up. Spangles the wind with lamplight waterdrops.

And can hear

The rushing snow. The sun-awakened avalanche-whose mass Thrice sifted by the storm had gathered here, Flake after flake, in heaven-defying minds As thought by thought is piled, till some great truth Is loosened, and the nations echo round, Shaken to their roots, as do the mountains now.

Coleridge's mountains, of course, adduce excellent arguments in layor of the Byron's induge in a few sneers at the insignificance of markind, and Shelley's Byron's induge the a few sheet and and woo, not understood by all," and, have "a voice to repeal large codes of fraud and woe, not understood by all," and, it is to be feared, not very clearly by the poet himself. But all of them are genuine mountains, so to speak, of lesh and blood, not mere theatrical properties, constructed at second-hand from old poetical commonplaces.—Leslie Stephen.

England to Australia in Forty-five Days!—The Investors' Guardian publishes a prospectus of "The London and Australian Steam Navigation Company," just formed in London, with "an unusually competent and influential direction," It proposes to establish a monthly service between England and Australia via the Cape of Good Hope, by means of six similarly constructed steamships, carrying about two thousand tons in addition to coals and passengers. These steamers will make the voyage in forty-five days, being a gain of ten days over the present route via Suez. The company's capital is £1,000,000, with power to increase.

## Midnight.

Sail on, O silvern moon, through placid plains Of cost blue ether, for the world is low— Still, as Old Time, thy glory comes and wanes, And bears the secrets of the long ago.

The white tombs glisten on the churchyard rise, The dim woods sleep in shadows at thy feet; A silent world beneath thy watch-light lies, Ere yet the stillness and the morning meet.

Sail on, O stately, silvern moon, until A reckless world forgets the tranquil night; And newer sins, and joys, and sorrows fill A later story for thy morrow's light.

- [Once a Week.

## In Momoriam.

A few days since, a short paragraph in the Santa Clara Gazette announced the death of Win. Forst, more generally known as "Uncle Billy." In the earlier days he was a prosperous merchant in Sacramento, but reverses came, and then an accident deprived him of his right leg. He thially brought up in Santa Clara with John Cameron, who made him welcome and gave him a home for the last twelveyears of his life. Recently the hand of time began to tell heavily upon "Uncle Billy," and there were signs of a speedy passing away, but it came sooner than we expected. He haid down to take his usual afternoon skeep and passed away as peacefully as a child. Poor old "Uncle Billy," we shall miss the champ of your crutch; the cheery-salutation. We shall miss the pleasant days jogging about in the old wagon, through shady lanes after the quall, or the hast under the wide-apreading branches of an oak by the rippling brook to lunch. The qual, the bares and the ducks will be glad that you are gone, but we shall long mount your rest. The crack of your old double-barred has been death to many a bird, but you will press the trigger no more. The eye that never failed is closed forever, and if there are "happy hunting grounds" in that vale beyond, it is there you will be found. And John Cameron, who made your days peaceful, and gave food and raiment and a home to the poor cripple, shall he not receive his reward! Such deeds go not unrecorded, and in the big book there shall be a long credit to the account of man's humanity to man in this world, and when he in turn knocks at the gate St. Peter will say, "John Cameron, thon hast done well; there are honors in store for thee; turn thou to the right." Fareweil, "Uncle Billy," Care o'd boy, farewell, we have had lour last shoot, our last fish together here. In that world beyond maybe we had live the old days again.

#### Wonders Will Never Cease.

The world is wide and full of wonders; the world is wide and full of wickedness; the world is very wide, and yet within the narrow compass of "The White House" are found the wonders without the wickedness, if we may except the temptation to extravagance that its beautiful and costay goods ineste. The Norse Letter rejoiceth in the success of this enterprising house. It derighted in the opening of packages on the arrival of each steamer. Its pride and pleasure hath been to tell the world of rich, rare and useful tabries, from the costay robe of the wealthily dowered bride to the tidy clothing of the thritty housewife, alsold at fair prices. By fair prices we do not mean prices of the the "Fair," but reasonable prices and such as say "Come again," But that is not in the least what we wanted to say. We bogan by talking about wonders, for we thought of the Yosemite and the Big Trees as we saw at that house those beautiful linen suits, ready made after the best styles, and only costing ten dollars the suit. The employées are continually unpacking them and ponring, them out all over town. A young lady's life was saved by one of these dresses. She was descending the shippery ladder of the Vernal Fall; her foot slipped and in an instant she was crashing down the precipice. A cry of horror rose from her friends. There was a moment s awful pause, but suddenly a clear voice came ringing from below, "All is right; my dress holds." One of the lines sit had caught the limb of a tree and preserved the limbs, if not the life, of the fair maiden, who had wisely made her purchase at the White House.

<sup>—</sup> In Long Valley there lives an aged Indian, called Old Cap, or Clitey, the chief of the valley, who is turning white in spots. This phenomenon made is beginning some years ago, and has steadily advanced on his arms, hands, neck and shoulders, until there are now large spaces where the cutiele is as soft and white as a baby's, though the surrounding color is darker than that of many a mulatto. The old man is now sick, but this process has never before been attended with any allment, the skin simply changing color along a sharply-marked line, without flashing off or decaying. The old savage is rather proud of the change than otherwise, hopping to become a white man before he days; and when asked by the interpreter where he expected to go when he departed this life, he replied that he didn't know, but he was going to follow the Americans wherever they went.

## The "Mud"-Lark's Song.

There is a sound I hate to hear, It haunts me in my sleep; I wake, and if I hear it not. My heart for joy doth leap. Above the raging of the wind, It comes and hips the bud Of all my castles in the air— It is, "more mud-more mud!" The eager throng it thrills among, The biter and the bitten: Its sound is strange to Eastern ears. And fells the boldest Briton, For it hath shook Francisco's street, And chilled the hottest blood : The bravest quail before the cry
Of "mud-more mud!" w. L. E.

#### Habits of the Arctic Tern.

A tourist in Scotland says: "In August, 1870, when traveling from North Uist to Benbeeula, I witnessed a very interesting habit of the Arctic tern in crossing the fords which separate the two islands. On coming within sight of the first ford, I observed between twenty and thirty terns quietly sitting on the banks of the salt observed between twenty and threy terms quiety stung on the bains of the sait water stream; but the moment they saw us approaching they rose on wing to meet us, then howered gracefully above our heads as the pony stepped into the water. As soon as the wheels of the conveyance were fairly into the stream, the terms poised their wings for a moment, then precipitated themselves with a splash exactly above the wheel tracks, and at once rose, each with a riggling sand-cel in its bill. Some held their prey by the middle of the body, thers by the head; the latter being able to swallow their fish as soon as they rose. The other birds, howter being able to swallow their his as soon as they rose. The other birds, however, allowed their fish to drop ont of their bills free, and caught them properly by the head before they reached the water, after which they flew to the sands where their fielded young were patiently sitting, and fed them with the spoil. At the next ford a similar scene was repeated by another group of Arctic terns, which we found there waiting the arrival of some friendly travelers. In both these cases the birds showed no fear, but dextrously caught their prey though repeatedly struck at with showed no fear, but dextrously caught their prey though repeatedly struck at with the whip. Twice over, by stretching out my arm, I nearly caught one of them as it poised itself for a plunge. On making particular inquiry, I was told by many of the inhabitants of both islands that this habit of the tern is a constant entertainment to those who cross the fords in wheeled conveyances. The pressure of the wheels must bring the burrowing sand-cels momentarily to the surface, and the quick eye of the tern at once enables the bird to transfix them on the spot,"

# Josh Billings.

THE HAWK.—The bawk iz a karniverous fowl, and a chickiniverous one, too, every good chance he kan git. I hav seen them shut up their wings and drop down out ov the sky, like a destroying angel, and pick up a yung goslin and sore aloft agin quick. I hav fired a double-barreled gun into them, loaded with fine shot, and it had the same exilarating effekt on them that 4 quarts ov oats would hav on an old hoss. I don't surpose that even hen hawks are made in vain, but I hav wondered,

if just couff ov them to preserve an assortment wouldn't answer.

The Meddo Mole.—The meddo mole iz either a small rat, or a big mouse, I don't kno which. They hav some soft, silken fur, and dig in the ground for a living, They kan bore a hole in the ground faster than a 2 inch augur kan, and kan travel klear akrost a 10 aker lot in one night, and never cum once tew the surface. klear akrost a 10 aker lot in one night, and never cum once tew the surface. They don't have enny eyes, but see with their cars, and kan see more without seeing anything than any rat in Amerika. How a meddo mole kan see with their cars iz one ov natur's misterys, and natur lux mistery it it it misterys of natur that makes mankind respektful. If natur showed all the kards she held in her hands, enny body would think they could beat her. But natur makes us guess at about one-half we know, and then laifs at us in her sleeve bekause we don't get it right. I don't We know and individual as a subset of section of the section of th may be thar. I don't kno how meddo moles are spelt in Dutch. Muite eat fust rate in Dutch, and be kussid common vittles in English. A meddo mole

# Mr. Sargent.

Is there not just a little too much daily abuse heaped upon Mr. Sargent by the press of this city? Granting that his views differ honestly from those entertained by many of our citizens, does that prove any corruption or dishonesty on his part? Who has ever dared accuse him of selling his voice or vote for a consideration? He may have errors of judgment, as he has perhaps of temperament. But it is unfair and unjust to accuse him of dishonest motives because he cannot But it is untair and unjust to accuse him or dishonest motives because he cannot see the railroad question as our citizens see it. In a letter to a citizen of this city he says: "I have borne philosophically the abuse of myself, and will to-day or to-morrow do a kindness for San Francisco as quickly as I ever would. Perhaps this is illustrated, if proof were necessary, by the fight I have made, and which yesterday culminated in a marked triumph, during all these months of gong-pounding, for the increased subsidy of the Pacific Mail."

## San Franciscan Impressions.

BY THE NEW CHUM.

The Cliff House, of course, you must go to everybody goes so I went. Jones and I hired a team, and did it in style. To be sure the roads were a butle dusty, but what cared we for that? Were not the hospitable doors of the "Homestead" open! Was there not a welcome there for us and our dollars? Of course we pulled up there, as every sensible person would whose throat was full of dust, and who felt well, just a little thirsty. We drank, and Jones auggested that, as we had lots of time to spare, we should walk over the way to the race track. Again had lots of time to spare, we should walk over the way to the race track. Again they demanded one dollar, and with dolorous faces we paid. Being naturally of a speculative disposition, I suggested to Jones that he and I should purchase a "pool." Jones, who, by the bye, is rather cute the's been out here twelve years) and very suspicious, objected in toto, assuring me, with a most knowing shake of the head, that they were all "put up things." I didn't know exactly what he meant, but I said, yes, I thought they were. It was a running race, and the pools were soon sold. After one or two false starts the word "go" was given, the bed race, and off they were. I acted upon Jones advice and did not buy a pool. There were well they running and one of their providers for two false. were only two running, and one of them (marvelous facts won of course the one I fancied—'tis always the case when I m not "on." The lockey's did not short silk The jockey's did not sport silk fancied—'tis always the case when I m not "on." The jocker's did not sport silk at least if they did it must have been next their skin; nor did they finish in the artisne way I have seen Fordham do; but still they did their best, and stuck to the pigskin. I fancied that their attention seemed more centered upon doing that than upon winning the race; but no man can think of two things at once, and I fancied that their attention seemed more centered upon doing that the main thing is, of course, to stick on. We soon had enough of the racing, and clearing our throats of the "sporting dust," by a simple and thoroughly appreciated process taking a drink we started on our way to the Cliff House, but the most ardent admirer of sandhills, none but an Arab-bred could call the scenery on the roadside pretty. Sand-paper must be at a discount bere. Our horses went as no hired horses do go out of California as well as horses could. Jones rather annoyed me by driving with a rem in either hand. I wanted to know where the hand was for the whip. He at once silenced me by the following rewhere the hand was for the whip. He at once steneed me by the bowing fe-mark: "Sir, our Californian horses need no whip, but require both hands to curb their energy." I did not make any more remarks upon Jones' driving. In a very short space of time we arrived at the Cliff House. I was surprised to see the number of elegant buggies that were put up there, and could not help wondering where their occupants were; they were not in the bar-room, not in the veranda—where were they? The mystery was soon solved by the peals of merry language that came from the numerous and comfortable looking little rooms that look out on the rocks. Once more Jones says I must drink; I hate to spoil sport, so I drank, and then we Settled ourselves down for a good look at the seals (as they are. I be leve, improperly called). What curious brutes they are? Were it not for the piere might cold wind, that seems to child one to the very bone, they would be well worth looking at for hours. What good times they must have, for they all look fat and sleek. at for hours. What good times they must have, for they all look fat and sleek. They seem to have a keen appreciation of fun. Look at that big, dark colored seasilion, chasing the little one, how the little one dodges him, and how, when the big one has run him down, they pretend to bite each other; and what a peculiarly melancholy noise they make. Here Jones came and said that it was time we were moving. Having to pass through the bar-room not a necessity Jones, whose acquaintance is extensive, met friends who were just in the act of indichar; they asked him to join them, and he introduced me. I joined in the swim and drank. By the by, how one does get introduced me, and how liable one is to find even you propose to stand friend Brown a drink) yourself introduced to any paying for drinks for pretty nearly a whole bur room. I've learnt a wrankle a heavy clanck for drinks. 'At last, to resume, as somebody said, the thread of my discourse; we got a start; Jones let the horses out when we got to the top of the bill, and we tried issues successfully with more than one fair team. Jones who, I must own, we got a start; Jones let the horses out when we got to the top of the hill, and we tried issues successfully with more than one fair team. Jones, who, I must own, seems about the thirstiest man I ever saw, wanted to stop again at the "Homestead." After a little personaion I compromised matters by having a "drink" brought out to us. Once more we started, and didn't we rathe along the heartifful bit of road to the toll house! What jolly times the dead ones must have, who are buried in such close proximity to the Cliff House Road! I lunagine the Provinga (they have any) of an old sport, whose mouldering bones lie within a few yards of the road. Will be envy those shouts of mirth which so often on moonlight nights make the grave-yard echo! Will be long once more to join them, or will be pity their inchriated condition? Who can tell? We very soon arrived at our destination, and a nice little dinner at six fluished up my first thin to the Cliff, and left me favored. and a nice little dinner at six fluished up my first trip to the Cliff, and left me favorably impressed with California, Californians, seals (green) and mankind in general.

## Fourth of July Committee.

The following Committee were elected to meet at the Chambers of the Board of Supervisors, at 1 P. M. Saturday, to select 200 citizens as a Committee of Management to celebrate the Ninety-sixth Anniversary of American Independence: F. Meagher, Phil A. Rosch, R. A. Marden, W. D. Litchfield, Geo. W. Corbell, Paul Newman, Chas. Somtag, T. Chamdler, S. Mosgrove, Ed. Flaherty, Henry Steele, Jos. M. Wood, Jacob Deeth, C. Cosgrove, Wm. A. Scollay, Lewis Hentrich, E. Fitzgerald, J. A. Woodson, Geo. Johns, Chas. Hanson, E. Nunan, W. P. Scott, T. Lanagan, Jas. McCord, Wm. Miller, E. W. Corbett, J. J. Marks.

Blessings of the Central Pacific.

The Chronicle has had sufficient courage to print Governor Stanford's views on railroad matters. This is the more refreshing as the San Francisco daily press has assumed in the whole matter a most cowardly attitude toward the Central Pacific assumed in the whole matter a most cowardly attitude toward the Central Pacific Railroad, refusing to print but one side, and that full of falschood and misrepresentation. Who omit the larger part of the article, giving only the salient parts of the Governor's facts and statements. In reply to the statement that the Company was endeavoring, through the Board of Supervisors, and by secreey and indirection, to gain possession and title to India and China Basins, the Governor says:

"There is no truth in the charge. We are simply seeking what everybody las expressed a willingness to concede us, viz: The right to use and occupy streats within the sixty-acre grant. We need this to make up our trains. Without to, or grant is nearly worthless. In copying the order, one word was by mistake omitted, which makes the interpretation of the order doubtful. Our own attorney thinks it does not give us the additional territory, and Samuel Wilson has given his opinion that the order is not subject to be so construed. We ask simply to have the use of the streets conceded to us—nothing more; and only to be conceded for terminal railroad purposes. When we cause to use them for that purpose, the franchise lapses, and they return to the city for public use. We have made no quarrel, sought and they retain to the cay for public use. We have made no quarret, songue no controversy, have kept our contracts, minded our own business, and do not desire to have any dispute or disagreement with San Francisco, nor do we believe we have any. It will all come out right yet. I know that San Francisco is my best customer, and I know that our interests run parallel to each other.

To the charge that the Company intends to build a commercial city at Goat Island, and to invite ships from Liverpool, New York and China to discharge and receive freight there, the Governor says:

"The idea is altogether absurd and impracticable. I have, whenever called apon by private gentlemen, by editors or by committees, disavowed any such intention or purpose. I have always said, in speeches and private conversation, that our objective point was San Francisco, and if you will consider the matter you will see how impossible it would be to build a city at Goat Island—a solid rock 380 feet high. It would cost more to excavate a lot than it would be worth. If Goat Island stood in the very center of San Francisco, and you owned it, you could not afford stood in the very center of San Francisco, and you owned it, you could not afford to grade it for city lots. Yet we want Goat Island to anchor our road to, as a fixed point for departure of our ferry boots to San Francisco. It brings us one mile nearer to the place of our business, Misslon Bay. Our wharves are liable to decay and destruction; at Goat Island we can construct permanent piers, docks and wharves, to do our business: from there we run our freight trains across upon ferries. What difference does it make to San Francisco, or its merchants, whether our freight trains come by ferry or bridge! If we had a bridge we could not arrive but h few minutes sooner. A bridge would cost from Alameda to Hunter's Point \$15,000,000. The interest on that sum would run a fleet of ferry boats. It would be money thrown away. Let us, then, consider our future intentions from our acts.

Two years ago, for real estate an other matters on the Potrero, we expended \$1,000,000; recently we have expended for real estate is San Francisco \$900,000; on

\$1,000,000; recently we have expended for real estate in San Francisco \$400,000; our 60 acres are worth \$1,000,000; we have expended in improving the same \$300,000; we contemplate expending the sum of \$1,500,000 more; this makes \$4,700,000 of actual moneyed interest in San Francisco. We have 500 acres of land across the Bay. If we had intended to make our terminus on the other side, might we not have laid out our \$4,700,000 there, dredged San Antonio Creek for heavy ships, and built on our land? The present terminus is San Francisco. We bring every pound of on our land? The present terminus is San Francisco. We bring every pound of freight and every passenger here. Who spends any money at Oakland? Passengers coming from the East do not stop at Oakland; there is no opportunity to spend money there. You have gone from New York across Jersey ferry to Washington and Philadelphia; you are turned from the ferry, driven into a pen, driven aboard the care, and never had a chance to spend a dime in Jersey City, except for peasure the state of the control of must and molasese candy. So it is going and coming from San Francisco. And are we not at work in San Francisco? We have 160 carts, 510 laborers, 20 foremen and 60 pile-drivers now at work, and we would hirt 1,000 laborers if we could get them. We are building three large first-class depots or warehouses, and we are indicating by our acts our intentions."

In reply to the direct inquiry whether San Francisco was to be the real, permanent, bong fide terminus of the road, the Governor answers:

"Most decidedly, yes. There never has been any other purpose or intention. The future railroad system of this State contemplates approaching San Francisco from three directions. One series of roads, those from Humbolt, Oregon and west of the Sacramento, at Saucelito, thence by ferry to San Francisco; from east of the Sacramento River and from the valley of the San Joaquin, to Goat Island, thence by ferry to San Francisco; the Southern route, which will join the thirty-fifth and by ferry to San Francisco; the Southern route, which will join the thirty-fifth and thirty-second parallel roads, by rail direct to San Francisco. The direct road from Sacramento either to Sauccilito or Goat Island is eighty-seven miles, and will be built in time. Miscellaneous cargoes will always come to San Francisco for distribution, and if ships go to Vallejo for grain, what of it? San Francisco gets the business. Outfits are bought here, provisions, etc.; and it they are bought at Vallejo, what difference does it make? The Vallejo merchants buy of the San Francisco merchant. All are tributary to San Francisco, because it is the commercial point—the point of distribution. Besides, our roads are making it so. When the connection is complete from San Francisco. connection is complete from San Francisco to Oregon and Washington Territory,

there will be no necessity for ships to go to the mouth of the Columbia or Puget Sound. The Oregon and Washington Territory merchants will supply themselves by rail from San Francisco. We will bund south and distribute San Francisco goods to Santa Barbara, Los Angeles and San Diego. We are now contemplating a road from Corume to St. Helena, in Idaho, thus tapping the Northern Pucific Road, and securing for our San Francisco merchants the Idaho trace. Since the road was built the amount of tonnage sent from San Francisco across the Sierra Nevadas has increased in the proportion of three to one. Where formerly one ton Nevadas has increased in the proportion of three to one. Where formerly one ton of goods went over the mountains we now carry three tons. If our road had reached Cheyene e we would have secured for San Francisco nearly all the trade of the interior. It is our interest to secure every possible buyer to San Francesco, so that we can carry the freight. When we commenced building our roads San Francesco had 50,000 people, now she has 150,000. It is our interest to increase her popscice had 50,000 people. How she has 150,000. It is our interest to increase her population and the population of the State. We are building one road now through the valley of the San Joaquin at the rate of one mile per day. We will soon recommence construction through the valley of the Salims. We shad be ready to join with the Texas Pacific, the Atlantic and Pacific and the Kansas-Pacific, and brings them all to San Francisco. The terminal rational enterprise was not ours. I wanted nothing to do with it, but finally bought it because we comid get it chear. and because the California Pacific threafened to build the road from Sacramento by the Straits of Carquinez to Oakland; a short and direct road. We may execute it We may eventually use that line. At all events, we were anxions to prevent this Company from flooding Europe with worthess bones, to the injury of our railroad ered t. We had \$40,000,000 of bonds to put upon the same market, and we purchased the company out for self-protection. As for the land, it cost nothing, and we do not exteen it of great value. We desired the Legislature to extend the time for the expenditure of the \$100,000 on this land; the Governor vetord the bill. We shall not expende the money, but let it go. This who'e panie is a wicked plot. It is not only unnecessary, but criminal. So far as it injures poor men and men in debt, by entorcing sales, I am sorry; but San Francisco has a splendid and glorious future. It will come of the great cities of the world, and we shall be askamed of this paris. The scare is abroad, and it is not my fault. I am doing all I can I should say as are doing all we can to bring people to enlarge the area and in reass the volume of trade. We are bringing everything we can reach from the Mississippi to the Paris. On the property of the property \$40,000,000 of bonds to put upon the same market, and we purchased the Company estic and from Puget Sound to San Diego, direct to San Francisco. We'rre making her point the focal point of a magnificent commerce. You think and say that we control Legislatures. (Councils and Courts; and yet, what bad law has been passed by the Legislature: What decision of a Count indicates that we have tampered with justice.' You complain of our lobby at Washington. Have we not encouraged subsidies to our interest to populate Cabliornia with industrious people, to bring trade to the city, to encourage the ocean commerce from Australia and from China and Japan.' I could become a very popular man by taking my money and loaning it at usurtous interest, but I prefer to inaugurate for Casternia aggest and beneficent railroad system. I considerate my comfert and case by foreign and hence the railroad system. I considerate my comfert and case by foreign and the time that the construction of the travel; but I have a higher motive and a more extended and case by foreign travel; but I have a higher motive and a more extended an ambition, and the time will come, when the passion and prejudice of this hour shall have passed away, that the people of San Francisco and the State will applied it.

— San Francisco is in the enjoyment of her beautiful days. The Winter rains are remitted to an occasional shower. The Summer breezes have not yet become ferce tornadoes of sand and dust. The verdure is still green upon our hits, and the small streams still irrigate our valleys. Now is the time for Summer paints to the country; for trout fishing; for lounging neath shady groves. Our law counts are in vacation; our merchants are stealing away for a good time in the country; the ladies, anxious to keep up the tradition of going to the country, are fighting flies at our watering places, airing their gauzy frocks, eating bad cooking, seeping on hard beds in small rooms and termented with mosquitoes; suppressing their own sweet voices on account of paper partitions. The country swelters and grows hot, and all the well-to-do people crowd our hotels to cat fruit and ieves, ride to he ocean and flirt on the verandah of the Seal Rock House, drive on the beach and over the Cliff House road after fast steppers. San Francisco is, after all the finest Summer resort in the State. The Yosemite is grand beyond conception, and pays for the toil of a visit. The Geysers are interesting and all that sort of thing. The beach at Pescadero pays in pebbles. Napa is hot and rural. Catistoga broils and bilsters. A farm-house in Sonoma or Napa is gentled and cheep. But after all, give us a warm parlor on the sunny side of the "Grand," "General or of the country in Summer time.

Married.—On the 10th of May, at Marylebone English Presbyterian Church, London, England, by the Rev. Thomas Guthrie, D. D., father of the bridegroom, and the Rev. J. Oswaid Dykes, M. A., Alexander Guthrie, of San Francisco, to Mary, fourth daughter of the late James Swanston, of Marshall Meadows, Berwickshire, Scotland.

## Contentment.

Friend, there be they on whom mishap In snow-time if they cross a spot Where unsuspected boys have slid. Or never or so rarely comes That, when they think thereof, they snap They fall not down, though they would not Derisive thumbs:

Mind if they did.

And there be they who lightly lose Their all, yet feel no aching void; Should aught annoy them, they refuse

To be annoyed:

And fain would I be e'en as these ! Life is with such all beer and skittles. They are not difficult to please

About their victuals: The trout, the grouse, the early pea, By such, if there, are freely taken;
If not, they munch with equal glee

Their bit of bacon:

And when they wax a little gay, And chaff the public after luncheon, If they're confronted with a stray

And tell the horror-stricken X That he's another.

Policeman's truncheon.

You cannot cure. They gaze thereat with outstretched necksWhen for that early train they're late, And laughter which no threat can smother They do not make their woes the text Of sermons in the Times, but wait On for the next;

And jump inside, and only grin Should it appear that that dry wag The guard, omitted to put in Their carpet-bag.

-Fly Leaves, by C. S. C.

When the spring rosebud which they wear

Though 'twas Jemima's hand that placeds

(As well you ween) at evening's hour,

And when they travel, if they find That they have left their pocket-compass Or Murray or thick boots behind,

In the loved button-hole that chaste

Dawns upon them;

And cherished flower.

They raise no rumpus,

The evil which beyond all doubt

But plod serenely on without, Kowing it's better to endure

Breaks short and tumbles from its stem, No thought of being angry e'er

— "A fellow feeling makes us wondrous kind." Dr. Stone, in his recent lecture, made the following sublime remarks: "To man the invisible and the spiritual can be revealed; to the brute, it cannot. This is, a mountful deliciency in our mute brother. We would raise him if we could to the high sphere to which hose nearly approaches, of which he so touchingly falls short. We almost feel as though he would not be fuirly treated if he did not have immortality. It seems as though he bas too much soul for it to be utterly extinguished." We have no doubt that Dr. Stone meant well, and that these remarks were intended to conciliate both portions of his andience. Still he must have been aware that the "brothers" who so nearly of instancence; so touching the list of this own tight and formers who so nearly one of the source of the list of th not surprised to learn that his lecture has given them offence. We have received several protests from various long-cared societies, as the Bohemian Chymproved Red Men, Knights of Pythias, etc. They consider that the churches have flung a stone at them without any provocation, and they, one and all, repudiate his assumptions. A lineal descendant of Baham's donkey questions if the Doctor can produce such credentials for his pracabing as the writer's inspired ancestor, whose noly orders are admitted by all the churches. Not only can truth, says our sensitive correspondent, be revealed to his family, but if can be preached by them more forcibly than by all the Stones that ever cried out. He contrasts the dignited remonstrance of the Reverend Donkey with the bruitish conduct of the Reverend Baham. "Am not I thine ass upon which thou hast ridden ever since I was thine." Why then suffers an argumentum ad hominom superior to any in Whately, whereas Stone's whole argument, though on other matters he is asinine enough, is a non seguitur. Balaam died ingloriously, fighting like a brute, but there is nothing to indicate that the ass, having taken to preaching, ever became a layman. Our long-eared correspondent is not less successful ing, ever became a layman. Our long-eared correspondent is not less successful than his ancestor in robuking the maduess of a prophet. Another letter signed "Whale's Beily" is before us, and fairly asks if Stone ever gave three days' lodging for nothing to a prophet of a different persuasion from himself? If he can show this, but not until then, will be be "very like a whale," and be entitled to a future state of whaling and gnashing of teeth." We confess reluctantly that these logicians seem to hear the Doctor at a disadvantage. He has creeted a pone asino-rom which he is bound to go over, and as he gracefully ascends the skies, ten thousand donkeys are ready to follow him and confess that he "allures to brighter worlds and leads the way." As Stone shoots upward "each particular hare will stand on end;" each individual to will climb the heavens, and any donkey who is not particular may shove his charlot to the spheres. Our space this week is too limited to publish the various communications we have received, but we hope in not particular may shove his chariot to the spheres. Our space his were is not limited to publish the various communications we have received, but we hope in our next issue to give a full account of an indignation meeting held by the "animiles" at Woodward's Gardens on the subject of the Doctor's lecture. He has put his foot in it, and no mistake, this time. His congrecation will fall off: they don't like to be called "dumb brothers;" such paysonalities are in bad taste, and the hippopotamus, on reading the Bulletin's report of the lecture exclaimed: "So he calls us "dumb brothers," the old 'oss!" Well, dumb vivimus vivamus, whether there has a future state for me or not there be a future state for us or not.

## The "Claimant" in Hampshire.

Accompanied by Mr. Guildtord On-low and several other friends, the Claimant to the Tichborne estates has paid a visit to Airesford, and there addressed an assembly composed of about 2,000 persons. The Claimant had been staying one days previously at the Grove, Ripley, the residence of Mr. G. Onslow, and the party proceeded thence in a waggonette, drawn by four greys, to the Swar Hotel, Airesford. At various points along the read the Claimant, who is in capital health, was loudly cheered. At the villes and houses of the well-to-do people of the neighborhood the female residents appeared in the windows or at the gates and waved handkerchiefs. "Sir Roger? acknowledging the compliment repeatedly. When the outskirts of the wildage were reached a band met the party, and there was on the ground a large body of men wearing blue silk rosities. The horses were taken from the waggonetic, and annied the most enthosiastic cheering and shaking of hands with the Claimant, the vehicle was drawn into the yard of the Swan Hotel, and after Mr. Onsow addressed the assembly from the waggonetic, the Claimant came forward, and was received with lond cheers. He said "My friends tenants, and neighbors, I have not very much to say, but to thank you kind y for the invitation that has brought me once more among you, for degrees me great gratification to come here among those who know is an not the imposter, the villam, the secondrel as branded by the Attorney-General, and which he has certainly not yet proved that I am. I hope that the Attorney-General stated, I am an impostor, sures? I have give to recombine or opportunity of finding me out, for I have lived among you with my family for nearly twelve months.

You have seen me on two or three hundred occasions. I have been continually with you who knew me in former days, and yet me one here has ventured to call me an imposter, except the connections of my tamily, who are inherested in so doing. I also hope you will remember that when I first returned to Engand I was invited to come down here by my former societior. Mr. Hopewas, who is well known to and very much respected by you all. Now, if I had been an imposter, be had in his possession during all that time documents which would have convicted me at once. He would have found out if I was an imposter, and no one could have lived in his house for a fortuight, as I did, without being detected. I wish to ask, why should my nother's evidence be ignored. Is Mr. Hopkins, who dat all my business before I left England—is he to be ignored. Are all those who lived in this neighborhood and knew me before I left England—are they all to be ignored because a lord comes forward and swears he tattoood me. Then, again, there was the military evidence—the evidence of my brother others, men who were above bribery, and the evidence of the tenants and the workingmen on the estates—they are men and honorable men, although they work for their biving—why should not their evidence be as good as Lord Bellow's! I distinctly tell you, gentaemen, that the tatooing business was neither more nor less than a conspirate your conceited at a moment's notice, when they found they could not heat me in any color way. However, I thank you kindly for the great interest you have taken in me and on my behalf, and for the fair play which you maist I shall have, and which is all that I ask. Again thunking you for your kind involution, I will conclude by saying I hope the time will shortly come when I shall come and it we among you again. I was then prove to you I am not the unpostor, the forger, the villain, and the vagaloon described by the Attorney-General.

The clergy of San Francisco are clearly unequal to the religious instruction of our growing community. Besides, they are away all Summer, when sin is most uneuty and mosquitoes do most sorely vex the Lord speople. Hence, while the rural retreats and mountain fastnesses are virtuous, owing to the presence of the city clergy, San Francisco itself is un heathen darkness, while Brothers Stebbins, Busby, Hemphil', et id genus onne, are doing the light fantastic in the country. As weak, ignorant and simful critiques, therefore, we are very glad that the themsicle has recently "got religion," and is imparting theological instruction to the great unwashed who recall it. We gratefully acknowledge the receipt of considerable new light on controversial and ecc. sastical matters from the Chronicle's discourses. It at once astounds and desights us to learn from so infallible an authority that "disciples of the School of St. Austin reject the Divinity of Christ." We always thought St. Austin was the great church authority on the doctrines of the incarnation and the Gordhead of Christ. We expect to be told next by this original cedesia-stical historian that "while the followers of Wesley are contending for the Infadibility of the Pope, those of Ignatius are stremuously urging the right of private judgment and the doctrines of Luther." Things are getting rather mixed in these latter days, when the Gospiel is preached by the Chronicle and the Holy Ghost is discussed in the same page as the Police Court.

During May our Branch Mint coined \$2,020,000, all in double eagles. From June 8th to July 1st no deposits will be received, time being required to make the regular annual settlements. The total product of the San Francisco Refluery was 141,600 ounces of gold, valued at \$2,825,994.

### Our Paris Letter.

We are honored by the receipt of an interesting and graphic letter from Paris. The source from whence it comes is unknown to us, but the author is evidently a man of high culture and diplomatic prominence. The portions of the letter referring to European politics and court intrigues having already reached us in substance by telegraph we are compelled to omit, and, thanking our exteemed but unrecognized correspondent for his favors, content ourselves with publishing the following extract:

They are rejoicing at Versailles at the prospect of a visit from the Czarewitch and his Danish wife, who will put up at the Russian Embassy. Preparations on a magnificent scale are being made for their reception by the Prince and Princess Orloff. Prince Orloff is the soul of the secret entente between France and Russia. He is a man cut out for diplomacy, and has a strong natural affinity for M. Thiers. Though a tall, handsome man, the least observant person must be struck by the similitude of his profile to that of the wary politician at the head of the French executive. Prince Orloff is insinuating and subtle as a Florentine of the fifteenth century. But he biddes his subtlety under a charming exterior and pages for the PARIS, May 23, 1872. century. But he hides his subtlety under a charming exterior and passes for the frankest and most genial member of the Corps Diplomatique in Paris. A band of black silk covers his left eye, and his right arm is supported by a sling, for, before entering diplomacy. Prince Orloff was a soldier, and through his daving soldiership lost an eye and arm in the Crimean war. When he went to Sebastapol to fight lost an eye and arm in the Crimean war. When he went to sebastaporto ngin under Gorichakoff, he was a young and handsome officer, and engaged to a Maid of Honor of the Czurina, distinguished for her beauty, graceful manners and intelligence. Prince orloff was passionately attached to his famcie. But when he discovered how terribly mutilated he was by the bursting of a French shell, he wrote to her resigning his claims upon her. He was, he said, disfigured and would probably he for the rest of his life an invalid, and could not hear to think of the effect his altered appearance must produce on a lovely young girl, accustomed wherever she went to the incense of admiration. The heroism of the young officer called out corresponding sentiments in the heart of the heartiful Maid of Honer, who refused to be released from her engagement, and is now the Princess Orloff. The Russian Embassadress is distinguished for charity and good works. It was at her instigation that her husband established the Russian ambulances, for the relief of French soldiers in Belgium in 1870, and took measures to prevent a peet from breaking out in Sedan. On the occasion of the Greek Easter, Princess Orloff gave a magnificent entertainment to her compatriots in Paris. She and they had gone at midnight to the Greek mass in the Russian Church near the Parc de Monceau. Prince Orloff, as the representative of the Czar, took a leading part in this solemnity. He were the grand cordon of the Order of St. Anne, and was accompanied by his secretaries and attaches. The Hellenic legation was represented by M. Raughabe, the Greek Minister. Exarque Effendi, a Turk of Greek religion and first secretary to the Ottoman Legation, stood immediately behind Prince Orloff. The Russian church is circular and very handsomely carpeted, but has not a single seat. The "Orthodox" subjects of the Czar either stand or kneel at their devotions. The Mass over, Prince and Princess Orloff drove to the Russian Embassy to receive their compatriots and give them the 'thristos-Inesti, or Easter Kiss. When this ceremonial was gone through the doors of three saloons, transformed into supper rooms, were thrown open. The hospitable Ambassador and his wife sat at the head of the table in the first saloon. M. Raughabe did the honors of the second table, Exarque Effendi of the third, and Prince Ypsilanti of the buffet. This feast was begun by the Papal blessing and distributing salt and eggs.

The Salom or Picture Exhibition of the Champs Ellysees will be opened next week. There are a great many military pictures and scenes o the effect his aftered appearance must produce on a lovely young girl, accustomed wherever she went to the incense of admiration. The heroism of the young officer

<sup>-</sup>The Hens will again assemble in convention in San Francisco this month. They will roost in Mercantile Library Hall for three days, or until they lay the They will roost in Mercantile Library Hall for three days, or until they lay the usual batch of resolutions and cackle over them the given amount. It is to be hoped that more of the young pullets will come to the front this time. We are heartily tired of the old dumg-hills, and shall hail with delight new breeds and foreign varieties. The same old Roosters will of course be present to scratch over the barn yard and have a general control of the clucking sisterhood. These are mostly harmless oil pater/familiae of the capon variety. Whether they will go into the Presidential business is uncertain. Perhaps they will endorse the Woodhull and the nigger; perhaps the Tanner and the Shoemaker; perhaps the Printer and his assistant. As they cannot vote, it will have no appreciable effect upon the result. But Hens must cackle and scratch.

## A Fancy.

I suppose if all the children Who have lived through ages long Were collected and inspected They would make a wondrous throng.

Oh, the babble of the Babel!
Oh, the flutter of the fins!

To begin with Cain and Abel, And to finish up with us!

Think of all the men and women Who are now and who have been, Every nation since creation That this world of ours has seen; And of all of them, not any

But was once a baby small; While of children, oh, how many Never have grown up at all!

Some have never laughed or spoken, Never used their rosy feet; Some have even flown to heaven Ere they knew that earth was sweet; And, indeed, I wonder whether,

If we reckon every birth, And bring such a flock together, There is room for them on earth? Who will wash their smiling faces?
Who their saucy ears will hox?
Who will dress them, and caress them?

Who will darn their little seeks!
Where are arms enough to be d them?
Hands to pat each shinning head' [them Who will praise them! who will scold Who will pack them off to bed?

Who will pack them off to bed? Little happy Christian children, Little savage children too, In all stages, of all ages,

In all stages, of an ages,
That our planet ever knew!
Little princes and princesses,
Little beggars wan and faint,

Some in very handson, dresses, Naked some, bedaubed with paint.

Only think of the confusion
Such a motley crowd would make!
And the chatter of their chatter,

And the things that they would break!
Oh, the babble of the Babel!
Oh, the flutter of the fluss!

To begin with Cam and Abel, And to finish off with us!

## The Navigators and Other Polynesian Islands.

Editor News Letter:—Far away in the South Pacific, in latitude 15.8 and 17. E. longitude, right in the track of the U.S. N. Z. and Australian man steamers, are these beautiful islands, the land rising 3,400 feet above the see; the very summit of the highest clothed in tropical verdure. Viewed from the deck of the verse, the second properties of the beautiful islands, the land rising 3,400 feet above the see; the very summit of the highest clothed in tropical verdure. Viewed from the deck of the versel, the secon realized my torecone ideal of Eden-so calm, so tresh, so rare. The clouds, peculiar to those regions, rested on the mountain tops like curtains ladded regions of romance and mysteries to be revealed. Perhaps it was the consecusions that the world to which I was accustomed was not far off—perhaps at two movements that the world to which I was accustomed was not far off—perhaps at two movements that the world to which I live. The dress of the natives is mere v a short covering round the loins. It is made from the bark of a species of calms. The men average from they feet must be six feet in highly, and are well-torned and strong. The vomen are particularly good-looking, simple in their mathers, and group have soldom been visited by Europeans, and in consequence the natives are not accustomed to our liabits and manners. Upolo stands first among the group in point of fertibly. Its after is about twenty-five square miles, which may be divided into three districts, Western, Middle and Eastern. The land rises to about 1,800 feet above the level of the sea.

feet above the level of the sea.

The soil is of the richest kind, being composed mainly of decayed vegetable matter. Rain is frequent throughout the year, and small streams flow down the mountain sides every interaction of the most firtle islands in the Pacific I nevery districture to be found figs, dates, indigo, tamarinds, natures, breade, fruit, cocoa-mus, bananas, limes, proceapples, oranges, cotton, segar, rice, coffee, fruit, cocoa-mus, bananas, limes, proceapples, oranges, cotton, segar, rice, coffee, fruit, cocoa-mus, bananas, limes, proceapples, oranges, cotton, segar, rice, coffee, fruit, cocoa-mus, bananas, limes, proceapples, oranges, cotton, segar, rice, coffee, concept thinter in whating steps, from which it is easy to conclude they are not of a class likely to develop the vast resources of the country. Little progress, therefore, can reasonably be expected, muss the United States, New Zecand and Australian mail lane make the port of Pago Pago a coading station, of wheth there is some probability. The native population is estimated at 20,000. They are exceedingly friendly and well disposed towards white men, and have on several occasions sought the protection of England and the United States. These islands may be looked upon as the gracen of the Pacific. As a central Polynesian station Pago Pago is not to be surpassed. It is situated at nearly equal distances from the Society Islands and New Caledonia, about 1,800 miles from Auckland, and a little more than 3,000 miles from San Francisco, and in close proximity to the Figurials da as the capabilities of Polynesia develop.

A. B.

The Year 1872.—This year contains fifty-two Sundays. September and December each begin on Sunday. January, April and July on Monday. February begins and ends on Thursday: censequently it has two Thursdays, when well not occur again until the year 1800. In the year 1839 February will have five Sundays, which will not occur again until the year 1920. The year 1871 begin on Sunday and also ended on Sunday. This will occur again in 1882, and every eleventh year thereafter.

## Speaking of Fish-

A favorite camp-meeting phrase, "Jubilee," has for these many years past perplexed, worried and driven us almost beyond our tether, with regard to its signification. But, like all other seckers after the truth, who eventually find it, we are now blissful, breathe freer, and shall henceforth rest content—having been enlightened by an erudite and very scholastic contemporary, who defines it to be "A word derived from the Hebrew word juba, signifying a trumpet, resting on the derivative road in the Latin jubilatio." The rightful paternity of the pestferous foundling having been so clearly established, we see it now, in all its pristine beauty, as clear as a June heaven a ronon. But what has "juba," jubilatio, "jubilatio," or "jubilee," to do with the subject-matter of this paragraph? Fish being our theme, there would seem to be no good ground for this digression. Our readers will reliable seems of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowery margins of our limpid lakes, and the grassy shores of the San Joaquin, the flowers and cele's eggs, shad seeds, black bass roots, cab cuttings minow sprouts, herring melts, terrapin slips, etc.—with the view of having the same planted and sown broadcast in the waters of our State. Ye dainty lovers of the flumy tibes—more especially of the crustaceous species p

### Sir Henry Bulwer.

In the death of the elder brother of Lord Lytton, Great Britain loses a man who was representative of the highest type of her diplomacy, and who combined with great public ability, the high personal worth and honorable character of an irreproachable sample of an English country gentleman. Readers of the Cuxtons can hardly fail to have caught an inspiration of the kind of life amid which the sons of General Bulwer grew up at Heydon Hall. While the more brilliant Edward was writing Pelham, Henry was beginning, at the age of 23, his diplomatic training at Berlin and Vienna. Three years later, in 1830, he was sent from the Hague to Brussels, on a special mission to study the causes of the September revolution which had overthrown the House of Orange and which marked the entering upon a new epoch of the history of Belgium. It is very probable that the warmth with which Britain esponsed the cause of constitutional monarchy in Belgium was greatly due to the correctness of the observation and justness of the inductions of the young diplomatist. In 1830 Sir Henry entered Parliament as member for Wilton, and in the course of the next seven years, he was successively, member for Coventry and for the Metropolitian borongh of Marylebone. Between 1837 and 1833, he was Secretary of the Embassy, first at Constantinople and then at Paris. From 1843 to 1848, he acted as Minister Plenipotentiary to Spain, where he acted as arbiter between that Power and Morocco, and succeeded in arranging a treaty of peace between the two countries. He came to the United States in 1849, while General Zachary Taylor was President, and remained till the beginning of the administration of President Fillmore. During his period of service as Ambassador at Washington a treaty was negotiarly between feat Britain and the United States, for a transit way across the Isthmus of Panama. Sir Henry enjoyed at Washington at reaty was negotiarly between feat Britain and the United States, for a transit way across the Isthmus of Panama. Sir Henry enjoyed at Washi

— An exhibition of works of art, in black and white, will open shortly at the Dudley Gallery of the Egyptian Hall, London. The exhibition will consist of examples of drawings in charcoal, crayons, Indian ink, pen and ink, penell and sepia, etchings, drawings on the block, line engravings, proofs of original lithographs, and proofs of wood-engravings.

### Special Brevities.

- The Norfolk Journal, in speaking of the Crescent City, says; "The great day in New Orleans is Sunday. Everybody goes to market and to church in the morning. The balance of the day is spent in amusements—such as freezen and military parades, base-ball matters dog and chicken fights, exhibitions of all kinds, fairs, dancing, and riding. The stores take advantage of the partial cessation of business to whitewash and paint their establishments and relay the floors, which in this climate decay very soon. To the credit of the American quarter, be it said, that most of the stores are entirely closed. At hight all the theaters are open and in full blust, while the streets are througed with the drint month. Such is New Orleans on the Sabbath day; and the only wonder is that a right-cone God has not long since swept the whole city into the Gulf of Mexico, and thus blotted it out of existence for the profanation of His day." Why will the editor of the Norfolk Journal stray upon the world to have his Puritanical corns jamined? The Lord and New Orleans are content, then why not he?
- We record two chloroform-deaths—the fourth and fifth deaths during the administration of ans sthetics recorded in our pages during the last few weeks. Two of them, however, were from the dropping of foreign bodies into the air-passages: in the one case, a pinte supporting artificial teeth; and in another, part of a gaz, which had broken in the month. One of the fresh cases which we have to record, occurred recently at the Royal Eye Hospital, Manchester. The other occurred at St. Bartholomew's Hospital. Chloroform was, we understand, administered by one of the house-surgeons, in the usual manner, to a young man having a phagedanic sore. After a few minutes, before the patient was fully under the influence of the vapor, the pulse ceased, and all efforts, including galvanism and artificial respiration, per-sisted in for an hour by the two hones-surgeons, proved unavailing to restore life.—British Medical Journal.
- The experiments of Gustav Bunge lead him to conclude that the common opinion that beeften and extract of meat are as valurble articles of diet as tea, coffee, or alcohol, is totally unfounded: that the refreshment they give is only due to their warmth and pleasant taste; and that their chief value is that they enable a person to take with appetite a larger amount of dry or testeless food than he could otherwise do. The statements of Liebig, that the addition of some ment extract to vegetable food increases its nutritive value, and that the extractive matters of meat, and especially creating are successively especially creating as a compared to the especial of the especi
- Mr. J. A. Holliday, of Wheeling, describes a flexible marble slab, which is procured from the Pertland Quarries, Vermont. Professor flay, of the Western University of Pennsy vania, describes its constitution as carbonate of lime, 97-56; magnesia, a trace; slike, 295; water, 45; 190. The above composition and its crystalline character together proclaim it to be a true marble, and, at the same time, a pretty pure specimen of that mineral. The indubitable flexibility of the slab is its most remarkable feature. Dana states that "some of the West Stockbulge marble is flexible in thin pieces when first taken out," The slab in the possession of Mr. Holliday as about two inches thick, and is nearly as flexible as an equal thickness of vulcanized india-rubber."
- From penny-a-lining some literary men have reached halfpenny-a-wording. Mr. George A. Saba, according to the Printers' Register, made a curious contract for writing the "Thanksgiving Number" of the Graphic. He was to put together thirty-seven thousand words, and to be puid for his task at the rate of a half-penny a word. It is asserted that upwards of a quarter of a million of copies of it were required. One halfpenny per word, however, was not such very great pay as may be supposed, more especially to a paper which has aiready yielded one hundred per cent, on its capital. Mr. Sala had a heavy task to perform: he had something like a volume to write, in a great hurry, and he got less than £80 for it.
- The woman of the future has turned up at Brighton, England. Her name is Amelia Hill, and she "moves in the best circles." In the family circle Miss Hill is a shrew of the pagilistic order, and the other day she was brought up at the Police Court Court and cherzed by her mother with assaulting her brother. According to the old lady's statement, Miss Hill was writing a letter when her brother apparently annoyed her. She seized him, shook him, beat his ears, and generally "doubled" him him up." The mother swore that the daughter was the terror of the house. The Petruchios in search of a Kate to tame will be pleased to learn that the virago Hill is unmarried.
- The area of a rectangle, which will embrace all the territory of the Pennsylvania oil region from which oil has yet been obtained, is about two thousand square miles; but the whole number of acres which have yet produced oil does not exceed six thousand five hundred, equal to ten square miles, or one two-hundredth part of what is known as the "oil region." The region produced, during 1871, five and three-quarter million barrels of oil of forty-three gallons each.
- There are 192 mills in the State of Nevada, used in the crushing and reduction of various ores. Their capacity equals 8,325 horses; they earry 2,848 stamps, and cost over \$10,300,000.
- Green apricots, about the size of glass marbles, sell in the market at the African diamond fields for eight shillings per one hundred.

## In the Dark.

Restless, to-night, and ill at ease,

And finding every place too straight, I leave the porch shut in with trees, And wander through the garden-gate,

So dark at first, I have to feel My way before me with my hands; But soul-like fragrance reveal

My virgin Daphne, where she stands. Her stars of blossom breathe aloft

Her worship to the stars above: In wavering pulsations soft,
Climbs the sweet incense of her love.

-Atlantic Monthly.

Those far, celestial eves can dart

Their glances down through leafy bars; The spark that burns within her heart Was dropped, in answer, from the stars.

She does not find the space too small, The night too dark for sweetest bloom;

Content within the garden wall,

Since upward there is always room.

Her spotless heart, through all the night, Holds safe its little vestal spark. Oh, blessed, if the soul be white,

To breathe and blossom in the dark! -Louisa Bushnell.

## Leaves from a Lady's Diary.

JUNE 1.—The opening of the dividing month of the year. It has arrived at its maturity, and when this month is passed it will slowly decline, ending, as to many of its events, in oblivion. Read the newspapers from very wearines, and was struck with the difference with which mankind pursues crime against property and person. A man kills another or nearly beats him to death with a cub; that was a matter between two parties only, one of whom is either put out of the way or disabled for the time being, whilst the other, having satisfied his vengennee, ohis sadden passion over, relapses into an ordinary citizen. But take a horse-stealer child-bearing or illness. Give Mrs. M. back her fites and former luxury and she

would be young again.

JUNE 2.—Old Mrs. C. spent the morning with me, her comfortable looking face
framed in a widow's cap; she is the beau ideal of tranquil gossip. She told me the
reason of Carrie W.'s strange marriage. It appears that everything was arranged for reason of Carrie w. s strange marriage. It appears that everything was arranged for her wedding with her cousin; the linen and plate were all bought and marked with their monogram, and when he broke off the match, her mother, determined that this expense should not be wasted, looked around for some one with the same in-itials, and that is how the affair was arranged. The old lady is no fool, and said to me, "My dear, I have always remarked that the first year of people's marriage is the most trying, as well as the least looked back upon with satisfaction. The virtues of a man or woman lie generally out the surface and are easily appreciated; but the laults, if not the vices, are only apparent after marriage. And then the novelty wears off, and the constant presence of one to the other becomes monotonous without having arrived at the stage of becoming a custom; but if love gets over this first crisis and becomes a matter of course it does not die." I myself have often thought what a sad awakening that is for a young girl when she finds that her husband is not, as she blindly thought when he was her lover, the first of men and most distinguished among his fellow men -that they don't look up to him with the love and veneration that she did. She is apt then to be captivated by the first really superior man that she meets. For, after all, women love men less for the talents which they possess than for those which the world proclaims them to have. That is the reason also why a girl creates an ideal hero, who is a formidable rival

to the real common-place piece of humanity who would find favor in her eyes.

JUNB3.—At V— sparty, last night, there were some two or three women too
much decolletie, and when the gentlemen bent over to speak to them they used their fans to hide their necks. I made this reflection, that true modesty ought not to be aware of exposure, and that this effort at concealment excites a man's imagination more than simple exposure. That flery little X—— has had a quarrel again; nation more than simple exposure. That hery intie A.— has had a quarret again; he came to me this morning to tell me all about it. Somebody had been saying something against him behind his back; he thought it was A.—, and without taking the least trouble to make inquiries he insulted him. Fortunately A.— is a brave fellow, and could listen to the intervention of friends, so the matter was made up, but X— is more furious than ever to find the slanderer. When I said, "I'm glad you can't find him," he replied, "Which would you prefer, some one to throw stones at you whom you could go and thrash, or to have an ærolite fall on your head."

Rain in June.-This is not common in California, but by some mistake on the part of the weather clerk we did not receive our customary rain-fall in May until the closing night of the month, and then June opened with copious showers; and the rain-a short inch—was quite general throughout the State. It did good to the growing grain, without injuring the hay materially.

#### Court Chat.

A letter from Florence, in the Journal des Debats, relates with much gusto what I presume our eminent colleague, the respected Jenkins, would call a "seandal in high life." I myself labor under an utter incapacity not only to "despen seandal's tinis," but even to paint them, and must, therefore, give you the story of the Debats in its own words: "Yestrady (April 29 a little occurrence took place in that caravanis rai of princes, yelept Florence, which is like y to make some noise, and which, moreover, involves rather a nice question of international law. The Hotel della Pace, on the Arno, had for the past few days among its guess the young and gracelu hereditary Princess of Monaco, daughter of the Duchoss of Henri Conn, and consequent y grand-daughter of the Grand Duchess Stephanic of Boden Married in 1820 to his Highness the Duke de Valentonois, heir presumptive to the crown of Monaco, she thought proper, in February, 1870 to part from a husband who, it is said, was not always very tender towards her, even during that short kenewymon, and sought a reinge with her mother at Baden. There she gave birth, July, 1830, to a hoy, who one day is to succeed his father and grand-father in the Government of the Principality of Monaco. As for the father, he does not appear to have greatly troubled himself about either his wife or his son. Although he spent a portion of last year at Stantgardi with the Prince of Hoherzoileri, he rever attompted to pash on as far as Baden to see his wite and his heir. However, since the Princess has left German, for Italy, paternal tenderness seems to have generated with the prince of Hoherzoileri, he rever attompted to pash on as far as Baden to see his wite and his heir. However, since the Princess has left German, for Italy, paternal tenderness seems to have been aroused all of a sanden, and thus affectionate parent has selected as the interpreters of his feelings, the police sergeants made their appearance at the Hotas delk Pace, provided with an order from the President of the Tribual

Stolen kisses are, as a rule, said to be sweet; probably the most pleasant of all the various kinds of kisses. The maternal, traternal, or patena, are also pleasant; and when Wishelming Risses her dear confident, Ameria, from whom a cruel tate had separated her for at least a few hours, she, no doubt, derives and confers great pleasure. We confess, however, we cannot see what pleasure can be derived from the Russian "official kissing." This interesting ceremony, on Easter Sunday, is thus described by a correspondent of a contemporary. On Standay, from about half-past one til three, he says, "the Emperor might have been sen in the chapel of the Winter Paince going through the ordead, which in speece of his perseverance and good humor, must have sorely tried his patence. Thank of the number of kisses be had bestowed during that hour andea had: There were, first, all the officialing priests; then the members of the Council of State; next the sentors; them all the general officers in st. Petersburg, whose name is be and, then the officers of the Imperial Guard above the rank of major. Of the officers of the lover rank only a certain number are sent by each regiment. These are followed by those of the fleet, the same distinction being made between the superior and inferior ranks as in the army; while lastly come the officers of the Imperial household. "Canat Journal, May 18th."

The Queen, it is gratifying to hear, has not suffered from the fatigue of the journey to Scotland, and is enjoying the best health. Her Majesty will not return, as at present arranged, this about the middle of June, and, it is presumed, there will still be some Court festivities given by the Queen independent of those aunounced to be presided over by the Prince and Princess of Wales on their return. That event is now very proximate, and will be close upon the date we have always mentioned. There is evidence of a very gay season before the world of tashion in London after this exceedingly tearful month has done its worst to destroy the reputation of merry May. It was noted at the last Drawing Room that there was a marked change in the attire of the Majesty, principally in the matter of precious stones, which were colored for the first time. The rubies worn by the Queen were most remarkable, and the jeweled arm of our Sovereign, when her Majesty offered her hand for the loyal homage of those who came to pay their devoire, must certainly dwell in the memory of all present on account of the striking and extraordinary magnificence of the gems displayed.—Court Journal.

The ex-Empress Eugenie will soon leave on a visit to Spain, where she purposes remaining during the Summer and Fall, for her health.

## William Shakspeare.

[Read at the unveiling of the Shakspeare statue in the Central Park, New York, on the 23d of May, 1872.]

She sat in her eternal house. The sovereign mother of mankind;
Before her was the peopled world,
The hollow night behind.

"Below my feet the thunders break:
Above my head the stars rejoice;
But man, although he babbles much,

Has never found a voice. "Ten thousand years have come and gone, Hamlet the Dane, unhappy Prince,

And not an hour of any day
But he has dumbly looked to me The things he could not say.

"It shall be so no more," she said. And then, revolving in her mind, She thought—"I will create a child Shall speak for all his kind."

It was the springtime of the year.

And lo! where Avon's waters flow, The child, her darling, came on earth, Three hundred years ago.

There was no portent in the sky. No cry like Pan's along the seas, Nor hovered round his baby mouth The swarm of classic bees!

What other children were he was: If more, 'twas not to mortal ken; The being likest to mankind Made him the man of men!

Before he came his like was not, Nor left he beirs to share his powers: The mighty mother set him here

To be her voice and ours! To be her oracle to man:

To be what man may be to her-Between the maker and the made The best interpreter.

The hearts of all men beat in his. Alike in pleasure and in pain ; And he contained their myriad minds—

Mankind in heart and brain !

Shakspeare! What shapes are conjured up By that one word! They come and go, More real, shadows though they be,

Than many a man we know.

Who most enjoys when suffering most; His soul is haunted by itself—

There needs no other ghost!

The Thane, whose murderous fancy sees The dagger painted in the air, The guilty king, who stands appalled

When Benquo fills his chair

Lear in the tempest, old and crazed; [head!" "Blow, winds! Spit fire, singe my white Or sadder, watching for the breath Of dear Cordelia, dead!

The much-abused relentless Jew; Grave Prospero, in his magic isle; And she who captivated Anthony— The serpent of old Nile!

Imperial forms, heroic souls, Greek, Roman-masters of the world:

Kings, Queens; the soldier, scholar, priest; The courtier, sleek and curled—

He knew and drew all ranks of men. And did such life to them impart They grow not old—immortal types,
The lords of life and art!

Their sovereign he, as she was his— The awful mother of the race, Who, hid from all her children's eyes, Unveiled to him her face;

Spake to him till her speech was known, Through him till man had learned it; then Enthroned him in her heavenly house, The most supreme of men! -R. II. Stoddard.

——In the Revne Scientifique there is a remarkable paper by the imprisoned Republican Blanqui, in which various cosmical theories are dealt with. We venture to quote a few of his remarks on comets: "All the world," he says, "has now learned to entertain a profound contempt for comets, those wretched playthings of the superior planets, which hustle them, haul them about in a hundred different ways, swell them up for the solar fites, and finish by casting them forth all battered. How complete a falling of! What humble respect was paid to them of yore when men saluted in the comet the messenger of death! What hooting and hissing now that they are known to be inoffensive! It is the way with mankind. All the same, this impertinence is not without a shadow of inquietude. The oracles are not free from contradiction. Thus Arago, after having twenty times proclaimed the absolute nullity of comets, after baving asserted that the most perfect tenuity in a pneumatic machine remains still more dense than comest perfect tenuity in a pneumatic machine remains still more dense than comest perfect tenuity in a pneumatic machine remains still more dense than comest perfect tenuity in a pneumatic machine remains still more dense than comest perfect tenuity in a pneumatic machine remains still more dense than comestic machine remains still more dense than comestic machine remains still more dense than comestic machine and the superior of the superior most perfect tenuity in a pneumatic machine remains still more dense than commost perfect century in a preumatic machine remains still more dense than cometary substance, nevertheless declares in one chapter of his works that 'the transformation of the earth into a satellite of a comet is an event which is not beyond the bounds of probability.' Let us return to the history of these hairy nothings (nihilites cheedues.) If they escape Saturn, it is to fall under the stroke of Jupiter, the policeman of the solar system. On duty in the dark, he scents them before a ray makes them visible, and urges them, distracted, towards perilous reasons. The processing the processing them to the state of the state passes. There, seized by heat, and swollen to monstrosity, they lose their shape, lengthen, disaggregate, and break confusedly through the terrible strait, abandoning the stragglers everywhere, and only manging to regain with great difficulty, under the protection of cold, their unknown solitude."

<sup>-</sup> The aggregate sales in the San Francisco Stock and Exchange Board, from May 30th to June 5th, inclusive, was \$2,013,660.

#### Western Political Literature.

The Lexington, Missouri, Caucasum is for Greeley and Brown. The editor announces the fact. There is no mistaking his position. Just read what he says:

"Sound the hew-gaz, strike the tonion, beat the fuzzy-guzzy, wake the gong-kwong; let the loud hosanna ring; bum-tum, fizzie-bum, ding-go-bim. Unconstitutional congress of perjured ruffians; itchy-palmed, bribe-taking, office-pedding, presidential boors and sots; usurping legislatures, blas-phemous pick pocket senators and governors, shoulder-strapped outlaws, titled bummers, reconstruction satrape, nieger bacchanals, official incendiaries, thieves, bondholders, cut-purses,

all tremble at the roar of coming doom.

Clap your hands, ye lathers, because the bread will not much longer be torn from the months of your hungry children to fatten a horde of idle savages, the nation's

the months of your hungry children to fatten a horde of file savages, the untion's wards, loney, smit-skinned vagabonds, whose only business is to attend conventions, spont insolence, wore for the offscouring of Yankee penitentaries, shums and back alleys, and manufacture strik and Southern State constitutions and laws. Toot the tympanum-cracking rams'-horns. How rapturous hosannas, we desilten hound-pape; and let the gleeful cattout squeak. Pipe forth your gladness, oh, jassacks and nightingales and ganders. Crook, ye frogs, squeat, we hogs. Flap your wings and scream your shriftest notes offsictory, oh finvincible shanghai of freedom. Let volcanoes blaze, and festive tar-barrels crackle and gleam. Let

of frection. Let volcanous onate, an arrestive activative states and greats. Let tooks estatacts and fillistics, bull caives, oceans, guide, lakes and mildame, non, women, children, Jops, poodles, beasts, birds and reptiles, all creation, animen, wohlen animen, burst forth is one class, unindus and reposes, as creation, sky-mate and inanimate, burst forth is one class, unindus and elemental, shall shall be supported by the property of triumph, joy and pass, see For Cunic. Shall be prevailed, and radicalism she comments the burst, the bussely, is decomed to speedy and irretrievable overthrow. Glorificallelujerum! Hurrah! to speedy and irretrievable overthrow. Glorification grain in Three times three thousand cheers and a view-hallo for Horae Greedey and B. Grazz Brown, the philosopher and the statesman! You'll only have to live till next November to see the consummation so devontly to be wished the overthrow of the Tumblebug and all his vile myrmidons: the annihilation of tyranny and corruption on our republican soil, and the reestablishment of law and order, afterty, peace and prosperity, by the triumphant election of Greeley and Brown—the ticket first suggested and only advocated by the Caucasian.

### The Great Canon of the Sierras.

Painted by Thomas Hill, is the grandest picture ever exhibited in this State. We stated at the time when Hill's "Yosensite" was shown to the public, that he was the greatest painter in America. Let those who doubted us at that time look at this picture now at Snow & Roos' (failery, on Kearny street. It is too grand to be taken in at one visit—for the casual grance to comprehend. The spectator does see fail as it has not problement, and to be taken in at one visit—for the casual grance to comprehend. The spectator does this picture now at Snow & Roos' Gallery, on Kearny street. It is too grand to be taken in at one visit—for the casual glance to comprehend. The spectator does not feel as if he were looking at a picture; he gazes like one in some shaded sheeter, with Nature's grandest endeavor before his wondering eyes. The gigantic, battlemented walls seem the end of this earth, and the gateway to the great unknown Future. That indescribable effect of stopendous, rocky leght, and massive grandeur, so difficult to convey by painter's pencil; is here, faithful to Nature. From the bright, realized foreground, with its sunlit, variegated herbage, grass and flower, to the extreme distance, losing itself in the heavens, the eye wanders over miles and miles of perspective, the perfection of artistic skill. The great valley, between where we look, and the dizzy rocks beyond, is as real, as deep, as mysterious, and as broad as if we had traversed its weary expanse, and were looking back upon our journey. The shady walk beneath the fall, straight trees, at the right foregreened, is not a flat surface scread with uniquents more stretched cannas: Tis back upon our journey. The shady walk beneath the fall, straight trees, at the right foregeound, is not a flat surface spread with pigments upon stretched canvas: 'Tis an inviting, tempting seclusion, like the long aisle in some "cathedral, vast and dim." Were this painting photographed, it would seem taken from the face of Nature, so beautifully true is the gradation of perspective throughout the entire picture. A few figures -some Indians, a wigwam, the camp-fire, a glowing little spot, with its cool, blue, lazy-climbing smoke only serve to deepen the feeling of the gazer, that he is in the midst of primitive solitudes, vast and grand. The fight upon this magnificent picture is most artistically managed by Moss-rs. Snow & Roos. All the other pictures of the gallery are sacrificed to this grand piece of Nature, and it is worthy of the tribute.

## The Capture of Mazatlan.

The final capture of Mazatian and the subjugation of the revolutionists in the State of Sinaloa by the troops of the Supreme Government of Mexico places that and the other Northwestern States of the Republic under the dominion of Juarez. The Sinaloa revolutionists fought with great desperation, and for more than a year The station expansion is strong with great use per and or more familiary strong have battled against their old curvey. Don being the Through their familiary session Mazzilan is free to resume the commercial relations with this city. The trade between San Francisco and the commercial relations with this city. The trade between San Francisco and the commercial relations with this city. The trade between San the strong session and the commercial relations with this city. The trade between San the strong session and the commercial relationship in the strong session and sessio The Pacific Mail steamers touched there occasionally, and the North Pacific Transportation Company forwarded a steamer monthly. Both these lines will no doubt again touch at Mazathian. That port, La Paz, Gusymas, Manzanillo and Acapula are all tributaries of San Francisco. With peace restored in the Northwestern States of Mexico, we must expect a large increase of trade from the territory.

## The Angel of Patience.

Beside the toilsome way, Lonely and dark, by fruits and flowers unblest, Which my worn feet tread sadly day by day, Longing in vain for rest,

An angel softly walks, With pale, sweet face, and eyes cast meekly down, The while from withered leaves and flowerless stalks She weaves my fitting crown.

A sweet and patient grace. A look of firm endurance, true and tried, Of suffering meekly borne, rests on her face—

So pure, so glorified. And when my fainting heart Desponds and murmurs at its adverse fate.

Then quietly the angel's bright lips part,
Whispering softly, "Wait!" "Patience!" she sweetly saith-"The Father's mercies never come too late :

Gird thee with patient strength and trusting faith. And firm endurance-wait!"

Angel, behold, I wait! Wearing the thorny crown through all life's hours, Wait till the hand shall ope th'eternal gate. And change the thorns to flowers.

-Public Opinion.

# Fashionable Gardening .-- [By a San Francisco Lady.]

There are few places in the world where flowers flourish as they do in San Francisco and neighborhood, and we have often been surprised that window gardening is not carried on to a greater extent than it is. We want something showy and at the sumetime hardy and free blooming for this particular purpose something that will look well from the street, and whose bloom will not leave it something that will look well from the street, and whose bloom will not leave the with the first cold wind. City people, as a rule, are ignorant on the subject of flower culture, and a few hints may not be out of place. The fashion for window gardens is to have collections. Felices or ferns are much affected by people who have the good taste to prefer a delicate blending of color to a gaudy display of antagonistic tints. One advantage of this is that a complete collection can be so antagonistic tints. Ohe advantage of this is that a complete collection can be so pleasily formed. Geraniums repay the cost as well as any. No class of plants is so pleasing, whether in bloom or not, or so easily cultivated as the geranium. A showy, variegated-leaved geranium, called the "Prince of Wales," has a rich yellow leaf, with a bright bronze red zone. A beautiful ivy-leaved geranium, called the "Duke of Edinburgh," has been recently imported from Britain. It has a broad white border, which shines like silver in the sun. Some ladies cultivate only the fragrant geraniums, of which there are four rose-scented kinds, one muskonly the fragrant geraniums, of which there are four rose-scented kinds, one musk-scented, one nutning-scented, and one having a strong peppermint thavor. Other ladies, again, affect the culture of pinks. We all love flowers, or ought to: and why should not we have gardens in our windows, the looking after which would be more profitable and less harnssing than the routine of shopping, etc. What sets a room off better than fresh, growing flowers? Hanging buskets form a graceful adjunct to these window gardens. Some plant them only with grasses and trailing mosses, others plant only convolvuli. The great mistake in planting backets is that they are aver-crowded. baskets is that they are over-crowded. SAN FRANCISCO, May 31, 1872. FLORA.

# Twenty-two Years Ago,

Last Thursday morning, a steamship glided quietly into the harbor of San Francisco, crowded with men, nearly all of whom were under thirty years of age; enthusiastic, full of hope and vitality, eager for the battle of life. They hurried into the waiting boats and landed at the old Niantic's gang-way on Harrison's Pier, Clark's Point, at the old Apollo's stern, and on the sandy beach of Happy Valley. Each went his allotted way. Where are they now? those eager aspirants for wealth or adventure? One, whom to know was to respect—J. W. Brittain—went, quite recently, to his rest. There were two young fellows on board the steamship, who there met for the first time, but ever since have journeyed together. To and from their business they come and wo: to meet them singly is subject for remark. from their business they come and go; to meet them singly is subject for remark. They are happy because they are always trying to make others happy. Pictures, books, wines, music and flowers, suffer no deterioration at their bands, for it has ever been their business and their recreation to improve them all. For twenty-two years them their business and their recreation to improve them all. For twenty-two but no harm of them. Ever since the News Letter was established they have sustained it; and may they, and we, be here twenty-two years hence from last Thursday, June 6th, 1872.

## Another Outrage Upon Apaches.

By telegraph we are advised that another dastardly outrage has been perpetrated upon the immoent, unsuspecting and peaceful Apaches, who reside in Arizona. If appears that during the peace-talk of General O. O. Howards-she of Charneellorville notoricty- at Camp Grant, with a number of worsent braves and antiquated aquaws of that mobile race of red men, the young bucks of the same race were indusping, within saity miles of the grand pow-wow, in the pleasant and innocent amisement of scalping and torturing the degraded white settlers who had so ruthlessly occupied and tilled the land in the fair valley of Sonita. Bonitres were made of houses and grain-stacks, cattle were butchered, children driven into captivity, and other peasant pastimes indused in, which are known only to an Apache brave. While engaged in three highly artistical pleasures, a few rassals socilers, wearing the uniform of the United States, anded by a baker's dozen of land-jumping settlers, did, with malice altorethought, shoot and kill, and seriously wound a number of said red men. Such outrages should at once be stopped, and the strong arm or tongue of the Government should be evoked to allow the amusements of the Apache to continue unmolested. And we also recommend that rides, powder and ball, rations of ment, bread and sugar, and necessary articles for the perfection of their toirets, beart once issued to America's oldest citizens who have been so badly treated. The rifles and cartridges can be used in selfad-frees when they are so outrageously assailed. The rations can be used to advantage when the noile red men are resting from their daily aboves. The strides for the toilet, such as heads, red paint, etc., will adorn the bearess while in council with their inferior brothers the whites. To the noble chiestan Cachises we would be commend that trend once he woven a necklare, made of the hair of white women who have dured to invade the soil of that territory. The presentation spaces should be made by his best friend. Vincent Collyer, who would,

#### Our Future Grain Market.

The Union has often referred to China and Japan as the probable future grain markets of this State and coast. All that is needed to rupen this expectation into reality is a few years of active trade and interchange of ideas. There is not much doubt that, so far as Japan is concerned, we can hay down our floar in her principal scapnets at lower prices than her people can produce rice; nor that they will become large consumers of flour as our trade and personal and political intercourse tempt them into the customs and habits of the Western nat; as. As our wheat trade is now organized, if costs us at least sixty per cent, of the home value for the costs of transportation from the interior to san Francisco and of export from San Francisco to Liverpool. Often, owing to a scarcity of shapping, the rates to Liverpool are as high as \$18 per ton, or 3 de cents in gold per businel. If we have the costs of presumption is that the farmers will realize not over \$29,000,000, or \$1 net rebushel, while it will cost nearly \$11,000,000 for export charges. A late article by Professor Carr on our agricultural resources and incidentally the best method of disposing of them, states that it costs but \$3 per ton, or a little more than fine cents per bushel, to export wheat from San Francisco to China. That is to say, if China and Japan farmshed us our wheat market this year, unstead of Liverpool, the cost of exporting our 29,000,000 surphs bushels would be but \$1,200,000 against the \$11,200,000 which we shall have to pay the Liverpool shippers. It would say use \$1,200,000. Moreover it would require a less number of ships, since five trips can be made to China or Japan in the same time that two are made to Liverpool. As for made to China or Japan in the same time that two are made to Liverpool. As for made to China or Japan in the same time that two are made to Liverpool. As for made to China or Japan in the same time that two are made to Liverpool. As for made to China or Japan in the same time that two are made to Liverpool. As for m

We take the following from a report in the Natal papers: "Resolved, That any person selling intoxicating fiquor to a native, without a written order from the master of such native, be held liable to punishment. [The punishment mentioned by the speakers on this subject was destruction of the property of the person fitneding.] Resolved, That any person purchasing diamonds from a native under any circumstances be punished. [The punishments mentioned for this offence were destruction of property, cropping of ears, tarring and feathering, and fifty lashes on the public market place.]

## Redeeming the Time.

He liveth long who liveth well; All else is life flung away; He liveth longest who can tell Of true things truly done each day. Then fill each hour with what will last, Buy up the moments as they go; The life above, when this is past, Is the ripe fruit of life below.

Sow love, and taste its fruitage pure Sow peace, and reap its harvest bright: Sow sunbeams on the rock and moor, And find a harvest-home of light.

## The Webb Line.

Recent advices from New Zealand and Australia are not favorable for a contin-Recent advices from New Zealand and Australia are not lavorable for a continuous of the Webb line unless aided by a subsidy from Washington. Thus far it has been sustained at the joint expense of New Zealand and W. H. Webb, the former paying a subsidy of £50,000 a year, the latter loving a similar amount. The arrangement at first entered into by Mr. Vogel, on behalf of New Zealand, with Mr. Webb was too much in the interest of New Zealand to enlist the sympathy of Australia and all efforts since made by Mr. Vogel to induce the Australians to join New Zealand in the enterprise and to share the expense, have been met with join New Zealand in the enterprise and to share the expense, have been met with promises to bring the subject before the respective Parliaments—the ministry having no power to act without their sanction. The Chambers of Commerce of Sydney and Melbourne have been urgent in their appeals to their respective foverhments to afford temporary aid, but to no purpose. The value and importance of the service is fully appreciated and acknowledged, and nothing did so much to convince them of this as the presence of American purchasers at their wool sales. The respective Australian colonies have notified the Home Government that the present postal service ria Sucz will terminate in 1873, when it is proposed to are present postal service ria sice. With curimmate in 163, when it is proposed to arrange for a forthightly service rio the Cape and ria America alternated with Melbourne or Sydney as the port of departure. The Avers Letter noticed a year ago the proposition of Mr. Burstall to contract to deliver the mails in England in fortyfive days from Melbourne, with satisfactory guarantee from leading ship-builders in England. That plan has since been matured by the London and Australian Steamship Company to perform the service in forty-five days. The population of New Zealand is too small and present business too light, while the demand upon her treasury to pay interest on money borrowed for internal improvements and deher treasury to pay interest on money borrowed for internal improvements and development of resources, is too great to warrant a long continuance of the present heavy subsidy—equal to one dollar per head for her entire population. While it is not probable that Mr. Webb, with all his wealth and enterprise will care to continue unaided much longer a business so unprofitable, with a subsidy from Washington, he might be placed in a position to respond to the invitation which Australia will give to the world to tender for the proposed service. It is evident that Congress will grant no subsidy for the service before its adjournment. The question then is, can the service be maintained without it, and if so, how? Perhaps the Committee of "One Hundred" may be able to solve the problem.

## A New Disease.

Dr. A. W. Barclay, in his usual report to the Chelsea vestry, near London, says there is among the deaths one "alleged to be due to cerebe-spinal fewer, a disease which may or may not become epidemic among us, but well recognized in Germany and Poland, where it is said to take its rise." In answer to various questions, Dr. Barclay said that within the last fortnight there have been fourteen deaths from this disease in Yew York, where it threatens to become epidemic. This case in Chelsea was the dirst he had heard of in the metropolis, and he had never met with a case in his private practice. The disease was an inflammation of the brain and spinal cord, together with disturbance of the blood, which produced black spots in different parts of the body. The disease was spreading very extensively in various parts of Germany and Poland.

#### Patent Gas.

A prospectus has been issued of the Petersburg and Viborg Gas Company (limited), with a capital of £150,000, in shares of £10, the object being to establish gas works for the north bank of the Neva, the other side having been supplied for some years by two companies which pay large dividends. The Moscow Gas Company has thus far not been a success, but it is stated that whereas coal in Moscow costs 48s. per ton, the price in St. Petersburg is only 21s., while the rate obtained for public lighting is 30½ roubles in St. Petersburg against 17½ roubles in Moscow. The new company proposes to adopt the process of the Patent Gas Company, which does not require Cannel coal, and is said by those interested to offer other special advantages. This is the process for which our fellow citizen, Joseph G. Eastland, has the patent for the United States.

Some Plain Truths About Steamship Lines.

The authoritative statement that an English steam line is about to compete for the trade between San Francisco and China has, during the past week, acted like a the trade network shareholds and the hand has, then the pass week, according a bombsholl among steambout men. To the uninitiated it may appear strange that an unsub-sidized line has the slightest chance against a company drawing one million dollars per alaum from the Sam's Treasury. This seeming anomaly will disappear when we come to understand what a perfect revolution facre less been in steam-hip building during the last few years. The truth is that it requires a large steamshop busiding during the last few years. The truth is that it requires a large subsidy to put a line of woods side-wheel steamers, constructed a few years ago, on a par with the iron propellers of to-day. A few facts will suffee to conclusively show that this is so. One of the best representatives of the side-whee class of steamers is the Novada, of Webbis line. Let us see what a comparison between her and an iron propeler with the recent improved and economica compound engines will short lot. The Novada cost in her construction \$200,000. To make the vocage between Hernolulu and Anckland man average of sevention days, she containes done tones of coal. To keep her in repair involves an exposition equal to her first cost every ten years. We have before us a statement by one of the best-known ship-bunding tirms on the Clyde, showing the cost and capacity of an iron papeller. A steamer not quite so large as the Novada, but able to carry a great destinance carro, because she would require so much less cost, built of rom and supplied with compound engines and all the latest improvements, would be mill for \$150,000. She would be quaranteed to steam the distance between Auckand and Henolului in thirteen days upon a total consumption of 260 tors of coal. An for \$1.50,000. She would be quaranteed to steam the distance between Anckand and Honolubin in thirteen days upon a total consumption of 200 tons of coal. An iron steamer classed A 1 for twenty-one years usually requires but hits repairing during that period. Now let us lock upon the one picture and upon the other, and what do we find. The English iron propeller costs just had as much as me American wooden side-wheeler and she steams twenty per cent, faster upon saxly per cent, less coul per day; whist in the matter of repairs the difference is so great that it is next to impossible to make any comparison between them. If we reckon the cost of coal at the very moderate average of 30 per ton, the saving on the one there as one contains the contained average of a per too, the saving on the one in them a one for the farmen round voyages per annum to be made between here and Mechonno, would be within a fraction of \$383,000 a sum which in its of is carried to a hand-some subswifty! Then, as 33,000 tons less could would have to be carried. there would be room for that much more cargo. As the steamers cost one-half less to build, it follows that the interest upon capital would be reduced by one-half. The voyages being performed in twenty per cent, was time, the cost of keeping passengers would be reduced in an equal ratio. And beyond and above all, the steamers would successfully compete with rival routes and be equal to the inexorable demands of trade and commerce for rapid transit. These are very pain truths, requiring grave consideration. The future of San Francisco very argely depends upon the manner in which she controls the commerce of the Pacific by means of upon the maillier in which sire collisions the commerce of the graculty means we steam three steam three steams that she could be six. We must not shit our eyes to facts. The railway has no more certainly superceded the old waggen road that has the modern iron propeller the ance-int wooden sidethe old waggon read than has the modern from property the abovent wooden side-wheeler. They understand these things better in the East, where, at the rate of 360 mbles per day, or almost railroad speed, the Afantic is being crossed in less than eight days. Senator Chander, who, as the Charman of the Commettee on Commerce, has peringly a better opportunity than any other man in the United States to become acquainted with these subjects, delivered a speech on the subsety constitution which was negatively with stern further. As that speech conscisses subsety question which was pregnant with stern truths. As that speech possesses special interest to San Francisco, we print as much of it as our space will about. It will be seen that the objection which proved latal, was not to the granting of a subsidy to an Australian line, but to the uncommercial character of the ships with which it was proposed to run it:

Mr. Chandler send: "Mr. President, I thought before we took this new step in the smistly histories, I would look into this matter and see exactly what the truth was, and I tound it a zood deal as the sacior tound his wife. He was broughtlup for bearing her. The Judge said, 'why, Jack, you married your wife for botter or worse, yot agreed to love and protect her. Now you should deal with her kindly.' 'Oh, yes,' said Jack,' I took her, it is true, your Honor, for better or for worse, but I found, it a d. d. sight worse than I took her for.' Laughter. Just so I found this subsidy business, nuch worse than I had supposed. The whole fixing is a job them. I found that the steamers proposed to be subsidized are old wooden huiks of the ancent side-wheel type, that are unable to run at a profit upon any precover which has ceased, and they have not earned a cent since. They are processes in the position of those-steamers that used to run on Lake Michigan. The fine to Detroit alone cost one million dollars. After the completion of the railroad they have not earned a cent since. They are precises it in the position of those-steamers that used to run on Lake Michigan. The fine to Detroit alone cost one million dollars. After the completion of the railroad they have had to the major and then they took out their boilers and turned the hulls into lumber barges. But, sir, the persons who owned those steamers did not understand how to get out of a bad scape. The cought to have come to Congress and obtained a subsidy to run those ships. That is the way to do it. Laughter, I here is Uncle Sam's Treasnry put your arm in there-draw out your millions. Five millions! That is the total sum. There is nothing like going forbig licks while you are about it. [Laughter.] Mr. Precident, in the interest of commerce I am ready and willing to pay reasonable subsidies wherever they can built of pay reasonable subsidies wherever they can built for an exceptional raffic, and for a day and generation that have gone by These

side-wheel steamers will carry little more fuel than will suffice to take them across the ocean, and they can only travel at a low rate of speed. Does any one suppose that will do in these days for a first class mail line? The thing is preposterous! Then, every five years or so they will have involved an expenditure in repairs equal to their first cost. Sir, there are things you can do and things you cannot co. You cannot by any law or by any subsidy or by anything you can do, restore the eight in the place of the reaping machine. You cannot restore these old side-wheel wooden steamers as means of commerce as long as iron propellors are used side by side with them by all the rest of the world. There has been a revolution in the commerce of the world within the past ten years, and we may as well look, that fact squarely in the face. Ten years ago every steamer that crossed the Atlantic was a side-wheeler. Of all the 173 that are crossing it to-day only one side-wheeler is left, and she is running at a loss. A service, to be successful, must be commensurate with the requirements of the times. Mr. President, it is useless to attempt to run these old hulks anywhere. They cannot run them at a profit. These ships on the Australian line were laid up for two years because they could not be run on any known line of commerce profitably. In the interests of commerce I protest against taking a single one of these old hulks into the pay of the Government. If we were compelled to take them, then I should propose we take them for just what they are worth, and you would find them exactly in the position of the Dutchman's dog. He sued a man for killing his dog. 'Well, said the Dutchman's dog. He sued a man for killing his dog. 'Well, said the Dutchman's dog. He sued a man for killing his dog. 'Well, said the Dutchman's dog. He sued a man for killing his dog. 'Well, said the Dutchman's dog. He sued a man for killing his dog. 'Well, said the Dutchman's dog. He sued a man for killing his dog. 'Well, said the Dutchman's dog. He sue

#### The Committee of One Hundred.

Some months since it was feared that the Central and Southern Pacific Railroads would not make their terminus in San Francisco. The Alla California seized the opportunity for sensation, and not having been seen by Governor Stanford, sucopportunity for sensation, and not naving been seen by Governor Staniord, succeeded in impressing the people that a commercial city was to be built at Gost Island, and San Francisco would be greatly injured. The Bulletin and Cult, owned by the same proprietors, seeing, as they supposed, popular opinion drifting against the Railroad Company, joined the public cry, and let slip the dogs of war. This outerly had depreciated property and made a panic in the real estate market—was injuring the city and relaying its presenting. At this period contain costs. This offery find deprecated property and made a panic in the real estate market—was injuring the city and retarding its prosperity. At this period, certain gentlemen, appointed by the Board of Supervisors, arranged affairs with Governor Stanford, and agreed upon a basis of settlement by which the terminus was to be at ford, and agreed upon a basis of settlement by which the terminus was to be as Mission Buy, and certain concessions were to be made to the railroad. All was satisfactory and would have been entirely acceptable to the people, when, unfortunately for the town, Messrs. Cobb, Drury, Offs, Austin, Wheeler & Co., from personal motives, or through a desire to see their names in the papers, or as the instruments of a certain other railroad speculation, called together the Committee of One Hundred—a very respectable body of granton, cancel together due to mixture of one terest in the business, did not know anything about it or car for it. The Committee met in the Merchants' Exchange, when from a side room marched the self-aptee met in the Merchants' Exchange, when from a side room marched the self-appointed Committee of Seven. They organized the Committee and appointed its officers; John T. Doyle read a set of cut and dried resolutions; an Executive Committee of Twenty-three was appointed by the Seven, and the Seven added to them; and the One Hundred adjourned. A pow-wow has been held by the mutual admirationists of San Francisco and St. Louis. From this public meeting, and not from the Committee of One Hundred, Judge Hager, Mr. Sheath and Mr. Hopkins were sent to St. Louis, where they went to examine and report. It appears they have made some compact with the Atlantic and Pacific Company. This they had no right to do. The Committee of One Hundred has been called together only twice. The first time it had no quorum and was adjourned; the second time Mr. Wheeler read a voluminous report, which breakt out a single remark from after twice. The first time it had no quorum and was adjourned; the second time Mr. Wheeler read a voluminous report, which breught out not a single remark from any of the One Hundred, except Wheeler; then came an hour's speech and a set of resolutions from John T. Doyle, which were adopted on his motion—none of the Committee saying one word—and the Committee adjourned. Seventy-seven on to the hundred gentlemen have had no voice in the business and given no expression of their opinions. It has been, from beginning to ending, a cut and dried, "put-up" job to obtain ten millions of dollars from the City Treasury for certain men to manipulate. It will be a failure; and if a plain and simple resolution had been introduced at the last meeting to deny to the railroad the use of the streets in the sixty-acre grant, it would have been voted down. We await with curiosity the report of Sneath and Hopkins. The cat will then come out of the meal, and not all Mr. John T. Doyle's verbiage and wind will suffice to keep it hid. In the meantaine the scare is over, and the railroads will get the necessary accommodations for doing business on our water-front. They are proceeding with their work, and building depots, laying tracks and grading and filling water-lots. Wheeler and Doyle are at that is left of the Committee of One Hundred, and they will soon disappear—blown away by their own wind.

#### New Cars.

We observe that the new one-horse-pay-your-own-fare cars are getting more plentiful every day, and caning in popularity. Mr. R. B. Woodward is justy deserving great praise for his enterprise in giving us all the nove ties of the senson, and be it a new ear or a new forathe, or a seamen-ter, its all the same, he is bound to keep up with the times. We understand, in this connection, that the Kimball Mannfacturing Company have just thus-hed for lum the first street pathec car ever but there, and the first to go upon the road. This car is eagant in design, awariously fitted up with volvet carpet, and sofas extending the controller, the design, awariously fitted up with volvet carpet, and sofas extending the controller, the carpet and scroller being the work of a san Francisco artist, at a cost of \$200; the panes and scroller being done by the artest Lee. The panes between the windows have mirrors trained over with laurel, and stained glass windows are arranged along the raised dock. The object of this bar is to supply a want ong left by allow designing the visit the Gardens at hours when gentlemen are engaged and canned accompany them: it being strictly the addess car, and no gentlemen admitted unless with laddes. There will be no disgristrum pipes or eigans on the platform, nor the issual crowd to be squeezed through, and every passenger will be scated. It will be important to do the controller to do and structure, starting from the Grand Hotel with four grey horses, and will run during the day and probably Sanday to the Gardens. The tare will be remembered that the Kimball Company have been fully up to time on their contract these month. The quanty of the cars give perfect and squar two in advance. They are turning out one car a day now, and will complete their man factors. They are turning out one car a day now, and will complete their man factors. They are turning out one car a day now, and will complete their man factors. They are turning out one car as a day now, and will complete their man factors. They are

## Important.

The following petition to the Board of Supervisors has been drawn up and will undoubtedly be signed by large numbers of our prominent cititizens and business men, and, we believe, three-fourths of all our working men will be but too glad to sign it also—the Committee of One Hondred to the contrary notwithstanding:

#### MEMORIAL

To the Honorable the Board of Superisons of the City and County of San

We, the undersigned residents and taxpavers of San Francisco, learning that an ordinance is now pending before the Honorable Board of Supervisors who agrees to the Southern and Central Pacific Railroad Companies the use and title of certain streets within the exterior boundaries of the dands aiready granted by the State to be used for terminal and commercial purposes, therefore, we, the undersigned cutzers, most respectfully represent that the passage of sad ordinance won a granty benefit the city and its industrial and commercial interests; it would make variable a large tract of tide and overflowed lands now useless. The passage of this ordinance can do no possible minry to anybody, while it will strengthen and enlarge the freshelp that should exist between the city and the great Railroad Companies of the State, and and much to our taxable property. Its passage will also give extra furnities to all the commerce of the world that comes or goes this way through the Golden oute. Further than this it is not to be expected that the Railroad Companies would be withing to expend vast sums of money in fifting in and making passable these streets unless their life to the same is made perfect by the municipal aw-makers of San Francisco. For these and many other reasons we carnestly urge upon our Supervisors the duty of enacting into a law the above-mentioned ordinance—the same already having passed to print.

#### Presidential.

The result of the recent Democratic State Convention of Indiana is decisive of the indorsement at Baltamore of Greekey. Hendrick was to have been the "straight out" Democratic nomination; this coalcition with the Liberal Republicans, on his candidacy for Governor, settles the matter of Greekey's indorsement at Baltimore. Carl Schurz and some others have called a conference at New York over the situation; but everything seems to indicate a square fight between Grant and Greekey.

## New Books from A. Roman & Co.

Science Primers, edited by Professors Huxley, Roscoe, and Balfour Stewart. Published by Appleton & Co., New York.

This week we have received "The Science Primer on Chemistry," by H. E. Roscoc, and its companion on "Physics," by Professor Balfour Stewart. In these works it is the object of these distinguished authors to state the fundamental principles of their respective sciences in a manner suitable to youthful pupils. By simple experiments leading up to the chief truths of each science, they give information and endeavor to discipline the mind in a way which has not hitherto been customary, by bringing it into immediate contact with Nature herself.

RESURECTION OF THE DEAD, by D. A. Dryden. Published by Hitchcock & Walden, Cincinnati,

This work purports to be an independent and candid study and suggestive statement of just what the New Testament teaches concerning the resurrection of the dead. The author says: "It is written neither in the interest of any church, creed, or theological doctrine, nor with the design to controvert any. The author has endeavored as far as possible to free his mind from all prejudice, so as to go to the Written Word itself, diligently and prayerfully seeking to discover just what it does teach on this deeply interesting subject."

A Woman's Experience in Europe, by Mrs. E. D. Wallace. Published by D. Appleton & Co., New York.

This account of a "lone woman's" adventures in a journey through England, France, Germany and Italy, is told in a chatty, pleasant way, which will insure the author many readers. The following extract will give a good idea of Mrs. Wallace's style:

"The Italiens, where our own Patti held the Parisians under a spell of enchantment. And while Patti reigned so triumphantly, the star of Rossini was fading forever. Only in the deeper pathos of her voice could his pupil's grief be detected. Who that was present at the Italiens on the fatal evening will ever forget the thrilling effect?

The Queen of Spain, the Prince and Princess of Wales, royal guests and their suites filled the boxes: diamonds glittered in coronets and neckhees, bracelets, brooches and rings as plentifully as the dew-drops on the lapis vert at Versailles on an August morning. The darling and pride of the old king of musicians was pouring out her richest notes, mellowed more than usual by the oppression of consciousness that her master was ill and suffering. A message was whispered from box to box, chilling each heart with its dread import: "Rossini est mort!" "Ros sini is dead!" In the green-room, through the orchestra, every ear received the message but one. Patt, the child of song, was spared; and her notes still poured forth in mournful cadences, falling on the hearts of the shuddering audience like a requiem.

Rossini was not a Roman Catholic, but, to gratify his wife, consented to have a priest from the Madeleine to grant him absolution. He was particular in directing which priest should attend. Entering his room, the priest asked: "Why do you prefer me, my son?" "I like your voice," was the musicians reply.

FINE ARTS. Journal of the Polite World. Edited by Laura Keene and Emma Webb Nivert, New York.

A new periodical, devoted to Fine Arts and Social Life, under the guardianship of two ladies who have already earned an enviable reputation in the theatment world. In appearance and style the new monthly resembles the English Art Journals, and will embrace many attractive features never before attempted in periodical literature.

# The Gulf of California Commercial Company.

Intelligence received from London being favorable to the interests of this enterprise, we hope soon to be able to place its merits in full before our readers. The main object of this enterprise is to obtain the necessary facilities for the establishment of a bonded warehouse system of operations in Port Paraiso, in the District of Mulege, Lower California, under its Colonial franchises, from which place, as the depot of our California goods, all the traders of the Gulf coast can be supplied with such American fabrics, implements and goods of every description, as may suit the wants of the people around and along the sea-board of over a thousand miles, and to effectually succeed in this enterprise, the establishment of a steam ferry line will be necessary, connecting the Gulf coast of Lower California with the terminus of the Southern branch of the Southern Pacific Railrond at Guaymas, in the State of Sonora, Mexico, having secured the entire monopoly of this route by the purchase of the necessary territory communding the nearest accessible poile of landing, the harbor of Port Paraiso, the ownership of which property must control this route. The operations of the Company will embrace the improvement and cultivation of the agricultural lands of the Company, laying out vineyards, planting the mulberry tree, ramie plant, tobacco, the sugar cane and cotton; cultivate the olive and fig. manufacture wines, olive oil, castor oil, and to purchase, ofs and lease lands and town lots, and develop the pearl, whale and other fisheeresn the waters of the Gulf coast bordering on the Company's property

## Sibvl.

[BY ALICE CARY.]

O winter! O pitiless, pitiless winter,

I would with a breath I could have you away ! My Sybil is lying, my Sibyl is dying, Is lying and sighing and dying for May!

O winds wildly calling, O winds roughly calling,
From hilltop to hilltop, from deep unto deep;
Have done with your calling, and risen, and falling I charm you by her quiet beauty to sleep!

O just for the bright little wings o' th' blue birds!
O just for a glimpse o' th' skies o' the spring!
O sunshine of amber, flood all her dim chamber—

O blue-birds, fly thick to her windows, and sing.

O pinks and wild roses: O wild pinks and roses! All covered with drifts of black leaves in the woods; By ber checks red and burning, and restlessly turning, I charm you to hasten the life o' your buds.

O lilies, O beautiful, beautiful lilies! So folded and fast in your prison of gloom; By her fingers so slender, her bosom so tender,

I charm you to wake and to break into bloom !

O violets, under the stiff, sleety grasses! O violets, soft as the blue o' the skies; Take hold o' the slow, sliding sunbeams, I charm you. From darkness and death by the light of her eyes.

Daffodils, daffodils, sun-sucking daffodils, Waiting for April to kiss you alive;
By th' dazzling fall of the long, yellow trees
About her white shoulders, I charge you, revive.

O daises, ye modest and meek little daises So open of heart, and so fair in the face, Come back to the borders and beds of her garden— I charm you by all her unspeakable grace!

O hyacinths purple, so royally purple,
Come, come to us, spite of the winter's stern frown;
I charm you to come by the color shot over

The soft silken sleeve of her holiday gown,

Wild winter, wild, pitiless winter! I would with a breath I could have you away! My Sibyl is lying, my Sybil is dying, Is lying and sighing and dying for May!

#### The London Court Journal and Ourselves.

The London Court Journal, of May 25th, has an able review of the speech of Mr. G. O. Trevelyan, at the opening of a new Liberal Cub for Liverpool. We publish the following extract therefrom, it being specially pertinent to ourselves and all concerned: "The fact is, the nation is getting abruned, While as well as Conservatives. They are both frightened with the reforming which the Government is always playing at, and feel at ength a full appreciation of that great arrangement to place the sun and the moon so high as to be out of reach, lest

"Some reforming (here put in the right rhyme) Should take them down to light the world without gas."

This is the gist of the whole trouble. The nation at large does not care much for This is the gist of the whole trouble. The nation at large does not care much for a name; it is just as content with the word Whyg as it is with Conservative, but it starts with alarm at reforming —— who wishes to undo everything and revolutionize the country. Verity, even the Republicans slake and quiver at the activity of the reforming animal. Even in the great and glorious Republic of the United States the same sentiment is expressed at the ruthless reformer, the man who wants to better everything. In proof thereof we quote the following bassage from a San Francisco journal, which seems as if it were written to order for our own dear native land. The journal in question says: If we reflect upon the slavery of Government we endure we are startled. As a people we rather seem to count clogs, chains and ties, by which we are bound hands and feet to some system of numerosity rule. Yet content with our civil laws and the obligations and duties oppressive rule. Not content with our civil laws and the obligations and duties oppressive rine. And content with our even laws and the longarons and duties arising thereform laws all-sufficient to profect our lives and property, to secure our peace and enhance our happiness, we rush into a network of private, public and general burdens, which make us the slaves of customs and habits, the good sense and utility of which are not apparent. Is there any difference between the case of England and that of America, as put by the San Francisco News Letter?"

## Choice Water-Color Drawings from the Empress Eugenie's Collection.

Some very choice specimens of water-color drawings from her Imperial Majesty Some very choice specimens of water-color drawings from her Imperial Majesty the Empress Eugenic's splendid collection are now on view at Mr. Frederick Davis' Fine Art Gallery, 51 Pall Mall, with the object of being sold to private buyers. There are in all forty-five works by the leading artists of the Continent, and those who are unacquainted with the point of excellence which our neighbors across the Channel have reached in an art which is peculiarly English will do well to make an inspection of these singularly effective works, nearly the whole of which were painted by command of the Empress Eugenie. There are eleven capital drawings by Poeroli's whose laws for being solors is creat that he exempted the nearly the command. by Bossoli, whose love for body-colors is as great that he completely covers the paper in the same nanner that an oil painter impastes his cauxas with thick pigments. By this method great brilliancy is obtained. In one example especially—"Alicante from the Coast," with shipping and numerous figures—a splendid effect of evening sunlight is produced; and in his careful rendering of the Alhambra he on evening summer is produced; and it has careful rendering of the Amanitora for manifests a fine feeling, which at once captivates the spectator. A picture by De la Croix, representing Boulogne fisherwomen trudging along the sands with nets, is a very admirable specimen of water-color painting. The engraved picture, by Fragonard, of "Molicre Reading his Plays," with numerous figures (portraits), is a masterpiece.

#### Political.

General Grant, in obedience to the instructions of the Republican party of nearly General Grant, in obedience to the instructions of the Republican parry of nearly all the States, has, at the National Convention, held at Philadelphia, been renominated for the Presidency. Henry Wilson, Senator from Massachusetts, has been nominated for the Vice Presidency. Ratification meetings over the whole country have been held, showing an abated enthusiam, but indicating the general support, of the party. The Greeley movement is in abevance, awaiting the action of the Democracy at Baltimore. Should the Democracic party indorse Greeley and Brown and give it is adherence to the action of the presence of the action of the control of the co Democracy at statimore. Should the Democratic party intorse Greeley and Brown and give in its adherence to the platform, the movement will be one of great importance and of probable successful results. The sensation of the week has been the powerful speech of the Hon. Charles Sumner, in the United States Senate, arraigning the Administration of General Grant and the President personally charging him with centralizing the Government; the use of the military in civil offices, with proposition, city the most income of the control of the civil of th offices; with nepotism; git-taking; with inproper motives in attempting to ames San Domingo; with being personally quarrelsome; with advancing unqualified men to Cabinet positions; with Caesarism. The speech has created a protound sensation in political circles. Congress has adjourned in angry and bitter feeling, giving promise of an unusually heated political contest. The Democracy of California are nearly unanimous in the support of the Cincinnati nominees, and delegates will be sent to Baltimore instructed in accordance with this sentiment.

# Increase of Population.

The records of the Railroad and Steamship Companies show a slow but steady increase of population in the Pacific States. During the month of May 4,273 persons (through passengers) arrived in this city by rail and 2,513 departed. The arrivals by sea for the same month numbered 2,362, while the departures were but \$20. Of the passengers arriving by sea about 1,336 came from China and Japan; (735 from Panama, 131 from the Sandwich Islands, 100 from British Columbia, 57 from Australia and 50 from Mexico. A comparison of the total arrivals and departures shows a gain for the month of 3,300. In the same month last year the gain was 2,650. In May, 1870, the gain was 4,540. The arrivals and departures by ocean routes and overland for the first five months of this year compare as follows: Per ocean routes—Arrived, 6,881; departed, 3,878. Per Central Pacific Railroad—Arrived, 10,790; departed, 6,921. This shows a gain of 6,872 since the 1st of January last. Jast.

#### Hon. Asher B. Bates,

United States Register in Bankruptcy, resigned his office on the 3d inst. by letter addressed to the Hon. Ogden Hoffman, District Judge United States Court. His Honor declined to receive the resignation, and returned the letter to Mr. Bates. Af-Honor declined to receive the resignation, and returned the letter to Mr. Bates. After a few days delay, Mr. Bates again addressed Judge Hoffman, insisting upon the acceptance of his resignation of the office, to take effect July 1st. Accordingly the Letter of Resignation was ordered spread in full upon the minutes of the Court. Judge Bates has held the office five years, to the entire satisfaction of the people, but owing to failing health he was forced to retire. He is now confined to his bed, is quite helpiess, and is entirely blind. His mind is, however, clear and active, while his bodily infirmities are great. Mr. Bates is a native of New York, from whence he removed to Michigan some forty vears ago, immigrating from there about twenty-five years ago to Honolulu, and residing on this coast six or seven years.

#### Husband. From a

Fonder, tenderer, ever fonder,

But merease my love can know; Here on earth, hereafter, yonder, Love with me must ever grow: Loving you, it must be so.

Dearer, dearer, ever dearer, Loved in youth for that fair face.

Now my heart has seen you nearer, That first love to this gives place, For your soul's diviner grace.

Ah, how sweet was that young passion, How much more than youth was seeing Caught from fairness oh how fair! Now I love with heart grown wise; That fel full, even from the fashion Now the whole dear perfect being

Of the dress you deimed to wear. When your beauty sunned the air. Oh, the life-quake then that shook me,

When on me seemed turned that gaze When hair, brow, speech, laughter took Captive with a dumb amaze, [me Dazzled with your beauty's blaze.

Time that charm has not marred blindly, If his touch a harm has wrought,

Still some rarer beauty, kindly, Every fondling year has brought, Softer, dearer to my thought.

I have fittler learned to prize Clear at last to the soul's eves!

Dear through joys, cares and sorrows; Known, how well! through smiles and tears. Now I feel that all the morrows, Hopes and pleasures, labors, fears, Bring but knowledge that endears,

- Graphic.

James Gordon Bennett.

On 'ast Thursday morning the mortal remains of James Gordon Bennett were consigned to the grave. The telegraph informs us that the streets after the route of the funeral procession were lined with spectators, and flags throughout the city were at half-mast. Among the mortners were some of the most distinguished men of the mest distinguished men of the metropolis. Mayor Ha'l, Horace Greek y, James Brooks and their contemporaries followed the remains to Greenwood Cometery. The interaction the great journalist was one of the most solemn and impressive ever witnessed in New York. The death of so remarkable a man as James Gordon Bernett beves its impress upon the past, the present and the future. By his talents and indomitable persesverance he rose from obscurity and poverty to fame and wealth such as few men are taked to. Deceased was born in Baufishire, Scotland, in 150s, and assume the catholic priesthood. Desting, however, called him to a more useful and honorable prefersion. In 1819 he embarked for America. His strange os and distinguished were many and bitter. After various messapaper experience scand changes he established the New York Herold in May, 1885. In the new field all his energies were called into action. He worked day and night to make the Herold's success, and lived to see it recognized as the first message from the United States. Some time before his death it is stated that he was offered \$2,000,000 for the Herold's stated. consigned to the grave. The telegraph informs us that the streets along the route refused to sell, as he designed leaving it as an inheritance to his son, James Gordon Bennett, Jr. His intentions he confirmed in his will. Besides the *Herald*, Mr. Bennett, 3r. in intended in a communical in the war. Describes the Institute, and the Bennett is said to have left property in real estate and personal educe's varied at over one million of debars. His residence and grounds at Washit 26th He 2hts. and his residence on Fith Avenue are immensely valuable. He says two childand his residence on Fitth Avenue are immensely valuable. He haves two children, a son and daughter, to inherit his name and fortune. It had many bitter enemies, who traduced and vilified him, and often resorted to brutal assaults apon his person. From every disaster he gained new energies, and finally not only conquered but subjugated his worst enemies. To those who had his friendship and confidence he was generous. As a busband and father he was exceedingly kind and tender. He lived, however, as do many original men, isolated from society. In public, whenever he appeared, he was bashful and timid. Posterity will not be content to accept James foodon Bennett as a mere purveyor of news and as the lucky founder of a great Metropolitan journal. He must stand at the bir of public opinion for the uses to which he must the great engine that he wested, for the cause that he served and the which he put the great engine that he weedled, for the cause that he served and the impress that he left on the mind of his day and generation. Judged in this way here is much in the career of the founder of the Heratit to condemn. Let us concede him all the undoubted credit that belongs to striking out an independent walk cede him all the undoubted credit that belongs to striking out an independent walk in journ-vision free from the dictation of caucus or coterie. Set I, in doing thus he substituted for the control of party no higher directing principle. He simply wrote to make his paper self; whatever mood was uppermost in the public many, he himored to the top of its bent; whatever scandal was most pupuant, he raked up to wheether sponjair tasts within; and whatever beam passion there was to fan, the Herald was too often ready to feed it with fuel of intreason. He has been called the founder of "the Status's school of journalism," and he willbed forgiven much for the shams be has pricked and the imposters he has hughed out of counterfail. nance. But it is due to the truth of the past and the human progress of the future, to say that the journals on which instructs and restrains, which has none of the evindiceveness of personal malice, and none of the callowness of the mocking cynic, was precisely the reverse of the journalism which was fostered by the influcance of James Gordon Bennett and exemplified in the palmy days of the Herndal With all his faults, he was a man unquestionably great, and had his carrier life been a struggle of a less hardening kind, he might have left a record full of equally unquestionable goodness. As it is, he was neither corrupt, dissolute nor venal, and that is much to say in an age when such qualities are too common.

## Leaves from a Lady's Diary.

JUNE 9.—Went to church and heard a sermon in English delivered by a German clergyman, who, I think, must have been a converted Rabbi. The whole time he was preaching I was reminded of Commercial street and its clothes shops, not only in the intonation but in the spirit of his discourse. The gist of his exhortation was that we should make a good bargain with God; that we should attend to the business of our soul before that of our body, "for one wears longer, my brethren, than the other." B—walked home with me, good-natured and carrulous little man, one of those of whom you can always see the tongue wagging when they talk, just like the clapper of a bell. He pointed out Mr. T— shouse as we went along, a pretentious mansion on a hill, glittering with plate of glass windows and balconies, yet B— told me that on washing days he helps to hung out the linea and makes himself generally useful about the house.

JUNE 10.—How many women thouse as the target and target and the target and target and target and the target and target an

June 10.—How many women there are that are only true in the secrecy of their household. You go to lunch with them and everything is refined, and in spite of a certain obvious restraint, comme it faut, but if you peep at them when they think themselves alone, they will sit in their night caps and gnaw at a bone with unwashed fingers. With such women good manners are like tight corseis, they hold them erect and in good shape for a time, but the moment the necessity for wearing them is passed, off they go, and the wearer returns to her condition of flabby megligee. They are just the same as poodle dogs which leave off standing on their hind legs and begging the moment their masters' back is turned. Dined with the M—s, whose table is always well surrounded. Henry was in one of his cynical moods, and I got angry with him. He began to tease the guests about eating. "There, now," said he, "our gentle hostess has been down to the market this morning, and out of many carcasses has selected a portion to be cut off and sert home. This piece of flesh has to be cooked so that one part shall be well done and none part underdone, to suit the tastes of the different enters. Moreover, for those who have no appetite, or who have already eaten more than nature requires, rich sauces are invented to excite them to greater excess in devouring. Of all carnivorous are invented to excite them to greater excess in devouring, of all carnivorous are invented to excite them to greater excess in devouring, and many cases eats from force of habit and without appetite." When Henry gets on those themes he is odious. At the same time I must say that there are dianers which are remarkable for the absence of anything to eat and the presence of a luxury of service and ornament. An immense silver epergme with artificial flowers, a dab of soup served in fine porcelain, a silver dish before you, the cover of which conceals two or three

JUNE 12. That naughty little Jennie T— was at the house this morning when Miss P— called, who is so prim and prosy; she began to talk of George H—, saying: "Why, Jennie, he would jump into the sea to save you." She quietly said, "Thank you, I never drown." And yet I know she likes George better than any one else. Went out in the evening to hear a phenomenon of four years old play on the violin. He played so long that Henry whispered to me that he had grown during the performance. Went to see Directe, and enjoyed the quiet yet sparkling dialogue of the piece. That magnificent clever Mrs H— was there, surrounded, as usual, by and commanding the homage of the most agreeable and

witty men of this place. I thought of those lines—is the Queen,
Fairest the light can illumine,
Worshiped by man in the highest estates
Granted on earth to the human;
But to her altar and unto her throne
Cometh no form of a woman.

I almost envied her power and talents, spite of her bad reputation.

## The Business Outlook.

Our exchanges from all points on the Pacific Coast bring the cheering intelligence that the business prospects of their respective communities were never brighter. There will be abundant harvests. The demand for labor in the agricultural sections is very great. In some districts it is impossible to find laboring men, although very high wages are offered. In the mines there is also great activity. Railroads are being surveyed or constructed, not only throughout this State, but in Oregon and Washington Territory. Thousands of men are actively employed, at good wages, in this one branch of our material interests. In no other section of any country on the globe can the workingman find such prospects of gaining a competence as on this coast. By industry and economy, a workingman in California and the States and Territories of the Pacific slope, can soon realize enough to make him a little home, where comfort and happiness may be his lot.

<sup>—</sup> The Imperial Army Band (of Germany), with the consent of the Emperor William, will shortly proceed to America to take part in the World's Peace Jubilee at Boston.

## Polygamy.

Mrs. T. B. H. Stenhouse, of Salt Lake City, has given the public a work entitled an "Expose of Pedygamy," which is a "Record of Persona, Experience as one of the wives of a Mormon Eider during a period of more that, twenty years." We acknowledge its receipt "with the kind complements of the authoress." The penpicture of poygamy, as drawn by Mrs. Stenhouse, is dark and said, "athoush perhaps," as site tells the reader, "only a weak picture of facts as they occurred. The first reading matter in the book page 30 consists of quotations from the New Testament, the Beok of Mormon, and the Book of Covenants, which sace edit tells us that "a man shall have only one wire," and "concubings he shall have none." In the face of this scalem cambination of Christian and Mormon doctrine, we find that Mrs. Stenhouse violated the tenets of each of the three boty books, and entered to years. We they exwave he d that sectamen review was the obstrain of tered to years. We have always he d that sectarian rengion was the offspring of diseased made, a sort of menta, amany, the cvil and terrible results of which, as a illustrated in history, are startling to contemplate. Firm in this convection we have rothing but Kind words for the authoriss of this "Exposé of Povanav". Mrs. Stephouse as a woman, who and mother, is the highest example of all that a 3013. Sections as a woman whe are income, is but neglect example of at a confined, 5 ns two matter, it is not to be underted that her experiences upon very were bitterness, and ad wormwood. But now that she has cast off the shu kees, and speaks according to the dictates of beason and common sense, the error of her life and the system she exposes are hard bare to public view. If these were not her sides to Mormons m, the good and the bad, this record of personal expensions told by Mrs. Stenhouse, would leave that ism as the champ on cancer which afflects the body point c. The orthodox Mormons admit that polygomy is "a great burden to be endured for the Lord's sake. but recigiously become that this burden alone to be endired for the Lord's sake. But reagonsty believe that this termien again relieves them from the terrible affliction with which other communities and the civilized world are cursed, namely prostitution, or, as it is politicly termed, the social exil. The fact that this social scot age was auknown in Utah, with its ord the hundred thousand inhabitants, before the after ascendency of what is an other Gentile clement, is striking. Since this ascendency the social evi is rampout in Could be the relative striking. Sense this assendency the social civil is ramposal in Sakt Lake (type in special original point method to the territory when yer the Mormons are not in power. To pretend to write anything about Mrs. Stathouse 8 book and not give this broad, anothersed view of post any amenist the mormons, would be to do great this time to the Mormon people. The "Expose of Postgamy does with the "peoplear institution" in its isolation from the regions system of which it is a part. Taken to the potter, as we have said, is dark and sad. It is written in a causte, candid, and weman, way. Paccel before the Mormon women by one of their own experience, the work will maturally excite their carios ty and lead them to reflect. Outside Utah the book hers been we'r received. Considering that three-fourths of the human race are polygamists, any work on this subject will be peculiarly fascinating to the other fourth.

Death of R. B. Swain.

"Sad news will go over the wires to-day." These words have a prophetic and double momenturiness. They were specien by the late Starr King, when desing, to R. B. Swain, his most trusted and best-loved friend. To-day we repeat them with emphasis of rim to whom they were first spoken. Late yesterday atternoon, one of those somers whispers passed from tongue to tongue and from our to day. which are like the sound of gathering storm, that R B Swain was dead. None among the merchant princes of our State was more truly are presentative than Le of the Ideal Man of Commerce and the non-positical citizen. It oppours that he of the Ideal Man of Commerce and the non-positival citizer. It uppears that he was troubled match with insomitia, and rising before day plit yest reasonable, took a dose of landamen, in mistake for vaccian which shoot leak it. The result was fatal. His loss will be test far and was an first commanity, not only attempting of property of the positivations, and perhaps more than all, by many a poor ramity whom he unostentations has existed. Born at Nanticeket, Mass., in 1825, he removed to New York at the age of sixten. As a clerk in the firm of Grannel', Montarn & Co. he obtained a therough knowledge of business, while the acquisitance he made of evenings with the French, Spanish, and Potterwise here are severed of value to that Longe in their torsion correspondents of their guese languages were of value to that house in their foreign correspondence. came to California in 1855 for his health, but became engaged in business and remained, soon taking a prominent place among our merchants and ph ianthropists. An intimate friend of Dr. Bel ows in New York, it was he who brought Starr King to California. An enthusiast for knowledge, I was as a merchant that he toyed to be known. "I regard," he said, "honorable distinction as a merchant as infinitely more valuable than I do the highest zore that can come from any office in the gift of people or President." He was President of the Benevoord Association, Sorretary of the Ladius Protection and Relief Society. Trustee of the Sacrass I may other majorant offices. His administration of the Mint, of which he was appointed superintend-Omees. Its autofiseration of the sun of water in was appeared separate the ent, by President Lincoln, without solicitation, and which be returned at the tright request of the Secretary of the Treasury, reflects tadying cross of the premory, for he refused the legal wastage to which be was excited that a few premory; for he refused the legal wasaage of which and of Consal Booker, on days since he sat an ever welcome guest at the right hand of Consal Booker, on the occasion of the British Benevolent dinner on the Queen's Berthany. The tongue that was then cooperat is now si'ent in death, but the record of his neble and industrious life will remain in our institutions while San Francisco stands.

## Concepcion De Arguello.

(PRESIDIO DE SAN FRANCISCO.-YEAR 1800.)

Looking seaward, o'er the sandhills, stands the fortress, old and quaint, By the San Francisco friars lifted to their patron saint—Sponsor to that wondrous city, now apostate to the creed, On whose youthful walls the Padre saw the angel's golden reed; All its trophics long since scattered, all its blazon brushed away, And the flag that flies above it but a triumph of to-day. Never scar of siege or battle challenges the wandering eye-Never breach of warlike onset holds the curious passer-by Only one sweet human fancy interweaves its threads of gold With the plain and homespun present, and a love that ne'er grows old; Only one thing holds its crumbling walls above the meaner dust: Listen to the simple story of a woman's love and trust.
